SDG1 Report: No Poverty

UEMF is committed to the fight against poverty and involves its entire community in helping to solve this problem through various social actions.

Communication

This work begins with communication with families and individuals from poor backgrounds in order to inform them of:

- UEMF's quality training and education offerings.
- Scholarships and insurance
- Student living conditions

Communication activities are numerous and involve participation in:

-student fairs in all regions of the country and in particular the most disadvantaged

-mobile caravans co-organized with NGOs in rural and hard-to-reach areas

To this end, the UEMF has signed several agreements with NGOs and foundations to provide them with merit scholarships for candidates from disadvantaged backgrounds. These scholarships are in the form of free or partially free teaching places for the entire duration of the studies.

UEMF scholarships

- Our University was created as a non-profit association called a Foundation and enjoying public utility. It does not have shareholders, but rather contributors and donors.
- Our mission is public and our management style is private, without profit motive.
- Our primary objective is to offer excellent higher education and research programs that meet the highest international standards.
- Our aim is to make the Euromed University of Fez accessible to a greater number of students, by establishing several categories of scholarships:

1. Excellence scholarships for brilliant students who have distinguished themselves through the excellence of their academic record, regardless of family income;
2. Merit scholarships for students from low-income backgrounds with a very good academic record;
3. Solidarity grants covering tuition, residence and catering fees for good students from disadvantaged backgrounds;
4. "Africa" scholarships for good sub-Saharan students with low incomes;
5. Total exemption from tuition fees for all doctoral students;
6. Attractive and competitive living allowances for doctoral students 5000Dh net / month minimum;
7. Attractive and competitive scholarships for postdoctoral researchers between 13,000 and 25,000 Dh net / month

- All scholarships are reviewed by a committee that acts in a rigorous, transparent and fair manner and no other considerations may interfere with the sine qua non criteria of excellence.

- For the 2022/2023 academic year, several scholarships have been awarded to students, to partially or fully cover tuition, residence and catering fees for the various programs offered.

Tuition grants

For each of the two categories (Excellence and Merit), there are four types of scholarship:

1. Scholarship to cover 100% of registration and tuition fees
2. Scholarship to cover 75% of registration and tuition fees
3. Scholarship to cover 50% of registration and tuition fees
4. Scholarship to cover 25% of registration and tuition fees

Total number ofstudents: 3000 in 2022-2023, more than half of whom are scholarship holders.

Solidarity grants

The UEMF awards solidarity grants covering up to 100% of residence and catering costs for students with a good academic record and from disadvantaged backgrounds.

The UEMF is strongly involved in its local, regional and national environment and works towards solidarity by:

1. Providing access to educational resources for those not studying at university – for example, computers, bibliographic works, online courses and access to conferences;

2. Organizing events at the university open to the general public: public lectures, community educational events;

3. Traveling to local and regional schools for awareness-raising activities, student-run social and volunteer projects or to improve access to basic services(food, housing, transportation).

Donations obtained by UEMF for the benefit of scholarship students

A €5 million donation from the EU through the Competitiveness and Green Growth Support Programme (PACC) aimed at supporting the University's scholarship policy for equitable access for deserving students to excellent higher education and also the promotion of training courses in green professions

Loan options

Students enrolled at UEMF have the option of taking out a student loan with an exceptional interest rate of 2% and only repaying it from the sixth year, i.e. one year after obtaining a Master's degree or equivalent to Bac+5.

"Enseignement Plus" loan for financing studies | UEMF (ueuromed.org)

Scholarships for students from low-income countries

UEMF places particular importance on training students from friendly low-income countries. To this end, the university has the services of a presidential advisor to:

- Develop and identify opportunities for UEMF partnerships with public and private institutions, particularly on the African continent.

- Develop and strengthen cultural, scientific and economic relations with partner countries, particularly within the framework of South-South cooperation;
- Represent the University at professional events such as trade fairs and international events.
- Ensure the implementation of support measures (sources of funding, accommodation, internships, etc.) taken by the UEMF to facilitate and improve the reception and recruitment of students from low-income countries.

Several agreements are operational to provide scholarships to African students, including those signed with:

- ASRIC African Science, Research and Innovation Council (ASRIC)(http://asric.africa).

Link : https://www.ueuromed.org/actualites/annonces-diverses/les-bourses-asric-uemf-pour-etudiants-africains-sont-desormais

These scholarships currently enable dozens of African students from around twenty low- and middle-income countries to pursue their doctoral studies at UEMF.https://www.ueuromed.org/formation-doctorale/formation-doctorale-sciences-de-lingenieur

- ANBG (National Scholarship Agency of Gabon)https://www.anbg-ga.com/

Mobility grants abroad

For our students who wish to complete part of their studies abroad, the cost of their international mobility can be partially covered by scholarship programs, depending on the destinations and types of mobility, such as:

- The ERASMUS program and in particular K107 which has enabled dozens of mobility opportunities for engineering students from INSA EM;
- Dual degree agreements (example Master of Business Law with the Sorbonne Law School);
- EMADU agreements with the Architecture departments of the universities of Mons (Belgium) and Florence (Italy).

Health and Hygiene

- The provision of medical and paramedical care: availability of an infirmary and paramedical staff;
- Monitoring the hygiene status of university premises;
- Health education;
- Organization of health awareness and information campaigns;
- Monitoring the state of food hygiene and hygiene and safety in the university environment.

Local Startup Help

Providing assistance to the local community by supporting the start-up of sustainable businesses through education or relevant resources (mentoring programs, training workshops, open access to university facilities). Conferences are accessible to people outside UEMF, as well as other activities: internships, use of equipment, advice, etc.https://ueuromed.org/actualites/annonces-diverses/concours-pour-ladmission-des-porteurs-de-projets-dans-lincubateur-de

Student social actions

As part of their educational and para-educational activities, UEMF students participate in the implementation of social and solidarity actions. Among the initiatives carried out in this direction, we can cite:

- The "student clubs" (Rotaract, Hands, etc.) which carry out several sustainable entrepreneurship, solidarity and civic engagement actions each year;

Hands | UEMF (ueuromed.org)

- The PISE Projects (Socio-Economic Impact Projects) are integrated into the study curriculum of the University's Business School, through which students conduct a project during their year of study aimed at producing positive effects on the socio-economic environment of the university.

The Hands Club is launching a campaign to collect warm clothing to benefit a population in need during this winter period.

ICESCO Women in Science Chair

Hundreds of young primary school girls from several regions and rural areas are discovering AI (Artificial Intelligence) during Coding Bootcamps.

Inspired by the approach already carried out by the Women in Science Chair, these workshops, known as Coding Bootcamps, promote inclusion and initiation to the field of AI by encouraging young people to later move towards studies in digital engineering and artificial intelligence.

Actions during Covid 19

In response to the coronavirus pandemic, the EU has made an additional donation of 5.4 million dirhams to theEuroMed University of Fez(UEMF), intended for the acquisition of computer and laboratory equipment. This support has enabled the University to ensure educational continuity for its scholarship students and to manufacture medical protective equipment.

All united against Covid-19: educational continuity ensured by the Euromed University of Fez with the support of the European Union (eib.org).

- A €500,000 donation from the European Union for the acquisition of IT equipment (computers, internet connection keys and subscriptions) and laboratory equipment (3D printers). This equipment has enabled the university to ensure educational continuity for 420 of its scholarship students who are isolated or not equipped with a computer, and to manufacture medical protection equipment to combat the Covid-19 pandemic in Morocco.

Offers laptops to scholarship holders

ReadEuromed University of Fez, with the financial support of the European Union, offered all its scholarship holders magnificent new PCs (HP core i5 8th Gen) accompanied by 4G keys and a one-year internet subscription. A total of 420 kits were distributed, including 26 to Sanady scholarship holders. This great initiative will allow scholarship students to overcome the difficulties linked to the lack of equipment during this period of confinement and to continue this school year in the best possible way.

Solidarity actions between 2022 and 2023

Solidarity action: Hot meals December 7, 2022

The Hands Club prepared a variety of hot meals which were distributed to benefit 50 homeless people.

Solidarity action: distribution of food baskets April 7, 2023

As part of its solidarity actions, the Rortact club organized on April 7 an action to distribute Ramadan baskets for the benefit of deprived families in the Bab Ftouh district and to residents of the Ahly center in the city of Fes.

Hands Club Solidarity Action April 12, 2023

On April 12, the Hand Club organized a social event for the residents of the Garwawa orphanage. The day was marked not only by a program of activities and a collective ftour but also by the distribution of bags of clothing.

Collective Iftar at the Bendriss Center

To mark the month of Ramadan, the Rotaract Club held a group ftour on April 11th for the benefit of the residents of the Abdelaziz Ben Driss Child Protection Center. The day was also marked by the organization of several sports and artistic activities for the benefit of the young residents.

Lion Club Solidarity Action

On May 23, the Lions Club organized a solidarity action at a maternity center in the province of Moulay Yaacoub.

Digiclub social action

Digiclub members led a digital outreach workshop for students at Zlilig School as part of the Second Chance, New Generation program.

Rotaract Club Social Action

On May 20, 2023, the Rotaract club organized a social action at the Chaouki School in the Bab Ftouh neighborhood of Fez. Members carried out renovation work and led an oral hygiene campaign for the benefit of the students.

Humanitarian Caravan November 17, 2022

As a second activity of the year and still within the framework of making known the hidden landscapes of the Eastern Middle Atlas region, the outdoor club organized on November 17 an outing in the Missour region in the province of Boulemane.

A wave of solidarity is being organized at the Euromed University of Fez following the

earthquake that struck our Kingdom on 08/09/2023

Following the recent earthquake that struck the Al Haouz region, our University mobilized to participate in the national solidarity movement by implementing three concrete actions:

- The institutional and financial participation of the UEMF in the Special Fund for the Management of the Impact of the Earthquake in Morocco (a donation of 1.6 million Dirhams);
- The establishment of aid for students and staff from disaster areas.
- The contribution of 400 thousand dirhams in the form of new supplies sent by truck to the disaster areas and including beds, blankets and kitchen supplies

2024: Euromed University of Fez at the heart of action for the SDGs

Launch of the first Bootcamp of the Tech4Farmers program at the Euromed University of Fez

From June 10 to 12, a bootcamp brought together AgriTech innovators supported by the French Development Agency (AFD) as part of the "Tamkin LiTanmia" project, in partnership with the Fez-Meknes Regional AgriTech Innovation and Entrepreneurship Hub. Participants included promising startups such as DeepLeaf, Jafife, ARWA Solutions, and AgrI-bOT, each bringing their expertise to transform agriculture sustainably.

The first day was dedicated to a welcome, introductions to Design Thinking, and discussions with experts. The second day explored project development and prototyping, including role-plays to understand user needs and funding opportunities. Finally, the third day focused on partnerships, with feedback and individual coaching sessions. This program provided startups with a platform to innovate, strengthen synergies, and contribute to the region's sustainable development.

April 27th, 2024

We Green Club organized the tree-planting initiative carried out by the at Dawiyat School which was a remarkable endeavor aimed at raising awareness among students about the importance of environmental preservation and promoting sustainable practices from a young age.

Organization of a humanitarian caravan

“On December 9, the Lions/Leos of Fes spread the warmth of Winter to the Warmth of Tawnat Thar Esouk, which was transformed into a festive haven, illuminated by generosity and solidarity.

Amidst the bursts of laughter from children playing soccer and singing, our action came to life around the gaming tables, providing warm clothing to families, wrapping them in warmth for the coming winter.

This day, etched in the memories of Tawnat, more precisely Thar Esouk, was much more than a celebration. It was a brilliant demonstration of the spirit of the Lions/Leos, where joy blends with social action, creating a web of solidarity and friendship in the heart of winter.

https://www.instagram.com/reel/C0xP8T4sqc5/?igsh=MzRlODBiNWFlZA%3D%3D

Humanitarian caravan: Al HAOUZ Province

"The Lions and Leos of Fez, with the generous support of the USFP, have come together to collect donations for a significant initiative. On Monday, September 18, at 9:30 a.m., all collected donations will leave Fez for Meknes and, finally, on September 20, they will arrive in Marrakech. The unity and dedication of all the Leos and Lions of Morocco have been essential in preparing a significant action to be held on September 22 in Marrakech and its surrounding areas to distribute these donations. Many thanks to all the Leos, Lions, and the USFP for their unwavering support, which made this initiative possible."

UEMF students make the voices of young Africans and Euro-Mediterraneans heard before the Parliamentary Assembly of the Union for the Mediterranean

On February 14, 2024, students from the Euromed University of Fez organized a summit under the theme "Euro-Mediterranean and Transatlantic Openness" with more than 200 participants from 30 countries. This summit addressed topics such as energy ethics, sustainable development, transportation, climate change, and African challenges.

The summit culminated in the Call for Investment in the Future, read out on February 16 at the 8th Summit of Speakers of Parliaments of the Union for the Mediterranean. This call underscores the need to strengthen cooperation between Europe and Africa through concrete projects, allocate pledged funds for climate resilience, and support initiatives such as the Nigeria-Morocco gas pipeline.

The students also welcomed Morocco's initiatives for economic integration, infrastructure, and education in Africa, while calling for a "Marshall Plan" for education and research in Africa as an investment in the future to combat poverty, terrorism, and illegal immigration.

Bouhouda Medical-Dental Caravan: July 5-7, 2024

Key points :

- Specialties covered: general medicine, pediatrics, cardiology, gynecology, radiology, ENT, rheumatology, gastroenterology, pharmacy and dentistry.
- Additional activities: free distribution of medicines and awareness-raising workshops. This action had a significant impact by providing quality care to a remote rural community.

Organized in the Taounate region, this caravan enabled more than 1,400 medical and dental consultations to be carried out thanks to collaboration with the health delegation and the APSMIRS association.

https://www.instagram.com/p/DABLDm4Mtxg/

Hamria-Settat Medical-Dental Caravan: October 25-27, 2024

The Elite Club, in partnership with the Sahwa Association and the NGO Neya Charity, organized a medical-dental caravan in Hamria from October 25 to 27, 2024, offering free care to the local population. A total of 1,463 consultations were carried out, spread across various specialties. Details of Consultations: General Medicine: 300 consultations Ophthalmology: 200 consultations Dentistry: 130 consultations Cardiology: 80 consultations Gastroenterology: 120 consultations Pediatrics: 210 consultations Rheumatology: 140 consultations Gynecology: 70 consultations The event provided essential medical care to rural and vulnerable populations. It also helped raise awareness among residents about the importance of prevention. The success of this caravan illustrates the Elite Club's commitment to improving local health conditions.

https://www.instagram.com/p/DBuBzbUNULu/

A meal, a smile – A solidarity action from the Elite Club

In an atmosphere marked by solidarity, respect, and kindness, the members of the Elite Club carried out a simple but profoundly humane action in the heart of the city's streets: the distribution of meals to people in precarious situations. More than a charitable gesture, this initiative carried a powerful message: to reach out to others, wherever they are, without judgment, with an open heart. It wasn't just a matter of feeding bodies, but also of providing human warmth, a kind look, a sincere ear—all those little things that restore a little dignity and hope to those who, too often, feel invisible. Armed with carefully prepared meals, the club members ventured into different neighborhoods, driven by a deep desire to take action. They reached out, exchanged a few words, sometimes smiles, sometimes meaningful silences. But each time, humanity was expressed, in all its simplicity and power. 60 meals were distributed. But behind this number are 60 moments of sharing, 60 moments of mutual recognition, 60 proofs that human connection remains one of the most powerful vectors of change. Because sometimes, it's not so much what we give that counts, but how we give it. This action would not have been possible without the sincere commitment of the members of the Elite Club, nor without the support of people who believe in the power of the collective and the heart. Together, we have proven that every small gesture can bring light, and that sometimes a simple meal is enough to rekindle a spark in someone's eyes.

Training workshop for elected officials of the province of Taounate

As part of the partnership between the Euromed University of Fez and the Fez-Meknes Regional Council, a training workshop for elected officials of the province of Taounate was organized on April 29 and 30, 2025, in Taounate, under the theme "Local development".

The workshop aimed in particular at the dynamics of strengthening local capacities around four priority Sustainable Development Goals (SDGs):

SDG 1: Eradication of povertySDG 4: Quality educationSDG 10: Reduced inequalitiesSDG 11: Sustainable cities and communities

This workshop supports the mobilization of resources and territorial actors around and in response to the specific needs of local populations, while promoting their economic, social, and cultural potential. This participatory approach, rooted in local realities, promotes inclusion, resilience, and social innovation.

Medical & Humanitarian Caravan: ROTARACT UEMF

February 22-23, 2025, this weekend, we took winding roads and crossed rain-soaked paths to reach the heights of Ikaouen—where access to healthcare is limited, but solidarity knows no boundaries.

Thanks to @association_arads, our incredible doctors and specialists, the generosity of @sante_bio_premium for their donation of feminine hygiene products, and above all the unwavering commitment of our members, we were able to:

- Raise awareness about feminine hygiene and measles prevention
- Provide gynecological and pediatric consultations
- Distribute essential medicines and warm clothing
- Bringing comfort to a community in need

Despite the rain, despite the distance, our mission remained intact. Because it is in these moments—between fatigue and satisfaction—that we fully grasp the meaning of commitment.

https://www.instagram.com/p/DHjSYyEMzXn/?img_index=12

150 Meals, 150 Stories

On March 19, 2025, a solidarity initiative led to the distribution of 150 Iftar meal baskets in several neighborhoods of Fez, benefiting people in need: workers, the homeless, and marginalized people. More than just a simple gesture of food, it was an act of humanity, comfort, and solidarity, made possible thanks to the generosity of donors.

https://www.instagram.com/p/DH8oR52MLaj/?img_index=13

Medical-Dental-Humanitarian Caravan – Oulad Ali Youssef, Boulemane

On February 8, 2025, the ELITE Club of the Euromed University of Fez, in collaboration with the Cultisio Club of the ESTF, organized a medical-humanitarian caravan in Oulad Ali Youssef, in the province of Boulemane, in the heart of the Middle Atlas. Supported by local authorities, partner associations, and volunteer medical staff, this initiative aimed to provide multidisciplinary medical support to the inhabitants of a landlocked area, while distributing essential humanitarian aid (food, clothing, school supplies).

A diverse medical team provided consultations in general medicine, pediatrics, gynecology, cardiology, ophthalmology, dentistry, and traumatology, as well as health education workshops. Dental care was provided on board a mobile unit, while ophthalmological examinations allowed for the screening of visual disorders and referral to appropriate solutions.

For the youngest members of the family, fun and educational activities were organized: toothbrushing workshops, readings, distribution of hygiene kits, candy, and toys, in a friendly atmosphere led by mascots. More than 100 food baskets, as well as warm clothing and school supplies, were distributed, providing concrete support to families during the winter.

Solidarity Iftar – A Moment of Sharing and Humanity

On March 29, 2025, during the holy month of Ramadan, the Elite Club organized a solidarity Iftar for 100 people in precarious situations in Fez. This initiative is in line with the fundamental values of Ramadan: generosity, fraternity, and solidarity.

The main objective of this action was to provide more than just a meal: to offer a moment of comfort and dignity, while strengthening human ties and raising awareness among club members of the importance of social commitment.

The event began with the preparation of complete and balanced meals, respecting hygiene standards, followed by direct distribution on the ground, promoting human contact and listening. The warm and friendly atmosphere helped strengthen the bonds between volunteers and beneficiaries.

This action highlighted the values of active solidarity, social inclusion and civic responsibility, thus affirming the role of the Elite Club as an actor of social change, committed to a more just and united society.

Solidarity distribution of ftour – Lions Euromed Club

On the occasion of the holy month of Ramadan, the Lions Euromed Club organized a ftour meal distribution in several neighborhoods, offering a moment of sharing and solidarity to around 100 people in precarious situations.

This initiative helped to strengthen social cohesion and provide concrete support to vulnerable populations during a symbolic period.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Solidarity distribution and collective iftar – Hands Club

During the holy month of Ramadan, the Hands Club distributed 20 food baskets to families in difficulty, in order to ease their daily lives and strengthen solidarity within the university community.

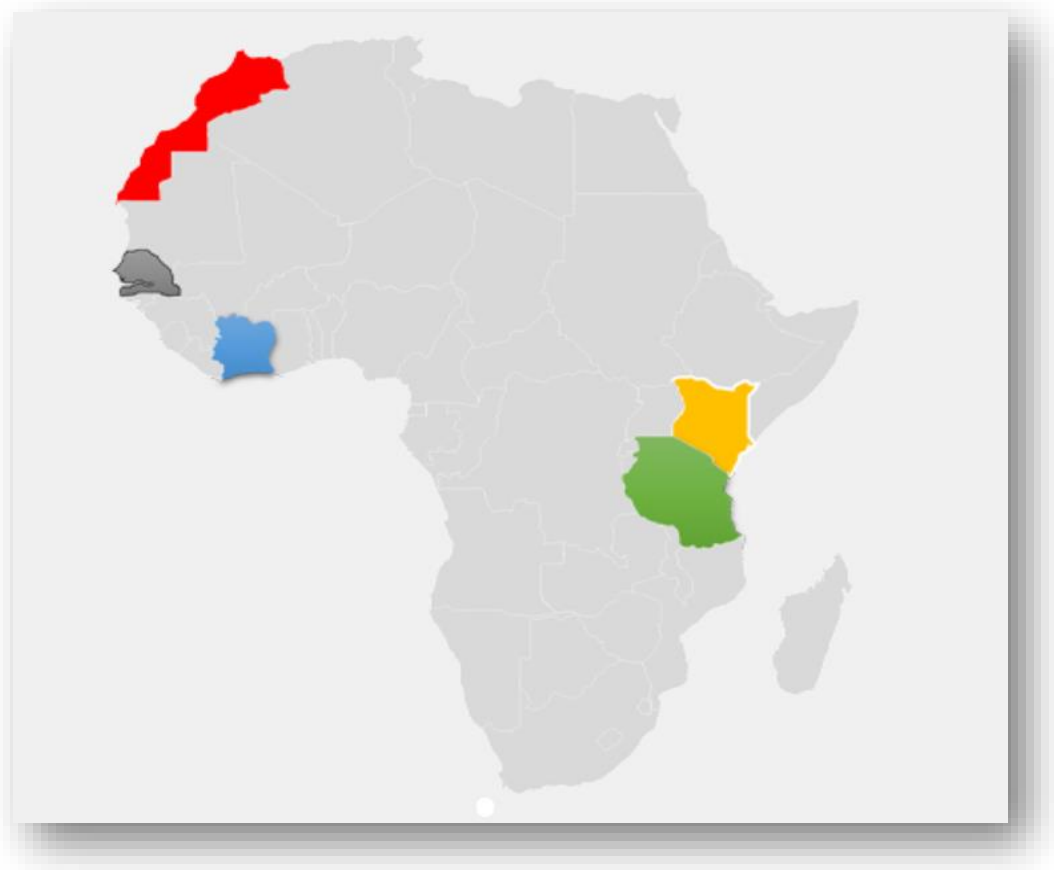

The club also organized a collective iftar, which brought together more than 100 participants, promoting a moment of sharing and conviviality.

Doctoral Thesis Defense in “International Relations” by Mr. Othman SQALLI HOUSSAINI

This thesis explores the role of culture and religion in socio-economic development and the strengthening of bilateral relations between Morocco and other African countries. Through the analysis of cooperation policies, field initiatives, and interviews with African institutional actors, it highlights the impact of these dimensions on the political, economic, and social spheres. The study aims to promote cultural and religious values as levers for sustainable development and cohesion, while proposing concrete recommendations to strengthen African cooperation.

SDG2 Report: Zero Hunger

Food aid

The Covid-19 pandemic has significantly disrupted the food system and increased the need for food aid. During the Covid-19 outbreak in Morocco, restrictions impacted both food suppliers and family meals, nutrition, and food security. Surveys have shown that many people, particularly young people, have adopted unhealthy eating habits, with the stress of confinement affecting their diet and health.

Several concrete and supportive actions have been successfully carried out at UEMF to fight against hunger at national and local level:

- In mid-March, and since the announcement of the fund dedicated to managing and combating Covid-19, UEMF staff members (presidential team, deans, directors, professors, and administrative and support staff) have contributed all or part of their monthly salaries. The amount donated to this fund exceeds one million dirhams.
- UEMF is a civic-minded university with mutual aid, solidarity, and assistance in its DNA. UEMF quickly came to the aid of those in need during the health crisis, particularly during the holy fasting month of Ramadan. 1,000 complete baskets containing various food items and supplies were offered to the needy in the Fez region with the help of local authorities.
- The UEMF provided a variety of assistance to international students stranded in its university residences. In addition to multiple disinfection operations, international students received assistance and kindness from the University: packed lunches, food, hand sanitizer, psychological support, and various other types of assistance.
- University scholarship holders benefit from a top-up of their UEMF cards at the beginning of each month to guarantee them permanent access to the university restaurant and the UEMF shop.

Training and learning

UEMF through its BiomedTech School of Biomedical and Biotechnology Engineeringhttps://www.ueuromed.org/etablissement/ecole-euromed-dingenieurs-biomedtech/filieresorganizes initial and continuing training modules on access to knowledge on food safety. These modules allow the acquisition of knowledge, skills in this area and access to technology in the field of food safety.

At the R&D level, a large regional innovation center called Agritechhttps://www.ueuromed.org/structure-innovation/agritech, is currently being developed and will aim to contribute to the emergence of the insufficiently exploited potential of the Fez-Meknes region in its traditional activities (notably agri-food) and the development of territorial growth drivers that create wealth and jobs, notably through the combination of research, innovation and entrepreneurial development in the aforementioned sectors, taken individually or in synergy.

Fight against waste

The UEMF encourages subcontractors to control food quality and avoid waste. The energy use of organic waste for the production of bioenergy (biogas, liquid biofuels) and compost is currently being tested in student projects.

- Choice of food suppliers
- Protection and preservation of food products in compliance with the national standards of the National Office for Food Safety (ONSSA)http://www.onssa.gov.ma/
- Delivery of food products in the best conditions
- Anticipation of public needs by analyzing questionnaire responses
- Menus composed with a dietician in response to individual needs: light menu, full menu
- Meal structure and consideration of specific customer needs (quantities/portions served)

- Training restaurant staff in waste sorting
- Daily donation of food leftovers to charities
- Composting peelings

Support for women's cooperatives

Students often organize forums and fairs for women cooperative members to showcase local agri-food products. The UEMF thus encourages organic production and promotes fair trade. The UEMF thus prioritizes the purchase of products from local and sustainable sources. Eating organic has become a leading trend in society, to the point of wanting to convert several agricultural areas to organic farming. This ambition underpins the Moroccan government's Green Plan. Thousands of jobs could be created by 2030.

Research and incubation of projects

FSF

The Fez Smart Factory Ecosystem is launching its first competition for the admission of the first project leaders into its industry 4.0-oriented incubator. This competition is open to any individual or team with a project to develop an industrial unit for innovative, high-value-added and competitive product(s) that optimizes its performance through the implementation of industry 4.0 concepts and technologies. The project must fall within one of the following sectors: agri-food industries, ...https://fsfindustry.com/concours/

Hackathon "Euromed Sustainable Impact Challenge"

Green Wings is a mobile application created by a group of eight students in Business, Artificial Intelligence, and Design at UEMF. The application aims to promote RAM's CSR initiatives and instill them in employees' habits through three main components: carpooling, catering, as well as eco-scoring and eco-ranking.

- Carpooling will help minimize the carbon footprint.
- The catering component will allow employees to confirm or not their presence at the company restaurant the next day, as well as to choose the foods that would make up their menu in order to avoid food waste.
- Eco-scoring is a score calculated based on 3 factors: water and electricity consumption internally and externally among RAM's various employees, the rate of involvement in carpooling and RAM's eco-responsible activities, and finally volunteering. This score will lead to an eco-ranking that will elect the best eco-friendly, which will create a competitive and fun atmosphere and allow people to combine business with pleasure.

International cooperation

Pr. Hafsa El Bekri participates in the "Model World Trade Organization" in St. Gallen and Geneva

Professor at the Euromed Business School of the UEMF, Pr. Hafsa El Bekri participates in the "Model World Trade Organization" work in St. Gallen and Geneva from April 6 to 13.

The work took place at the Kantonsrsaal, at the World Trade Organization in Geneva. During her participation, Professor Hafsa El Bekri had a dual mission:

Observation and assistance to 72 representatives of the best universities worldwide during the negotiations.

Take part in the Canadian delegation to lead the negotiations of the "Committee on Environmental Footprint of Traded Food".

Actions to combat famine between 2022 and 2023

Solidarity action: Hot meals December 7, 2022

The Hands Club prepared a variety of hot meals which were distributed to benefit 50 homeless people.

Solidarity action: distribution of food baskets April 7, 2023

As part of its solidarity actions, the Rortact club organized on April 7 an action to distribute Ramadan baskets for the benefit of deprived families in the Bab Ftouh district and to residents of the Ahly center in the city of Fes.

Hands Club Solidarity Action April 12, 2023

On April 12, the Hand Club organized a social event for the residents of the Garwawa orphanage. The day was marked not only by a program of activities and a collective ftour but also by the distribution of bags of clothing.

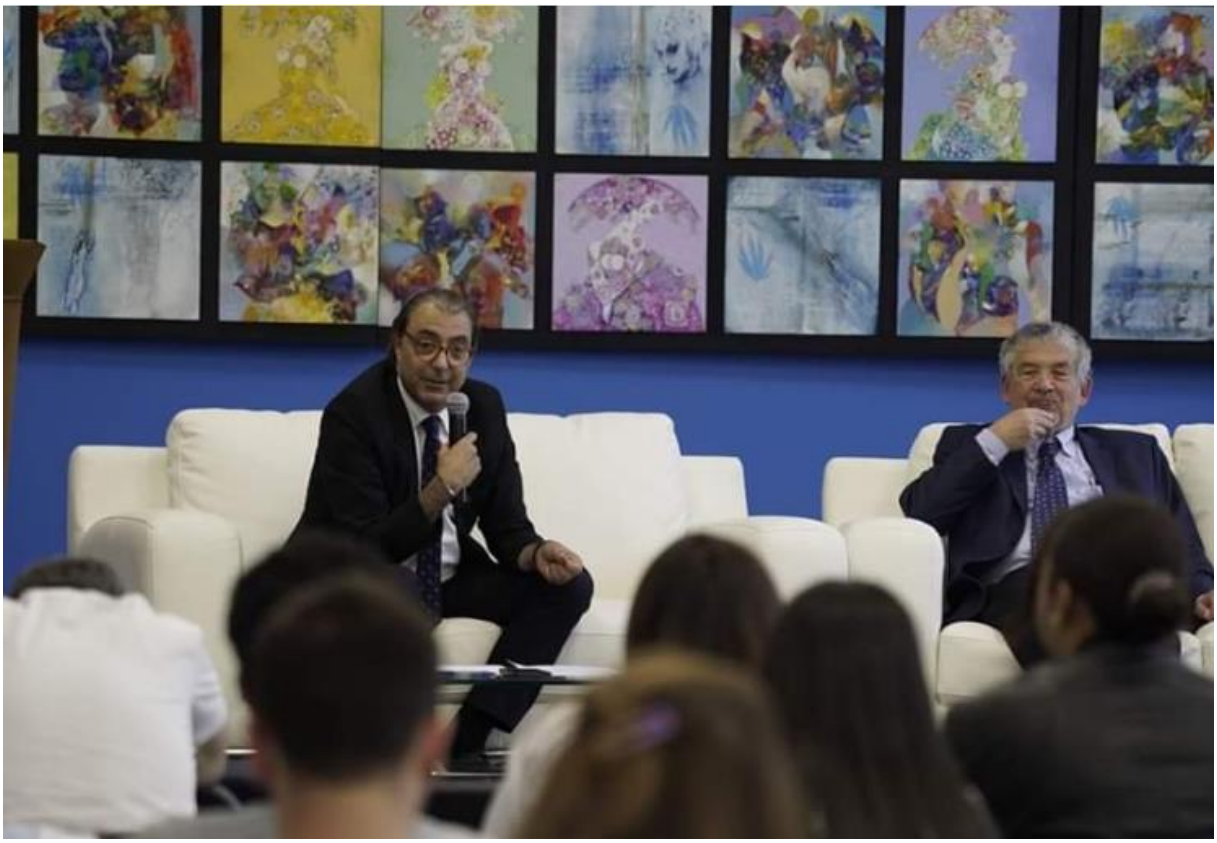

Collective Iftar at the Bendriss Center

To mark the month of Ramadan, the Rotaract Club held a group ftour on April 11th for the benefit of the residents of the Abdelaziz Ben Driss Child Protection Center. The day was also marked by the organization of several sports and artistic activities for the benefit of the young residents.

Other activities

Workshop on AI Applied to Agriculture and Food Security May 15, 2023

Euromed University of Fez, in collaboration with its partner Shenkar College of Engineering and Design, is organizing two workshops on May 15 and 16, 2023, one on AI applied to agriculture and food security and the other on intelligent transport (ITS), mobility and urban planning.

The conference, whose work was launched by the respective Presidents of the two institutions, Prof. Mostapha BOUSMINA of Euromed University and Prof. Sheizaf RAFAELI of Shenkar College, was punctuated, on the first day, by multiple interventions by researchers and students from the two universities, moderated and led by Professors Salim BOUNOU (Euromed) and Yoram HALEVI (Shenkar).

The presentations highlighted the results of the work carried out by the various teams, namely in advanced irrigation, optimal control, sensors for smart agriculture, bio-packaging using the properties of glycans, in addition to innovative outputs in the fields of fertilizers, treatment and recovery of mining waste and wastewater.

Roundtable: Water, Agriculture and Food Security, Building a Nexus Approach to Africa's Climate Change Narrative February 2, 2023

The Research Institute for European, Mediterranean, and African Studies (RIEMAS), a Think-Tank at the Euromed University of Fez, organized its first roundtable of the 1.5 Hours for Climate - Africa Moonshot Initiative, which focused on the theme "Water, Agriculture and Food Security: Building a Nexus Approach to the Climate Change Narrative in Africa".

1.5 hours for Climate – Africa Climate Moonshot Initiative, is a project led by RIEMAS, 4C Maroc, Euro-Mediterranean Economists Association - EMEA, Mercure Cab Fatima B. NDOYE and Positive Agenda Advisory. These monthly thematic meetings aim to bring together high-level guests and regional experts around major issues related to climate action in order to contribute to the creation of a dynamic conducive to advocacy in favor of a climate agenda anchored in African realities ahead of COP28.

This round table was moderated by Professor Hafsa El Bekri, lecturer at the Euromed Business School and Co-Director of RIEMAS.

A wave of solidarity is being organized at the Euromed University of Fez following the

earthquake that struck our Kingdom on 08/09/2023

Following the recent earthquake that struck the Al Haouz region, our University mobilized to participate in the national solidarity movement by implementing three concrete actions:

- The institutional and financial participation of the UEMF in the Special Fund for the Management of the Impact of the Earthquake in Morocco (a donation of 1.6 million Dirhams);
- The establishment of aid for students and staff from disaster areas.
- The contribution of 400 thousand dirhams in the form of new supplies sent by truck to the disaster areas and including beds, blankets and kitchen supplies

2024: Euromed University of Fez at the heart of action for the SDGs

Launch of the first Bootcamp of the Tech4Farmers program at the Euromed University of Fez

Taking place over three days, from June 10 to 12, this event marks an important milestone for AgriTech innovators supported by the French Development Agency (AFD) as part of the "Tamkin LiTanmia" project, in collaboration with the Regional AgriTech Innovation and Entrepreneurship Hub.

Participants include a selection of promising companies representing the future of AgriTech, such as DeepLeaf, Jafife, ARWA Solutions, Yadag, Jodoor, Lombrisol, Agrinotech, AgrI-bOT, MadjiX, and EJ Solutions. Other startups are expected, promising to make this bootcamp even richer in innovation and potential synergies. Each company brings its unique expertise and vision to transform the agricultural sector and contribute to a sustainable future for the Fez-Meknes region.

The opening day was dedicated to welcoming participants, presenting the program and partners, followed by an introduction to Design Thinking and problem framing. Participants had the opportunity to interact with experts, discover development opportunities for their technological solutions, visit the University's prototyping infrastructure, and work on the proto-personas of AgriTech in Morocco.

The second day focused on developing the full-life cycle of projects, rapid prototyping, and user interview scenarios. Participants also explored the funding, expertise, and networking opportunities offered by the program.

The third and final day focused on corporate partnerships, with feedback from agritech companies and working groups to identify potential partners and synergies between startups. The bootcamp concluded with individual coaching sessions.

This program represents a unique opportunity for start-ups to revolutionize the agricultural sector through innovative solutions, while contributing to the sustainable development of the Fez-Meknes region.

Strengthening collaborations for sustainable agriculture

Euromed University of Fez hosted an American delegation as part of the LeadAR program, a University of Arkansas project focused on training leaders in agriculture and sustainable economics. The visit, led by industry professionals and researchers, was welcomed by Prof. Salim Bounou, Vice President for Research and Partnerships, and provided an opportunity to explore synergies for sustainable agricultural development in Morocco.

Through this meeting, the UEMF reaffirms its commitment to innovative solutions for a greener and more responsible future.

https://www.linkedin.com/posts/universit-euro-m-diterran-enne-de-f-s_sustainability-uemf-myuemf-activity-7248975557097402368-r0lb?utm_source=share&utm_medium=member_desktop

UEMF and AFD launch the "Tech4Farmers" program

Launch of the Tech4Farmers call for applications, a support program specially designed for project leaders in the innovative agricultural technologies (AgriTech) sector.

During a launch conference that brought together key players in the agricultural sector of the Fez-Meknes region this Thursday, March 7, at the Euromed University of Fez (UEMF), the University and the French Development Agency (AFD) officially launched the Tech4Farmers program, whose objective is to support the development and marketing of AgriTech solutions that meet the needs of national agriculture and that of the Fez-Meknes region, in particular.

The Tech4Farmers program is part of an ambitious project to build a Regional Hub for Innovation and Entrepreneurship in Agriculture and Agri-Food in the Fez-Meknes region. This project is led by UEMF and AFD in partnership with the Ministry of Agriculture, Maritime Fisheries, Rural Development, and Water and Forests, the Digital Agriculture Hub, and a consortium of partners including government agencies, sectoral federations, universities, and research centers.

Third steering committee meeting of the Regional Agritech Innovation and Entrepreneurship Hub

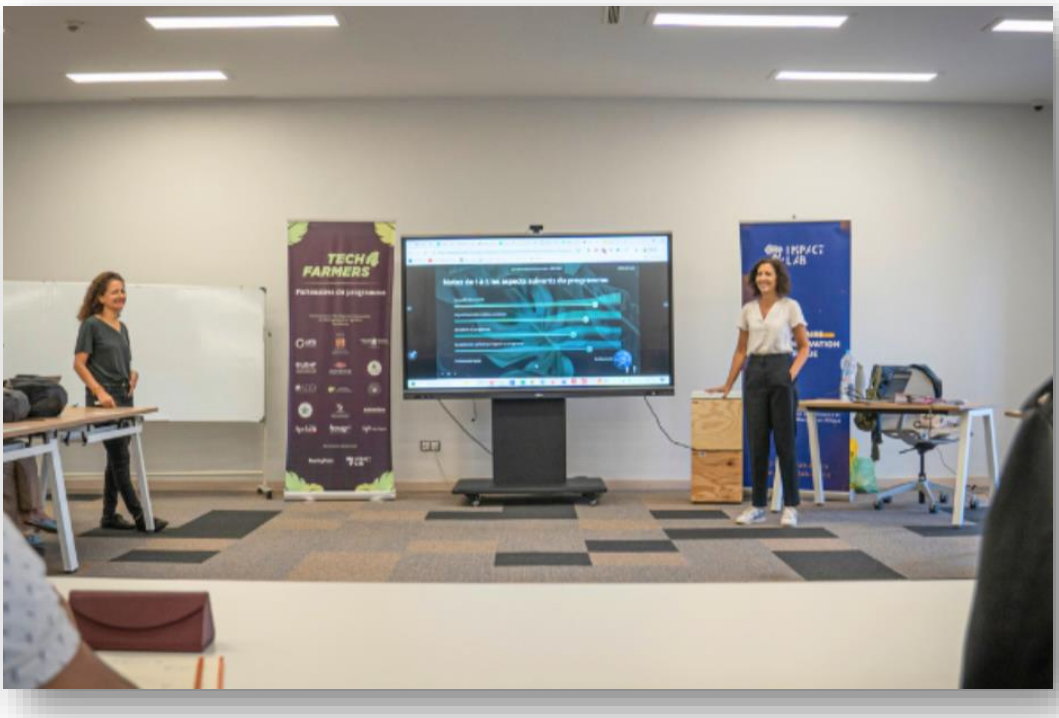

On February 21, 2024, the Euromed University of Fez hosted the third steering committee of the "Regional Hub for Innovation and Entrepreneurship in Agritech" project, as part of the "Tamkin Li Tanmia" program, funded by the French Development Agency (AFD). This event brought together various partners, including the AFD, the Digital Agriculture Hub, the IAV Institute, and other regional stakeholders, to take stock of the progress of the Agritech project.

The meeting provided an opportunity to share perspectives on progress made and discuss next steps, followed by the signing of a partnership agreement. The support program for innovative projects was presented, and an inaugural conference of the call for projects is planned for March 7, 2024, at the UEMF, focusing on agricultural issues in the Fez-Meknes region.

This event strengthened collaboration and innovation in the AgriTech sector, contributing to the creation of a strong ecosystem for agricultural entrepreneurship in Morocco.

Resounding Success of the Second Tech4Farmers Bootcamp at UEMF

From September 24th to 26th, the Euromed University of Fez hosted the second Bootcamp of the Tech4Farmers incubation program for Moroccan agritech startups. Organized in partnership with the AFD and PRIE, this event aimed to sustainably transform the agricultural sector through innovative solutions. Over three days, entrepreneurs participated in feedback sessions, value creation workshops, masterclasses on social and environmental impact, and benefited from expertise to structure their business plans. This Bootcamp strengthened their role as stakeholders in agricultural innovation and their commitment to an economic and sustainable future for Morocco.

2025: Euromed University of Fez intensifies its commitment to the SDGs

Meal Distribution by the Hands Club

The Hands UEMF club organized a solidarity initiative by offering a meal to the cleaners, workers and security guards, to sincerely thank them for their work and daily dedication.

https://www.instagram.com/reel/DBy1xlvI-Ug/?igsh=dTljYWsyd2NvZzV0

A meal, a smile – A solidarity action from the Elite Club

In an atmosphere marked by solidarity, respect, and kindness, the members of the Elite Club carried out a simple but profoundly humane action in the heart of the city's streets: the distribution of meals to people in precarious situations. More than a charitable gesture, this initiative carried a powerful message: to reach out to others, wherever they are, without judgment, with an open heart. It wasn't just a matter of feeding bodies, but also of providing human warmth, a kind look, a sincere ear—all those little things that restore a little dignity and hope to those who, too often, feel invisible. Armed with carefully prepared meals, the club members ventured into different neighborhoods, driven by a deep desire to take action. They reached out, exchanged a few words, sometimes smiles, sometimes meaningful silences. But each time, humanity was expressed, in all its simplicity and power. 60 meals were distributed. But behind this number are 60 moments of sharing, 60 moments of mutual recognition, 60 proofs that human connection remains one of the most powerful vectors of change. Because sometimes, it's not so much what we give that counts, but how we give it. This action would not have been possible without the sincere commitment of the members of the Elite Club, nor without the support of people who believe in the power of the collective and the heart. Together, we have proven that every small gesture can bring light, and that sometimes a simple meal is enough to rekindle a spark in someone's eyes.

https://www.instagram.com/reel/DHMuZnNtI2e/?igsh=Y3Y4cTk2Y3Fna3l1

150 Meals, 150 Stories

On March 19, 2025, a solidarity initiative led to the distribution of 150 Iftar meal baskets in several neighborhoods of Fez, benefiting people in need: workers, the homeless, and marginalized people. More than just a simple gesture of food, it was an act of humanity, comfort, and solidarity, made possible thanks to the generosity of donors.

https://www.instagram.com/p/DH8oR52MLaj/?img_index=13

Tech4Farmers: Three days of support for the 2nd cohort of AgriTech startups

From May 13 to 15, 2025, the Euromed University of Fez organized the second bootcamp of the Tech4Farmers program, in partnership with the French Development Agency (AFD). This program is part of the Regional AgriTech Innovation and Entrepreneurship Center (PRIE) of Fez-Meknes.

For three days, 16 AgriTech startups benefited from intensive support to:

Structure their economic model,

Build their business plan and develop strategic partnerships,

Explore opportunities for territorial deployment through panels with regional institutions (DRA, ENA Meknès, Agrinova).

Supervised by UEMF, IMPACT Lab and the Euromed Innovation Center, this bootcamp strengthened the participants' entrepreneurial capacities while connecting them with key players in the Moroccan agricultural ecosystem.

Round table: Health and well-being of young people – Eating better to nourish better

As part of African Week, a round table was held on June 12, 2025 around the theme:

“Health and well-being of young people: eating better to nourish better”, led by Pr. Wafaa Al Hassani, Dr. Samira Nabdi and Ms. Chaimae Jerraf.

This session opened a space for dialogue on the importance of good eating habits among young people, in relation to their physical and mental health.

Discussions between health professionals, experts and students highlighted the links between nutrition, education and sustainable health, highlighting the urgent need for greater awareness and equitable access to a balanced diet, which is essential for building a healthier future for African youth.

Tamkin LiTanmia: Agritech Project Steering Committee

THEOn September 25, 2025, the Euromed University of Fez hosted the steering committee of the "Regional Innovation and Entrepreneurship Hub in Agritech" project, part of the Tamkin Li Tanmia program funded by the AFD. Launched in 2022, this project aims to build a regional agricultural innovation ecosystem connecting researchers, institutions, businesses, start-ups, and farmers to develop appropriate technological solutions.

The meeting, bringing together numerous institutional and private partners, made it possible to present theproject progress, monitor the Tech4Farmers program, plan the mobilab and awareness-raising activities, while defining the next steps. It confirms UEMF's commitment to technological and entrepreneurial innovation in the service of agriculture and the Fez-Meknes region.

https://ueuromed.org/actualites/annonces-diverses/tamkin-litanmia-comite-de-pilotage-du-projet-agritech

3e and last Tech4Farmers Bootcamp of the 2e Cohort

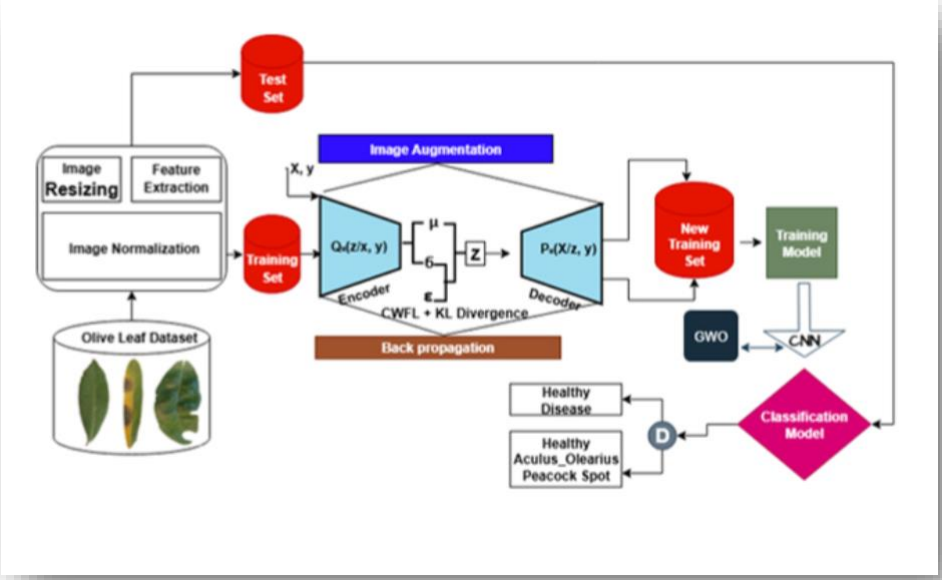

From September 23 to 25, 2025, the Euromed University of Fez, through its Euromed Innovation Center incubator, hosted the third and final Tech4Farmers – Tamkin LiTanmia bootcamp, funded by AFD. Dedicated to AgriTech project leaders from the second cohort, this bootcamp allowed startups to refine their business model, strengthen their pitching skills, and prepare for fundraising through practical workshops, mentoring, and discussions with experts.

This step completes the incubation cycle and prepares entrepreneurs to scale up and fully integrate into the regional and national Agritech ecosystem. It illustrates UEMF's commitment to technological innovation, sustainable agriculture, and impact entrepreneurship in the Fez-Meknes region.

SDG3 Report: Good health and well-being

Health and Prevention

Infirmary

The university has an infirmary which provides the following services:

- advice and awareness on health and lifestyle;
- routine care in case of illness and minor accidents;
- first aid before any possible evacuation to the approved clinic;
- referral to specialist doctors and appropriate centers

Mental health

UEMForiahttps://www.ueuromed.org/clubs/uemforiais a student initiative that aims to raise awareness and inform students about health issues. The goal is to increase awareness of mental health issues among students.

Activities: The club organizes a series of conferences, meetings and workshops for the benefit of students and prepares them to face the stress linked to exams and promotes their integration.

Insurance

Students and staff are covered by different types of insurance.

Additional insurance:

All university students benefit from capped supplementary insurance which covers emergency medical and hospital care provided in an approved clinic.

UEMF offers its students and staff a good quality of life within its eco-campushttps://www.ueuromed.org/leco-campus labeled COP22 and which has just been awarded the first responsible innovation label awarded by the Agence Universitaire de la Francophonie (AUF) in 2021.

The UEMF campus has various catering facilities (student area, staff area, cafeteria) which offer students, staff and visitors balanced meals with good value for money.

Accommodation

U Village has 1,362 single and double rooms, fully equipped and of the highest standards. All rooms have several amenities: Bathroom, kitchenette area with refrigerator and hotplate, quality bedding, desk with shelf, cupboards, individual tables, etc.

The U VILLAGE University Residence provides its residents with a comfortable, warm, healthy and secure living environment.

Fight against diseases, pandemics and natural disasters

Fight against COVID19

UEMF pays particular attention to the well-being and health of students and staff.

Thus, the entire university community was vaccinated against COVID19 and all precautions were applied.

UEMF has adopted a series of necessary practices to limit the risk of spreading the virus. Everyone wishing to access the campus undergoes infrared temperature checks, vehicles are disinfected at the entrance, masks are distributed, premises are disinfected in the morning and evening, access to each building is subject to shoe disinfection, and hydroalcoholic gels are placed in the busiest areas, in addition to social distancing in all offices and meeting rooms.

Upon the resumption of in-person work, a mass Covid-19 screening operation was implemented at the University for the benefit of staff, doctoral students and technical agents present on the UEMF Eco-campus. All tests were negative.

A post-COVID CSR webinar was organized:

https://www.ueuromed.org/evenements/cycle-de-conferences/webinaire-sous-le-theme-rse-post-covid

Maha Gmira, professor at EIDIA, participated in the panel of the first edition "women's perspectives on the world post covid-19" organized in consultation with the Mohammed Premier University in Oujda.

https://ueuromed.org/actualites/congres-et-colloques/womens-perspectives-world-post-covid-19

- HIV awareness and testing days are organized by the Rotaract club in collaboration with the Moroccan Family Planning Association. Tests are anonymous and quick, with instant results.
- Blood donation: organized periodically by students through their clubs

https://www.ueuromed.org/evenements/activites-des-clubs/journee-don-de-sang-uemf-rotaract-club

A wave of solidarity is being organized at the Euromed University of Fez following the earthquake that struck our Kingdom on 08/09/2023

Following the recent earthquake that struck the Al Haouz region, our University mobilized to participate in the national solidarity movement by implementing four concrete actions:

- The mobilization of the entire university community: students, lecturer-researchers, administrative and technical staff, as well as senior management, to participate in the blood donation campaign. This initiative began on Saturday morning, 09/09/2023, extended throughout the weekend, continued to Monday, 11/09/2023, and continued throughout the week;
- The institutional and financial participation of the UEMF in the Special Fund for the Management of the Impact of the Earthquake in Morocco (a donation of 1.6 million Dirhams);
- The establishment of aid for students and staff from disaster areas.
- The contribution of 400 thousand dirhams in the form of new supplies sent by truck to the disaster areas and including beds, blankets and kitchen supplies

Teaching and learning in health care

The "Health" division of the Euromed University of Fez is undergoing significant development, in perfect synergy with the reform of the national health system, driven by the High Royal Directives. Thus, the university has launched its Faculty of Medicine, which will be attached

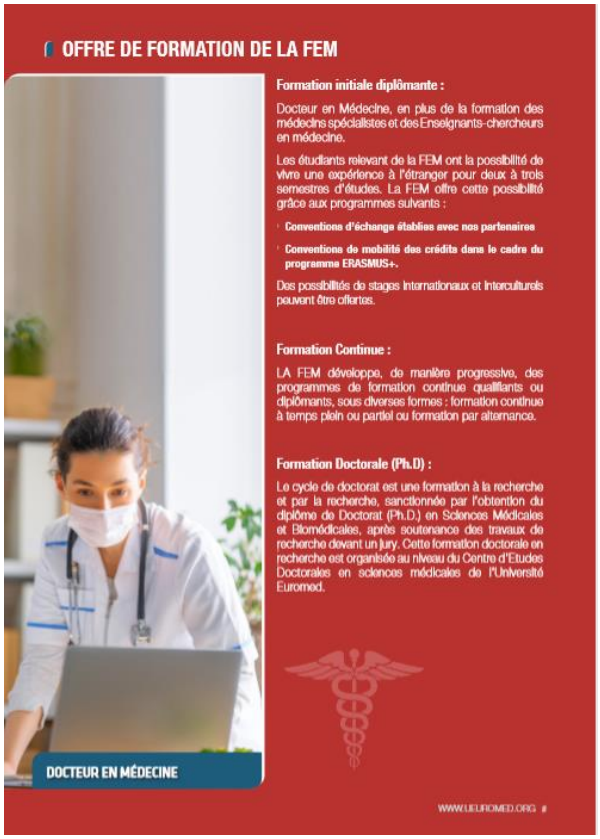

to a new University Hospital Center (CHU), in addition to two new entities: the Faculty of Dental Medicine and the Faculty of Nursing and Health Technology.

These achievements strengthen the other existing components of this center: the Faculty of Pharmacy and the School of Biomedical and Biotechnological Engineering.

Euromed Faculty of Medicine

The Euromed Faculty of Medicine will contribute to the development of the UEMF's Health Center and will meet the needs of physicians in the Fez-Meknes region, Morocco, and the broader MENA region, including sub-Saharan Africa. The FEM aims to be a center of innovation and excellence in medical education and research.

The FEM will develop innovative programs to better prepare future doctors to succeed in their mission in society. The Health Center will subsequently be enriched by the creation of the University Hospital Center (CHU), a hospital linked to the UEMF that will provide theoretical and practical training for future doctors and will be equipped with modern technological infrastructure to respond to the diagnoses of the main medical specialties.

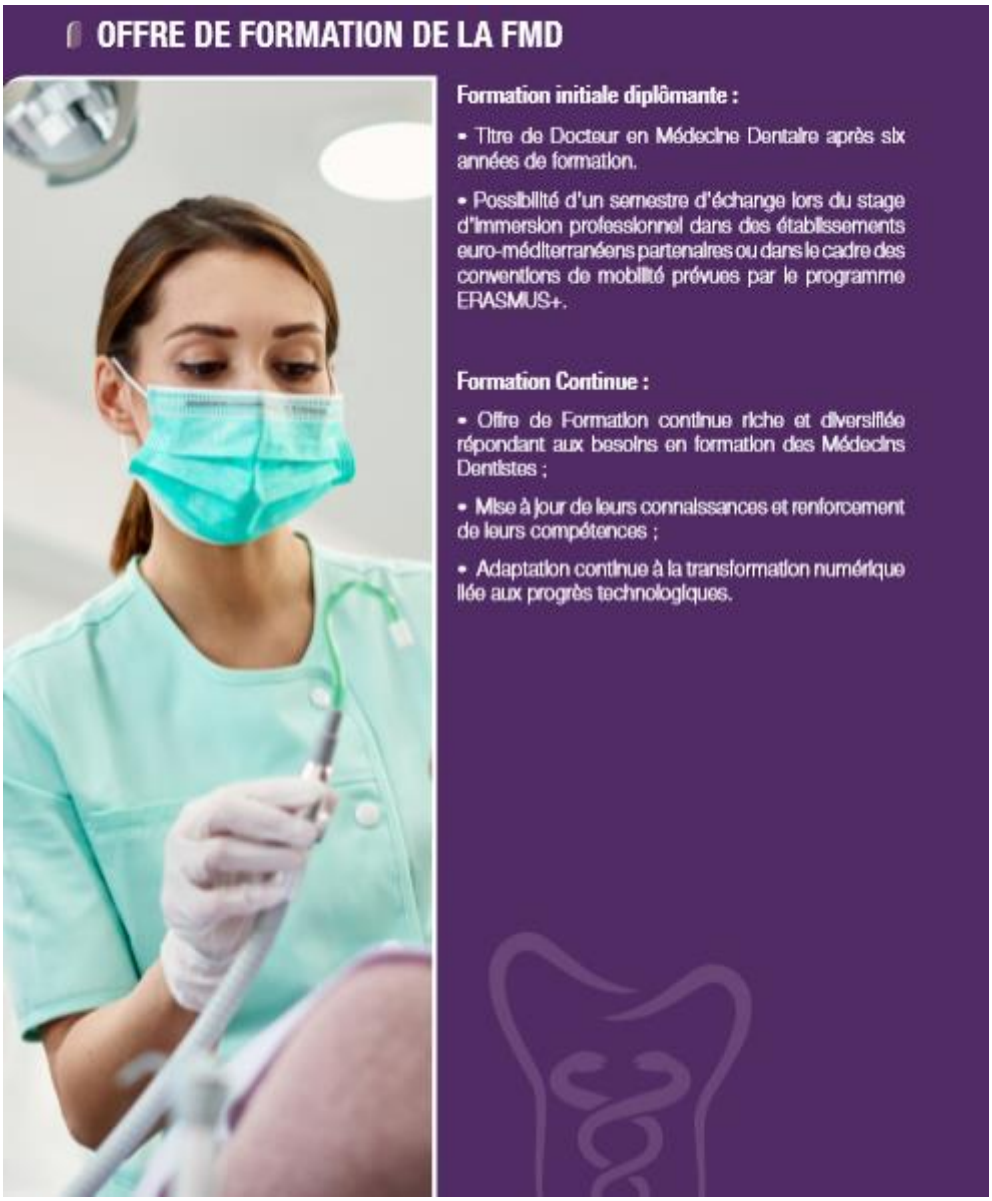

https://ueuromed.org/etablissement/faculte-euromed-de-medecine

Euromed Faculty of Dental Medicine

The Euromed Faculty of Dental Medicine is an institution dedicated to oral health and the well-being of populations. It is a training program with multiple career opportunities. Our graduates have the opportunity to enter the public or private sectors, or after six years of

study, another alternative is to pursue a career in dental specialties or a university hospital program.

https://ueuromed.org/faculte-euromed-de-medecine-dentaire/filieres/docteur-en-medecine-dentaire

Faculty of Nursing and Health Technology

As part of the diversification of its training offer and in order to contribute to the development and qualification of human resources in the field of Health, the Faculty of Nursing Sciences and Health Technology (FSITS) will welcome its first class which will include seven training courses. This training program is part of the Bachelor-Master-Doctorate (LMD) system, providing access to a range of specialties, including:

- Versatile Nurse;
- Anesthesia and intensive care nurse;

- Speech therapist;
- Psychomotor therapist;
- Dietetics-nutrition;
- Laboratory techniques;
- Radiology techniques.

The FSITS also aims to set up a training course whose educational project is to train professionals specialized in multiple disciplinary fields related to health by issuing diplomas recognized by the State allowing professional integration in the public, private and liberal sectors.

https://www.facebook.com/UniversiteEuromed/videos/2354667181388210/?extid=NS-UNK-UNK-UNK-AN_GK0T-GK1C&ref=sharing&mibextid=2Rb1fB

BiomedTech Engineering School

https://www.ueuromed.org/etablissement/ecole-euromed-dingenieurs-biomedtech

This Schoolaims to train high-level executives capable of supporting major projects and development projects in the countries of the Euromed basin and in sub-Saharan Africa in the health, biomedical and biotechnology sectors. To achieve this, we rely on a rich partnership network both academically (health science research centers, hospitals, etc.) and industrially.

Training objectives

The Biotechnology Engineering program offered by EUROMED University will provide students with in-depth knowledge in biological sciences and technologies and transferable expertise and skills in a field that is experiencing rapid economic and technological expansion. This program offers a concentration in Biomolecular Engineering and Drug Development, which will benefit students pursuing careers in biological engineering, in the following industries: pharmaceutical, cosmetic, and food.

The objectives of the biotechnology engineering cycle program are as follows:

- Ability to apply critical analyses to solve problems at the interface of science, medicine and engineering;
- An ability to design and conduct experiments, as well as to analyze and interpret data;
- An understanding of the principles of modern biology and the ability to apply the principles of science, engineering and mathematics;
- In-depth training in biological sciences that will enable them to take informed and ethical approaches and to fully understand the role of the biotechnology engineer in society.
- Also, graduates will be able to communicate their work and ideas effectively, and they will be prepared to succeed in their professional and/or academic careers.
- An acquisition of an ability to use modern biological engineering techniques, skills and tools necessary for the practice of biotechnologies;
- Knowledge of contemporary issues in bioengineering and associated disciplines;
- An ability to design and produce biomolecules and biomolecular systems to meet a desired need;
- An ability to function within multidisciplinary teams;
- An ability to identify, formulate and solve engineering problems;
- An understanding of professional and ethical responsibility;
- An ability to communicate effectively;
- a recognition of the need and ability to engage in lifelong learning.

The Biomedical Engineering program is designed for students interested in applying the sciences and techniques of physics, mathematics and engineering to problems in biology. It prepares students for graduate studies in biomedical engineering and biological sciences in general, as well as for careers in biomaterials design, biomedical instrument design, medical device design (e.g. design of orthopedic prostheses, etc.). The Biomedical

Engineering cycle will provide students with theoretical and technical knowledge, expertise and transferable skills in a field that is experiencing rapid economic and technological expansion. The main objectives of this program are:

- Acquire in-depth knowledge (theoretical and practical) in biomedical engineering, and the sciences and technologies associated with it,
- Practice through educational and research experiences within the laboratories and workshops of EUROMED University of Fez, to better understand the technical and managerial problems related to the design and industrialization process in biomedical engineering.

New Master's degree course

https://ueuromed.org/actualites/annonces-diverses/nouvelle-formation-master-management-biobank

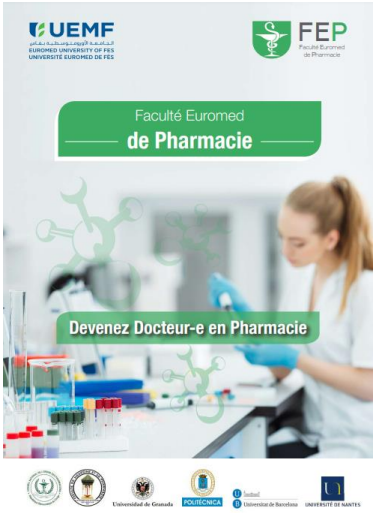

Euromed Faculty of Pharmacy

The Euromed Faculty of Pharmacy (FEP) is one of the higher education institutions under the Euromed University of Fez (UEMF). In partnership with the University of Granada, the FEP was created to contribute to the development of the UEMF's health sector by establishing academic training leading to national diplomas in the field of pharmacy and pharmaceutical sciences and in disciplines closely linked to the needs and concerns of the local (Fez-Meknes), national (Morocco) and regional (Euro-Mediterranean area) socio-economic world.

Specific objectives

https://www.ueuromed.org/faculte-euromed-de-pharmacie/filieres/docteur-en-pharmacie

- Provide quality education in accordance with international standards, through a partnership with health faculties and institutions, particularly Euro-Mediterranean ones;
- Provide a favorable working environment and effective methods for the optimal acquisition of knowledge and skills necessary for the profession of pharmacist;
- Permettre l'acquisition des techniques pluridisciplinaires relatives aux métiers de la santé, ainsi que des nouvelles technologies en Biologie ;
- Initier le futur pharmacien à la méthodologie de réflexion, à l'approche analytique, à la pensée critique et stimuler chez lui la créativité, l'innovation, la confrontation des idées et la responsabilité sociale ;
- Permettre une ouverture d'esprit, une faculté d'adaptation et une large autonomie et le sens de prise de décision chez le futur pharmacien ;
- Développer une recherche de qualité, promouvoir l'expertise professionnelle dans le domaine des sciences de la santé et des métiers connexes ;
- Diffuser le savoir et promouvoir les métiers de la pharmacie.

https://fr.le360.ma/societe/medecine-medecine-dentaire-et-pharmacie-luniversite-euromed-de-fes-lance-son-concours-dacces_ER4JTFDAZNHQ7OQ5TG74YDIDUY/

Faculté des Sciences Humaines et Sociales
Licence Sciences Sociales et Management de la Santé

La filière vise à former des cadres habilités à exercer un certain nombre de métiers et de responsabilités à valeurs ajoutées :

- L'expertise et le consulting en santé publique dans sa dimension sociale ;
- L'accompagnement et le coaching des collectivités territoriales dans la définition et la conduite des programmes de santé préventive ;
- La gestion d'un établissement ou d'un centre hospitalier ;
- L'ingénierie de projets en éducation à la santé destinée à toute institution publique ou privée souhaitant développer des compétences professionnelles dans ce secteur.

Recherche/Développement

https://www.ueuromed.org/recherche-developpement

- Conception et fabrication par impression 3D de plusieurs milliers de visières (stérilisables) qui ont été distribuées aux hôpitaux, à la Wilaya, aux mairies et à la préfecture de police et aux administrations publiques
- Conception et fabrication par impression 3D de coudes permettant l'utilisation d'un respirateur pour plusieurs patients
- Conception et fabrication par impression 3D de masques antibactériens et antiviraux, lavables, stérilisables et réutilisables avec des filtres jetables.
- Conception et fabrication par impression 3D d'adaptateurs pour les masques Decathlon
- Conception et fabrication par impression 3D de masques lavables, stérilisables et réutilisables avec des filtres jetables pour les sourds-muets (lecture sur lèvres)
- Conception et fabrication de dispositif d'ouverture des portes par le bras.
- Développement, conception et fabrication par impression 3D d'une valve respiratoire pour faciliter l'oxygénation des patients sans demander un respirateur mécanique. Le dispositif a fait l'objet d'un dépôt de brevet et il est déjà en utilisation
- Conception et fabrication par impression 3D de capteurs de débit d'air.

Recherche et incubation de projets

Incubation

The Fez Smart Factory Ecosystem is launching its first competition for the admission of the first project leaders into its industry 4.0-oriented incubator. This competition is open to any individual or team with a project to develop an industrial unit for innovative, high-value-added and competitive product(s), optimizing its performance through the implementation of industry 4.0 concepts and technologies. The project must fall within one of the following sectors: biomedical and pharmaceutical industries, agri-food industries, etc.https://fsfindustry.com/concours/

Research themes

https://www.ueuromed.org/equipe-de-recherche/biotechchimie-medicinale-bcm

A UEMF research team is currently working on new active molecules for the design of new drugs. This work involves several researchers from UEMF and Moroccan universities and hospitals.

Various conferences were organized including:https://www.ueuromed.org/evenements/cycle-de-conferences/lhomme-au-coeur-artificiel-de-la-fiction-la-realite-par-pr-wajih

Other research topics:

- Design and synthesis of anticancer, antiviral and antibacterial agents,
- Green synthesis of molecules of biological and/or physicochemical interest,
- Design and synthesis of macromolecules for the vectorization of active ingredients, optical imaging and medical diagnosis,
- Extraction, isolation, characterization, semi-synthesis and valorization of natural products,
- Production of bioactive molecules by biological processes,
- Study and analysis of new cell signaling pathways
- Development of new drug administration routes,
- Development of diagnostic tests for emerging diseases,
- Identification of therapeutic targets,
- Production and purification of proteins (recombinant, natural).

A very large number of publications in the field of health in general and medicinal chemistry in particular have been accepted and published in indexed journals.

Partnerships

Digital Health: The Covid-19 health crisis was a systematic but revealing shock, particularly in terms of the importance of digital technology in the healthcare sector, and on several levels.

The "Health and Digital" symposium, organized by the National School of Arts and Crafts of the Mohammed V University of Rabat, is to share thoughts on the impact of digitalization on the health system in general and in Morocco in particular, and also, to identify avenues for future research in the field of complementarity between digitalization & health.

This academic and industrial event saw the signing of partnership agreements with the Digital Development Agency, the Pasteur Institute, the Euromed University of Fez, the Mohammed VI University of Health Sciences and Huawei Morocco. Authorities from the Ministry of National Education, Vocational Training, Higher Education and Scientific Research and the Ministry of Health were also present.

UEMF-CHU (University Hospital Center) Agreement

Research and innovation is a very important aspect of UEMF. Today, the University is expanding its portfolio of strategic partners in this regard by signing an agreement between Professor Mostapha Bousmina, President of UEMF, and Professor Mohamed Noureddine Al Amin, Director General of the Hassan II Hospital Center in Fez, to advance knowledge and science.

The mission of this framework agreement is to provide support to UEMF research units, particularly in the biomedical and biotechnological fields, through three major areas:

1- Ensure common, high-quality training in research through research.
2- Supervise the research projects of research professors and doctoral students.
3- Organize occasional scientific and intellectual events in the biomedical field.

Women and Science Chair

Following the signing of an agreement between the UEMF and the Islamic World Educational, Scientific and Cultural Organization (ICESCO) on May 17 for the establishment of a "Women in Science" chair in the field of Artificial Intelligence, the two parties celebrated the official launch of this project today. This chair is headed by Professor Maha Gmira, a professornante at UEMF, holder of a doctorate from the École Polytechnique de Montréal, in one of the centersof global excellence on AI, data science for real-time decision making IVADO, CIRRELT, GERAD, etc. and MILA led by Prof. Yoshua Bengio.With the aim of strengthening the contribution of women in digital technology and attracting female doctoral students to carry out research projects in this field, the chair aims to be a starting point for launching high value-added projects on an African-Euro-Mediterranean scale. The first training sessions were aimed at female doctors to help them better use AI tools in their analysis and diagnostic work.

Sociocultural and sporting activities

The UEMF organizes a large number of activities in this area thanks to the dynamism of its students and staff.

Student clubs

https://ueuromed.org/vie-estudiantine

Studying isn't just about attending classes! It's an opportunity to experience new things and explore your interests. It's a time to meet new people and shape your future.

How do we achieve this? By getting involved in student life:

- To experience new encounters
- To develop a sense of belonging
- To discover interests and passions: clubs, sports, etc.
- To learn more about the diploma: soft skills, services to society, etc.
- To develop a network of contacts
- To take responsibility.

Getting involved requires additional effort, but it enhances and enriches young people's development.

The UEMF WEBTV brings together a very large number of activities

Sport

UEMF allows its students to develop their physical abilities, whether they are beginners, experienced athletes, or national or international athletes. Their athletic achievements are rewarded with the highest scholarships and other benefits.

The UEMF is gradually building its sports infrastructure:

- a large multi-sports hall;
- approved professional basketball, handball and volleyball courts;
- a Mini-Football pitch;
- a badminton court;
- table tennis;
- a squash room;
- a room reserved for weight training and cardio training;
- rooms reserved for the practice of dance, aerobics, yoga;
- a gymnastics room with parallel bars, oblique wooden plinth with bearing, ring, etc.;
- a judo, aikido, capoeira, taekwondo, karate room;
- a boxing ring;
- a climbing wall;
- an infirmary;
- H&F hammams with sauna, showers and changing rooms;
- a semi-Olympic indoor swimming pool;
- outdoor sports areas:
- *an approved football pitch;*
- *mini-football fields;*
- *a tennis court;*
- *an athletics field with running tracks (different lengths), pole vault, high jump, long jump, shot put, javelin discus, etc.;*
- *a mini-golf course;*
- *a medical-social center near sports facilities*

UEMF participates in the 1st AFRICAN CONFERENCE ON HEALTH RISK REDUCTION. November 16-17-18, 2022

From November 16 to 18, 2022, Euromed University of Fez participated in the AFRICAN CONFERENCE ON HEALTH RISK REDUCTION organized, under the High Patronage of His

Majesty King Mohammed VI, by the Ministry of Health and Social Protection of Morocco in collaboration with MAPA.

The President of the Euromed University of Fez, Mr. Mustapha BOUSMINA, accompanied by the Vice-President in charge of partnership cooperation and international relations, Mr. Salim BOUNOU, attended the opening of this major event which took place in Marrakech, whose theme focuses on the reduction of health risks, bringing together Africa, the Maghreb and the MENA region as well as experts from around the world.

"ALLODISCRIM": Coaching and support for university students January 6, 2023

The "ALLODISCRIM" project is a call for the establishment of a psychological listening and support unit within the university.

Aware that student status can be a potential source of stress, pressure, and even discrimination or harassment, the group organized a listening and coaching session on Wednesday, January 4, for the benefit of university students with Ms. Meriem BELKHAYAT ZOUKARI, Hypnotherapist/Clinician.

Professor Othmane Benmoussa explores the concept of crisis management in organizations during times of uncertainty.

Middle managers play a vital role within an organization: they must balance the well-being of their employees with implementing the company's strategic vision. This delicate mission becomes even more complicated in times of uncertainty. Professor Othmane Benmoussa, in his column on Média 24, provided excellent insight into this issue, analyzing it from several angles and highlighting some solutions based on in-depth research on the subject.

Positive Psychology Coaching Session January 12, 2023

On January 12, the Lions Club organized a meeting with Ms. Sara Ynez, a certified positive psychology coach, who presented various tools to help students optimize their cognitive abilities.

Student Sports Activities January 2023

Friendly basketball match with EST Fez

As part of our sports selections' training, our basketball team faced the EST Fez selection in a friendly match on January 5, 2023.

Friendly volleyball match against WAS

As part of the preparations for the university championship, our volleyball team played on January 21, 2023 against the WAS team (Widad sportif de Sefrou).

UEMF participates in the 1st National Day on Artificial Intelligence in Cardiology February 18, 2023

Euromed University of Fez participated in the 1st National Day on Artificial Intelligence in Cardiology which was held on Saturday, February 18, 2023 at the Marriott Rabat Hotel, in collaboration with the Moroccan Society of Cardiology (SMC).

In his welcoming address to the participants, Mr. Salim BOUNOU, Vice-President in charge of Research-Innovation and Partnership, recalled the main missions of the University in terms of teaching and scientific research as well as its role in the development of the region through its infrastructure to international standards and its research projects carried out in the field of digital and artificial intelligence.

This event also saw the participation of Professor Hajar Saikouk who led a conference under the theme "Artificial Intelligence and sensors at the service of our hearts".

