MISSION & OBJECTIVE

The Euromed School of Architecture, Design and Urbanism (EMADU), establishment of the EuroMed University of Fez (UEMF), is a co-creation between the UEMF and the University of Florence with the involvement of the Polytechnic University of Madrid and the National School of Decorative Arts (ENSAD Paris). Its mission is to train Architects, Designers, Town Planners, Landscape Architects and specialists in heritage conservation.

The School provides innovative training combining the skills of architects and engineers to form profiles capable of better contributing to the design and organization of the living space of the citizen of the 21st century, in compliance with standards of quality and the environment.

EMADU TRAINING OFFER

DESIGN LICENSE (BAC +3)

License in Design (Bac +3)

A discipline aimed at managing the project in all its complexity, both in terms of product and service innovation. It is a process that encompasses aesthetic, functional, material and technical aspects; but also communication and the market.

The EMADU Design Degree is designed to train designers capable of managing creatively, beyond the object, decision-making processes, mediation and integration of multidisciplinary contributions; thus allowing the winners to mix a very broad spectrum of sectors.

Opportunities:

Design Agencies, Industrial Companies (textiles, agri-food, automotive, home automation, furniture, etc.), Media (Television, press, etc.), Cinema, Animation Agency (cartoon illustrators, comic strips, etc.), Publishing Houses, Fashion Design Agency, Communications Agencies, Interior Design Agencies...

ARCHITECTURE (BAC +6)

Architect diploma (Bac +6)

the diploma to which this sector leads is an architect's diploma with Moroccan recognition and accreditation.

The student-architect is called upon to be:

- › Creative, innovative, aware of technical knowledge and know-how and open to the outside world;
- › Operational, competitive, able to analyze and master the elements of the context;
- › Possessing conceptual and creative abilities and showing business management skills;
- › Having a critical mind and the ability to provide appropriate solutions;
- › Mastering communication, in all its forms, to interact with multidisciplinary teams;
- › Respecting the rules of ethics and deontology necessary for the exercise of the profession of architect.

MASTER DESIGN (BAC +5)

Master in Design (Bac +5)

Provide education in line with the concerns of the hour; but also and above all in those to come, by involving the knowledge and know-how of the other Faculties, Institutes and Schools of the University; in particular their Euro-Mediterranean partners;

Provide a favorable working environment and effective methods for the optimal acquisition of knowledge, knowledge and know-how, necessary for the profession of urban planner, through both work in laboratories and in the field; in mixed teams;

Equip the student with knowledge of institutional architectures and the ability to interact in multidisciplinary teams;

Train the student in a methodology of reflection, in analytical procedures, in the sense of critical thinking and stimulate in him innovation, sensitivity and the confrontation of ideas;