Blood Donation Campaign February 24, 2023

The UEMF Rotaract Club, in partnership with the FEMSA club of the Faculty of Medicine of Fez and the regional transfusion center of Fez, organized its second blood donation day of

the year on Friday, February 24. The day was attended by several students, professors, and staff members.

First Aid Workshop March 1, 2023

On March 1st, the Lions Club organized a first aid workshop for approximately forty students. The workshop was conducted in collaboration with the FEMSA medical student association. The first aid workshop was a resounding success thanks to the dedication of all participants.

Awareness campaign May 15, 2023

On May 15, the Lions Club organized an awareness day about the inherent dangers of electronic cigarettes and vaping.

“Randomized Trials and Observational Studies of Drugs: The Good, the Bad and the Ugly”: Lecture by Professor Samy Suissa, September 12, 2023

As part of its conference cycle, the Euromed University of Fez hosted, today, September 12, Prof. Samy Suissa, Director of the Center for Clinical Epidemiology at the Jewish General Hospital in Montreal, Canada, a first conference for the 2023/2024 academic year under the theme of "Randomized trials and observational studies of drugs: The good, the bad and the ugly."

During this conference, which was chaired and moderated by Prof. Chakib Nejjari, Vice-President in charge of the Health Department at the Euromed University of Fez, and Prof. Samir Ahid, Dean of the Euromed Faculty of Fez, Prof. Samy Suissa unveiled the complex workings of randomized trials and observational studies. He highlighted attempts at drug recycling, the temporal biases that influence them, and modern methods for preventing these biases.

This meeting was an opportunity to discover clinical pharmacology and the latest advances in medical research, on the sidelines of the integration week for new students who have joined the UEMF and particularly those from the Euromed Faculty of Pharmacy in Fez.

Euromed Faculty of Dental Medicine and AMPBD: Meeting for the benefit of dental students September 15, 2023

As part of the integration week activities, the Euromed Faculty of Dental Medicine hosted the Moroccan Association for Oral Health Prevention (AMPBD) on Friday, September 15, 2024, at the UEMF Eco-campus. This meeting allowed the Faculty's new students to discover best practices related to oral health as well as effective prevention measures. This meeting was also an opportunity to introduce our future doctors to the importance of their involvement in community work.

During this meeting, a detailed presentation of the AMPBD's actions was unveiled, highlighting promising initiatives such as prevention actions, dental caravans, awareness campaigns, educational programs as well as targeted actions in schools and establishments in the city of Fez in collaboration with the Ministry of Health and Social Protection.

Two enriching workshops were then organized during this event with the participation of AMPBD doctors from the Fez, Larache, and Berkane sections. The first workshop addressed oral health as a whole, highlighting the importance of regular care and preventive measures to maintain good health in the long term. The second workshop focused on different methods of dental brushing, emphasizing the importance of good oral hygiene for the health of the individual.

[Seminar] Galien Day at the Euromed University of Fez

On the occasion of World Pharmacist Day, celebrated on September 25, the Euromed Faculty of Pharmacy is organizing a day as part of the conference cycle of the Euromed University of Fez. This meeting was under the theme of "The Pharmaceutical Profession: Missions, Innovations and Perspectives."

The beginning of this seminar was marked by the speeches of Prof. Chakib NEJJARI, Vice-President in charge of the Health Pole of UEMF, Prof. Salim BOUNOU, Vice-President in charge of Research, Innovation and Partnership, Prof. Samir AHID, Dean of the Euromed

Faculty of Pharmacy and Mr. Amir Seif Belahcen, representative of UEMF Pharmacy students.

In the presence of several specialist speakers and experts in the field, the participants addressed this theme from several perspectives linked to the professions of pharmacist, including the community pharmacist, the hospital pharmacist, the biological pharmacist, the pharmacist in industry, the pharmacist entrepreneur in health and finally the new horizons, innovation and research in the sciences of medicine.

This meeting allowed students from the Euromed Faculty of Pharmacy to exchange during the discussion session with the speakers present on the different facets related to the pharmaceutical profession. It is also worth noting that this seminar was organized with the support of Hikma Laboratories.

Euromed University of Fez (UEMF) participates in the 2nd African Conference on Health Risk Reduction

After participating in the first African Conference on Health Risk Reduction, UEMF is present at the second edition of this event organized under the High Patronage of His Majesty King Mohamed VI, from September 27 to 29 in Marrakech.

This large-scale international meeting, organized under the theme "Health in Africa: Water, Environment and Food Security", brought together several African and international officials, including ministers, ambassadors, scientists and researchers, from more than 80 countries, coming from all corners of the world to lead a program that spans three days.

The President of Euromed University, Prof. Mostapha BOUSMINA, participated in the second panel discussion on the theme of "Food security in Africa and the world: risk reduction strategies."

During his speech, Prof. BOUSMINA underlined the importance of promoting the economic wealth of our immense continent and of establishing a common policy, on a continental scale, within the framework of a South-South collaboration in order to guarantee, not only global food security, but food sovereignty allowing the development of food production capacity based on scientific research, while respecting the social specificity of African countries and the diversity of its products.

Participants in this event aspire to the adoption of new strategies aimed at reducing health risks through the improvement of prevention systems, the change of consumption patterns and the promotion of a healthy lifestyle.

Plenary sessions, round tables, workshops, many themes, which were structured around several axes, were addressed during this meeting such as: "Natural disasters: Reduction and management of emergencies", "Food security in Africa and in the world: Risk reduction strategies", "Water, environment and food security: African projection 2063", "Risk reduction and the ecosystems of tomorrow: The African equation and South-South cooperation", "Health and environment: Air quality and global warming".

This second edition of the African Conference was also an opportunity for the Euromed University of Fez, in addition to its main objective, to present to participants and visitors the new components of the Health Pole (Faculty of Medicine, Faculty of Dental Medicine, Faculty of Pharmacy, Faculty of Nursing and Health Technology, School of Biomedical Engineering and Biotechnology) as well as the other components of the University and their diversified training offers.

Euromed University of Fez participates in the international conference on Covid 19

An international conference on Covid-19 and its long-term consequences on our societies was held on Thursday 12 and Friday 13 October on the Troubiran campus of the University of Guyenne under the theme Covid-19: what do our attitudes towards this virus and its pandemic reveal, what changes will it induce?

This event was attended by Professor Slamti Hasna, a lecturer and researcher at Euromed, who, through her presentation, aimed to demonstrate how the future of the world depends on how governments and international bodies respond to the consequences of the pandemic. She demonstrated that current global governance has been overtaken by globalization, and that it is clear that the emergence of global governance can no longer be achieved through fragmented and fragmented systems. The trend is toward altruistic global governance.

[Seminar] The Community Pharmacist: Innovations, Expanded Responsibilities and Impact on Healthcare

As part of the conferences and meetings organized by the Euromed University of Fez, a seminar was held on October 26, 2023 in collaboration with the union chamber of pharmacy professionals of Fez, around the theme "The pharmacy professional: Innovations, expanded responsibilities and impact on healthcare". A meeting marked by a strong female presence, making this conference an opportunity to celebrate the success of women pharmacists represented by experts in the profession who delivered enriching speeches related to the theme.

This conference was attended by several professionals from the pharmaceutical and pharmacy sector, including Dr. Fatima Zohra Khayar, Industrial and Pharmacist, member of the Board of Directors of Pharmacy, Brussels, President of the Athena Center, President of the medical-pharmaceutical consultation of Schaerbeek, Brussels, and Dr. Aicha Zahi, Pharmacist and President of the Moroccan Society for the Valorization of the Pharmacy Act.

The speakers addressed various topics related to the theme, including the evolution of the role of the community pharmacist in Belgium: Trends and innovations, and also the extent to which pharmaceutical services in the community can be valued.

This meeting allowed both students and professionals in the field to exchange during the question and answer session with the speakers present on the different facets linked to the community pharmacist and the challenges of the pharmaceutical profession.

Pink October at UEMF (2023)

Several university clubs organized various activities on Monday, October 30, as part of World Breast Cancer Day.

As part of the awareness days, the Rotaract Club organized an event dedicated to the women of our university. This day included a conference led by specialized professors, addressing the importance of early detection as well as the role of nutrition and lifestyle in breast cancer prevention. This awareness and conference day was followed by a screening session offered to the women who attended.

For its part, the Sist'HER club organized an awareness-raising visit to the Avicenne Clinic in Fez for its members. The aim of the day was to inform participants through self-examination workshops and discussions on the benefits of early diagnosis in the presence of health specialists. Emphasis was placed on the importance of education and mutual support in the face of this disease.

Other events

- Helping children with cancer in the pediatric department of the CHU.
- Integration of deaf and mute children into society.
- UEMF participation in the cycle of the thematic virtual fair organized by our partner Smart Africa (Engineering, Health Science and Management Fair).

2024: Euromed University of Fez at the heart of action for the SDGs

Organization of a medical caravan in ALMIS MARMOUCHA

"Relive with us the medical caravan organized by the HANDS Club of the Euromed University of Fez and the Club@Apollonfmpdffrom the Faculty of Medicine of Fez, accompanied by dental students from the UM6SS University of Casablanca, in Almis Marmoucha, in the Boulmane region. An enriching experience for us, but above all an unforgettable day for the inhabitants of this village. We carried out more than 1,400 consultations in the following areas: oral care, cardiology, ophthalmology, gynecology, pediatrics, dermatology and general medicine.

https://www.instagram.com/p/C4OjS3aMyuL/?igsh=MzRlODBiNWFlZA==

Promoting community health and well-being

"January 31, 2024, we had the privilege of collaborating with the Blood Transfusion Center and the Sidi El Hadi Kriou Youth Center in Zouagha during an unforgettable charity event! Our main objective was to promote community health and well-being by encouraging a sense of solidarity among the youth of our region.

Awareness raising on violence prevention

“On November 15, 2023, we immersed ourselves in stimulating discussions with the students of Laurence School. From confronting school violence to breaking down gender barriers for a more egalitarian society, every voice was heard. Let's remember together this day where we collectively discussed and aimed for an inclusive and equitable future!”

A big thank you to @Etablissement Laurence for being an exceptional partner during our event! Your support and collaboration had a significant impact. A special appreciation for the warm welcome from your dedicated team.

Organization of a Dental/Humanitarian Caravan

The UEMF Rotaract Club joined forces with the IBN SINA Association of Students of the Faculty of Dental Medicine of Rabat and the "Carrefour Adrar Boulemane" Association to organize a dental caravan for the students of the Aachlouj school, in the province of Boulemane. Thanks to this collective action, 205 young students and their families were able to benefit from awareness sessions, consultations, extractions and dental care. They also**participated in art workshops, a film screening**educational and fun, and received individual "Winter Warm" packs to protect them from the cold.

https://www.instagram.com/p/C1MaUQjpWqy/?igsh=MzRlODBiNWFlZA%3D%3D&img_index=2

Organization of a PINK OCTOBER day

"Our flagship action for October was part of the month's theme "Pink October". Rotaract UEMF organized a day dedicated to raising awareness and fighting breast cancer for students and staff at the university, including a breast examination session for women at the university."

https://www.instagram.com/reel/C09S014MNkK/?igsh=MzRlODBiNWFlZA%3D%3D

Organization of a day at the retirement home

“An emotional day at the retirement home. We were touched and inspired by our elders as we spent time with 151 residents, listening to their stories and thoughts, often filled with nostalgia and sadness. Although it was sometimes difficult to hear their poignant stories, we were deeply moved by their wisdom and kindness.

In the privacy of the retirement home, we shared unique moments of connection and camaraderie. Together, we laughed, danced, sang, and shared a warm meal. These precious moments of sharing will remain etched in our memories forever, reminding us of the richness and depth of human relationships.

We would like to express our gratitude to our elders for their warm welcome and generosity. Their presence brightened our day and reminded us of the importance of intergenerational solidarity.

https://www.instagram.com/p/C38MWX3s4iu/?igsh=MzRlODBiNWFlZA%3D%3D&img_index=4

Organization of a humanitarian caravan

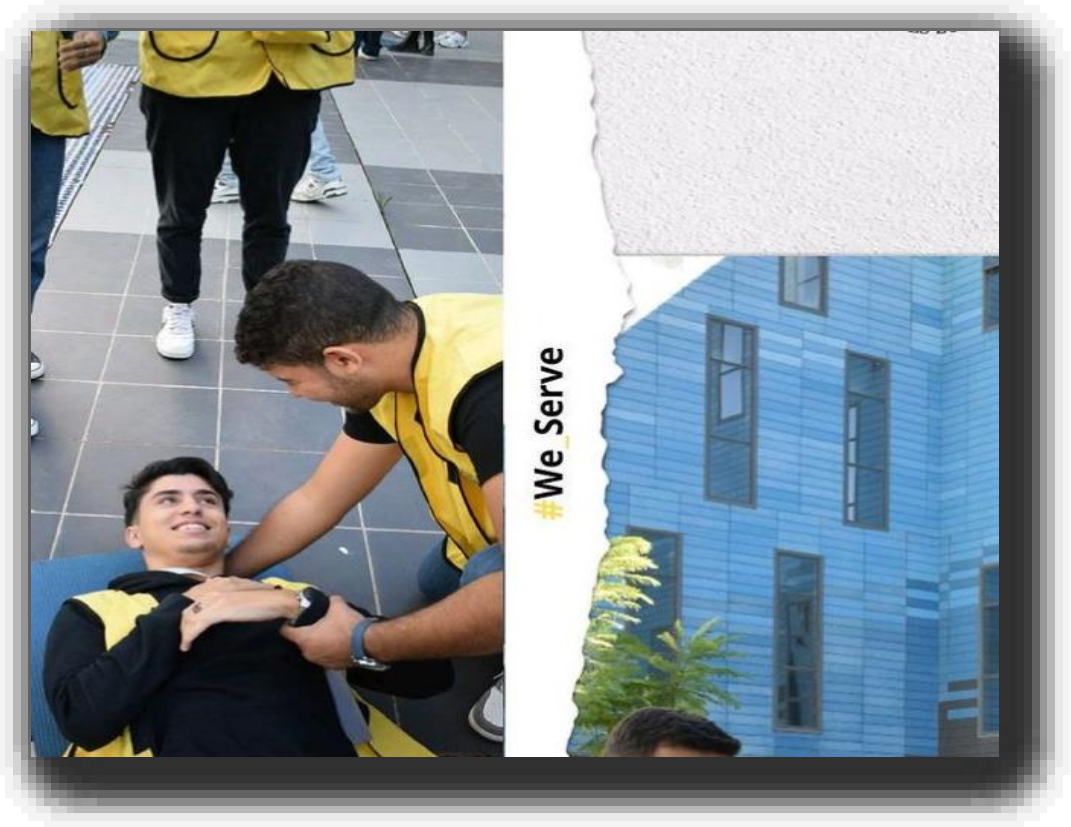

“On December 9, the Lions/Leos of Fes spread the warmth of Winter to the Warmth of Tawnat Thar Esouk, which was transformed into a festive haven, illuminated by generosity and solidarity.

Amidst the bursts of laughter from children playing soccer and singing, our action came to life around the gaming tables, providing warm clothing to families, wrapping them in warmth for the coming winter.

This day, etched in the memories of Tawnat, more precisely Thar Esouk, was much more than a celebration. It was a brilliant demonstration of the spirit of the Lions/Leos, where joy blends with social action, creating a web of solidarity and friendship in the heart of winter.

https://www.instagram.com/reel/C0xP8T4sqc5/?igsh=MzRlODBiNWFlZA%3D%3D

First aid education

We are delighted to share these moments captured during the recent first aid workshop organized in partnership with the FEMSA Medical Students' Association. The UEMF Lions Club successfully orchestrated this event, strengthening the skills of each participant. We are proud to see how this initiative contributed to improving first aid knowledge, and express our gratitude to the FEMSA association and all the participants who made this event memorable. We look forward to seeing you again for new solidarity adventures.

https://www.instagram.com/p/Cz02ZmqsA-J/?igsh=MzRlODBiNWFlZA%3D%3D&img_index=4

Humanitarian caravan: Al HAOUZ Province

"The Lions and Leos of Fez, with the generous support of the USFP, have come together to collect donations for a significant initiative. On Monday, September 18, at 9:30 a.m., all collected donations will leave Fez for Meknes and, finally, on September 20, they will arrive in Marrakech. The unity and dedication of all the Leos and Lions of Morocco have been essential in preparing a significant action to be held on September 22 in Marrakech and its surrounding areas to distribute these donations. Many thanks to all the Leos, Lions, and the USFP for their unwavering support, which made this initiative possible."

Scientific day on the theme "Right to health: provision of care spatial equity" at UEMF

The Euromed Institute of Legal and Political Sciences (IESJP) in partnership with the Moroccan League for Scientific Research and the Right to Health (LMRSDS), the Researchers' Forum of the Ministry of Economy and Finance (FCMEF) and the Moroccan Society of Anesthesia, Analgesia, and Resuscitation (SMAAR) organized a scientific day around the theme "Right to health: provision of spatial equity care" at the university's Eco-campus on December 1.

In the presence of Mr. Younes Bouferma, President of the LMRSDS, Mr. Jamal Eddine Kohen, President of the SMAAR, Mr. Mohamed Amine Mouhane, Senior Executive of the National Agency for Health Insurance and many other experts in health, law and computer systems in order to consider all aspects of the subject. The communications presented by the researchers, doctors and psychologists present analyzed the Moroccan policy of

liberalization of the health sector, the challenges of spatial and social disparities in access to care and the health coverage project launched by HM the King. This meeting was a real opportunity for constructive exchanges and collaborative production of reflections around the subject which is considered crucial and relevant according to the High Directions of His Majesty to ensure a new reform of the health system.

Signing of an agreement between the Euromed University of Fez and the Moroccan Association of Occupational Health

The Moroccan Association of Occupational Health organized the 18th edition of the sessionspring conference on the theme "The sick at work and work-related illness" on May 18, 2024 in Meknes. This conference brought together experts and professionals to discuss the need to strengthen occupational medicine and adopt new laws to protect the health of employees. Participants included the regional delegate of the Ministry of Health and Social Protection, the president of the Association, the regional director of the Ministry of Economic Integration, university professors, experts, and occupational physicians.

The discussions focused on important and current topics related to occupational medicine and its legal relations with employees and employers. A key moment of the event was the signing of a partnership agreement between the Moroccan Association of Occupational Health and the Euromed University of Fez. This six-year agreement aims to exchange expertise and knowledge in the fields of training and scientific research, as well as to carry out joint projects to improve the health and safety of workers in Morocco.

Doctoral Thesis Defense in "Additive Manufacturing and Materials Science" by Mr. Patrick MUNYENSANGA

This thesis explores the widespread use of metallic implants in medical and orthopedic surgery, which is faced with limitations such as implant degradation and long-term bonding incompatibilities. To address these limitations, the thesis proposes to improve the interfacial surface of implants, promote faster bone regeneration and better bioactivity, as well as improve biocorrosion resistance. A lightweight and porous metallic implant coated with bioactive glass was developed to stimulate osteogenic cell proliferation, promote bone ingrowth, and overcome structural bonding incompatibilities. The bioactive glass demonstrates the ability to impregnate antibacterial and therapeutic agents essential for osseointegration with the host organism. The results confirmed the formation of a bone-like layer on the implant surface, as well as improved biocorrosion resistance. This surface modification approach shows significant potential for improving the durability of orthopedic implants.

Training in Digital Orthodontics at UEMF

The Euromed Faculty of Dental Medicine of the Euromed University of Fez, fully committed to the process of digitalizing all of its programs, successfully concluded, today, May 10, the fourth level of the Diploma in Digital Orthodontics.

This phase of the training focused on the use of digital diagnostics through 3D simulation and treatment software, as well as on the complete mastery of the Invisalign system, treating cases of Class II and III malocclusions, transverse alignment, overbite and open bite. The program also incorporated advanced modules on the use of miniscrews in orthodontics and on innovative therapeutic strategies.

The quality of teaching was ensured by an eminent team of trainers, including Dr. Charafa Bennis, Dr. Aziz Marani Alaoui, Dr. Waddah Sabouni, Prof. Zakaria Bentahar, Prof. Joseph Bouserhal, Dr. Francesco Garino, and Prof. Amal Ouazzani Chahdi.

This certification is not only a guarantee of competence for participants but also an essential milestone for the advancement of contemporary orthodontic practices.

Visit of students from the Euromed Faculty of Pharmacy to pharmaceutical laboratories

The visit made by third-year students of the Euromed Faculty of Pharmacy to the pharmaceutical laboratories Maphar, Cooper Maroc and Hikma in Casablanca was an enriching and essential experience for their academic and professional careers.

By having the opportunity to visit these pharmaceutical industries, the students were immersed directly in the heart of the pharmaceutical industry, a sector essential to public health.

This immersion allowed them to observe and understand the complex manufacturing and quality control processes of medicines. Gaining a practical understanding of these processes is crucial to their training and equips our future pharmacists with the skills needed to excel in their future professional careers.

World Oral Health Day celebrated at UEMF

On the occasion of World Oral Health Day, the Euromed University of Fez organized, in partnership with the Moroccan Association for Oral Health Prevention (AMPBD), a study day for the benefit of students of the Euromed Faculty of Dental Medicine and dental health professionals, on Friday, March 15, at the University's Eco-campus.

The event highlighted the importance of oral hygiene practices to prevent oral diseases such as cavities, periodontal disease and tooth loss through lectures and interventions by experts, including Dr. Charafa BENNIS and Dr. Frabcesco GARINO. This day was also marked by the screening of a short film produced by students of the Euromed Faculty of Dental Medicine.

World Oral Health Day also provided an opportunity for dental professionals and health organizations present at the event to promote awareness campaigns, offer screening services, and provide information on dental care.

International expert in pharmacotoxicology, Dr. Mohammed Bourdi, guest of the UEMF

Organized by the Euromed University of Fez (UEMF) and its component the School of Biomedical Engineering (EIB), a conference under the theme "Preclinical in-vivo and in-vitro studies in drug development" was led by Dr. Mohammed BOURDI, today February 21 at the Eco-campus.

Dr. Mohammed BOURDI is a leading expert pharmacotoxicologist and professor of toxicology at the National Institutes of Health (NIH) Maryland/FAES and Mount St. Mary's University Maryland.

Students and faculty benefited from his extensive knowledge in the field of in vivo and in vitro preclinical studies in drug development, providing valuable insight into crucial aspects of drug research prior to market introduction.

This meeting provided an opportunity to exchange ideas, discuss current advances in the field, and strengthen ties between academic institutions and renowned practitioners. The event enriched the educational framework by providing participants with an in-depth insight into the drug development process, thereby strengthening their understanding of the challenges related to pharmaceutical research.

UEMF hosts international science dissemination project on antimicrobial resistance and the fight against superbugs

The Micromonde project, developed in 17 countries, aims to bring scientific culture and biomedical research closer to students while promoting a vocation for research. The first edition concluded on the campus of the Euromed University of Fez (UEMF), with the participation of more than 100 students in pharmacy, biomedical engineering, and biotechnology. Supervised by professors from UEMF and the University of Valencia, they conducted experiments to discover new bacterial strains that produce antibiotics.

The project uses a project-based learning (PBL) method to encourage critical thinking and problem-solving. This program is part of international initiatives, such as the Small World Initiative, launched at Yale in 2012 to address the need for new antibiotics in the face of bacterial resistance. The project is supported by various consortia, with international funding and cooperation, and is being rolled out for the first time in Morocco under the UEMF-MicroMondeMaroc initiative.

Vital Aid Training: Mastering the Actions That Save Lives

As part of the induction week, the Faculty of Nursing and Health Technology organized a practical training session on first aid and resuscitation. Participants acquired essential skills for responding to life-threatening emergencies.

Every little helps when it comes to saving lives, and this training reinforces our commitment to building a safer, more responsive community.

STARTECH Call for Projects: Comprehensive Support Programs

Are you an innovator in the fields of AgriTech, HealthTech, CleanTech, Industries 4.0, EdTech, Cybersecurity or Fintech?

The Euromed Innovation Center(EIC)of the Euromed University of Fez is launching the STARTECH call for projects, offering a unique opportunity to benefit from personalized support and mentoring from experts.

Aimed at assisting those with innovative ideas through comprehensive support programs, STARTECH includes collaborative workspaces, specialized training, soft skills coaching, and privileged access to UEMF's resources and technological platforms.

The deadline for submitting applications is September 8, 2024. Applications received after the closing date of the call for projects will not be considered. Selected projects will participate in Bootcamps within UEMF and benefit from attractive investment opportunities offered by our partners.

[Integration Week] Conference on the Successful Transition to Higher Education

On Friday, September 20, as part of the integration week at the Euromed University of Fez, Dr. Assia Fadili, Psychiatrist, led a conference entitled "Successful Transition to Higher Education - Practical Tools & Strategies" for the benefit of new students of the Health Center. The event focused on the major challenges new students face during their transition to higher education, including stress management and well-being.

Dr. Fadili shared practical strategies to help students better manage academic pressure and adapt effectively to their new environment. She also discussed the importance of balancing personal life and academic demands.

This conference is part of UEMF's commitment to supporting its students in their studies and providing them with the tools they need to successfully transition to higher education. In the presence of distinguished Professor Mustapha Fadili, the discussion was also enriched by a contribution that was both scholarly and moving.

The event concluded with practical advice on time management and priority setting, essential for a successful transition. Speakers emphasized the importance of taking advantage of available campus resources to ensure a successful integration into the university.

International Conference in Fez: SanteRsefugies and Migrants

On October 29-30, 2024, Euromed University of Fez hosted an international conference dedicated to the health of refugee and migrant populations, organized in partnership with IOM, WHO, and UNHCR. This event brought together more than 150 participants representing ministries of health, researchers, academics, and civil society actors from various countries. The conference addressed the health challenges facing migrants and refugees and shared best practices from the MENA region.

Professor Chakib Nejjari, Vice-President of UEMF, highlighted the university's commitment to ensuring equitable access to healthcare, particularly for vulnerable populations. The WHO representative in Morocco, Ms. Maryam Bigdeli, reiterated that universal health coverage is essential to eliminate barriers to care and promote equity. Recommendations were made to improve access to healthcare for migrants, including the digitalization of medical records and South-South cooperation.

Funded by the Finnish Ministry of Foreign Affairs, this initiative aims to strengthen health policies for migrants in the region and promote coordinated action between countries of origin, transit and destination.

2025: Euromed University of Fez intensifies its commitment to the SDGs

Conference at UEMF: Art Therapies and Cultural Inclusion with ICESCO

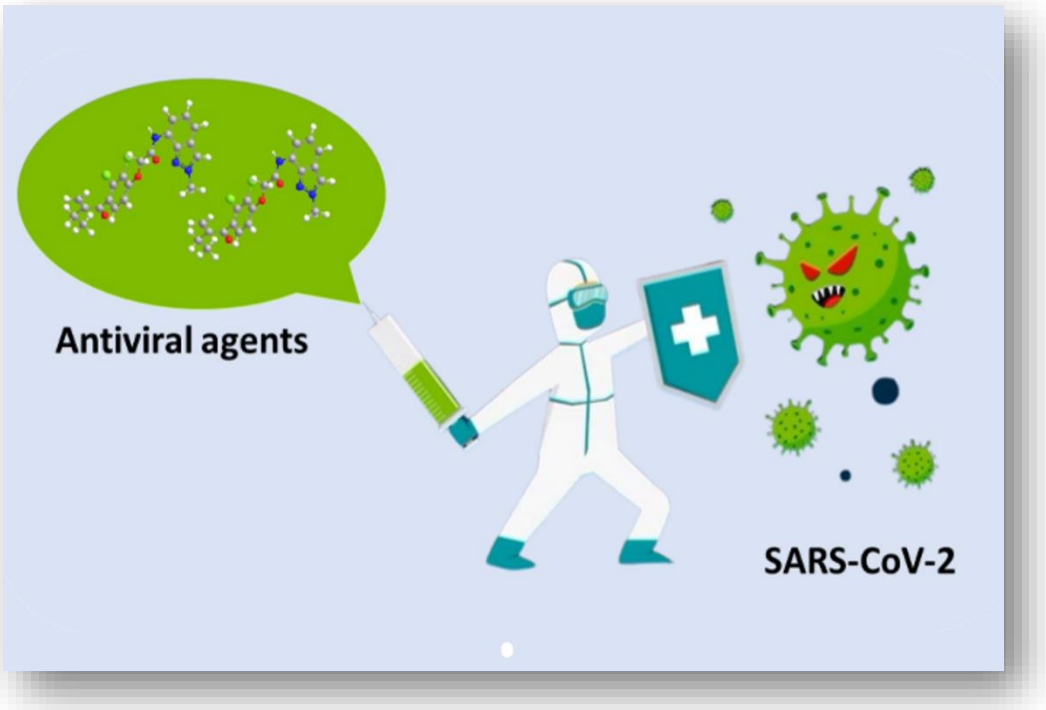

The Euromed University of Fez (UEMF) was honored to host the "World Thinkers Invited to ICESCO" conference, bringing together international experts in art therapy and music therapy. This event, organized in partnership with the Islamic World Educational, Scientific, and Cultural Organization (ICESCO), addressed key issues surrounding art therapy, cultural inclusion, and the rights of people with disabilities.

Speakers included renowned figures such as Professor Emeritus Edith Lecourt, a pioneer in music therapy and founder of university art therapy programs, and André Fertier, a fervent defender of cultural rights. The program included lively lectures and discussions, focusing on art therapy training methods, music therapy as a cultural therapy, and the importance of ensuring access to artistic culture for all.

The event, which took place at the UEMF premises before continuing in Rabat, demonstrates the Euromed University of Fez's commitment to promoting inclusive culture and well-being through the arts.

Doctoral thesis defense in Organic and medicinal chemistry by Mr. Abdelali CHIHAB

COVID-19, caused by SARS-CoV-2, has caused an unprecedented global health crisis, highlighting the urgency of developing new antiviral therapies. Among the promising therapeutic targets, the main viral protease (Mpro) plays a crucial role in the maturation of viral polyproteins required for virus replication. Inhibiting this enzyme represents a key strategy to block the viral life cycle.

This thesis focuses on the development of new bioactive molecules targeting the main enzymes of SARS-CoV-2, notably Mpro and PLpro, in order to contribute to the fight against COVID-19. This work combines organic chemistry, molecular modeling, and ADMET evaluation approaches to design and synthesize ethacrynic acid-based derivatives of indole as well as other molecules derived from modified amino acids.

The studied compounds were characterized using spectroscopic techniques (NMR, IR, UV, HRMS) and tested for their interaction with target enzymes. The results show promising properties, including favorable binding energies and good reactivity with key residues, suggesting inhibitory potential. In vivo validation was also considered to confirm the efficacy and safety of the compounds.

This research paves the way for the design of new antivirals that can be developed to treat viral infections, while enriching knowledge on medicinal chemistry applied to emerging viruses.

Women and the Law: Realities and Challenges

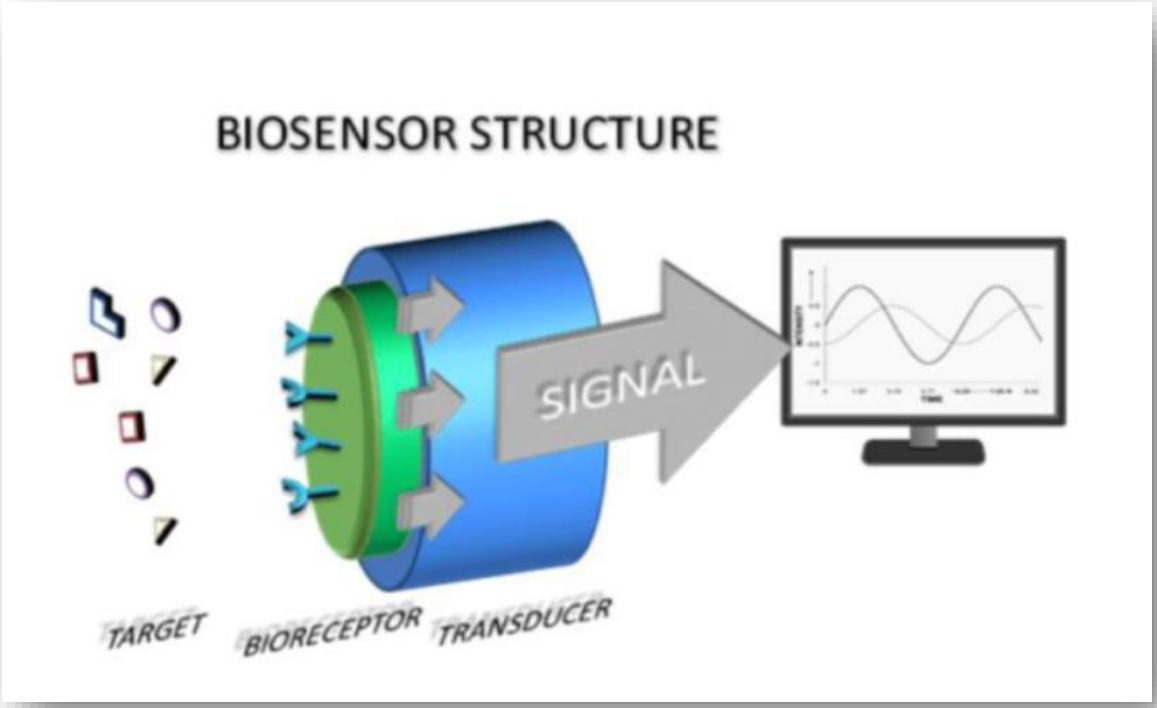

The Euromed Faculty of Human and Social Sciences recently provided a real space for reflection by hosting the conference "Women facing the Law: Realities and Challenges", as part of the Conference Cycle of the ICESCO-EUROMED Chair "Arts, Sciences and Civilizations".

A debate that shifts the boundaries!

On the program:

- The Moudawana reforms and their impact on society
- The place of women in the public and private spheres
- Challenges related to reproductive and maternal health
- And much more...

https://www.linkedin.com/posts/universit-euro-m-diterran-enne-de-f-s_la-faculté-euromed-des-sciences-humaines-activity-7311386077682884608-Wn1x?utm_source=share&utm_medium=member_desktop&rcm=ACoAADTGRfcBC1u9wYbkACypuAdXhOuzPcQwP94

"Design, Modeling and Realization of Optofluidic Sensors Based on Surface Plasmon Resonance for Precision Sensing."

This thesis focuses on the development of high-performance optofluidic biosensors based on the surface plasmon resonance (SPR) phenomenon. A novel golden ratio approach was proposed to optimize the geometric properties of a gold-silver bimetallic configuration, achieving rapid optimization with enhanced sensitivity and resolution.

Additionally, a dual-mode plasmonic configuration combining guided modes in a dielectric waveguide and plasmonic modes on a gold film was studied. This configuration generates a detection mode (PIT) with high performance and a reference mode (TM1) to improve measurement reliability by minimizing false positives.

Finally, a new approach for microfluidic system manufacturing using stereolithography additive manufacturing was developed, integrating real-time temperature control. This method improved the mechanical and structural properties of microfluidic chips, making them highly suitable for biosensing applications, as confirmed by microscopic analyzes and mechanical tests.

New Dynamics: Health Tourism at the Euromed University of Fez

A pioneer in promoting synergies between research, innovation and territorial development, the Euromed University of Fez (UEMF) hosted, from April 10 to 12, 2025, the first edition of the Regional Forum on Health Tourism, under the theme: "Thermal waters of the Fez-Meknes region: Health and Tourism".

Organized in partnership with the Wilaya of the Fez-Meknes Region, the province of Moulay Yacoub, the Regional Tourism Council and the Regional Council, this major event is fully in line with the UEMF's commitment to actively contribute to the dynamics of sustainable regional development, particularly in sectors with high potential such as health tourism.

A meeting place for experts, researchers, economic operators, and public stakeholders, the Forum offered a rich program including scientific seminars, presentations of innovative projects, and roundtable discussions on the challenges of developing spa resorts. Through this event, the UEMF leverages its academic and scientific expertise to fuel reflection and support public policies in structuring a regional ecosystem focused on health, well-being, and sustainable tourism.

By hosting this Forum, the University confirms its role as a catalyst for strategic projects at the national and regional levels, and reaffirms its mission as a center of excellence promoting dialogue between knowledge, innovation and inclusive development.

UEMF welcomes the 3e eedition of the'National Para-Karat OpeneKata

The Euromed University of Fez had the honor of hosting, on Wednesday, April 16, 2025, the third edition of the National Para-Karate Kata Open, organized in partnership with the Mohammed VI National Center for the Disabled, on the occasion of the National Day of People with Disabilities.

In an atmosphere marked by respect and determination, the Euromed Sports Complex was adorned with the dazzling white kimonos of these young athletes from all over the Kingdom. Fifty athletes with disabilities delivered impressive demonstrations, embodying both the discipline of karate and the power of perseverance.

Through this initiative, the UEMF reaffirms its strong commitment to inclusion, diversity, and sport for all. This sporting and educational event provided a wonderful showcase for the talents of these champions and helped raise awareness within the university community about the issues of accessibility and equal opportunity.

Euromed University would like to thank all the supervisors, guides, referees and volunteers who contributed to the success of this event, as well as the regional sports delegations for their mobilization.

Cancer awareness in Sain by the Hands club

The event involved a visit to the Ziyat Child Protection Center for Girls, with the aim of providing advice and raising awareness about breast cancer prevention. It was a memorable and joyful experience, marked by enriching exchanges with the young girls on site, meaningful conversations, and the sharing of valuable advice to help them protect themselves. An unforgettable day, filled with laughter, connection, and kindness.

Visit and support for the children of Bassma

A day full of emotion and sharing, our Hands Club visited the Basma association for mentally disabled children in Fez on December 18, 2024. We exchanged, played, and shared unforgettable moments. Thank you to the Basma association for their warm welcome and admirable work.

https://www.instagram.com/reel/DEAGlRwsFMh/?igsh=ODV4M2pxMmZhazN2

Dar attfal el oufae

Our Hands club recently organized a visit to the Dar Al-Wafa orphanage as part of our solidarity initiative. The goal was to share a warm moment with the children, send them New Year's wishes, and spread smiles. A day full of generosity and hope, where we all celebrated solidarity and the spirit of brotherhood. Thank you to everyone who helped make this event an unforgettable moment."

Bouhouda Medical-Dental Caravan: July 5-7, 2024

Key points:

- Specialties covered: general medicine, pediatrics, cardiology, gynecology, radiology, ENT, rheumatology, gastroenterology, pharmacy and dentistry.
- Additional activities: free distribution of medicines and awareness-raising workshops. This action had a significant impact by providing quality care to a remote rural community.

Organized in the Taounate region, this caravan enabled more than 1,400 medical and dental consultations to be carried out thanks to collaboration with the health delegation and the APSMIRS association.

https://www.instagram.com/p/DABLDm4Mtxg/

Breast Cancer Awareness Workshop: October 19, 2024

As part of Pink October, the Elite Club organized a breast cancer awareness workshop at the Avicenne Clinic in Fez. This workshop, led by Dr. Guennoun Ahmed, a specialist in gynecology, obstetrics, and infertility, brought together 20 students from Euromed University. Dr. Guennoun addressed key topics such as the importance of self-examination for early cancer detection and best practices for regular screening. Through clear explanations and interactive demonstrations, participants were able to acquire practical knowledge while sharing their questions in a friendly atmosphere. The workshop was very enriching thanks to the speaker's expertise and the dynamic discussions, providing both an educational and entertaining experience. The students expressed their satisfaction and their intention to share this knowledge within their communities.

https://www.instagram.com/p/DBZesZBxgi_/

Preventive screening day in Moulay Yaakoub for breast and cervical cancer

In partnership with the Moulay Yaakoub delegation, the Elite Club organized a preventive screening day dedicated to breast and cervical cancer. This event aimed to raise awareness in the local community about the importance of early detection to improve treatment and survival rates.

Key points:

- **68 people** were examined during free clinical consultations and examinations.
- **2 women** showing signs of breast cancer were immediately referred to the Fez University Hospital for in-depth diagnosis and rapid treatment.
- **Advice** on prevention and the importance of regular check-ups.

This initiative provided essential medical services to rural populations, detected critical cases early and increased awareness of cancer prevention.

UEMF Elite Club Report

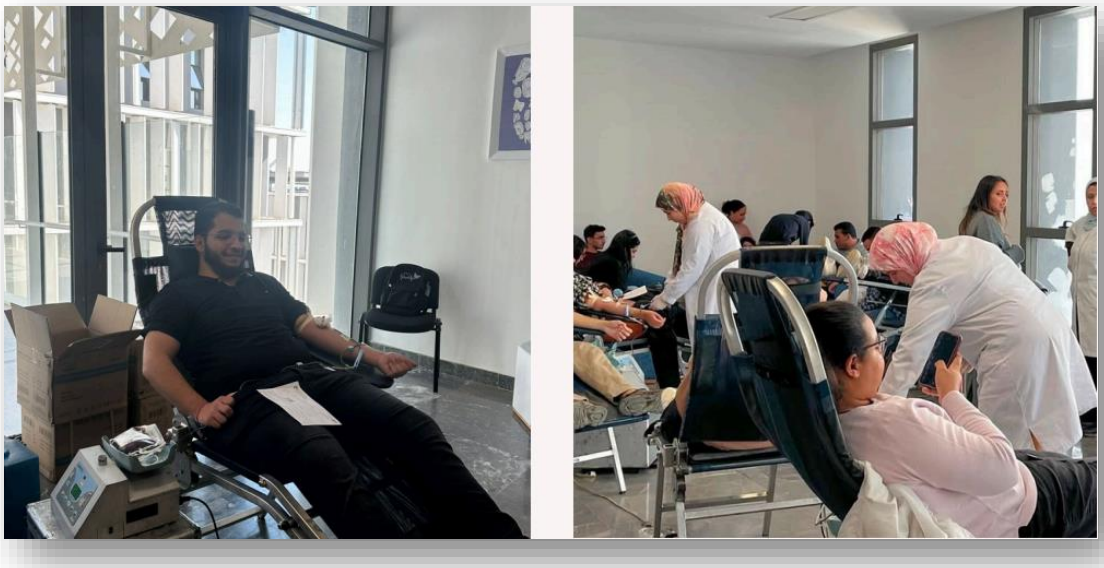

Hamria-Settat Medical-Dental Caravan: October 25-27, 2024

The Elite Club, in partnership with the Sahwa Association and the NGO Neya Charity, organized a medical-dental caravan in Hamria from October 25 to 27, 2024, offering free care to the local population. A total of 1,463 consultations were carried out, spread across various specialties. Details of Consultations: General Medicine: 300 consultations Ophthalmology: 200 consultations Dentistry: 130 consultations Cardiology: 80 consultations Gastroenterology: 120 consultations Pediatrics: 210 consultations Rheumatology: 140 consultations Gynecology: 70 consultations The event provided essential medical care to rural and vulnerable populations. It also helped raise awareness among residents about the importance of prevention. The success of this caravan illustrates the Elite Club's commitment to improving local health conditions.

https://www.instagram.com/p/DBuBzbUNULu/

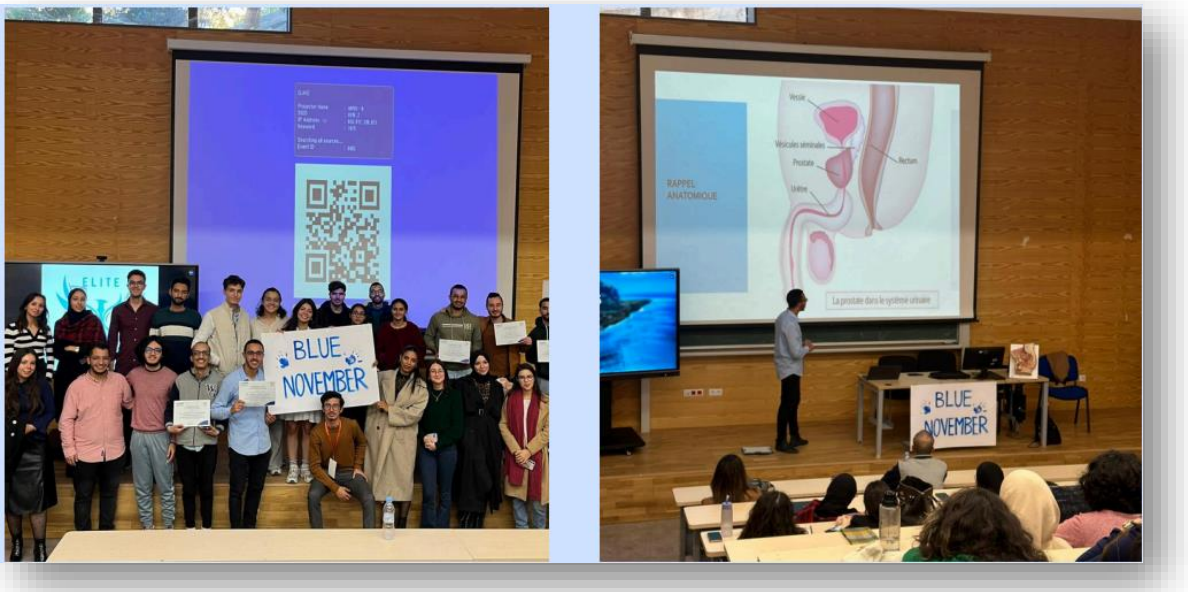

Blood Donor Day: November 14, 2024

The Elite Club, true to its humanitarian vocation, organized a blood drive day on November 14, 2024, in partnership with the Blood Transfusion Center and the Moroccan Volunteer Corps. This event was held at the Euro-Mediterranean University of Fez and was part of an effort to raise awareness among the university community about the importance of blood donation, a simple but fundamental act that can save lives. During this day, 62 donations were recorded, reflecting a strong mobilization of students, teachers, and staff members. Each blood bag collected represents a chance of survival for a patient in distress, whether following an accident, surgery, or as part of complex medical treatment. Beyond the collection itself, the event was a true moment of solidarity and commitment. It helped strengthen civic spirit within the university, by promoting volunteerism and the social responsibility of young people. This initiative perfectly illustrates the mission of the Elite Club: to take concrete action for the common good and to inspire a dynamic of lasting mutual aid among university youth.

https://www.instagram.com/p/DCzpBaXxoh7/?img_index=2

Prostate Cancer Awareness Conference

On November 20, 2024, the Elite Club organized an interactive conference at the Euromed University of Fez to raise awareness about prostate cancer, a disease that is still too often ignored. The event brought together health science students, teachers, and medical professionals. Two experts, Dr. Oumaima Syouri, an oncologist, and Dr. Mohamed Amine Guessab, a urologist, discussed treatment, screening, and the importance of early diagnosis. The conference's interactive format allowed for rich, open-ended discussions, reinforced by a fun quiz to test participants' knowledge. This initiative highlighted the importance of prevention and highlighted university youth as key actors in social change, spreading values of solidarity and kindness.

https://www.instagram.com/p/DDBKzgxo7I4/?img_index=1

Conference on the fight against HIV

On December 26, 2024, the Elite Club organized an interactive conference on the fight against HIV at the Euromed University of Fez, bringing together health professionals including Dr. Mohamed Amine Guessab. The event aimed to raise awareness among students about transmission mechanisms, prevention methods, and therapeutic advances, while deconstructing preconceived ideas that are sources of stigma. Thanks to a participatory and caring format, the exchanges between the speakers and the public helped to anchor essential knowledge and address the concerns of young people. This initiative was part of a broader awareness campaign, including educational and symbolic actions such as the sale of red ribbons. With more than 60 participants, the conference confirmed the importance of open spaces for dialogue around health issues.

https://www.instagram.com/p/DEN-J7wN_xD/

Blood donation

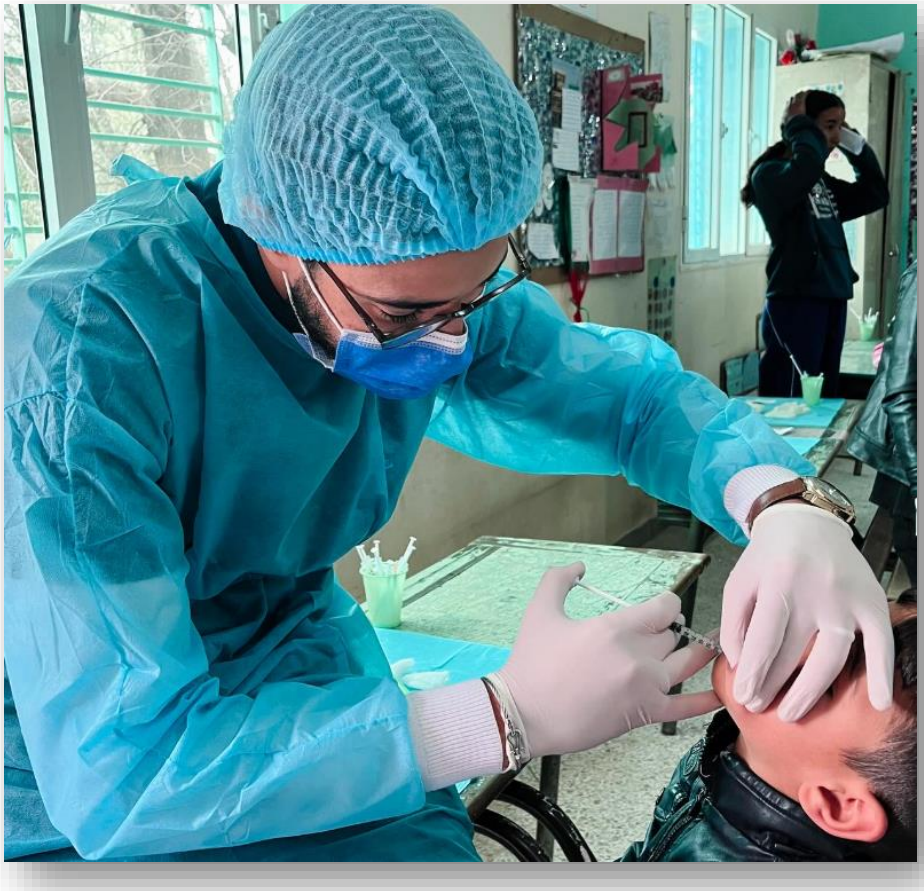

The 9eThis edition of the Blood Donation was organized outside the university campus to broaden the target audience and involve a wider community. This action helped raise awareness among a wider audience about the importance of blood donation, while also facilitating collection for hospitals and patients in need. The event was carried out in collaboration with local institutions to ensure broad participation.

The main objective of this edition was to broaden the reach of the initiative, raise awareness among more people about blood donation, and contribute to blood collection by supporting the needs of hospitals and patients, while strengthening the spirit of solidarity beyond the university framework.

One day of impact, one life of change

On February 16, 2025, in Skoura M'daz, our humanitarian dental caravan brought care, joy and solidarity to the Ichanaaki School Group.

- 260 students benefited from free dental consultations provided by dedicated professionals
- Oral hygiene awareness sessions to teach children how to take care of their smiles
- A complete renovation of the school's exterior walls, bringing their learning environment back to life
- Unforgettable moments of sharing: music, dance, thinking games and creative activities with children
- Distribution of dental kits, thanks to the generous support of Colgate Morocco

It was not just about medical care, but also about spreading happiness, inspiring hope and leaving a lasting mark.

https://www.instagram.com/p/DGv5cdyumpV/?img_index=2

Medical & Humanitarian Caravan: ROTARACT UEMF

February 22-23, 2025, this weekend, we took winding roads and crossed rain-soaked paths to reach the heights of Ikaouen—where access to healthcare is limited, but solidarity knows no boundaries.

Thanks to @association_arads, our incredible doctors and specialists, the generosity of @sante_bio_premium for their donation of feminine hygiene products, and above all the unwavering commitment of our members, we were able to:

- Raise awareness about feminine hygiene and measles prevention
- Provide gynecological and pediatric consultations
- Distribute essential medicines and warm clothing
- Bringing comfort to a community in need

Despite the rain, despite the distance, our mission remained intact. Because it is in these moments—between fatigue and satisfaction—that we fully grasp the meaning of commitment.

https://www.instagram.com/p/DHjSYyEMzXn/?img_index=12

Launch of work on the Euromed University Hospital in Fez

The University Hospital Center (CHU) of the Euromed University of Fez has begun work on its first phase of construction. This project is part of the development of health and medical training infrastructure, aimed at strengthening healthcare provision, promoting access to quality health services, and supporting the training of health professionals at the regional and national levels.

https://telquel.ma/instant-t/2025/05/02/lancement-des-travaux-du-chu-euromed-de-fes_1930411/

Medical-Dental Caravan in Tayanza

On December 14, 2024, the Elite Club of the Euromed University of Fez organized a medical-humanitarian caravan in Taynza (Taounate), aimed at providing essential medical care to an isolated population. A multidisciplinary team provided consultations in several medical specialties, while conducting awareness-raising and screening activities. This initiative helped improve access to care, detect undiagnosed pathologies, and strengthen health prevention, while promoting values of solidarity, humanity, and sustainable commitment.

https://www.instagram.com/p/DHrIstLNUsG/?img_index=8

Medical-Dental Caravan in Sebaa Rouadi

On January 25, 2025, the Elite Club of the Euromed University of Fez organized a medical-humanitarian caravan in Sebaa Rouadi. This initiative aimed to provide free, quality medical care, raise awareness among children about oral hygiene, and screen for vision problems. The multidisciplinary team provided general consultations, dental care via a mobile unit, ophthalmological examinations, and health education workshops. Hygiene kits were distributed to participants, thus strengthening prevention and awareness.

https://www.instagram.com/p/DH7Af7lNka7/?img_index=1

EL Mers Medical-Dental Caravan, Boulmane

On January 26, 2025, the Elite Club of the Euromed University of Fez, in collaboration with the Association of Young Volunteers, organized a medical-humanitarian caravan in El Mers, in the province of Boulemane. This solidarity initiative aimed to facilitate access to free, quality medical care for populations living in isolated areas. It also aimed to raise awareness among children about the importance of oral hygiene and to screen for visual disorders. Thanks to a multidisciplinary team, consultations were provided in several specialties: general medicine, pediatrics, cardiology, gynecology, dermatology, ophthalmology, and dental care. Health education workshops complemented this action, emphasizing prevention and daily hygiene.

https://www.instagram.com/p/DFyUHTdtv5h/?img_index=6&igsh=MTc2cWhhaHVpdGd4ZQ

Medical-Dental-Humanitarian Caravan – Oulad Ali Youssef, Boulemane

On February 8, 2025, the ELITE Club of the Euromed University of Fez, in collaboration with the Cultisio Club of the ESTF, organized a medical-humanitarian caravan in Oulad Ali Youssef, in the province of Boulemane, in the heart of the Middle Atlas. Supported by local authorities, partner associations, and volunteer medical staff, this initiative aimed to provide multidisciplinary medical support to the inhabitants of a landlocked area, while distributing essential humanitarian aid (food, clothing, school supplies).

A diverse medical team provided consultations in general medicine, pediatrics, gynecology, cardiology, ophthalmology, dentistry, and traumatology, as well as health education workshops. Dental care was provided on board a mobile unit, while ophthalmological examinations allowed for the screening of visual disorders and referral to appropriate solutions.

For the youngest members of the family, fun and educational activities were organized: toothbrushing workshops, readings, distribution of hygiene kits, candy, and toys, in a friendly atmosphere led by mascots. More than 100 food baskets, as well as warm clothing and school supplies, were distributed, providing concrete support to families during the winter.

https://www.instagram.com/p/DIevIJKxby3/?img_index=5&igsh=MWd3eGg3ZnF4eHViZA

School health caravan in Aouzay

As part of its community health initiatives, the Elite Club of the Euromed University of Fez organized a medical-school caravan in the remote village of Aouzay, in partnership with the Health and Social Security Delegation. This initiative aimed to improve access to healthcare for the most vulnerable rural populations, particularly students and their families.

A multidisciplinary team of five general practitioners and three dentists provided general medical consultations as well as oral care (extractions, scaling, hygiene advice). The operation provided care to 279 beneficiaries, while strengthening health education through discussions on prevention, daily health habits, and the importance of medical monitoring.

Beyond the care provided, this caravan highlighted the urgent health needs in rural areas and fostered greater synergy between the educational community, families, and healthcare professionals. The Elite Club aims to replicate this model in other regions, as part of a drive to promote school health and equal opportunity.

https://www.instagram.com/p/DIwwQZvt7QW/?igsh=MTB2Y3R4MHFxYnhwZw

Medical-Dental Caravan in Dar Abkhtie

As part of its commitment to access to healthcare in remote areas, the Elite Club of the Euromed University of Fez organized a large-scale medical and dental caravan in Dar Abkhtie. This solidarity initiative was distinguished by the exceptional mobilization of 15 general practitioners and specialists (gynecology, pediatrics, cardiology, ophthalmology, internal medicine, etc.) and 7 dental surgeons, allowing more than 1,489 consultations to be carried out in a single day.

Beneficiaries received free care, accurate diagnoses, personalized medical advice, and appropriate treatment. Medications were also distributed on site with the support of volunteer pharmacists. At the same time, awareness-raising workshops on oral health, hygiene, and chronic disease prevention were offered, particularly for women and children.

The event received significant media coverage, notably from Agence MAP, Al Aoula, and Fez regional radio, helping to highlight the impact of student solidarity initiatives. This caravan, now considered one of the Elite Club's greatest successes, illustrates its ability to unite partners around a common cause: providing free, humane, and accessible care where it is most needed.

https://www.instagram.com/p/DIZNOhZNg25/?igsh=ZnR0emxmZHp6Z2d3

Medical-Dental Caravan in Agoudim

To mark the holy month of Ramadan, the Elite Club of the Euromed University of Fez, in partnership with the Hand in Hand Club of Al Akhawayn University, organized a two-day medical-dental caravan to the isolated village of Agoudim, in the Middle Atlas. This humanitarian mission was distinguished by the diversity of medical specialties involved, the quality of the welcome given to patients, and its deep roots in the local community.

Over the course of a weekend, general practitioners and specialists (in ophthalmology, gynecology, dermatology, and ENT) provided free consultations to residents, mostly women, children, and the elderly. A comprehensive dental component was also provided, with basic care, extractions, scaling, and awareness-raising activities on oral hygiene.

One of the highlights of the mission was the distribution of hygiene kits (toothbrushes, toothpaste) and medicines, extending the positive impact of the intervention beyond the caravan.

Beyond healthcare, this initiative strengthened ties between students from different universities, promoted young people's involvement in social work, and raised awareness among the local population about the importance of prevention and medical monitoring. Covered by MAP Agency and the national channel Al Aoula, the event also helped highlight the civic and solidarity role of Moroccan youth.

https://www.instagram.com/p/DIkAQhlNs82/?img_index=3&igsh=amw3eXowZmNxc3Zh

Medical-dental caravan - Tisi Ouassli, Taza

On April 13, 2025, the Elite Club of the Euromed University of Fez organized a medical-dental caravan in the village of Tisi Ouassli, located in the province of Taza. This initiative aimed to facilitate access to oral health care, offer specialized medical consultations, and distribute essential medicines to the local population.

A multidisciplinary team provided consultations in general medicine, pediatrics, gynecology, cardiology, and dentistry. Clinical examinations and electrocardiograms (ECGs) were performed, along with appropriate diagnoses and treatments. A mobile unit provided basic dental care, including extractions, preventative care, and referrals to specialists if necessary.

At the same time, educational workshops were organized for children: learning how to brush their teeth, educational readings, and distribution of hygiene kits, treats and play materials, thus creating a friendly and preventative atmosphere.

https://www.instagram.com/p/DIznayPoOzM/?igsh=MWhkaWFtOGJzbGMzeA

Medical-dental and Humanitarian Caravan - Oued Nja, Moulay Yaacoub

On April 19, 2025, the Elite Club of the Euromed University of Fez, in collaboration with the Rotaract Club EMSI Fez, organized a medical-humanitarian caravan in the village of Oued Nja, in the province of Moulay Yaacoub. This solidarity initiative aimed to improve oral hygiene, provide basic medical consultations, and distribute suitable clothing to families in precarious situations.

Consultations were provided by a multidisciplinary team consisting of general practitioners, pediatricians, gynecologists, and dentists. Patients received free care, treatments tailored to common conditions, and referrals to specialized facilities if necessary.

Dental care was provided on board a mobile unit, including basic treatments, extractions, and preventive measures. At the same time, educational workshops were organized for children, including toothbrushing demonstrations, playful readings, and the distribution of hygiene kits, treats, and small gifts.

Finally, warm clothing was given to more than 100 beneficiaries of all ages, providing material support to families facing the harsh winter weather.

https://www.instagram.com/p/DI96kMkIRFX/?img_index=10&igsh=MWgzZzQzajVpYW5saw

Medical-dental and Humanitarian Caravan - Kandar Sidi Khiar, Sefrou

On April 20, 2025, the Elite Club of the Euromed University of Fez organized a medical, dental and humanitarian caravan in Kandar Sidi Khiar, in the province of Sefrou. This action aimed to facilitate access to dental and medical care for the residents of this locality, while ensuring the distribution of basic treatments and raising awareness about hygiene.

A multidisciplinary medical team provided care to the beneficiaries through consultations in general medicine, pediatrics, gynecology, cardiology, and dentistry. Physical examinations, ECGs, and therapeutic guidelines were performed, along with the free dispensing of medication.

The dental component was provided on board a mobile unit, with a variety of interventions: basic care, extractions, prevention, and referral to specialists if necessary.

At the same time, awareness workshops for children were organized: tooth brushing demonstrations, educational readings, and distribution of hygiene kits, sweets and small gifts, thus creating a moment that was both educational and festive.

ISCAE Olympics: Exceptional sporting performances by UEMF members and title of best delegation

Euromed University of Fez is proud to celebrate the achievements of its students who flew its flag at the Olympics organized by ISCAE in Casablanca. This exceptional competition brought together 14 universities and colleges around demanding sporting events, and our 15 students, accompanied by two supervisors, achieved remarkable performances.

Our champions have distinguished themselves in all disciplines, collecting prestigious titles:

• In Basketball, our team won the first cup.

• In Table Tennis, our students triumphed in both the boys' and girls' categories, with two first cups.

• In Swimming:

- 50m boys: 1st place (gold medal) and 3rd place (bronze medal).

- 50m girls: 2nd place (silver medal) and 3rd place (bronze medal).

- Mixed relay: 1st place (gold medal).

At the end of this event, the Euromed University of Fez was elected "Best Delegation" by the organizers, an accolade that testifies to the commitment, team spirit and excellence of our students.

UEMF PhD student awarded at the international MEDPore25 congress for his promising research

Mohamed Amine Benzaouia, a doctoral student in the NANOMat (Nanomaterials) team at Euromed University of Fez, is conducting innovative research on the development of new antibacterial and antiviral materials. This project, supported by the Hassan II Academy of Science and Technology, is part of a national strategy to strengthen scientific capacity in the face of pandemics, particularly COVID-19.

As part of his work, Mr. Benzaouia participated in the international conference MEDPore25 (Mediterranean Conference on Porous Materials), recently held in Marrakech. He presented a scientific poster entitled: "Nitrogen-containing mesoporous organosilicas as antibacterial materials." This presentation was awarded the Best Poster Award, recognizing scientific excellence, clarity of the subject, and visual quality of the poster.

Currently pursuing a thesis at the NANOMat laboratory, this distinction highlights the dynamism of research conducted at UEMF in the field of nanomaterials applied to health. It also illustrates the university's growing impact on the international scientific scene.

Euromed University of Fez warmly congratulates Mohamed Amine Benzaouia for this well-deserved recognition.

UEMF seals strategic partnerships with seven national sports federations

On May 21, 2025, the Euromed University of Fez organized the "National Sports and Performance Meeting," during which it signed seven partnership agreements with Moroccan sports federations. This event, marked by the presence of representatives from federations such as the Royal Moroccan Ski Federation, Disabled Sports, and Triathlon, reinforced the UEMF's commitment to the development of high-level sport. Ms. Iman Meriem Benkirane, Vice-President of the UEMF, emphasized the strategic importance of this initiative for talent training, innovation, and applied research in the sports field. In addition, the partner federations praised the UEMF's infrastructure, which meets international standards, including the Olympic swimming pool and the FIFA-certified field. Thematic sessions on sports performance, sports psychology, and the contribution of artificial intelligence in training also enriched this meeting.

Doctoral Thesis Defense in “Materials Science and Engineering” by Mr. Oluwatosin David ABODUNRIN

The Euromed University of Fez (UEMF) is pleased to announce the public defense of a doctoral thesis in Materials Science and Engineering.

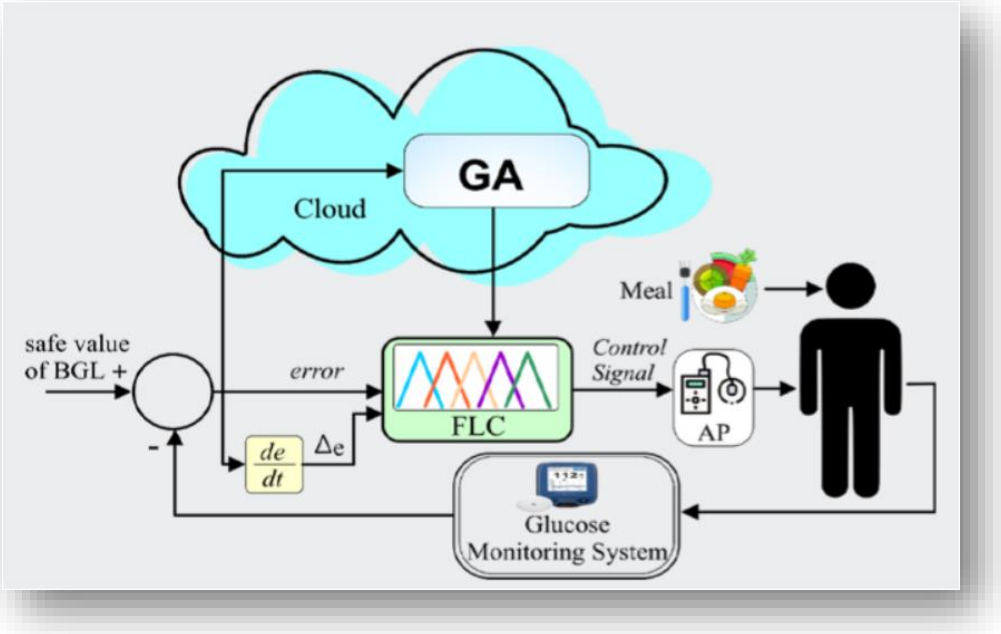

The defense will take place on Monday, June 23, 2025, at 2:30 pm, in the Conference Room, Building 1, at UEMF.

The thesis will be presented by Mr. Oluwatosin David ABODUNRIN, and is entitled:

“Development and Evaluation of Antimicrobial Borate Bioactive Glasses (BBG) for Enhanced Guided Bone Regeneration.”

https://ueuromed.org/actualites/cedoc/soutenance-de-these-de-doctorat-en-materials-science-and-engineering-par-mr

Defense of Doctoral Thesis in “Electrical Engineering” by Mr. Isah Ndakara ABUBAKAR

The Euromed University of Fes (UEMF) is pleased to announce the public defense of a doctoral thesis in Electrical Engineering by Mr. Isah Ndakara ABUBAKAR, scheduled for Wednesday, July 16, 2025, at 09:00 am, in the Gallery, Building 1. His thesis, titled: "Advanced Control Strategies for Blood Glucose Regulation in Type 1 Diabetes: Towards the Development of an Artificial Pancreas", focuses on the development of intelligent control systems for automated blood glucose management in diabetic patients, contributing to the advancement of medical technology and improving patient outcomes.

Sport & Performance at UEMF

In May 2025, the UEMF organized, via the Euromed Sports Centre and the VP-ACVU, a series of events around the theme "Sport & Performance".

On May 7, several conferences were led by experts, addressing key themes: sports performance, sports psychology, artificial intelligence in the service of athletes, and reconciling studies and high-level sport.

On May 21, the National Meeting "Sport & Performance – UEMF 2025" brought together researchers, federations, athletes, students and decision-makers for a day of discussions focused on research, innovation and improving performance in sport.

Round table: Health and well-being of young people – Eating better to nourish better

As part of African Week, a round table was held on June 12, 2025 around the theme:

"Health and well-being of young people: eating better to nourish better", led by Pr. Wafaa Al Hassani, Dr. Samira Nabdi and Ms. Chaimae Jerraf.

This session opened a space for dialogue on the importance of good eating habits among young people, in relation to their physical and mental health.

Discussions between health professionals, experts and students highlighted the links between nutrition, education and sustainable health, highlighting the urgent need for greater awareness and equitable access to a balanced diet, which is essential for building a healthier future for African youth.

Closing of the National School Volleyball Championship

The National School Volleyball Championship ended on April 12, 2025 at the UEMF Sports Center, after four days of intense competition.

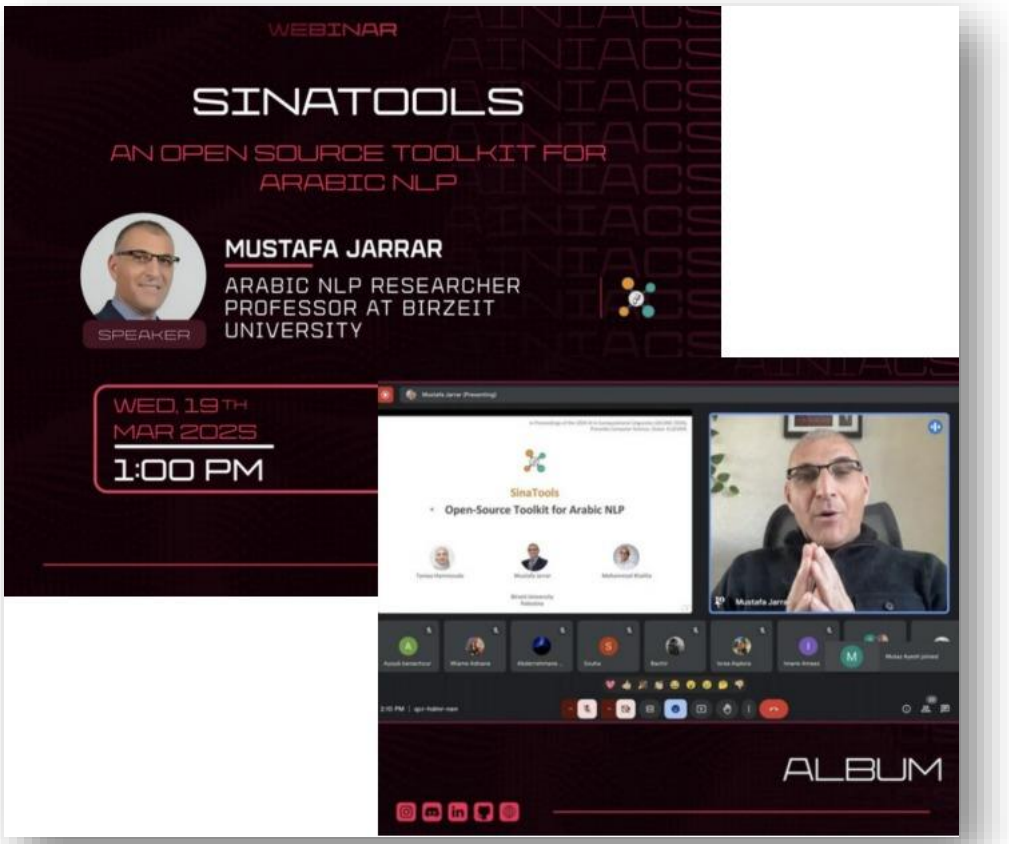

The event was marked by a strong sportsmanship spirit as well as environmental awareness actions.

The students also participated in a cultural tour of the historic medina of Fez.

The closing ceremony, held at the UEMF, was an opportunity to present prizes to the winning teams and to recognize key players in school sport in the region.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

International Webinar on Advances in Artificial Intelligence – Club AIniacs

The AIniacs club organized an international webinar focused on concrete advances in artificial intelligence in specialized fields.

This event brought together doctors, researchers and experts from France, Qatar and other countries.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Lions Club Conference: Diabetes Awareness

On April 16, 2025, as part of the Educational Lecture Series, the Lions Club hosted a Diabetes Awareness Lecture for students.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

“Children of the Moon” Project – Hands Club

On February 15, 2025, the Hands Club participated in the “Children of the Moon” competition organized at ENSAM in Meknes.

On this occasion, the club presented a project to develop 100% natural creams, specially designed for people suffering from Xeroderma Pigmentosum. This project was carried out in partnership with pharmacy and biomedical students from Euromed University.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Solidarity medical mission in Boutaghrar – Hands Club

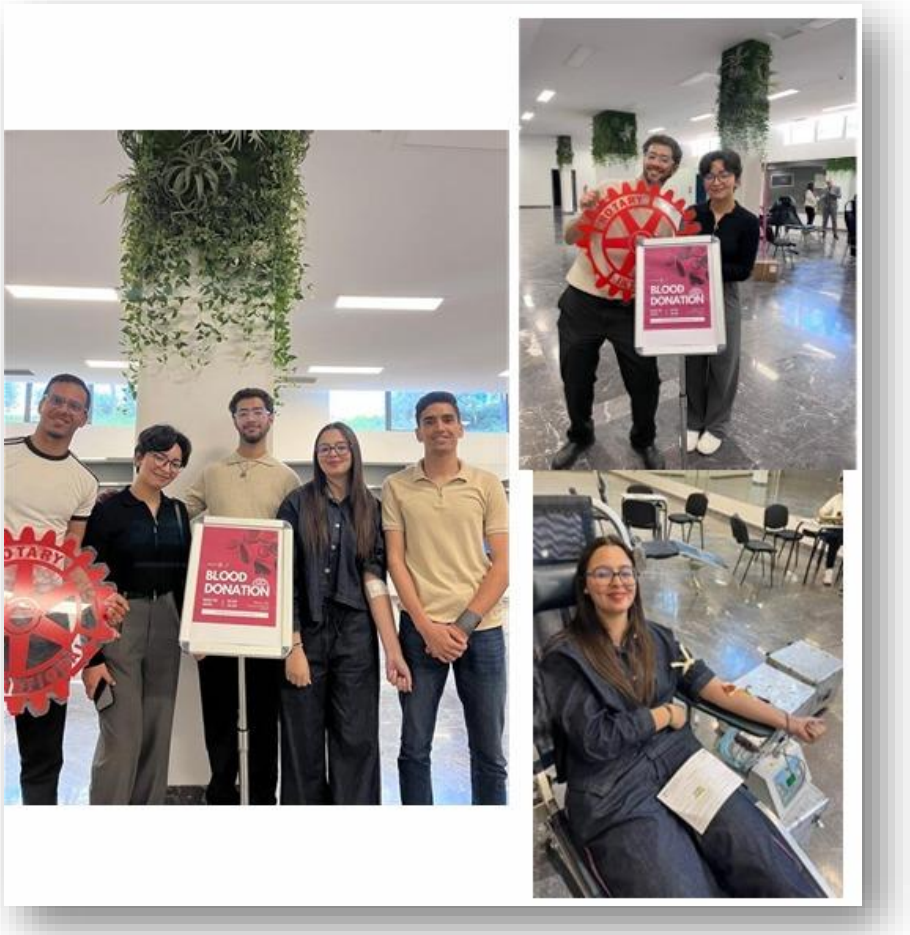

For three days, the Hands Club, in collaboration with a medical team, carried out a humanitarian mission in Boutaghrar, a remote village.

More than 1,400 patients were consulted, medicines distributed, and moments of joy shared with children, in a spirit of solidarity and community service.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Blood Donation Campaign – Rotaract Club

The Rotaract Club organized a blood donation campaign on campus, in collaboration with the Regional Blood Transfusion Center of Fez.

Students, professors and staff members mobilized for this act of solidarity, saving several lives and illustrating the human and collective commitment of the UEMF community.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Art Workshop for Autistic Children – Rotaract Club

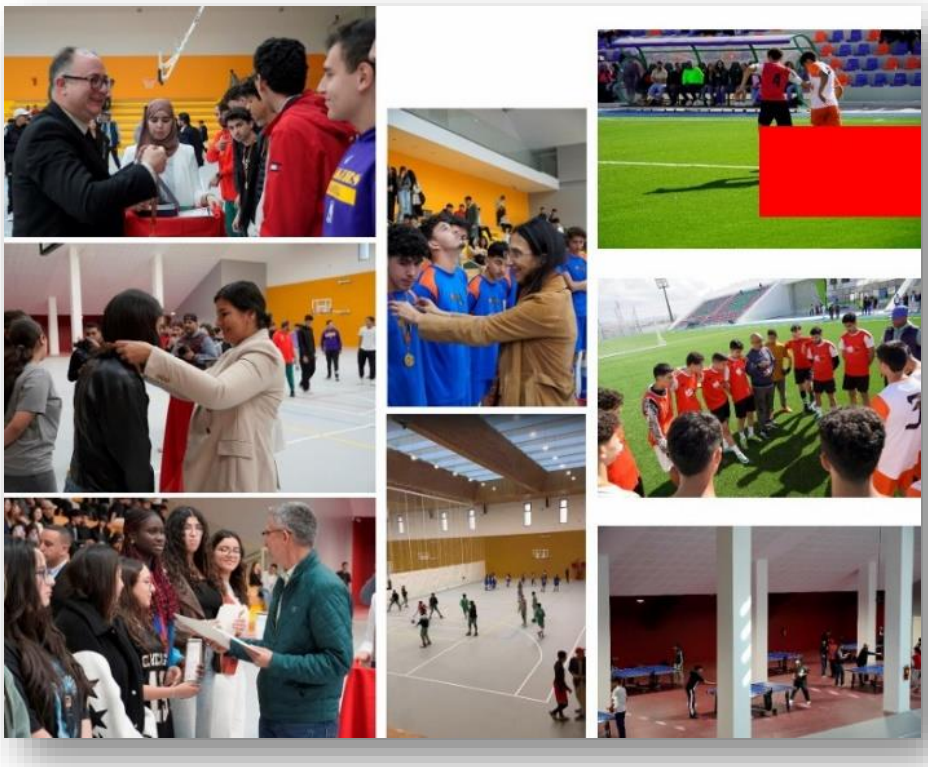

The Rotaract Club, in partnership with the National Center for the Disabled in Fez, organized an art workshop for autistic children.

Thanks to canvases, brushes, paints and other coloring materials, the children were able to give free rein to their imagination in a caring and stimulating environment.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

UEMF Inter-High School Tournament – 1st edition

The first edition of the UEMF Inter-High School Tournament brought together eight private high schools from Fez and Sefrou, involving only their final year students accompanied by their physical education teachers.

The disciplines offered were 7-a-side football, basketball (boys and girls) and table tennis (boys and girls).

In total, approximately 187 students, nine supervisors, 12 administrative staff members, and around fifty supporters and parents participated in the preliminary rounds. The final, held on April 4, 2025, brought together more than 300 people, including school principals, their communications officers, as well as teams and spectators.

This tournament highlighted the university's growing appeal and the positive impact of the opening of the sports complex on UEMF attendance and visibility. A second edition is already planned with an expansion of the participating high schools.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

University Throne Cup Final

The UEMF men's basketball team distinguished itself by finishing runner-up in the final of the University Throne Cup, held on Tuesday, June 17, 2025 in Safi.

After a remarkable journey, our students successively faced:

Ibn Tofail University (Kenitra) – 1st round

Private University of Marrakech – 2nd round

International University of Rabat (UIR) – semi-final

Al Akhawayn University – final, with a close score of 18 to 17

This performance demonstrates the sporting dynamism of the UEMF, the commitment of the students, as well as the educational value of university sport.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Sports activity: ENAM Olympics

The Olympics, organized by the National School of Agriculture of Meknes, took place from April 18th to 20th and brought together male participants in the disciplines of football and basketball. Among the institutions present were ENAM Meknes, ENCG Fez, ENCG Oujda, the Institute of Sports, the Faculty of Medicine Fez, Euromed Fez, and the Institute of Health Professions Fez. A total of three basketball matches and three football matches were played. The results allowed Euromed Fez to secure first place in basketball and second place in basketball, under the supervision of Mohammed Yakhlef and Jouad Kamal.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Sports activity: Inter-University Throne Cup

On February 27, 2025, the Euromed University of Fes men's basketball team participated in the second round of the Inter-University Cities Throne Cup, organized by the Royal Moroccan University Sports Federation in Casablanca. Facing the Private University City of Marrakech, the team of four players left Fez at 7:40 a.m., played the match at 1:30 p.m., and returned at 9:00 p.m., winning the match with a score of 15 to 12. A technical reservation was filed regarding the participation of an opposing player who did not reside at the university city of Marrakech. The team was coached by Mohamed Yakhlef and Jaouad Kamal.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Sports activity: Friendly volleyball match

On February 20, 2025, the Euromed University of Fez organized a friendly men's indoor volleyball match in the sports hall of the campus's sports complex. This event, bringing together 10 participants and supervised by Jaouad Kamal and Mohammed Yakhlef, took place from 6:00 p.m. to 9:00 p.m. and included 5 sets.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

UEMF participation in the University Basketball Championship

On February 12, 2024, the men's and women's basketball teams of the Euromed University of Fez (UEMF) participated in the university championship organized by the Royal Moroccan University Sports Federation (FRMSU). This match took place at the sports hall of the International University of Rabat. UEMF faced Mohammed V University of Rabat, with a total of 18 participants, supervised by Mohammed Yakhlef and Jaouad Kamal. Two matches were played during the day, marked by a departure at 8:30 a.m. and a return at 8:00 p.m. Despite strong involvement, the results ended in two defeats. This participation is part of UEMF's commitment to take an active part in national sporting events.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Sports Selection Competitions – UEMF

From April 28 to May 2, 2025, the Euromed University of Fez (UEMF) organized a series of sports selection competitions in several disciplines, aimed at identifying the best student talents for official sports representation. Each activity took place at 6:30 p.m. These events mobilized a large number of participants: 131 in football, 120 in swimming, 65 in basketball, 55 in badminton, and 46 in volleyball. Other disciplines were also represented, including chess (20), table tennis (28), taekwondo (19), handball (15), boxing (10), tennis (3), kickboxing (3), and bodybuilding (2). These selections demonstrate the growing sporting commitment of UEMF students, strengthening both the competitive spirit, cohesion, and preparation for the upcoming university championships.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Sporting Event Results and Awards – UEM

On May 8, 2025, the Euromed University of Fez (UEMF), through its Sports Center, announced the results of the selections for sports disciplines. Football dominates with 36 students selected, followed closely by basketball with 30, then volleyball with 16 and badminton with 14. Handball has 12 selected, while table tennis has 10. Regarding combat sports, taekwondo has seen 3 selections and boxing 2. For some disciplines such as bodybuilding, tennis and kickboxing, the results are not yet available. The selection for swimming is still to be announced. These figures reflect the diversity of sporting talent within the UEMF and the desire to promote physical commitment and academic fair play.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Regional Forum on Health Tourism: Promoting the Thermal Resources of Fez-Meknes

From April 10 to 12, 2025, the Euro-Mediterranean University of Fez (UEMF) organized the first edition of the Regional Forum on Health Tourism, focusing on the theme "Thermal Waters of the Fez-Meknes Region: Health and Tourism." This event brought together experts, researchers, as well as public and private stakeholders to discuss the sustainable development of the region through wellness and thermal tourism.

First class graduates from the UEMF BiomedTech Engineering School

The first class of the BiomedTech Engineering School of the Euromed University of Fez has completed its training.

These engineers, trained at the intersection of biomedical technologies, research and innovation, embody a new generation of talent dedicated to the healthcare sector.

They leave the university with the ambition to actively contribute to the imagination, design and implementation of tomorrow's technological health solutions.

Doctoral Thesis Defense in "Organic and Medicinal Chemistry" by Ms. Nassima SAGHDANI

This thesis project focuses on the design and synthesis of novel anticancer molecules derived from ethacrynic acid and indazole, combined with sulfonamides. Through advanced structural modifications, including coupling of heterocyclic groups via the Sonogashira reaction, several compounds have shown promising antiproliferative activity in vitro. A new class of ligands has also been developed to form metal complexes, including one with ruthenium, paving the way for future developments in cancer chemotherapy.

Dental research: a look back at the IADR 2025 congress in Barcelona

Professor Khalil El Mabrouk represented the Euromed University of Fez (UEMF) at the 103rd IADR General Session and Exhibition, held in Barcelona from June 25 to 28, 2025. This event, bringing together more than 4,000 international participants, is one of the most important in the field of dental research.

On this occasion, Prof. El Mabrouk chaired a scientific session on polymer materials applied to tissue regeneration and presented an oral communication entitled "Bioresorbable Hybrid Membranes for Bone Regeneration", highlighting advances in biomaterials for bone regeneration.

A member of the IADR, Professor El Mabrouk is one of the few Moroccan representatives of this international scientific organization, thus strengthening the UEMF's visibility in global research networks. His participation reflects the university's commitment to cutting-edge research and innovation.

A day of integration between energy, cohesion and orientation

Integration Week - Day 3: Placed under the sign of energy and inspiration

In the morning, our students vibrated to the rhythm of a sporty morning, between challenges, cohesion and good humor. In the afternoon, heading towards the future with a Masterclass of orientation: mapping out your academic and professional path at the UEMF, led by the team of theEuromed innovation center (EIC).

Between surpassing oneself, encounters and projection towards the future, this third day perfectly illustrates the spirit of the integration week: learning, sharing and growing together.

https://lnkd.in/p/euX8TxZD

Sport, solidarity and team spirit

Integration Week - Day 4: A day 100% sport, energy, and learning. Our students competed in several disciplines: football, volleyball, basketball, swimming, and ping-pong. A high-energy atmosphere where team spirit and self-improvement were the order of the day. In the afternoon, it was time for the first aid workshop: learning life-saving actions and acquiring the right reflexes to protect and help others. This valuable knowledge illustrates the importance of solidarity and responsibility.

At the end of the day, the highly anticipated gala match pitted alumni and incoming students in a spectacular duel. With adrenaline rushes, fair play, and passionate cheers from the fans, the match thrilled the entire campus.

A fourth day marked by effort, mutual aid and conviviality

Conference at UEMF: raising awareness among doctoral students about depression and academic burnout

A conference was organized at the Euromed University of Fez around the theme of "PhD Depression and Academic Burnout", a complex and essential subject for the academic community.

Intended for doctoral students, this meeting aimed to raise awareness of a major issue that is often neglected, while opening up dialogue and proposing avenues for reflection and concrete action.

The event was marked by careful organization and a warm welcome, contributing to the success of this academic initiative.

SDG4 Report: Quality Education

Introduction

The objective of the UEMF is to ensure quality education in an equitable manner and promote lifelong learning by:

- Including sustainable development (human rights, gender equality, citizenship, etc.) in teaching and research activities;
- developing an innovative, hybrid and inclusive pedagogy;
- encouraging creativity and entrepreneurship;
- developing civic and community engagement;
- ensuring equal access to knowledge;
- supporting students with learning difficulties or specific needs;
- making UEMF a responsible establishment.

Educational innovation at UEMF based on:

- the diversity of teaching methods: inverted classroom, problem solving, skills-based approach, etc.;
- curiosity, ideation, awareness, creativity and risk-taking: knowing how to search, select, sort, evaluate and organize information efficiently and quickly (analytical and critical thinking) in collaborative mode;
- hybridization and the use of digital tools;
- periodic evaluation of the system, teachers, teaching and students;
- the autonomy of students in order to become actors in their own training and development of their personality.
- Teacher-researchers also participate in the implementation of MOOCs, some of which are available on YouTube, such as those on educational innovation or the skills approach:

Training offers: Establishments and sectors

The Euromed University of Fez offers rich and diverse training, structured into 3 areas:

https://www.facebook.com/UniversiteEuromed/videos/224614363737724/

Engineering and Architecture

The UEMF Engineering and Architecture division brings together three major engineering schools and one major architecture school. The engineering schools (EPS and EIDIA) prepare engineering students to work in a variety of engineering fields: electricity, mechanics, energy, civil engineering, IT, artificial intelligence, robotics, telecommunications, processes, operations, and logistics. Engineering training benefits from high-quality human resources and cutting-edge technological platforms (practical work, projects, research).

The center is experiencing a strong research dynamic, with several projects carried out in partnership with the industrial world and producing a significant number of research works in indexed and prestigious international journals.

Human and social sciences

The UEMF places particular importance on the teaching of human and social sciences. To understand the modern world, which is increasingly complex and in a state of perpetual globalization and change, it is necessary to have a rational and critical mind and a capacity for multidimensional analysis that is nourished and forged in particular by philosophy and the human and social sciences. Major projects of regional development and modernization of the city, the introduction of new technologies or the change of production processes and procedures often involve human and social dimensions, the consideration of which conditions the success of the objectives sought.

Health Sciences:Biomedical and Biotechnological Engineering, Faculty of Pharmacy, Faculty of Medicine, Faculty of Dentistry and Faculty of Nursing and Health Technology

Recently established, the Center prepares students for engineering, master's, and doctoral degrees in biomedicine and biotechnology. The fields of action of these specialists include agri-food, drug production, protein engineering, and pathobiology, working on several aspects (cellular, molecular, genetic, immunological, physiological, and pharmacological).

The training and research of this center also concerns the manufacturing of implants and medical devices, particularly by 3D printing, and their operation.

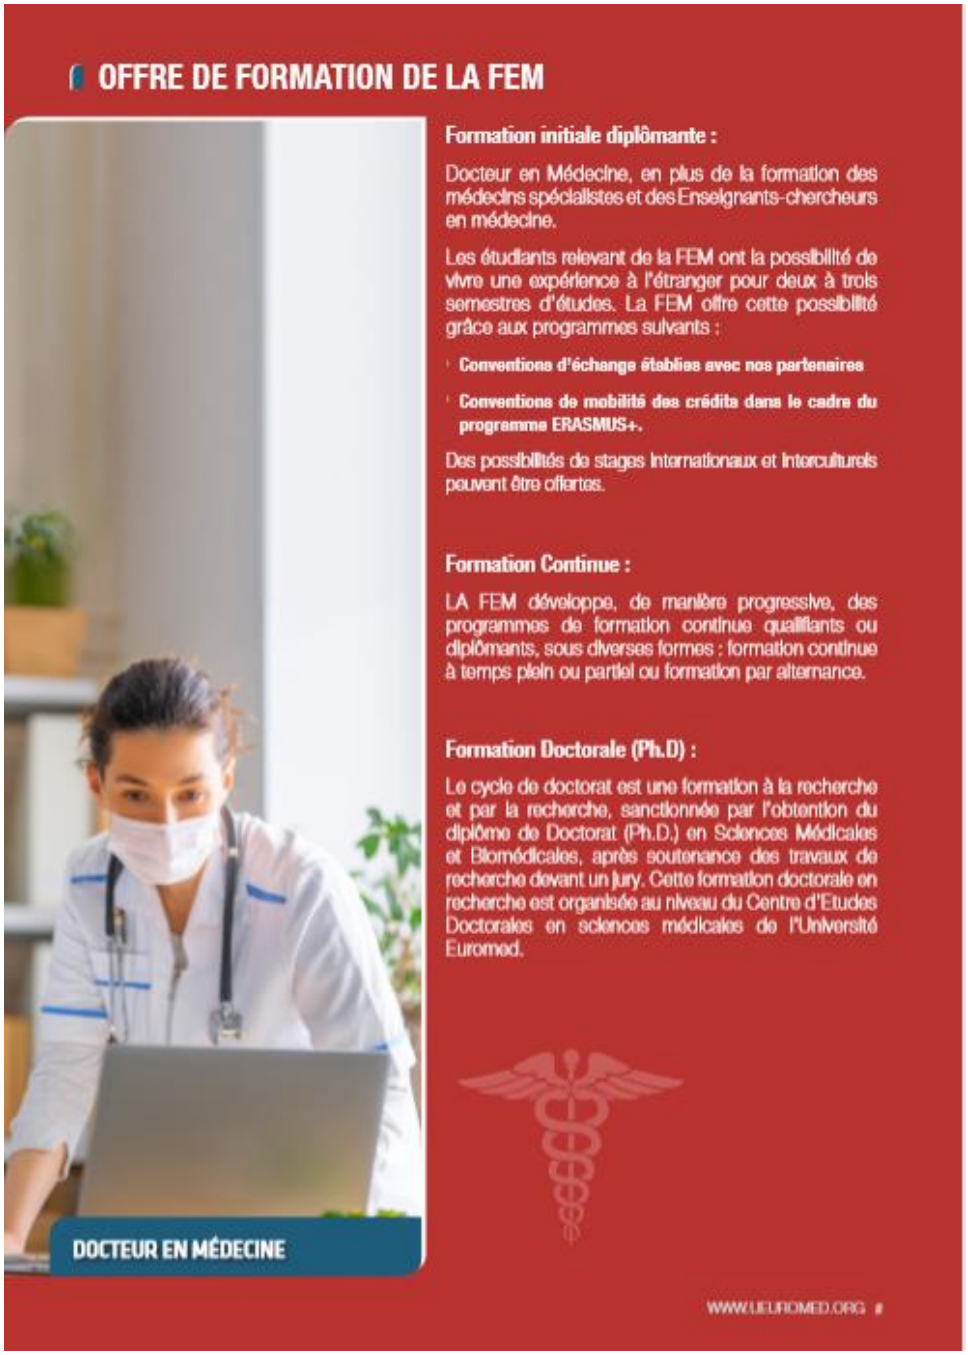

The Pôle also prepares students for the doctorate in pharmacy, through its Faculty of Pharmacy.

https://ueuromed.org/offre-formation/pole-biomedical-et-biotechnologie

The Euromed Faculty of Medicine will contribute to the development of the UEMF's Health Center and will meet the needs of physicians in the Fez-Meknes region, Morocco, and the broader MENA region, including sub-Saharan Africa. The FEM aims to be a center of innovation and excellence in medical education and research.

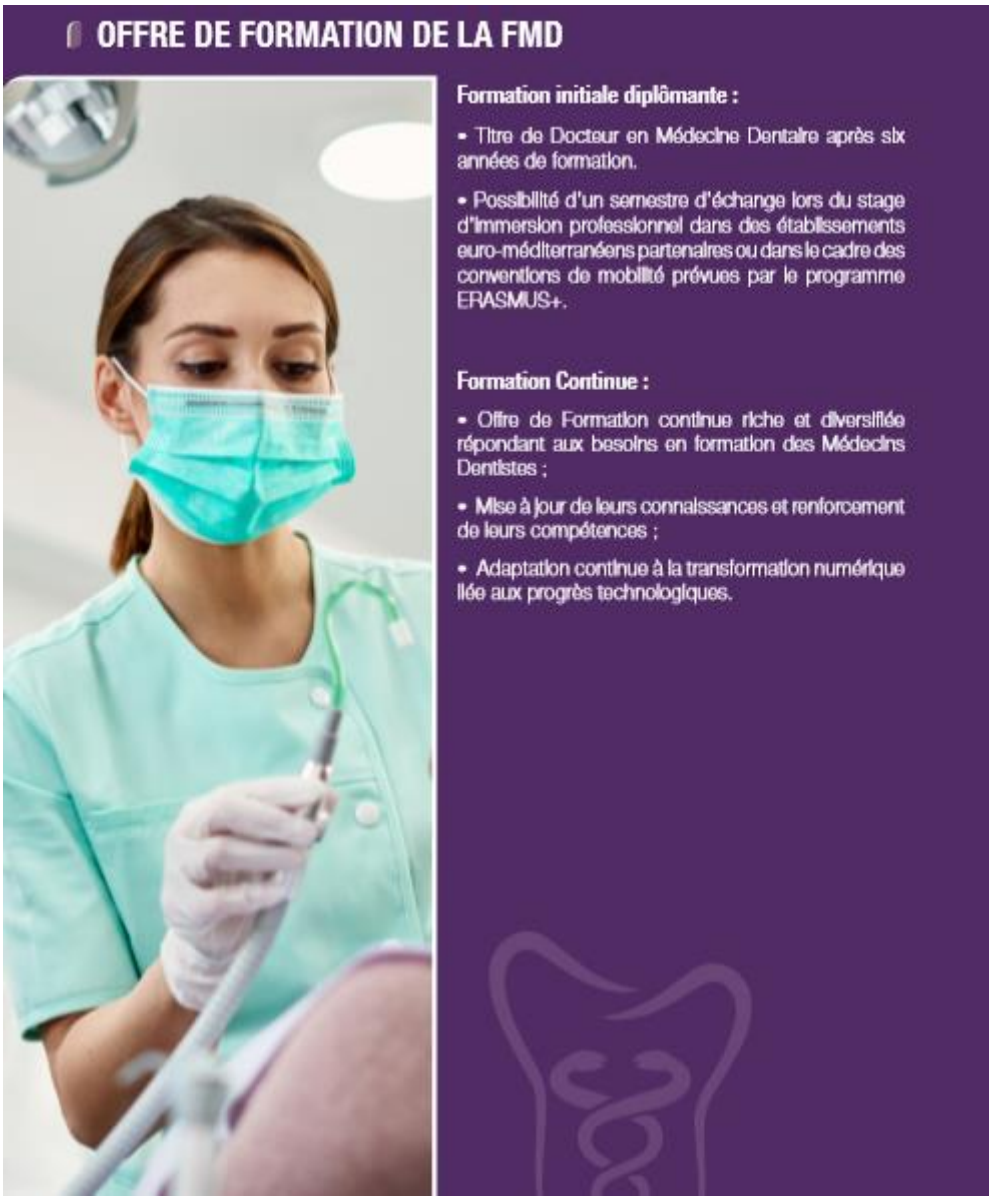

The FEM will develop innovative programs to better prepare future doctors to succeed in their mission in society. The Health Center will subsequently be enriched by the creation of the University Hospital Center (CHU), a hospital linked to the UEMF that will provide theoretical and practical training for future doctors and will be equipped with modern technological infrastructure to respond to the diagnoses of the main medical specialties.

https://ueuromed.org/etablissement/faculte-euromed-de-medecine

The Euromed Faculty of Dental Medicine is an institution dedicated to oral health and the well-being of populations. It is a training program with multiple career

opportunities. Our graduates have the opportunity to enter the public or private sectors, or after six years of study, another alternative is to pursue a career in dental specialties or a university hospital program.

https://ueuromed.org/faculte-euromed-de-medecine-dentaire/filieres/docteur-en-medecine-dentaire

As part of the diversification of its training offer and in order to contribute to the development and qualification of human resources in the field of Health, the Faculty of Nursing Sciences and Health Technology (FSITS) will welcome its first class which will include seven training courses. This training program is part of the Bachelor-Master-Doctorate (LMD) system, providing access to a range of specialties, including:

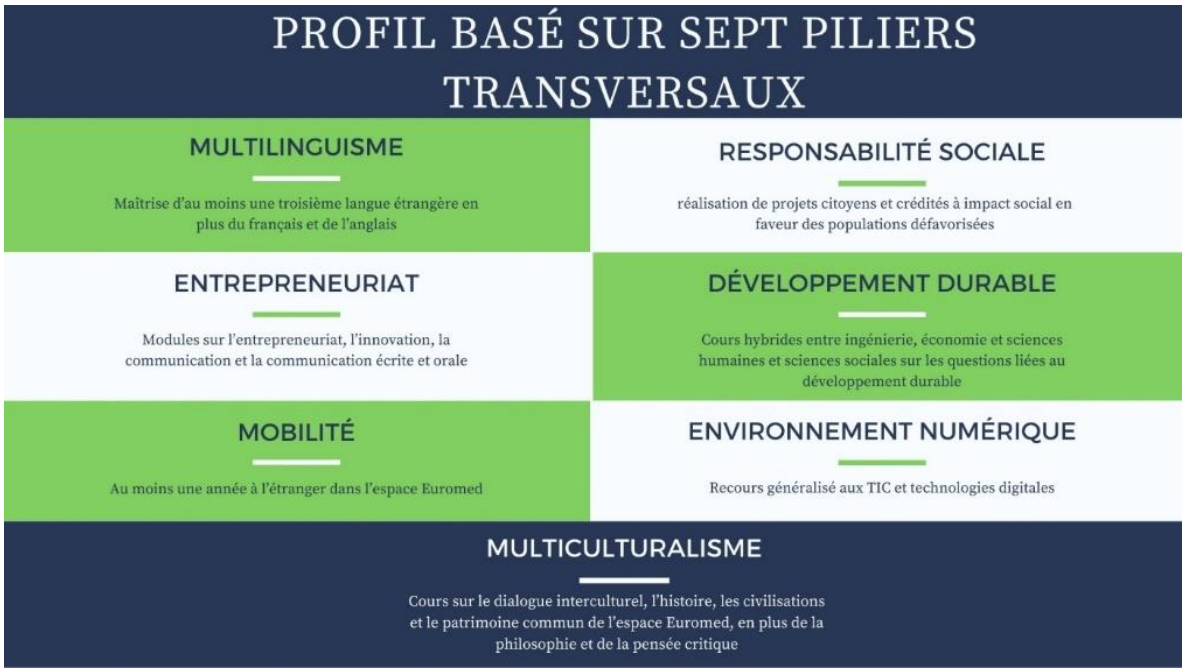

- Versatile Nurse;
- Anesthesia and intensive care nurse;
- Speech therapist;
- Psychomotor therapist;
- Dietetics-nutrition;
- Laboratory techniques;
- Radiology techniques.

The FSITS also aims to set up a training course whose educational project is to train professionals specialized in multiple disciplinary fields related to health by issuing diplomas recognized by the State allowing professional integration in the public, private and liberal sectors.

UEMF profile

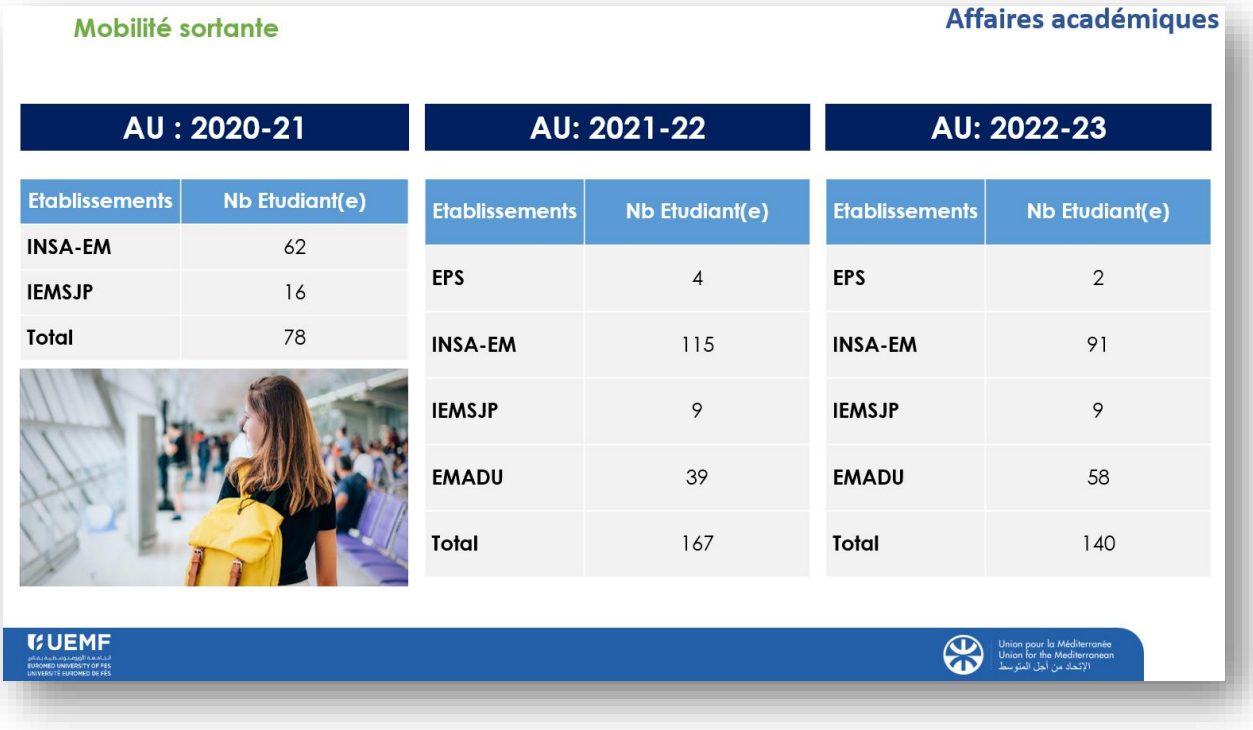

QWhatever field its students choose, the Universityaims to provide them with excellent training, combining knowledge, know-how and interpersonal skills; the objective being to prepare them as best as possible for the professions to which they aspire. But beyond the diploma, the University also aims to train responsible citizens open to languages, cultures and their communities, concerned about the quality of life of citizens and the future of the planet, according to a global and integrated approach, involving the entire university community without exception and aiming to give them a particular profile, based on 7 pillars: "the EUROMED PROFILE".

Mobility

Thanks to the multiplicity of its academic partnerships (Universities, Grandes Ecoles, etc.) and its dynamic contribution to international projects (ERASMUS+, etc.), the UEMF encourages incoming and outgoing mobility of students and teacher-researchers.

International mobility has a definite impact on the professional integration of the winner and on their future career and allows them to acquire in particular:

- A double degree;
- Professional experience;
- A cultural opening;
- Learning at least one foreign language.

ASRIC Project

In 2019, these two prestigious institutions entered into a strategic partnership to build the capacity of young Africans and to strengthen research and innovation for Africa's development. Given the comparative advantage and shared mandate of ASRIC and UEMF to "build Africa's technical skills," the two institutions decided to engage in a long-term scientific collaboration, and from then on, UEMF offered a scholarship to African doctoral students to undertake studies and research at UEMF.

The 1st and 2nd Calls for PhD Scholarships for African Students were successfully held for the academic years 2019-2020 and 2020-2021, where eligible candidates went through a rigorous selection process and were awarded the scholarship. Following the success of the 1st and 2nd Calls, ASRIC and UEMF are hereby launching the 3rd Call for the year 2022.

ASRIC and UEMF are offering 10 scholarship slots for the 2022-2023 academic year to African doctoral students to carry out their doctoral research at the Euro-Mediterranean University of Fez (UEMF), Morocco. The duration of the study and the scholarship is three years.

The scholarship includes; tuition fees of approximately $9,000 per year, a round-trip ticket from your home country with a maximum contribution of $1,000 during the summer holidays, and a stipend of $1,000 per month for 11 months each year.
African Science, Research and Innovation Council (ASRIC)

Partnerships for quality education:

https://ueuromed.org/womenchair

Signing of an agreement between the UEMF and the Islamic World Educational, Scientific and Cultural Organization (ICESCO) for the establishment of a "Women in Science" chair in the field of Artificial Intelligence. With the objective of strengthening the learning and continuing education of women in digital and attracting doctoral students to carry out research projects in this field, the chair is intended to be a starting point for the launch of high value-added projects on the African-Euro-Mediterranean scale.

Lifelong learning

The University has defined its vision of continuing education and training and has been rolling it out for 3 years in different forms: short qualifying courses aimed at developing and strengthening skills, qualifying, certifying and diploma courses intended for young and old people to meet their expectations in terms of qualifications or career development, tailor-made training within the framework of medium and long-term partnerships with administrations, communities and industry.

Through its values, the UEMF:

- is open to the world and promotes the values of inclusion, moderation, tolerance, interculturality and sharing;
- is open to all citizens and students and to all staff, national and international, without discrimination based on origin, family situation, gender, disability or belief;
- is based on equality of opportunity and opportunity;
- advocates gender equality and implements a proactive policy to include a maximum number of women as well as people with reduced faculties;
- recognizes and rewards excellence following a bottom-up evaluation;
- promotes critical thinking, rationality, citizenship values based on civic-mindedness, civility, commitment, a sense of duty and common interest, as well as respect for others and the environment;

- encourages the qualities of initiative, entrepreneurship, innovation-creation and mastery of languages and cultures;
- has a social responsibility and offers tuition, accommodation and catering scholarships to the best students from low-income families and from Sub-Saharan Africa.

The University organizes training sessions for citizens seeking employment or for adults who wish to retrain for new careers. The continuing education offering is extensive and meets the needs of the local and regional environment.

To this end, the UEMF makes its premises, its library, its course modules, and its laboratories, as well as its socio-cultural and sporting resources, available to this section of the population, in a spirit of solidarity.

UEMF thus provides access to educational resources for those who are not studying at university - for example, computers, library, online courses and access to conferences.

Library

The library is a service intended for students regularly enrolled at the University, teachers, researchers, and UEMF staff. It has multiple documentary resources covering different specialties:

- Science and technology
- Architecture
- Arts and Culture
- Social Sciences
- Economy
- Management Sciences

The maximum number of documents allowed for borrowing is 3 per week. Borrowed documents must be returned on time, without damage. Users must respect others and promote a calm, quiet and work-oriented environment in the library. Readers are required to comply with the Library's internal regulations and the instructions given by staff. Any failure to comply with these rules will be punished. Students who are too noisy will be excluded from the library. In the event of late return of a borrowed

book, a fine of 20 DHS per day of delay will be requested, under penalty of being deprived of any further borrowing.

https://ueuromed.org/services/bibliotheque

Educational continuity post-Covid

When the state of health emergency was declared, UEMF adapted to this situation by deploying its entire infrastructure (recording studios, 3D platform, virtual reality systems, digital group connection platforms) and its teams to ensure the continuity of remote learning. It is also with the support of the European Union and the European Investment Bank, partners of UEMF, that computers with 4G keys were given to scholarship students and young people from disadvantaged backgrounds so that they could follow their courses remotely without difficulty.

- The European Union has provided 5.4 million dirhams to finance the acquisition of computer and laboratory equipment, with a view to enabling the university to ensure educational continuity for its scholarship students and to manufacture medical protection equipment, during these times of Covid-19.(https://ueuromed.org/partenariat-bei-ue-uemf)

- The UEMF also donated 1,000 tablets to young people from modest backgrounds in the Berkane region so that they could continue their courses remotely. This donation was made in collaboration with the foundation of Mr. Hicham El Guerrouj, four-time World Champion, Double Gold Medalist at the 2004 Athens Olympic Games and holder of several world records in the 1000m, 1500m and 2000m.https://www.ueuromed.org/actualites/actions-citoyennes/1000-tablettes-pour-les-eleves-de-la-region-de-berkane)

Quality of training

The quality of training is measured by:

- national accreditation of sectors;
- recognition of diplomas by the State;
- double degree with renowned universities;
- internal audit and evaluation including student feedback;
- innovative teaching methods;
- partnership with a large network of companies;
- the quality of the infrastructure (classrooms, teaching aids, laboratories, etc.);
- access to scientific information (library, digital media, remote access, etc.).

Objet : Demande de renouvellement de reconnaissance par l'Etat de l'Université Euro-méditerranéenne de Fès (UEMF).

Monsieur le Président,

Suite à l'évaluation par l'Agence Nationale d'Evaluation et d'Assurance Qualité de l'Enseignement Supérieur et de la Recherche Scientifique (ANEAQ) de la demande de renouvellement de reconnaissance par l'Etat de l'Université Euro-méditerranéenne de Fès, et après avis de la Commission Nationale de Coordination de l'Enseignement Supérieur (CNCES) réunie le 25 juillet 2022, j'ai l'honneur de vous informer que cette demande a reçu un avis favorable avec recommandations. Vous trouvez ci-joint le rapport d'évaluation de l'ANEAQ.

Votre Université est vivement appelée à tenir compte de ces recommandations dans l'objectif d'une amélioration continue des services rendus par votre institution.

Veuillez agréer, Monsieur le Président, l'expression de mes salutations les meilleures.

Education Outreach Activities Beyond Campus

The Euromed University of Fez, which aims to be a university for all and with strong social responsibility, organizes and participates through its communications department in partnership with NGOs and foundations in:

- caravans (https://www.ueuromed.org/actualites/visites/participation-de-luniversite-euromed-de-fes-la-caravane-tamkine-de-la-region) who travel to distant and remote regions

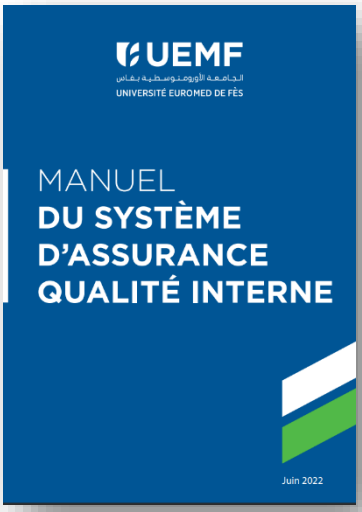

- national and international trade fairs
- meetings with managers and advisors from the Regional Centers for Education and Training Professions (CRMEF);
- visits to primary, middle and high schoolsto present the UEMF training program and the excellence, merit, and solidarity scholarship program. These sessions take place in the presence of directors, teachers, teaching staff, and students.
- visits to university premises and meetings with students and teachers (https://www.ueuromed.org/actualites/visites/visite-dune-trentaine-de-bacherliers-du-groupe-scolaire-claire-fontaine)
- practical scientific workshops for high school students, during the days entitled "Young People and Science in the Service of Development" in partnership with the Hassan II Academy of Sciences and Technology.

https://www.ueuromed.org/actualites/visites/journees-les-jeunes-et-la-science-au-service-du-developpement

During these days, students are given the opportunity to discover cutting-edge research equipment and to witness scientific experiments in the laboratories.

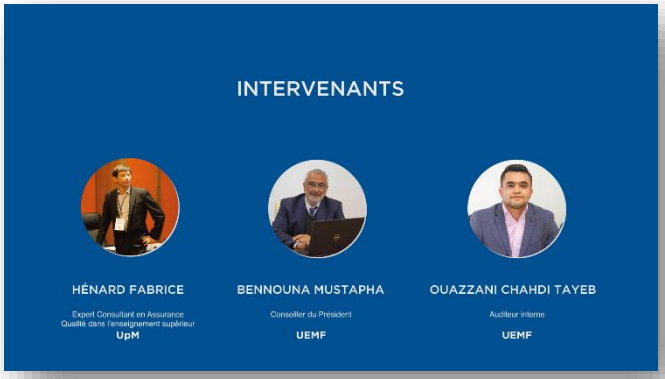

- meetings and workshops between students from the Euromed School of Architecture, Design and Urban Planning (EMADU) and those from the Department of Architecture (Dipartimento di Architettura "DIDA") of the University of Florence (Università degli Studi di Firenze), together with students from the Training and Qualification Center in Craft Trades (Cfqma Fez) at the Maison des Savoirs des Métiers de l'Artisanat at the Riad Lalla Yeddouna, according to the "Open-air Workshop" formula. Participants present their projects relating to the development of public spaces in the medina of Fez, with the aim of giving new life to ancestral know-how, while keeping a contemporary look.

Quality Management System

UEMF has developed a quality management system (QMS) for the management of the University's various missions.

In particular, all procedures (and workflows) relating to student life activities are developed from application to graduation and integration. This document is updated periodically following developments in the university environment.

The Euromed University of Fez has launched a training cycle dedicated to quality assurance, which aims to demonstrate the value of quality assurance in managing and guaranteeing the quality of training and research, as well as all activities supported by universities. This training alternates between presentations and illustrations drawn from concrete experiences in Morocco, the region, Europe, and OECD countries. At the end of each session, question-and-answer sessions are scheduled to stimulate debate and interactivity among participants.

https://ueuromed.org/actualites/formations/programme-de-formation-lassurance-qualite

https://ueuromed.org/actualites/congres-et-colloques/congres-regional-du-reseau-arabe-dassurance-qualite-dans

Information System

https://ueuromed.org/centre-des-technologies-dinformation-et-de-communication-ctic

The university uses an ERP (Enterprise Resource Planning)or an ERP (Integrated Management Software) which allows for the daily management and monitoring of all information and operational services: student life, planning, research, human resources, finance, heritage, library, accommodation, catering, lifelong training, The

University has succeeded in setting up an available solution and adapted it to its context.

This tool allows the creation of dashboards equipped with performance indicators to help managers make decisions: success rate, rate of educational supervision, cost of studies according to the specialty, rate of scholarship holders, rate of validated modules, rate of participation in activities, rate of research production, etc.

Quality labels and participation in international rankings

U-Multirank 2021

The 2021 U-Multirank ranking of global universities has been unveiled. Three Moroccan universities are ranked in the top 10 African universities, including:

The Euromed University of Fez (UEMF) comes second in this international ranking.

Furthermore, the Euromed University of Fez (UEMF) is ranked among the top 25 in the world regarding the mobility of its students.

The U-Multirank is a global ranking based on a multidimensional analysis of higher education institutions worldwide. The aim is to recognize the best performances in teaching and learning, research, knowledge transfer, international outreach, and regional engagement.

UEMF stands out as the first Moroccan university in the "U-Multirank 2022" world university ranking

Euromed University of Fez (UEMF) stands out as the top Moroccan university in the "U-Multirank 2022" world university ranking. Ibn Tofail University ranks second, and Mohamed V University ranks third.

U-Multirank is a global ranking based on a multidimensional analysis of higher education institutions worldwide. It recognizes quality and best performance in teaching and learning, research, knowledge transfer, international outreach, and regional engagement.

https://ueuromed.org/actualites/annonces-diverses/luemf-se-distingue-comme-premiere-universite-marocaine-dans-le

Responsible Innovation Label

The Responsible Innovation Label was awarded to UEMF during its first 2020/2021 edition for its project entitled "**Sustainable UEMF Program**". This label is valid from 25 10 2021 to 26 10 2024.

The Responsible Innovation Label is intended for higher education and research institutions. Its objective is twofold: to map and promote responsible innovations from French-speaking universities around the world, but also to deploy the responsible innovation network to foster synergies between universities, civil society, and the socioeconomic sector working for the development of a responsible society.

https://ueuromed.org/file/label_innovation_responsable.pdf

Responsible Campus of the Year

Euromed University of Fez was named winner of the "RESPONSIBLE CAMPUS of the YEAR" Award, during the ceremony organized in Paris, on Tuesday, October 4, 2022, under the effective presidency of the Minister of Higher Education and Research of the French Government.

The "Responsible Establishment of the Year" category recognizes UEMF's commitment to the SDGs and its lasting impact in becoming a responsible organization with regard to the challenges of the transition in four main areas:

- Leadership and governance;
- Real estate and operations;
- Learning, teaching and research;
- Partnership and commitment.

UEMF finalist for The Green Gown Award (2022)

The Green Gown Award is an award that recognizes outstanding sustainability initiatives undertaken by universities and colleges worldwide. It is organized in partnership with the United Nations Environment Programme (UNEP) and supported by the AUF, the Association of Commonwealth Universities (ACU), and the International Association of Universities (IAU).

This year, 56 finalists were selected, representing 19 countries around the world. Among them are five member institutions of the Agence Universitaire de la Francophonie:

- In Canada: HEC Montréal;
- In France: Institut Mines-Télécom Nord Europe;
- In Morocco: Euromed University of Fez (UEMF);
- In Mexico: National Autonomous University of Mexico and University of Veracruzana.

https://ueuromed.org/actualites/annonces-diverses/luemf-finaliste-au-prix-green-gown-award-pour-ses-initiatives

THE International Ranking of the best universities in the world: UEMF presents itself with eight other Moroccan universities

The THE ranking is based on a multidimensional analysis of higher education institutions through their achievement of the United Nations Sustainable Development Goals, as measured by Thomson Reuters and Elsevier. It is noteworthy that recently established universities, such as the Euromed University of Fez and the International University of Rabat, rank higher than other major national universities.

It is a global ranking, by subject and reputation, and it also provides regional and national rankings. Along with the Shanghai and QS rankings, the THE ranking is one of the most influential university rankings worldwide.

The 2022 ranking covered universities from 106 countries. Eight Moroccan universities are ranked among the top 1,000 universities in this global ranking this year. Nationally, the UEMF ranking is as follows:

4th: Euromed University of Fez

https://ueuromed.org/actualites/annonces-diverses/classement-international-des-meilleures-universites-au-monde-luemf

The UEMF will be a candidate for THE IR ranking in future editions.

UEMF nominated in the 1st edition of the ZAIRI international prize for excellence in higher education

The winners in each of the 4 categories of the inaugural Zairi International Awards for Excellence in Higher Education 2022 are among the applications received from 31 countries that have demonstrated significant contributions to their communities and provided clear tangible benefits that are sustainable over the long term. The awards are an annual international recognition honoring higher education institutions that create impact in their own context by embracing excellence and innovation in specific areas relevant to digital transformation, research impact, community service, etc. UEMF was the winner of the inaugural ZAIRI International Awards for Excellence in Higher Education 2022 in the "Digital Transformation" category.

The shortlisted institutions are among applications received from 31 countries. The ZAIRI Award is administered annually by the CLICKS association (cli-cks.com). "It aims to highlight the inspiring achievements of higher education institutions and to celebrate institutions that have developed and implemented creative responses to current challenges in the sector."

Selection criteria:

- Digital transformation strategy;
- Digital technologies and innovations exploited;
- Implementation and results achieved at:
- student learning;
- strategic management of the university;
- institutional culture;
- capacity building.

2022 Winners Announced – Clics (cli-cks.com)

UEMF receives the professional equality award March 21, 2023

The Euromed University of Fez (UEMF) received the Fes-Meknes regional prize during the 7th edition of the Professional Equality Trophy presidee by Mr. Younes Sekkouri, Minister of'Economic Inclusion, Small Business,'Employment and Compensationetences.

During this ceremony, the Fes-Meknes Region Professional Equality Trophy was presented by the Minister to Professor Mostapha Bousmina, President of the Euromed University of Fez. This award recognizes the UEMF's commitment and efforts in the area of gender equality and highlights the good practices adopted by the institution for the promotion of professional equality.

Euromed University of Fez, awarded second place in Africa by the “Triple E Awards” June 27, 2023

It was in the beautiful city of Barcelona that the Euromed University of Fez won this Monday, June 26, 2023, the second prize for African Initiative of the Year, for the Sustainable Development Goals (SDGs); a prize awarded as part of the "Triple E Awards" competition, by the Accreditation Council for Entrepreneurial and Engaged Universities (ACEEU), based in Germany.

In front of an audience of more than 110 world-renowned universities, present in the "La Salle Barcelona Campus", the venue for this important international event, the Euromed University of Fez, already announced among the 5 African finalists for this prize, was awarded this prize for its project "An Eco-campus in respect of various SDGs".

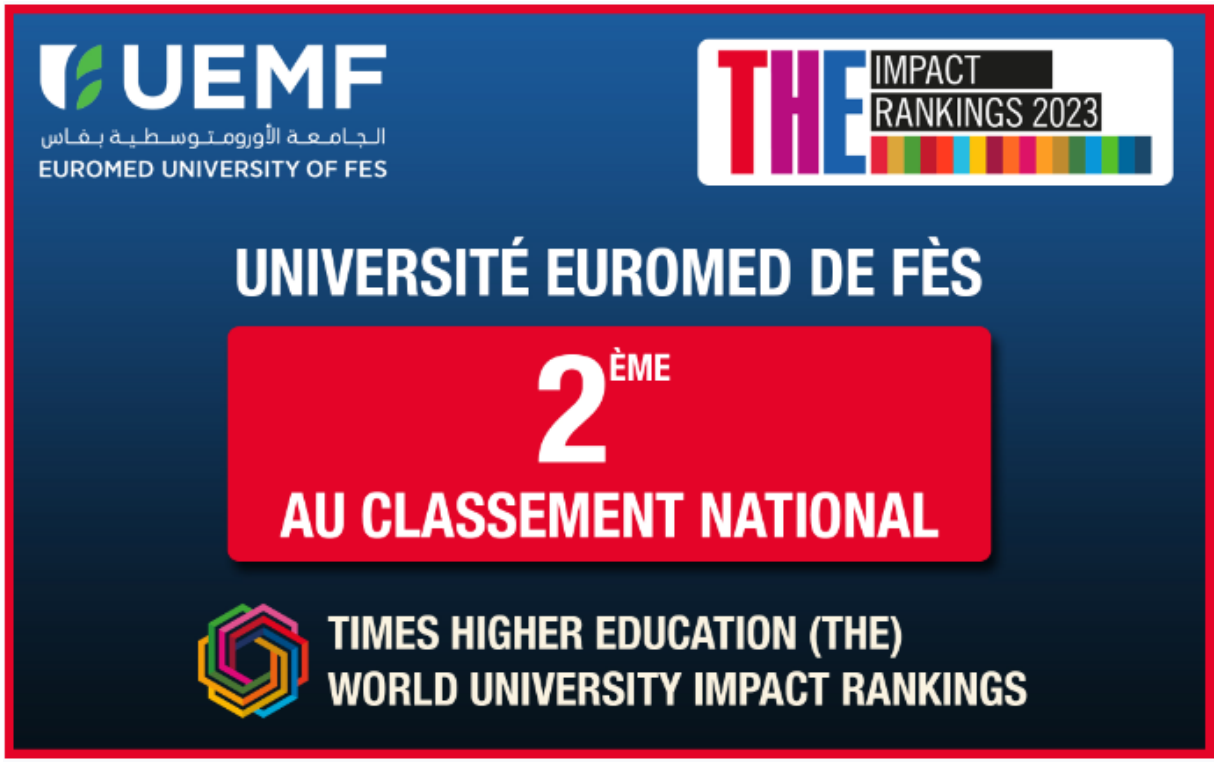

The Triple E Awards (Entrepreneurship and Engagement Excellence Awards in Higher Education) are a global recognition of universities' efforts to promote entrepreneurship and engagement in higher education. It is the first award to focus specifically on different dimensions of universities' third mission. Implemented regionally, the Triple E Awards aim to foster change in universities and highlight their role in their communities and ecosystems. ACEEU is currently the only globally operating quality assurance organization focused on recognizing engagement and entrepreneurship in higher education. It aims to pave the way for a new era for this sector by

evaluating, supporting and energizing the potential of its establishments, on their path towards excellence in the third mission.

In the same vein, it should be recalled that the Euromed University of Fez was also distinguished this year in the international ranking "Times Higher Education Impact Rankings, 2023" by rising to second place nationally and first in the Fez-Meknes region. For SDG 4 in particular; "Quality Education", it is in the TOP 200 worldwide, appears on the national podium for 10 of the 17 SDGs and in first position for 4 of them.

THE Impact Rankings 2023: Euromed University of Fez rises to 2nd place nationally in the ranking June 2, 2023

The 2023 Times Higher Education (THE) Impact Rankings ranking of global universities has just been released. At the national level, Euromed University of Fez ranks second.

This year's edition involved 1,591 universities from 112 countries. 11 Moroccan universities appear in the international rankings and their national rankings are as follows:

- International University of Rabat
- Euromed University of Fez
- Ibn Tofail University of Kenitra
- Mohammed V University of Rabat
- Sidi Mohammed Ben Abdellah University
- Hassan II University of Casablanca
- Abdelmalek Essaâdi University of Tetouan-Tangier

- Al Akhawayn University of Ifrane
- Chouaib Doukkali University of El Jadida
- Hassan I University of Settat
- Moulay Slimane University of Beni Mellal

In this ranking, the Euromed University of Fez is on the podium in 10 of the 17 SDGs, in particular SDG 4: "Quality Education", for which it is among the Top 200 worldwide. In addition, it is ranked 1st nationally in 4 SDGs. As a reminder, the University was ranked 1st nationally in the U-Multirank 2022 ranking.

On an African scale, Egypt has 37 universities in this ranking, followed by Morocco, Nigeria and Algeria (11), South Africa (8), Tunisia (7), Ghana (6), Sudan (2) while Kenya, Tanzania, Uganda, Zambia and Zimbabwe have 1 university each.

Events 2022

During the year 2022, the University participated in and organized several events with the aim of offering quality education either internally within UEMF or externally.

Organization of a Webinar under the theme: "The role of digital for inclusive education".

An essential lever for transforming education systems, inclusive education is an educational approach based on the valuing of diversity as an enriching element of the teaching and learning process. It aims to increase participation and reduce the exclusion of children in situations of marginalization or vulnerability by effectively responding to the needs of all learners and, consequently, promoting human development, guaranteeing quality education, ensuring the schooling of girls and promoting opportunities for lifelong learning.
Several factors of exclusion still hinder access to quality inclusive education from early childhood. Gender, ethnicity, disability, environment (urban or rural), mother tongue, and even humanitarian crises and conflicts deprive many children of opportunities that promote their full development (World Development Report, 2018). https://ueuromed.org/riemas/evenements/les-webinars-du-riemas/le-role-du-digital-pour-une-education-inclusive

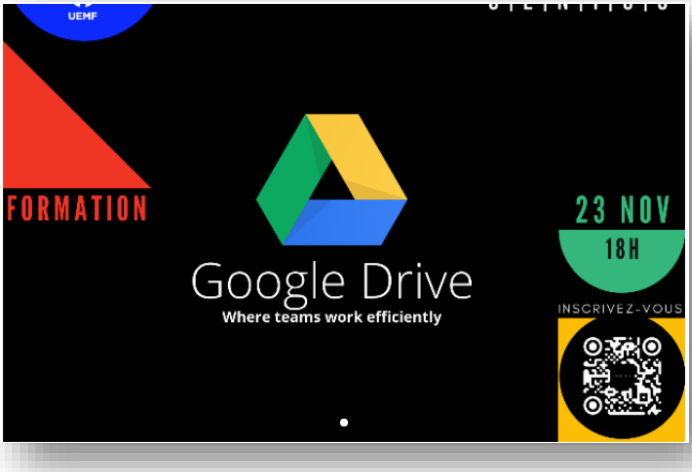

Meeting between students of the Dutch School of Architecture Delftse School and those of the Euromed School of Architecture (EMADU)

As part of strengthening its international cooperation and launching the milestones of future cooperation, including, among other things, student and research mobility, Professor Iman Meriem Benkirane, Director of the Euromed School of Architecture, Design and Urban Planning (EMADU), a component of the Euromed University of Fez (UEMF), received this Tuesday, July 13, a group of 24 students from the Dutch School of Architecture at Delftse School and their Professor. This meeting promoted the sharing of knowledge through presentations and points of view on operational architectural projects carried out by the two

countries.https://ueuromed.org/actualites/ateliers-workshops/rencontre-entre-les-etudiants-de-lecole-neerlandaise-darchitecture

EMADU students participate in the "Summer School" at the Polytechnic of Milan

EMADU took part in the 3rd edition of the "Summer School", organized by the Politecnico di Milano. Five EMADU students were selected by the Politecnico di Milano to participate in the international workshop "Landscape Of Limits", focused on landscape, urban and architectural transformations that took place at the Piacenza

Campus.https://ueuromed.org/actualites/annonces-diverses/les-etudiants-de-lemadu-participent-au-summer-school-de-lecole

As part of the UNESCO World Conference on Higher Education 2022, our Professor Maha Gmira participated as a panelist on the application of AI in higher education on May 20 in Barcelona.

Objectives of participation:

- Recognize how AI can impact higher education and the challenges this poses for HEIs.
- Understanding the role of HEIs in promoting and developing AI towards the achievement of the SDGs.
- Strengthen international cooperation and partnership to promote equitable, inclusive and transparent use of #AI in higher education.

Official graduation ceremony in honor of UEMF graduating students

The official graduation ceremony for graduating UEMF students took place on Monday, July 4, 2022, at the eco-campus of Euromed University in Fez. More than 700 graduates and 1,800 other people took part in this flagship event of the University, a moment filled with joy and pride that marks a new chapter in the lives of the graduates.

The ceremony began with a welcoming speech by the President of the University, Prof. Mostapha Bousmina, followed by a speech by Mr. Abdellatif Miraoui, Minister of Higher Education, Scientific Research and Innovation, and HE Patricia Pilar Llombart Cussac, Ambassador of the European Union to Morocco.

UEMF welcomes Olympic legend and four-time world champion Hicham El Gerrouj

Mr. Hicham EL GUERROUJ, the fastest man in the world over 1500m, best Moroccan athlete of all time, holder of several world records including 3 records that are still unequaled, four-time world champion, double Olympic champion at the Athens Olympic Games - 2004, is welcomed today by the Euromed University of Fez (UEMF) in the company of the athlete Brahim Lahlafi, native of Fez, specialist in long-distance running and close friend of Hicham El Gerrouj.

UEMF's special guest, Mr. Hicham El Guerrouj, gave a lecture about his inspiring career path for young people, which is strewn with obstacles, uncertainties, and challenges, and an example of endurance, self-sacrifice, and extraordinary willpower. In a packed amphitheater and in the presence of several students, professors, and officials, the Olympic champion expressed his joy and pride in sharing his experience with the students of the Euromed University of Fez.

The conference featured emotional moments following the broadcast of a report summarizing the athlete's legendary career. These moving images allowed the audience to relive the highlights of an exceptional career filled with challenges, but also multiple successes, joy, and attachment to the motherland.

Visit of EIB Vice-President Ricardo Mourinho Félix to UEMF for a climate conference

For his first official visit to Morocco, Ricardo Mourinho Félix, Vice-President of the European Investment Bank and responsible for financing in Morocco, met with Moroccan authorities and also visited the Euromed University of Fez (UEMF) on Monday, October 17, for a conference on the theme "The EIB and climate action, a global, regional and national perspective."

As the 27th edition of the Conference of the Parties (COP27) approaches, scheduled to take place in Sharm el-Sheikh, Egypt, from November 6 to 18, Ricardo Mourinho Félix spoke with UEMF students and lecturers on the challenges and opportunities of the climate transition, as well as the role of the EIB, as a Climate Bank, in promoting sustainable models in Morocco and around the world.

Lecture series

Professor Rachid Achachi raises the theme "Spinoza or liberation through knowledge" during his conference at the UEMF

Mr. Rachid ACHACHI, Columnist at Luxe Radio and geopolitical consultant, started his first conference at the Euromed University of Fez around the theme "SPINOZA or Liberation through Knowledge". This meeting was an opportunity for our students and staff members to attend an intellectual excursion rich in reflections. Mr. Rachid ACHACHI, will lead a series of conferences throughout the 2022/2023 academic year at UEMF.

This conference took place on Wednesday, September 21, 2022, at 2 p.m., in the amphitheater of building B1 of the University.

https://www.youtube.com/watch?v=FeFq4bdfXQY

Professor Rachid Achachi addresses the theme of Carl Schmitt's geopolitical thought: the land/sea opposition

The UEMF conference cycle continues with the 2nd intervention of Prof. Rachid Achachi on Wednesday, October 5, 2022, around the theme of Carl Schmitt's geopolitics, the land/sea opposition. This conference was intended for UEMF students and staff who benefited from these moments of rich intellectual exchange with Prof. Achachi, who will continue to deliver lectures on different themes covering several angles of analysis.

https://www.youtube.com/watch?v=Y4E7icpazuY

Prof. Rachid Achachi: AVERROES, a philosophical method to rediscover

The UEMF conference cycle continues with the 2nd presentation by Professor Rachid Achachi on Wednesday, October 19, 2022, on the theme of "AVERROES, a philosophical method to be rediscovered."

https://www.youtube.com/watch?v=1LiteMlcUEk

The major schools of thought in international relations: the theme of Professor Rachid Achachi's conference

The conference on Wednesday, November 2nd, focused on the major schools of thought in international relations, a very interesting theme that Professor Rachid Achachi delighted in presenting to our students and which sparked lively discussions in the room.

Prof. Rachid Achachi: The Geopolitical Challenges of the Mediterranean: A Holistic Analysis and Lessons Steeped in History December 14, 2022

The Mediterranean is a turbulent region that has experienced a series of landmark events in geographical, geological, and political terms. In his lecture, Professor Rachid Achachi linked the past to the present, exploring the region, highlighting significant historical, cultural, and political events at each milestone. Like all of Professor Achachi's lectures, this one ended with a lively exchange with the students, who showed particular interest in this topic.

"Friedrich Nietzsche, a contemporary philosopher" by Rachid Achachi February 15, 2023

Rachid Achachi continues his lecture series at the Euromed University of Fez, this time discussing the German philosopher Friedrich Nietzsche, whose works provoke many misunderstandings. It is clear that Nietzsche's philosophy is one of the most complex thoughts, but through this lecture, Rachid Achachi was able to share the main foundations of Nietzsche's philosophy in a perceptible way in an exchange approach with the students.

"Liberalism, Communism, Fascism: Introduction to the Three Political Theories of Modernity": Conference by Mr. Rachid ACHACHI April 5, 2023

Rachid Achachi continues with his series of lectures at the Euromed University of Fez by hosting, on April 5, 2023, a conference entitled: "Liberalism, communism, fascism: introduction to the three political theories of modernity".

https://ueuromed.org/actualites/cycle-de-conferences/liberalisme-communisme-fascisme-introduction-au-trois-theories

Rethinking the concept of Sovereignty: theme of Mr Rachid Achachi's conference May 24, 2023

Mr. Rachid ACHACHI, Columnist at Luxe Radio and consultant in geopolitics, is coming today, May 24, 2023, to the Euromed University of Fez to lead a conference under the theme "Rethinking the concept of Sovereignty", as part of the cycle of conferences he leads within our University.

During this conference, Mr. Achachi raised the subject of sovereignty through the questioning of the sovereignty of States in several areas (health, food, energy, digital, etc.), going through the issues of this questioning and the consequences of globalization on States from the point of view of their political, economic and cultural autonomy.

Like the conferences led by Mr. Achachi, this meeting was an opportunity to once again share moments of intellectual exchange with the students and teacher-researchers present at this event.

“Lessons from an Earthquake” conference by Professor Rachid Achachi

The Al Haouz earthquake is featured in the first episode of this year's "Philosophy Wednesdays" through a conference entitled "Lessons from an earthquake: deciphering and perspectives of the surge of solidarity" and hosted by Professor Rachid Achachi.

As part of the conference cycle of the Euromed University of Fez, and following the earthquake that our country suffered on September 8, the first episode of the new cycle for the 2023/2024 academic year, hosted by Prof. Rachid ACHACHI, columnist and consultant in geopolitics, took the theme of "Lessons from an earthquake: deciphering and perspectives of the surge of solidarity".

In the presence of Prof. Mostapha BOUSMINA, President of the UEMF, and many other members of the administrative and teaching staff, Prof. Rachid ACHACHI presented himself today, October 4, at the Euromed University of Fez to decipher the aspects of the surge of solidarity that was organized throughout Morocco. In his analysis, Prof. Achachi based himself on the factors that underlie the intensity of our empathy in the face of a tragedy, covering the philosophical, sociological and psychological aspects of the matter. He also took the opportunity to explain to the audience how to capitalize politically and socially on a collective surge of empathy.

Like the conferences led by Professor Achachi, this meeting was an opportunity to once again share moments of intellectual exchange with the students and teacher-researchers present at this event.

Conference by Dr. Rachid ACHACHI: "Spinoza: knowledge as the foundation of ethics"

As part of the conference cycle, this Wednesday, October 18, 2023 was marked by a conference by Dr. Rachid ACHACHI around the theme "Spinoza: knowledge as the foundation of ethics" within the Eco-campus of the Euromed University of Fez.

This afternoon, students from various institutions of the University attended a purely philosophical reflection session on the role of knowledge in the liberation of thoughts according to the philosopher Spinoza. The speaker also took the opportunity to elucidate the distinction between ethics and morality, as well as the purpose of ethics.

With the aim of making this meeting a place for constructive exchange and collective production of knowledge, the audience was able to participate in an enriching debate on the different aspects discussed during this conference.

Ms. Najet Vallaud Belkacem: Sustainable Development Goals 2030: So far, so close?

Decarbonization, reduction of greenhouse gas emissions, eradication of poverty, justice and peace, as well as other priorities defined by the United Nations for 2030, constitute the 17 Sustainable Development Goals designed to address the global challenges we face.

These interconnected goals are so important that it is necessary to ensure that each of them, and each of their targets, is achieved by 2030. Why are these goals a priority and what is the degree of their implications for organizations? This is the question addressed in this lecture given by Ms. Najat Vallaud Belkacem. Former Minister of National Education, former Minister of Women's Rights, Urban Affairs, Youth and Sports and currently France Director of ONE, the NGO fighting extreme poverty and preventable diseases,

Ms. Najet Vallaud Belkacem accepted the UEMF's invitation to give this conference, which was led by Professor Hafsa El Bekri, lecturer and researcher at the Euromed Business School and Co-Director of the Think Tank Research Institute for European, Mediterranean, and African Studies (RIEMAS).

https://www.ueuromed.org/actualites/cycle-de-conferences/mme-najet-vallaud-belkacem-objectifs-de-developpement-durable-2030

“Fake news, hoaxes and information disorders: spotting them, fighting them”: conference by Ms. Najat Vallaud Belkacem March 23, 2023

As part of its conference cycle, the Euromed University of Fez welcomed Mrs. Najat Vallaud-Belkacem, former Minister of Women's Rights, then of the City, Youth and Sports and then of National Education, Higher Education and Research of the French Republic and currently Director General of the international solidarity NGO ONE France, who gave a conference today on the theme "Fake news, hoaxes and information disorders: spotting them, fighting them."

This conference-debate, which was moderated by Prof. Hafsa El Bekri, lecturer-researcher at UEMF and Co-Director of the Think Tank Research Institute for European, Mediterranean and African Studies (RIEMAS), was an opportunity for our students and staff members to attend a debate rich in reflections and exchanges.

During this meeting, Ms. Vallaud-Belkacem discussed several topics related to the major impact of fake news on public opinion, the negative consequences for democracy in our societies and the means of combating disinformation and information deregulation.

https://ueuromed.org/actualites/cycle-de-conferences/fake-news-intox-et-desordres-informationnels-les-reperer-les

"Des Frontie□res et des Hommes»: conference by Ms. Najat Vallaud Belkacem

A conference by Mrs. Najat Vallaud-Belkacem, former Minister of Women's Rights, then of the City, Youth and Sports and then of National Education, Higher Education and Research of the French Republic and currently Director General of the international solidarity NGO ONE France.

This conference-debate was led by Professor Mounia SLIGHOUA, lecturer-researcher at the Institute of Legal and Political Sciences of the UEMF, who questioned the Minister on subjects particularly linked to the problem of borders and the migratory phenomenon.

Ms. VALLAUD-BELKACEM shared a variety of thoughts on her perspective on migration around the world and the various future prospects to consider. Ms. VALLAUD-BELKACEM also highlighted the importance of conducting a serious reflection process, in which research institutions, universities, and businesses must be involved, in order to find solutions to these current problems.

Furthermore, the conference also addressed the complex issue of public debate around migration, particularly with the rise of extremism in a number of territories around the world today.

This meeting provided keys to understanding the current immigration situation while analyzing its causes, trends and possible developments.

Finally, the aim was to look at migration, through the case of Morocco, as a country of departure, host country or transit country for immigrants coming from other African countries.

Entrepreneurship training

Organization of the Royal Air Maroc Hackathon

The "Euromed Sustainable Impact Challenge" Hackathon, organized from January 19 to 21, 2022 by the Euromed University of Fez and Royal Air Maroc, ended with the announcement of the winning project "Green Wings".

Green Wings is a mobile application created by a group of eight students in Business, Artificial Intelligence, and Design at UEMF. The application aims to promote RAM's CSR initiatives and instill them in employees' habits through three main components: carpooling, catering, as well as eco-scoring and eco-ranking.

- Carpooling will help minimize the carbon footprint.

- The catering component will allow employees to confirm or not their presence at the company restaurant the next day, as well as to choose the foods that would make up their menu in order to avoid food waste.

- Eco-scoring is a score calculated based on 3 factors: water and electricity consumption internally and externally among the various RAM employees, the rate of involvement in carpooling and RAM's eco-responsible activities, and finally volunteering. This score will lead to an eco-ranking that will elect the best eco-

friendly, which will create a competitive and fun atmosphere and allow people to combine business with pleasure.

All these activities will bring significant savings for RAM, savings which will then be used in a reward system for various eco-responsible employees.

Organization of the Web Help Hackathon In collaboration with the Partnerships Department

The grand finale of the Hackathon organized by Webhelp Maroc and UEMF, from September 21 to 23, on employee loyalty, saw the participation of more than ten projects, each one innovative. New ideas and concepts captivated the attention of the jury during the defense session.

Concretely, the objective of this event is to encourage young UEMF students to find solutions to a common problem: employee engagement in a workspace. A dozen groups made up of students from the Euromed Business School and the School of Digital Engineering and Artificial Intelligence pooled their efforts to design innovative concepts.

The highlight of this Hackathon was the nomination of the winning project at the end of the pitching session. The "Webhelp League" project, a platform that gamifies agents' KPIs (Key Performance Indicators) by transforming them into a team game, came in first place. This platform brings together groups working on a Webhelp platform. These groups form a virtual football team with the goal of reaching the top of the standings at the end of the season. Players/agents must therefore create synergy between themselves: placing the most productive players/agents in the positions that will earn the team the most points and, at the same time, increase their ranking in the league. At the end of each season, the winning team will be rewarded.

Bank of Africa's National SmartBank Competition: 16 projects from various key sectors of the Moroccan economy

Regional Jury for the Bank of Africa SmartBank National Competition: The regional competition highlighted 16 projects from different key sectors of the Moroccan economy. For this round, the jury was composed of Ms. Squalli, facilitator at Bank of Africa, Mr. Errafik, First Vice-President of the Fez-Meknes Region, Mr. Bouzrazi, in charge of

investment and investment and entrepreneurship programs within the Fez-Meknes Regional Council, Mr. El Badaoui, head of the Post-Creation Monitoring department within the Fez-Meknes CRI, and Pr. Rhalimi, professor at the Euromed Business School (UEMF). After an evaluation based on the innovative nature, impact and feasibility of each proposal, the jury selected 2 projects to represent the region at the national event in Casablanca.

The finalists of the regional stage of the "Smart Bank" competition have been revealed!

23 project leaders were selected to present their projects to business leaders and bankers and obtain a share of the funds intended to develop the dynamics of innovation in the Fez-Meknes region.

Three finalists were announced during the awards ceremony and will represent the Fez-Meknes region at the national finals to be held next June. If they succeed in convincing the national jury, they will be awarded funding contracts to accelerate the development of their innovations, in addition to the support offered by the UEMF's entrepreneurship support structure.

The finalists:

- PEATI- Positive Energy Advice Trading International
  PEATI is a 100% Moroccan digital wholesale purchasing center specializing in the construction sector.
- Ra7betkom
  Digital platform to connect agricultural stakeholders, specifically farmers, to give them better visibility on the market and to be able to best promote their products.
- Com'On
  A platform that helps communities better understand each other and develop mutual support and the exchange of services within them.

EIB and UfM certification training on financing development projects 21 November 2022

As part of the agreement signed between the Union for the Mediterranean (UfM) and the European Investment Bank (EIB), in which it is agreed that the two institutions aim to "structure a study program on the EIB in the southern Mediterranean, as a joint initiative"; a training program was offered to students of the Euromed University of Fez, including students from:

Euromed Business School:

- Master's degree in “Audit and Performance Management”
- Master “International Business”

The Euromed Institute of Political and Legal Sciences:

- Master's degree in "Mediterranean and African Policies"
- Master's in Business and Financial Law
- Bachelor's degree in "Legal and Political Sciences"

Workshops focusing on the role of the EIB in EU development cooperation were led by:

- Ms. Flavia Palanza: Former EIB Director for Neighborhood Countries;
- Mr. Andrea Tinagli: EIB representative at the Union for the Mediterranean;
- Mr. Giuseppe Provenzano: Project Manager in Higher Education and Research at the Union for the Mediterranean.

Spread over two days, this training ended with the presentation of certificates to the participating students.

The 2nd edition of the Euromed Sustainable Impact Challenge February 6, 2023

Following the January 2022 edition, the Euromed Sustainable Impact Challenge continues this year to continue to promote the emergence of innovative solutions in sustainable development and CSR.

This Hackathon will be held in partnership with RAM and the Euromed Business School of UEMF from February 6 to 8, 2023. Supervised and coached by RAM experts and UEMF lecturer-researchers, around a hundred students from the Euormed Business School, the School of Digital Engineering and Artificial Intelligence and the Euromed School of Architecture, Design and Urban Planning will have to respond to a problem related to CSR. The idea is to arrive at the pitch session with an economically viable solution that would reduce the impact of RAM's activities on the environment.

Issues of this edition:

"How can we engage customers in a responsible approach through choices and behaviors throughout the customer journey, from inspiration to their return home?"

Grand finale of the "Euromed Sustainable Impact Challenge" Hackathon: innovative but above all responsible projects February 8, 2023

The intense work sessions and tailored coaching ended on a high note. Projects that competed in ingenuity and eco-responsible concepts were the subject of the grand finale of this Hackathon co-organized by Euromed Business School and Royal Air Maroc.

Applications, quizzes, and various green solutions were designed by students from the Euromed Business School (EBS) and the School of Digital Engineering and Artificial Intelligence (EIDIA) to engage customers in a responsible air travel approach throughout the entire journey, from destination inspiration to returning home. Applicants for this competition were organized into ten teams. At the end of the Hackathon, the projects of three teams were recognized with prizes.

More than just an opportunity to democratize the theme of CSR, the values of RAM and UEMF, this Hackathon is a unique opportunity, of educational interest, allowing students to benefit from tutoring and support from high-level executives and experts.

Launch of the SMART Bank Territorial Open Innovation program March 9, 2023

To support regional entrepreneurial momentum, UEMF, in partnership with Bank of Africa, CRI-Fès-Meknès, and the Fès-Meknès Regional Council, organized a BootCamp on March 9 and 10, during which 16 idea holders benefited from a tailored support program that included training, mentoring, and discussions with business experts. The goal is to help develop among the various participants a number of attitudes, skills, and competencies useful for successfully carrying out an entrepreneurial project.

A final selection of the best innovative ideas will be organized at the end of this edition. The winners of this edition will benefit directly from the support of the UEMF incubator.

Student Innov'Up Hackathon: 20 online Masterclasses including 12 project leaders around the environment and ecology

This hackathon is part of the European Union's actions in favor of youth, in particular the "Men Chabab Qrab" communication campaign, launched by the European Union in 2023. Its objective is to encourage young students to undertake and innovate by developing entrepreneurial solutions related to the environment and climate change.

The event on May 12, 2023 concludes a four-week pre-hackathon period, which allowed 12 teams selected from nearly 200 applications received to benefit from a dense training program with trainers and coaches from the entrepreneurial world, mobilized to support them in structuring and clarifying their project idea around the theme of the environment and sustainable development.

This support gained momentum with numerous additional sessions held during a hackathon bringing together the 12 teams, on May 11 and 12, 2023, at the Euromed University of Fez. Four teams presented solutions in sustainable agriculture, three in water resource conservation, two in waste management, one in sustainable mobility, one in biodiversity preservation, and one in biomaterials.

The jury was composed of Mrs. Patricia Llombart Cussac, Ambassador of the European Union to Morocco, Mrs. Anna Barone, Head of Representation of the European Investment Bank in Morocco, Pr. Mostapha Bousmina, President of the Euromed University of Fez, Mr. Omar Tajmouati, President of the Fez-Meknes regional branch of the CGEM and Mr. Omar Amrani, Director of Innovation and Pedagogy at StartUp Station.

The second edition of the RAM Digital Open Innovation program is held at UEMF May 8, 2023

Euromed University of Fez is pleased to announce its partnership with Royal Air Maroc (RAM) for the second edition of the "RAM Digital Open Innovation" program.

RAM teams presented 13 interesting challenges during their visit to the EUROMED INNOVATION CENTER on Friday, May 5, covering a variety of areas from claims management to revenue optimization and travel sustainability. The bootcamp will take place from June 18 to 24, 2023, at the EUROMED Innovation Center in Fez.

As part of this program, RAM fosters an agile relationship with startups based on the following principles: support, visibility, transparency, and simplified procedures. The Moroccan airline operates on all continents and aims to co-build a new generation of innovative products and services for its customers and meet the challenges of the national company.

UEMF hosts RAM DIGITAL OPEN INNOVATION for its second edition

Euromed University of Fez hosted today, June 23, the final phase of the second edition of RAM Digital Open Innovation, aimed at selecting the best solutions and projects led by the finalist startups.

As part of an approach to supporting project leaders, creating startups and spinouts linked to innovative fields, the Euromed University of Fez is hosting the second edition of the RAM DIGITAL OPEN INNOVATION program organized in partnership with Royal Air Maroc. From June 18 to 23, 2023, the event was held within the UEMF Eco-Campus and for a whole week, the Bootcamp was dedicated to the product development process, improving value propositions as well as designing the first version of the projects. At the end of these workshops, a Demoday was scheduled this Friday to find out the winning solution(s).

The Demoday took place in the presence of eminent personalities, including Mr. Addou Abdelhamid, Chairman and CEO of RAM, Mr. Kharlamov Alexei, Director of the Transformation Division of RAM, Ms. Kazzini Ilham, Director of the Commercial Division of RAM, Mr. Benchekroun Karim, Chief Financial Officer of RAM, Mr. Jalali Adil, Director of the Operations Division of RAM, Pr. Bousmina Mostapha, President of the Euromed University of Fez, Mr. Sami Romdhane, Country Manager of Visa Maroc.

This program aims to shape a new generation of innovative products and services to address the challenges facing the national airline. To this end, the Euromed University of Fez welcomed 10 teams of young developers from around the world with different challenges. These startups had one week at our Eco-Campus to prepare for the final pitch with the goal of eventually seeing their solution deployed.

This initiative supports the strategy of the Euromed University of Fez and its efforts to support young people in their entrepreneurial activities and to promote human capital in society through training, support, skills development and financing of innovative projects. UEMF is thus revolutionizing the image of the traditional university by actively working within its ecosystem and in particular through its multiple partnerships and collaboration agreements concluded with various actors in the socio-economic world at the national and international levels.

Second edition of the Euro-Mediterranean Innovation Bootcamp by the Euromed University of Fez (UEMF)

This new edition of the EMIC 2 Bootcamp provides an opportunity for young people aged 18 to 35 from the Euro-Mediterranean region, including secondary school students, higher education students, and postgraduate students, as well as employees.

You too, if you meet the eligibility criteria, can participate with a new idea or invention, likely to be commercialized and that can be converted into a functional prototype in a maximum of 3 months, which relates to the fields of health, renewable energy or the environment. You must be the sole owner of the idea or be entrusted by the co-owners to present and develop it. It is also desirable to have a good command of English.

1st edition of the <<MedInnovationTour>> Hackathon

On the sidelines of the organization of the Mediterranean Tourism Forum "Meditour2023", the Euromed University of Fez (UEMF) and the Chamber of Commerce, Industry and Services are organizing a Hackathon which aims to energize and reinvent Tourism and bring together the creative minds of entrepreneurs ready to rethink the tourist experience in the Region with a focus on the Mediterranean.

The Euromed University of Fez organized in partnership with the Fez-Meknes Chamber of Commerce, Industry and Services the Hackathon "MedInnovation Tour 2023" which was held at the UEMF Eco-campus, on October 13 and 14, 2023 under the auspices of the Ministry of Tourism, Crafts and Social and Solidarity Economy.

A flagship event preceding the 10th edition of the Mediterranean Tourism Forum, this hackathon aims to promote investment in this sector, strengthen interregional cooperation and showcase the tourist attractions of the Mediterranean region.

This year's MedInnovation Tour brought together several tourism stakeholders and experts, as well as entrepreneurs with creative ideas, to rethink the tourism experience and offer new perspectives to boost Mediterranean tourism by focusing on the region's natural and cultural assets.

During this Hackathon, the pre-selected candidates benefited from several training, coaching and support sessions provided by experts to allow them to live an immersive entrepreneurial experience through workshops, round tables developed around different themes, including "Design Thinking & UX/UI Design in the tourism sector", "Sustainability and innovation in the tourism sector", "Solution development, Product design and Prototype" and "How to pitch?".

At the end of these two days of collective reflection and intense work, several innovative projects emerged around the theme of "Mediterranean tourism in projects".

The awards ceremony was marked by the presence of several personalities representing the public and private sectors from different segments of tourism and those from the academic world.

Various events

Our doctoral students shine internationally!

Dr. Nisrine Hammi, a former doctoral student at UEMF jointly supervised by the University of Lille, has just won the 2020 Best Thesis Prize from the Hauts de France section of the Société Chimique de France (SCF).

Congratulations to Nisrine, a student and, above all, an excellent ambassador for UEMF, who left a very positive impression. Nisrine filed the second patent in UEMF's history and has a slate of high-level scientific publications to her name.

Lecture at the Euromed Polytechnic School by Prof. Ahmed El Hassani "Geologists' Paradise - A Journey Through Time in the Kingdom of Morocco" November 16, 2022

Indeed, our speaker, Prof. Dr. Ahmed El Hassani, resident member of the Hassan II Academy of Sciences and Technology, confirms that "Morocco is considered geologically among the countries that relate the geological history of the globe in a fairly complete manner (from the Archean to the Quaternary). As such, it is of major interest to the international scientific community; which is why it is regularly visited by a large number of geologists from five continents. In addition to the great diversity of geological terrain, several stratotypes and groups of fossils have been identified in Morocco where they are the best represented on a global scale. These

riches remain unknown today by the majority of Moroccans, including managers of natural areas, and even the non-specialized scientific community. This encourages the conduct of "inventory" type studies that geologists rarely engage in, but which play a fundamental role in raising public awareness of the preservation, enhancement and rational use of this heritage."

Practical module of general construction processes for 2nd year students in the civil engineering cycle December 7, 2022

At the initiative of the President of the University, the Euromed Polytechnic School (EPS) has set up with TGCC a practical module of general construction processes for second-year civil engineering students. These engineering students will combine, throughout the 2022-2023 academic year, reading activities, plan studies and the construction of the necessary works on the University's construction sites. They will be supervised on site by TGCC engineers and site managers while interacting in real situations with the workers.

Students from the Euromed Institute of Legal and Political Sciences took a guided tour of the services of the municipality of Fez on December 29, 2022

On December 29, 2022, a group of second-year political science students from the Euromed Institute of Legal and Political Sciences took a guided tour of the services of the municipality of Fez.

The students were received by the President of the City Council, Dr. Abdesslam Bakkali, and several heads of municipal services. The visit culminated in a discussion meeting with the President of the City Council and some members of the office.

Academic partnerships of excellence between UEMF and three Israeli universities January 16, 2023

A delegation from the Euromed University of Fez (UEMF), composed of its President Prof. Mostapha Bousmina, the Director of the School of Digital Engineering and Artificial Intelligence, Prof. Maha Gmira and the Director of Partnerships and Innovation, Ms. Ghada Bouhlal, visited Israel to strengthen the academic partnership

with Tel Aviv University, Shenkar University and the Hebrew University of Jerusalem. The delegation was also received by high-ranking Israeli figures, including the son of former President of Israel Shimon Perez and also the former minister of Moroccan origin Raphy Edery in the presence of His Excellency Mr. Abderrahim Beyyoudh, head of the liaison office of the Kingdom of Morocco in Tel Aviv.

The partnership focuses on artificial intelligence, robotics, biotechnology, precision agriculture and water issues.

About ten UEMF students will travel to Israel next February before hosting Israeli students at UEMF later this year. Other co-supervised lecturers and doctoral students will also travel in both directions, with stays between UEMF and partner Israeli universities.

Conference organized by the CNDP (National Commission for the Control of Personal Data Protection), on the theme of "the protection of genomic information" January 30, 2023

On Monday, January 30, 2023, the Euromed University of Fez hosted a conference on "the protection of genomic information." The event was organized by the National Commission for the Control of Personal Data Protection (CNDP).

This event, initiated by the National Commission for the Control of Personal Data Protection (CNDP), saw the participation of numerous national and international experts in the presence of Prof. Mostapha BOUSMINA, President of the Euromed

University of Fez, Mr. Omar SEGHROUCHNI, President of the National Commission for the Control of Personal Data Protection (CNDP) and Mr. Hassan BOUBRIK, Director General of the National Social Security Fund (CNSS).

"Genomic information has become, in recent years, one of the essential levers for improving health systems. Managed on a large scale, outside of any regulatory framework, it can impact the safety of populations," announced Mr. SEGHROUCHNI, who recalled the sensitivity of genomic information given the very frequent use of its data which produces digital information called genomics, the manipulation and exploitation of which must promote the efforts of scientific research aimed at better understanding human beings with a view to improving their living conditions, while preserving the terms of their privacy.

The Euromed Institute of Legal and Political Sciences celebrates its Bachelor's degree class January 19, 2023

The Euromed Institute of Legal and Political Sciences celebrated its graduating class in the presence of Professor Bertrand Simon, Professor of Political Science at Paris 1 Panthéon-Sorbonne since 1996, who expressed his pride in this class whose journey has been punctuated by several challenges that have resulted in forging their personalities and brilliantly sealing a chapter in their academic life. In his speech, Professor Bertrand also emphasized the pleasure of supporting these young students who, from their first days on the benches of the University, have shown themselves to be motivated and determined to achieve their dreams.

It was under the proud and emotional gaze of their parents that the students received their diplomas, a key that will allow them to continue their studies at the Master's level at the University and to invest more in carrying out their study and career plans.

Arduino workshop organized by the digi-club December 2022 and January 2023

The Digiclub organized Arduino training for its members who were active throughout this cycle.

The training took place within the UEMF and according to a schedule covering two months of work: December 2022 and January 2023.

Visit of EPS students to the construction site of phase 2 of the UEMF eco-campus February 25, 2023

An outing was carried out on February 25, 2023 for the benefit of 2nd year students of the civil engineering cycle to see up close the progress of the construction work on the new university buildings (football field stands and multi-sports field, Olympic swimming pool, R+7 building, etc.). The opportunity was to compare the theoretical knowledge acquired in the various courses with construction

site practice and to closely appreciate the different techniques, materials and machines used.

During the presentation, the students were able to get an idea of the scale of the project, as well as the complexity of implementing its various components, through a series of various questions.

Conference by the Enactus club February 23, 2023

The Enactus club is back with the organization on February 23rd of a conference entitled "The company as an entity in the legal sphere" led by Mr. Khalid El Houssaini, lawyer and member of the Fez Bar Council, and Mrs. Hasna Slamti. Through this conference, the club intends to provide its members with the necessary tools for understanding the legal aspects of any business.

The New Wars of Influence in International Relations by Mr. Frédéric Charillon March 13, 2023

A conference led by Mr. Frédéric CHARILLON, university professor of political science, political scientist specializing in international relations, author of several

works including the book "Wars of influence. States conquering minds" published in 2022.

During this meeting with students and lecturer-researchers, Mr. Charillon addressed the subject of the influence exerted by States through their strategies and policies, with long-term projects, in order to change perceptions and influence public opinion to serve the interests linked to their international relations.

This conference also allowed the University students to exchange with Mr. CHARILLON and to bring a new perspective on the different models of influence and on phenomena at work since the beginning of humanity through the prism of a new international context.

HOLDING OF THE CONSTITUTIVE GENERAL MEETING OF THE UEMF ALUMINUM ASSOCIATION: Approval of the statutes and election of the board March 17, 2023

Alumni of the Euromed University of Fez held their constitutive general assembly on Friday, March 17, 2023, in a hybrid format (in person and remotely), for the creation of their association, now domiciled at the University.

The opportunity for the dozens of participants to review and endorse the missions assigned to their association, those of:

- preserve and strengthen the bonds of friendship between members, to maintain and develop the feeling of belonging to their community,

- defend the moral and material interests of its members, in compliance with the law and provide them with assistance in their professional and personal lives,

- support young graduates, promote their professional integration and develop their professional skills,

- develop the international influence and image of the UEMF diploma and its alumni,

- carry out collective projects with a social vocation.

The participants adopted the association's statutes after reading them in detail and then proceeded to elect their officers.

It is composed as follows: CHBILI Yahia (President); BELHABIB Kenza (Vice-President); IRAQUI Amine (Secretary General); AMEUR Omar (Deputy Secretary General); BENTLA Kamilia (Treasurer). Four delegated members complete this composition: ALAOUI Souad, BENTAHER Jabeur; FADIL Ahmed Amine; YASSINE Taoufik.

Through the debates and discussions, priority actions that will be the subject of their action plan were identified and will serve as a basis for the development of this plan by the office.

Workshop "Design Management and Product Design" March 13-17, 2023

A workshop led by Mr. Hicham Lahlou, International Designer, who assisted the students through practical work projects with the aim of developing their project based on the definition of the concept and the development of a central creation symbolizing the project...

Also, these workshops were an opportunity to acquire technical knowledge in order to be able to manage the project with all its phases: Sketch, APS, APD, executable plans, 3D, as well as the creation of the name of the project "Naming" brand: Branding & Packaging - using 3D Printing.

UEMF supports young middle school students in the Moulay Yacoub province in innovation and robotics March 21, 2023

The Euromed University of FES opened the doors of its laboratories and language center to young middle school students from the Moulay Yacoub province and their coaches. This is in preparation for the First Lego League Challenge, an international robotics competition for

young people aged 9 to 16, organized by the FIRST Foundation (For Inspiration and Recognition of Science and Technology) and Lego Education.

Each year, a new theme is chosen for the challenge, and participating teams must build, program, and test a robot using Lego Mindstorms pieces to solve a series of missions on a game board. This year, the theme is energy efficiency. The missions are designed to encourage young people to explore areas such as science, technology, engineering, and mathematics (STEM) while developing communication, problem-solving, and collaboration skills.

The target group won the regional and national competitions and will represent Morocco in the final stages which will take place in the United States.

Trading training March 13, 2023

The GENIUS Club held a trading training session on March 13. The goal of this training was to provide students with the basics of trading so they could begin investing in this field with confidence.

UEMF students head to Tel Aviv for Jamweek in Shenkar to address climate change issues February 27, 2023

The impact of global warming is already irreversible, and environmental issues are now a strategic issue at all levels. With the current rate of population growth and the intensification of industrial activities, among other things, major challenges must be addressed. In response to these concerns, Shenkar College of Engineering, Design and Art in Tel Aviv organizes the annual "JAMWEEK," a creative hackathon that aims to bring together students and experts to propose solutions that can reduce CO2 emissions and limit global warming.

This year, the 11th edition of JAMWEEK, which took place from February 27 to March 2, 2023, was very special because it saw the participation of around ten students from the Euromed University of Fez, who traveled to Tel Aviv to meet students from Israel, Germany and New York to work hand in hand and conduct a collective brainstorming session. With a focus on specific regions such as the Mediterranean

Sea, the Red Sea and the desert, the goal is to find ideas that promote awareness of environmental problems and propose measures to mitigate them.

Various academic backgrounds from UEMF were represented: Artificial Intelligence, International Business, Management, and even Humanities and Social Sciences. Participants were invited to propose, in teams, solutions applicable to several areas: water pollution, biodiversity preservation, and the protection of flora and fauna.

The EUROMED-ICESCO Chair: "Thinking about the subject and the world in times of conflict" May 31, 2023

As part of the EUROMED-ICESCO Chair "Arts, Societies and Civilizations", the Euromed University of Fez organized in partnership with the Islamic World Educational, Scientific and Cultural Organization (ICESCO), on May 31, 2023, a master conference entitled: "THINKING ABOUT THE SUBJECT AND THE WORLD IN TIMES OF CONFLICTUALITIES".

A meeting which saw the participation of several eminent personalities and which was an opportunity to highlight the different reflections.

Prof. Mostapha BOUSMINA, President of the Euromed University of Fez, highlighted during his speech entitled "The Enigma of Time: From Time to Time", the importance of the theories and experiments conducted by great thinkers and scientists in understanding the relationship between being and time.

The conference was marked by the participation of many thinkers and scientists, including Mr. Abderrahman TENKOUL, Dean of the Faculty of Human and Social Sciences of UEMF, Mr. Jalil BENNANI, Psychoanalyst and writer and Mr. Driss KHROUZ, Director General of the Esprit de Fès Foundation.

The Euromed University of Fez and the Sorbonne Law School are organizing the "Restucturing" Days in Fez on May 11 and 12, 2023

Since last September, the Euromed University of Fez has been hosting the Sorbonne Law School with a degree program located in Morocco, specifically a Master's degree in Business Law offered to students from Morocco, France, and sub-Saharan Africa in a proportion of 1/3, 1/3, 1/3. This highly selective Master's degree has been a great success in the three aforementioned regions.

In this context, the university is organizing, today, May 11 and tomorrow, May 12, two days devoted to the study of techniques for restructuring the liabilities of companies in difficulty. Nearly 200 specialists, mostly from France, are participating in this high-level training, which will allow around a hundred lawyers and insolvency practitioners to exchange with their Moroccan counterparts and refine legal techniques and methods for better corporate restructuring.

The success of these training days organized in Morocco is explained by the current difficult economic context which exposes many companies to financial difficulties and forces them to restructure to make their liabilities more bearable.

Screening of the film "The Builders of the Alhambra" May 17, 2023

This event, which is part of the cultural cooperation between the Euromed University of Fez and the Cervantes Institute, allowed our students to experience, among other things, the fascinating historical reconstruction of the kingdom of Granada through the construction of the epicenter of power, the sumptuous Alhambra.

It was also an opportunity to talk with the director of the film, Ms. Isabel Fernandez Sanchez.

https://ueuromed.org/actualites/activites-pedagogiques-et-culturelles/projection-du-film-les-constructeurs-de-alhambra

Exhibition “Mathematical Walk through Al-Andalus” May 18, 2023

As part of the days dedicated to Andalusian architecture and heritage, organized between May 17 and 20, 2023, by the Cervantes Institute of Fez and the cultural service of the Spanish Embassy in Rabat, the exhibition "Mathematical Walk through Al-Andalus" has been scheduled for May 18.

It has highlighted the Alhambra in Granada, the Mosque and Synagogue of Cordoba and the Real Alcázar, the Torre del Oro, the Giralda and the doors of the Cathedral of Seville. An original and different way of presenting Andalusian heritage to the public, integrating science, art and history with the help of technological tools (Exploria Ciencia, 3D Models, Digital Fabrication and GeoGebra).

On the sidelines of the inauguration of this exhibition, its curator, Professor Álvaro Martínez Sevilla, gave a beautiful lecture on Friday, May 19, at the Euromed University of Fez, on the theme "Mathematics of Andalusian monuments and their historical and artistic significance" and following which was held a round table, with the participation of eminent Moroccan and Spanish specialists. Previously, on May 17, the film "The Builders of the Alhambra" was screened with the presence of its director Isabel Fernández who led a debate with the students and professors of the University" following this screening.

Meeting at the UEMF: "The role of culture in sustainable development and the emergence of a new humanism" May 8, 2023

As part of the EUROMED-ICESCO Chair "Arts, Societies and Civilizations", the Euromed University of Fez hosted, on May 5, 2023, an important meeting on themes covering crucial issues: the role of culture in sustainable development and the emergence of a new humanism, cultural practices, young people and the challenges of digital technology, the relationship between humans and embedded and automated systems, the inherent indeterminacy of the design of robotic objects with its risks and opportunities, the unthought-of in the construction of links between identity and otherness. ..

At the UEMF Art Gallery, the audience, composed of lecturers, doctoral students and students from different fields of human and social sciences, reacted brilliantly to the

communications given by eminent personalities from the academic and scientific world, namely Ms. YAMOU FALL, Minister-Counsellor to the President of Senegal, Mr. MOHAMED ZINELAB, and Mr. MIRANIK. MOHAMED ZINELABIDINE, Director of Culture and Communication at UNESCO, and CAROLINE MORICOT, researcher at the University of Paris 1 PANTHÉON SORBONNE.

Practical civil engineering workshops May 20, 2023

The practical construction workshops conducted by the Euromed Polytechnic School (EPS) in partnership with TGCC on May 13 and 20, 2023 for the benefit of 4th year civil engineering students focused on the progress of operations related to the construction work on the university's extension buildings (football field stands, sports hall, Olympic swimming pool, R+7 administrative building, etc.), as well as on major advances relating to:

- Masonry work (classic bricks, blocks, Mono wall bricks with insulating capacity);
- Floors (mainly inclined slabs, hollow core slabs, post-tensioned slabs, prefabricated slabs);
- Metal framework (profiles used, implementation process, etc.);
- Drainage system around buildings;
- General organization of site management and technical language elements.

Various topics were discussed, including:

- Concrete cracking and segregation;
- Presentation of the articles of DTU 20.1 “Small masonry works - Walls and partitions”;
- Insulation and protection techniques;
- Role of a QHSE manager and a works engineer on construction sites.

Round table: Territorial marketing May 10, 2023

The Euroemd Institute of Legal and Political Sciences organized, on Thursday, May 4, 2023, a round table on: Territorial marketing.

The event was hosted by Professor Hassan Azouaoui, Professor of Economics and Management, Vice-Dean of the Faculty of Economics of Kenitra and member of the Daraa Tafilalet Regional Council.

The holding of the activity was an opportunity to question the mechanisms and opportunities for sustainable and equitable development.

Roundtable: The UN and the New World Order May 23, 2023

The Euromed Institute of Legal and Political Sciences organized, on Tuesday, May 23, 2023, a round table on: The UN and the new world order, moderated by Mr. Said Azerkane, Doctor of Law, researcher in international relations and executive of the Ministry of the Interior.

The event provided an opportunity to discuss the role of the UN in resolving current global crises, plans for a necessary reform of this institution and aspects of a possible global order/disorder.

Enriching scientific outing at the Webhelp company in Fez, May 18, 2023

As part of the partnership between UEMF and Webhelp, and in order to consolidate students' knowledge in HR management and the application of labor law rules, the Euromed Institute of Legal and Political Sciences organized, on Thursday, May 18, 2023, a scientific outing for the benefit of its students to Webhelp in Fez.

The outing was an opportunity to discuss practical HR management procedures with the company's managers and to see employment contract templates.

UEMF students, guests of His Excellency Mr. Mark Rutte, Prime Minister of the Netherlands June 21, 2023

Students of the Euromed University of Fez participated in a meeting organized by the Prime Minister of the Netherlands, His Excellency Mr. Mark Rutte, on the sidelines of his official visit to the Kingdom of Morocco.

The meeting is held as part of the exchange between the Prime Minister of the Netherlands and students from major Moroccan universities. Held in Rabat on June 21, 2023, this event was an opportunity for our students to exchange with the Dutch head of government on several topics, including the role of cultural diplomacy in bringing the two countries closer together, as well as the importance of continuing dialogue in order to promote the values of sharing between the two nations through collaborations focused on strengthening partnerships in the fields of culture, education, and research.

Conference on the theme "Being young in the Mediterranean, Questions of the present and views of the future" March 7, 2023

As part of the university's lecture series and the EUROMED-ICESCO Chair, Professor Driss Guerraoui, President of the Open University of Dakhla and the Forum of African Economic Intelligence Associations (FAAIE), gave a lecture today on the theme "Being young in the Mediterranean, Questions of the present and views on the future".

A conference in which he highlighted the realities and challenges facing young people in the Mediterranean, while highlighting the levers that need to be put in place, in the north and south, so that young people can be the levers of the

transitions of the future. A conference steeped in optimism, emphasizing the role of the knowledge economy in building a new Mediterranean of sharing and living together.

This meeting was also an opportunity for students and doctoral students from the University to discuss with the speaker a number of questions relating to the major challenges of sustainable development in the region.

The Universities of Man and Euromed of Fez sign a partnership agreement

The President of the Polytechnic University of Man (UPM), Lacina Coulibaly, and the Director of African Relations at the Euromed University of Fez (Morocco), Mounsif Chakib, signed a framework partnership agreement on Friday, May 5, 2023, in Man.

Through this partnership, the UPM and Euromed intend to strengthen their public service missions through six areas of collaboration, including exchanges between researchers, professors and administrative staff.

The objective is to share experiences, also, the realization of joint research projects, the exchange of information and didactic and scientific materials of common interest, the constitution of research teams of common interest in different fields (survey ...), the reflection on the establishment of a joint supervision of thesis and dissertation, the joint organization of conferences, colloquiums and scientific congresses.

This agreement between the University of Man and that of Fez is the consequence of the cooperation agreement signed between the Regional Council of Tonkpi and the region of Fez-Meknes, on January 25, 2023.

UEMF Welcomes George Washington University for New Collaborative Partnership September 5, 2023

On September 4, 2023, Euromed University of Fez welcomed a prestigious delegation from the United States to represent George Washington University.

This delegation is composed mainly of Dr. Shahram Sarkani, Director of Online Graduate Engineering Programs and Dr. Mohamed Belkhayat, Professor at George Washington University.

The visit began with a presentation of the university by Prof. Salim Bounou, Vice-President in charge of Research-Innovation and Partnership, who outlined the main missions of the UEMF in terms of academic programs, scientific research, and the promotion of intercultural dialogue.

During this meeting, a discussion of opportunities for developing cooperation took place with the aim of establishing a solid partnership framework covering the field of higher education, notably with the School of Artificial Intelligence and the Euromed Polytechnic School of UEMF.

This meeting was followed by a guided tour of the university's Eco-campus and its research platforms.

Cultural event at UEMF: “ARCHITECTURE and CONTEXT”

As part of its conference cycle, and on the sidelines of the integration week, the Euromed School of Architecture, Design and Urban Planning (EMADU) organized, this Tuesday, September 19, an inaugural conference for the year 2023-2024. During this meeting, the architecture students of the EMADU gathered in the conference room for a cultural meeting on the theme "Architecture and context"

In the presence of the Director and the lecturers of EMADU, Mr. Melehi Youssef clarified the importance of taking into account the context to better respond to the environmental constraints and cultural specificities of architectural or urban projects. It should be recalled that Mr. Melehi Youssef is an ingenious architect who has received several awards, including the YOUNG ARAB ARCHITECT Award awarded by the Council of Ministers of Urban Planning and Housing of Arab Countries, the AGAKHAN Architecture Award awarded to the city of Assilah, the MOROCCO ARCHITECTURE Award for the construction of the Mohamed V Military Hospital and the HONORARY AWARD in Tribute to the Quality of the Practice of the Architectural Profession awarded by the National Council of the Order of Architects of Morocco.

This inaugural conference was an opportunity for our guest to share with students and professors his approach based on the need to refer to the needs associated with the characteristics of the environment and invent new concepts while drawing resources from his environment.

MASTER'S DEGREE AWARD CEREMONY AT THE SORBONNE LAW SCHOOL FOR STUDENTS OF THE M2 MASTER'S DEGREE IN "BUSINESS LAW"

The Euromed University of Fez and the Sorbonne Law School, relocated to the UEMF, organized a graduation ceremony on September 26 for students of the M2 "Business Law" master's degree.

This diploma, issued by the Law School of the University of Paris 1 Panthéon-Sorbonne, was awarded to students of the said master's degree who brilliantly completed their first year, in the presence of Maître Azzedine KETTANI, who agreed to be the sponsor of this first promotion.

Professor at the Faculty of Law of Hassan 2 University of Casablanca and outstanding lawyer, specialist in business law, Mr. KETTANI accompanied by Professor François-Xavier LUCAS, initiator of this delocalized master's degree and major player in the exemplary partnership linking the Euromed University of Fez to the Sorbonne University, donated reference works in the field of business law to the graduates on this occasion.

Stanford Rankings Top 2% of Researchers in the World

Two researchers from the Euromed University of Fez ranked among the 2% of the most influential researchers in the world in 2023.

The prestigious American University Stanford annually establishes the ranking of the most influential researchers in the world among more than 8 million researchers. This international ranking is based on the impact of the research carried out by researchers and recognized by the international scientific community through citations in the global SCOPUS database. Two researchers from the Euromed University of Fez are among the top 2% of researchers in the world in 2023. They are Prof. Abdelkrim El Kadib and Prof. Mostapha Bousmina, President of the UEMF and who was ranked first in Morocco in the 2020 edition of the same ranking. Two other researchers who recently joined the UEMF, Prof. Chakib Nejjari and Prof. Belkheir Hammouti, are also on the list and represented their home universities, namely the Mohammed VI University of Health Sciences in Casablanca and the Mohammed Premier University of Oujda, respectively.

Congratulations to the four researchers and other researchers from other Moroccan universities who are promoting national research and bringing their added value to global scientific research.

Technology platforms

UEMF has several high-level technological platforms in different fields: Additive Manufacturing (3D) and Prototyping, Process Engineering and Civil Engineering, Materials-Synthesis and Characterization, Biotechnology and Biomedical Engineering, Renewable Energies-Storage and Energy Efficiency, Digital Engineering and Artificial Intelligence. These platforms are shared and are used for training by and for research and also to conduct partnership and finalized research. They are also the tool allowing teacher-researchers and students to imagine, design and develop new devices, processes and products with the objective of technological transfer to the national private sector or the creation of new startups and spinouts. They are also made available to partner universities, particularly those in the Fez-Meknes Region and nationally, and also to companies to support them in their innovation strategies and strengthening their competitiveness in the face of a highly competitive international environment.

https://ueuromed.org/innovation/plateformes-technnologiques

Other activities and events

- General knowledge competition organized on May 18, 2022.
- Continuing education “Digital Transformation & Industry 4.0”.
- Double diploma agreement for the IB Master with the CNAM (June 2022).
- Development of a classroom within the Mansour ADAHABI high school in Tissa (EBS).
- Renovation of a primary school in a rural area (EBS).
- The renovation of a primary school in the old Medina of Fez (EBS).
- Development of a double degree partnership in topographic and geomatic engineering with the University of Jaen.

2024: Euromed University of Fez at the heart of action for the SDGs

The Impact Rankings 2024: Euromed University of Fez reaches 1st place regionally and 3rd nationally in the ranking

Euromed University of Fez has been recognized by the international "Times Higher Education" ranking, ranking first in the Fez-Meknes region and tied with Mohammed V University of Rabat at the national level. It is renowned for its international quality training and high student mobility.

The university has distinguished itself in several rankings, including the "Multi Rank," where it ranks first nationally and among the best in Africa. It recently opened a health center and plans to inaugurate a major university hospital. It has also been a pioneer in Africa by launching a school of artificial intelligence and cybersecurity.

Offering diverse programs in management, business, engineering, political science, and communications, the university aims to meet the needs of the job market. President Mustafa Bousmina is working to establish the university as an academic and educational leader, attracting international collaborations, notably with the Sorbonne University.

Enriching Stay at UEMF: A Cultural, Sports and Recreational Immersion for Students of the Aghbalou Association

From May 29th to 31st, the Euromed University of Fez had the pleasure of welcoming around fifty students from the Aghbalou Association as part of the Fez Sacred Music Festival. During these three days, the students stayed at the UEMF university residence. A rich and varied program was offered to them, aimed at enriching their cultural and educational experience. They had the opportunity to visit the old medina of Fez, discovering the historical and cultural heritage of the city, and to attend the various performances of the festival, enjoying the musical and spiritual diversity of artists from around the world. In addition to cultural activities, the students also explored the Euromed University of Fez during a guided tour, which was followed by sports activities in the modern infrastructure of the UEMF. On the last day, before taking the train back to Marrakech, the students spent a moment of relaxation and entertainment in a Virtual Reality gaming space, offering an immersive experience of games and relaxation. This stay, organized each year for the association's students, allows them to have an enriching experience, combining cultural, sporting and recreational discovery.

[Interview - Le360] Mostapha Bousmina, President of UEMF: How Morocco is Becoming the Leading African Power in AI

In an interview with the web media "Le360.ma", Pr. Mostapha Bousmina, President of the Euromed University of Fez (UEMF), described how Morocco is becoming the leading African power in artificial intelligence (AI) thanks to the School of Digital Engineering and Artificial Intelligence (EIDIA).

Opened in 2019, EIDIA currently trains 700 students and will award its first degrees in June 2024. It collaborates with various components of the university, integrating cutting-edge technologies for applications in health, agriculture, industry and security, with international partnerships and multilingual training.

The President said: "Our vision was not to create a school of artificial intelligence that was isolated and disconnected from other disciplines. On the contrary, our school was designed holistically, integrating it into a multifaceted environment combining training and research-innovation, and it relies on several other structures of the University."

EMADU Cultural Event: Global Perspective on Contemporary Architecture of EMADU

The School of Architecture of the Euromed University of Fez welcomed, on Thursday, May 28, 2024, Sean Anderson, a major player in the field of architecture and former associate curator at the Museum of Modern Art (MoMA), New York.

Sean Anderson, currently an Associate Professor at Cornell University, has brought a wealth of knowledge and experience to our Architecture students. With an impressive background that includes teaching and practicing architecture in countries such as Afghanistan, Australia, India, Italy, Morocco, Sri Lanka and the United Arab Emirates, his presentations offer global perspectives on current innovations and challenges in his field.

How can we begin to unravel commonly held assumptions about architecture in order to move beyond the boundaries, structures, and systems that limit, or even prohibit, knowledge? This was the central question at this meeting, as Anderson addressed issues related to the manifestation of the past in our present, through the tools used by architects, designers, and other actors. He suggested ways to dismantle these legacies to create new spaces for reflection, habitation, and liberation.

https://ueuromed.org/actualites/cycle-de-conferences/rendez-vous-culturel-de-lemadu-perspective-globale-sur

Euromed University of Fez Strengthens its Partnership with Pinnacle Teaching Solutions

Euromed University of Fez (UEMF) is proud to announce the extension of its partnership with Pinnacle Teaching Solutions, a leading educational provider with nearly 43 years of international expertise in 15 countries. This renewed partnership aligns with our commitment to expanding our English-language teaching, with the ambition of delivering 50% of courses in English by 2025, up from 40% currently. Marking a crucial step in UEMF's international development, this strategic commitment also further strengthens our multilingual academic environment, a central pillar of our vision. The goal is to broaden our students' horizons in terms of international mobility and professional opportunities.

In this spirit, the UEMF has created the Euromed Language Center. Under the direction of Professor Alexander Toshkov, the Euromed Language Center will play a key role in achieving our linguistic and academic goals. Also, thanks to this new agreement, a key component will be dedicated to continuing education. This initiative will allow not only students, but also professionals, to benefit from professional development programs throughout their careers.

International Conference: Mediterranean and Interculturalities: Today's Realities and Future Challenges

The UNESCO Chair of the Euromed University of Fez "Mediterranean Interculturalities" organized on May 24, 2024 an international conference on the theme: "Mediterranean and Interculturalities: realities of today and challenges of the future".

In the presence of Prof. Mansour M'Henni, special guest of this event held within the Eco-campus, a range of participants highlighted different avenues according to which the question of interculturality can constitute a lever for building a Mediterranean reconciled with itself, its peoples and its societies. Thus, the emphasis was placed on the terminologies to be developed to better think of the Mediterranean as a space, historical depth and promise of the future, by approaching the subject from different prisms (in French, English and Spanish).

Likewise, the approaches used, using multiple media (crafts, magazines, literary texts, migration, imagination, communication, etc.), have shown the importance that should be given to training in intercultural values in order to combat exclusion, dogmatism and other forms of extremism that prevent the re-establishment of a Mediterranean considered as a memory of the future.

Visit of Mrs. Carine Foeller Viallon, Consul General of France, to the Euromed University of Fez

The Euromed University of Fez (UEMF) hosted a French delegation, including Ms. Carine Foeller Viallon, Consul General of France in Fez, and Ms. Agnès Humruzian, Director of the French Institute of Morocco, to strengthen Franco-Moroccan relations in education and culture. Under the direction of Professor Mostapha Bousmina, discussions focused on:

- Organization of cultural events: Focused on philosophy and cultural exchanges.
- Strengthening language skills: Intensive programs to improve French.
- Soft skills development: Programs to improve communication, leadership and critical thinking.
- Facilitating student mobility: Partnerships with French universities, scholarships and academic exchanges.

In collaboration with the Agence Universitaire de la Francophonie (AUF) and the University of Paris 1 Panthéon-Sorbonne, this meeting aims to establish an enriching and lasting cooperation, benefiting students and the university community.

UNIVERSITÉ EUROMED DE FÈS

Un engagement sans relâche envers l'innovation et l'excellence

INTELLIGENCE ARTIFICIELLE, …HNOLOGIES ET INNOVATION …AGOGIQUE CARACTÉRISENT …VERSITÉ EUROMED DE FÈS QUI …ELLE DANS LA FORMATION DE …ÉTUDIANTS, PARFAITEMENT …PARÉS POUR AFFRONTER LES DÉFIS DU 21E SIÈCLE.

…lacée sous la Haute Présidence d'Honneur de Sa Majesté le Roi Mohammed VI, l'Université Euromed de Fès (UEMF) se distingue comme une institution d'utilité publique et à but non lucratif, bénéficiant du label de l'Union pour la Méditerranée (UpM) avec le soutien actif de ses 43 pays membres. Reconnue par l'État marocain, l'UEMF offre des diplômes validés internationalement avec des possibilités de double diplomation en partenariat avec les plus prestigieuses universités de l'espace euro-méditerranéen.

DES FORMATIONS D'EXCELLENCE EN SYNERGIE AVEC LES BESOINS DE DÉVELOPPEMENT

Pas moins de 70 formations, toutes accréditées, sont offertes aux jeunes bacheliers et licenciés universitaires leur conférant des diplômes d'Etat, de la licence au doctorat, en passant par tous les autres diplômes intermédiaires. En moyenne, 40% des cours de spécialité sont actuellement donnés en anglais avec l'objectif d'atteindre 50% à l'horizon 2026, en plus de l'enseignement des langues. Plusieurs de ces formations sont proposées en double diplomation avec de prestigieuses universités internationales, notamment en ingénierie, architecture, sciences politiques, droit des affaires… Avec de fortes mobilités étudiantes et enseignantes des deux rives de la Méditerranée. Le profil Euromed qui fait la spécificité de l'UEMF, et qui n'a pas d'équivalent dans d'autres universités, constitue un socle de formation transversal obligatoire pour tous les étudiants favorisant leur multilinguisme, leur multiculturalité, leur mobilité, leurs capacités d'entreprendre et de maîtriser les nouvelles technologies, leur responsabilité sociale et le respect de leur environnement. Le pôle "santé" de l'Université connaît également un développement important, en parfaite synergie avec la réforme du système national de santé, impulsé sous les hautes directives royales. Les domaines d'action et d'application englobent l'agroalimentaire, la production de médicaments, l'ingénierie des protéines, et les pathobiologies en travaillant sur les aspects cellulaire, moléculaire, génétique, immunologique, physiologique et pharmacologique et la fabrication des implants et des dispositifs médicaux notamment par impression 3D. Un Centre Hospitalier Universitaire en phase de création

CONTENU PARTENAIRE

UEMF

UN ÉCO-CAMPUS AUX NORMES INTERNATIONALES

Engagée dans une politique volontariste de développement durable qui lui a valu plusieurs distinctions à l'international, l'UEMF dispose d'un campus unique en son genre dans l'espace euro-méditerranéen et africain. Labellisé Eco-Campus par la COP 22, il est conçu aux meilleurs standards internationaux, respecte les normes du développement durable et s'étale aujourd'hui sur une superficie de 56 hectares, avec une extension programmée à 120 hectares environ dans les toutes prochaines années. La deuxième phase de ce campus sera achevée en été et comprendra notamment un centre de conférences de 3500 places, une cinémathèque, un complexe sportif avec une piscine olympique et une deuxième semi-olympique, un terrain de football aux normes FIFA ainsi que d'autres salles de sports ; toutes ces infrastructures étant ouvertes sur la ville.

UN SYSTÈME ENTREPRENEURIAL DYNAMIQUE ET D'INNOVATION AU SEIN MÊME DU CAMPUS

Deux structures majeures d'innovation, d'incubation et de valorisation des produits de la recherche composent ce système. D'abord, l'Euromed Innovation Center (EIC), un espace qui s'étend sur plus de 1400 m2, intégrant des lieux de coworking modernes connectés à des laboratoires de prototypage de pointe et des salles de conférence optimales pour favoriser le brainstorming et les présentations de projets. Actuellement, le centre compte une capacité d'hébergement de 30 startups en résidence permanente et a la capacité d'accueillir plus de 120 participants lors d'événements d'innovation (Hackathons, Open Innovation Challenges, Venture Building Bootcamps, Design Sprints, Demo Days, etc.). Véritable moteur de transformation qui convertit les concepts novateurs des étudiants, chercheurs et entrepreneurs en solutions pratiques, se focalisant sur les secteurs stratégiques nationaux avec un focus sur la Tech (Tech from Lab to Market to Investment). Il accompagne aujourd'hui 70 startups incubées avec un total de fonds levés sécurisés pour les startups incubées de 7 millions de MAD. En marge de ce soutien, l'EIC garantit des opportunités de financement en mettant en relation les entrepreneurs avec des investisseurs potentiels. Ceci a été rendu possible grâce à la dernière labellisation de l'Euromed Innovation Center par "Tamwilcom" au titre de la 3e édition du "Fonds Innov Invest" (FII) pour les trois premiers segments du cycle de vie des startups, à savoir Ideation, Incubation et Pré-accélération. Cette labellisation permet aux porteurs de projets et entrepreneurs d'accéder à l'offre de l'EIC et de Tamwilcom, notamment à travers les programmes "Tech Start" et "Tech Boost".

Ensuite "Fez Smart Factory -FSF" ; un écosystème de 8000 m2, unique en Afrique dans l'espace universitaire, focalisé sur les innovations dans le secteur de l'industrie 4.0, intégrant des infrastructures dédiées à l'innovation : un incubateur, un accélérateur de startup, des services d'ingénierie, des entités de R&D, RDI et R&T, un Business Center, une usine modèle et des espaces dédiés à la mise en place d'une centaine d'unités d'innovation, le tout orienté industrie 4.0. Fez Smart Factory est le fruit d'une collaboration décentralisée exemplaire entre plusieurs partenaires et dont l'Université Euromed de Fès est le chef de file. L'UEMF dirige également d'ambitieux projets de développement, comme le Pôle Régional d'Innovation et d'Entrepreneurial Agritech pour la région de Fès-Meknès. Ce pôle, soutenu par l'Agence Française de Développement (AFD) via le programme Tamkin L'Tanmia, se concentre sur la promotion de l'innovation au service de l'agriculture. Avec l'appui de plus de 13 partenaires (représentants du secteur public, privé et société civile), le projet vise à l'acculturation numérique de 100 agriculteurs par an et à l'appui de 40 startups dans le domaine de l'Agritech sur une période de deux ans, en leur fournissant les ressources et le soutien nécessaires pour passer du prototype au marché. ■

TELQUEL N°1090 DU 24 AU 30 MAI 2024

Euromed University of Fez is committed to achieving academic excellence and dedicated to pedagogical and technological innovation, offering training programs in synergy with regional and international development needs.

UEMF also has strong research infrastructure, an Eco-campus with international standards and globally recognized degrees, while promoting multiculturalism and multilingualism.

The University stands out for its initiatives in artificial intelligence (AI) and technologies, as well as for a dynamic entrepreneurial system through its innovation and incubation centers that support startups and entrepreneurship, particularly in the Industry 4.0 and Agritech sectors.

Meeting with the Swedish Ambassador to the Euromed University of Fez: Strengthening intercultural ties

On May 23, 2024, Euromed University of Fez hosted a Swedish delegation led by HE Jörgen Karlsson, Swedish Ambassador to Morocco, and HE Charlotta Sparre, Director of the Swedish Dialogue Institute for the Middle East and North Africa. The meeting, which included discussions with students, highlighted the historical collaborations between Morocco and Sweden since 1762 and their shared commitment to intercultural dialogue.

Charlotta Sparre emphasized the importance of technological development and multilateral cooperation to strengthen ties between the two countries. Doctoral students Anoire El Attari and Othman Sqalli Houssaini respectively addressed current challenges related to extremism and Morocco's role in Africa through its South-South cooperation.

The event highlighted the importance of dialogue and multiculturalism, central elements in the strategy of the University and the Swedish Institute, and encouraged students to become agents of change by actively participating in these discussions.

Professor ACHACHI's conference on the foundations of Russian geopolitics

The speaker Dr. ACHACHI, once again hosted a large-scale conference on Russian geopolitics within the framework of the Wednesdays of Philosophy, at the eco-campus of the Euromed University of Fez on May 22, 2024.

During this session, Prof. ACHACHI illustrated the geopolitical evolution of Russia, which intended to access warm seas between the 18th century and the beginning of the 20th century as a pragmatic reaction to the principality of the capital Moscow representing a partitioned steppe land. As a result, Russia wanted to conquer the maximum number of regions and territories to create a regional buffer. Subsequently, Mr. ACHACHI mentioned the concept of the "Russian world" which is added to the West/East logic in order to escape an intrinsic encirclement.

The particularity of this meeting lies in its special momentum because it represents the closing of a cycle of conferences that has crisscrossed the entire academic year and has just been completed by means of a conference that deals with a very formidable topical subject which allowed the audience represented by students, doctoral students and professors, to ask many questions in order to assimilate the current geopolitical situation.

Visit of Swedish Ambassador HE Jörgen Karlsson to the Euromed University of Fez

Euromed University of Fez hosted HE Jörgen Karlsson, Swedish Ambassador to Morocco, to discuss potential future collaborations with the University's President, Prof. Mostapha Bousmina. The meeting focused on topics of mutual interest and explored opportunities for cooperation in areas such as climate change research, immigration, intergenerational dialogue, as well as innovation and entrepreneurship.

Sweden, with its strong diplomatic relations, seeks to strengthen contacts and cooperation with the countries of the MENA region, as evidenced by a dialogue initiative launched in 1997. The Euromed University of Fez shares values of dialogue and multiculturalism with the Swedish Dialogue Institute for the Middle East and North Africa. In 2023, the Institute conducted a participatory process on intergenerational dialogue, aligned with the University's commitment to promoting intercultural dialogue in its research and development projects.

Academic and Scientific Cooperation Agreement between the University of Bangui and UEMF

As part of an academic and scientific collaboration between the Central African Republic and Morocco, the University of Bangui (UB) and the Euromed University of Fez (UEMF) signed a Cooperation Agreement on Thursday, May 16, 2024 at the Eco-campus.

This agreement aims to establish cultural, scientific and educational relations in areas of mutual interest. The main areas of this collaboration include the exchange of researchers, professors, administrative staff and students, the implementation of joint research projects, the sharing of information and teaching materials, the formation of research teams, participation in international projects, co-supervision of theses and dissertations, as well as the joint organization of scientific seminars and conferences.

Both universities are committed to finding the necessary means to achieve these objectives, in compliance with the legal provisions of their respective countries. This agreement marks the beginning of a promising cooperation, intended to be expanded through specific agreements detailing responsibilities and expected results.

Wahid BENKHADDA wins the Best Oral Communication Award at the ISMESH 2024 International Symposium

We are proud to announce that Mr. Wahid BENKHADDA, a fourth-year doctoral student, won the prestigious award for best oral presentation at the ISMESH 2024 International Symposium. This distinction was awarded to him for his outstanding presentation during the event, which was held on May 7 and 8 at the Ecole Supérieure de Technologie in Fez.

Mr. BENKHADDA's participation in this symposium was part of his thesis project in the field of materials and environmental chemistry, in which he raised the issue of olive margins; a widespread problem at the regional, national level but also throughout the Mediterranean basin region.

We extend our sincere congratulations to Mr. Wahid BENKHADDA for this well-deserved recognition, which underlines the commitment of UEMF and its community to academic excellence and innovative research.

Doctoral thesis defense in Artificial Intelligence by Ms. Yasmine GHAZLANE

This doctoral thesis explores anti-drone technology by addressing the gaps in current defense mechanisms against drone proliferation. It proposes a novel anti-drone architecture based on artificial intelligence, blockchain, multi-agent systems, and expert systems. An AI-based electromagnetic neutralization model is developed to counter harmful drones in real time. Real-time detection and identification models, using advanced algorithms and deep learning techniques, are created to quickly identify aerial targets. The thesis also focuses on distinguishing between drones and other aerial targets, such as birds, by developing a "friend or foe" classification model. It also studies the impact of model depth on their classification performance. The "friend or foe" model is integrated into the overall system with a real-time detection module to improve the effectiveness, accuracy, adaptability, and robustness of the anti-drone system in dynamic and complex environments.

Doctoral Thesis Defense in "Additive Manufacturing and Materials Science" by Mr. Patrick MUNYENSANGA

This thesis explores the widespread use of metallic implants in medical and orthopedic surgery, which is faced with limitations such as implant degradation and long-term bonding incompatibilities. To address these limitations, the thesis proposes to improve the interfacial surface of implants, promote faster bone regeneration and better bioactivity, as well as improve biocorrosion resistance. A lightweight and porous metallic implant coated with bioactive glass was developed to stimulate osteogenic cell proliferation, promote bone ingrowth, and overcome structural bonding incompatibilities. The bioactive glass demonstrates the ability to impregnate antibacterial and therapeutic agents essential for osseointegration with the host organism. The results confirmed the formation of a bone-like layer on the implant surface, as well as improved biocorrosion resistance. This surface modification approach shows significant potential for improving the durability of orthopedic implants.

Doctoral thesis defense in Artificial Intelligence by Mr. Abebaw Degu

This thesis explores the use of reinforcement learning (RL) to improve shop floor scheduling in smart manufacturing. Due to the complexity and dynamic nature of modern production environments, traditional scheduling techniques are not sufficient. The thesis proposes a Deep Reinforcement Learning (DRL) model to minimize production duration and a Triple Deep Q Network (TDQN) model for flexible scheduling, taking into account machine breakdowns and other dynamic events. The results show that these approaches improve the efficiency, accuracy, and stability of shop floor scheduling, thus increasing the competitiveness of manufacturers in smart manufacturing.

Elite legal training in Restructuring unrivaled in Africa at UEMF

The Euromed University of Fez and the Sorbonne Law School are organizing the "Restructuring Days" in Fez on May 16 and 17, 2024. This conference, unique in Africa, will bring together more than 250 business leaders, lawyers, judges, and restructuring law experts from France, Morocco, and Sub-Saharan Africa. Professor François-Xavier Lucas and other experts will discuss topics such as the declaration and verification of claims, new developments in bankruptcy law, and developments in security and prevention law.

These days aim to strengthen the partnership between the Euromed University of Fez and the Sorbonne Law School, which offer a dual Master's degree in Business Law. The program is demanding and selective, bringing together students from France, Morocco, and Sub-Saharan Africa. The teaching is dynamic and interactive, including team projects, real-life case studies, and a mandatory internship in a law firm or company. This allows students to acquire practical skills and immerse themselves in the professional world of business law.

Training in Digital Orthodontics at UEMF

The Euromed Faculty of Dental Medicine of the Euromed University of Fez, fully committed to the process of digitalizing all of its programs, successfully concluded, today, May 10, the fourth level of the Diploma in Digital Orthodontics.

This phase of the training focused on the use of digital diagnostics through 3D simulation and treatment software, as well as on the complete mastery of the Invisalign system, treating cases of Class II and III malocclusions, transverse alignment, overbite and open bite. The program also incorporated advanced modules on the use of miniscrews in orthodontics and on innovative therapeutic strategies.

The quality of teaching was ensured by an eminent team of trainers, including Dr. Charafa Bennis, Dr. Aziz Marani Alaoui, Dr. Waddah Sabouni, Prof. Zakaria Bentahar, Prof. Joseph Bouserhal, Dr. Francesco Garino, and Prof. Amal Ouazzani Chahdi.

This certification is not only a guarantee of competence for participants but also an essential milestone for the advancement of contemporary orthodontic practices.

Geopolitical Decryption: Perspectives on Anglo-Saxon geopolitics

Dr. Rachid Achachi, present at the Euromed University of Fez on May 8, addressed the theme of "The foundations of Anglo-Saxon geopolitics" as part of the Philosophy Wednesdays, a regular event within the eco-campus.

During this brainstorming session, Dr. Rachid Achachi explored several crucial aspects of geopolitics. He first presented the key characteristics of the Heartland, then defined the concept of thalassocracy, before comparing the approaches of Mackinder and Spykman. In addition, he examined Huntington's impact on the Anglo-American geopolitical tradition, while questioning whether this tradition is realist or ideological.

Partnership between the Euromed University of Fez and the Paris School of Technology and Business

The Euromed Business School (EBS) of the Euromed University of Fez signed a strategic partnership with the Paris School of Technology and Business (PST&B), a member of the Galileo Global Education network, a leader in higher education in Europe, on May 6. This partnership will allow EBS students to obtain a double degree in the field of Digital Marketing and Data Analytics.

As part of this partnership, EBS students will have the opportunity to complete the first year of the Master's program at UEMF's Euromed Business School and the second year at PST&B in Paris, France. This unique program offers a rich international experience, combining the pedagogical expertise of these two institutions in different cultural and professional environments.

This partnership strengthens the university's efforts in cooperation with international institutions, offering graduates increased recognition in the job market, both nationally and internationally.

Visit of students from the Euromed Faculty of Pharmacy to pharmaceutical laboratories

The visit made by third-year students of the Euromed Faculty of Pharmacy to the pharmaceutical laboratories Maphar, Cooper Maroc and Hikma in Casablanca was an enriching and essential experience for their academic and professional careers.

By having the opportunity to visit these pharmaceutical industries, the students were immersed directly in the heart of the pharmaceutical industry, a sector essential to public health.

This immersion allowed them to observe and understand the complex manufacturing and quality control processes of medicines. Gaining a practical understanding of these processes is crucial to their training and equips our future pharmacists with the skills needed to excel in their future professional careers.

Day of Hierarchical Classification of Secondary Structures of Proteins

The competency-based approach in the Biotechnology Engineering program at EIBB was highlighted during the validation of student projects, particularly around the Hierarchical Classification of Protein Secondary Structures. This project allowed students to apply key skills such as analysis, synthesis, and problem-solving by navigating through 3D structure databases. By combining theory and practice, this approach prepares them to meet the complex challenges of the constantly evolving field of biotechnology, while strengthening their understanding of biological mechanisms and technological applications.

Between Cordoba and Marrakech: a barzakh between Ibn Rochd and Averroes

During the April 17 conference, organized as part of the activities of the UNESCO-EUROMED Chair "Mediterranean Interculturalities" and the "Philosophy Wednesdays" at the Eco-campus, Professor Driss Ksikes explored the rationalist thought of Ibn Rochd (Averroes) through the theme "Between Cordoba and Marrakech: A Barzakh between Ibn Rochd and Averroes." Ksikes, an award-winning writer and playwright, presented excerpts from his novel "At the Strait of Averroes," blending fiction and reality to revisit the transfer of Ibn Rochd's physical and spiritual traces between Marrakech and Cordoba. The conference highlighted how Averroes, by appropriating Aristotle's legacy, created a rupture with both the West and the East, finding himself misunderstood and misunderstood by both. Driss Ksikes emphasized the importance of re-examining Ibn Rochd's thought, which had become alien to dominant ideologies, for its timelessness and relevance today. The exchange with the audience opened up new philosophical perspectives, consolidating the impact of this enriching meeting.

Towards equitable Universal Health Coverage: Focusing on the contribution of nurses

On April 18, 2024, the Euromed Faculty of Nursing and Health Technology at the Euromed University of Fez organized the 2024 edition of the African Conferences, in partnership with SIDIIEF. This event brought together health experts from several African countries to discuss the challenges of Universal Health Coverage (UHC) in Africa. The discussions highlighted best nursing practices and innovations, as well as challenges and solutions to improve access to healthcare on the continent. Interactive panels and networking sessions allowed participants to share their experiences and strengthen their commitment to promoting equitable and sustainable UHC in Africa, while highlighting the importance of international collaboration to address these challenges.

World Oral Health Day celebrated at UEMF

On the occasion of World Oral Health Day, the Euromed University of Fez organized, in partnership with the Moroccan Association for Oral Health Prevention (AMPBD), a study day for the benefit of students of the Euromed Faculty of Dental Medicine and dental health professionals, on Friday, March 15, at the University's Eco-campus.

The event highlighted the importance of oral hygiene practices to prevent oral diseases such as cavities, periodontal disease and tooth loss through lectures and interventions by experts, including Dr. Charafa BENNIS and Dr. Frabcesco GARINO. This day was also marked by the screening of a short film produced by students of the Euromed Faculty of Dental Medicine.

World Oral Health Day also provided an opportunity for dental professionals and health organizations present at the event to promote awareness campaigns, offer screening services, and provide information on dental care.

Participation of Professor Mostapha Bousmina at the International Conference in Rome: training and social cohesion

On March 13, 2024, an event entitled "Higher Education and Social Cohesion for Managing International Demographic Dynamics" was organized in Rome, at the Sistine Chapel, by Multiversity, Pegaso Digital University, and MEDEA. The event brought together influential figures, including Italian President Sergio Mattarella, Maltese President Marie-Louise Coleiro-Preca, and European Commission Vice-President DubravkaŜuica.

Professor Mostapha Bousmina, President of the Euromed University of Fez (UEMF), participated to highlight the importance of cooperation between Europe and Africa in education and vocational training. Luciano Violante, President of Multiversity, emphasized the role of digital universities in promoting skills, social inclusion, and sustainability. Emphasis was placed on the importance of digital training in preparing young African generations to contribute to socio-economic development.

This commitment reflects UEMF's priorities, focused on inclusion, innovation and digital technology, to strengthen training and research.

Visit of a European Union delegation to Morocco at the UEMF

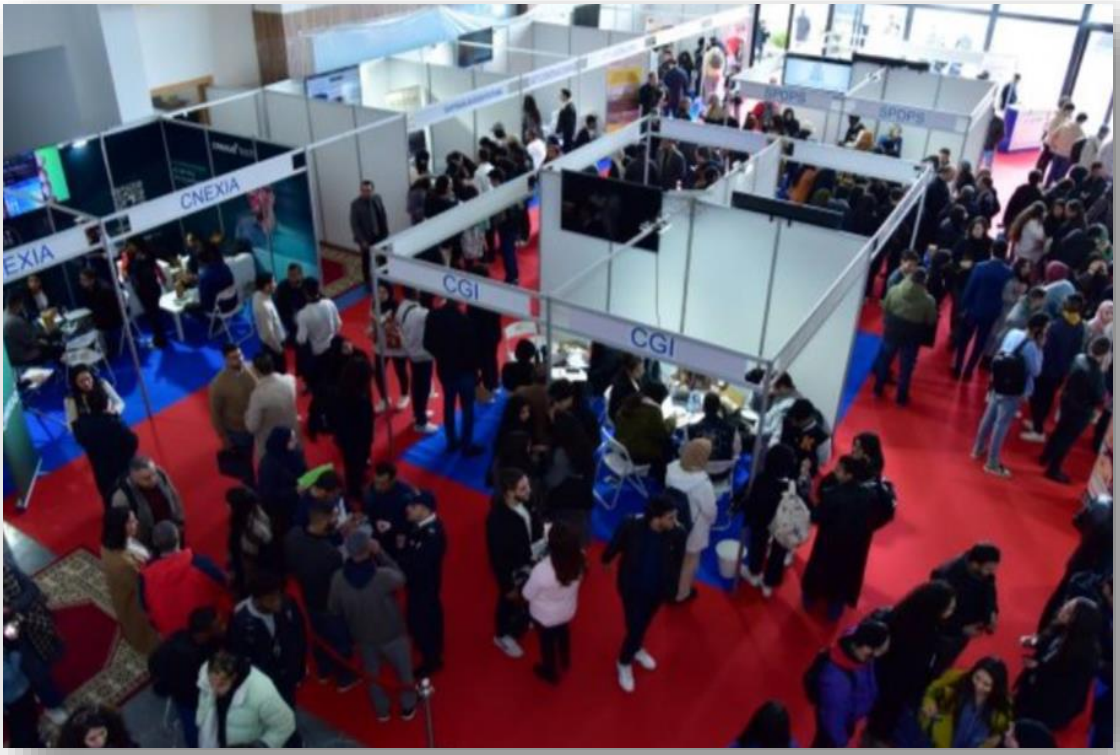

On March 6, 2024, a European Union delegation, composed of Mr. Daniele Dotto, Ms. Lise Paté, and Mr. Rosenheim Adam, visited the Euromed University of Fez (UEMF) as part of the Euro-Mediterranean Partnership. They discussed democracy and the future of European democratic construction with students from the Euromed Institute of Legal and Political Sciences. Mr. Dotto emphasized the EU's commitment to supporting civil societies in transition countries and promoting citizen inclusion in political dialogue.

At the same time, Ms. Paté discussed ongoing collaboration projects between the EU and UEMF with the University's President, Professor Mostapha Bousmina. The visit concluded with a guided tour of the Eco-campus and research infrastructure.

Euromed Career Day: UEMF strengthens its links with the socio-economic world

On February 28, 2024, Euromed University of Fez hosted the second edition of Euromed Career Day at its Eco-campus, bringing together a wide range of companies and human resources professionals. This event aims to facilitate the professional integration of students and graduates by opening doors to the job market. Participating companies included Webhelp, Attijariwafa Bank, Bank of Africa, Safran Aerosystems, and Huawei.

The forum began with a roundtable discussion on the theme of artificial intelligence and its impact on employees in Africa, featuring experts from various sectors. The event also allowed students to interact with recruiters, attend workshops on soft and power skills, and participate in individual interviews. Students from various backgrounds, such as health, artificial intelligence, architecture, and the humanities, had access to coaching programs and professional opportunities. This edition was a great success thanks to the diversity of its activities and the constructive exchanges between recruiters and students.

Round table: The Royal Armed Forces in peacekeeping operations around the world

Euromed University of Fez hosted a lecture on February 27, 2024, hosted by Lieutenant Colonel Mohcine Nadi, a senior officer in the Royal Armed Forces (FAR). The topic discussed was the role of the FAR in peacekeeping operations around the world. Lieutenant Colonel Nadi emphasized that since Morocco's independence, security has been a national priority, leading to the country's continued commitment to the United Nations to support global peace and stability. The FAR's participation in these missions has made Morocco a key partner in promoting peace. The lecture was followed by a discussion with the audience on the role of the FAR and its efforts to strengthen its capabilities in supporting international peace operations.

Between tradition and modernity: what path for Morocco? » Conference by Dr. Rachid ACHACHI

As part of the conference cycle, this Wednesday, February 28, 2024 was marked by a conference by Dr. Rachid ACHACHI around the theme "Between tradition and modernity: what path for Morocco?" within the Eco-campus of the Euromed University of Fez.

During this afternoon, students from various institutions of the University attended a session of reflections from the fields of sociology and ethnology. The speaker took the opportunity to elucidate the distinction between tradition, modernity, and modernization. Mr. ACHACHI also defined archeo-modernity, which is an approach aimed at understanding contemporary society and culture by examining its structures.

With the aim of making this meeting a place for constructive exchange and collective production of knowledge, the audience was able to participate in an enriching debate on the different aspects discussed during this conference.

Visit of a delegation from Pinnacle Teaching Solutions and conference on leadership lessons

On February 22, Euromed University of Fez hosted a delegation from Pinnacle Teaching Solutions, including Dr. Phil Goertzen, Pinnacle Academic Director; Mr. Collin Quigley, Pinnacle Director; and Katie Haynes, Head of Short-Term Academic Programs in Morocco. The team presented the new Pinnacle project, which focuses on online learning. Pinnacle Teaching Solutions is a professional teaching organization committed to excellence in education, collaborating with universities since 1981.

Following this working meeting, Dr. Phil Goertzen gave a lecture entitled "Leadership Lessons Learned: Thoughts on Getting Things Done and Working Across Cultures." The lecture was attended by students from the Euromed Business School (EBS) and the Institute of Legal and Political Sciences (ISJP) of the UEMF, who attended with great interest.

Drawing on his extensive experience working and collaborating with national and international institutions, the speaker shared with the students a set of tools for analyzing knowledge, navigating cultural differences and adapting negotiation styles in different contexts.

The delegation's visit ended with a classroom observation and a meeting with the training teachers of the UEMF Language Center.

International expert in pharmacotoxicology, Dr. Mohammed Bourdi, guest of the UEMF

Organized by the Euromed University of Fez (UEMF) and its component the School of Biomedical Engineering (EIB), a conference under the theme "Preclinical in-vivo and in-vitro studies in drug development" was led by Dr. Mohammed BOURDI, today February 21 at the Eco-campus.

Dr. Mohammed BOURDI is a leading expert pharmacotoxicologist and professor of toxicology at the National Institutes of Health (NIH) Maryland/FAES and Mount St. Mary's University Maryland.

Students and faculty benefited from his extensive knowledge in the field of in vivo and in vitro preclinical studies in drug development, providing valuable insight into crucial aspects of drug research prior to market introduction.

This meeting provided an opportunity to exchange ideas, discuss current advances in the field, and strengthen ties between academic institutions and renowned practitioners. The event enriched the educational framework by providing participants with an in-depth insight into the drug development process, thereby strengthening their understanding of the challenges related to pharmaceutical research.

UEMF students make the voices of young Africans and Euro-Mediterraneans heard before the Parliamentary Assembly of the Union for the Mediterranean

On February 14, 2024, students from the Euromed University of Fez organized a summit under the theme "Euro-Mediterranean and Transatlantic Openness" with more than 200 participants from 30 countries. This summit addressed topics such as energy ethics, sustainable development, transportation, climate change, and African challenges.

The summit culminated in the Call for Investment in the Future, read out on February 16 at the 8th Summit of Speakers of Parliaments of the Union for the Mediterranean. This call underscores the need to strengthen cooperation between Europe and Africa through concrete projects, allocate pledged funds for climate resilience, and support initiatives such as the Nigeria-Morocco gas pipeline.

The students also welcomed Morocco's initiatives for economic integration, infrastructure, and education in Africa, while calling for a "Marshall Plan" for education and research in Africa as an investment in the future to combat poverty, terrorism, and illegal immigration.

UEMF hosts international science dissemination project on antimicrobial resistance and the fight against superbugs

The Micromonde project, developed in 17 countries, aims to bring scientific culture and biomedical research closer to students while promoting a vocation for research. The first edition concluded on the campus of the Euromed University of Fez (UEMF), with the participation of more than 100 students in pharmacy, biomedical engineering, and biotechnology. Supervised by professors from UEMF and the University of Valencia, they conducted experiments to discover new bacterial strains that produce antibiotics.

The project uses a project-based learning (PBL) method to encourage critical thinking and problem-solving. This program is part of international initiatives, such as the Small World Initiative, launched at Yale in 2012 to address the need for new antibiotics in the face of bacterial resistance. The project is supported by various consortia, with international funding and cooperation, and is being rolled out for the first time in Morocco under the UEMF-MicroMondeMaroc initiative.

Conference by Mr. Ghazi Gherairi: What alliances for what world in 2024?

As part of its conference cycle, the Euromed University of Fez organized a meeting led by Mr. Ghazi GHERAIRI on February 7, under the theme "What alliances for what world in 2024?" Mr. GHERAIRI, a doctor of public law and former Tunisian Ambassador to UNESCO, led a collective reflection on the alliances of civilizations and the need for a new, more just and united world order, taking into account the diversity of contemporary societies.

During this conference, Mr. Gherairi addressed crucial issues related to international relations, including the climate crisis, humanitarian crises, and the emergence of new technologies. He emphasized the importance of constructive dialogue and international cooperation to address these challenges and build a peaceful world.

The event also provided an opportunity for students of the Master's program in "Conflict Management and the Alliance of Civilizations" to engage directly with the speaker on the topics discussed. This meeting is part of the activities of the Alliance of Civilizations Chair, created during the United Nations Alliance of Civilizations World Forum in November 2022, with the aim of stimulating reflection and intellectual exchange among UEMF students.

FRANCO-GERMAN VISIT: Opportunities for partnership and cooperation between Europe, Morocco and Africa

On January 30, 2024, the Euromed University of Fez welcomed the Ambassadors of France and Germany to Morocco, Mr. Christophe Lecourtier and Mr. Robert Dölger. After a presentation by the President of the UEMF, Prof. Mostapha Bousmina, on the University's missions in terms of intercultural dialogue and cooperation between the two shores of the Mediterranean, the guests visited the Eco-Campus and its technological facilities.

The ambassadors then shared their views on European foreign policy towards Morocco, addressing political, economic, and security aspects. They also discussed Europe's role as a reliable partner for Africa. This event provided an opportunity for students and lecturers to discuss ways to strengthen cooperation between Morocco, France, and Germany to promote peace and security in the region.

International Conference: “Techniques and Environment”

On January 25, 2024, the ICESCO-Euromed Chair in “Arts, Societies and Civilizations” organized an international conference in collaboration with CETCOPRA of the University of Paris 1 Panthéon-Sorbonne on the theme of “Technology and Environment”. The event brought together Moroccan and international figures, including Dr. Mohamed Zinelabidine of ICESCO, as well as a panel of researchers from the University of Paris 1.

The conference explored multidimensional approaches to responding to social and humanitarian crises, focusing on the interactions between technology, society, ethics, and the environment. Two discussion sessions were organized: one on the use of technology in emergency situations, and the other on the social issues related to technology.

This meeting provided a platform for enriching debates between speakers, teacher-researchers and students from the Euromed University of Fez.

Conference by Bernard LUGAN: "Colonization and territorial amputations in Morocco"

Bernard Lugan, an expert in history and geopolitics, was welcomed on January 25, 2024 at the Euromed University of Fez for a conference entitled "Colonization and territorial amputations of Morocco", as part of the University's Conference Cycle.

He presented a detailed analysis of the failures and successes of Morocco's reunification, as well as the origins of the conflict over the Moroccan Sahara, highlighting the impact of colonial decisions on the country's territories. Lugan highlighted the crucial role of Kings Mohammed V, Hassan II, and Mohammed VI in this process.

The event also allowed Mr. Lugan to sign his book "History of Morocco: From the Origins to the Present Day," providing a summary of the historical, political, religious and socio-cultural evolution of Morocco.

Participants, including students and research professors, had the opportunity to engage in an enriching debate on various geopolitical issues. Following the conference, Professor Lugan was invited to tour the Eco-Campus and its research platforms.

Information and orientation week for students at GSU Jean-de-La-Fontaine

In order to promote its training offer and the wide range of professional courses providing access to it, the Euromed University of Fez is taking part in a week of information and guidance for students of the GSU Jean-de-la-Fontaine in Fez, as well as their parents.

The opening speech was delivered by Professor Taoufik OUAZZANI CHAHDI, Vice-President in charge of Academic and Cultural Affairs at UEMF, who presented the program for the coming week, emphasizing the importance of the presence of the university teams within the GSU.

The goal of this initiative is to create a meaningful opportunity to inspire, inform, and engage the next generation of students. By providing information, guidance, and insights into academic and career opportunities, the goal is to guide students on their educational journey while motivating them to explore new and exciting horizons.

The week includes several components, including workshops led by UEMF teachers, covering the university's various teaching fields such as health, engineering and architecture, as well as humanities and social sciences. Also on the program are tours outside the GSU premises, videoconferences led by alumni, and discussion spaces available for parents.

Euromed Innovation Center: UEMF inaugurates its new innovation center (EIC)

The Euromed University of Fez has announced the creation of the Euromed Innovation Center (EIC), a support structure dedicated to the creators of innovative projects. The selection committee evaluates projects based on their scientific and innovative nature, as well as the technical, entrepreneurial, and managerial skills of the project leaders.

The EIC aims to provide personalized support throughout the business creation process, including inspiring events, diverse training, and privileged access to university resources. This center positions itself as a catalyst for innovation, both regionally and nationally, contributing to the importance of universities in the technological and entrepreneurial landscape.

Labeled by "Tamwilcom" among the four SAP structures at the national level in the "Ideation" segment, the EIC allows project leaders to access programs such as "Tech Start" and "Tech Boost", thus reinforcing the center's commitment to transforming innovative ideas into successful startups.

National Scientific Conference: Politics and Digital: Collision or Collusion?

On December 19, the Euromed Institute of Legal and Political Sciences (IESJP) organized a scientific conference at the Euromed University of Fez on the theme "Politics and Digital: Collision or Collusion?" The event brought together experts in law, politics, education, and sociology to discuss the impact of digital technology on the relationship between rulers and the governed, and the transformation of the state in the digital age.

The conference was structured around four sessions. The first focused on communication issues, particularly journalism and political marketing. The second addressed democratic renewal and youth political engagement through digital technology. The third session explored legal issues in the era of GAFAM and data protection. Finally, the fourth session addressed public governance in the digital age and its impact on user and investor trust, as well as on entrepreneurship.

This conference enabled constructive exchanges between experts, teacher-researchers and students, around the relationship between politics and digitalization.

"The mausoleum of Georgi Dimitrov as a place of memory" with Pr. Maria Todorova

As part of the lecture series organized by the Euromed University of Fez, Maria Todorova, renowned historian and eminent professor at the American University of Illinois Urbana-Champaign, captivated the audience this Wednesday, December 20, by addressing the theme "Blowing up the Past: The mausoleum of Georgi Dimitrov as a place of memory."

During her presentation, Ms. Todorova took an in-depth look at the Georgi Dimitrov Mausoleum as an emblematic place of memory, focusing on its role in the construction and deconstruction of Bulgarian national identity. She also analyzed the different representations of the past conveyed by this historical symbol and their impact on the collective consciousness.

This conference provided an opportunity for reflection and intellectual exchange, allowing students to deepen their understanding of collective memory, its challenges, and its influence on the construction of history and national identities. The Euromed University of Fez distinguished itself once again by inviting an internationally renowned expert to share her expertise and stimulate critical thinking within its academic community.

EMADU: “Faces & Faces” Exhibition

The Euromed School of Architecture, Design, and Urban Planning (EMADU) illuminated its spaces with the "Faces & Faces" exhibition. Showcasing the artistic talents of first-year Architecture and Design students, this exhibition captivated visitors by immersing them in a vibrant and striking visual world. Each canvas on display was a window onto the soul, where gazes, smiles, and frozen expressions testified to the richness and complexity of human beings.

She celebrated the uniqueness of each person and appreciated the richness of the human condition. EMADU students showcased their talent by creatively and sensitively capturing the complexity of the human soul through these inspiring portraits. This visual experience certainly touched the minds and hearts of visitors, inspiring them to reflect on the diversity and beauty behind every face.

Launch of new professional training courses at EMADU

The Euromed University of Fez, through the Euromed School of Architecture, Design and Urban Planning, is launching a continuing education program in hospital architectural programming and architectural and urban planning, intended for architects, engineers, and hospital managers. This training, open nationally and internationally, aims to master programming, a crucial stage of the architectural process, where the programmer translates the project owner's needs into a realistic program, taking into account budgetary, social, environmental, and regulatory constraints. The program combines theory and practical cases to train participants to anticipate and avoid unforeseen events and cost and deadline overruns.

Launch of new professional DUs at ISJP

Euromed University of Fez is launching two professional university degrees in Land Law and Real Estate Management and Banking and Financial Techniques as part of its continuing education. The first degree aims to provide legal and technical expertise in land law for careers in sectors such as land conservation, notarial work, and real estate development, strengthening investment security. The second degree meets the needs of the financial sector by training professionals in banking and financial techniques, ensuring their mastery of legal and financial tools in compliance with regulations. These training courses are intended for professionals and students wishing to deepen their skills in the real estate and financial fields.

Signing of the financing agreement for the "Factory Pilot School 4.0" project co-financed by the KFW subsidiary, the Investment Facility for Employment (IFE)

On July 2, 2024, the EuroMed University of Fez (UEMF) and the Investment Facility for Employment (IFE) signed a financing agreement for the Pilot School Factory 4.0. This project, co-financed by the IFE (37.58 million DH, or 3.51 M€) and l'UEMF (own contribution of 30%), mobilizes a total investment of 53.2 million DH (4.97 M€) to build a training centeredie hasIndustry 4.0.

This center, which is expected to open in September 2026, will train 585 graduates and strengthen the skills of more than 1,100 professionals in its first three years of operation, creating 541 new jobs. It is part of the national digital transformation strategy and aims to support Morocco's industrial growth, particularly in the Fez-Meknes region, by offering specialized training for young graduates and professionals.

This signature marks the beginning of several similar projects financed by the IFE, in partnership with Moroccan institutional and industrial players, as part of the development of training infrastructures for the industry of tomorrow.

PNDL Pilot Cohort at the Euromed University of Fez: Towards a New Era of Higher Education Governance

Launch of the pilot cohort of the National Leadership Development Program (PNDL) at the Euromed University of Fez, a key player in the implementation of the Erasmus+ CBHE project "Moroccan Higher Education Leadership – MORHEL. This is an ambitious project, coordinated by AUI, UEMF and UMI, aimed at strengthening the capacities of leaders of Moroccan higher education institutions (IES) in governance, strategic planning and management.

Following the opening remarks by Prof. Salim Bounou, Vice-President in charge of Research-Innovation and Partnerships, a series of training sessions led by professors from UM6P and IAV provided participants with a detailed analysis of the current landscape of higher education in Morocco, aimed at equipping future leaders with an in-depth knowledge of the challenges and opportunities present.

The cohort, composed of professors, administrative staff, and key figures in higher education, aims to develop leadership skills to effectively contribute to the development of higher education in Morocco. The initiative aims to train leaders capable of implementing significant improvements in their institutions, particularly in governance, strategic planning, and management.

Cooperation and Strategic Alliance between UEMF and EMUNI

As part of their commitment to the objectives of the Euro-Mediterranean Partnership, the Euromed University of Fez (UEMF) and the Euro-Mediterranean University (EMUNI) agree to enter into a strategic alliance to promote the flow of knowledge between the shores of the Mediterranean and to cooperate within the framework of this agreement. They will encourage long-term mutual cooperation in the fields of higher education, research, and innovation in order to consolidate the Barcelona Process, which, in a broader sense, is also integrated into the Union for the Mediterranean.

The Parties will promote the dissemination of knowledge through joint educational, cultural, and scientific activities. To this end, they will use instruments such as joint applications for and implementation of international scientific and technical projects, the development and implementation of joint or dual study programs, and the exchange of students and academic and administrative staff. Other initiatives will include the exchange of expert and research missions, the development of modules in Euro-Mediterranean studies, and the launch of strategic courses. They will also engage in science diplomacy, the expansion of joint academic offerings, the organization of scientific events, and the joint use of educational and scientific resources, as well as any other cooperative activities agreed upon by the Parties.

Third Entrepreneurship Training Workshop of the Link Up Africa Program at UEMF

On July 17 and 18, 2024, the Euromed Innovation Center (EIC), an innovation center at the Euromed University of Fez, hosted its third entrepreneurship training workshop as part of the Link Up Africa pre-incubation program. Funded by the European Union and implemented by AMCI and the Belgian agency Enabel, this event aims to support project leaders in creating their businesses, whether in Morocco or in their native country for students and graduates from sub-Saharan African countries.

At the heart of this training, participants explored value creation and structuring their business model. They also honed their pitching skills, essential for capturing investors' attention. The intensive sessions, led by EIC experts and mentors, enabled budding entrepreneurs to refine their value proposition, develop their presentation skills, and build a solid business model.

This workshop offered a unique opportunity for students and winners to prepare their projects for pitch sessions in front of a panel of experts. The best projects will be selected to join the pre-incubation program, an invaluable opportunity for young entrepreneurs to turn their ideas into reality.

[Integration Week] Dynamic Welcome Week Starts at UEMF

Euromed University of Fez is delighted to announce the organization of its traditional Integration Week, which will take place from September 17 to 21, 2024. This event, specially designed for new students, aims to facilitate their transition to university life and promote a community spirit within the Eco-campus, a favorable setting for successful integration.

During this week, numerous activities are planned, ranging from information sessions on the services offered by the university to personal and professional development workshops. Thematic lectures, led by renowned professors and professionals, will offer students a better understanding of the academic and professional challenges that await them.

At the same time, recreational and sporting activities will complement this program, fostering cohesion between newcomers and alumni. These friendly moments will allow everyone to build relationships and immerse themselves in the values of openness, diversity, and excellence that characterize UEMF.

This week represents a unique opportunity for students to start their university career in the best possible conditions, surrounded by a caring and dynamic community.

[Integration Week] Conference on the Successful Transition to Higher Education

On Friday, September 20, as part of the integration week at the Euromed University of Fez, Dr. Assia Fadili, Psychiatrist, led a conference entitled "Successful Transition to Higher Education - Practical Tools & Strategies" for the benefit of new students of the Health Center. The event focused on the major challenges new students face during their transition to higher education, including stress management and well-being.

Dr. Fadili shared practical strategies to help students better manage academic pressure and adapt effectively to their new environment. She also discussed the importance of balancing personal life and academic demands.

This conference is part of UEMF's commitment to supporting its students in their studies and providing them with the tools they need to successfully transition to higher education. In the presence of distinguished Professor Mustapha Fadili, the discussion was also enriched by a contribution that was both scholarly and moving.

The event concluded with practical advice on time management and priority setting, essential for a successful transition. Speakers emphasized the importance of taking advantage of available campus resources to ensure a successful integration into the university.

Stanford Ranking 2024 of the World's Top 2% Scientists

Four researchers from the Euromed University of Fez are ranked among the top 2% of scientists in the world according to the international ranking of the prestigious American university Stanford.

This international ranking is based on the impact of research carried out by researchers and recognized by the international scientific community through citations in the global SCOPUS database.

It is worth noting that the prestigious American University Stanford annually establishes the ranking of the most influential researchers in the world among more than 8 million researchers. This year, four researchers from the Euromed University of Fez are ranked among the top 2% of researchers in the world. They are Prof. Mostapha Bousmina, President of the UEMF, Prof. Belkheir Hammouti, Professor and Researcher at the UEMF, Prof. Abdelkrim El Kadib, Professor and Researcher at the UEMF, and Prof. Chakib Nejjari, Vice President in charge of the Health Division.

Congratulations to the four researchers and to other researchers from various Moroccan universities who are promoting national research and bringing their added value to global scientific research.

Franco-Moroccan Conference on Business Law

The conference, co-organized by the Euromed University of Fez (UEMF) and the Law and Commerce Association, under the theme "Franco-Moroccan Cross-Perspectives on Business Law," brought together renowned experts from both shores of the Mediterranean to discuss contemporary legal issues in business law. This event highlighted Franco-Moroccan collaboration and provided a valuable platform for exchanging views on legal practices, particularly in the areas of arbitration, contract law, and financing.

The opening ceremony was marked by speeches by prominent figures, such as Professor François-Xavier Lucas, Director of the Sorbonne Law School's outsourced program at UEMF, and Mr. Antoine Diesbecq, President of the Law & Commerce Association. The presence of Mrs. Carine Foeller Viallon, Consul General of France in Fez, as well as numerous jurists, lawyers, and researchers, reinforced the international and academic dimension of the event, highlighting the importance of cooperation between France and Morocco in the legal field.

Xavier Driencourt's lecture at the UEMF on "The Enigma of Algeria"

Euromed University of Fez welcomes Xavier Driencourt for a conference on his new book "Enigma of Algeria"

The Euromed University of Fez (UEMF) had the honor of welcoming HE Mr. Xavier Driencourt, former French Ambassador to Algeria, for an exceptional conference dedicated to his latest book, Enigma of Algeria. The event, organized in the presence of the President of the UEMF, Prof. Mostapha Bousmina, as well as several Vice-Presidents and Research Professors, brought together an audience of enthusiasts of geopolitical issues and contemporary Algerian history.

The conference allowed Mr. Driencourt to deliver an in-depth and nuanced analysis of contemporary Algeria, exploring the multiple facets of its political, economic, and social history, as well as the country's future prospects. In his presentation, he addressed the challenges facing contemporary Algeria.

UEMF executives and researchers enriched the debate by asking incisive questions and sharing multidisciplinary perspectives on the issues raised by the author. This discussion offered a comparative analysis of regional dynamics, consolidating UEMF's role as a platform for reflection on current issues in the Maghreb and the Mediterranean.

The event concluded with a book signing session, during which Mr. Driencourt interacted directly with the participants, offering everyone a special moment to discuss his work.

Conference at UEMF: Art Therapies and Cultural Inclusion with ICESCO

The Euromed University of Fez (UEMF) was honored to host the "World Thinkers Invited to ICESCO" conference, bringing together international experts in art therapy and music therapy. This event, organized in partnership with the Islamic World Educational, Scientific, and Cultural Organization (ICESCO), addressed key issues surrounding art therapy, cultural inclusion, and the rights of people with disabilities.

Speakers included renowned figures such as Professor Emeritus Edith Lecourt, a pioneer in music therapy and founder of university art therapy programs, and André Fertier, a fervent defender of cultural rights. The program included lively lectures and discussions, focusing on art therapy training methods, music therapy as a cultural therapy, and the importance of ensuring access to artistic culture for all.

The event, which took place at the UEMF premises before continuing in Rabat, demonstrates the Euromed University of Fez's commitment to promoting inclusive culture and well-being through the arts.

Morality and Ethics: A Reflection with Pr. Rachid ACHACHI

The Euromed University of Fez's lecture series continues with a new, exciting session led by Professor Rachid ACHACHI, faithful to his habit of intellectual exchanges with students and faculty.

During this conference on November 20, 2024, Prof. ACHACHI addressed the theme "Morality and Ethics," exploring the links between moral principles and contemporary ethical challenges. Through an in-depth reflection, he invited participants to reflect on the foundations of morality and ethical issues in today's world, while emphasizing the importance of these concepts in building a just and equitable society.

As usual, this meeting provided a stimulating framework for dialogue and the exchange of points of view, thus enriching the academic experience of the students and teacher-researchers present.

Montpellier Business School Hosted at the Euromed University of Fez

As part of the Progression Agreement signed between the Euromed University of Fez (UEMF) and Montpellier Business School (MBS), the UEMF was pleased to welcome a representative from MBS on November 13th for a meeting dedicated to Euromed Business School (EBS) students. This exchange is part of an academic cooperation approach aimed at strengthening the international perspectives of our students.

During this visit, the MBS representative presented in detail the opportunities offered by the dual degree program between the two institutions. This new partnership allows EBS students, at the end of their five years of post-baccalaureate studies, to obtain:

- the Grande École Program in Management diploma issued by UEMF; - the equivalent diploma from Montpellier Business School; - the Master of Science (MSc.) from MBS, opening doors to international careers.

This program provides an exceptional springboard for our students, allowing them to benefit from dual academic expertise and develop world-class skills in a multicultural environment.

Epistemological, Historical and Ethical Perspectives on AI: Lecture by Dr. Llored

On Monday, November 13, 2024, the Euromed University of Fez hosted a conference led by Dr. Jean-Pierre Noël LLORED. Entitled "Epistemological, Historical, and Ethical Perspectives of AI," this presentation was part of the "RDV de la Philosophie" (Philosophy Meetings).

Before a captivated audience, Dr. LLORED explored the epistemological foundations of artificial intelligence, tracing its historical evolution and addressing the major ethical issues it raises. The event was marked by rich exchanges between the speaker and the participants, allowing for a better understanding of the challenges posed by this technology in our current society.

The "RDV de la Philosophie" continue to provide a space for reflection and dialogue open to all, around major contemporary issues.

https://ueuromed.org/actualites/cycle-de-conferences/perspectives-epistemologiques-historiques-et-ethiques-de-lia

Welcome to the School of Critical Thinking at UEMF

As part of its collaboration with the Agence Universitaire de la Francophonie (AUF) for the holding of the "RDV de la Philosophie", the Euromed University of Fez is honored to host the School of Critical Thinking, a program dedicated to Moroccan doctoral students or those residing in Morocco. This academic meeting will take place from Monday, November 11 to Thursday, November 14, 2024, and will bring together selected participants to strengthen their skills in analysis and critical thinking.

We warmly thank all the registered doctoral students who will be our guests throughout this period and welcome them to the UEMF.

At the same time, the "Night of Philosophy," organized by the French Institute, will be held on Wednesday, November 13, from 7 p.m. to 11 p.m. at the Palais des Congrès. This cultural event is open to the entire UEMF community, offering a unique opportunity to discuss philosophical questions in a friendly atmosphere.

Promising Visit: Strengthening Moroccan-German Academic Partnerships

The Euromed University of Fez had the honor of welcoming His Excellency Mr. Robert Dölger, Ambassador of the Federal Republic of Germany to Morocco, accompanied by an official delegation, as well as representatives of the German Goethe Cultural Center.

This meeting, rich in exchanges, provided an opportunity to discuss opportunities for collaboration between Germany and the Euromed University of Fez. Discussions focused on strengthening academic mobility for students and teachers, with the aim of creating bridges to renowned German institutions.

Furthermore, this visit was an opportunity to explore new avenues of collaboration, particularly in the field of foreign language learning. After the partnership established with the University of Oxford for the preparation and delivery of the TOEFL following the learning of English, the Euromed University of Fez is now moving towards a strategic partnership with the Goethe-Institut. This partnership will allow students to learn the German language, enriched by internationally recognized certifications.

This is an important step in building a lasting partnership between UEMF and German stakeholders, fully in line with the Euro-Mediterranean mission of our university.

EMADU immersed in the El Jadida International Building Exhibition

As part of EMADU's extracurricular activities, 6th-year students, accompanied by the director of training, visited the SIB in El Jadida. This visit is part of the school's openness to its socio-professional environment in order to professionally integrate future EMADU graduates.

This visit also aims to assist students in the discovery process of different materials and new technologies in the fields of architecture/design and construction in general.

Partnership concluded between UEMF and Tech Education Rights and Technologies

On November 27, 2024, the Euromed University of Fez (UEMF) and the Spanish group TECH signed a strategic partnership to jointly develop virtual, multilingual, and dual-degree educational programs. This partnership aims to promote new teaching models and enrich UEMF's academic offerings, particularly online, from undergraduate to doctoral levels. TECH will make its educational and technological resources available in French and English and will contribute to the continuing education of students and professionals. This project is part of UEMF's commitment to providing quality distance learning, in collaboration with renowned international partners.

Youth Meetings on the Alliance of Civilizations

In February, the Euromed University of Fez organized the first African and Euro-Mediterranean Youth Summit in Rabat, on the sidelines of the Summit of Presidents of the Parliaments of the Union for the Mediterranean. This event aimed to promote a global vision based on peace, solidarity, and cooperation in the face of current crises.

The December 6, 2024 edition extended this initiative by focusing on North-South cooperation and Euro-Mediterranean relations. Prior to this, UEMF students from diverse backgrounds worked on immigration issues, with the support of the Alliance of Civilizations Chair. Their reflections resulted in some twenty presentations, presented as part of the Euromed University of Fez Meetings on the theme: "Rebuilding trust for a united and plural world."

Human Rights: A Look at Moroccan Constitutionalism

On the occasion of International Human Rights Day, the Euromed Institute of Legal and Political Studies organized a conference on "Human Rights in the Parliamentary Constitutional System" on Tuesday, December 10. This conference was moderated by Mr. Abderrahmane LAMRANI, President of the Fez Meknes Regional Human Rights Commission, former member of the House of Representatives and University Professor.

The speaker highlighted the different generations of human rights before showing the legal and institutional anchoring of the question of rights and freedoms in Moroccan constitutionalism.

Euromed University of Fez shines in the AD Scientific Index ranking: A recognition of scientific excellence

New and remarkable recognition for the Euromed University of Fez. A remarkable distinction in the AD Scientific Index ranking, coming 3rd among the 47 Moroccan universities evaluated. The first two positions go to historical institutions, the Mohammed V University of Rabat and the Hassan II University of Casablanca, closely followed by the UEMF, a young institution that has quickly positioned itself as a key player in the fields of research and innovation, with 8 scientists and research professors in the top 10% for Rabat, 5 for Casablanca and 3 for the UEMF.

This ranking is based on rigorous criteria, including the Total H-Index, the Last 6 Years H-Index, the Total i10 Index, the Last 6 Years i10 Index, as well as the Total Number of Citations and the Last 6 Years Citations.

With this distinction, the UEMF will continue to strengthen its influence through innovation, knowledge and science.

https://www.linkedin.com/posts/universit-euro-m-diterran-enne-de-f-s_nouvelle-et-belle-consecration-pour-luniversité-activity-7310629907414347776-3fUf?utm_source=share&utm_medium=member_desktop&rcm=ACoAADTGRfcBC1u9wYbkACypuAdXhOuzPcQwP94

Euromed University of Fez joins the prestigious AACSB network

Euromed University of Fez (UEMF) is now a member of the Association to Advance Collegiate Schools of Business (AACSB), a leading international organization dedicated to excellence in management education. This membership places UEMF alongside the world's most influential institutions in this field, strengthening its international reach.

Recognized for its demanding standards and its major role in improving the quality of management education, the AACSB brings together a vast network of universities and schools that are pioneers in innovation and research. UEMF's integration into this network demonstrates its commitment to providing training that meets the highest standards of excellence.

This milestone once again underlines UEMF's position as a key player in the international academic landscape.

Excelia, a prestigious French higher education group, hosted at the Euromed University of Fez

As part of the partnership established between the Euromed University of Fez (UEMF) and Excelia, a prestigious French higher education group, which includes a triple-accredited AACSB, EQUIS, AMBA Business School, a TEDQUAL-accredited Tourism School, and a Communication School, we had the pleasure of welcoming our partner for a session specially organized for the benefit of our students at the Euromed Business School (EBS).

This exchange is part of an academic cooperation approach aimed at strengthening the international prospects of our students. During this visit, the Excelia representative presented in detail the opportunities offered by the dual degree program between the two institutions.

This new partnership allows EBS students, at the end of their five years of post-baccalaureate studies, to obtain:

- Diploma from the Grande École Program in Management issued by UEMF;
- Equivalent diploma from Excelia.

This program provides a springboard for our students, allowing them to benefit from dual academic expertise and develop world-class skills in a multicultural environment.

Graduation Ceremony of the IESJP and Paris 1 Panthéon-Sorbonne

The Euromed Institute of Legal and Political Sciences (IESJP) celebrated academic excellence at the graduation ceremony for the 2023-2024 undergraduate class, held on December 18, 2024.

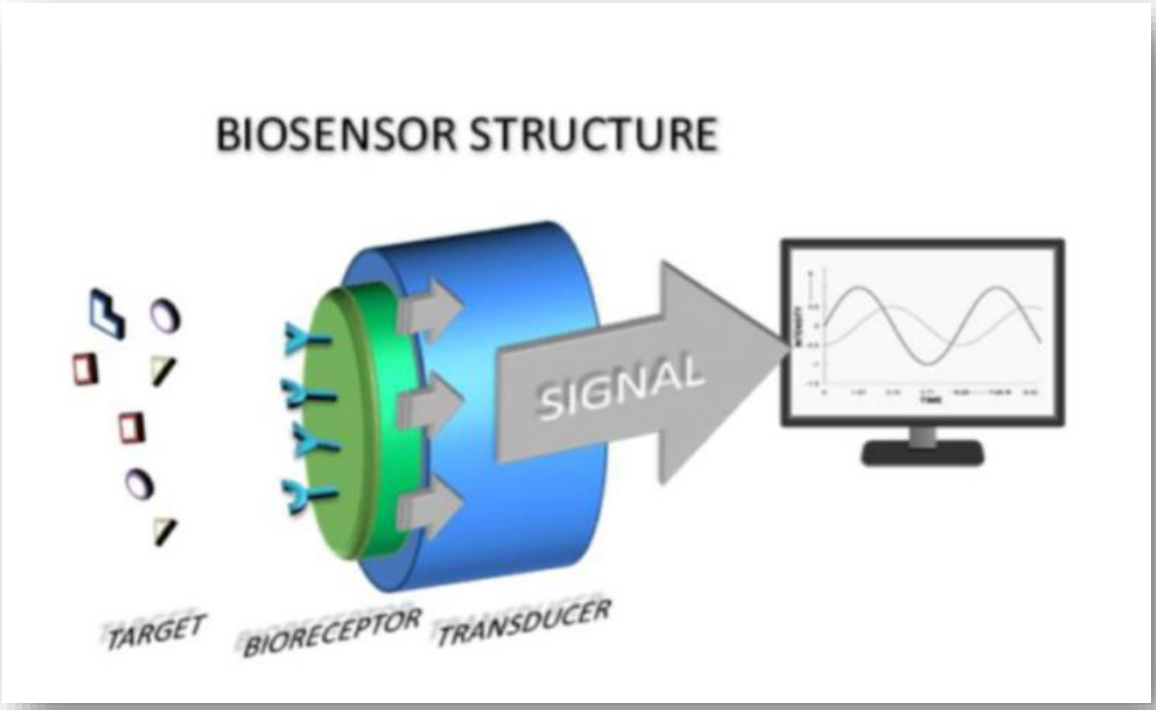

This prestigious event is part of the strategic partnership and dual degree agreement between the Euromed University of Fez (UEMF) and the University of Paris 1 Panthéon-Sorbonne. This exceptional collaboration, which symbolizes the synergy between two renowned institutions, demonstrates the commitment of both institutions to providing their students with excellent training that meets international standards.

The laureates, who have completed rigorous and enriching academic programs, embody the success and talent of this academic alliance. Through this ceremony, the UEMF, through its Institute, reaffirms its mission to prepare a legal and political elite capable of meeting global challenges.

Warmest congratulations to our dear winners for this well-deserved achievement, the fruit of their perseverance and efforts. We wish them a bright future and a successful career. Has a context menu.

Doctoral Thesis Defense in Materials Science and Modeling by Ms. Nidal EL BIYARI

"Design, Modeling and Realization of Optofluidic Sensors Based on Surface Plasmon Resonance for Precision Sensing."

This thesis focuses on the development of high-performance optofluidic biosensors based on the surface plasmon resonance (SPR) phenomenon. A novel golden ratio approach was proposed to optimize the geometric properties of a gold-silver bimetallic configuration, achieving rapid optimization with enhanced sensitivity and resolution.

Additionally, a dual-mode plasmonic configuration combining guided modes in a dielectric waveguide and plasmonic modes on a gold film was studied. This configuration generates a detection mode (PIT) with high performance and a reference mode (TM1) to improve measurement reliability by minimizing false positives.

Finally, a new approach for microfluidic system manufacturing using stereolithography additive manufacturing was developed, integrating real-time temperature control. This method improved the mechanical and structural properties of microfluidic chips, making them highly suitable for biosensing applications, as confirmed by microscopic analyzes and mechanical tests.

Study in Canada: A gateway to academic excellence with UEMF

As part of its commitment to promoting international mobility for its students, the Euromed University of Fez facilitates access to prestigious initiatives such as the Scholarships for Study in Canada. This program, under the auspices of Global Affairs Canada, aims to offer short-term academic exchanges to master's and doctoral students.

These scholarships not only enable students to pursue studies or conduct research in Canada, but also strengthen international collaborations in the fields of education and research. They contribute to enriching Canada's bilateral relations with its partners and promoting academic excellence worldwide.

UEMF remains a link between its students and these international opportunities, helping them become competitive players on the global stage.

UNESCO-Euromed Chair in Mediterranean Interculturalities: Security and Sustainable Development

The Euromed University of Fez organized a conference on the theme "Security in the Mediterranean and Sustainable Development," led by Professor Abderrahman Tenkoul as part of the UNESCO-Euromed Chair. The event highlighted the risks associated with climate change, regional security issues, and challenges specific to the Mediterranean (unemployment, migration, health autonomy, etc.). Professor Tenkoul emphasized the need for a comprehensive and sustainable approach, valuing Mediterranean traditions and promoting innovative resource management. The final call emphasized the importance of collective action to build a safer and more sustainable future for the region.

New Academic Collaboration between the Euromed University of Fez and the University of Surrey

Euromed University of Fez (UEMF) is proud to announce its partnership with the University of Surrey, a prestigious institution in the United Kingdom, recognized for its academic excellence and innovative programs.

This strategic partnership opens up new opportunities for UEMF students, particularly in the field of Civil Engineering. Thanks to this agreement, students who have completed their Civil Engineering studies at UEMF can now access world-renowned programs, such as the MSc and BEng in Civil Engineering at the University of Surrey.

With this partnership, UEMF reaffirms its commitment to offering its students academic and professional opportunities of international stature. This collaboration not only strengthens student mobility, but also promotes excellence and innovation in training and research.

An exceptional evening in tribute to Frank Sinatra

The Euromed University of Fez, in partnership with the Royal Symphony Orchestra, recently orchestrated an exceptional musical evening, celebrating the timeless legacy of Frank Sinatra. This event, marked by elegance and emotion, brought together an audience of music lovers who came to savor the greatest classics of Ol' Blue Eyes..

At the heart of this performance, the Royal Symphony Orchestra's Jazz Band, accompanied by renowned vocalist Sergey Arkhipov, delivered masterful performances that captivated the audience. The performer's warm voice, combined with the musicians' virtuosity, brought iconic songs such as "Fly Me to the Moon," "Sway," and "New York" to life, transporting the audience to the heart of the great jazz scenes that defined the 20th century.

Through this event, the Euromed University of Fez once again confirms its commitment to promoting culture and the arts, offering the university community and the general public exceptional moments that nourish the soul and spirit..

The French Institute of Fez and the Euromed University of Fez strengthen their partnership

The Euromed University of Fez (UEMF) welcomed Ms. Carine Foeller Viallon, Consul General of France in Fez, to formalize the renewal of the partnership agreement with the French Institute of Fez. This agreement aims to strengthen language teaching with certification through the UEMF language center, in line with academic and professional needs.

The collaboration also includes joint cultural programming for the university community and the general public. With its modern infrastructure, such as a 2,000-seat agora and cultural spaces under construction (theatre and cinema), the UEMF is positioning itself as a major player in educational and cultural cooperation. This partnership illustrates the shared commitment to intercultural dialogue and the influence of Franco-Moroccan cooperation.

Visit of a delegation from the University of Quebec in Trois-Rivières (UQTR)

The Euromed University of Fez (UEMF) was pleased to welcome a delegation from the University of Quebec in Trois-Rivières (UQTR), led by its Vice-Rector for Research and Development. This meeting strengthened scientific ties between the two institutions and laid the foundations for a promising collaboration in the field of impactful and engaging scientific research.

During this visit, researchers and professors from UEMF and UQTR discussed advances and opportunities for cooperation in the following areas: medicinal chemistry, materials chemistry, management, artificial intelligence, nursing sciences, electrical engineering, renewable energies and green hydrogen.

This meeting provided an opportunity to explore new perspectives for cooperation, with a shared ambition to provide concrete solutions to current challenges through research and education. UEMF welcomes this collaborative dynamic and is committed to continuing to develop this strategic partnership with UQTR.

Nobel Laureates Gather at UEMF: Discussing Advances in Quantum Physics and Laser Technologies

On February 27, 2025, the Euromed University of Fez (UEMF) hosted a high-level scientific roundtable, bringing together world experts in quantum physics and laser technologies. Speakers included Nobel laureates Alain Aspect and Serge Haroche, as well as Eugene Polzik of the Niels Bohr Institute. The event addressed topics such as quantum entanglement, quantum simulations, and the applications of lasers in fields such as quantum computing and secure communications.

This meeting highlighted recent advances in quantum and optical physics, while exploring the challenges of bringing these innovations to fruition. It reinforced UEMF's role as a key player in international scientific research, providing a platform for dialogue between researchers and experts. The event generated great interest among the students, researchers, and professionals in attendance, creating opportunities for future collaboration.

Strengthening academic ties between Morocco and Madagascar: Visit of HE Mr. Johary Hoela Rajobson to the UEMF

The Euromed University of Fez (UEMF) had the honor of welcoming HE Mr. Johary Hoela Rajobson, Madagascar's first ambassador to Rabat, accompanied by his wife. Welcomed by the University's President, Prof. Mostapha Bousmina, this visit symbolizes the long-standing fraternal relations between Morocco and Madagascar.

This meeting also highlighted the shared commitment of both countries to promote cooperation in the fields of higher education, research, and innovation. The presence of Malagasy students within the UEMF already demonstrates this dynamic and strengthens intercultural and academic exchanges between the two nations.

As part of this partnership, UEMF donated two 3D printing machines to the University of Madagascar, marking a new milestone in scientific and technological collaboration. This symbolic gesture embodies the two institutions' commitment to leveraging innovation to meet the challenges of tomorrow.

This visit, marked by fraternity and shared vision, opens the way to a promising future for academic and diplomatic relations between Morocco and Madagascar.

Morocco200: a milestone at the Euromed University of Fez

The Euromed University of Fez had the pleasure of hosting “Morocco200” on February 26, 2025, a major initiative led by the Ministry of Digital Transition and Administrative Reform, GITEX AFRICA, KAOUN International and the Digital Development Agency (ADD).

This ambitious operation highlighted the potential of Moroccan startups through a national roadshow, stopping in Casablanca, Tangier, Agadir and Fez, with the aim of inviting young entrepreneurs to take part in Africa's largest tech event, GITEX AFRICA.

UEMF thanks Mr. Chakib Achour, Country Chief Representative of GITEX Africa in Morocco, as well as all the partners who contributed to the success of this initiative. A special tribute is paid to POGO, a startup born within UEMF, and to ARWA Solutions, who shared their experience and commitment by participating in the 2024 edition of GITEX.

With innovation at the heart of UEMF's mission, the university remains committed to supporting the startup ecosystem and guiding Moroccan talent towards excellence and technological entrepreneurship.

United Nations peace operations at the heart of discussions at the UEMF

As part of the activities of the Euromed Institute of Legal and Political Sciences (ISJP), an exceptional conference was organized around the theme: "United Nations Peace Operations: Management, Challenges and Perspectives". Led by a senior officer of the Royal Armed Forces, a recognized expert in peacekeeping operations, this meeting offered our Bachelor's and Master's students a valuable immersion in the realities on the ground and contemporary geopolitical issues.

Drawing on his experience at the United Nations headquarters in New York and Geneva, as well as his numerous participations in peace missions in Africa and the Middle East, our speaker was able to convey, with clarity and pedagogy, an in-depth analysis of the management mechanisms of peace operations, the current challenges they face, as well as the prospects for development in a constantly changing world.

The conference generated a great deal of interest among the students, who were able to freely exchange ideas with our guest and deepen their understanding of the diplomatic and strategic workings of the UN in an increasingly conflictual international context. This initiative is fully in line with the IESJP's mission to foster openness, dialogue, and critical analysis around major international issues.

Ode to Mathematics: Moroccan Day of Mathematics Worthily Welcomed by UEMF

The Moroccan Day of Mathematics (MDM) was held on April 19, 2025, at the Euromed University of Fez, bringing together nearly 800 participants around the theme "Mathematics as a vector of development." Co-organized with several scientific institutions, the event celebrated the excellence of Moroccan research in mathematics and highlighted the international recognition of Moroccan researchers and students in this field.

The day featured interactive workshops, lectures, and a keynote address by Professor Abdelhaq El Jai, a specialist in distributed systems. The MDM also emphasized the importance of democratizing mathematics, inspiring young talent, and promoting the dissemination of scientific knowledge in a spirit of openness, rigor, and innovation.

Promoting artisanal heritage: a strategic framework agreement for the region

On April 17, 2025, the Euromed University of Fez participated in the signing of partnership agreements during the visit of Mr. Lahcen Essaadi, Secretary of State for Crafts, to the Fez-Meknes Chamber of Crafts.

A framework agreement was signed between the UEMF State Secretariat and the Chamber of Crafts to develop specialized university training in craft professions, support innovative projects, conduct socio-economic studies, promote craft heritage and integrate digitalization to modernize the sector.

The UEMF is committed to mobilizing its resources to train professionals who combine tradition, innovation and sustainability while respecting the environment and social values.

A second partnership was signed with the Federation of Craft Businesses to strengthen training in glass techniques in collaboration with CERFAV in France.

SMOILM: THE RISE OF SMALL LANGUAGE MODELS

THE RISE OF SMALL LANGUAGE MODELS is a conference organized at the incubator, hosted by our special guest, Ms. Loubna Ben Allal, an engineer at Hugging Face. Her career has been marked by remarkable contributions to the development of NLP models such as StarCoder, as well as her recent involvement in SMoLLM, a series of small language models. With extensive expertise, Loubna Ben Allal regularly shares her knowledge at prestigious conferences at renowned universities, such as Stanford.

- Present the advances in small language models (LLMs) and their applications.
- Allow participants to interact with an internationally renowned expert.
- Inspire students and professionals to explore opportunities in the field of NLP.

Training program for elected officials and staff of the Fez-Meknes region

On April 24 and 25, 2025, the Euromed University of Fez organized a training workshop for elected officials from the Province of Moulay Yacoub on "Mastering local taxation and the governance of local authorities." This initiative is part of the UEMF's openness and its commitment to strengthening the skills of local stakeholders.

Dedicated to the control of local taxation as a strategic lever for public financing and the governance of local authorities, this session aimed to strengthen the capacities of elected officials, improve the efficiency of resource collection, promote transparency and tax fairness, as well as consolidate efficient and attractive governance for investment.

STARTECH Bootcamp: Two days of ideation and innovation at the Euromed Innovation Center

On April 18 and 19, the Euromed Innovation Center (EIC) hosted the STARTECH program cohort for an intensive bootcamp, in partnership with Tamwilcom. This ideation session was a decisive step in the project leaders' journey, supporting them in transforming their ideas into concrete prototypes (Proof of Concept).

For two days, participants benefited from targeted support and practical training focused on several strategic areas: in-depth understanding of their market, validation of business models, personalized coaching sessions, and development of impactful pitches. The goal was clear: to refine projects and prepare entrepreneurs to convince future partners or investors.

This event highlighted the quality of the support provided by the experts involved, as well as the remarkable commitment of the project leaders, driven by the desire to develop innovative and viable solutions. In this regard, the Euromed Innovation Center warmly thanks all the participants for their motivation, as well as the speakers for generously sharing their expertise.

ISCAE Olympics: Exceptional sporting performances by UEMF members and title ofbestdelegation

Euromed University of Fez is proud to celebrate the achievements of its students who flew its flag at the Olympics organized by ISCAE in Casablanca. This exceptional competition brought together 14 universities and colleges around demanding sporting events, and our 15 students, accompanied by two supervisors, achieved remarkable performances.

Our champions have distinguished themselves in all disciplines, collecting prestigious titles:

• In Basketball, our team won the first cup.

• In Table Tennis, our students triumphed in both the boys' and girls' categories, with two first cups.

• In Swimming:

- 50m boys: 1st place (gold medal) and 3rd place (bronze medal).

- 50m girls: 2nd place (silver medal) and 3rd place (bronze medal).

- Mixed relay: 1st place (gold medal).

At the end of this event, the Euromed University of Fez was elected "Best Delegation" by the organizers, an accolade that testifies to the commitment, team spirit and excellence of our students.

AInnovathon: Innovation in the service of health and education thanks to AI

On April 22 and 23, more than 50 students from the Euromed Business School (EBS) and the School of Digital Engineering and Artificial Intelligence (EIDIA) took up the challenge of the AInnovathon, an intensive hackathon organized by the Euromed Innovation Center as part of the STARTECH program, in partnership with Tamwilcom.

For 48 hours, participants worked in teams to design innovative solutions in two key areas: health and education. At the heart of this experience was a shared mission: to harness artificial intelligence to serve society through concrete, high-impact projects.

Guided by an agile approach, the students alternated between training workshops, mentoring sessions, and prototyping phases to develop an initial functional demonstration of their ideas. Following this technological and collaborative immersion, several projects were presented during a pitch session before a jury of experts.

Three teams particularly distinguished themselves and will benefit from personalized support to refine and develop their solutions: Ru'ya, MedPass, and Eschool4GenZ. Congratulations to all the students for their creativity, commitment, and team spirit, as well as to the teacher-researchers for their quality support throughout the event.

Italian Design Day: Reading nature and protecting its culture

As part of its Conference Series, the Euromed University of Fez is sharing its activities promoting "Made in Italy" in partnership with the Italian Embassy in Morocco, by welcoming the Italian writer, botanist and landscaper Umberto Pasti this Wednesday, April 23, 2025. A renowned international figure, he is committed to the preservation of biodiversity, the enhancement of landscapes and the transmission of knowledge.

This meeting is part of the 9th edition of the "Italian Design Days" (IDD), organized around the theme "Reading nature and protecting its culture, for a design that repairs inequalities." A theme that resonates with that of the 2025 edition of the International Triennale of Milan, which highlights innovative approaches to design that serve the preservation of heritage – tangible and intangible – with a view to sustainability and inclusion.

Italian Design Day is an unmissable event celebrating Italian excellence in all its creative expressions. For several years, it has highlighted the synergies between innovation, craftsmanship, sustainability, and transmission, in close collaboration with Moroccan institutions and local communities. Through this exchange, Pasti demonstrated the profound connections between nature, culture, and design, and their role in building a more equitable future.

Taking place at the Euromed University of Fez, a proven partner, this initiative demonstrates the importance given to intercultural dialogue and academic cooperation in the service of a fairer and more sustainable society.

Mystery Gift, a startup incubated at UEMF, selected at GITEX

Among the 200 Moroccan startups selected to participate in the continent's largest technology fair, GITEX, Zahira Boulanouar, a second-year student at the School of Digital Engineering and Artificial Intelligence (EIDIA), proudly represented the Euromed University of Fez with her "Mystery Gift" project.

Born from an idea developed in her bedroom, this innovative personalized gift concept combines customer focus, creativity, and artificial intelligence. Driven by an original vision of tailor-made products, Zahira transformed her initiative into a promising startup, now supported by the UEMF's Euromed Innovation Center (EIC).

His career path reflects the spirit of innovation, perseverance, and entrepreneurial commitment that the University encourages in its students. The recognition obtained through this national selection confirms the quality of the support offered by the EIC and the UEMF's ambition to train the leaders and innovators of tomorrow.

Our congratulations to Zahira on this great achievement and our best wishes for the rest of her adventure at GITEX Africa 2025 and beyond.

A center of excellence for French-speaking restructuring, the UEMF is hosting a 3rd edition with strong international resonance

On May 8 and 9, 2025, the Euromed University of Fez, in partnership with the University of Paris 1 Panthéon-Sorbonne, hosted the 3rd edition of the Restructuring Days. This benchmark event in the French-speaking legal world brought together nearly 250 participants from Europe and Africa: lawyers, magistrates, business leaders, researchers, and students.

Created to analyze developments in the law governing companies in difficulty, these days have become a space for exchanges between professionals and academics on legal reforms, innovative practices, and international issues. The rich program addressed the reform of amicable procedures, recovery plans, and transnational cooperation.

This edition was distinguished by a strong African participation, notably from OHADA member delegations, confirming the event's vocation to create a bridge between Europe and Africa.

Fez has thus established itself as a center of excellence in business law, thanks to the UEMF's commitment to research, continuing education and international openness.

Leadership and Individual Effectiveness: An Exceptional Conference with Mr. Reda Bouraoui

The Euromed Business School hosted, under the aegis of its director, Professor Abdessamad Rhalimi, an exceptional conference led by Mr. Reda Bouraoui, a professional with a rich and inspiring career. Under the theme "From Classroom to Career: A Framework for Leadership and Individual Effectiveness," this interactive meeting offered students a captivating immersion into the driving forces of personal and professional leadership.

With over 30 years of experience in leading multinational companies, Mr. Bouraoui captivated his audience by sharing an authentic perspective on the challenges and opportunities of the transition from academia to professional life. Beyond his managerial expertise, his atypical profile—a karate black belt, motorcycle enthusiast, and co-founder of the UniTalk platform—perfectly illustrates the synergy between rigor, passion, and innovation.

Throughout the conference, students were invited to reflect on their own leadership posture, explore the levers of their individual effectiveness, and rethink their vision of career not as a destination, but as an evolving process. In a dynamic atmosphere, the discussions were lively, sometimes even introspective, revealing the deep aspirations of a generation in search of meaning and sustainable performance.

This intervention is fully in line with the Euromed Business School's mission: to train responsible leaders capable of combining professional excellence with human values. Through meetings of this magnitude, the School confirms its commitment to offering its students formative experiences in contact with inspiring figures from the economic and entrepreneurial world.

Training program for elected officials and staff of the Fez-Meknes region

As part of the partnership between the Euromed University of Fez and the Fez-Meknes Regional Council, a training workshop for elected officials of the province of Taounate was organized on April 29 and 30, 2025, in Taounate, under the theme "Local development".

The workshop aimed in particular at the dynamics of strengthening local capacities around four priority Sustainable Development Goals (SDGs): • SDG 1: Eradication of poverty • SDG 4: Quality education • SDG 10: Reduction of inequalities • SDG 11: Sustainable cities and communities

This workshop supports the mobilization of resources and territorial actors around and in response to the specific needs of local populations, while promoting their economic, social, and cultural potential. This participatory approach, rooted in local realities, promotes inclusion, resilience, and social innovation.

Euromed University of Fez welcomes the new Director General for MENA of the European Commission, HE Mr. Stefano Sannino

As part of the consultations on the New Pact for the Mediterranean, HE Stefano Sannino, Director General for the Middle East, North Africa and the Gulf (DG MENA) at the European Commission, visited the Euromed University of Fez on 14 May 2025. Accompanied by HE Patricia Llombart Cussac, Ambassador of the European Union to Morocco, this visit strengthened the strategic partnerships between the UEMF and the European institutions.

Welcomed by UEMF President Prof. Mostapha Bousmina, the guests explored the campus's state-of-the-art facilities, including a state-of-the-art sports complex, a 3,500-seat conference center, and a research library. A highlight of the visit was an interactive dialogue with students on topics of importance to the region, such as education, mobility, employment, climate, and academic cooperation.

This meeting confirmed the UEMF as a strategic player in Euro-Mediterranean cooperation and a catalyst for innovation and sustainable development in the region. The visit concluded with a symbolic immersion in the historic medina of Fez, highlighting the importance of knowledge in strengthening ties between peoples.

UEMF and NOVA University of Lisbon join forces for intercontinental collaboration

The Euromed University of Fez (UEMF) and the NOVA University of Lisbon have signed a strategic collaboration agreement, a significant step towards developing student mobility opportunities, research projects and intercultural exchanges.

This agreement marks an important step in strengthening academic and scientific relations between Africa and Europe. The Nova University of Lisbon, ranked among the top 8 European universities in the QS Top 50 Under 50 ranking, shares a common vision with UEMF: placing research, innovation, and civic engagement at the heart of its actions.

Mr. João Sàágua, Rector of Nova University of Lisbon, highlighted the strategic importance of this collaboration, recalling that NOVA, rooted in European culture and Iberian identity, prioritizes relations with three major geographical areas: Europe, the Mediterranean, and the South Atlantic. These regions represent major axes for innovative and sustainable academic cooperation. For its part, UEMF, a leading Euro-Mediterranean university, stands out for its role as a bridge between continents and its leadership in high-impact projects in the fields of education, research, and innovation in the region.

During this visit, the NOVA delegation was able to discover UEMF's modern infrastructure, a testament to its academic and scientific ambition. The guests toured the research and innovation platforms, including the 3D printing platform, the largest on a university campus in Africa. They also explored the university's sports complex, including a FIFA-certified football pitch and an Olympic-sized swimming pool, which positions UEMF as a key player in promoting well-being and sporting excellence.

Towards better local governance: UEMF equips municipal elected officials

As part of its ongoing efforts to build the capacity of local stakeholders and improve the performance of public services, the Euromed University of Fez, under the supervision of the Fez-Meknes Regional Council, organized a training workshop on the theme of administrative policing on Wednesday, May 14 and Thursday, May 15. This workshop is part of the Continuing Education Master Plan, led by the University, which aims to equip elected officials and strengthen their skills to meet the requirements of modern territorial governance.

The workshop was actively attended by more than 80 municipal councilors, demonstrating the growing awareness of the importance of training in improving daily practices within local authorities. During these two days, practical cases inspired by real-life situations encountered by councilors were discussed, offering participants the opportunity to understand the legal concepts related to administrative policing through concrete examples, and thus strengthen their ability to effectively manage issues on the ground.

The workshop also provided an opportunity to delve deeper into the legal and regulatory frameworks governing the missions of the administrative police, to examine the municipality's intervention mechanisms, its areas of action, as well as the principles of balance between the preservation of public order and respect for individual rights.

This initiative confirms the importance of continuing education as a key lever for modernizing local administration, improving the quality of public services, and strengthening trust between citizens and elected institutions. This workshop thus illustrates the shared commitment of the Euromed University of Fez and the Fez-Meknes Regional Council to establish an innovative training model, based on the convergence of academic knowledge and the reality on the ground, in the service of sustainable and effective local development.

Strategic reading of Moroccan intelligence: Moulay Abdelmalek Alaoui in conference at the UEMF

As part of its high-level intellectual meetings, the Euromed University of Fez welcomed Mr. Abdelmalek Alaoui, president of IMIS and recognized expert in strategy, for a conference dedicated to his reference work "The Time of Morocco: Resilience and Emergence of the Cherifian Kingdom".

The event provided an opportunity to revisit Morocco's major strategic directions in the face of the Covid-19 pandemic, while analyzing the far-reaching reforms undertaken in the institutional, economic, digital, and geopolitical spheres. Through a structured and lucid approach, Mr. Alaoui presented Morocco as a country undergoing transformation, focusing on political anticipation, innovation, and a sovereign vision of development.

The discussions highlighted the central role of youth in this dynamic, perceived not only as beneficiaries, but also as key agents of change. Students were thus able to interact around the issues of national leadership, digital transition, continental integration, and productive sovereignty.

The session concluded with a book signing and a special moment of sharing, confirming the importance of such meetings in civic education, the formation of critical thinking and the promotion of a culture of resilience.

UEMF opens its doors to representatives of parents of students from high schools in Fez

In a strong desire to strengthen synergies between the academic and school worlds, the Euromed University of Fez welcomed, on May 28, the presidents of the parents' associations of the high schools of Fez for a visit under the sign of discovery and dialogue.

This meeting allowed our guests to discover up close the many riches of our eco-campus, through an immersive journey including technological and scientific platforms, simulation rooms, sports infrastructures, as well as exhibitions highlighting the achievements of students.

Much more than a simple visit, this event was a moment of authentic exchange around the values that form the basis of our academic project: pedagogical innovation, learning through practice and student well-being.

This rapprochement marks an important step in the development of lasting relationships between the Euromed University of Fez and the educational communities of the region, serving a shared vision of excellence and inclusion.

Doctoral Thesis Defense in Management and Innovation by Mr. Olugbenga Ayo OJUBANIRE

The Euromed University of Fez (UEMF) is pleased to inform the public of the defense of the doctoral thesis in "Management, Innovation and Entrepreneurship"

The thesis defense will take place on Friday, June 20, 2025 at 10:00 a.m. at UEMF

Location: The Great Incubator Hall (LOC001994)

The thesis will be presented by Mr. Olugbenga Ayo OJUBANIRE

Under the theme:

“Determinants of Smart Factory Model Adoption among Industrial Enterprises in Emerging Economies: A comparative Study of the Automotive Industry in Nigeria and Morocco”

https://ueuromed.org/actualites/cedoc/soutenance-de-these-de-doctorat-en-management-et-innovation-par-m-olugbenga-ayo

UEMF PhD student awarded at the international MEDPore25 congress for his promising research

Mohamed Amine Benzaouia, a doctoral student in the NANOMat (Nanomaterials) team at Euromed University of Fez, is conducting innovative research on the development of new antibacterial and antiviral materials. This project, supported by the Hassan II Academy of Science and Technology, is part of a national strategy to strengthen scientific capacity in the face of pandemics, particularly COVID-19.

As part of his work, Mr. Benzaouia participated in the international conference MEDPore25 (Mediterranean Conference on Porous Materials), recently held in Marrakech. He presented a scientific poster entitled: "Nitrogen-containing mesoporous organosilicas as antibacterial materials." This presentation was awarded the Best Poster Award, recognizing scientific excellence, clarity of the subject, and visual quality of the poster.

Currently pursuing a thesis at the NANOMat laboratory, this distinction highlights the dynamism of research conducted at UEMF in the field of nanomaterials applied to health. It also illustrates the university's growing impact on the international scientific scene.

Euromed University of Fez warmly congratulates Mohamed Amine Benzaouia for this well-deserved recognition.

Information and discussion day on European research programs

Euromed University of Fez hosted a day dedicated to European research funding programs, with a particular focus on Horizon Europe and Erasmus+. The event provided a better understanding of the opportunities these programs offer to researchers, teachers, and project leaders.

Presentations focused on several key themes, including health, digital technology, industry, space, and higher education. Participants received detailed presentations on project submission mechanisms, eligibility criteria, and the support tools available to assist applications. A practical workshop, held in the second half of the day, provided participants with an interactive setting to discuss their project ideas and refine their preparation processes.

This event helped strengthen UEMF's participation in European calls for projects, while paving the way for new international collaborations in the fields of research, teaching, and innovation. It is fully in line with the university's strategy of scientific and academic outreach on a Euro-Mediterranean scale.

UEMF seals strategic partnerships with seven national sports federations

On May 21, 2025, the Euromed University of Fez organized the "National Sports and Performance Meeting," during which it signed seven partnership agreements with Moroccan sports federations. This event, marked by the presence of representatives from federations such as the Royal Moroccan Ski Federation, Disabled Sports, and Triathlon, reinforced the UEMF's commitment to the development of high-level sport. Ms. Iman Meriem Benkirane, Vice-President of the UEMF, emphasized the strategic importance of this initiative for talent training, innovation, and applied research in the sports field. In addition, the partner federations praised the UEMF's infrastructure, which meets international standards, including the Olympic swimming pool and the FIFA-certified field. Thematic sessions on sports performance, sports psychology, and the contribution of artificial intelligence in training also enriched this meeting.

African Week at UEMF: Youth at the Heart of Continental Dynamics

The 3rd edition of Africa Week at UEMF, held from June 11 to 13, 2025, under the theme "Youth, the Future of Africa," celebrated the strategic role of young people in the continent's development. The event brought together diplomats, experts, students, and artists for conferences, fairs, performances, and debates on major issues such as energy, agriculture, and culture. The UEMF President emphasized the importance of supporting young talent, while diplomatic representatives welcomed this initiative. UEMF thus affirms its commitment to a strong, united, and innovative Africa, driven by its youth.

HackAI Morocco: UEMF on the podium!

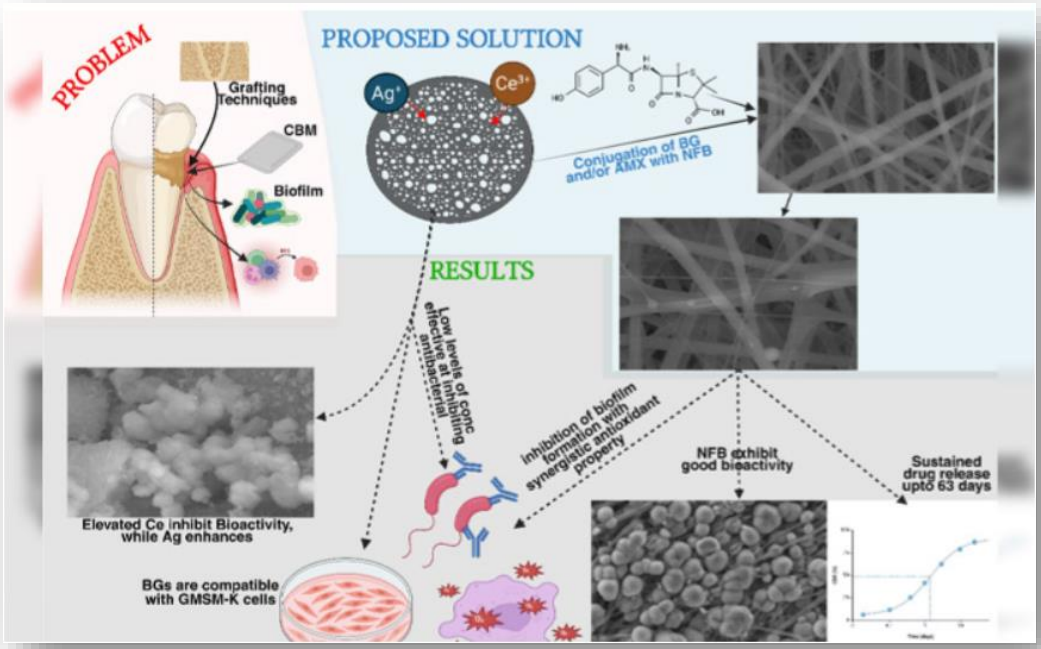

Among more than 200 applications, our students from the School of Digital Engineering and Artificial Intelligence (EIDIA) distinguished themselves in this prestigious national generative artificial intelligence (GenAI) challenge, organized at 1337AI.

A team of three students, proudly representing UEMF, brilliantly defended their ideas during this competition, which brought together the country's top talent. Their project, Tomouhi, is an intelligent job interview simulation platform, offering personalized support to help students and job seekers hone their skills. A true demonstration of creativity and commitment!

Congratulations to Imane AMAAZ, Imane Benchrif and Hiba SOFYAN for this remarkable achievement, as well as to the mentors who accompanied them throughout the journey.

International Conference: Cross-examinations of Mediterranean epistemes

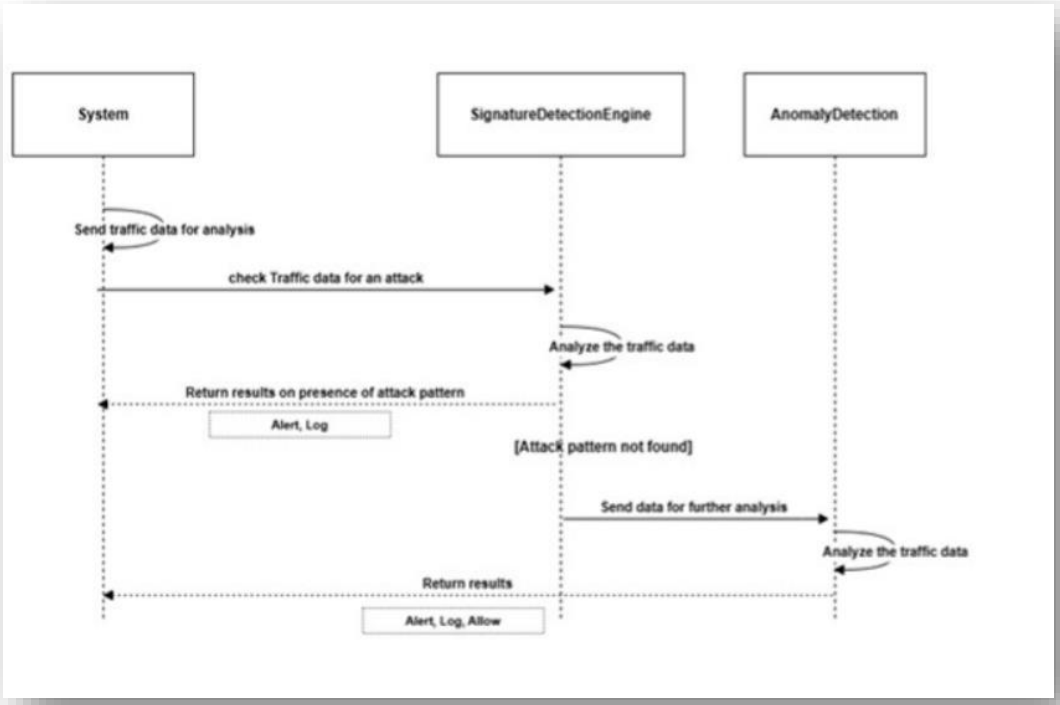

On May 29 and 30, 2025, the Euromed University of Fez hosted a major international conference entitled "From the Mediterranean, Significant Epistemes: in Philosophy, Art and Literature." Jointly organized by the Faculty of Human and Social Sciences, the ICESCO-EUROMED Chair (Arts, Societies and Civilizations) and the UNESCO-EUROMED Chair (Mediterranean Interculturalities).

This conference brought together researchers, philosophers, artists, and writers from diverse backgrounds to reflect deeply on the forms of thought, creation, and transmission that have marked the shores of the Mediterranean. Through lectures, presentations, and discussions, the speakers explored how Mediterranean philosophy, art, and literature continue to resonate today, carrying a legacy that is still alive and constantly renewed.

The event was marked by the richness of the exchanges, the quality of the contributions, and a genuine intellectual openness. It highlighted the complexity of Mediterranean cultural dynamics, between continuities and ruptures, and allowed for new avenues of interpretation of the works and thoughts emerging from this plural and fertile space.

Visit of a Senegalese delegation to the UEMF: focus on innovation and African synergies

Euromed University of Fez was pleased to welcome, as part of an official visit to Morocco, a large Senegalese government delegation led by the Secretary of State for the Development of Small and Medium-Sized Industries. The delegation also included several senior officials from institutions responsible for investment development and supporting the industrial fabric in Senegal.

This visit, with strong strategic significance, is part of a dynamic of South-South cooperation and sharing of experiences between African countries around common issues related to economic development, technological innovation and the training of human capital.

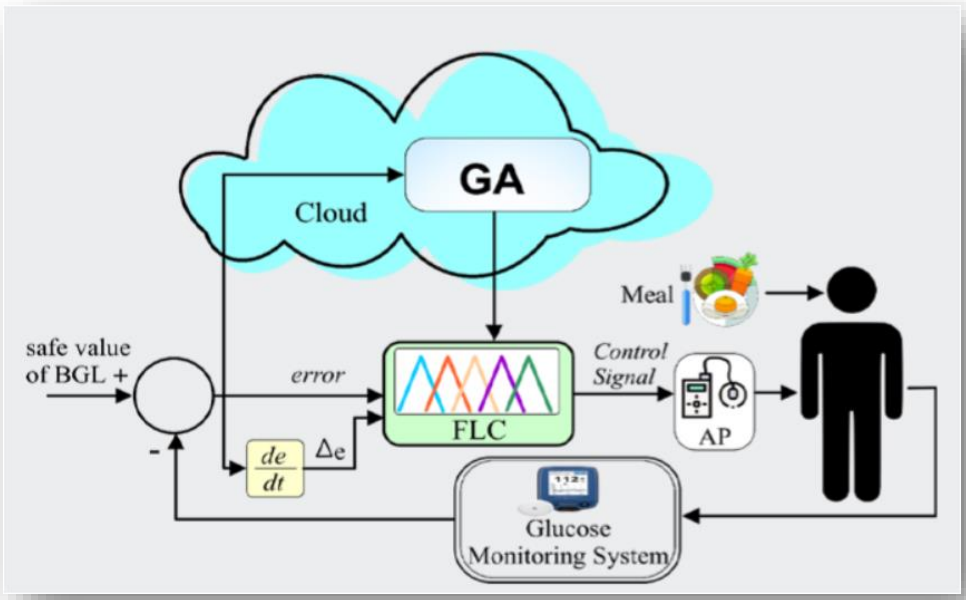

The University's President, Prof. Mostapha Bousmina, and other officials welcomed the delegation and presented UEMF's main strategic orientations, its commitment to innovation, youth entrepreneurship, and sustainable development. The visitors also discovered the University's cutting-edge technology platforms, as well as its flagship projects such as the Fez Smart Factory (FSF) and the Euromed Innovation Center (EIC).

The visit was punctuated by rich and promising exchanges on the possible synergies between the UEMF and Senegalese industrial development stakeholders, particularly in areas related to supporting SMEs/SMIs, developing the skills of young entrepreneurs and incubating innovative projects with a strong local impact.

This meeting strengthens ties between Morocco and Senegal and confirms the growing role of African universities as catalysts for cooperation and transformation in the service of a more autonomous, united and forward-looking Africa.

Round table: Health and well-being of young people – Eating better to nourish better

1- CULTURAL EVENTS

2. CONFERENCES

June 12	Round Table : "Youth Health and Well-being: Eating Well to Nourish Better" by Pr Wafaa Al Hassani, Dr Nabdi Samira, Mme Jerraf Chaimae

As part of African Week, a round table was held on the theme: **"Youth Health and Well-being: Eating Well to Nourish Better."**

The session opened a dialogue on the importance of healthy eating habits among young people and their impact on both physical and mental well-being. Experts, health professionals, and students explored the connections between nutrition, education, and long-term health, highlighting the need for greater awareness and access to balanced diets to support a healthier future for Africa's youth.

This discussion offered valuable perspectives on how better nutrition can empower the next generation.

As part of African Week, a round table was held on June 12, 2025 around the theme:

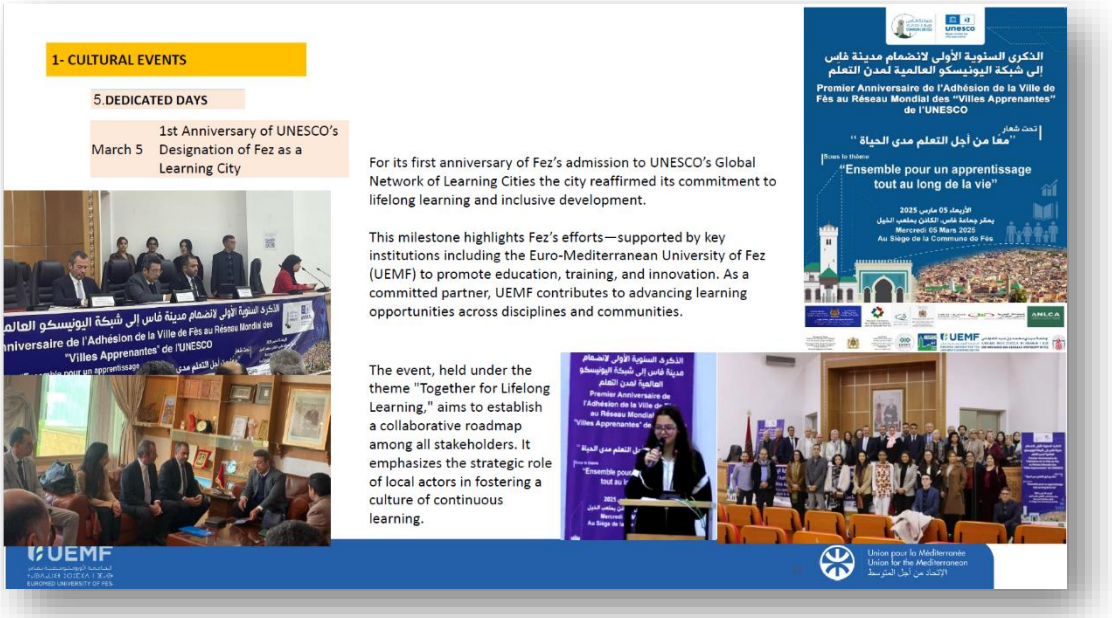

"Health and well-being of young people: eating better to nourish better", led by Pr. Wafaa Al Hassani, Dr. Samira Nabdi and Ms. Chaimae Jerraf.

This session opened a space for dialogue on the importance of good eating habits among young people, in relation to their physical and mental health.

Discussions between health professionals, experts and students highlighted the links between nutrition, education and sustainable health, highlighting the urgent need for greater awareness and equitable access to a balanced diet, which is essential for building a healthier future for African youth.

District Leadership Camp – Rotaract UEMF

On May 2, 3 and 4, 2025, Rotaract Club UEMF hosted the District Leadership Camp (DLC), a major event bringing together the clubs of District 9010.

During these three days, around forty participants from all over Morocco took part in training sessions, team building activities and enriching discussions on leadership, community service and civic engagement.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Masters of Speech Club Performances

The Masters of Speech Club brilliantly represented the UEMF in three national public speaking competitions in 2025:

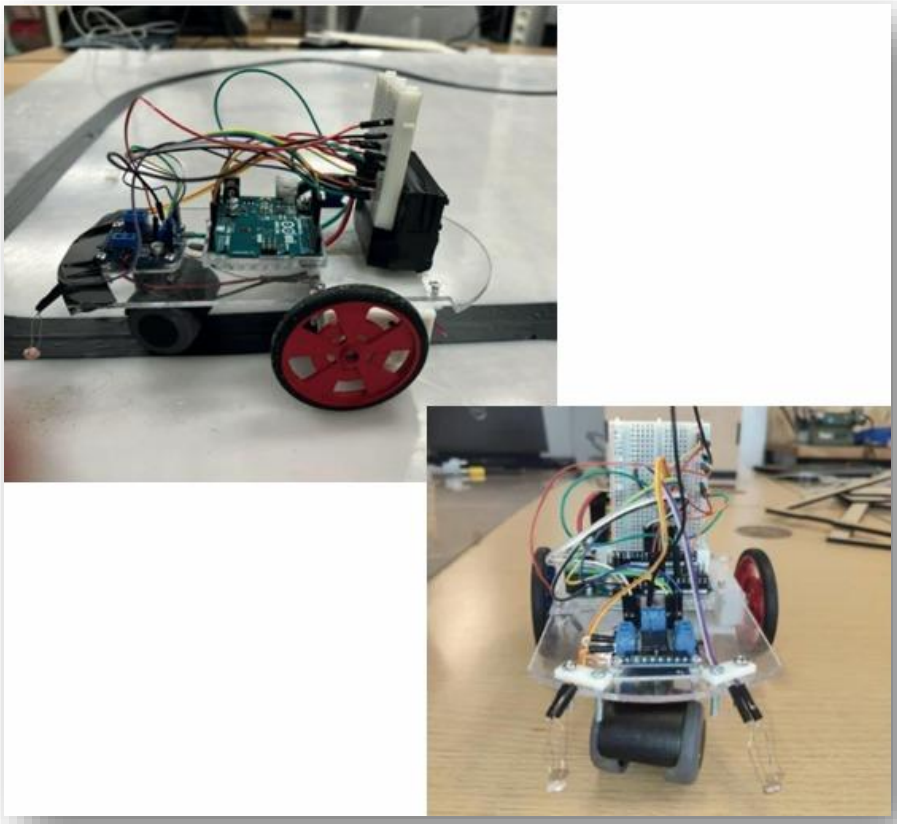

On March 1st, at the Lelaplacien competition at ENSA in Fez, the club won first prize.

From March 7 to 9, he also won first prize at the War of Words at Al Akhawayn University.

On April 13, another victory for the Victoria Verba at ENSAM in Meknes.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Autonomous Robotics Competition – Hi-Tec Club

On May 27, 2025, the Hi-Tec Club held a technical competition where students had to design a prototype of an autonomous robot capable of following a path defined by light sensors, while avoiding obstacles.

This challenge allowed participants to put into practice key concepts in electronics, programming and digital manufacturing, following a "learning by doing" approach in line with the project-based pedagogy adopted at UEMF.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Sports activity: ENAM Olympics

The Olympics, organized by the National School of Agriculture of Meknes, took place from April 18th to 20th and brought together male participants in the disciplines of football and basketball. Among the institutions present were ENAM Meknes, ENCG Fez, ENCG Oujda, the Institute of Sports, the Faculty of Medicine Fez, Euromed Fez, and the Institute of Health Professions Fez. A total of three basketball matches and three football matches were played. The results allowed Euromed Fez to secure first place in basketball and second place in basketball, under the supervision of Mohammed Yakhlef and Jouad Kamal.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

UfM Med Youth Lab 2024: 70 young people come together to co-create the Euro-Mediterranean future

In February 2025, the Euromed University of Fez welcomed 70 young people from 21 nationalities as part of the UfM Med Youth Lab 2024, a major Euro-Mediterranean hackathon. Co-organized with the Union for the Mediterranean (UfM), GIZ, the Anna Lindh Foundation, and IEMed, this event allowed participants to co-create concrete solutions around three major themes: green skills, youth mobility, and civic engagement. A true laboratory of ideas for sustainable development and regional cooperation.

Training of Trainers Workshop on Incubation Programs – Link Up Africa

In February 2025, as part of the Link Up Africa program led by Enabel and AMCI, the Euromed Innovation Center team participated in a training of trainers workshop dedicated to the design and implementation of effective incubation programs.

Activity report of the Department of Social, Economic and Entrepreneurship Partnerships.

Euromed University of Fez strengthens its commitment to quality digital education

As part of its strategic partnership with the Blackboard Anthology group, the Euromed University of Fez organized a first training day for its faculty and administrators of the learning platform. This session explored the main features of the Learning Management System (LMS), including the creation of educational content, online assessment, discussion tools, the integration of artificial intelligence, as well as aspects related to mobile accessibility and inclusion. Preceded by an institutional meeting with the Blackboard delegation, led by Mr. Nicolas Albouze (VP Africa) and Ms. Zineb Elha (Account Manager Europe and North Africa), this day marked an important step in the consolidation of innovative digital pedagogy at UEMF. A second session was organized the following day, mobilizing a new cohort of teachers and administrators.

Educational and Scientific Publications: A Commitment to Quality Education

As part of its commitment to quality education and the dissemination of knowledge, the Euromed University of Fez, in collaboration with the Alliance of Civilizations Chair, has published a first batch of scientific journals and educational works.

These publications include the International Journal of European, Mediterranean and African Studies, Médiations Méditerranéennes, and Alternatives Africaines, which explore themes related to identity, Mediterranean and African dynamics, as well as social innovation.

Furthermore, several books from courses given at UEMF have been published in partnership with L'Harmattan, strengthening the scientific and educational vocation of the university.

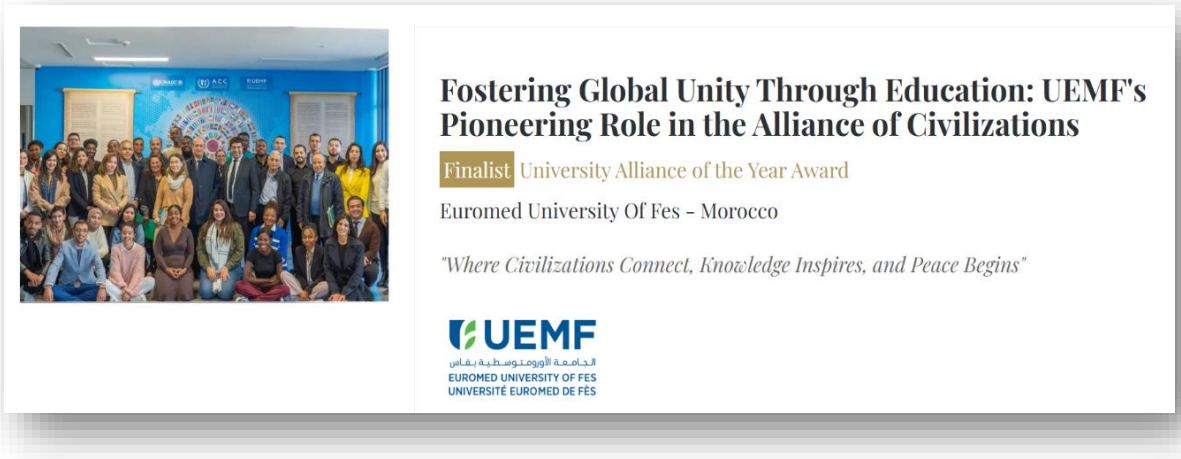

This initiative demonstrates UEMF's desire to support academic production, encourage research and provide accessible, innovative and multicultural educational resources.

UEMF participation in the MLUMSE project in Zagreb

From June 30 to July 6, 2025, the Euromed University of Fez participated in a week of thematic workshops and strategic meetings at the University of Zagreb, as part of the Erasmus+ CBHE MLUMSE project, dedicated to the modernization of teaching in land management and urban planning in the Southern Mediterranean.

This mission has enabled the consolidation of Euro-Mediterranean academic collaborations around key themes such as the New European Bauhaus, smart cities, strategic planning, heritage enhancement, digital tools and geospatial governance.

UEMF was also represented at the IDS3Geo doctoral seminar and presented the first version of its Quality Plan to the project steering committee. This participation demonstrates UEMF's strong commitment to academic excellence, internationalization and knowledge sharing.

The 2nd edition for the STARTECH program

The Euromed Innovation Center (EIC), in partnership with Tamwilcom, the Fez-Meknes Regional Investment Center and Bank of Africa, organized an intensive bootcamp for innovative project leaders.
The objective of this initiative is to support the region's talents in structuring their ideas, to encourage their transformation into high-potential startups and to promote local innovation through concrete actions, collaboration and impact.
On July 10 and 11, participants from the Fez-Meknes region benefited from two days structured around practical workshops, mentoring sessions, and constructive exchanges. These days were marked by a collective dynamic promoting mutual support, energy, and creativity, driven by committed and action-oriented project leaders.

Academic Mobility in China: Experience at the Luojia Global Summer School

As part of strengthening UEMF's international outreach, three students recently participated in the Luojia Global Summer School organized by Wuhan University, China.CN, during the summer of 2025.
Imane and Hiba, students at the Euromed School of Digital Engineering and Artificial Intelligence (EIDIA), and Kamélia, a doctoral student at the Euromed Institute of Legal and Political Sciences (ISJP), took part in this excellence program bringing together students from around the world. Successfully integrated into multicultural groups and academic and intercultural activities, they enriched their academic careers through high-level exchanges and immersion in a stimulating international environment.
This experience illustrates UEMF's desire to train global citizens, capable of evolving in multicultural contexts and building bridges between knowledge, cultures and societies.

First class graduates from the UEMF BiomedTech Engineering School

The first class of the BiomedTech Engineering School of the Euromed University of Fez has completed its training.
These engineers, trained at the intersection of biomedical technologies, research and innovation, embody a new generation of talent dedicated to the healthcare sector.
They leave the university with the ambition to actively contribute to the imagination, design and implementation of tomorrow's technological health solutions.

Information day on European programs: Erasmus+ & Horizon Europe

The Euromed University of Fez organized a day dedicated to the European Erasmus+ and Horizon Europe Programs, marked by enriching discussions around the opportunities offered in research and higher education.
This meeting provided an opportunity to deepen understanding of European funding mechanisms, to discover major calls for projects and to strengthen the skills of project leaders in building sustainable partnerships on a Euro-Mediterranean scale.
The morning concluded with an interactive exchange between speakers and participants, bringing together teacher-researchers, academic managers, project leaders and doctoral students.
Our sincere thanks to the speakers for the quality of their contributions:
Prof. Noureddine El Aouad, National Contact Point Horizon Europe – Health
Prof. Najiba Amrani, National Contact Point Horizon Europe – Digital, Industry & Space
Dr. Latifa Daadaoui, National Coordinator of the Erasmus+ Office

Massive evacuation exercise: a concrete commitment to security at UEMF

On April 21, 2025, UEMF organized an evacuation exercise involving more than 660 people in six campus buildings. Conducted efficiently and professionally, this exercise aimed to maintain standards, strengthen safety culture, and test warning systems. It highlighted the importance of preparation, ongoing training, and collective vigilance to protect the university community.

Euromed Innovation Center launches Tech4Farmers, a springboard for agritech

At Euromed University of Fez, we make innovation and entrepreneurship major levers of transformation to meet the major challenges of today and tomorrow.

Through our incubator, the Euromed Innovation Center, we support young people with high-impact projects by leveraging digital tools, applied research, and co-creation. This dynamic led to the creation of Tech4Farmers, a support program designed to foster, structure, and accelerate digital projects that meet the real needs of the agricultural world.

Training, mentoring, prototyping, field immersion, presentations before a jury... Relive in this video the highlights of the first Tech4Farmers cohort, led by committed young talents, passionate experts and a common desire: to transform agricultural challenges into levers for innovation.

Dialogue with Nature: Umberto Pasti at UEMF, between heritage and sustainable landscape

The visit by Mr. Umberto Pasti, Italian writer, botanist and landscaper, was a true invitation to reconnect with the profound intelligence of nature and to reflect on our connection with it..Pr. Imane Benkirane, Vice-President in charge of cultural activities and campus life, stressed the importance, more than ever, of taking the time and perspective necessary to better involve ourselves in the preservation of our heritage, whether tangible or intangible.

For Oumayma Fassi Fihri, a PhD student in Landscape Architecture at UEMF, Mr. Umberto Pasti's presentation was a source of inspiration. She found valuable answers to a key question: how can we integrate landscapes not only into our daily lives, but also into urban development projects?

Doctoral Thesis Defense in "Organic and Medicinal Chemistry" by Ms. Nassima SAGHDANI

This thesis project focuses on the design and synthesis of novel anticancer molecules derived from ethacrynic acid and indazole, combined with sulfonamides. Through advanced structural modifications, including coupling of heterocyclic groups via the Sonogashira reaction, several compounds have shown promising antiproliferative activity in vitro. A new class of ligands has also been developed to form metal complexes, including one with ruthenium, paving the way for future developments in cancer chemotherapy.

Dental research: a look back at the IADR 2025 congress in Barcelona

Professor Khalil El Mabrouk represented the Euromed University of Fez (UEMF) at the 103rd IADR General Session and Exhibition, held in Barcelona from June 25 to 28, 2025. This event, bringing together more than 4,000 international participants, is one of the most important in the field of dental research.

On this occasion, Prof. El Mabrouk chaired a scientific session on polymer materials applied to tissue regeneration and presented an oral communication entitled "Bioresorbable Hybrid Membranes for Bone Regeneration", highlighting advances in biomaterials for bone regeneration.

A member of the IADR, Professor El Mabrouk is one of the few Moroccan representatives of this international scientific organization, thus strengthening the UEMF's visibility in global research networks. His participation reflects the university's commitment to cutting-edge research and innovation.

Doctoral Thesis Defense in "Information and Communication Sciences" by Mr. Anoire EL ATTARI

This research offers a retrospective analysis of the role of Moroccan media during the Covid-19 crisis, focusing on their adaptation strategies and their influence on public perceptions and behaviors. By adopting a mixed methodology combining a thematic analysis of 30 semi-structured interviews and a statistical analysis of the responses of 562 participants to a questionnaire, the study highlights how journalists faced challenges such as disinformation, mobility restrictions, and the tension between speed and accuracy of information. The results highlight the essential role of the media as a relay of reliable information and confirm the impact of media consumption on preventive behaviors. Finally, the study makes theoretical and practical recommendations regarding communication in times of crisis, media literacy, and the use of technologies to combat disinformation during emergency situations.

https://ueuromed.org/actualites/cedoc/soutenance-de-these-de-doctorat-en-information-and-communication-sciences-par-m

Doctoral Thesis Defense in “International Relations” by Mr. Othman SQALLI HOUSSAINI

This thesis explores the role of culture and religion in socio-economic development and the strengthening of bilateral relations between Morocco and other African countries. Through the analysis of cooperation policies, field initiatives, and interviews with African institutional actors, it highlights the impact of these dimensions on the political, economic, and social spheres. The study aims to promote cultural and religious values as levers for sustainable development and cohesion, while proposing concrete recommendations to strengthen African cooperation.

African Futures Institute: Launch of the Nomadic African Studio in Fez

The Euromed University of Fez hosted the African Futures Institute, an initiative founded in 2021 in Accra by Professor Lesley Lokko OBE, which offers a new model of architectural education combining training, research, and public events.

This meeting took place at the eco-campus, on the occasion of the inaugural establishment of the Nomadic African Studio in Fez, the result of an innovative partnership between UEMF and AFI, led by professors Aziza Chaouni and Alex Toshkov.

Located in the heart of the Fez medina, within the Riad Lalla Yeddouna, which is made available to the University, this nomadic studio offers participants a unique setting to foster creative reflections that resonate with the history and culture of the place. It is part of a transnational dynamic, bringing together a broad cohort of international critics.

This event enabled rich exchanges between the studio teams and the university community, opening new perspectives for education and innovation in Africa.

Continuing Education: UEMF joins forces with Audencia to launch a dual-degree Executive MBA

Audencia Business School and the Euromed University of Fez (UEMF) have signed a strategic partnership to deliver the Audencia Executive MBA on the UEMF campus in Morocco. This high-level training program, designed for senior executives, will lead to a dual degree: the Audencia Executive MBA (AMBA, EQUIS, and AACSB accredited) and a diploma awarded by UEMF.

The program, reserved for Moroccan or international professionals based in Morocco, requires significant managerial experience (8 years, including 3 in management). The official launch will take place in Fez, but the two institutions plan to expand the EMBA to other Moroccan regions depending on demand.

Welcome and integration day for new students at UEMF

Yesterday, our new students wrote the first page of their adventure at UEMF. A day punctuated by discoveries, encounters, and shared enthusiasm, where everyone left their mark on campus. An inspiring start, full of promise for the months to come.

Welcome everyone to the big UEMF family.

https://www.linkedin.com/posts/universit-euro-m-diterran-enne-de-f-s_universitaezeuromed-uemf-myuemf-activity-7373630484091682816-OYHV?utm_source=share&utm_medium=member_desktop&rcm=ACoAADTGRfcBC1u9wYbkACypuAdXhOuzPcQwP94

An integration day dedicated to academic discovery

A second day dedicated to discovery and challenge. Our new students had the opportunity to interact with the Heads of Schools during enriching meetings dedicated to the training programs and academic opportunities offered at UEMF.

A day of integration between energy, cohesion and orientation

Integration Week - Day 3: Placed under the sign of energy and inspiration

In the morning, our students vibrated to the rhythm of a sporty morning, between challenges, cohesion and good humor. In the afternoon, heading towards the future with a Masterclass of orientation: mapping out your academic and professional path at the UEMF, led by the team of theEuromed innovation center (EIC).

Between surpassing oneself, encounters and projection towards the future, this third day perfectly illustrates the spirit of the integration week: learning, sharing and growing together.

https://lnkd.in/p/euX8TxZD

Sport, solidarity and team spirit

Integration Week - Day 4: A day 100% sport, energy, and learning. Our students competed in several disciplines: football, volleyball, basketball, swimming, and ping-pong. A high-energy atmosphere where team spirit and self-improvement were the order of the day. In the afternoon, it was time for the first aid workshop: learning life-saving actions and acquiring the right reflexes to protect and help others. This valuable knowledge illustrates the importance of solidarity and responsibility.

At the end of the day, the highly anticipated gala match pitted alumni and incoming students in a spectacular duel. With adrenaline rushes, fair play, and passionate cheers from the fans, the match thrilled the entire campus.

A fourth day marked by effort, mutual aid and conviviality

https://lnkd.in/p/ePDpNV7Q

Eight UEMF researchers recognized among the world's top 2% of most influential scientists

The Euromed University of Fez (UEMF) is once again in the spotlight on the international scientific scene.Eight of its research professors were ranked among the top 2% of the world's most influential scientists according to the 2025 edition of the Stanford University ranking, produced in partnership with Elsevier and Scopus.

This distinction is based on demanding bibliometric criteria (citations, h-index, co-publications, overall impact) and reflects the progress of Moroccan research, which now has 134 distinguished researchers. UEMF stands out in particular by doubling the number of its recognized researchers, going from 4 in 2024 to 8 in 2025.

This international recognition confirms the quality and impact of the work carried out at UEMF, strengthens its global visibility and constitutes a source of pride for the Moroccan scientific community.

SDG5 Report: Gender Equality

Introduction

Morocco has a Strategic Action Plan for the Institutionalization of Gender Equality in the Education System. Respect for fundamental human rights, including equality, as defined by UN standards, is binding not only on the State (Article 19 of the Moroccan Constitution of 2011) but also on all organs of society, including universities.

Definition of gender equality at UEMF: equal visibility, autonomy, responsibility and participation of both sexes in/in all spheres of university life" (Adaptation of the Council of Europe Definition).

UEMF Women and Men Equality Charter

The University has a Women and Men Equality Charter shared and validated by its authorities.https://ueuromed.org/sites/default/files/upload/files/charte-egalite-homme-femme-a-luemf_1.pdf

UEMF commitments:

Gender equality is fully integrated into the UEMF university's strategic plan, which promotes equal treatment between women and men in terms of access to employment, training, mobility, promotion, and equal pay. UEMF aims to achieve parity (equal numerical presence of men and women) and prohibits all discrimination based on gender, ethnic and social origins, language, religion or beliefs, opinions, disability, age, etc.

Our Charter aims to develop an action plan:

1. Appoint a contact person

2. Use non-sexist, non-discriminatory, non-stereotypical communication tools

3. Organize awareness-raising and training activities with a view to sharing the knowledge and tools necessary to effectively promote equality between women and men and combat discrimination among staff

4. Support gender research

5. Prevent all forms of violence and harassment.

6. Develop women's leadership and promote equality in the exercise of responsibilities and participation in governance bodies.

The "Equality between Women and Men" charter is widely distributed within the UEMF and among its partners. This charter is revised periodically.

UEMF Gender Policy

The University has set itself the objective of:

a. achieve and maintain parity in numbers between men and women, using positive discrimination in cases of equality of profiles and skills,

b. ensure the same salary for the same functions between men and women, c. promote gender parity in access to senior positions at the University,

d. include as many people with reduced abilities as possible,

e. include people from immigrant backgrounds;

Scholarships dedicated to:

a. students from the most disadvantaged backgrounds, particularly girls from rural areas, with full coverage of tuition fees, accommodation costs and catering costs,

b. students from Sub-Saharan Africa

Monitoring and correction of gaps: salaries, rate of female applications:

a. an "Equal Opportunities" committee is set up at the level of the University Presidency to make continuous improvements concerning the Equal Opportunities policy, to implement it and to monitor and audit its application,

b. UEMF continuously monitors the application rate of women, their acceptance and recruitment rate and the rate of completion of studies and graduation from university,

c. an incentive scheme for scholarships is put in place to encourage applications from women in fields where they are under-represented (artificial intelligence, mechanics, civil engineering, management positions, etc.) in addition to a policy based on positive discrimination to give more opportunities to women in the event of equal profiles and potential,

d. UEMF undertakes to ensure fair salary treatment between the sexes and to correct any discrepancy as soon as it is noted.

Maternity and paternity

In accordance with its strategy and its objectives of social and societal responsibility, UEMF ensures the health and well-being of its human resources, particularly during the period of pregnancy and maternity/paternity with the most favorable conditions on Moroccan soil.

Indeed, and unlike what is practiced elsewhere where the 14-week maternity leave is covered by the CNSS (National Social Security Fund) with a maximum payment of 6000 Dh/month, the Euromed University of Fez pays the full salary to its employees for the entire period of maternity leave, regardless of the employee's rank within the University's organizational chart.

Constant monitoring of good working conditions for pregnant women is ensured, and personalized monitoring is carried out by the paramedical staff, and the health and safety committee as appropriate. All employees benefit from supplementary health/maternity insurance which provides reimbursement of 90% of medical expenses and care incurred in connection with maternity, in addition to the granting of a lump sum maternity allowance after childbirth for female employees of UEMF and the wives of employees.

As part of its Fez-Smart-Factory project, the University is setting up a nursery dedicated to the children of all University employees and students.

Non-discrimination against women and harassment

Discrimination against women, as well as moral or sexual harassment, are severely punished. Discrimination of any kind, and especially against women, is prohibited from the University's practices and operations. Any person who:

1. making derogatory remarks towards women regarding:

a. physical appearance,
b. the style of clothing,
c. the way of being, speaking and behaving;

2. disadvantaging women in:

a. the exercise of their functions,
b. access to responsibilities when they have the required qualifications and skills,
c. staff evaluations, d. awarding of grades and academic assessments for students;

3. Anyone reporting discrimination based on any prejudice is fully protected.

The UEMF has an Anti-Harassment Committee.

Participation in international networks: Consortium for Equality between Women and Men (EFH)

UEMF was selected following an international call for proposals to be a member of the international consortium of eleven French-speaking institutions that will work to achieve gender equality on their campuses. The consortium's objective is to "Achieve gender equality and empower all women and girls." https://www.auf.org/nouvelles/actualites/universites-francophones-sengagent-lauf-legalite-femmes-hommes-lancement-officiel-consortium-international-initie-lauf-soutien-d/

THEConsortiumis a space for reflection and sharing focused on the notion of pooling tools and best practices. The Consortium's institutions work together, through concrete actions, to achieve visible and measurable changes regarding gender equality on their campuses and at several levels (students, teachers, government). The Consortium is supported and equipped by the AUF and its partners, and operates as a network.

It consists of 11 establishments, in 11 countries in various regions of the world and on 4 continents:

- **Albania – University of Tirana**
- **Algeria – Abdelhamid Ibn Badis University of Mostaganem**
- **Cambodia – Royal University of Law and Economics**
- **Egypt – Alexandria University**
- **France – CY Cergy Paris University**
- **Haiti – Quisqueya University**
- **Lebanon – Lebanese University**
- **Madagascar – University of Toamasina**
- **Morocco – Euromed University of Fez**
- **Uganda – Makerere University Business School**
- **Quebec, Canada – Polytechnique Montréal**

The Gender Equality Consortium (EFH): from idea to concrete achievements - AUF

Women and Men Equality Consortium in which UEMF participates

THEConsortiumis a space for reflection and sharing focused on the notion of pooling tools and best practices. The Consortium's institutions work together, through concrete actions, to achieve visible and measurable changes regarding gender equality on their campuses and at several levels (students, teachers, government). The Consortium is supported and equipped by the AUF and its partners, and operates as a network.

As part of the activities and achievements that have marked the roadmap of the EFH Consortium in which UEMF participates, since the official launch event on June 29, 2021, here are the major achievements in this direction:

- State of play of EFH in the eleven member universities;
- Awareness sessions and training on EFH with the support of experts;
- Information and working sessions around tools created by international associations: UN Women - HeForShe and WEPs (Women's Empowerment Principles) adapted to the university environment;
- Information session on the AUF and its partners' systems in connection with EFH;

- Workshops for designing, writing and presenting the EFH action plan project for each university;
- Participation in various international webinars on the theme of EFH;
- Creation of an accessible "SDG5 - Gender Equality" toolbox made up of French-language resources.
- Production of a video of the consortium members on the occasion of March 8, 2022

The Gender Equality Consortium (EFH): from idea to concrete achievements - AUF

Contribution to the work of the EFH consortium

Using digital technology to empower women, Prof. Mustapha Bennouna (UEMF)

Digital development is a means of accessing employment and economic independence, and therefore a driver of gender equality. It is a path to autonomy facilitated by modern communication tools and has become necessary to drive local and regional development. Digital technologies, used under the right conditions, can contribute to achieving the objectives set out in the Sustainable Development Goals by 2030 by stimulating economic growth and improving governance and outcomes, particularly in the areas of education (SDG 4) and health (SDG 3). However, these positive impacts can also be undermined by the potential role of digital technology in amplifying social, economic, and political inequalities.

The main challenges in the ICT field, particularly in developing countries, are the lack of access and skills (especially for vulnerable populations), online harassment often targeting women, and the underrepresentation of women in IT fields. In the field of Artificial Intelligence (AI), for example, the absence of women translates into automated discrimination via algorithms.

The involvement of women in these areas is an asset for enriching innovation and meeting their specific needs.

As a training space, but also as an actor in a sustainable and inclusive society, the role of the University is to impose digital technologies as a tool for EFH by adapting them to the needs of women.

The consortium operates collaboratively and participatorily, focusing on the concepts of sharing and pooling. The work will take place over a year, from June 2021 to June 2022.

Training courses are scheduled with:

- The Egaé group: a consulting, training and communications agency specializing in gender equality, the fight against discrimination, diversity and the prevention of sexist and sexual violence.
- He for She(https://www.heforshe.org/fr)is a solidarity campaign for thegender equalitylaunched by theUN Womenlts goal is to engage men and boys in the fight forgender equalityand thewomen's rights, encouraging them to take action against theinequalitiesencountered by women and men.

Furthermore, the UEMF submitted a project in response to the call for tenders (Europe Aid) on violence against women. And is participating in the South-South mobility program (Equality of Women and Men).

Gender statistics within the UEMF

1-Evolution of the percentage of female students at UEMF

	2016-2017	2017-2018	2018-2019	2019-2020	2020-2021	2021-2022
% female	47.48%	47.78%	49.60%	53.96%	53.96%	54%

2-Evolution of the percentage of scholarship students at UEMF

	2016-2017	2017-2018	2018-2019	2019-2020	2020-2021	2021-2022
% of scholarship holders	56.00%	67.39%	62.37%	63.25%	62.32%	62.2%

3-Evolution of the percentage of female students graduating from UEMF

	2016	2017	2018	2019	2020	2021-2022
% of graduates	58.82%	50.00%	57.457%	55.56%	54.75%	54.23%

4-Evolution of the percentage of female staff at UEMF

	2015	2016	2017	2018	2019	2020	2021
% of female staff	30%	31%	42%	43%	51%	46%	49%

Participation in trophies related to gender equality
Label won by UEMF

UEMF was recognized for its gender equality strategy at the 6th edition of the Professional Equality Awards ceremony.

The UEMF won the certificate of excellence for its Gender Equality Strategy by obtaining the highest score in each of the ten themes proposed in the Trophy application file.

The Professional Equality Trophy aims to recognize the commitment of institutions and reward the best actions undertaken in terms of gender equality, to promote and share good practices initiated by institutions for the promotion of professional equality and to raise awareness among all economic and social actors of the benefits of the recognition of professional equality on the performance of institutions.

UEMF receives the professional equality award

The Euromed University of Fez (UEMF) received the Fes-Meknes regional prize during the 7th edition of the Professional Equality Trophy chaired by Mr. Younes Sekkouri, Minister of Economic Inclusion, Small Business, Employment and Skills.

During this ceremony, the Fes-Meknes Region Professional Equality Trophy was presented by the Minister to Professor Mostapha Bousmina, President of the Euromed University of Fez. This award recognizes the UEMF's commitment and efforts in the area of gender equality and highlights the good practices adopted by the institution for the promotion of professional equality.

International Women's Day

March 8, 2022

On this International Women's Day, the Euromed University of Fez, in the person of Mr. President Pr. Mostapha Bousmina, welcomes the commendable efforts that the University is undertaking in this direction to ensure for all students and employees a healthy environment where equality and kindness prevail. Pr. Mostapha Bousmina took this opportunity to highlight the contribution and commitment of the women of the UEMF in the progress of the university. Thanks to their ambition and dedication, they now occupy key positions that shape society: they are leaders, influential women and a force for proposal.

Euromed University of Fez celebrates International Women's Day

March 8, 2023

The Euromed University of Fez, as every year, celebrates the UEMF women who inspire us with their ambition, creativity, dedication and strength.

The opportunity to recall the contribution and commitment of UEMF women to the progress of the university and also to celebrate the values of respect for the individual, equal opportunities and social inclusion.

In this sense, the UEMF is working concretely on the promotion of gender equality at several levels in perfect harmony with the enlightened orientations of His Majesty King Mohammed VI, may God assist him, who underlined, during his speech on the 23rd anniversary of the Throne Day, the major role that Moroccan women must play to support the socio-economic, cultural and social development of our country.

Celebration of March 8, 2023 by the clubs

To mark International Women's Day, several clubs and students organized various activities. Several competitions were on the agenda, including a chess tournament, a bridge-building

challenge, gaming, coding, and sports activities. The day was enlivened by a karate demonstration and an event by the Afrovibes club. The university also celebrated its women with a meeting with our student, Ms. Ornella Lekongo, for the release of her first book. Those present had the opportunity to discuss her career, her inspirations, and her passion for writing. The day ended with a thematic film screening and the award ceremony for the winning women.

video made by students to celebrate UEMF women

Activities and events organized between 2022 and 2023

Conference on the theme "Gender inequality and economic violence"

The Socioeconomic Impact Project (PISE) is a module that uses the project-based learning (PBL) approach to encourage students to explore real-world problems and challenges in an active and engaged learning mode. In this regard, all PISE projects (14) carried out by students of the Grande École program, 3rd year of the Euromed Business School, are part of the UEMF Gender Equality Action Plan (EFH).

As part of these Socioeconomic Impact Projects (PISE), a conference under the theme "Gender Inequality and Economic Violence" was organized on Monday, December 19, within the university. This event was hosted by Mr. Amine Baha, director of the Batha multifunctional center for the empowerment of women victims of violence, and Ms. Amsae El Mehdi, president of the Initiative Association for the Protection of Women's Rights (IPDF).

The conference was attended by more than 70 people (students, faculty and administration) in hybrid mode.

https://ueuromed.org/actualites/cycle-de-conferences/projets-impact-socioeconomique-par-leuromed-business-school

UEMF commits to gender equality with AUF March 17, 2023

Following the official launch of the international consortium of eleven French-speaking institutions working to achieve gender equality in June 2021, the Euromed University of Fez is participating in the experience-sharing workshop organized by the Agence Universitaire de la Francophonie.

The event, which took place this Friday, March 17, 2023, in Paris, was marked by the launch of the synthesis workshop of the work of the French-speaking Consortium for Gender Equality on Campus. This meeting, aimed at developing an action plan for gender equality, provided an opportunity to present the Consortium's achievements after its two years of activity, as well as its prospects, under the banner of international cooperation.

Considering that gender equality is not only a fundamental human right, but also a prerequisite for the establishment of a sustainable and socially responsible university, the AUF has decided to launch, with the support of UN Women, a call for applications on March 8, 2021 for the creation of a consortium of establishments wishing to engage in an equality approach on their campuses.

Eleven institutions have been selected to join this international collective. The ambition of this Consortium is to provide effective and operational support to institutions wishing to engage in this process with a view to taking action on the persistent inequalities that affect our universities.

Round table: Women's work in Morocco March 20, 2023

The Euroemd Institute of Legal and Political Sciences organized a round table on March 20, 2023 on: Women's work in Morocco, moderated by Ms. Kenza Semmoud, journalist and community activist.

This event, held as part of the celebration of International Women's Day, was an opportunity to recount the various forms of inequity and injustice that women still suffer in the workplace, both public and private. The activity was moderated by two students from the Institute.

Orange Day: Euromed Business School students and staff condemn violence against women November 25, 2022

It was by wearing the color orange, symbol of a better future, without violence against women and girls around the world and the official color of the international day of mobilization (Orange Day), that the students and staff of the Euromed Business School challenged the brutalities perpetrated daily against women.

For the Euromed Business School, coming together on this occasion is a sign of solidarity with all women and girls around the world, recalling that November 25 is a key event that should not go unnoticed.

“Violence against women”: conference by Ms. Najat Vallaud Belkacem December 21, 2022

During her 3rd conference at the Euromed University of Fez, Ms. Najat Vallaud-Belkacem raised the issue of violence against women, a phenomenon that persists today despite efforts made in this direction.

"Violence against women is considered one of the most flagrant and widespread human rights violations worldwide today," said Ms. Najet Vallaud-Belkacem. The objective of this conference is therefore to recall the seriousness of this phenomenon, which can cause physical, sexual, psychological, or economic harm or suffering to the victim, but also to society. This is a constant fight and a permanent commitment that Ms. Najet Vallaud-Belkacem has led since her appointment as Minister of Women's Rights and Government Spokesperson in 2012, and then Minister of Women's Rights, Urban Affairs, Youth, and Sports in 2014.

Professor Mostapha Bousmina, President of the Euromed University of Fez, took this opportunity to reiterate the importance of combating all forms of inequality, particularly cultural violence against women. "Violence against women is not only physical, psychological, or economic; it is primarily cultural violence," said Professor Mustapha Bousmina, who also highlighted the contribution and commitment of women at the UEMF. Thanks to their skills and dedication, they now hold key positions; they are leaders, influential women, and proactive.

Euromed University presents at the CUA Stakeholders workshop in Nairobi: "Programme for Women and Youth Entrepreneurs"

The Euromed University of Fez was present at the Stakeholders workshop of the African Union Commission (AUC) in Nairobi, Kenya, through the participation of Prof. Hafsa El Bekri, lecturer and researcher at the Euromed Business School of the UEMF and co-director of the Research Institute for European, Mediterranean, and African Studies (RIEMAS).

The African Union Commission's Stakeholders Workshop was held between September 20 and 22 in Nairobi under the theme "Programme for Women and Youth Entrepreneurs." The objective of this edition of the Workshop was to develop a continental entrepreneurship development program, taking into account regulation, finance, entrepreneurial skills development, education, access to digital technology, regional integration, and trade.

Celebrating the success of women pharmacists

As part of the conferences and meetings organized by the Euromed University of Fez, a seminar was held on October 26, 2023 in collaboration with the union chamber of pharmacy professionals of Fez, around the theme "The pharmacy professional: Innovations, expanded responsibilities and impact on healthcare". A meeting marked by a strong female presence, making this conference an opportunity to celebrate the success of women pharmacists represented by experts in the profession who delivered enriching speeches related to the theme.

This conference was attended by several professionals from the pharmaceutical and pharmacy sector, including Dr. Fatima Zohra Khayar, Industrial and Pharmacist, member of the Board of Directors of Pharmacy, Brussels, President of the Athena Center, President of the medical-pharmaceutical consultation of Schaerbeek, Brussels, and Dr. Aicha Zahi, Pharmacist and President of the Moroccan Society for the Valorization of the Pharmacy Act.

The speakers addressed various topics related to the theme, including the evolution of the role of the community pharmacist in Belgium: Trends and innovations, and also the extent to which pharmaceutical services in the community can be valued.

This meeting allowed both students and professionals in the field to exchange during the question and answer session with the speakers present on the different facets linked to the community pharmacist and the challenges of the pharmaceutical profession.

2024: Euromed University of Fez at the heart of action for the SDGs

Awareness raising on violence prevention

"On November 15, 2023, we immersed ourselves in stimulating discussions with the students of Laurence School. From confronting school violence to breaking down gender barriers for a more egalitarian society, every voice was heard. Let's remember together this day where we collectively discussed and aimed for an inclusive and equitable future!"

A big thank you to @Etablissement Laurence for being an exceptional partner during our event! Your support and collaboration had a significant impact. A special appreciation for the warm welcome from your dedicated team.

Organization of a PINK OCTOBER day

https://www.instagram.com/reel/C09S014MNkK/?igsh=MzRlODBiNWFlZA%3D%3D

March 8: Tribute to the UEMFist female force

“Our flagship action for October was part of the month’s theme “Pink October”. Rotaract UEMF organized a day dedicated to raising awareness and fighting breast cancer for students and staff at the university, including a breast examination session for women at the university.”

Euromed University of Fez (UEMF) celebrated International Women's Day on March 8 by paying tribute to the resilience and achievements of its female staff and students. President Prof. Mostapha Bousmina praised the commitment of UEMF women to the university's development, emphasizing the importance of equal opportunities and social inclusion. UEMF implements fair recruitment policies and guarantees equal access to leadership positions for women. During this celebration, under the theme "Investing in Women: Accelerating the Pace," the university also announced support measures for women during maternity and for mothers of children with disabilities, illustrating its commitment to an inclusive work environment. Finally, the event highlighted the growing role of Moroccan women as leaders and agents of change, actively contributing to the development of society.

Harmonies and Colors: Success of the 6th Edition of the UEMF Talents Show

Euromed University of Fez showcased the talents and creativity of its students during the 6th edition of its flagship event, the UEMF Talents Show, on Thursday, April 25. The event was an opportunity to celebrate diversity and creativity within the UEMF community, highlighting a variety of artistic talents, from music and dance to poetry and live painting.

Under the watchful eye of a jury of experts, including renowned personalities such as Ms. Nabila Maane, Ms. Nejjari Latifa and Mr. EL Alaoui Abdelouahab, the participants competed in daring to win the coveted prizes.

The evening's participants dazzled the audience with their performances. Ismail El Ayachi moved the audience with his cover of Abdelhalim Hafez's song "Ahwak," while Pitake Maureen Glaubert captivated the audience with her rap. Imane Essaber, accompanied by the group Umusic Academy, also caused a stir with a musical composition. Participant Imane Zguida was honored with a special jury prize for her poetic performance.

This evening embodied the richness and vitality of art in all its forms, reflecting UEMF's commitment to the cultural development of its student community.

UEMF nominated for the Zairi International Awards for Excellence in Higher Education in its 3rd edition

UEMF has been shortlisted for the third edition of the prestigious ZAIRI International Award for Excellence in Higher Education, in 2024, in the "Equity and Inclusion" category.

This award, administered annually by the Center for Learning Innovations and Personalized Knowledge Solutions (CLICKS), is an official international recognition of higher education institutions worldwide that are creating an impact in specific areas related to research, digital transformation, community engagement, internationalization, equity, etc.

2025: Euromed University of Fez intensifies its commitment to the SDGs

[Tribune] Wage inequality in Morocco: three months of “free” work for women

According to a report by the High Commission for Planning, published in 2024, the wage gap between men and women reached 23%. This means that in 2024, Moroccan women symbolically worked "for free" from October 8 until the end of the year. This observation highlights the urgent need for concrete action to reduce these inequalities and ensure true pay equity. This represents nearly three months of unpaid work compared to men, an alarming inequality that remains largely ignored in the public debate.

UEMF finalist in the Zairi International Awards : Recognition of its commitment to equity and inclusion in higher education

Euromed University of Fez is honored to be a finalist for the Zairi International Awards for Excellence in Higher Education (2024-2025) in the "Excellence for Equity and Inclusion" category. Our application was selected from hundreds of universities from 34 countries after a careful evaluation by a committee of international experts. This distinction reflects our continued commitment to inclusive and equitable education and underscores the positive impact of our mission within the community and beyond.

Cancer awareness in Sain by the Hands club

The event involved a visit to the Ziyat Child Protection Center for Girls, with the aim of providing advice and raising awareness about breast cancer prevention. It was a memorable and joyful experience, marked by enriching exchanges with the young girls on site, meaningful conversations, and the sharing of valuable advice to help them protect themselves. An unforgettable day, filled with laughter, connection, and kindness.

Breast Cancer Awareness Workshop : October 19, 2024

As part of Pink October, the Elite Club organized a breast cancer awareness workshop at the Avicenne Clinic in Fez. This workshop, led by Dr. Guennoun Ahmed, a specialist in gynecology, obstetrics, and infertility, brought together 20 students from Euromed University. Dr. Guennoun addressed key topics such as the importance of self-examination for early cancer detection and best practices for regular screening. Through clear explanations and interactive demonstrations, participants were able to acquire practical knowledge while sharing their questions in a friendly atmosphere. The workshop was very enriching thanks to the speaker's expertise and the dynamic discussions, providing both an educational and entertaining experience. The students expressed their satisfaction and their intention to share this knowledge within their communities.

Preventive screening day in Moulay Yaakoub for breast and cervical cancer

In partnership with the Moulay Yaakoub delegation, the Elite Club organized a preventive screening day dedicated to breast and cervical cancer. This event aimed to raise awareness in the local community about the importance of early detection to improve treatment and survival rates.

Key points :

- 68 peoplewere examined during free clinical consultations and examinations.
- 2 womenshowing signs of breast cancer were immediately referred to the Fez University Hospital for in-depth diagnosis and rapid treatment.
- Adviceon prevention and the importance of regular check-ups.

This initiative provided essential medical services to rural populations, detected critical cases early and increased awareness of cancer prevention.

UEMF Elite Club Report

Medical & Humanitarian Caravan: ROTARACT UEMF

February 22-23, 2025, this weekend, we took winding roads and crossed rain-soaked paths to reach the heights of Ikaouen—where access to healthcare is limited, but solidarity knows no boundaries.

Thanks to @association_arads, our incredible doctors and specialists, the generosity of @sante_bio_premium for their donation of feminine hygiene products, and above all the unwavering commitment of our members, we were able to:

- Raise awareness about feminine hygiene and measles prevention
- Provide gynecological and pediatric consultations
- Distribute essential medicines and warm clothing
- Bringing comfort to a community in need

Despite the rain, despite the distance, our mission remained intact. Because it is in these moments—between fatigue and satisfaction—that we fully grasp the meaning of commitment.

SDG6 Report: Clean Water and Sanitation

Water Policy at UEMF

The UEMF campus is an Eco-Campus that meets the highest international standards for sustainable development. It was certified by COP 22 and recently obtained the Francophone label for responsible innovation.

Actions taken

- Raising awareness among the university community regarding the reduction of water consumption and periodic rounds by the Heritage Department to detect possible leaks and monitor the application of the measures put in place;
- Recording of water consumption statistics and decision-making in the event of leaks or waste;
- Courses and seminars on sustainable development (one of the seven pillars of cross-curricular teaching within UEMF) and environmental responsibility.
- Use of push taps
- Installation of pipes and basins for rainwater recovery in progress: the UEMF is connected to the urban network;
- Recirculation of gray water (in progress);
- Uses of wells for irrigation and watering;
- Closed circuit waterfall;
- Free drinking water fountains
- Drinking water available and free for the UEMF community;
- Well for watering and irrigation
- Supplying toilet flushes with recovered water
- Lake for rainwater collection
- Landscaping and management of green spaces: The UEMF adopts a rational management of its green spaces adapted to the hot and continental climate of the Fez-Meknes region. Drip irrigation allows significant water savings. The majority of trees are olive trees (which are heat-resistant and do not consume a lot of water).

Teaching and research-innovation actions

UEMF has several training and research programs concerning sustainable development in general and water in particular:

- Master in Environmental Engineering and Water Management;
- Master in Renewable Energy and Energy Efficiency
- Master in Design and Engineering of Green Buildings;
- Master in Transport and Sustainable Mobility;
- Civil Engineering (water resources training modules, etc.)
- Architecture

Modules and courses taught:Water-water treatment-Fluid mechanics - Energy and environment - Analytical chemistry and environment, water, soil and air - Water quality in watersheds - Aquatic ecology - Remote sensing and GIS - Hydrology, urban hydrology and hydrogeology - Water treatment - Modeling of hydroecosystems - Water management, dams, flows, water pollution, water saving, etc.

Technology platforms

UEMF has several high-level technological platforms in different areas of water analysis and water chemistry:

Devices: spectrometers, spectrophotometers, water chemistry, sensors, turbidimeters, process photometers, metal analyzers, COD analyzers, etc.

These platforms are shared and are used for training through and for research and also to conduct partnership and finalized research. They are also the tool allowing teacher-researchers and students to imagine, design and develop new devices, processes and products with the objective of technological transfer to the national private sector or the creation of new startups and spinouts. They are also made available to partner universities, particularly those in the Fez-Meknes region and nationally, and also to companies to support them in their innovation strategies and strengthening their competitiveness in a highly competitive international environment.

Partnership

Participation in policy development at local, regional and national levels to contribute to water conservation.

Reduction of drinking water consumption

Two objectives are defined for the demand for drinking water:

- Limiting sanitary water needs, for example through hydro devices- eeconomical.
- Limit the use of drinking water for uses other than “food” and “personal hygiene” (HQE).

Thus, to meet the first requirement, targets for maximum flow rates are allocated to the different types of sanitary devices:

Dual flush 3L/6L - Urinal 1L - Sink faucet 3L/min Shower 6L/min. On the other hand, drinking water is not necessary for certain uses such as toilets, watering and maintenance (cleaning) of the building.

In these cases-Lhas, gray water as well as rainwater can afteres treatment replace the'drinking water. This therefore requires a second water network that is not potable on the plot and involves significant water savings.

There are four types of water to be managed on site: - Rainwater - Grey water, or lightly loaded wastewater - Very loaded black water - Wastewater coming out of the kitchens.

Are rainwaters-same to be divided into two parts which are the reusable clear rainwater collectable on the roofs and with other storage devices as well as the loaded rainwater running off the parking lots and roads. In the water management envisaged and in order to make the best use of the potential of the project, the clear rainwater is collected from the entire roof surface of the site then stored in underground concrete tanks distributed regularly throughout the site.

The stored rainwater will be reused either directly for cleaning the facades and irrigation or indirectly after a phytorestoration treatment. The water reused directly for cleaning will then be drained via the trenches at the foot of the facades and infiltrated at the same time as the irrigation water through the vegetated surfaces. The rainwater loaded with pollutants from the roads first passes through a hydrocarbon separator to decontaminate it and then joins the phytorestoration treatment. Similarly, gray water from showers and sinks is pre-filtered before reaching the filter basins.

Wastewater from the site's kitchens passes through an oil and grease filter and then a heat recovery system (heat pump) to recycle it, then ends up in the sewers. Black water is collected at the toilet outlet and sent directly to the sewers.

Water Conservation - Underground Water Reservoir (Fire and Sanitary and Cascade, Euromed University of Fez)

Water Conservation - Underground Water Reservoir (Irrigation, Euromed University of Fez)

Distinctions

The UEMF campus awarded the COP 22 label

UEMF finalist for The Green Gown Award (2022)

The Green Gown Award is an award that recognizes outstanding sustainability initiatives undertaken by universities and colleges worldwide. It is organized in partnership with the United Nations Environment Programme (UNEP) and supported by the AUF, the Association of Commonwealth Universities (ACU), and the International Association of Universities (IAU).

This year, 56 finalists were selected, representing 19 countries around the world. Among them are five member institutions of the Agence Universitaire de la Francophonie:

- In Canada: HEC Montréal;
- In France: Institut Mines-Télécom Nord Europe;
- In Morocco: Euromed University of Fez (UEMF);
- In Mexico: National Autonomous University of Mexico and University of Veracruzana.

Responsible Campus of the Year

Euromed University of Fez was named winner of the "RESPONSIBLE CAMPUS of the YEAR" Award, during the ceremony organized in Paris, on Tuesday, October 4, 2022, under the effective presidency of the Minister of Higher Education and Research of the French Government.

The "Responsible Establishment of the Year" category recognizes UEMF's commitment to the SDGs and its lasting impact in becoming a responsible organization with regard to the challenges of the transition in four main areas:

- Leadership and governance;
- Real estate and operations;
- Learning, teaching and research;
- Partnership and commitment.

Responsible Innovation Label

The Responsible Innovation Label was awarded to UEMF during its first 2020/2021 edition for its project entitled "**Sustainable UEMF Program**". This label is valid from 25 10 2021 to 26 10 2024.

The Responsible Innovation Label is intended for higher education and research institutions. Its objective is twofold: to map and promote responsible innovations from French-speaking universities around the world, but also to deploy the responsible innovation network to foster synergies between universities, civil society, and the socioeconomic sector working for the development of a responsible society.

Water desalination by forward osmosis: stretch solutes and recovery methods – review

Imane Chaoui

Prof. Souad Abderafi

Prof. Sébastien Vaudreuil

Professor Tijani Bounahmidi

Water production has become a serious concern these days due to numerous environmental and social factors. Conventional desalination processes are considered energy-intensive, as energy consumption accounts for 50 to 60% of the cost of water production.

In this article, a state-of-the-art update of newly developed suction solutes such as deep eutectic solvents, ionic liquids, smart materials, and conventional FO suction solutes was performed. Finally, the challenges, opportunities, and future prospects of FO technology were discussed.

Conference and broadcast

Water Supply Management by Dr. Ahmed Rachid El Khattabi

Dr. Ahmed Rachid El-Khattabi, a renowned specialist in urban and regional planning at the University of North Carolina at Chapel Hill, gave a seminar to civil and environmental engineers studying at the Euromed Polytechnic School of UEMF.

The seminar focused on the concept of water demand management as an approach that treats supplies as fixed in the short term while aiming to adjust demand.

Conference: The impact of climate change on water resources March 8, 2023

A conference led by Professor Lhoussaine BOUCHAOU on the impact of climate change on water resources, illustrated by case studies applied to the Moroccan context.

During this event organized by the Euromed Polytechnic School (EPS), Professor BOUCHAOU gave a general overview of existing water resources in Morocco, focusing on the water cycle and linking it to the country's climatic context in order to introduce the issue of water stress, as well as the necessary characteristics of a balanced integrated water management process. He then discussed the research structures dealing with water at the national level, as well as some ongoing development projects.

The speaker closed his seminar by detailing various research topics including:

- Climate processes and atmospheric circulation;
- Snow dynamics in the Moroccan Atlas Mountains;
- Groundwater dynamics and water quality;
- Agricultural water management: water saving techniques.

Roundtable: Water, Agriculture and Food Security, Building a Nexus Approach to Africa's Climate Change Narrative February 2, 2023

The Research Institute for European, Mediterranean, and African Studies (RIEMAS), a Think-Tank at the Euromed University of Fez, organized its first roundtable of the 1.5 Hours for Climate - Africa Moonshot Initiative, which focused on the theme "Water, Agriculture and Food Security: Building a Nexus Approach to the Climate Change Narrative in Africa".

1.5 hours for Climate – Africa Climate Moonshot Initiative, is a project led by RIEMAS, 4C Maroc, Euro-Mediterranean Economists Association - EMEA, Mercure Cab Fatima B. NDOYE and Positive Agenda Advisory. These monthly thematic meetings aim to bring together high-level guests and regional experts around major issues related to climate action in order to contribute to the creation of a dynamic conducive to advocacy in favor of a climate agenda anchored in African realities ahead of COP28.

This round table was moderated by Professor Hafsa El Bekri, lecturer at the Euromed Business School and Co-Director of RIEMAS.

Educational tour of the Al Wahda Dam, currently the largest hydraulic infrastructure in the Kingdom May 6, 2023

First-year civil engineering students at Euromed Polytechnic School, accompanied by their professor Mr. Issam Al Korachi, carried out an educational visit to the Al Wahda Dam, currently the largest hydraulic infrastructure in the Kingdom, on May 6, 2023.

The students received detailed explanations from Mr. Kassemi, engineer at the Sebou Hydraulic Basin Agency, and Mr. Tantaoui, head of the dam, particularly regarding the type and structure of the development, the nature of the hydroelectric station, as well as the operating principle of the dam's ancillary structures, such as the flood spillways and valves.

Educational visit to the Al Wahda Dam, currently the largest hydraulic infrastructure in the Kingdom

CLUB WE GREEN IN ACTION: "ENHANCING IFRANE NATIONAL PARK: LET'S OPEN OUR EYES!"

Saturday, October 28, 2023; the “We Green” club of students from the Euromed University of Fez (UEMF) organized an awareness day for its members through visits to several environmental centers as well as a clean-up action in the Ifrane National Park.

As part of these social activities, the "We Green" club kicked off this day aimed at raising public awareness of environmental issues with the main objective of: Encouraging reflection on environmental issues, creating ecological habits through a cleaning action and

awareness of biodiversity issues through a visit to the Ifrane National Park, its fish farming station in Ras El Mae and its cedar house. The day was marked in particular by a cleaning action in the forest of the Zerouka I lake in Ifrane with the ambition of reducing the negative impact of waste and residues that affect the environment.

Note that Zerrouka I is a small, shallow, drainable artificial fish pond. It is located on the Zerrouka (or Zrouka) wadi, the main tributary of the Tizguite wadi. The dike is about 300m from the spring, so its waters flow directly into it. The reservoir is limited by a concrete wall, at least on the west bank. The spring waters are also used to supply the city of Ifrane with drinking water.

At the level of this body of water which is an integral part of the Ramsar Site of Oued Tizguite; the vegetation is not very varied (around fifteen species with a wide geographical distribution) and very limited in space, the edges of the lake being concreted and mowing is frequent there.

It is a fairly sheltered trout lake, somewhat interesting for birds. It is home to few wintering birds (less than 400 birds), the population being composed mainly of divers: coots and crested coots, little grebes, pochards, tufted ducks and ferruginous wagtails, with occasional shovelers and/or mallards. Among the breeders, the common coot (20-25 pairs), the crested coot (about 10 pairs) and the little grebe (5-8 pairs) are the most regular.

Finally, it should be noted that the Euromed University of Fez is a public utility, non-profit institution with an eco-campus that meets international standards and provides a pleasant and stimulating environment for its students from more than 40 nationalities.

UEMF graduates are equipped with training in soft skills, study skills, life skills and professional skills and this profile; based on several pillars; allows students to acquire numerous skills related in particular to multilingualism, multiculturalism, innovation and entrepreneurship, the digital environment, international mobility, and sustainable development in addition to the pillar of social responsibility and eco-citizenship through which students are instilled with the values of respect for the environment, sustainable development and civic responsibility.

2024: Euromed University of Fez at the heart of action for the SDGs

Wahid BENKHADDA wins the Best Oral Communication Award at the ISMESH 2024 International Symposium

We are proud to announce that Mr. Wahid BENKHADDA, a fourth-year doctoral student, won the prestigious award for best oral presentation at the ISMESH 2024 International Symposium. This distinction was awarded to him for his outstanding presentation during the event, which was held on May 7 and 8 at the Ecole Supérieure de Technologie in Fez.

Mr. BENKHADDA's participation in this symposium was part of his thesis project in the field of materials and environmental chemistry, in which he raised the issue of olive margins; a widespread problem at the regional, national level but also throughout the Mediterranean basin region.

We extend our sincere congratulations to Mr. Wahid BENKHADDA for this well-deserved recognition, which underlines the commitment of UEMF and its community to academic excellence and innovative research.

UEMF celebrates International Mountain Day differently

On March 1, 2024, the Euromed University of Fez organized an international conference entitled "Restoring mountain ecosystems: the case of the Fez-Meknes region," in collaboration with several partners, including the Institute of Legal and Political Sciences (ISJP) and the African Network for Sustainable Development (RA2D). The event, organized in conjunction with International Mountain Day, addressed the challenges of restoring mountain ecosystems, in line with the initiative of the United Nations Decade on Ecosystem Restoration (2021-2030).

Over two days, the conference brought together experts, researchers, and field stakeholders to discuss ecological issues and sustainable development in the mountains through panels focused on the social, economic, and political challenges of this theme. The second day took place in the municipality of Tazouta, with practical activities such as hiking, awareness-raising workshops, and local product exhibitions. This edition highlighted the importance of preserving mountain ecosystems while involving local populations and strengthening the solidarity economy.

2025: Euromed University of Fez intensifies its commitment to the SDGs

2nd edition of the Students' Innov'UP 2024 Hackathon: Innovating in the face of water stress

The 2024 Students' Innov'Up Innovation Hackathon, organized by the European Union in Morocco, the EIB, and the Euromed University of Fez, took place on December 16 and 17 under the theme "Transforming Water Stress into a Driver of Resilience." Following a three-week pre-hackathon phase, 11 finalist teams presented their innovative projects to address water-related challenges.

Three teams were awarded prizes:

- Hydrovision (1st prize) for the “Aqua” applicationNoah",
- Pure Aqua White (2nd prize) for a wastewater reuse system,
- Créatech (3rd prize) for a solar device for producing drinking water.

The “coup de cœur” prize was awarded to Raha for HydroPoly, an educational game on water management.

UEMF at the heart of discussions on renewable energies at EnerGaïa

The Euromed University of Fez participated, as part of the Moroccan delegation led by the Green H2 Cluster, in the renewable energy forum.EnerGaïafrom December 10 to 12, 2024.

Several contacts have been made, in particular with the Vice-Presidency for the Economy of the Occitanie Region for partnerships in terms of training with universities and institutes in the Region, incubation and cultural and sporting activities with the ambition of initiating lines of research in these fields alongside the creation of courses in sports and team management.

Green hydrogen and the entire inherent value chain were also at the center of discussions with France Hydrogène, as were the theme of water and the underlying technologies, in addition to the Agritech or precision agriculture sector.

The participation of the Euromed University of Fez in the Technocampus Hydrogène Occitanie, which aims to be the largest center in France for research, testing, technological innovation and teaching in the field of green mobility, was also discussed.

Doctoral Thesis Defense in “Chemical Engineering” by Mr. Ali Seid ALI

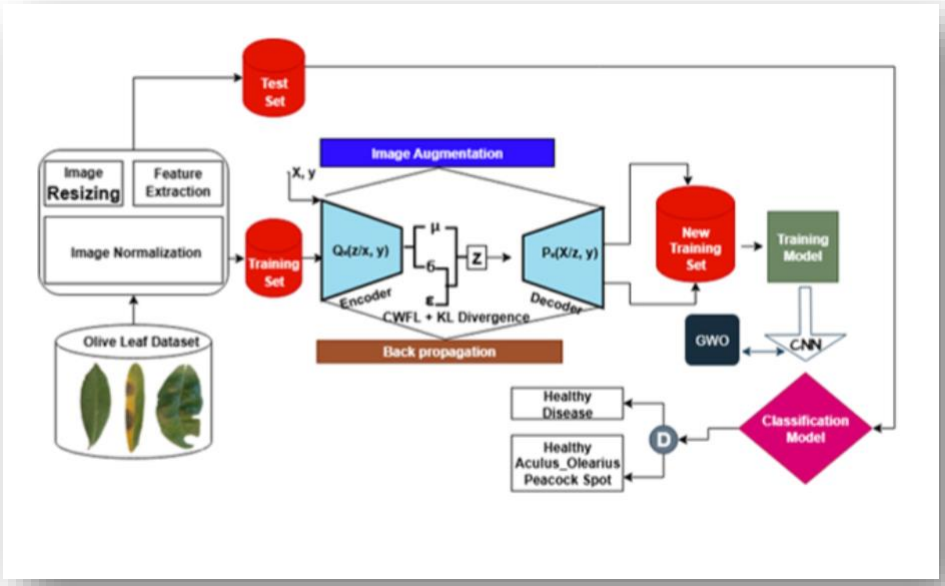

The Euromed University of Fez (UEMF) is pleased to announce the upcoming doctoral thesis defense in Chemical Engineering by Mr. Ali Seid ALI. The defense will take place on June 21, 2025, at 10:00 am, in The Great Hall of the Incubator (LOC001994) at UEMF. The thesis, titled “Analysis of Photovoltaic Thermal (PVT) Driven Forward Osmosis and/or Membrane Distillation Water Desalination”, explores innovative and sustainable methods for water desalination using renewable energy technologies. This research contributes to advancing scientific knowledge in the fields of clean energy, water resource management, and environmental sustainability.

SDG 6 – Clean Water and Sanitation: UEMF Ranking in THE Impact Ranking 2025

Rank	Name	Clean water and sanitation	Overall
101–200	Ibn Tofaïl University Morocco	64.4–74.5	70.3–76.1
201–300	Abdelmalek Essaâdi University Morocco	56.5–64.3	60.9–65.5
401–600	Mohammed V University of Rabat Morocco	41.7–51.3	60.9–65.5
601–800	Euromed University of Fez Morocco	31.8–41.6	65.6–70.2
601–800	International University of Rabat Morocco	31.8–41.6	70.3–76.1
601–800	Université Hassan 1er Morocco	31.8–41.6	1.7–49.7

Doctoral thesis defense in “Artificial Intelligence” by Mr. Kaloma Usman MAJIKUMNA

Thesis defense – Kaloma Usman MAJIKUMNA
Title: Managing plant survival and disease risks under water stress using artificial intelligence: the case of olive trees in Morocco

This thesis studies the impact of water stress and diseases on olive trees in Morocco, by combiningartificial intelligence, remote sensing and field experiments. An innovative deep learning model has been able to detect diseases with 99.2% of predecision, while tests of'irrigation have identifiedethe varietiesetes and most resilient indicators. The results provideconcrete recommendations for sustainable and climate-adapted agriculture.

SDG7 Report:Clean and affordable energy

Introduction

The Clean and Affordable Energy theme is one of the priorities of the UEMF's strategic plan. It is both a training and research theme, and a topic on the agenda for the development of the eco-campus.

Training

Mechanical and Energy Engineering (EPS)

Main activities: Learning todefine the specifications, design, model, develop, optimize, implement and manage production systems for goods and services:

- in the fields of R&D services for industry, transport and energy for the “Mechanics and Industrial Engineering” course,
- in the fields of heat transfer, waste treatment and the development of process reactors for the “Energy Environment” course.

Electrical Engineering (EPS)

Main activities: Learn to design and implement electrical systems and acquire multidisciplinary skills in automation, signal processing, electronics and industrial computing.

- The “Electrical Energy” option trains engineers involved in the production, transport, distribution and transformation of electrical energy and renewable energies.
- The "Embedded Systems" option trains engineers capable of designing and implementing complex technological systems integrating components from different technologies (electronic components, computer and telecommunications hardware, software, networks, mechanical devices)

Civil Engineering (EPS)

Main activities:

Learn to:

- design and implement civil engineering structures using various types of energy: electrical, mechanical, hydraulic, solar, wind, oil, etc.
- use sustainable construction standards to best integrate ecology during each stage of the construction, renovation or rehabilitation of a building.
- identify the environmental impacts of projects throughout their life cycle.
- participate in the design and sizing of the envelope and equipment of high energy efficiency buildings.
- make the best choices and take the best decisions in a complex energy context

Course: Master's in Transport and Sustainable Mobility (EPS)

Modules taught in relation to energy

- Energy and climate change;
- Freight transport systems
- Environmental and transport economics;
- Sustainable development;
- Sustainable transport and mobility
- Environmentally friendly vehicle engineering;
- Operation of rail and guided transport;
- Choice of transport infrastructure and sustainability;
- Logistics infrastructure engineering;
- Supply Chain Management;

Master: DESIGN AND ENGINEERING OF GREEN BUILDINGS (CIBV)

Modules taught in relation to energy:

- Transfer phenomena;
- Fluid mechanics;
- General and applied thermodynamics;
- Materials for energy efficiency in buildings;
- Standards and climate;
- Ventilation and lighting of the building;
- Air conditioning, heating and energy integration;
- Renewable energy for buildings;
- Eco-design of a building;
- Energy analysis and economic evaluation of the building;
- Green and smart buildings;
- Sustainable development and waste management;
- Preliminary design of an efficient building;

Specialized Master: Functional Materials and Additive Manufacturing (EPS)

Modules taught in relation to energy:

- Ceramic, polymer and metallic materials
- Design adapted to additive manufacturing;
- Energy beam additive manufacturing;
- Industrial manufacturing processes;
- Mechanics and aging of materials;
- Additive manufacturing for the aeronautics and automotive industries;
- Additive manufacturing for the medical field;
- Biomaterials and their applications;

Specialized Master's: Environmental Engineering and Water Management (EPS)

The program aims to train managers with a cross-disciplinary vision of environmental issues and water management in particular. The development of clean technologies (processes, methods, or tools) to solve environmental problems attributable to human activities is emphasized, with a focus on the Euro-Mediterranean region.

To do this, the student acquires in this sector advanced knowledge in the field of the environment (scientific and technical methods, knowledge of ecosystems, techniques for analyzing and treating pollutants, water management and treatment, remote sensing and GIS tools, national and international policy, green economy, etc.) and energy efficiency.

Architecture department

Main energy activities:

Learn to:

- Promote urban planning and architectural choices that prioritize natural resources, integrate bioclimatic principles and guarantee good thermal insulation of the entire building envelope while respecting current legislation.
- Use materials that consume little energy for their manufacture, transport and implementation.
- Use construction techniques with low environmental impact and low energy consumption.
- Promote the use of renewable energy and/or low-polluting fuels.
- Opt for the choice of "smart" equipment (low-consumption lighting and household appliances, efficient and correctly sized heating, etc.).

Lifelong learning

The UEMF also offers a wide range of continuing education courses in the energy field.

https://ueuromed.org/formations-courtes

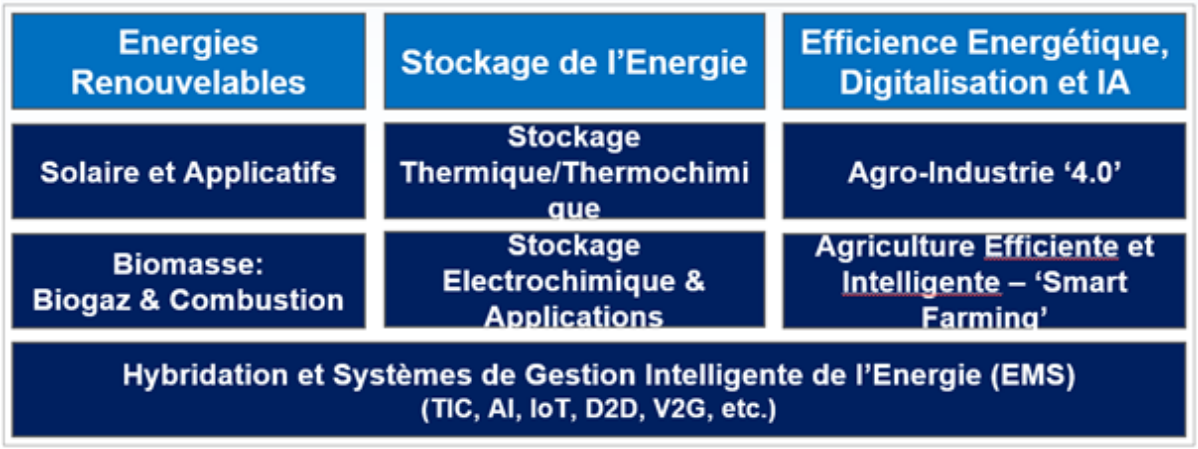

It also defines offers in response to the needs of local and regional partners

Research and Development

Innovation structures

Agro Energy TIC Valley

It is a joint platform for testing, research and training in the fields of bioenergy and energy storage, created jointly by the EuroMed University of Fez and the Institute for Research in Solar Energy and New Energies (IRESEN).

Publications and scientific partnerships

UEMF contributes to international scientific production in the fields of energy: energy efficiency, renewable energies, intelligent energy management, thermal energy, etc.

https://ueuromed.org/innovation/scientific-production

Several doctoral theses are being conducted on the subject of energy

https://ueuromed.org/formation-doctorale/formation-doctorale-sciences-de-lingenieur

The UEMF also carries out a large number of projects, some within a cooperation framework:

https://ueuromed.org/innovation/research-project

Technology platforms

UEMF has several high-level technological platforms in different fields: Additive Manufacturing (3D) and Prototyping, Process Engineering and Civil Engineering, Materials-Synthesis and Characterization, Biotechnology and Biomedical Engineering, Renewable Energies-Storage and Energy Efficiency, Digital Engineering and Artificial Intelligence.

Additive Manufacturing (3D) and Prototyping Platform

The Platform contains both extractive and additive technologies to design, manufacture and characterize a wide spectrum of materials and shapes: 1. Polymers, 2. Metals, 3. Composites, 4. Ceramics and 5. Concrete. It is the largest additive manufacturing (3D printing) platform in Morocco and probably on an African scale. It includes around fifty 3D printing machines, some of which are designed and manufactured at UEMF. A startup for the design and manufacture of 3D printing machines has been created by UEMF. Currently, several research contracts are being carried out in partnership with the aeronautics and aerospace, automotive and biomedical sectors.

Digital Engineering and Artificial Intelligence Platform

UEMF has created the first Engineering School entirely dedicated to Digital Engineering and Artificial Intelligence (EIDIA) in the Euro-Mediterranean-African Area. This School is equipped with several cutting-edge infrastructures with the largest digital platform in Morocco: 3D System Platform from Dassault Systèmes, Huawei, Microsoft, IBM and others. EIDIA's research teams work on big data, deep learning, virtual reality, robotics and cobotics (human-machine interaction) for applications in various fields: Cybersecurity, medical, profiling, mobile, connected car, etc.

Research topics

Renewable Energies and Energy Efficiency:

- Technological and operational development of solar thermal, photovoltaic, wind and hydroelectric production technologies. This work will cover both possible technical developments in current energy production and storage technologies and the development of new materials aimed at increasing energy efficiency in the production, storage and distribution of renewable energies.
- Management and control of the various study phases (installation, operation, maintenance of electrical installations and equipment);
- Improvement of processes and devices related to energy engineering;
- Integration of renewable energies into industrial processes;
- Mastery of the different methods of calculating energy and thermal systems;
- Development of identification and prognosis methods for wind generators (Project to be developed with the EDF Energies Nouvelles group);

- Systems for cleaning, aligning and maintaining solar parks to maintain high transformation efficiency (Project to be developed with the EDF Energies Nouvelles group).
- Materials, Nanomaterials and Additive Manufacturing
- Bioactive substances and phosphorus dendrimers: medical applications;
- Improved bioceramics for bone regeneration: manufacturing, testing and validation for medical implantation;
- Fatigue resistance of Inconel 718 from additive manufacturing (Project to be developed with the CEROC, SANDWIK, AEROCENTRE groups);
- New classes of nano-composite and bio-composite polymers (Project to be developed with the PSA group for the design of materials with minimal ecological impact and mechanical characteristics suitable for the construction of automobile shells);
- Nano-devices based on 2D materials.

Vehicles and land mobility / Aeronautics and aerospace:

- Development of lightweight and innovative meta-materials for optimal acoustic insulation of electric vehicles (Project to be developed with the PSA group for the creation of acoustic insulation plates suitable for very light vehicles);
- Innovative electric machine solutions for the advanced electrification of passenger transport (Project to be developed with the PSA group for the study of multi-phase electric motors for traction);
- I.MOVE: Innovative MObility serVicEs for non-car owners: Prospective scenario based on participatory design (Project to be developed with the PSA group for the development and optimal management of carpooling networks);
- Development of tools for real-time processing of vehicle fleet control in open environments and data security management;
- Modeling and dynamic identification of non-linear structural joints between carbon fiber plates and shells (Project in definition phase with European partners).

Environmental Engineering:

- Development of innovative technologies for water decontamination, filtration and desalination;
- Development of innovative technologies for air pollution control and the sequestration of CO2 and VOCs (Volatile Organic Compounds);
- Valorization of certain natural plant resources, in particular, the argan tree.

Eco-campus and energy

The UEMF project was designed using the Negawatt approach:

The buildings at UEMF are new and less than 7 years old. UEMF reaffirms its firm commitment to ensuring that all renovations, restorations, or new constructions meet the highest standards of energy efficiency and sustainable development:

- The UEMF campus is an Eco-Campus that meets the highest international standards in terms of sustainable development. It has been certified by COP 22 and recently obtained the Francophone label for responsible innovation.

- The buildings of the UEMF Eco-campus are built according to the "High Environmental Quality"

approach, limiting any harmful environmental impact through precise choices: low-energy local materials, materials ensuring good thermal and sound insulation, open architecture ensuring maximum natural light and brightness, clean and renewable energy sources: installation of photovoltaic panels on large areas of the building roofs for the production of electrical energy with real-time measurement of the recovered energy, installation of thermal solar panels for the production of hot water, ongoing installation of pipes and basins for rainwater recovery, recirculation of gray water (in progress), construction / rehabilitation of positive energy buildings, installation of sorting bins for waste throughout the Eco-campus, creation of sports, leisure and relaxation areas, use of a circular economy (minimizing waste by optimizing the value generated by resources), installation of charging stations for electric cars on the UEMF Eco-campus. These stations are the only ones in the Fez-Meknes region and the only ones on a university campus in Morocco. Billboards have been placed in several places in the city of Fez inviting motorists to come and recharge the batteries of their electric cars for free on the UEMF Ecocampus, total accessibility and in all University buildings for people with reduced mobility (PRM), installation on all floors, in front of all doors, in stairways and in elevators of braille signs for the blind and visually impaired, installation on all floors and in all buildings of sanitary facilities (toilets) for people with reduced mobility.

UEMF Energy Efficiency Policy 2023-2026

The UEMF demonstrates its commitment to effectively contributing to Morocco's 2030 goals and aims to move towards carbon neutrality. In this regard, the policy implemented aims to:

- Develop energy management processes;
- Establish rules for optimal energy management.

The UEMF has implemented concrete actions to inform and raise awareness among members of the university community in order to limit environmental impact and global warming.

https://www.ueuromed.org/sites/default/files/upload/files/politique-defficacite-energitique-de-luemf-2023-2026.pdf

PHOTOVOLTAIC POWER PLANT MONITORING SYSTEM

A monitoring system (SmartLogger) has been integrated into each photovoltaic power plant. This plant plays the dual role of alerting the operator of any major failure (or other abnormal situation) as well as collecting the electrical power produced in "real time". The data collected every 5 minutes is accessible through a web service, which allows remote monitoring of the plant's status at any time. From the web console, it is thus possible to obtain the performance values of the PV plants established from the collected data:

- the cumulative daily power that has been injected into the electricity network;
- the cumulative power that has been injected into the electricity network since initial commissioning;
- the instantaneous power produced by the power station(s), updated every 5 minutes;
- income calculated on the basis of the electricity tariff;
- CO2 reduction through the use of photovoltaics.

https://www.jetenergy.ma/en/projects/ombri%C3%A8re-solaire/ombriere-uemf

AVERAGE PRODUCTION EVALUATION (2020-2021-2022)

- 2 photovoltaic power plants with power injection into the building.
- 1,246 m²of solar panels installedes.
- Total peak power of 197.8 kWp.
- Theoretical production of 300 MWh/year by the two power plants.
- 248 MWh produced in 2019 / 441 MWh since November 2017.
- Actual yield of 83% of theoretical production.
- Average annual savings of 200,000 DH/year on energy bills.
- Return on investment (undiscounted) over twelve years, based on maintaining current performance.

Responsible Innovation Label

The Responsible Innovation Label was awarded to UEMF during its first 2020/2021 edition. A jury specializing in responsible innovation selected the first 3 projects which are being deployed in member universities of the Agence Universitaire de la Francophonie (AUF), including that of UEMF entitled "**Sustainable UEMF Program**".

The Responsible Innovation Label is intended for higher education and research establishments. Its objective is twofold:map and promote responsible innovations from French-speaking university establishments around the world,but alsodeploy the responsible innovation network to promote synergies between universities,civil society and the socio-economic sectorworking for the development of a responsible society.

40 ha Eco-Campus certified by COP22 (in 2016)

Responsible Campus of the Year

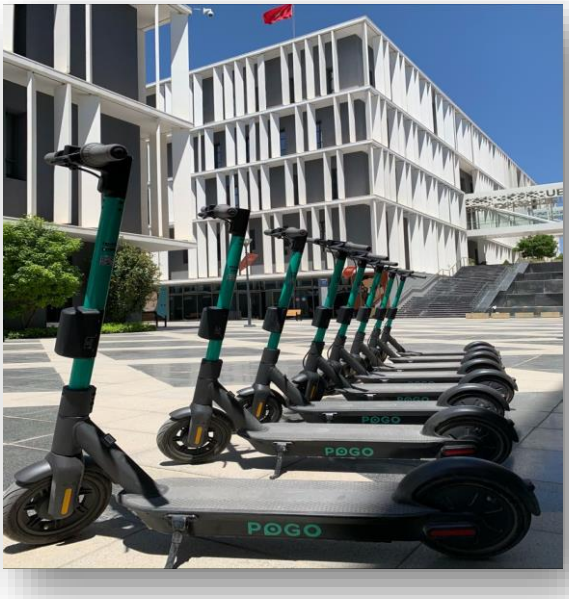

Euromed University of Fez was named winner of the "RESPONSIBLE CAMPUS of the YEAR" Award, during the ceremony organized in Paris, on Tuesday, October 4, 2022, under the effective presidency of the Minister of Higher Education and Research of the French Government.

The "Responsible Establishment of the Year" category recognizes UEMF's commitment to the SDGs and its lasting impact in becoming a responsible organization with regard to the challenges of the transition.

http://ueuromed.org/actualites/annonces-diverses/luemf-laureate-du-prix-campus-responsable-de-lannee

Activities

UEMF promotes electric mobility! (May 6, 2022)

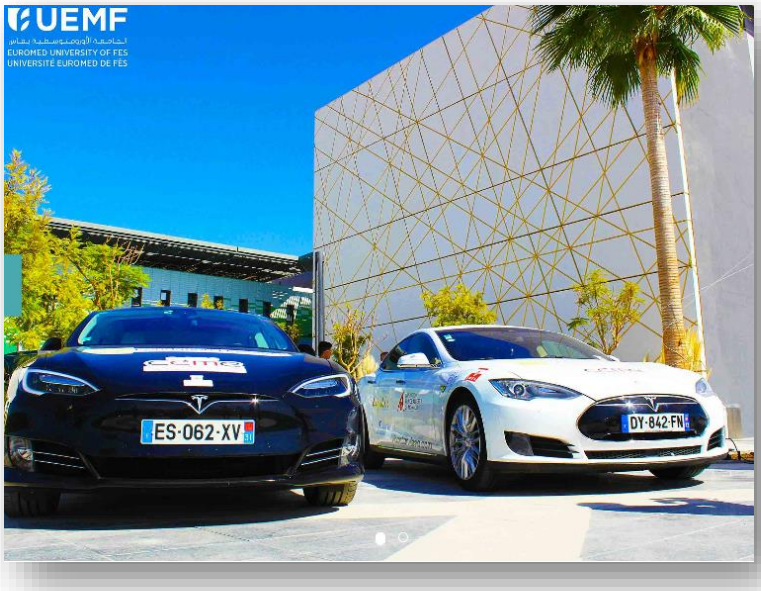

UEMF has entered into a new partnership with the Moroccan start-up "POGO", which consists of the development of soft and electric mobility within the UEMF eco-campus.

For an initial incubation phase, “POGO” deployed a fleet of 12 electric scooters for internal travel needs within the campus, in addition to 10 electric motorcycles for external travel.

POGO will benefit from the services offered by the UEMF incubator, namely technical assistance, individualized monitoring, access to technological platforms and access to the UEMF partner network.

The sustainable and smart COP 25 torch, "Light Us", "made in UEMF", has arrived safely

Sustainable Development - The Euromed University of Fez welcomed the MIPAI-Mediterranean Institute of Intelligence and Public Affairs association to its eco-campus during its stopover in the city of Fez.

Arriving aboard Tesla electric cars, the "Light Us" caravan was warmly welcomed by the Euromed University of Fez community. Upon arrival, the crew members were welcomed by

the University's Vice President, the faculty and administration, as well as the students, all proud and happy to welcome the convoy. For his part, the President of the Association (MIPAI), Ayoub Makhloufi, expressed his enthusiasm for this noble cause of raising awareness of the issue of sustainable development, supported by both his association and the Euromed University of Fez.

The photovoltaic torch that will mark the symbolic transition from COP 24 (Katowice, Poland) to COP 25 (Santiago, Chile) was manufactured in the University's additive manufacturing and 3D printing laboratories with the help of Professor Sébastien Vaudreuil, a lecturer and researcher at UEMF. Today, this torch, which combines artificial intelligence and sustainability, has become a powerful and meaningful universal symbol. Proudly displaying the colors of the Moroccan flag upon the arrival of the "Light Us" crew in the country, it undoubtedly recalls the desire of its creators, Zacharia Saha and Ayoub Makhloufi, young Franco-Moroccans, to highlight the importance of sustainable development goals to save the planet.

As a reminder, the "Light Us" project is COP22-certified and supported, among others, by the Prince Albert II of Monaco Foundation, the Union for the Mediterranean (UfM), the Council of the Moroccan Community Abroad (CCME), MEDEF, CGPME, CGEM, and IRESEN. The MIPAI team will be welcomed at COP25 in the presence of Polish, Chilean, and Moroccan authorities.

Water desalination by forward osmosis: stretch solutes and recovery methods – review

Imane Chaoui

Prof. Souad Abderafi

Prof. Sébastien Vaudreuil

Professor Tijani Bounahmidi

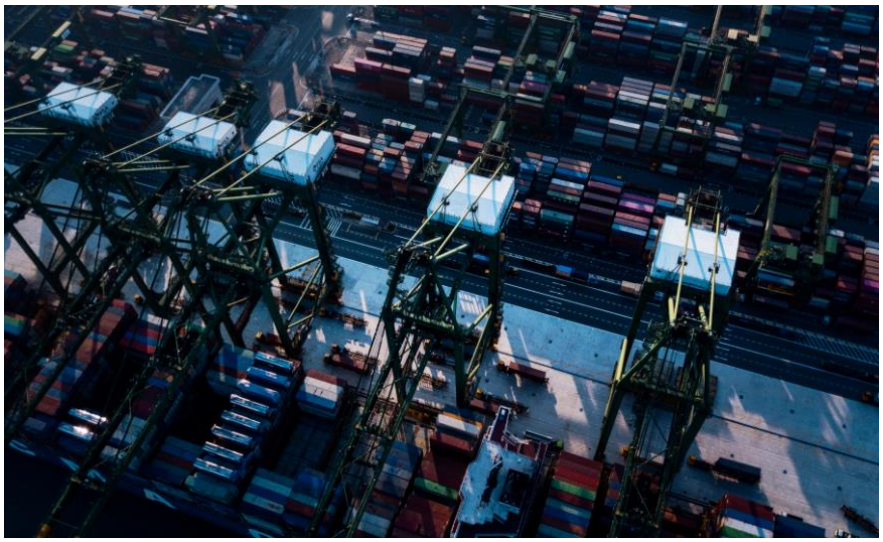

Water production has become a serious concern these days due to numerous environmental and social factors. Conventional desalination processes are considered energy-intensive, as energy consumption accounts for 50 to 60% of the cost of water production.

In this article, a state-of-the-art update of newly developed suction solutes such as deep eutectic solvents, ionic liquids, smart materials, and conventional FO suction solutes was performed. Finally, the challenges, opportunities, and future prospects of FO technology were discussed.

Water Desalination by Forward Osmosis: Suction Solutes and Recovery Methods – Review: Environmental Technology Reviews: Vol 8, No 1 (tandfonline.com)

Pr. Othmane Benmoussa explains how to respond effectively to ecosystem disturbances in his article on Média 24, November 11, 2022

The Covid-19 pandemic, rampant global inflation, environmental and political crises, and the war in Ukraine—all disasters have led to unprecedented disruptions and unpredictability in supply chains. This delicate situation has challenged the planning process of businesses around the world.

The ADDAPT framework, which stands for "Anticipate, "Detect", "Diagnose", "Activate resources for", "Protect Against" and "Track Risks", is particularly relevant to ecosystem disruptions, specifically those related to supply.

Pr. Othmane Benmoussa responded to this relevant issue by identifying the main actions to be undertaken through his article on Média 24

2024: Euromed University of Fez at the heart of action for the SDGs

Conference on the theme: “Power to X: Opportunities and Challenges” by Mr. Andreas Meurer

The Euromed University of Fez had the pleasure of organizing, on the occasion of World Environment Day, the conference "Power-to-X: Opportunities and Challenges", which was held on June 5, 2024 at the University's eco-campus. This conference is part of the University's commitment to environmental protection and the promotion of the eco-responsible approach through the adoption of civic and ecological actions on a daily basis within an ideal setting offered by the UEMF Eco-campus.

The conference was moderated by Dr. Andreas Meurer, a leading expert from the German Aerospace Center (DLR). The Power-to-X (P2X) theme covered a wide range of technologies for converting electricity into various forms of energy or chemical products. These innovations are essential for the integration of renewable energy and the reduction of carbon emissions in industrial sectors. Mr. Meurer shared his expertise on recent advances and challenges to maximize the potential of P2X technologies.

This event was aimed at a diverse audience, including professors, researchers, and students, all engaged in the field of energy and sustainable development. The conference provided a unique opportunity to exchange ideas, discuss future prospects, and build partnerships to promote sustainable energy technologies.

Second Semi-final of the Greentech Roadshow Challenge at UEMF: A Crucial Step towards Green Innovation in Morocco

The second semi-final of the "Greentech Roadshow Challenge" was held on July 10, 2024, in Fez, in partnership with BMCI Groupe BNP Paribas, the Euromed University of Fez (UEMF), and the Regional Investment Center (CRI) of Fez-Meknes. This event, organized at UEMF, brought together key players in the entrepreneurial ecosystem to evaluate startups in the fields of green technologies, such as low-carbon, Agritech, and the blue economy. It provided a platform for entrepreneurs to present their innovations to a jury of experts and investors. The event is part of a series of initiatives aimed at supporting Moroccan startups and promoting the ecological transition.

UEMF students make the voices of young Africans and Euro-Mediterraneans heard before the Parliamentary Assembly of the Union for the Mediterranean

On February 14, 2024, students from the Euromed University of Fez organized a summit under the theme "Euro-Mediterranean and Transatlantic Openness" with more than 200 participants from 30 countries. This summit addressed topics such as energy ethics, sustainable development, transportation, climate change, and African challenges.

The summit culminated in the Call for Investment in the Future, read out on February 16 at the 8th Summit of Speakers of Parliaments of the Union for the Mediterranean. This call underscores the need to strengthen cooperation between Europe and Africa through concrete projects, allocate pledged funds for climate resilience, and support initiatives such as the Nigeria-Morocco gas pipeline.

The students also welcomed Morocco's initiatives for economic integration, infrastructure, and education in Africa, while calling for a "Marshall Plan" for education and research in Africa as an investment in the future to combat poverty, terrorism, and illegal immigration.

UEMF at the World Power-to-X Summit: Green Hydrogen and Innovation

Professors Tijani Bounahmidi and Othmane Benmoussa represented the Euromed University of Fez (UEMF) at the World Power-to-X Summit in Marrakech. The UEMF-HACE Side Event, held on October 9, brought together experts, decision-makers, and industry leaders to discuss green hydrogen technologies, highlighting innovations and value chain optimization in this booming sector.

Participants, including members of the HVM (Hydrogen Green Marine) Consortium, discussed global trends in green hydrogen and its benefits, sharing their expertise on sustainable solutions for carbon-free energy production. The presence of UEMF professors allowed them to showcase their expertise in sustainable development and establish promising partnerships during the B2B meetings. These collaborations aim to develop technological solutions to make green hydrogen accessible and efficient.

2025: Euromed University of Fez intensifies its commitment to the SDGs

UEMF at the heart of discussions on renewable energies at EnerGaïa

The Euromed University of Fez participated, as part of the Moroccan delegation led by the Green H2 Cluster, in the renewable energy forum.EnerGaïafrom December 10 to 12, 2024.

Several contacts have been made, in particular with the Vice-Presidency for the Economy of the Occitanie Region for partnerships in terms of training with universities and institutes in the Region, incubation and cultural and sporting activities with the ambition of initiating lines of research in these fields alongside the creation of courses in sports and team management.

Green hydrogen and the entire inherent value chain were also at the center of discussions with France Hydrogène, as were the theme of water and the underlying technologies, in addition to the Agritech or precision agriculture sector.

The participation of the Euromed University of Fez in the Technocampus Hydrogène Occitanie, which aims to be the largest center in France for research, testing, technological innovation and teaching in the field of green mobility, was also discussed.

Moroccan Parliament: Professor Mostapha Bousmina presents Morocco's strategy for energy transition and sustainable development

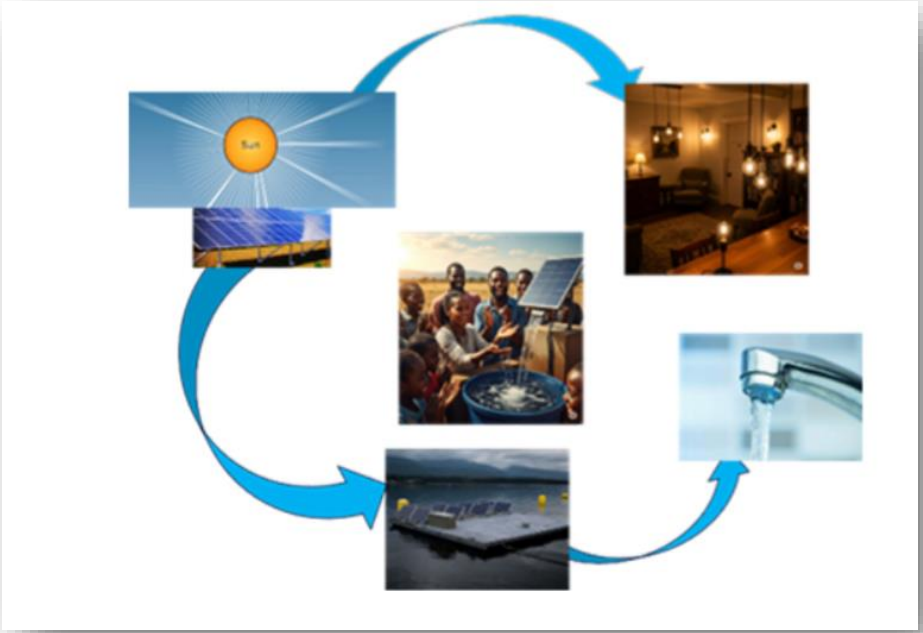

The Moroccan Parliament, in collaboration with the Fondation des Rencontres du Futur, the Chamber of Deputies and the Senate of the Republic of Chile, hosted the "Congress of the Future" on December 17 and 18, 2024 at the Parliament headquarters in Rabat.

This event brought together several Moroccan and Chilean ministers and parliamentarians. It provided an opportunity to discuss future issues. On this occasion, the President of the Euromed University of Fez, Professor Mostapha Bousmina, presented Morocco's strategy for energy transition and sustainable development, highlighting the country's commitment to these crucial areas.

He also presented the Moroccan renewable energy plan, the production of green hydrogen and its applications, including ammonia production, seawater desalination, battery and electric vehicle production, as well as the Nigeria-Morocco gas pipeline project. The focus was on the achievements, challenges, and areas of concern, while emphasizing technological and research-innovation challenges in these different areas.

Doctoral Thesis Defense in “Chemical Engineering” by Mr. Ali Seid ALI

The Euromed University of Fez (UEMF) is pleased to announce the upcoming doctoral thesis defense in Chemical Engineering by Mr. Ali Seid ALI. The defense will take place on June 21, 2025, at 10:00 am, in The Great Hall of the Incubator (LOC001994) at UEMF. The thesis, titled “Analysis of Photovoltaic Thermal (PVT) Driven Forward Osmosis and/or Membrane Distillation Water Desalination”, explores innovative and sustainable methods for water desalination using renewable energy technologies. This research contributes to advancing scientific knowledge in the fields of clean energy, water resource management, and environmental sustainability.

SDG 8 Report: Decent work and economic growth

Introduction

UEMF prepares productive citizens who contribute to the socio-economic development of Morocco and the wider Euromed region, including sub-Saharan Africa. Entrepreneurship is an integral part of its training programs. UEMF encourages its students and graduates to create businesses through its innovation hub, the incubation center.https://ueuromed.org/structure-innovation/incubateur-uemfand the FSF projecthttps://ueuromed.org/structure-innovation/fez-smart-factory. UEMF has ultramodern premises, technological structures and platforms, and incubation programs for the creation of startups and the acceleration of businesses for this hub.

UEMF institutions offer a wide range of training and research and development activities that focus primarily on the needs of small and medium-sized enterprises, with the aim of generating ideas and developing projects focused on local and regional needs. Within this framework, several competitions and hackathons are organized with socioeconomic partners.

UEMF Policy on Social and Societal Responsibility

Values

The UEMF places the following principles and values at the heart of its operating method. As a result, it:

- is open to the world and promotes the values of inclusion, moderation, tolerance, interculturality and sharing;
- is open to all students and staff, national and international, without discrimination based on origin, family situation, gender, disability or belief;
- is based on equality of opportunity and opportunity;
- advocates gender equality and implements a proactive policy to include a maximum number of women as well as people with reduced faculties;
- recognizes and rewards excellence following evaluation at all levels, both top-down and bottom-up;
- promotes critical thinking, rationality, citizenship values based on civic-mindedness, civility, commitment, a sense of duty and common interest, as well as respect for others and the environment;
- encourages the qualities of initiative, entrepreneurship, innovation-creation and mastery of languages and cultures;
- has a social responsibility and offers tuition, accommodation and catering scholarships to the best students from low-income families and from Sub-Saharan Africa.

Equal opportunities: parity, pay equity and inclusion of disadvantaged people, people with disabilities and immigrants

UEMF promotes and implements a proactive policy of equal opportunity and equal opportunities among its faculty, administrative and support staff, and students. This policy provides access to UEMF to all without discrimination, whether for employment, studies, or lifelong learning. This policy is structured around the following pillars:

1. The University guarantees equal opportunities; anyone who observes or experiences unequal treatment has the right to file a complaint at the level of the Vice President in charge of Academic Affairs for students and at the level of the Secretary General for faculty and administrative and support staff;

2. any candidate for a job at the University is processed by the Human Resources Department in addition to a recruitment committee which acts with complete transparency and rigor and ensures fair treatment for all;

3. the University has set itself the objective of:

   a. achieve and maintain parity in numbers between men and women, using positive discrimination in cases of equality of profiles and skills,

   b. ensure the same salary for the same functions between men and women,

   c. promote gender parity in access to senior positions at the University, d. include as many people with reduced abilities as possible,

   e. include people from immigrant backgrounds;

4. monitoring and correction of gaps: salaries, rate of female applications:

   a. an "Equal Opportunities" committee is set up at the level of the University Presidency to make continuous improvements concerning the Equal Opportunities policy, to implement it and to monitor and audit its application,

   b. UEMF continuously monitors the application rate of women, their acceptance and recruitment rate and the rate of completion of studies and graduation from university,

   c. an incentive scheme for scholarships is put in place to encourage applications from women in fields where they are under-represented (artificial intelligence, mechanics, civil engineering, management positions, etc.) in addition to a policy based on positive discrimination to give more opportunities to women in the event of equal profiles and potential,

   d. UEMF undertakes to ensure fair salary treatment between the sexes and to correct any discrepancy as soon as it is noted.

Help for people with disabilities:

1. all buildings and all premises within the University buildings are accessible to PRM (Persons with Reduced Mobility) and all stairs and elevators are equipped with signage written in Braille for the blind and visually impaired;

2. on all floors and in all areas of the University, specific toilets that comply with international standards are made available to people with reduced mobility;

3. in all parking areas, specific spaces are reserved for people with reduced mobility and significant fines are applied to anyone who parks there without the right to do so;

4. adapted accommodation is made available to students with disabilities and in cases of severe disability, the University authorizes a family member to stay with the disabled student.

5. a personalized service for the disabled, including a shuttle from the campus gate to the teaching rooms. Production of adapted course materials and application of the one-third time rule during assessments;

Working conditions: commitment against discrimination, child labor, forced labor and human trafficking

The University strives to foster the development of its community by cultivating a sense of belonging and providing all the resources and working conditions to create a stimulating, serene, and favorable climate for innovation, creation, and creativity. It recognizes employee rights (freedom of association and collective bargaining) for all, including women and staff of different nationalities. Everyone working at the University has a formal employment contract signed between the President of the University and the employee. This contract explains the employee's work standards, duties, and prerogatives, working hours, vacation and holiday periods, compensation, and benefits in terms of medical coverage and retirement.

Living wage for employment practice

The SMIG (Guaranteed Minimum Interprofessional Wage) in DH in Morocco in 2022 for the non-agricultural sector is:

- Net monthly salary MAD: 2,769.87
- Hourly rate in MAD: 15.55
- Gross monthly salary MAD: 2,970.05
- Social contributions MAD: 826.56

The lowest salary at UEMF is 40% higher than the minimum wage.

The UEMF is strictly prohibited from:

a. to employ minors at the university;

b. to impose forced labor on an employee;

c. to use his hierarchical status to establish slavery, human trafficking and to obtain favors of any kind whatsoever from the employee;

d. to have behavior or attitude that could harm working conditions;

e. to outsource activities that harm employees' rights. In the event that the University decides to outsource activities to third parties, this decision is taken in consultation with employees who shall not suffer any prejudice of any kind as a result of this outsourcing.

Human Resources Management (HRM)

Considered among the strategic levers of the University, the Human Resources Department of the UEMF plays a role that is both social, advisory and supportive of the development of the University and the skills and careers of staff.

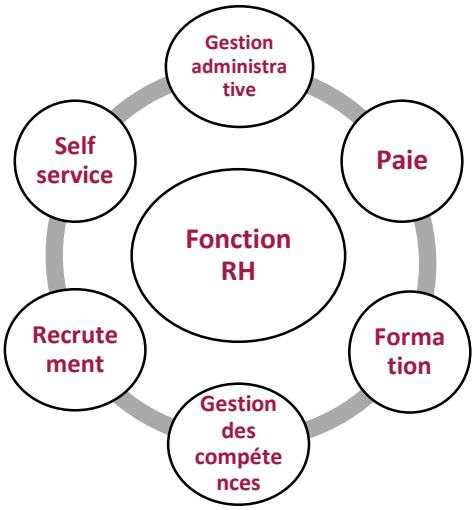

HR Policy:

Equal opportunities-gender equality-ethics and respect-internal promotion-staff training.

Missions:

- Ensure the organization of the recruitment of teaching staff and administrative and technical staff
- Ensure the recruitment of associate professors and the management of temporary teachers;
- Prepare and monitor payment files for permanent staff, temporary staff and other service providers;
- Ensure the management of all administrative careers (rights and obligations) of all University staff;
- Define the University's needs in the area of continuing staff training, establish a program, implement it and evaluate it;
- Ensure the election of staff representatives;
- Ensure the management and monitoring of social dialogue with social partners, in accordance with current legislation
- Manage the various administrative operations of the UEMF as well as work accidents
- Work towards the motivation, involvement and commitment of employees in line with the University's development strategy;
- Ensure compliance with labor regulations;
- Participate in internal communication within the University;
- Contribute to the organization and management of annual evaluations in collaboration with the Quality Assurance Department;
- Contribute to the legal aspects of the University;
- Ensure compliance with UEMF values and HR policy as well as health and safety rules at work.

The Human Resources component in the UEMF ERP

Administrative management

- Contract management:
  - Types of contracts (fixed-term contract, permanent contract, fixed-term contract, secondment, foreigners, interns);
  - Trial period, end of contract, amendments
- Assignment management: different establishments and services; and history
- Leave management: all types; calculation of leave balance
- Absence management: all types; payroll deduction
- Management of requests for administrative documents (work/salary certificates, irrevocable commitment, final settlement, work certificate)
- Management of mission orders
- Management of disciplinary sanctions (warning, reprimand, second reprimand, summons to the hearing session, hearing report)
- Individual, global and analytical social dashboards (absenteeism rate, turnover rate, seniority rate, types of contracts/establishment, age pyramid, workforce by gender, etc.)

Pay

- Entry of variable elements, net and gross, of payroll
- Entry of compulsory and optional social contributions subscribed to by the UEMF
- Seizure of loans and advances (withholding tax)
- Calculation of salaries
- Production of transfer statements and transfer file (bank)
- Editing monthly payroll statements
- Saving pay periods
- Payroll dashboards, allowing a detailed analysis of the payroll: by establishment, by type of contract, by job family, monthly changes in the total cost of the payroll, share of social security contributions, etc.
- Interface with the CNSS system for the management of CNSS electronic declarations.

Training

- Training plan management
- Planning training actions
- Training budget monitoring
- Monitoring of training actions per year by employee/history
- Key indicators per employee (Training needs, Training hours per module per year, etc.)

Skills management (GPEC)

- Management of the annual performance review
- Management of the Development Plan
- Design of forms by type of position (teacher, administrative staff, etc.)
- Organization of interviews
- Entry/calculation of assessments (grades)

Career management

- Mobility/promotion
- Advancement
- Seniority
- Salary scales

Recruitment

- Management of recruitment requests by establishment and by department
- Interview planning (workflow)
- Design of selection grids
- Document sharing
- Recruitment dashboard (Number of recruitments by establishment, department, period, profile, diplomas accepted, salary brackets)

Social audit

- Social barometers
- Setting up key indicators
- Detailed analysis capacity

Employee Self-service Module

- Consultation of BP, leave balance, reimbursements received
- Requests for administrative documents
- Leave request and monitoring of validation by the line manager
- Information on training activities, registration
- Consultation of internal service notes
- Internal communication: events, news, etc.

The UEMF Mediator

The mediator's mission is to contribute to the establishment of a calm, pleasant, and respectful working environment. He or she assists in the amicable resolution of conflicts between the parties involved in a dispute. In the event of a conflict, the university community (teachers, students, and administrative and support staff) may refer the matter to the mediator, who will examine the file to ensure that its content falls within his or her jurisdiction. In the event of inadmissibility, he or she will inform the President of the University or may also redirect the referral to the appropriate departments. He or she may conduct investigations, meet with all parties individually and/or collectively, and make recommendations to the parties, who are free to implement them or not. In a spirit of conflict prevention and to help build team cohesion, he or she is also mandated to hold meetings with the various departments to help establish a calm and cordial working environment. The Mediator acts with complete independence, transparency, and discretion. He is not vested with any power of decision, injunction or coercion. He reports on his mission to the President of the UEMF and prepares an annual activity report in compliance with the rules of discretion and confidentiality.

Cases that cannot be subject to mediation:

•serious cases rather falling under the jurisdiction of the courts;

•conflict situation which is not within the scope of work;

•one of the parties does not wish to mediate;

•academic situations which are more the responsibility of the Establishments (cases of student failure, grades, exams, internships, etc.) or the responsibility of the Human Resources Department.

https://ueuromed.org/le-mediateur-de-luemf

Student internships

All UEMF students are invited to undertake internships (academic, professional, etc.) in universities, administration and/or in companies.

Objective of the internship

The purpose of the training course is to enable the student intern to put into practice the theoretical and methodological tools acquired during their training, to identify their skills and to strengthen their professional project.

The internship therefore aims to prepare the student intern for entering working life through a better understanding of the 'Host Structure'.

It is part of the training and the personal and professional project of the student intern and is an integral part of their educational curriculum.

The internship program is established by the 'UEMF Training Structure' and the 'Host Structure' based on the general program of the training provided.

All interns are insured.

An internship agreement signed by the UEMF, the host structure and the student intern describes the rights and duties of the parties concerned.

1st edition of Euromed Career Day, Employment Forum of the #Euromed University of Fez

Beyond job and internship searches, Euromed Career Day is an opportunity to network and meet professionals from various sectors. This forum aims to support young people in their career paths by allowing them to attend numerous career presentations and thematic workshops. This year, the first edition of Euromed Career Day kicked off with a round table on "digital transformation: new professions, new skills," led by Professor HICHAM SEBTI, Director and Lecturer at Euromed Business School, in the presence of:

- Pr. Mostapha BOUSMINA, Presidency of the UEMF,
- Prof. Mustapha BENNOUNA, Advisor to the President of the Euromed University of Fez.
- Mr. Omar TAJMOUATI, General President of CGEM Fez-Meknes,
- Mr. Amjad KITI, Director of the Economic Impulse and Territorial Offer Pole of the CRI Fez-Meknes,
- Ms. Khouloud ABEJJA, Director of Digital Transformation at the Digital Development Agency,
- Mr. Omar AZZAM, Deputy General Manager DXC Technology,
- Mr. Chakib ACHOUR, Chief Strategy Officer, Huawei ICT Ambassador, Huawei Technologies Morocco.

With more than 10 companies present in a dedicated exhibitor area, students are then invited to meet professionals who are open to answering all their questions. UEMF students participating in this forum benefited from a series of power skills workshops around e-branding to better highlight their profile, essential keys to succeeding in an interview, and advice to better understand corporate culture.

Candidate Pitches #BlueSpace, the incubator made in #UEMF

The first pitch session for the project candidates took place at UEMF. Before a jury composed of the UEMF entrepreneurship team, executives from Bank of Africa, a partner of the University, and the BlueSpace incubator project, the candidates presented various projects in turn. A selection phase is planned to select the projects that can benefit from incubation in the new BlueSpace by UEMF & Bank of Africa.

Organization of the Royal Air Maroc Hackathon

The "Euromed Sustainable Impact Challenge" Hackathon, organized from January 19 to 21, 2022 by the Euromed University of Fez and Royal Air Maroc, ended with the announcement of the winning project "Green Wings".

Green Wings is a mobile application created by a group of eight students in Business, Artificial Intelligence, and Design at UEMF. The application aims to promote RAM's CSR initiatives and instill them in employees' habits through three main components: carpooling, catering, as well as eco-scoring and eco-ranking.

- Carpooling will help minimize the carbon footprint.

- The catering component will allow employees to confirm or not their presence at the company restaurant the next day, as well as to choose the foods that would make up their menu in order to avoid food waste.

- Eco-scoring is a score calculated based on 3 factors: water and electricity consumption internally and externally among the various RAM employees, the rate of involvement in carpooling and RAM's eco-responsible activities, and finally volunteering. This score will lead to an eco-ranking that will elect the best eco-friendly, which will create a competitive and fun atmosphere and allow people to combine business with pleasure.

All these activities will bring significant savings for RAM, savings which will then be used in a reward system for various eco-responsible employees.

Organization of the Web Help Hackathon In collaboration with the Partnerships Department

The grand finale of the Hackathon organized by Webhelp Maroc and UEMF, from September 21 to 23, on employee loyalty, saw the participation of more than ten projects, each one innovative. New ideas and concepts captivated the attention of the jury during the defense session.

Concretely, the objective of this event is to encourage young UEMF students to find solutions to a common problem: employee engagement in a workspace. A dozen groups made up of students from the Euromed Business School and the School of Digital Engineering

and Artificial Intelligence pooled their efforts to design innovative concepts.

The highlight of this Hackathon was the nomination of the winning project at the end of the pitching session. The "Webhelp League" project, a platform that gamifies agents' KPIs (Key Performance Indicators) by transforming them into a team game, came in first place. This platform brings together groups working on a Webhelp platform. These groups form a virtual football team with the goal of reaching the top of the standings at the end of the season. Players/agents must therefore create synergy between themselves: placing the most productive players/agents in the positions that will earn the team the most points and, at the same time, increase their ranking in the league. At the end of each season, the winning team will be rewarded.

UEMF... at the heart of regional entrepreneurial dynamics

In order to support regional entrepreneurial dynamics, the UEMF, in partnership with Bank Of Africa and the Fez-Meknes Regional Council, organized a BootCamp on April 20 and 21 during which 23 idea holders benefited from a tailored support program integrating training, mentoring as well as exchanges with business experts.

The objective is to contribute to developing among the different participants a certain number of attitudes, skills and competencies useful for carrying out an entrepreneurial project.

A final selection of the best innovative ideas will be organized on May 6, 2022. The winners of this edition will benefit directly from the support of the UEMF incubator.

The finalists of the regional stage of the “Smart Bank” competition have been revealed!

23 project leaders were selected to present their projects to business leaders and bankers and obtain a share of the funds intended to develop the dynamics of innovation in the Fez-Meknes region.

Three finalists were announced during the awards ceremony and will represent the Fez-Meknes region at the national finals to be held next June. If they succeed in convincing the national jury, they will be awarded funding contracts to accelerate the development of their innovations, in addition to the support offered by the UEMF's entrepreneurship support structure.

The finalists:

- PEATI- Positive Energy Advice Trading International
  PEATI is a 100% Moroccan digital wholesale purchasing center specializing in the construction sector.
- Ra7betkom
  Digital platform to connect agricultural stakeholders, specifically farmers, to give them better visibility on the market and to be able to best promote their products.
- Com'On
  A platform that helps communities better understand each other and develop mutual support and the exchange of services within them.

UEMF promotes electric mobility! (May 6, 2022)

UEMF has entered into a new partnership with the Moroccan start-up "POGO", which consists of the development of soft and electric mobility within the UEMF eco-campus.
For an initial incubation phase, “POGO” deployed a fleet of 12 electric scooters for internal travel needs within the campus, in addition to 10 electric motorcycles for external travel.
POGO will benefit from the services offered by the UEMF incubator, namely technical assistance, individualized monitoring, access to technological platforms and access to the UEMF partner network.

"KICK-OFF MEETING: AGRITECH PROJECT » June 2, 2022

Developing entrepreneurship activities in the fields of AGRITECH with the aim of pursuing innovation, transferring know-how and connecting research with demand actors in the Fez-Meknes region: this is the objective of the “AGRITECH” project, entitled “Regional Center for Innovation and Entrepreneurship in Agritech”, which was officially launched in June 2022. This project is part of the “Tamkin Li Tanmia” program financed by the French Development Agency (AFD).
The main objective of this project, which will last 33 months, is the development of integrated innovation ecosystems at the local level to support the transfer of know-how between the different actors of innovation in AGRITECH, in particular the scientific system, the public and

private sector (mainly Start-Ups and SMEs), but also farmers.
June 2, 2022, the launch day of this project, was an opportunity for the stakeholders present (DRA, INRA, ADA, ENA, ADD, DOMAINES, CRI FM, APEBI, FENAGRI, Pôle Digital, AGRINOVA, AFD) to learn about and identify with the logic of the project. Detailed information was presented, namely: the vision, expected results, positioning of the pole, services, target and implementation methodology.
The stakeholders present also contributed to the framing of the cluster's activities through focus groups which had the following themes: financing, innovation and collaboration between the cluster's stakeholders.

"Creative Minds": ActivityeEntrepreneurial during the week of integration

In order to complement the entrepreneurial acculturation effort invested and deployed across all UEMF training cycles, the Partnerships and Entrepreneurship Management team supported the integration process of new UEMFiens through “Creative Thinking” approaches for a better understanding of entrepreneurial culture, particularly the generation of ideas.
These workshops were attended by nearly 300 students representing different

establishments.

Reinventing value chains, an opportunity for Morocco

China coughed and the world caught a cold. The realization of the prophetic metaphor during the COVID-19 pandemic brings us back to a disenchanted reality of globalization and the globalized value chains that organize the design, production, and circulation of manufactured goods. For the past thirty years, the structuring of global value chains (GVCs) has been guided by the belief that advances in logistics technologies would ensure, with increasing efficiency, the control of costs, lead times, and risks in value chains dispersed across increasingly distant geographical areas.

Reinventing value chains, an opportunity for Morocco | UEMF (ueuromed.org)

What future positioning for the Moroccan automotive industry? Policy Paper by Pr. Hafsa El Bekri and Pr. Hicham Sebti.

Pr. Hafsa El Bekri and Pr. Hicham Sebti, Professors and Director of the Euromed Business School respectively, published a Policy Paper entitled: "What future positioning for the Moroccan Automotive Industry? », a study conducted under the direction of Professor Ahmed Azirar, Research Director at the Moroccan Institute of Strategic Intelligence (IMIS).

The Policy Paper analyzes the effects of digital, ecological, and societal transformations on the global automotive industry, accelerated both by the post-pandemic context and the geopolitical reconfiguration at work.

Ceremony organized in tribute to retired executives of the Fez-Moulay Yaacoub orientation.

The Euromed University of Fez organized, on Thursday, January 20, 2022, a ceremony in tribute to the retired guidance executives of Fez-Moulay Yaacoub. This event initiated by the Moroccan Association of Guidance and Educational Planning Executives (AMCOPE) - Fez-Moulay Yaacoub, in partnership with the Regional Academy of Education and Training of the Fez-Meknes Region (AREF). This ceremony was marked by the presence of around a hundred executives, guidance and educational control bodies. Mr. EL Hassan El Aissati, President of AMCOPE, as well as the various speakers, emphasized the considerable role of guidance executives in the development and support of students' personal and professional projects. The ceremony ended with a presentation of trophies in honor of the retired guidance executives.

Launch of the SMART Bank Territorial Open Innovation program

To support regional entrepreneurial momentum, UEMF, in partnership with Bank of Africa, CRI-Fès-Meknès, and the Fès-Meknès Regional Council, organized a BootCamp on March 9 and 10, during which 16 idea holders benefited from a tailored support program that included training, mentoring, and discussions with business experts. The goal is to help develop among the various participants a number of attitudes, skills, and competencies useful for successfully carrying out an entrepreneurial project.

A final selection of the best innovative ideas will be organized at the end of this edition. The winners of this edition will benefit directly from the support of the UEMF incubator.

AFRICA BUSINESS DAY February 13-14, 2023

The Africa Business Days Dakhla Round, organized on February 13 and 14, 2023, by the African Chamber of Commerce and Services of Dakhla in Morocco in partnership with the Regional Council of Dakhla Oued-Edahab, aims to bring together the interests of European and African economic operators around proven opportunities. They constitute a true crossroads, where the experiences of both European and African regions interact, for co-development and innovative investment synergies.

During this event, Professors Hafsa El Bekri and Hicham Sebti presented a study conducted on trade between member countries of the West African Economic Community. This presentation aimed to highlight the benefits of the region's dynamics.

Young Entrepreneurs Conference March 2, 2023

On March 2, the Enactus club organized a conference led by Achraf Boulaid, a young entrepreneur and digital expert, on the key success factors of any entrepreneurial initiative by young people.

Euromed University present in Barcelona at the EIBMED conference 2023 edition

Representing the Euromed University of Fez, Prof. Hafsa El Bekri, a lecturer and researcher at the Euromed Business School of the UEMF and co-director of the Research Institute for European, Mediterranean, and African Studies (RIEMAS), traveled to Barcelona to participate in the EIB MED conference, which took place on July 10, 2023. This event was organized by EIB Global in partnership with the Union for the Mediterranean. During this

conference, Prof. El Bekri shared an interview with HE Ambassador Senén Florensa - President of the European Institute of the Mediterranean.

This edition of the EIB MED conference brought together several governmental, commercial, banking, and political partners from the Mediterranean region. In her speech, Professor Hafsa El Bekri highlighted three key messages, first, the need for nearshoring to bridge the regional integration gap in the EuroMed region. She then highlighted the untapped potential of Southern Mediterranean companies and the demands for value chain design in the EuroMed region. Concluding her speech, she addressed the need for the Southern Mediterranean, and by extension African countries, to build their own narrative on climate change in order to avoid a compromise between obtaining European EIB funds or seeking new partners with a more permissive approach.

This conference was an excellent opportunity to discuss new ways to revive the economy in the southern Mediterranean region and to discuss the cause of the energy shock, which is particularly worrying in recent times.

Between upper management decisions and delegation: risk analysis and management By Pr. Othmane Benmoussa

One of the major roles of leaders is to make intelligent and timely decisions.

However, the most skillful resolution could be to delegate it to a collaborator while taking

into account a continuum of risks which remains to be appreciated in a contextual manner.

In this sense, four questions deserve reflection for greater efficiency!

https://medias24.com/chronique/entre-decisions-de-lupper-management-et-delegation-analyse-et-gestion-du-risque/

"Salary or Flexibility Negotiation: Instructions": Opinion piece by Professor Othmane Benmoussa of the Euromed Polytechnic School on Medias24

Let's say you have a new job offer, but you're not thrilled with the salary, or you're looking for a promotion, but your manager doesn't seem to be on the same page.

Another situation that may also concern you is that you are overwhelmed with too many projects and want to adjust your workload.

https://medias24.com/chronique/negociation-du-salaire-ou-de-la-flexibilite-mode-demploi/

Human capital and continuous performance improvement: lessons from sports management: Opinion piece by Professor Othmane Benmoussa of the Euromed Polytechnic School on Medias24

To effectively implement a strategy, it is necessary to perfectly identify and characterize the critical roles within your organization and truly ensure that the best talents occupy them.

Leaders like to flaunt their appreciation for their employees and blatantly proclaim that every member of their team is essential to the success of their organization. As uplifting as this sentiment may be, it's simply not true!

Talent can only be a source of sustainable competitive advantage if the right people are in the most critical positions. Having stars in jobs that are hardly crucial is simply a waste of talent.

MedInnovation Tour Hackathon: the pre-event of the "MediTour 2023" Forum at UEMF

The Euromed University of Fez, in partnership with the Fez-Meknes Chamber of Commerce, organized the "MedInnovation Tour 2023" hackathon on October 13 and 14 at the UEMF Eco-campus, under the auspices of the Ministry of Tourism. This event, held ahead of the 10th edition of the Mediterranean Tourism Forum, aimed to promote investment in Mediterranean tourism and showcase its natural and cultural assets. Entrepreneurs and experts participated to rethink the tourist experience and propose innovative solutions. Participants benefited from training and workshops on themes such as design thinking, sustainability, and prototyping. Several projects emerged around the theme "Mediterranean Tourism in Projects," and the awards ceremony brought together public and private figures from the sector.

Launch of the GreenTech Roadshow: A Partnership for Sustainable Innovation

Euromed University of Fez and BMCI are partnering to create an ecosystem conducive to innovation and sustainable development. This partnership reflects both institutions' commitment to supporting entrepreneurship and the ecological transition.

The Euromed University of Fez (UEMF) and the Moroccan Bank for Commerce and Industry (BMCI) are proud to announce the launch of the GreenTech Roadshow, a major event dedicated to sustainable innovation and entrepreneurship. This challenge is aimed at startups with a functional minimum viable product (MVP) ready to impact two essential sectors: agritech/blue economy and low-carbon.

In a global context of growing water stress and climate emergency, the GreenTech Roadshow aims to identify and support innovative technological solutions capable of meeting these challenges.

1. Agritech / Blue Economy: This theme targets startups offering solutions to reduce water stress, essential for the sustainability of water resources.

2. Low Carbon: This theme addresses innovative solutions aimed at reducing carbon emissions, crucial for the fight against climate change.

Launch of the first Bootcamp of the Tech4Farmers program at the Euromed University of Fez

From June 10 to 12, an AgriTech bootcamp brought together promising startups at the Euromed University of Fez as part of the "Tamkin LiTanmia" project, supported by the AFD and the Regional AgriTech Innovation Hub. Companies such as DeepLeaf, ARWA Solutions, and AgrI-bOT participated to develop innovative and sustainable agricultural solutions for the Fez-Meknes region.

Over three days, participants benefited from training in design thinking, prototyping, product lifecycle, financing, and partnerships. The event also provided opportunities for discussions with experts, infrastructure tours, and personalized coaching.

This bootcamp strengthened synergies between start-ups and encouraged the emergence of technological solutions for smarter and more sustainable agriculture.

Interview - Le360] Mostapha Bousmina, President of UEMF: How Morocco is Becoming the Leading African Power in AI

In an interview with the web media "Le360.ma", Pr. Mostapha Bousmina, President of the Euromed University of Fez (UEMF), described how Morocco is becoming the leading African power in artificial intelligence (AI) thanks to the School of Digital Engineering and Artificial Intelligence (EIDIA).

Opened in 2019, EIDIA currently trains 700 students and will award its first degrees in June 2024. It collaborates with various components of the university, integrating cutting-edge technologies for applications in health, agriculture, industry and security, with international partnerships and multilingual training.

The President said: "Our vision was not to create a school of artificial intelligence that was isolated and disconnected from other disciplines. On the contrary, our school was designed holistically, integrating it into a multifaceted environment combining training and research-innovation, and it relies on several other structures of the University."

Euromed University of Fez Strengthens its Partnership with Pinnacle Teaching Solutions

Euromed University of Fez (UEMF) is proud to announce the extension of its partnership with Pinnacle Teaching Solutions, a leading educational provider with nearly 43 years of international expertise in 15 countries. This renewed partnership aligns with our commitment to expanding our English-language teaching, with the ambition of delivering 50% of courses in English by 2025, up from 40% currently. Marking a crucial step in UEMF's international development, this strategic commitment also further strengthens our multilingual academic environment, a central pillar of our vision. The goal is to broaden our students' horizons in terms of international mobility and professional opportunities.

In this spirit, the UEMF has created the Euromed Language Center. Under the direction of Professor Alexander Toshkov, the Euromed Language Center will play a key role in achieving our linguistic and academic goals. Also, thanks to this new agreement, a key component will be dedicated to continuing education. This initiative will allow not only students, but also professionals, to benefit from professional development programs throughout their careers.

The Fez Restructuring Days 2024: A Giant Step in the Field of Business Law in Difficulty

On May 16 and 17, 2024, the Euromed University of Fez and the Sorbonne Law School held the Fez Restructuring Days at the UEMF eco-campus. The event aimed to strengthen participants' expertise in corporate law in difficulty, addressing the amicable and judicial aspects of restructuring.

Under the direction of Professor François-Xavier Lucas and with the participation of distinguished speakers, the days covered essential themes such as the declaration and admission of claims, European and international bankruptcy law, security law, amicable restructuring, and safeguard or recovery plans. The discussions and exchanges allowed participants to better understand restructuring techniques and choose the most appropriate methods for each situation.

This event provided a platform to consolidate knowledge, exchange with experts, discover the latest advances in the field and develop innovative solutions for current restructuring challenges.

Signing of an agreement between the Euromed University of Fez and the Moroccan Association of Occupational Health

The Moroccan Association of Occupational Health organized the 18th edition of the sessionspring conference on the theme "The sick at work and work-related illness" on May 18, 2024 in Meknes. This conference brought together experts and professionals to discuss the need to strengthen occupational medicine and adopt new laws to protect the health of employees. Participants included the regional delegate of the Ministry of Health and Social Protection, the president of the Association, the regional director of the Ministry of Economic Integration, university professors, experts, and occupational physicians.

The discussions focused on important and current topics related to occupational medicine and its legal relations with employees and employers. A key moment of the event was the signing of a partnership agreement between the Moroccan Association of Occupational Health and the Euromed University of Fez. This six-year agreement aims to exchange expertise and knowledge in the fields of training and scientific research, as well as to carry out joint projects to improve the health and safety of workers in Morocco.

Elite legal training in Restructuring unrivaled in Africa at UEMF

The Euromed University of Fez and the Sorbonne Law School are organizing the "Restructuring Days" in Fez on May 16 and 17, 2024. This conference, unique in Africa, will bring together more than 250 business leaders, lawyers, judges, and restructuring law experts from France, Morocco, and Sub-Saharan Africa. Professor François-Xavier Lucas and other experts will discuss topics such as the declaration and verification of claims, new developments in bankruptcy law, and developments in security and prevention law.

These days aim to strengthen the partnership between the Euromed University of Fez and the Sorbonne Law School, which offer a dual Master's degree in Business Law. The program is demanding and selective, bringing together students from France, Morocco, and Sub-Saharan Africa. The teaching is dynamic and interactive, including team projects, real-life case studies, and a mandatory internship in a law firm or company. This allows students to acquire practical skills and immerse themselves in the professional world of business law.

THE Awards Arab World 2024: Finalist for the "Outstanding Contribution to Entrepreneurialism" award

Participation of Professor Mostapha Bousmina at the International Conference in Rome: training and social cohesion

On March 13, 2024, an event entitled "Higher Education and Social Cohesion for Managing International Demographic Dynamics" was organized in Rome, at the Sistine Chapel, by Multiversity, Pegaso Digital University, and MEDEA. The event brought together influential figures, including Italian President Sergio Mattarella, Maltese President Marie-Louise Coleiro-Preca, and European Commission Vice-President DubravkaŜuica.

Professor Mostapha Bousmina, President of the Euromed University of Fez (UEMF), participated to highlight the importance of cooperation between Europe and Africa in education and vocational training. Luciano Violante, President of Multiversity, emphasized the role of digital universities in promoting skills, social inclusion, and sustainability. Emphasis was placed on the importance of digital training in preparing young African generations to contribute to socio-economic development.

This commitment reflects UEMF's priorities, focused on inclusion, innovation and digital technology, to strengthen training and research.

Roundtable: The Empirical Realist School of Law at the Intersection of Law and CSR

The Euromed Institute of Legal and Political Sciences organized a roundtable discussion on March 11, 2024, on "The Empirical Realist School of Law at the Intersection of Law and CSR," moderated by Dr. Duma Martin (Laval University) and moderated by Prof. Hasna Slamti (Euromed University of Fez). The event explored the empirical realist approach to examining labor law and protective law, emphasizing the importance of collecting empirical data to answer legal questions. The discussions presented four models of corporate social responsibility (CSR)—accompaniment, engagement, elucidation, and opposition—that illustrate the interactions between state law, efficiency, and effectiveness. The roundtable also introduced students to the concept of "consumocratic law," where consumers exert influence over companies through societal marketing.

UEMF and AFD launch the “Tech4Farmers” program

Launch of the Tech4Farmers call for applications, a support program specially designed for project leaders in the innovative agricultural technologies (AgriTech) sector.

During a launch conference that brought together key players in the agricultural sector of the Fez-Meknes region this Thursday, March 7, at the Euromed University of Fez (UEMF), the University and the French Development Agency (AFD) officially launched the Tech4Farmers program, whose objective is to support the development and marketing of AgriTech solutions that meet the needs of national agriculture and that of the Fez-Meknes region, in particular.

The Tech4Farmers program is part of an ambitious project to build a Regional Hub for Innovation and Entrepreneurship in Agriculture and Agri-Food in the Fez-Meknes region. This project is led by UEMF and AFD in partnership with the Ministry of Agriculture, Maritime Fisheries, Rural Development, and Water and Forests, the Digital Agriculture Hub, and a consortium of partners including government agencies, sectoral federations, universities, and research centers.

Euromed Career Day: UEMF strengthens its links with the socio-economic world

On February 28, 2024, Euromed University of Fez hosted the second edition of Euromed Career Day at its Eco-campus, bringing together a wide range of companies and human resources professionals. This event aims to facilitate the professional integration of students and graduates by opening doors to the job market. Participating companies included Webhelp, Attijariwafa Bank, Bank of Africa, Safran Aerosystems, and Huawei.

The forum began with a roundtable discussion on the theme of artificial intelligence and its impact on employees in Africa, featuring experts from various sectors. The event also allowed students to interact with recruiters, attend workshops on soft and power skills, and participate in individual interviews. Students from various backgrounds, such as health, artificial intelligence, architecture, and the humanities, had access to coaching programs and professional opportunities. This edition was a great success thanks to the diversity of its activities and the constructive exchanges between recruiters and students.

Visit of a delegation from Pinnacle Teaching Solutions and conference on leadership lessons

On February 22, Euromed University of Fez hosted a delegation from Pinnacle Teaching Solutions, including Dr. Phil Goertzen, Pinnacle Academic Director; Mr. Collin Quigley, Pinnacle Director; and Katie Haynes, Head of Short-Term Academic Programs in Morocco. The team presented the new Pinnacle project, which focuses on online learning. Pinnacle Teaching Solutions is a professional teaching organization committed to excellence in education, collaborating with universities since 1981.

Following this working meeting, Dr. Phil Goertzen gave a lecture entitled "Leadership Lessons Learned: Thoughts on Getting Things Done and Working Across Cultures." The lecture was attended by students from the Euromed Business School (EBS) and the Institute of Legal and Political Sciences (ISJP) of the UEMF, who attended with great interest.

Drawing on his extensive experience working and collaborating with national and international institutions, the speaker shared with the students a set of tools for analyzing knowledge, navigating cultural differences and adapting negotiation styles in different contexts.

The delegation's visit ended with a classroom observation and a meeting with the training teachers of the UEMF Language Center.

https://ueuromed.org/actualites/annonces-diverses/visite-dune-delegation-de-pinnacle-teaching-solutions-et-conference

Third steering committee meeting of the Regional Agritech Innovation and Entrepreneurship Hub

On February 21, 2024, the Euromed University of Fez hosted the third steering committee of the "Regional Hub for Innovation and Entrepreneurship in Agritech" project, as part of the "Tamkin Li Tanmia" program, funded by the French Development Agency (AFD). This event brought together various partners, including the AFD, the Digital Agriculture Hub, the IAV Institute, and other regional stakeholders, to take stock of the progress of the Agritech project.

The meeting provided an opportunity to share perspectives on progress made and discuss next steps, followed by the signing of a partnership agreement. The support program for innovative projects was presented, and an inaugural conference of the call for projects is planned for March 7, 2024, at the UEMF, focusing on agricultural issues in the Fez-Meknes region.

This event strengthened collaboration and innovation in the AgriTech sector, contributing to the creation of a strong ecosystem for agricultural entrepreneurship in Morocco.

Euromed Innovation Center: UEMF inaugurates its new innovation center (EIC)

The Euromed University of Fez has announced the creation of the Euromed Innovation Center (EIC), a support structure dedicated to the creators of innovative projects. The selection committee evaluates projects based on their scientific and innovative nature, as well as the technical, entrepreneurial, and managerial skills of the project leaders.

The EIC aims to provide personalized support throughout the business creation process, including inspiring events, diverse training, and privileged access to university resources. This center positions itself as a catalyst for innovation, both regionally and nationally, contributing to the importance of universities in the technological and entrepreneurial landscape.

Labeled by "Tamwilcom" among the four SAP structures at the national level in the "Ideation" segment, the EIC allows project leaders to access programs such as "Tech Start" and "Tech Boost", thus reinforcing the center's commitment to transforming innovative ideas into successful startups.

Launch of new professional DUs at ISJP

Euromed University of Fez is launching two professional university degrees in Land Law and Real Estate Management and Banking and Financial Techniques as part of its continuing education. The first degree aims to provide legal and technical expertise in land law for careers in sectors such as land conservation, notarial work, and real estate development, strengthening investment security. The second degree meets the needs of the financial sector by training professionals in banking and financial techniques, ensuring their mastery of legal and financial tools in compliance with regulations. These training courses are intended for professionals and students wishing to deepen their skills in the real estate and financial fields.

International Conference: Prof. Hasna SLAMTI represents UEMF at the Côte d'Azur University in Nice

In its new edition, under the trajectory of the meetings of African Studies in France, the University of Nice-Côte d'Azur organized on its Jean d'Angely campus, from 1er on July 4, an international conference under the themeeme: A race for ports in Africa? Actors, territories and strategies.

During this 8th edition of the African Studies Meetings in France, Professor Slamti gave a presentation entitled: "Territorial issues facing the challenges of connectivity in Africa: the case of the port of Tangier Med" during her participation in panel 37 entitled "A race for ports in Africa? Actors, territories and strategies".

This communication also aimed to shed light on the logistical and geopolitical importance of the Tangier Med port. It also attempted to demonstrate that this port is not only a global logistics and maritime hub, but also a key driver of economic and territorial development.

Signing of the financing agreement for the "Factory Pilot School 4.0" project co-financed by the KFW subsidiary, the Investment Facility for Employment (IFE)

On July 2, 2024, the EuroMed University of Fez (UEMF) and the Investment Facility for Employment (IFE) signed a financing agreement for the Pilot School Factory 4.0. This project, co-financed by the IFE (37.58 million DH, or 3.51 M€) and l'UEMF (own contribution of 30%), mobilizes a total investment of 53.2 million DH (4.97 M€) to build a training centeredie hasIndustry 4.0.

This center, which is expected to open in September 2026, will train 585 graduates and strengthen the skills of more than 1,100 professionals in its first three years of operation, creating 541 new jobs. It is part of the national digital transformation strategy and aims to support Morocco's industrial growth, particularly in the Fez-Meknes region, by offering specialized training for young graduates and professionals.

This signature marks the beginning of several similar projects financed by the IFE, in partnership with Moroccan institutional and industrial players, as part of the development of training infrastructures for the industry of tomorrow.

Third Entrepreneurship Training Workshop of the Link Up Africa Program at UEMF

On July 17 and 18, 2024, the Euromed Innovation Center (EIC), an innovation center at the Euromed University of Fez, hosted its third entrepreneurship training workshop as part of the Link Up Africa pre-incubation program. Funded by the European Union and implemented by AMCI and the Belgian agency Enabel, this event aims to support project leaders in creating their businesses, whether in Morocco or in their native country for students and graduates from sub-Saharan African countries.

At the heart of this training, participants explored value creation and structuring their business model. They also honed their pitching skills, essential for capturing investors' attention. The intensive sessions, led by EIC experts and mentors, enabled budding entrepreneurs to refine their value proposition, develop their presentation skills, and build a solid business model.

This workshop offered a unique opportunity for students and winners to prepare their projects for pitch sessions in front of a panel of experts. The best projects will be selected to join the pre-incubation program, an invaluable opportunity for young entrepreneurs to turn their ideas into reality.

Franco-Moroccan Conference on Business Law

The conference, co-organized by the Euromed University of Fez (UEMF) and the Law and Commerce Association, under the theme "Franco-Moroccan Cross-Perspectives on Business Law," brought together renowned experts from both shores of the Mediterranean to discuss contemporary legal issues in business law. This event highlighted Franco-Moroccan collaboration and provided a valuable platform for exchanging views on legal practices, particularly in the areas of arbitration, contract law, and financing.

The opening ceremony was marked by speeches by prominent figures, such as Professor François-Xavier Lucas, Director of the Sorbonne Law School's outsourced program at UEMF, and Mr. Antoine Diesbecq, President of the Law & Commerce Association. The presence of Mrs. Carine Foeller Viallon, Consul General of France in Fez, as well as numerous jurists, lawyers, and researchers, reinforced the international and academic dimension of the event, highlighting the importance of cooperation between France and Morocco in the legal field.

Montpellier Business School Hosted at the Euromed University of Fez

As part of the Progression Agreement signed between the Euromed University of Fez (UEMF) and Montpellier Business School (MBS), the UEMF was pleased to welcome a representative from MBS on November 13th for a meeting dedicated to Euromed Business School (EBS) students. This exchange is part of an academic cooperation approach aimed at strengthening the international perspectives of our students.

During this visit, the MBS representative presented in detail the opportunities offered by the dual degree program between the two institutions. This new partnership allows EBS students, at the end of their five years of post-baccalaureate studies, to obtain:

- the Grande École Program in Management diploma issued by UEMF; - the equivalent diploma from Montpellier Business School; - the Master of Science (MSc.) from MBS, opening doors to international careers.

This program provides an exceptional springboard for our students, allowing them to benefit from dual academic expertise and develop world-class skills in a multicultural environment.

Med Youth Lab: Euro-Mediterranean Hackathon at UEMF

70 young people from 21 nationalities gathered at the UEMF for a Euro-Mediterranean Hackathon co-organized by the UEMF, the Union for the Mediterranean (UfM), the German Development Cooperation, and the Anna Lindh Foundation.

From November 25th to 29th, the Euromed University of Fez, in collaboration with the Union for the Mediterranean (UfM), the German Development Cooperation (GIZ), the Anna Lindh Foundation and the European Institute of the Mediterranean, hosted the UfM Med Youth Lab 2024, a dynamic Hackathon that took place over five days.

The UfM Med Youth Lab 2024 was marked by exceptional cultural richness. In addition to the 50 nationalities already present at the Euromed University of Fez, 70 young people aged 18 to 29, from 21 nationalities from the southern Mediterranean region and the European Union, were added, illustrating the international and inclusive vocation of the UEMF.

Excelia, a prestigious French higher education group, hosted at the Euromed University of Fez

As part of the partnership established between the Euromed University of Fez (UEMF) and Excelia, a prestigious French higher education group, which includes a triple-accredited AACSB, EQUIS, AMBA Business School, a TEDQUAL-accredited Tourism School, and a Communication School, we had the pleasure of welcoming our partner for a session specially organized for the benefit of our students at the Euromed Business School (EBS).

This exchange is part of an academic cooperation approach aimed at strengthening the international prospects of our students. During this visit, the Excelia representative presented in detail the opportunities offered by the dual degree program between the two institutions.

This new partnership allows EBS students, at the end of their five years of post-baccalaureate studies, to obtain:

- Diploma from the Grande École Program in Management issued by UEMF;
- Equivalent diploma from Excelia.

This program provides a springboard for our students, allowing them to benefit from dual academic expertise and develop world-class skills in a multicultural environment.

Launch of Fez Smart Factory activities at UEMF

On January 16, 2025, the Euromed University of Fez (UEMF) launched the Fez Smart Factory, the first Moroccan ecosystem dedicated to Industry 4.0. This ambitious project, supported by a broad public-private and international partnership, aims to transform Moroccan industry by integrating advanced technologies such as artificial intelligence, robotics, and 3D printing.

Located on 6.6 hectares within the UEMF eco-campus, the platform includes an incubator, an R&D center, a business center, and a Pilot School Factory 4.0, currently under construction, which will offer nearly one million hours of training. This project, funded in particular by FONZID and the MCC, embodies a new industrial dynamic based on innovation, training, cooperation, and sustainability.

Morocco200: a milestone at the Euromed University of Fez

The Euromed University of Fez had the pleasure of hosting “Morocco200” on February 26, 2025, a major initiative led by the Ministry of Digital Transition and Administrative Reform, GITEX AFRICA, KAOUN International and the Digital Development Agency (ADD).

This ambitious operation highlighted the potential of Moroccan startups through a national roadshow, stopping in Casablanca, Tangier, Agadir and Fez, with the aim of inviting young entrepreneurs to take part in Africa's largest tech event, GITEX AFRICA.

UEMF thanks Mr. Chakib Achour, Country Chief Representative of GITEX Africa in Morocco, as well as all the partners who contributed to the success of this initiative. A special tribute is paid to POGO, a startup born within UEMF, and to ARWA Solutions, who shared their experience and commitment by participating in the 2024 edition of GITEX.

With innovation at the heart of UEMF's mission, the university remains committed to supporting the startup ecosystem and guiding Moroccan talent towards excellence and technological entrepreneurship.

[Tribune] Wage inequality in Morocco: three months of “free” work for women

According to a report by the High Commission for Planning, published in 2024, the wage gap between men and women reached 23%. This means that in 2024, Moroccan women symbolically worked "for free" from October 8 until the end of the year. This observation highlights the urgent need for concrete action to reduce these inequalities and ensure true pay equity. This represents nearly three months of unpaid work compared to men, an alarming inequality that remains largely ignored in the public debate.

New Dynamics: Health Tourism at the Euromed University of Fez

A pioneer in promoting synergies between research, innovation and territorial development, the Euromed University of Fez (UEMF) hosted, from April 10 to 12, 2025, the first edition of the Regional Forum on Health Tourism, under the theme: "Thermal waters of the Fez-Meknes region: Health and Tourism".
Organized in partnership with the Wilaya of the Fez-Meknes Region, the province of Moulay Yacoub, the Regional Tourism Council and the Regional Council, this major event is fully in line with the UEMF's commitment to actively contribute to the dynamics of sustainable regional development, particularly in sectors with high potential such as health tourism.
A meeting place for experts, researchers, economic operators, and public stakeholders, the Forum offered a rich program including scientific seminars, presentations of innovative projects, and roundtable discussions on the challenges of developing spa resorts. Through this event, the UEMF leverages its academic and scientific expertise to fuel reflection and support public policies in structuring a regional ecosystem focused on health, well-being, and sustainable tourism.
By hosting this Forum, the University confirms its role as a catalyst for strategic projects at the national and regional levels, and reaffirms its mission as a center of excellence promoting dialogue between knowledge, innovation and inclusive development.

[Tribune] Donald Trump's reciprocal customs duties, "A clear challenge to the spirit of the Morocco-United States Free Trade Agreement"

A promise is a promise. On April 2, Donald Trump released his much-feared "reciprocal tariffs" announced in February. To usher in what he calls his "declaration of economic independence" and usher in "the golden age of the United States," the 47th president in the country's history imposed an import duty on his economic partners for every product crossing U.S. customs.

"Foreign leaders have stolen our jobs, foreign leaders have ransacked our industries, and these scavengers have ripped apart our American Dream. We will produce the cars, boats, potato chips, planes, minerals, and medicines we need right here in the United States," he said, illustrating the ultra-protectionist policy he has been pursuing since taking office.

https://ueuromed.org/actualites/articles/tribune-droits-de-douane-reciproques-de-donald-trump-une-remise-en-question

Promoting artisanal heritage : a strategic framework agreement for the region

On April 17, 2025, the Euromed University of Fez participated in the signing of partnership agreements during the visit of Mr. Lahcen Essaadi, Secretary of State for Crafts, to the Fez-Meknes Chamber of Crafts.

A framework agreement was signed between the UEMF State Secretariat and the Chamber of Crafts to develop specialized university training in craft trades, support innovative projects, conduct socio-economic studies, promote craft heritage and integrate digitalization to modernize the sector.

The UEMF is committed to mobilizing its resources to train professionals who combine tradition, innovation and sustainability while respecting the environment and social values.

A second partnership was signed with the Federation of Craft Businesses to strengthen training in glass techniques in collaboration with CERFAV in France.

3ème edition of the Restructuring Days of Fez

Today and tomorrow, the Euromed University of Fez is hosting the 3rd edition of the Fez Restructuring Days, an event of excellence organized in partnership with the Sorbonne Law School. Renowned jurists, practitioners, researchers, magistrates, and institutional representatives from France, Africa, Morocco, and elsewhere are gathering to discuss the major transformations in corporate restructuring law.

The morning was devoted to two major areas: the reform of amicable and collective procedures, then the international and European issues linked to restructuring.

Rich discussions that fuel reflection and open the way to new perspectives.

Mystery Gift, a startup incubated at UEMF, selected at GITEX

Among the 200 Moroccan startups selected to participate in the continent's largest technology fair, GITEX, Zahira Boulanouar, a second-year student at the School of Digital Engineering and Artificial Intelligence (EIDIA), proudly represented the Euromed University of Fez with her "Mystery Gift" project.

Born from an idea developed in her bedroom, this innovative personalized gift concept combines customer focus, creativity, and artificial intelligence. Driven by an original vision of tailor-made products, Zahira transformed her initiative into a promising startup, now supported by the UEMF's Euromed Innovation Center (EIC).

His career path reflects the spirit of innovation, perseverance, and entrepreneurial commitment that the University encourages in its students. The recognition obtained through this national selection confirms the quality of the support offered by the EIC and the UEMF's ambition to train the leaders and innovators of tomorrow.

Our congratulations to Zahira on this great achievement and our best wishes for the rest of her adventure at GITEX Africa 2025 and beyond.

A center of excellence for French-speaking restructuring, the UEMF is hosting a 3rd edition with strong international resonance

On May 8 and 9, 2025, the Euromed University of Fez, in partnership with the University of Paris 1 Panthéon-Sorbonne, hosted the 3rd edition of the Restructuring Days. This benchmark event in the French-speaking legal world brought together nearly 250 participants from Europe and Africa: lawyers, magistrates, business leaders, researchers, and students.

Created to analyze developments in the law governing companies in difficulty, these days have become a space for exchanges between professionals and academics on legal reforms, innovative practices, and international issues. The rich program addressed the reform of amicable procedures, recovery plans, and transnational cooperation.

This edition was distinguished by a strong African participation, notably from OHADA member delegations, confirming the event's vocation to create a bridge between Europe and Africa.

Fez has thus established itself as a center of excellence in business law, thanks to the UEMF's commitment to research, continuing education and international openness.

Strategic reading of Moroccan intelligence: Moulay Abdelmalek Alaoui in conference at the UEMF

As part of its high-level intellectual meetings, the Euromed University of Fez welcomed Mr. Abdelmalek Alaoui, president of IMIS and recognized expert in strategy, for a conference dedicated to his reference work "The Time of Morocco: Resilience and Emergence of the Cherifian Kingdom".

The event provided an opportunity to revisit Morocco's major strategic directions in the face of the Covid-19 pandemic, while analyzing the far-reaching reforms undertaken in the institutional, economic, digital, and geopolitical spheres. Through a structured and lucid approach, Mr. Alaoui presented Morocco as a country undergoing transformation, focusing on political anticipation, innovation, and a sovereign vision of development.

The discussions highlighted the central role of youth in this dynamic, perceived not only as beneficiaries, but also as key agents of change. Students were thus able to interact around the issues of national leadership, digital transition, continental integration, and productive sovereignty.

The session concluded with a book signing and a special moment of sharing, confirming the importance of such meetings in civic education, the formation of critical thinking and the promotion of a culture of resilience.

HackAI Morocco: UEMF on the podium!

Among more than 200 applications, our students from the School of Digital Engineering and Artificial Intelligence (EIDIA) distinguished themselves in this prestigious national generative artificial intelligence (GenAI) challenge, organized at 1337AI.

A team of three students, proudly representing UEMF, brilliantly defended their ideas during this competition, which brought together the country's top talent. Their project, Tomouhi, is an intelligent job interview simulation platform, offering personalized support to help students and job seekers hone their skills. A true demonstration of creativity and commitment!

Congratulations to Imane AMAAZ, Imane Benchrif and Hiba SOFYAN for this remarkable achievement, as well as to the mentors who accompanied them throughout the journey.

Participation in the National Conference on Investment, Employment and Digital Transition

As part of the annual session of the House of Councillors of the Kingdom of Morocco, a National Conference on Investment, Employment and Digital Transition was held on June 11, 2025 at the House of Councillors, under the theme: "Investment, Employment and Structural Transformation in Morocco: Towards a New Inclusive Territorial Governance".

The Euromed University of Fez was represented by Professor Ahlam Mohammadi, lecturer and researcher at the Euromed Business School (EBS), who took part in the thematic workshop entitled: "Investment, governance, gender and territorial dynamics: points of convergence to improve inclusive employment in Morocco."

Her speech highlighted the conditions necessary to make public investment a lever for inclusive job creation and balanced territorial development. She emphasized the importance of governance rooted in local realities, capable of responding to the structural challenges of the labor market.

Calling for a strategic repositioning of public policies, Professor Mohammadi stressed the need to place the creation of productive, sustainable and accessible jobs for all at the heart of national priorities.

This participation illustrates the active engagement of the UEMF academic body in the major debates that shape the future of the country.

Roundtable: Entrepreneurship in Africa – Innovate locally, impact globally

As part of African Week, a round table hosted by Bank of Africa was held on June 12, 2025 around the theme:

“Entrepreneurship in Africa: Innovate locally, impact globally.”

This session brought together students and professionals to explore the role of local innovation in the continent's economic transformation and its global influence.

The discussions highlighted success stories, challenges encountered, and opportunities for young African entrepreneurs, with a particular focus on innovation, sustainability, and inclusive growth.

The event illustrated the full potential of the African entrepreneurial spirit in building a more dynamic, connected and resilient economy.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Para-academic visit organized by the EPS BDE

The Student Office (BDE) of the School of Physical Sciences (EPS) organized a para-academic visit to the Sofafer company as part of the BDE activities.

Meetings between UEMF students and alumni

From February 2 to 12, 2025, meeting sessions brought together UEMF students and alumni for enriching discussions around career paths, integration into the world of work, internships, and the sharing of inspiring experiences.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Enactus UEMF National Seminar

On February 8, 2025, the Enactus UEMF national seminar brought together students and experts from partner universities for a day of exchange, sharing of know-how and presentation of projects with a strong social impact.

This event allowed Enactus UEMF to highlight its achievements and strengthen its links with other Enactus clubs nationwide.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

MATLAB & Simulink: Modeling and Simulation of Dynamic Systems

On February 21, 2025, the Hi-Tec Club organized an introductory session to MATLAB & Simulink, focusing on the modeling and simulation of dynamic systems.
Participants learned how to create scripts, solve differential equations, visualize results graphically, and analyze system behavior. They also learned about Simulink's basic building blocks for modeling electrical (such as circuits) and mechanical systems.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

“Communication and Professional Skills” – Rotaract & Genius Clubs

On February 26, 2025, the Rotaract and Genius clubs, in collaboration with Ms. Khadija El Hamyani, led a communication workshop focusing on oral expression techniques, the art of convincing and the expectations of the professional world.
Participants also took part in a fun activity aimed at improving their speaking, diction, and interpersonal skills. It was a practical and inspiring experience to strengthen key communication skills.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

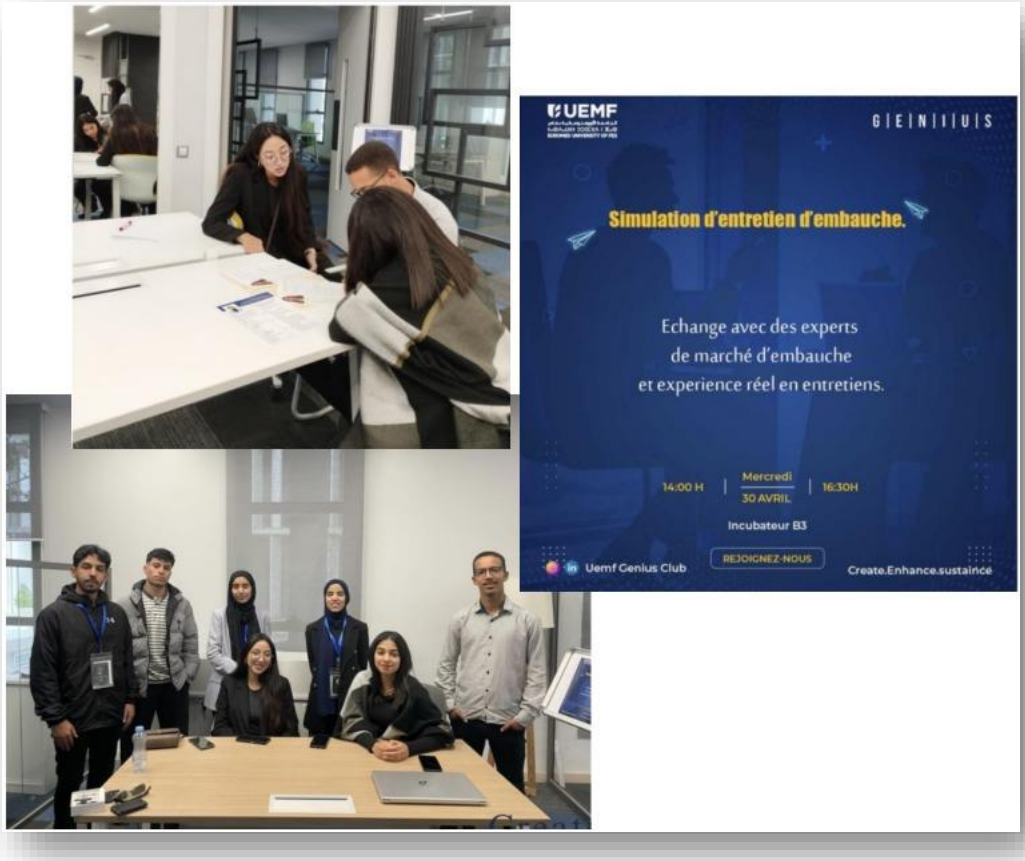

Training: Succeeding in your interview – HI-TEC Club

On April 16, 2025, as part of its actions aimed at strengthening the cross-disciplinary skills of its members, the HI-TEC Club organized a free training course entitled:
"How to succeed in an interview and avoid common mistakes," led by Ms. Nadia El Harrak, expression teacher and certified personal development coach.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Interview Preparation Workshop – Genius Club

On April 30, 2025, the Genius Club organized a job interview preparation workshop for Master's students, with the aim of supporting them in their professional integration.

THE Impact Ranking 2025: 1st at regional level and2nd at the national level in the category SDG 8: Decent work and economic growth

Rank	Name	Decent work and economic growth	Overall
=60	International University of Rabat Morocco	78.0	70.3–76.1
201–300	Euromed University of Fez Morocco	65.4–69.4	65.6–70.2
201–300	Ibn Tofaïl University Morocco	65.4–69.4	70.3–76.1
301–400	Abdelmalek Essaâdi University Morocco	62.1–65.3	60.9–65.5
601–800	Mohammed V University of Rabat Morocco	45.9–54.7	60.9–65.5

The 2nd edition for the STARTECH program

The Euromed Innovation Center (EIC), in partnership with Tamwilcom, the Fez-Meknes Regional Investment Center and Bank of Africa, organized an intensive bootcamp for innovative project leaders.
The objective of this initiative is to support the region's talents in structuring their ideas, to encourage their transformation into high-potential startups and to promote local innovation through concrete actions, collaboration and impact.
On July 10 and 11, participants from the Fez-Meknes region benefited from two days structured around practical workshops, mentoring sessions, and constructive exchanges. These days were marked by a collective dynamic promoting mutual support, energy, and creativity, driven by committed and action-oriented project leaders.

Startech Hackathon: three cohorts, three regions, one ambition

As part of the 2ᵉedition of the STARTECH program, the Euromed Innovation Center (EIC) is organizing an ideation bootcamp at the Euromed University of Fez, bringing together 10 innovative projects led by young talents from the Fez-Meknes, Drâa-Tafilalet and Oriental regions.

This program aims to support young people with ideas and assist them in structuring impactful entrepreneurial projects. Over two days, participants benefit from practical workshops, personalized coaching, and targeted mentoring sessions to transform their ideas into viable solutions.

The bootcamp is organized with the support of Tamwilcom, through the Innov Invest Fund, and in partnership with the CRI Fès-Meknès, Bank of Africa and the Blue Space network.

Continuing Education: UEMF joins forces with Audencia to launch a dual-degree Executive MBA

Audencia Business School and the Euromed University of Fez (UEMF) have signed a strategic partnership to deliver the Audencia Executive MBA on the UEMF campus in Morocco. This high-level training program, designed for senior executives, will lead to a dual degree: the Audencia Executive MBA (AMBA, EQUIS, and AACSB accredited) and a diploma awarded by UEMF.

The program, reserved for Moroccan or international professionals based in Morocco, requires significant managerial experience (8 years, including 3 in management). The official launch will take place in Fez, but the two institutions plan to expand the EMBA to other Moroccan regions depending on demand.

https://fr.linkedin.com/posts/universit-euro-m-diterran-enne-de-f-s_audencia-universit%C3%A9euromed-executivemba-activity-7356609590039375872-59Yb

A day of integration between energy, cohesion and orientation

Integration Week - Day 3: Placed under the sign of energy and inspiration

In the morning, our students vibrated to the rhythm of a sporty morning, between challenges, cohesion and good humor. In the afternoon, heading towards the future with a Masterclass of orientation: mapping out your academic and professional path at the UEMF, led by the team of theEuromed innovation center (EIC).
Between surpassing oneself, encounters and projection towards the future, this third day perfectly illustrates the spirit of the integration week: learning, sharing and growing together.

Tamkin LiTanmia: Agritech Project Steering Committee

THEOn September 25, 2025, the Euromed University of Fez hosted the steering committee of the "Regional Innovation and Entrepreneurship Hub in Agritech" project, part of the Tamkin Li Tanmia program funded by the AFD. Launched in 2022, this project aims to build a regional agricultural innovation ecosystem connecting researchers, institutions, businesses, start-ups, and farmers to develop appropriate technological solutions.

The meeting, bringing together numerous institutional and private partners, made it possible to present theproject progress, monitor the Tech4Farmers program, plan the mobilab and awareness-raising activities, while defining the next steps. It confirms UEMF's commitment to technological and entrepreneurial innovation in the service of agriculture and the Fez-Meknes region.

3e and last Tech4Farmers Bootcamp of the 2e Cohort

From September 23 to 25, 2025, the Euromed University of Fez, through its Euromed Innovation Center incubator, hosted the third and final Tech4Farmers – Tamkin LiTanmia bootcamp, funded by AFD. Dedicated to AgriTech project leaders from the second cohort, this bootcamp allowed startups to refine their business model, strengthen their pitching skills, and prepare for fundraising through practical workshops, mentoring, and discussions with experts.

This step completes the incubation cycle and prepares entrepreneurs to scale up and fully integrate into the regional and national Agritech ecosystem. It illustrates UEMF's commitment to technological innovation, sustainable agriculture, and impact entrepreneurship in the Fez-Meknes region.

[Tribune] From "Made in Morocco" to "Trade via Morocco": How the Kingdom is redrawing the routes of global trade

The "Made in Morocco" label has long symbolized an emerging industrial pride. Textiles, leather, then automobiles and aeronautics were the showcases of this Moroccan producer. But in 2025, this label is no longer sufficient to reflect the Kingdom's ambition.

The country is not just a manufacturing territory: it is becoming a logistical and strategic crossroads, at the heart of the recomposition of global flows. This profound transformation heralds the shift from "Made in Morocco" to "Trade via Morocco," an expression of a deliberate repositioning.

SDG9 report: Industry, innovation and infrastructure

Introduction

UEMF aims to foster creativity among its students. UEMF believes that Morocco and the countries of the wider Euromed region, including sub-Saharan Africa, have a great need for technicians and engineers. To this end, several engineering programs have been created and welcome a large number of Moroccan and foreign students, who benefit from modern technological platforms.

UEMF also sends its students to a large number of partner universities for exchanges. UEMF recognizes the role that engineering, science, technology, and innovation can play in building resilient infrastructure and promoting international scientific collaboration for sustainable development. The main objective is to develop students' skills so they can solve real-world problems and create innovative companies.

Finally, UEMF contributes to technological progress through its research activities in collaboration with industry to help solve environmental problems such as improving energy efficiency.

The UEMF aims to develop close links with industry:

- at the level of training, apprenticeship and internships for the benefit of students
- at the level of Research and Development (R&D) - innovation for the benefit of researchers within a contractual framework to meet the needs of socio-economic partners.

UEMF works to create an environment conducive to innovation, creation, and the transfer of knowledge and technology. It supports its graduates in their professional integration and in creating their own businesses.

Training engineers for industry

The UEMF Engineering and Architecture division brings together 3 major Engineering Schools, a major Architecture School and a faculty of engineering.

https://www.ueuromed.org/offre-formation/pole-ingenierie-et-architecture

https://www.ueuromed.org/offre-formation/pole-biomedical-et-biotechnologie

The Engineering Schools (EIDIA, EPS and EIBB) prepare engineering students to practice their profession in diverse fields of engineering: electricity, mechanics, energy, civil, computer science, artificial intelligence, robotics, telecommunications, biomedical, biotechnologies, etc.

Engineering training benefits from high-quality human resources and cutting-edge technological platforms (practical work, projects, research)

https://www.ueuromed.org/innovation/plateformes-technnologiques

The School of Digital Engineering and Artificial Intelligence (EIDIA)

This new school, entirely dedicated to artificial intelligence, is the first engineering school of its kind in Morocco and also in the Euro-Mediterranean and African region. The School is supported by a high-level research center using technologies in data generation, cybersecurity, robotics and cobotics, big data, machine and deep learning, neural networks, blockchains, image recognition, voice and movement. These digital technologies are used for applications in the fields of mobile technologies, medicine, renewable energy, agro-industry, automotive, aeronautics, banking and finance, and other industrial sectors (Industry 4.0) using digital technologies and artificial intelligence.

Executive-master-building-information-modeling

The Executive Master's in BIM Project Management, organized in partnership with the College for Innovation, Management and the Knowledge Economy (CIMES), meets a demanding and evolving demand for modern construction project management. It offers tailored training for senior executives and project managers to help them develop the managerial, organizational, and technical skills needed to lead BIM projects at the process and tool levels.

Master: Entrepreneurial Support and Technological Management

The training, provided by the EIT and its Faculty of Engineering, in partnership with the Mohammed V Foundation for Solidarity, is divided into modules focusing on an umbrella line of action around entrepreneurship and innovation in all its forms (incremental, market, technological, radical, "inside the box", "outside the box" and "around the box" innovation).

Students learn to manage product or service innovation projects from the idea to their launch on the market, but above all to help entrepreneurial structures, at all levels, to innovate with a logic of robust profitability allowing them to establish themselves sustainably against competitors.

Euromed Business School

The Grande Ecole Program leverages the pillars of the "Euromed Leader" Profile—Openness to the World, Entrepreneurial Spirit, Digitalization, and Responsibility—to train creative, responsible, and transformational executives and entrepreneurs. The training program, which combines teaching, conferences, experimentation, and internships, gives students the keys to understanding the complex challenges facing organizations and inventing new solutions to address them.

Specialized Master's in Marketing and Business Development

This course prepares future professionals to master marketing data analysis and decision-making, mobilize marketing action levers (digitalization, innovation) and design effective commercial and digital strategies.

The two years of the Master's degree allow students to develop skills and expertise to lead and transform organizations.

Design License

The Bachelor's Degree in Design at EMADU (School of Architecture) is designed to train designers capable of creatively managing, beyond the object, decision-making processes, mediation, and the integration of multidisciplinary contributions; thus allowing graduates to cover a very broad spectrum of sectors. This discipline aims to manage the project in all its complexity, both in terms of product and service innovation. It is a process that encompasses aesthetic, functional, material, and technical aspects; but also communication and market.

Research and Innovation

https://www.ueuromed.org/equipe-presidentielle/le-vice-president-charge-de-la-recherche-et-innovation

The center is experiencing a strong research dynamic, with several projects carried out in partnership with the industrial world and producing a significant number of research works in indexed and prestigious international journals.

https://www.ueuromed.org/innovation/research-project

https://www.ueuromed.org/innovation/scientific-production

Information and communication technologies

The DSI, Information Systems Department, is a joint service of the UEMF. It is responsible for administering the information system and managing the University's digital operations, as well as managing and maintaining the IT, network, and multimedia infrastructure. It provides access to the following services:

- Digital Work Environment (DWE): All UEMF staff and students have access to a DWE. This portal is designed to facilitate access to information relating to student life within UEMF (timetables, grades, requests for administrative documents, access to the library, the sports center, the restaurant and other UEMF services);
- Collaborative platform based on Office 365 including:
    - a university email address: All UEMF staff, students and lecturer-researchers have an email address in the form 'firstname.lastname@ueuromed.org ' , thus promoting internal and external communication,
    - collaboration tools,
    - the Microsoft Office suite (Word, Excel, PowerPoint) made available to all university students;
- Multi-service card allowing the UEMF community access to the various services made available to them, in particular for:
    - access the university at the access control level,
    - use the printers provided for self-service use,
    - pay for drinks at the university restaurant,
    - pay for purchases at the UEMF shop,
    - reserve books, manuals, magazines and other library materials,
    - reserve reading rooms,
    - book gyms with the sports center, etc.;
- Self-service rooms equipped with the latest generation PCs with all the software necessary for the training provided;
- Rooms equipped with CAD and DAO workstations;
- Rooms equipped with workstations and curved screens for artificial intelligence courses;
- Rooms equipped with virtual reality (VR) headsets for multimedia courses;
- High-speed Internet with a 1GB synchronous connection available to all university users (Students, Professors, Staff and Guests);
- Very broad and comprehensive WiFi coverage with more than 400 access points deployed across the entire UEMF campus;
- Digital tools for teaching:
    - e-learning platform,
    - MOOC courses,
    - virtual library;
- Educational rooms equipped with video projection and sound systems;
- New generation interactive screens;
- Rooms equipped with professional videoconferencing systems;

- Live streaming system for live broadcasting of local events;
- Centralized management system for internal and external displays.
- Simulation software for teaching and research applications
- ERP for the overall management of UEMF (education, research, finances, assets, human resources, etc.)

Research income

Industrial research revenues are estimated at 70 MDh or 53.8% of the operating budget

The UEMF's own budget reserved for research in 2019-2020 using the Frascati standard is estimated at more than 180 MDh

The investment dedicated to technological platforms in 2019-2020 is estimated at 80 MDh

Research Themes and Publications on Innovation

- Materials and bio-composites for Design
- DD: Driven Design for Moroccan Crafts
- Arti-Sign: Artisanal Heritage and Design
- Design in the era of Industry 4.0

https://www.medias24.com/chronique/autonomie-responsabilisation-et-innovation-trois-ingredients-necessaires-pour-une-croissance-robuste/

Innovation Structures

https://www.ueuromed.org/innovation/structures-d-innovation

Innovation structures are places of cross-fertilization bringing together UEMF researchers and businesses in a collaborative approach. Their missions are to drive actions in: Training, Research and Development, Transfer, and Creation of startups and innovative businesses in the service of economic development, integration and wealth creation.

Agro Energy TIC Valley

It is a joint platform for testing, research and training in the fields of bioenergy and energy storage, created jointly by the EuroMed University of Fez and the Institute for Research in Solar Energy and New Energies (IRESEN).

Fez Smart Factory

This project is being developed as part of the Sustainable Industrial Zones Fund (FONZID) Program of the Millennium Challenge Account – Morocco. It aims to establish a space for the development of industrial activities with significantly improved productivity through the implementation of Industry 4.0 concepts. It is being implemented as part of a partnership between UEMF, CGEM Fez/Taza, the Fez Meknes Regional Council and the company Alten Delivery Center Morocco.

A launch workshop for the project: Supporting Moroccan Companies through the use of Industry 4.0 was organized on Friday, September 22, 2023 in Rabat.

This event was organized by the United Nations Industrial Development Organization (UNIDO) in partnership with the Ministry of Industry and Trade, the Digital Development Agency (ADD) and the "Fez Smart Factory" consortium.

https://ueuromed.org/actualites/ateliers-workshops/atelier-de-lancement-du-projet-accompagnement-des-entreprises

Agritech

This regional innovation hub, whose feasibility study is currently underway and financed by the French Development Agency, and in which the Region and the Wilaya of Fez-Meknes are associated, will aim to contribute to the emergence of the underexploited potential of the Fez-Meknes region in its traditional activities (particularly agri-food) and the development of territorial growth drivers that create wealth and jobs.

UEMF Incubator

The UEMF Startup Incubator aims to support the academic community and other potential innovative project leaders, whether from UEMF or elsewhere, in transforming their projects into successful innovations on the market.

CVTIP (Center for Development, Transfer and Professional Integration)

The CVTIP is dedicated to supporting students and research professors in protecting intellectual property and promoting their research work and inventions.

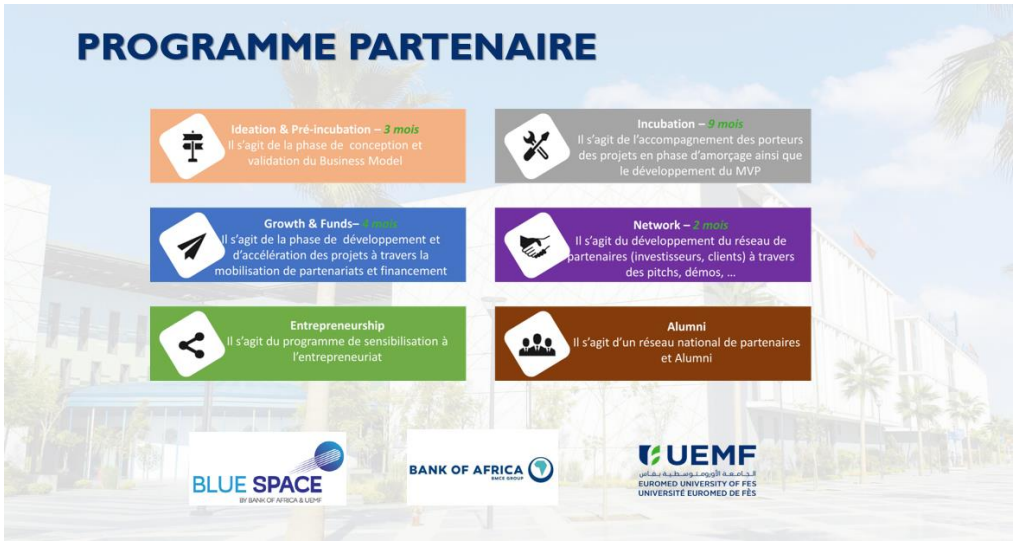

First promotion of the UEMF incubator (January 19, 2022)

The first pitch session for the project candidates took place at UEMF. Before a jury composed of the UEMF entrepreneurship team, executives from Bank of Africa, a partner of the University, and the BlueSpace incubator project, the candidates presented their projects in turn in order to access the Pre-incubation program.

PROGRAMS:

EUROMED INSPIRATION:We implement entrepreneurship awareness programs for UEMF students and researchers, through workshops and conferences led by successful entrepreneurs as well as experts in the fields of innovation.

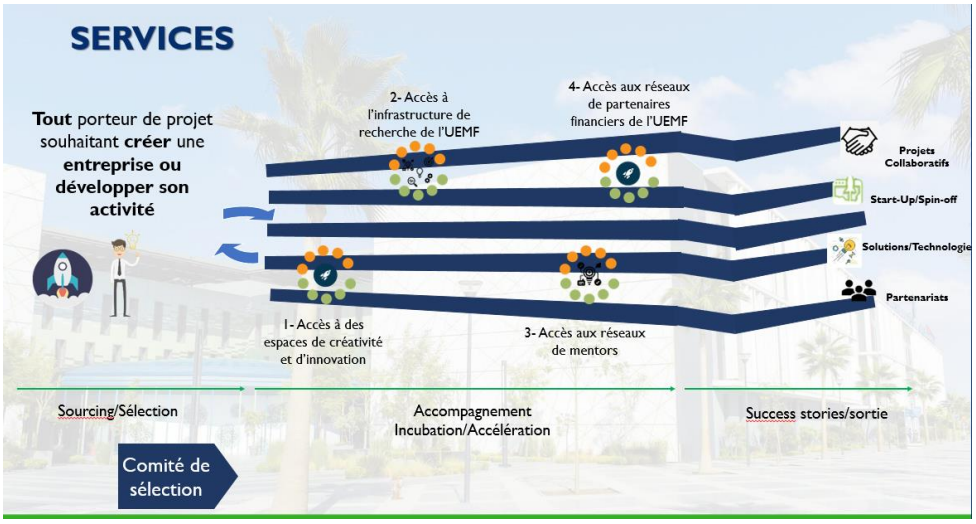

EUROMED LAUNCHPAD:Do you have an idea? Do you want to launch your startup or learn more about entrepreneurship? EUROMED LAUNCHPAD is a program that aims to support entrepreneurs in transforming their ideas into innovation.

This support includes the following elements:

- Maturation of ideas
- Strategic analysis
- Legal advice

- Business Plan
- IP Consulting

https://ueuromed.org/en/node/2314

https://bluespace.ma/accueil

Innovation activities

UEMF instills the spirit of innovation and creativity in its students and researchers by having them participate in national and international competitions and calls for tenders (hackatons, innovation competitions, innovation prizes, etc.)

Workshop: Management of technology, innovation and digital transformation in the University

Initiated by the Euromed University of Fez (UEMF) and its partner the University of Koblenz Landau (Germany), this workshop is intended to mutually study the innovation and digitalization processes of the University.

At UEMF, the cultures of innovation and technology constitute one of the major pillars on which the University is based. This workshop is therefore an opportunity to implement more new, concrete, and high-value-added digital projects and to introduce a deep digital transformation with the objective of strengthening the position that UEMF has occupied from the outset (first digital university platform and first university to have created the School of Digital Engineering and Artificial Intelligence (EIDIA) in Morocco and Africa). The collaboration with Koblenz Landau University (Germany) will allow UEMF to align perfectly with concepts in the era of time and to establish new systems such as:

- Dematerialization of procedures;
- Digitization of learning platforms;
- Design thinking;
- Innovation of the university model (orientation towards a more efficient model);
- Resource optimization

Panel: "The university, a breeding ground for aspiring entrepreneurs"

https://www.ueuromed.org/actualites/ateliers-workshops/3e-edition-du-sommet-empower-21-luniversite-pepiniere-daspirants

Industrial and innovation partnerships

Among the signed agreements we can mention:

The Euromed University of Fez (UEMF) and Dassault Systèmes, one of the world's leading companies in the field of 3D design software, digital engineering, and virtual universe for innovation, have signed a partnership agreement aimed at creating the largest university digital engineering platform in Africa at UEMF. This platform leverages Dassault Systèmes' 3DEXPERIENCE, a teaching and research platform for innovation open to all students and researchers in the Kingdom and African countries. It is connected to the 3D printing platform already established at the University, as well as to UEMF's robotics and cobotics infrastructure.

Agreements with Industry

https://www.ueuromed.org/partenariats-socioeconomiques

The UEMF has signed several partnership agreements with national and international industrial circles.

UEMF receives a delegation from USAID: Launch of the MERC call for proposals program (2023-2024)

As part of the development of international cooperation, a working meeting was held on Thursday, December 7, 2023, at the Euromed University of Fez between the Vice-Presidency in charge of Research-Innovation and Partnership, the heads of UEMF establishments and the heads of the Middle East Regional Cooperation Program (MERC) of USAID (United States Agency for International Development).

This meeting was an opportunity to present the new call for proposals program (2023/2024) for the funding of applied research projects. These innovative projects are incubated within the Eco-campus of the Euromed University of Fez.

The MERC Program, managed by the U.S. Agency for International Development (USAID), focuses on technology, development, and capacity building for young researchers. The program also aims to support scientific cooperation between Israel and the Middle East and North Africa (MENA) countries.

The main objective of MERC is to provide grants for applied scientific research on topics related to regional development as well as for the organization of one-off events, such as regional workshops and scientific exchanges that aim to promote regional scientific cooperation.

During this meeting, Prof. Salim Bounou, Vice-President in charge of Research-Innovation and Partnership, presented the University's main missions, its values, its training offer as well as the opportunities that the UEMF offers in terms of scientific research and scholarships. He also presented the major project for the development of industrial activities 4.0, the Fez Smart Factory (FSF). In turn, the MERC members present took care to present the evaluation criteria for benefiting from this program, the possible funding opportunities as well as the stages of submission of applications and the evaluation schedule.

At the end of this meeting, the teacher-researchers who attended this meeting enriched the discussion by exchanging questions and answers to address all aspects related to this initiative.

UEMF signs a memorandum of understanding with the Shanghai Science and Technology Exchange Center (SSTEC-CHINA) September 21, 2023

The Euromed University of Fez (UEMF) signs a memorandum of understanding with the Shanghai Science and Technology Exchange Center (SSTEC-CHINA).

During this meeting, Prof. Salim BOUNOU, Vice-President in charge of Research-Innovation and Partnership, began with a presentation of the University, recalling the importance of this cooperation which promotes joint scientific research.

This memorandum of understanding aims to establish the foundations of a cooperative relationship between the two institutions in order to develop a solid collaboration in scientific research, joint innovation projects, sharing of information related to innovation policies, technological exchange and development of incubators preparing the launch of start-ups.

Following this meeting, the University's guests took part in a guided tour of the UEMF Eco-campus and its research platforms.

Euromed University of Fez welcomes Alten and Bosch Germany

As part of the development of its cooperation relations with the socio-economic world, the Euromed University of Fez received, today, October 10, 2023, a delegation of senior officials from Alten and Bosch Germany.

On this occasion, a working session was held between the stakeholders in order to identify avenues for complementary partnerships with Alten Germany and Bosch Germany.

During this meeting, the institutions gathered discussed ways to develop their collaboration in the fields of training, scientific research and innovation in industry. During this meeting, Professor Mostapha Bousmina, President of the Euromed University of Fez, stressed the importance of this cooperation for the development of scientific research and technological innovation between the University and its socio-economic partners.

This event strengthens the existing collaboration between UEMF and Alten Maroc by diversifying the areas of partnership and exchanging expertise and technology related to projects of common interest.

https://ueuromed.org/actualites/annonces-diverses/luniversite-euromed-de-fes-recoit-alten-et-bosch-allemagne

Awards and Distinctions

The President of the University is a world-renowned researcher who has received several awards, among others: Awards and Distinctions:

- The Grand Prix de l'Innovation in 2009 awarded by the Ministry of National Education, Higher Education, Executive Training and Scientific Research of Morocco
- The prestigious Steacie Fellowship in 2004, which is considered Canada's highest research award
- The Top20-Canada Prize in 2002 awarded by the Canadian Institute for Advanced Research to the 20 best researchers in Canada;
- The International Morand Lambla Award in 2000, awarded by the International Society (Polymer Processing Society) to the world's best researcher in the field of polymers
- The 2009 Research Innovation Award awarded by the Ministry of Industry of Quebec-Canada;
- The Louis Pasteur Prize in 1992.

Responsible innovation label obtained by the university for its "sustainable UEMF" project

The label responds to several challenges:

- Identify responsible innovations generated by French-speaking universities in order to promote and develop them;
- Strengthen the capacities and skills in SDGs/ESS of the Francophonie network;
- Organize support for French-speaking universities wishing to innovate responsibly;
- Train and support researchers, staff, students and teachers at French-speaking universities in responsible innovation and its social and environmental impact;
- Generate new partnerships and new resources around responsible innovation within the network of French-speaking universities
- Participate in and develop the emerging SDG/ESS dynamic in the academic world.

UEMF nominated in the 1st edition of the ZAIRI international prize for excellence in higher education

- UEMF has been shortlisted for the inaugural 2022 ZAIRI International Award for Excellence in Higher Education in the Digital Transformation category.
- The shortlisted institutions are among applications received from 31 countries. The ZAIRI Award is administered annually by the CLICKS association (cli-cks.com). "It aims to highlight the inspiring achievements of higher education institutions and to celebrate institutions that have developed and implemented creative responses to current challenges in the sector."

Selection criteria:

- Digital transformation strategy;
- Digital technologies and innovations exploited;
- Implementation and results achieved at:
- Student learning;

- Strategic management of the university;
- Institutional culture;
- Capacity building.

1st edition of Euromed Career Day, Employment Forum of the #Euromed University of Fez

Beyond job and internship searches, Euromed Career Day is an opportunity to network and meet professionals from various sectors. This forum aims to support young people in their career paths by allowing them to attend numerous career presentations and thematic workshops. This year, the first edition of Euromed Career Day kicked off with a round table on "digital transformation: new professions, new skills," led by Professor HICHAM SEBTI, Director and Lecturer at Euromed Business School, in the presence of:

- Pr. Mostapha BOUSMINA, Presidency of the UEMF,
- Prof. Mustapha BENNOUNA, Advisor to the President of the Euromed University of Fez.
- Mr. Omar TAJMOUATI, General President of CGEM Fez-Meknes,
- Mr. Amjad KITI, Director of the Economic Impulse and Territorial Offer Pole of the CRI Fez-Meknes,
- Ms. Khouloud ABEJJA, Director of Digital Transformation at the Digital Development Agency,
- Mr. Omar AZZAM, Deputy General Manager DXC Technology,
- Mr. Chakib ACHOUR, Chief Strategy Officer, Huawei ICT Ambassador, Huawei Technologies Morocco.

With more than 10 companies present in a dedicated exhibitor area, students are then invited to meet professionals who are open to answering all their questions. UEMF students participating in this forum benefited from a series of power skills workshops around e-branding to better highlight their profile, essential keys to succeeding in an interview, and advice to better understand corporate culture.

CREATIVE MINDS WORKSHOPS (September 14, 2022)

In order to complete the entrepreneurial acculturation effort invested and deployed across all UEMF training cycles, the "Entrepreneurship" team organized a series of workshops on September 14 to support the integration process of new EUMFiens through "Creative Thinking" approaches for a better understanding of entrepreneurial culture, particularly the generation of ideas.

These workshops were attended by nearly 300 students representing different establishments.

At the end of this activity, the participants were equipped with some methods for generating creative ideas and were informed about the services offered by the UEMF incubators.

"KICK-OFF MEETING: AGRITECH PROJECT" (June 2, 2022)

Developing entrepreneurship activities in the fields of AGRITECH with the aim of pursuing innovation, transferring know-how and connecting research with demand actors in the Fez-Meknes region: this is the objective of the "AGRITECH" project, entitled "Regional Center for Innovation and Entrepreneurship in Agritech", which was officially launched in June 2022. This project is part of the "Tamkin Li Tanmia" program financed by the French Development Agency (AFD).

The main objective of this project, which will last 33 months, is the development of integrated innovation ecosystems at the local level to support the transfer of know-how between the different actors of innovation in AGRITECH, in particular the scientific system, the public and private sector (mainly Start-Ups and SMEs), but also farmers.

June 2, 2022, the launch day of this project, was an opportunity for the stakeholders present (DRA, INRA, ADA, ENA, ADD, DOMAINES, CRI FM, APEBI, FENAGRI, Pôle Digital, AGRINOVA, AFD) to learn about and identify with the logic of the project. Detailed information was presented, namely: the vision, expected results, positioning of the pole, services, target and implementation methodology.

The stakeholders present also contributed to the framing of the cluster's activities through focus groups which had the following themes: financing, innovation and collaboration between the cluster's stakeholders.

[Entrepreneurship] Launch of the Blue Space incubator at UEMF: Call for projects open

An initiative resulting from a Public Private Partnership concluded between UEMF and Bank of Africa, the BlueSpace incubator is located in the premises of the Euromed University of Fez.

"BlueSpace" aims to support students and project leaders in realizing their entrepreneurial ambitions. It includes two components: an educational banking space dedicated to students and an incubator for project leaders participating in the program.

Candidate Pitches #BlueSpace, the incubator made in #UEMF

The first pitch session for the project candidates took place at UEMF. Before a jury composed of the UEMF entrepreneurship team, executives from Bank of Africa, a partner of the University, and the BlueSpace incubator project, the candidates presented various projects in turn. A selection phase is planned to select the projects that can benefit from incubation in the new BlueSpace by UEMF & Bank of Africa.

Organization of the Royal Air Maroc Hackathon

The "Euromed Sustainable Impact Challenge" Hackathon, organized from January 19 to 21, 2022 by the Euromed University of Fez and Royal Air Maroc, ended with the announcement of the winning project "Green Wings".

Green Wings is a mobile application created by a group of eight students in Business, Artificial Intelligence, and Design at UEMF. The application aims to promote RAM's CSR initiatives and instill them in employees' habits through three main components: carpooling, catering, as well as eco-scoring and eco-ranking.

- Carpooling will help minimize the carbon footprint.

- The catering component will allow employees to confirm or not their presence at the company restaurant the next day, as well as to choose the foods that would make up their menu in order to avoid food waste.

- Eco-scoring is a score calculated based on 3 factors: water and electricity consumption internally and externally among the various RAM employees, the rate of involvement in carpooling and RAM's eco-responsible activities, and finally volunteering. This score will lead to an eco-ranking that will elect the best eco-friendly, which will create a competitive and fun atmosphere and allow people to combine business with pleasure.

All these activities will bring significant savings for RAM, savings which will then be used in a reward system for various eco-responsible employees.

Organization of the Web Help Hackathon in collaboration with the Partnerships Department

The grand finale of the Hackathon organized by Webhelp Maroc and UEMF, from September 21 to 23, on employee loyalty, saw the participation of more than ten projects, each one innovative. New ideas and concepts captivated the attention of the jury during the defense session.

Concretely, the objective of this event is to encourage young UEMF students to find solutions to a common problem: employee engagement in a workspace. A dozen groups made up of students from the Euromed Business School and the School of Digital Engineering and Artificial Intelligence pooled their efforts to design innovative concepts.

The highlight of this Hackathon was the nomination of the winning project at the end of the pitching session. The "Webhelp League" project, a platform that gamifies agents' KPIs (Key Performance Indicators) by transforming them into a team game, came in first place. This platform brings together groups working on a Webhelp platform. These groups form a virtual football team with the goal of reaching the top of the standings at the end of the season. Players/agents must therefore create synergy between themselves: placing the most productive players/agents in the positions that will earn the team the most points and, at the same time, increase their ranking in the league. At the end of each season, the winning team will be rewarded.

The finalists of the regional stage of the "Smart Bank" competition have been revealed!

23 project leaders were selected to present their projects to business leaders and bankers and obtain a share of the funds intended to develop the dynamics of innovation in the Fez-Meknes region.

Three finalists were announced during the awards ceremony and will represent the Fez-Meknes region at the national finals to be held next June. If they succeed in convincing the national jury, they will be awarded funding contracts to accelerate the development of their innovations, in addition to the support offered by the UEMF's entrepreneurship support structure.

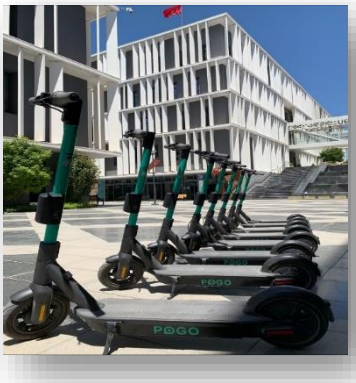

The finalists:

- PEATI- Positive Energy Advice Trading International
  PEATI is a 100% Moroccan digital wholesale purchasing center specializing in the construction sector.
- Ra7betkom
  Digital platform to connect agricultural stakeholders, specifically farmers, to give them better visibility on the market and to be able to best promote their products.
- Com'On
  A platform that helps communities better understand each other and develop mutual support and the exchange of services within them.

UEMF promotes electric mobility! (May 6, 2022)

UEMF has entered into a new partnership with the Moroccan start-up "POGO", which consists of the development of soft and electric mobility within the UEMF eco-campus.

For an initial incubation phase, “POGO” deployed a fleet of 12 electric scooters for internal travel needs within the campus, in addition to 10 electric motorcycles for external travel.

POGO will benefit from the services offered by the UEMF incubator, namely technical assistance, individualized monitoring, access to technological platforms and access to the UEMF partner network.

https://pogo.vercel.app/

UEMF promotes 3D printers!

A start-up has been created at Euromed University called M3DTP.

This startup boasts a fleet of cutting-edge 3D printers, machines capable of bringing previously unattainable concepts to life. However, what sets this company apart isn't just the technology, but also the strong commitment to sustainability that defines its mission.

3D printing has already revolutionized manufacturing by reducing waste, optimizing design, and enabling local production. But this startup goes further. It is committed to using only environmentally friendly materials and encouraging the reuse and recycling of manufactured products. Each piece created is designed with its carbon footprint in mind, thus contributing to the preservation of our environment.

Organization of a hackathon at UEMF December 20-22, 2022

As part of the second edition of Digital Week, organized by CRI-Fès Meknès and this year focusing on the theme of "Craftsmanship and Digital", a hackathon took place at the Euromed University of Fez from December 20 to 22.

This unprecedented national competition, which took place over 3 days at the UEMF incubator, saw a significant mobilization of artisans, IT developers and marketers and enabled the generation of innovative ideas to meet challenges linked to the value chain of different sectors in this high-potential sector.

www.fesmeknesinvest.ma/2022/12/09/le-cri-organise-un-hackathon-dans-le-cadre-de-la-sdd/

The 2nd edition of the Euromed Sustainable Impact Challenge February 6, 2023

Following the January 2022 edition, the Euromed Sustainable Impact Challenge continues this year to continue to promote the emergence of innovative solutions in sustainable development and CSR.

This Hackathon will be held in partnership with RAM and the Euromed Business School of UEMF from February 6 to 8, 2023. Supervised and coached by RAM experts and UEMF lecturer-researchers, around a hundred students from the Euormed Business School, the School of Digital Engineering and Artificial Intelligence and the Euromed School of Architecture, Design and Urban Planning will have to respond to a problem related to CSR. The idea is to arrive at the pitch session with an economically viable solution that would reduce the impact of RAM's activities on the environment.

Issues of this edition:

"How can we engage customers in a responsible approach through choices and behaviors throughout the customer journey, from inspiration to their return home?"

https://ueuromed.org/actualites/ateliers-workshops/coup-denvoi-de-la-2eme-edition-de-leuromed-sustainable-impact

Grand finale of the "Euromed Sustainable Impact Challenge" Hackathon: innovative but above all responsible projects February 8, 2023

The intense work sessions and tailored coaching ended on a high note. Projects that competed in ingenuity and eco-responsible concepts were the subject of the grand finale of this Hackathon co-organized by Euromed Business School and Royal Air Maroc.

Applications, quizzes, and various green solutions were designed by students from the Euromed Business School (EBS) and the School of Digital Engineering and Artificial Intelligence (EIDIA) to engage customers in a responsible air travel approach throughout the entire journey, from destination inspiration to returning home. Applicants for this competition were organized into ten teams. At the end of the Hackathon, the projects of three teams were recognized with prizes.

More than just an opportunity to democratize the theme of CSR, the values of RAM and UEMF, this Hackathon is a unique opportunity, of educational interest, allowing students to benefit from tutoring and support from high-level executives and experts.

Launch of the SMART Bank Territorial Open Innovation program March 9, 2023

To support regional entrepreneurial momentum, UEMF, in partnership with Bank of Africa, CRI-Fès-Meknès, and the Fès-Meknès Regional Council, organized a BootCamp on March 9 and 10, during which 16 idea holders benefited from a tailored support program that included training, mentoring, and discussions with business experts. The goal is to help develop among the various participants a number of attitudes, skills, and competencies useful for successfully carrying out an entrepreneurial project.

A final selection of the best innovative ideas will be organized at the end of this edition. The winners of this edition will benefit directly from the support of the UEMF incubator.

UEMF supports young middle school students in the Moulay Yacoub province in innovation and robotics March 21, 2023

The Euromed University of FES opened the doors of its laboratories and language center to young middle school students from the Moulay Yacoub province and their coaches. This is in

preparation for the First Lego League Challenge, an international robotics competition for young people aged 9 to 16, organized by the FIRST Foundation (For Inspiration and Recognition of Science and Technology) and Lego Education.

Each year, a new theme is chosen for the challenge, and participating teams must build, program, and test a robot using Lego Mindstorms pieces to solve a series of missions on a game board. This year, the theme is energy efficiency. The missions are designed to encourage young people to explore areas such as science, technology, engineering, and mathematics (STEM) while developing communication, problem-solving, and collaboration skills.

The target group won the regional and national competitions and will represent Morocco in the final stages which will take place in the United States.

Student Innov'Up Hackathon: 20 online Masterclasses including 12 project leaders around the environment and ecology.

This hackathon is part of the European Union's actions in favor of youth, in particular the "Men Chabab Qrab" communication campaign, launched by the European Union in 2023. Its objective is to encourage young students to undertake and innovate by developing entrepreneurial solutions related to the environment and climate change.

The event on May 12, 2023 concludes a four-week pre-hackathon period, which allowed 12 teams selected from nearly 200 applications received to benefit from a dense training program with trainers and coaches from the entrepreneurial world, mobilized to support them in structuring and clarifying their project idea around the theme of the environment and sustainable development.

This support was accelerated with numerous additional sessions held during a hackathon bringing together the 12 teams, on May 11 and 12, 2023, at the Euromed University of Fez. Four teams presented solutions in agriculture.

in sustainable mobility, one in the preservation of biodiversity and one in biomaterials.

The jury was composed of Mrs. Patricia Llombart Cussac, Ambassador of the European Union to Morocco, Mrs. Anna Barone, Head of Representation of the European Investment Bank in Morocco, Pr. Mostapha Bousmina, President of the Euromed University of Fez, Mr. Omar Tajmouati, President of the Fez-Meknes regional branch of the CGEM and Mr. Omar Amrani, Director of Innovation and Pedagogy at StartUp Station.

Bank of Africa's National SmartBank Competition: 16 projects from various key sectors of the Moroccan economy

Regional Jury for the Bank of Africa SmartBank National Competition: The regional competition featured 16 projects from various key sectors of the Moroccan economy. For this round, the jury was composed of Ms. Squalli, facilitator at Bank of Africa, Mr. Errafik, First Vice-President of the Fez-Meknes Region, Mr. Bouzrazi, in charge of investment and investment and entrepreneurship programs at the Fez-Meknes Regional Council, Mr. El Badaoui, head of the Post-Creation Monitoring Department at the Fez-Meknes CRI, and Pr. Rhalimi, professor at the Euromed Business School (UEMF). After an evaluation based on the innovative nature, impact and feasibility of each proposal, the jury selected 2 projects to represent the region at the national event in Casablanca.

The second edition of the RAM Digital Open Innovation program is held at UEMF May 8, 2023

Euromed University of Fez is pleased to announce its partnership with Royal Air Maroc (RAM) for the second edition of the "RAM Digital Open Innovation" program.

RAM teams presented 13 interesting challenges during their visit to the EUROMED INNOVATION CENTER on Friday, May 5, covering a variety of areas from claims management to revenue optimization and travel sustainability. The bootcamp will take place from June 18 to 24, 2023, at the EUROMED Innovation Center in Fez.

As part of this program, RAM fosters an agile relationship with startups based on the following principles: support, visibility, transparency, and simplified procedures. The Moroccan airline operates on all continents and aims to co-build a new generation of innovative products and services for its customers and meet the challenges of the national company.

https://ueuromed.org/actualites/annonces-diverses/la-deuxieme-edition-du-programme-ram-digital-open-innovation-se-tient

UEMF hosts RAM DIGITAL OPEN INNOVATION for its second edition

Euromed University of Fez hosted today, June 23, the final phase of the second edition of RAM Digital Open Innovation, aimed at selecting the best solutions and projects led by the finalist startups.

As part of an approach to supporting project leaders, creating startups and spinouts linked to innovative fields, the Euromed University of Fez is hosting the second edition of the RAM DIGITAL OPEN INNOVATION program organized in partnership with Royal Air Maroc. From June 18 to 23, 2023, the event was held within the UEMF Eco-Campus and for a whole week, the Bootcamp was dedicated to the product development process, improving value propositions as well as designing the first version of the projects. At the end of these workshops, a Demoday was scheduled this Friday to find out the winning solution(s).

The Demoday took place in the presence of eminent personalities, including Mr. Addou Abdelhamid, Chairman and CEO of RAM, Mr. Kharlamov Alexei, Director of the Transformation Division of RAM, Ms. Kazzini Ilham, Director of the Commercial Division of RAM, Mr. Benchekroun Karim, Chief Financial Officer of RAM, Mr. Jalali Adil, Director of the Operations Division of RAM, Pr. Bousmina Mostapha, President of the Euromed University of Fez, Mr. Sami Romdhane, Country Manager of Visa Maroc.

This program aims to shape a new generation of innovative products and services to address the challenges facing the national airline. To this end, the Euromed University of Fez welcomed 10 teams of young developers from around the world with different challenges. These startups had one week at our Eco-Campus to prepare for the final pitch with the goal of eventually seeing their solution deployed.

This initiative supports the strategy of the Euromed University of Fez and its efforts to support young people in their entrepreneurial activities and to promote human capital in

society through training, support, skills development and financing of innovative projects. UEMF is thus revolutionizing the image of the traditional university by actively working within its ecosystem and in particular through its multiple partnerships and collaboration agreements concluded with various actors in the socio-economic world at the national and international levels.

State of play of the metallurgical, mechanical and electromechanical industries (IMME) sector by Pr. Hafsa El Bekri on Medi1 TV November 10, 2022

Prof. Hafsa El Bekri, lecturer at the Euromed Business School and Co-Director of the RIEMAS Think-Tank, was a guest on the program Questions d'Actu on Medi1 TV to take stock of the metallurgical, mechanical and electromechanical sectors, especially following the strong impact of the health and economic crisis. Facing several constraints, namely market disruptions and the rise in the price of raw materials, this sector must now rely on a new roadmap for the recovery of the sector and thus overcome the vagaries of the global market.

In her intervention on the program Questions d'Actu, Pr. Hafsa El Bekri responded to this problem alongside two Moroccan experts.

1st edition of the <<MedInnovationTour>> Hackathon

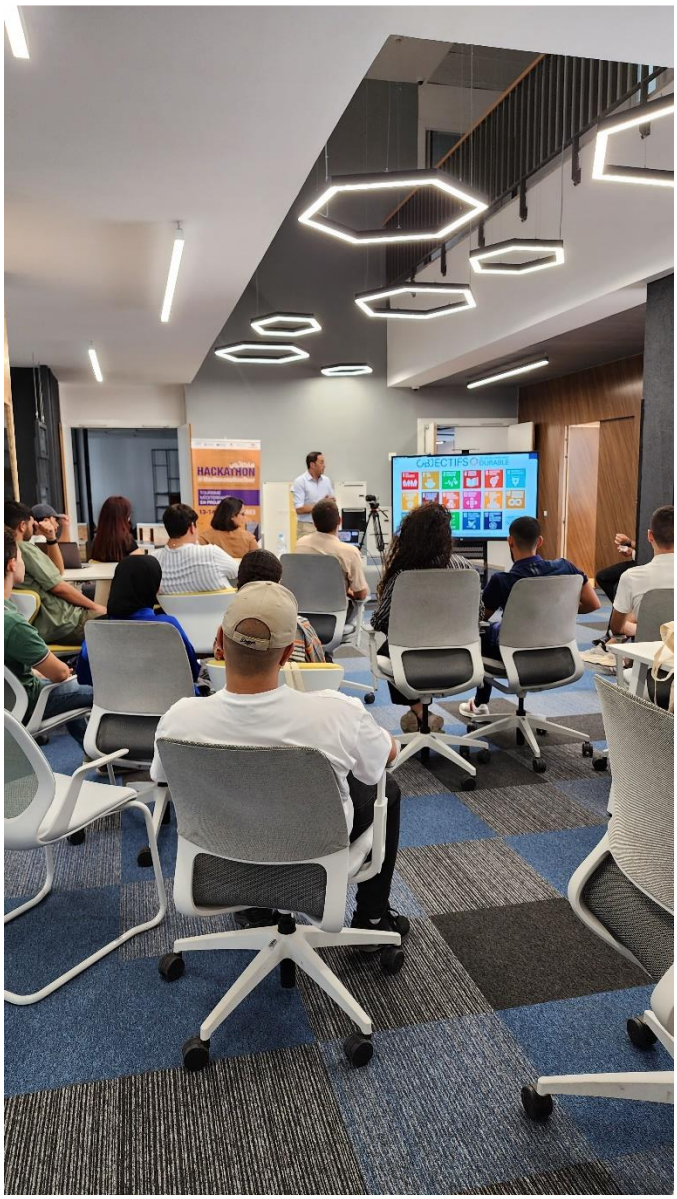

On the sidelines of the organization of the Mediterranean Tourism Forum "Meditour2023", the Euromed University of Fez (UEMF) and the Chamber of Commerce, Industry and Services are organizing a Hackathon which aims to energize and reinvent Tourism and bring together the creative minds of entrepreneurs ready to rethink the tourist experience in the Region with a focus on the Mediterranean.

The Euromed University of Fez organized in partnership with the Fez-Meknes Chamber of Commerce, Industry and Services the Hackathon "MedInnovation Tour 2023" which was

held at the UEMF Eco-campus, on October 13 and 14, 2023 under the auspices of the Ministry of Tourism, Crafts and Social and Solidarity Economy.

A flagship event preceding the 10th edition of the Mediterranean Tourism Forum, this hackathon aims to promote investment in this sector, strengthen interregional cooperation and showcase the tourist attractions of the Mediterranean region.

This year's MedInnovation Tour brought together several tourism stakeholders and experts, as well as entrepreneurs with creative ideas, to rethink the tourism experience and offer new perspectives to boost Mediterranean tourism by focusing on the region's natural and cultural assets.

During this Hackathon, the pre-selected candidates benefited from several training, coaching and support sessions provided by experts to allow them to live an immersive entrepreneurial experience through workshops, round tables developed around different themes, including "Design Thinking & UX/UI Design in the tourism sector", "Sustainability and innovation in the tourism sector", "Solution development, Product design and Prototype" and "How to pitch?".

At the end of these two days of collective reflection and intense work, several innovative projects emerged around the theme of "Mediterranean tourism in projects".

The awards ceremony was marked by the presence of several personalities representing the public and private sectors from different segments of tourism and those from the academic world.

Euromed University of Fez is actively participating in the 10th edition of the Mediterranean Tourism Forum "MediTour 2023"

In partnership with the Euromed University of Fez and many other institutions, the Fez-Meknes Chamber of Commerce, Industry and Services (CCIS) is organizing the 10th edition of the Mediterranean Tourism Forum "Meditour 2023" from October 24 to 26, 2023 under the theme "Investments, cultures and innovation: The future of Mediterranean tourism".

This large-scale event, held at the Palais des Congrès of the Marriot Hotel in Fez, was marked by the participation of several UEMF lecturers-researchers and directors of establishments who shared their knowledge with the participants during the workshops and conferences organized on the sidelines of this Forum.

The conference on Wednesday, October 25, organized under the theme "Fez and the Mediterranean Space," was led primarily by the academic staff of the Euroemd University of Fez. The topics discussed during the day focused on the influence of tourism trends, the Mediterranean dimension, and the spiritual influence of the city of Fez in a Mediterranean context. The speakers therefore highlighted the opportunities and challenges associated with adapting to tourism trends, establishing lasting links between Mediterranean communities, and promoting the region's assets.

Launch of the first Bootcamp of the Tech4Farmers program at the Euromed University of Fez

From June 10 to 12, a bootcamp brought together AgriTech innovators supported by the French Development Agency (AFD) as part of the "Tamkin LiTanmia" project, in partnership with the Fez-Meknes Regional AgriTech Innovation and Entrepreneurship Hub. Participants included promising startups such as DeepLeaf, Jafife, ARWA Solutions, and AgrI-bOT, each bringing their expertise to transform agriculture sustainably.

The first day was dedicated to a welcome, introductions to Design Thinking, and discussions with experts. The second day explored project development and prototyping, including role-plays to understand user needs and funding opportunities. Finally, the third day focused on partnerships, with feedback and individual coaching sessions. This program provided startups with a platform to innovate, strengthen synergies, and contribute to the region's sustainable development.

Conference on the theme: “Power to X: Opportunities and Challenges” by Mr. Andreas Meurer

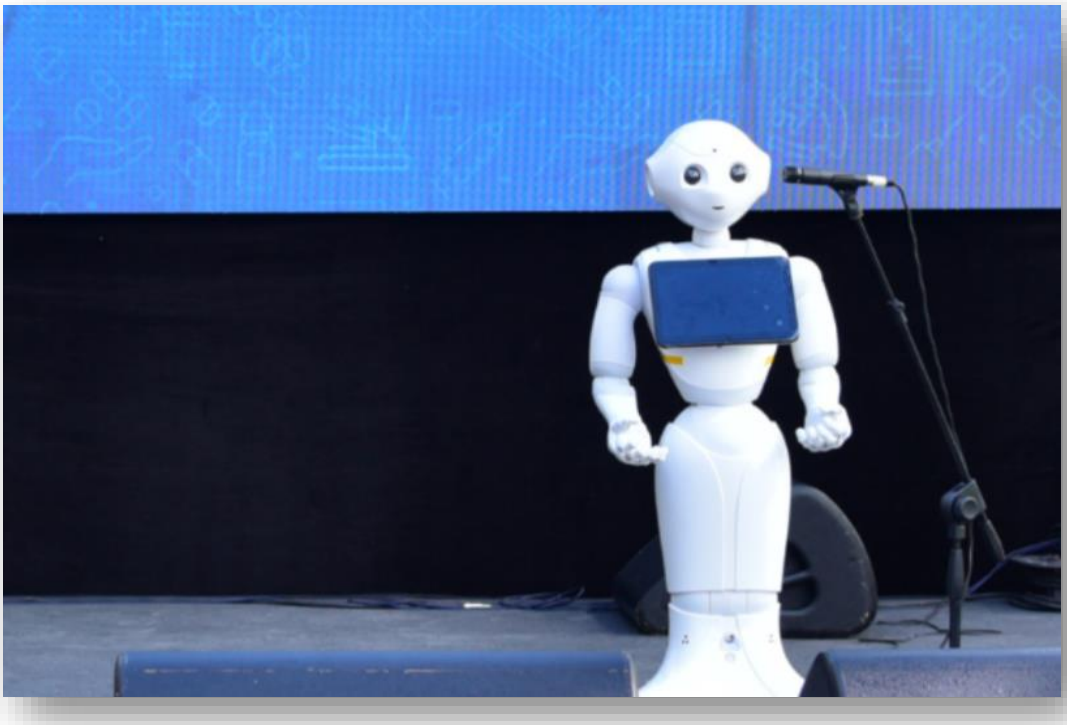

The Euromed University of Fez had the pleasure of organizing, on the occasion of World Environment Day, the conference "Power-to-X: Opportunities and Challenges", which was held on June 5, 2024 at the University's eco-campus. This conference is part of the University's commitment to environmental protection and the promotion of the eco-responsible approach through the adoption of civic and ecological actions on a daily basis within an ideal setting offered by the UEMF Eco-campus.

The conference was moderated by Dr. Andreas Meurer, a leading expert from the German Aerospace Center (DLR). The Power-to-X (P2X) theme covered a wide range of technologies for converting electricity into various forms of energy or chemical products. These innovations are essential for the integration of renewable energy and the reduction of carbon emissions in industrial sectors. Mr. Meurer shared his expertise on recent advances and challenges to maximize the potential of P2X technologies.

This event was aimed at a diverse audience, including professors, researchers, and students, all engaged in the field of energy and sustainable development. The conference provided a unique opportunity to exchange ideas, discuss future prospects, and build partnerships to promote sustainable energy technologies.

[GITEX SPECIAL] - Euromed University of Fez, a relentless commitment to innovation and excellence

Euromed University of Fez is committed to achieving academic excellence and dedicated to pedagogical and technological innovation, offering training programs in synergy with regional and international development needs.

UEMF also has strong research infrastructure, an Eco-campus with international standards and globally recognized degrees, while promoting multiculturalism and multilingualism.

The University stands out for its initiatives in artificial intelligence (AI) and technologies, as well as for a dynamic entrepreneurial system through its innovation and incubation centers that support startups and entrepreneurship, particularly in the Industry 4.0 and Agritech sectors.

The Fez Restructuring Days 2024: A Giant Step in the Field of Business Law in Difficulty

On May 16 and 17, 2024, the Euromed University of Fez and the Sorbonne Law School held the Fez Restructuring Days at the UEMF eco-campus. The event aimed to strengthen participants' expertise in corporate law in difficulty, addressing the amicable and judicial aspects of restructuring.

Under the direction of Professor François-Xavier Lucas and with the participation of distinguished speakers, the days covered essential themes such as the declaration and admission of claims, European and international bankruptcy law, security law, amicable restructuring, and safeguard or recovery plans. The discussions and exchanges allowed participants to better understand restructuring techniques and choose the most appropriate methods for each situation.

This event provided a platform to consolidate knowledge, exchange with experts, discover the latest advances in the field and develop innovative solutions for current restructuring challenges.

Academic and Scientific Cooperation Agreement between the University of Bangui and UEMF

As part of an academic and scientific collaboration between the Central African Republic and Morocco, the University of Bangui (UB) and the Euromed University of Fez (UEMF) signed a Cooperation Agreement on Thursday, May 16, 2024 at the Eco-campus.

This agreement aims to establish cultural, scientific and educational relations in areas of mutual interest. The main areas of this collaboration include the exchange of researchers, professors, administrative staff and students, the implementation of joint research projects, the sharing of information and teaching materials, the formation of research teams, participation in international projects, co-supervision of theses and dissertations, as well as the joint organization of scientific seminars and conferences.

Both universities are committed to finding the necessary means to achieve these objectives, in compliance with the legal provisions of their respective countries. This agreement marks the beginning of a promising cooperation, intended to be expanded through specific agreements detailing responsibilities and expected results.

Wahid BENKHADDA wins the Best Oral Communication Award at the ISMESH 2024 International Symposium

We are proud to announce that Mr. Wahid BENKHADDA, a fourth-year doctoral student, won the prestigious award for best oral presentation at the ISMESH 2024 International Symposium. This distinction was awarded to him for his outstanding presentation during the event, which was held on May 7 and 8 at the Ecole Supérieure de Technologie in Fez.

Mr. BENKHADDA's participation in this symposium was part of his thesis project in the field of materials and environmental chemistry, in which he raised the issue of olive margins; a widespread problem at the regional, national level but also throughout the Mediterranean basin region.

We extend our sincere congratulations to Mr. Wahid BENKHADDA for this well-deserved recognition, which underlines the commitment of UEMF and its community to academic excellence and innovative research.

Doctoral thesis defense in Artificial Intelligence by Ms. Yasmine GHAZLANE

This doctoral thesis explores anti-drone technology by addressing the gaps in current defense mechanisms against drone proliferation. It proposes a novel anti-drone architecture based on artificial intelligence, blockchain, multi-agent systems, and expert systems. An AI-based electromagnetic neutralization model is developed to counter harmful drones in real time. Real-time detection and identification models, using advanced algorithms and deep learning techniques, are created to quickly identify aerial targets. The thesis also focuses on distinguishing between drones and other aerial targets, such as birds, by developing a "friend or foe" classification model. It also studies the impact of model depth on their classification performance. The "friend or foe" model is integrated into the overall system with a real-time detection module to improve the effectiveness, accuracy, adaptability, and robustness of the anti-drone system in dynamic and complex environments.

Doctoral Thesis Defense in "Additive Manufacturing and Materials Science" by Mr. Patrick MUNYENSANGA

This thesis explores the widespread use of metallic implants in medical and orthopedic surgery, which is faced with limitations such as implant degradation and long-term bonding incompatibilities. To address these limitations, the thesis proposes to improve the interfacial surface of implants, promote faster bone regeneration and better bioactivity, as well as improve biocorrosion resistance. A lightweight and porous metallic implant coated with bioactive glass was developed to stimulate osteogenic cell proliferation, promote bone ingrowth, and overcome structural bonding incompatibilities. The bioactive glass demonstrates the ability to impregnate antibacterial and therapeutic agents essential for osseointegration with the host organism. The results confirmed the formation of a bone-like layer on the implant surface, as well as improved biocorrosion resistance. This surface modification approach shows significant potential for improving the durability of orthopedic implants.

THE Awards Arab Worlds 2024: Finalist for the prize: “Research project of the Year STEM”

Day of Hierarchical Classification of Secondary Proteins

The skills-based approach of the Biotechnology Engineering program at EIBB was brilliantly highlighted during the validation of student projects on Wednesday, April 24. Among the key themes, the hierarchical classification of protein secondary structures occupied a central place. By exploring 3D structures from international databases, the students mobilized key skills such as analysis, synthesis, problem solving, and scientific communication. This work allowed them to understand and classify protein motifs, thus strengthening their mastery of biological mechanisms and biotechnological issues. A fine demonstration of their ability to transform theoretical knowledge into concrete skills, in the service of innovation.

Prof. Abdelkrim EL Kadib Honored with Selective Admission to the Hassan II Academy

Euromed University of Fez congratulates Prof. Abdelkrim EL Kadib who was recently admitted as a corresponding member of the Hassan II Academy of Sciences and Technology.

Admission to this distinguished Academy is subject to very strict criteria, limiting access to a small number of Moroccan and foreign scientists. This distinction therefore stems from the exceptional research work accomplished by Professor El Kadib.

Participation of Professor Mostapha Bousmina at the International Conference in Rome: training and social cohesion

On March 13, 2024, an event entitled "Higher Education and Social Cohesion for Managing International Demographic Dynamics" was organized in Rome, at the Sistine Chapel, by Multiversity, Pegaso Digital University, and MEDEA. The event brought together influential figures, including Italian President Sergio Mattarella, Maltese President Marie-Louise Coleiro-Preca, and European Commission Vice-President DubravkaŜuica.

Professor Mostapha Bousmina, President of the Euromed University of Fez (UEMF), participated to highlight the importance of cooperation between Europe and Africa in education and vocational training. Luciano Violante, President of Multiversity, emphasized the role of digital universities in promoting skills, social inclusion, and sustainability. Emphasis was placed on the importance of digital training in preparing young African generations to contribute to socio-economic development.

This commitment reflects UEMF's priorities, focused on inclusion, innovation and digital technology, to strengthen training and research.

UEMF and AFD launch the “Tech4Farmers” program

Launch of the Tech4Farmers call for applications, a support program specially designed for project leaders in the innovative agricultural technologies (AgriTech) sector.

During a launch conference that brought together key players in the agricultural sector of the Fez-Meknes region this Thursday, March 7, at the Euromed University of Fez (UEMF), the University and the French Development Agency (AFD) officially launched the Tech4Farmers program, whose objective is to support the development and marketing of AgriTech solutions that meet the needs of national agriculture and that of the Fez-Meknes region, in particular.

The Tech4Farmers program is part of an ambitious project to build a Regional Hub for Innovation and Entrepreneurship in Agriculture and Agri-Food in the Fez-Meknes region. This project is led by UEMF and AFD in partnership with the Ministry of Agriculture, Maritime Fisheries, Rural Development, and Water and Forests, the Digital Agriculture Hub, and a consortium of partners including government agencies, sectoral federations, universities, and research centers.

International expert in pharmacotoxicology, Dr. Mohammed Bourdi, guest of the UEMF

Organized by the Euromed University of Fez (UEMF) and its component the School of Biomedical Engineering (EIB), a conference under the theme "Preclinical in-vivo and in-vitro studies in drug development" was led by Dr. Mohammed BOURDI, today February 21 at the Eco-campus.

Dr. Mohammed BOURDI is a leading expert pharmacotoxicologist and professor of toxicology at the National Institutes of Health (NIH) Maryland/FAES and Mount St. Mary's University Maryland.

Students and faculty benefited from his extensive knowledge in the field of in vivo and in vitro preclinical studies in drug development, providing valuable insight into crucial aspects of drug research prior to market introduction.

This meeting provided an opportunity to exchange ideas, discuss current advances in the field, and strengthen ties between academic institutions and renowned practitioners. The event enriched the educational framework by providing participants with an in-depth insight into the drug development process, thereby strengthening their understanding of the challenges related to pharmaceutical research.

https://ueuromed.org/actualites/annonces-diverses/international-expert-in-pharmaco-toxicology-dr-mohammed-bourdi-invite

Conference: Let's talk organic chemistry with Prof. Jacques Lebreton and Dr. Jean-François Brière

As part of its conference cycle, the Euromed University of Fez and its component the BiomedTech Engineering School (EIB) are organizing, today, February 20, two successive conferences led by Pr. Jacques Lebreton, Professor at the University of Nantes and Dr. Jean-François Brière, CNRS Research Director at the University of Rouen Normandy.

A first conference on the theme of "Synthesis of new non-aromatic nitrogen heterocycles of the amidrazone type" by Mr. Lebreton and a second on the theme of "Organocatalytic synthesis of chiral heterocycles" by Mr. Brière offered interesting perspectives for the creation of compounds with varied properties and useful in various fields, such as pharmacy and medicinal chemistry..

Third steering committee meeting of the Regional Agritech Innovation and Entrepreneurship Hub

On February 21, 2024, the Euromed University of Fez hosted the third steering committee of the "Regional Hub for Innovation and Entrepreneurship in Agritech" project, as part of the "Tamkin Li Tanmia" program, funded by the French Development Agency (AFD). This event brought together various partners, including the AFD, the Digital Agriculture Hub, the IAV Institute, and other regional stakeholders, to take stock of the progress of the Agritech project.

The meeting provided an opportunity to share perspectives on progress made and discuss next steps, followed by the signing of a partnership agreement. The support program for innovative projects was presented, and an inaugural conference of the call for projects is planned for March 7, 2024, at the UEMF, focusing on agricultural issues in the Fez-Meknes region.

This event strengthened collaboration and innovation in the AgriTech sector, contributing to the creation of a strong ecosystem for agricultural entrepreneurship in Morocco.

UEMF students make the voices of young Africans and Euro-Mediterraneans heard before the Parliamentary Assembly of the Union for the Mediterranean

On February 14, 2024, students from the Euromed University of Fez organized a summit under the theme "Euro-Mediterranean and Transatlantic Openness" with more than 200 participants from 30 countries. This summit addressed topics such as energy ethics, sustainable development, transportation, climate change, and African challenges.

The summit culminated in the Call for Investment in the Future, read out on February 16 at the 8th Summit of Speakers of Parliaments of the Union for the Mediterranean. This call underscores the need to strengthen cooperation between Europe and Africa through concrete projects, allocate pledged funds for climate resilience, and support initiatives such as the Nigeria-Morocco gas pipeline.

The students also welcomed Morocco's initiatives for economic integration, infrastructure, and education in Africa, while calling for a "Marshall Plan" for education and research in Africa as an investment in the future to combat poverty, terrorism, and illegal immigration.

UEMF hosts international science dissemination project on antimicrobial resistance and the fight against superbugs

The Micromonde project, developed in 17 countries, aims to bring scientific culture and biomedical research closer to students while promoting a vocation for research. The first edition concluded on the campus of the Euromed University of Fez (UEMF), with the participation of more than 100 students in pharmacy, biomedical engineering, and biotechnology. Supervised by professors from UEMF and the University of Valencia, they conducted experiments to discover new bacterial strains that produce antibiotics.

The project uses a project-based learning (PBL) method to encourage critical thinking and problem-solving. This program is part of international initiatives, such as the Small World Initiative, launched at Yale in 2012 to address the need for new antibiotics in the face of bacterial resistance. The project is supported by various consortia, with international funding and cooperation, and is being rolled out for the first time in Morocco under the UEMF-MicroMondeMaroc initiative.

International Conference: “Techniques and Environment”

On January 25, 2024, the ICESCO-Euromed Chair in “Arts, Societies and Civilizations” organized an international conference in collaboration with CETCOPRA of the University of Paris 1 Panthéon-Sorbonne on the theme of “Technology and Environment”. The event brought together Moroccan and international figures, including Dr. Mohamed Zinelabidine of ICESCO, as well as a panel of researchers from the University of Paris 1.

The conference explored multidimensional approaches to responding to social and humanitarian crises, focusing on the interactions between technology, society, ethics, and the environment. Two discussion sessions were organized: one on the use of technology in emergency situations, and the other on the social issues related to technology.

This meeting provided a platform for enriching debates between speakers, teacher-researchers and students from the Euromed University of Fez.

Euromed Innovation Center: UEMF inaugurates its new innovation center (EIC)

The Euromed University of Fez has announced the creation of the Euromed Innovation Center (EIC), a support structure dedicated to the creators of innovative projects. The selection committee evaluates projects based on their scientific and innovative nature, as well as the technical, entrepreneurial, and managerial skills of the project leaders.

The EIC aims to provide personalized support throughout the business creation process, including inspiring events, diverse training, and privileged access to university resources. This center positions itself as a catalyst for innovation, both regionally and nationally, contributing to the importance of universities in the technological and entrepreneurial landscape.

Labeled by "Tamwilcom" among the four SAP structures at the national level in the "Ideation" segment, the EIC allows project leaders to access programs such as "Tech Start" and "Tech Boost", thus reinforcing the center's commitment to transforming innovative ideas into successful startups.

UEMF is helping to shape the digital and sustainable future of the Fez-Meknes region

The Euromed Institute of Legal and Political Sciences (IESJP) participated in the kick-off meeting of the Smart Sustainable City project in Ifrane on January 12, 2024, thus showing its support for the inclusive digital transition of the Fez-Meknes region.

This is a Belgian-Moroccan project carried out in partnership with the Belgian universities UC Louvain and UNamur, as well as the consortium of four universities in the Fez-Meknes region, including the Euromed University of Fez.

This Belgian-Moroccan project embodies the university's vision of a smart and sustainable urban future. It aims to achieve two primary objectives: the region's inclusive digital transition and the emergence of new forms of governance and citizen participation.

National Scientific Conference: Politics and Digital: Collision or Collusion?

On December 19, the Euromed Institute of Legal and Political Sciences (IESJP) organized a scientific conference at the Euromed University of Fez on the theme "Politics and Digital: Collision or Collusion?" The event brought together experts in law, politics, education, and sociology to discuss the impact of digital technology on the relationship between rulers and the governed, and the transformation of the state in the digital age.

The conference was structured around four sessions. The first focused on communication issues, particularly journalism and political marketing. The second addressed democratic renewal and youth political engagement through digital technology. The third session explored legal issues in the era of GAFAM and data protection. Finally, the fourth session addressed public governance in the digital age and its impact on user and investor trust, as well as on entrepreneurship.

This conference enabled constructive exchanges between experts, teacher-researchers and students, around the relationship between politics and digitalization.

International Conference: Prof. Hasna SLAMTI represents UEMF at the Côte d'Azur University in Nice

In its new edition, under the trajectory of the meetings of African Studies in France, the University of Nice-Côte d'Azur organized on its Jean d'Angely campus, from 1er on July 4, an international conference under the themeeme: A race for ports in Africa? Actors, territories and strategies.

During this 8th edition of the African Studies Meetings in France, Professor Slamti gave a presentation entitled: "Territorial issues facing the challenges of connectivity in Africa: the case of the port of Tangier Med" during her participation in panel 37 entitled "A race for ports in Africa? Actors, territories and strategies".

This communication also aimed to shed light on the logistical and geopolitical importance of the Tangier Med port. It also attempted to demonstrate that this port is not only a global logistics and maritime hub, but also a key driver of economic and territorial development.

Signing of the financing agreement for the "Factory Pilot School 4.0" project co-financed by the KFW subsidiary, the Investment Facility for Employment (IFE)

On July 2, 2024, the EuroMed University of Fez (UEMF) and the Investment Facility for Employment (IFE) signed a financing agreement for the Pilot School Factory 4.0. This project, co-financed by the IFE (37.58 million DH, or 3.51 M€) and l'UEMF (own contribution of 30%), mobilizes a total investment of 53.2 million DH (4.97 M€) to build a training centeredie hasIndustry 4.0.

This center, which is expected to open in September 2026, will train 585 graduates and strengthen the skills of more than 1,100 professionals in its first three years of operation, creating 541 new jobs. It is part of the national digital transformation strategy and aims to support Morocco's industrial growth, particularly in the Fez-Meknes region, by offering specialized training for young graduates and professionals.

This signature marks the beginning of several similar projects financed by the IFE, in partnership with Moroccan institutional and industrial players, as part of the development of training infrastructures for the industry of tomorrow.

PNDL Pilot Cohort at the Euromed University of Fez: Towards a New Era of Higher Education Governance

Launch of the pilot cohort of the National Leadership Development Program (PNDL) at the Euromed University of Fez, a key player in the implementation of the Erasmus+ CBHE project "Moroccan Higher Education Leadership – MORHEL. This is an ambitious project, coordinated by AUI, UEMF and UMI, aimed at strengthening the capacities of leaders of Moroccan higher education institutions (IES) in governance, strategic planning and management.

Following the opening remarks by Prof. Salim Bounou, Vice-President in charge of Research-Innovation and Partnerships, a series of training sessions led by professors from UM6P and IAV provided participants with a detailed analysis of the current landscape of higher education in Morocco, aimed at equipping future leaders with an in-depth knowledge of the challenges and opportunities present.

The cohort, composed of professors, administrative staff, and key figures in higher education, aims to develop leadership skills to effectively contribute to the development of higher education in Morocco. The initiative aims to train leaders capable of implementing significant improvements in their institutions, particularly in governance, strategic planning, and management.

Cooperation and Strategic Alliance between UEMF and EMUNI

As part of their commitment to the objectives of the Euro-Mediterranean Partnership, the Euromed University of Fez (UEMF) and the Euro-Mediterranean University (EMUNI) agree to enter into a strategic alliance to promote the flow of knowledge between the shores of the Mediterranean and to cooperate within the framework of this agreement. They will encourage long-term mutual cooperation in the fields of higher education, research, and innovation in order to consolidate the Barcelona Process, which, in a broader sense, is also integrated into the Union for the Mediterranean.

The Parties will promote the dissemination of knowledge through joint educational, cultural, and scientific activities. To this end, they will use instruments such as joint applications for and implementation of international scientific and technical projects, the development and implementation of joint or dual study programs, and the exchange of students and academic and administrative staff. Other initiatives will include the exchange of expert and research missions, the development of modules in Euro-Mediterranean studies, and the launch of strategic courses. They will also engage in science diplomacy, the expansion of joint academic offerings, the organization of scientific events, and the joint use of educational and scientific resources, as well as any other cooperative activities agreed upon by the Parties.

Prestigious Double Diploma from George Washington University and EIDIA of UEMF

Unlock your potential and shape the future of cybersecurity with our exclusive Master of ICT Security and AI.

This collaborative program, offered jointly by George Washington University and the EIDIA of UEMF, provides a unique opportunity to earn a double diploma from two prestigious institutions.

Our cutting-edge curriculum combines the latest advancements in quantum computing, artificial intelligence, and cybersecurity, equipping you with the skills and knowledge needed to tackle the complex challenges of tomorrow's digital landscape. With access to world-class faculty, state-of-the-art facilities, and a global network of professionals, you'll be at the forefront of innovation and intelligence in ICT security.

Join us and become a leader in securing the digital frontier. Apply now to embark on a transformative journey that will elevate your career and make a lasting impact on the world of cybersecurity.

Third Entrepreneurship Training Workshop of the Link Up Africa Program at UEMF

On July 17 and 18, 2024, the Euromed Innovation Center (EIC), an innovation center at the Euromed University of Fez, hosted its third entrepreneurship training workshop as part of the Link Up Africa pre-incubation program. Funded by the European Union and implemented by AMCI and the Belgian agency Enabel, this event aims to support project leaders in creating their businesses, whether in Morocco or in their native country for students and graduates from sub-Saharan African countries.

At the heart of this training, participants explored value creation and structuring their business model. They also honed their pitching skills, essential for capturing investors' attention. The intensive sessions, led by EIC experts and mentors, enabled budding entrepreneurs to refine their value proposition, develop their presentation skills, and build a solid business model.

This workshop offered a unique opportunity for students and winners to prepare their projects for pitch sessions in front of a panel of experts. The best projects will be selected to join the pre-incubation program, an invaluable opportunity for young entrepreneurs to turn their ideas into reality.

Stanford Ranking 2024 of the World's Top 2% Scientists

Four researchers from the Euromed University of Fez are ranked among the top 2% of scientists in the world according to the international ranking of the prestigious American university Stanford.

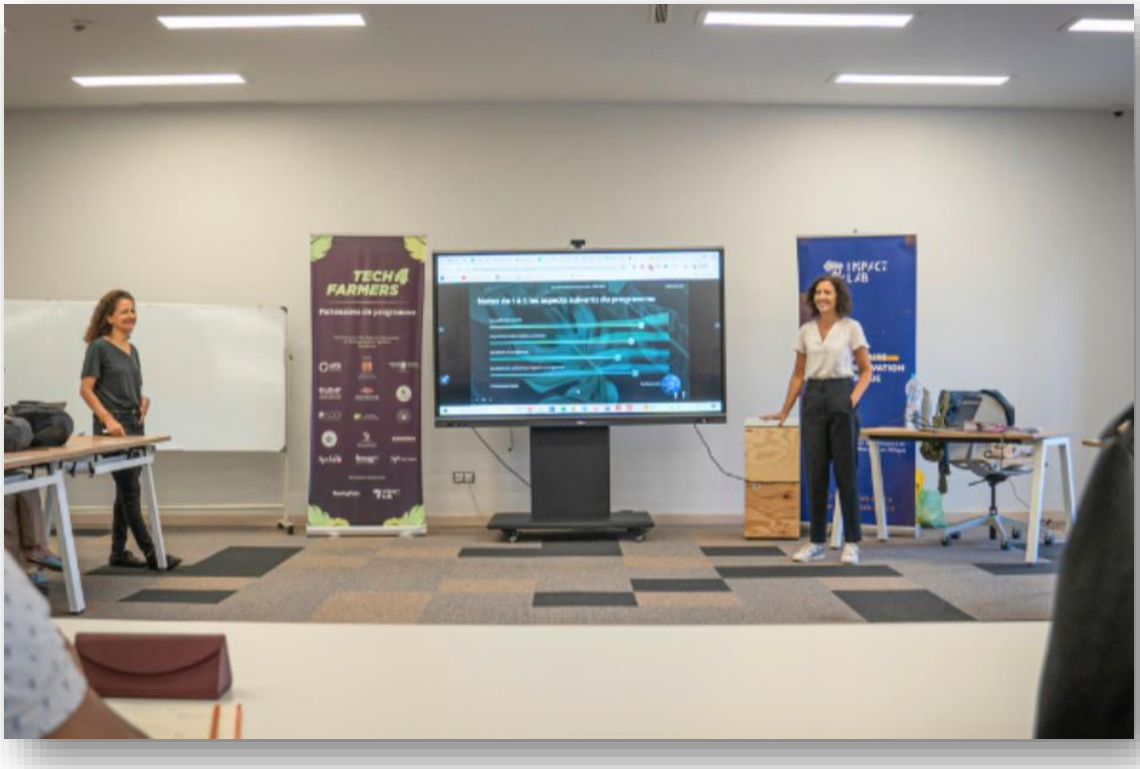

This international ranking is based on the impact of research carried out by researchers and recognized by the international scientific community through citations in the global SCOPUS database.

It is worth noting that the prestigious American University Stanford annually establishes the ranking of the most influential researchers in the world among more than 8 million researchers. This year, four researchers from the Euromed University of Fez are ranked among the top 2% of researchers in the world. They are Prof. Mostapha Bousmina, President of the UEMF, Prof. Belkheir Hammouti, Professor and Researcher at the UEMF, Prof. Abdelkrim El Kadib, Professor and Researcher at the UEMF, and Prof. Chakib Nejjari, Vice President in charge of the Health Division.

Congratulations to the four researchers and to other researchers from various Moroccan universities who are promoting national research and bringing their added value to global scientific research.

Resounding Success of the Second Tech4Farmers Bootcamp at UEMF

From September 24th to 26th, the Euromed University of Fez hosted the second Bootcamp of the Tech4Farmers incubation program for Moroccan agritech startups. Organized in partnership with the AFD and PRIE, this event aimed to sustainably transform the agricultural sector through innovative solutions. Over three days, entrepreneurs participated in feedback sessions, value creation workshops, masterclasses on social and environmental impact, and benefited from expertise to structure their business plans. This Bootcamp strengthened their role as stakeholders in agricultural innovation and their commitment to an economic and sustainable future for Morocco.

UEMF receives HE Mr. Robert Dölger, Ambassador of the Federal Republic of Germany in Rabat

On October 1st, the Euromed University of Fez (UEMF) hosted HE Robert Dölger, German Ambassador to Morocco, to strengthen academic and scientific relations between the two countries. Discussions focused on promoting academic mobility, allowing German students to discover the Arabic language in Fez and UEMF students to study in Germany. The meeting also highlighted UEMF's commitment to research in Artificial Intelligence, with the training of more than 800 students, and the addition of German as a foreign language taught, thus strengthening the university's international and multilingual outlook.

UEMF at the World Power-to-X Summit: Green Hydrogen and Innovation

Professors Tijani Bounahmidi and Othmane Benmoussa represented the Euromed University of Fez (UEMF) at the World Power-to-X Summit in Marrakech. The UEMF-HACE Side Event, held on October 9, brought together experts, decision-makers, and industry leaders to discuss green hydrogen technologies, highlighting innovations and value chain optimization in this booming sector.

Participants, including members of the HVM (Hydrogen Green Marine) Consortium, discussed global trends in green hydrogen and its benefits, sharing their expertise on sustainable solutions for carbon-free energy production. The presence of UEMF professors allowed them to showcase their expertise in sustainable development and establish promising partnerships during the B2B meetings. These collaborations aim to develop technological solutions to make green hydrogen accessible and efficient.

Conference by the President, Prof. Mostapha Bousmina: A Human Epic

On October 9, Euromed University of Fez hosted an inspiring lecture, “A Human Epic: From Homo-habilis to Homo-numericus,” led by its President, Prof. Mostapha Bousmina. He captivated the audience by tracing the key stages of human evolution to the digital age, highlighting human adaptability in the face of technological and environmental challenges. The widely acclaimed lecture reflects UEMF’s commitment to innovation and dialogue on societal transformations, affirming its role as an academic leader.

2025: Euromed University of Fez intensifies its commitment to the SDGs

Courtesy Visit to the UEMF by the New Ambassador of Spain in Rabat, HE Enrique Ojeda Vila

The new Spanish Ambassador to Morocco, HE Enrique Ojeda Vila, paid a courtesy visit to the Euromed University of Fez, highlighting the strengthening of bilateral relations between the two countries. During his meeting with Professor Mostapha Bousmina, President of the University, they discussed the development of academic and scientific partnerships, particularly through student and faculty exchanges, as well as the co-organization of conferences and joint research projects.

The Ambassador also visited the University's research facilities, such as the 3D printing platform, the artificial intelligence laboratory, the civil engineering laboratory, and the NMR laboratory, illustrating the University's commitment to scientific and technological innovation.

Launch of the Second Edition of the Fez Smart Factory Competition

The Euromed University of Fez (UEMF) is launching the second edition of the Fez Smart Factory (FSF) competition, supported by the United Nations Industrial Development Organization (UNIDO).

Who can participate?

The competitions are open to the categories below, apply if you are:

A researcher/inventor who has designed an innovative product with a manufacturing process tested on a laboratory scale (TRL 3) and you want support to validate it on a pilot scale (TRL 5);

A startup carrying out a smart factory project for an innovative product tested on a pilot scale (TRL 5) and you want support to validate it on a demonstration scale (TRL 8);

A startup or industrialist carrying out a smart factory project tested on a demonstration scale and you want to be supported to carry it out on an industrial scale in Morocco;

A Research and Development entity wishing to provide services to researchers/inventors, startups and industrialists to optimize the value chains of their smart factory projects;

An engineering company seeking to provide services to researchers/inventors, startups and manufacturers to develop Industry 4.0 use case solutions

Epistemological, Historical and Ethical Perspectives on AI: Lecture by Dr. Llored

On Monday, November 13, 2024, the Euromed University of Fez hosted a conference led by Dr. Jean-Pierre Noël LLORED. Entitled "Epistemological, Historical, and Ethical Perspectives of AI," this presentation was part of the "RDV de la Philosophie" (Philosophy Meetings).

Before a captivated audience, Dr. LLORED explored the epistemological foundations of artificial intelligence, tracing its historical evolution and addressing the major ethical issues it raises. The event was marked by rich exchanges between the speaker and the participants, allowing for a better understanding of the challenges posed by this technology in our current society.

The "RDV de la Philosophie" continue to provide a space for reflection and dialogue open to all, around major contemporary issues.

Digital marketing and data protection: what challenges and opportunities do businesses face under the new law?

The digital revolution and the explosion of data have prompted Morocco, like other nations, to strengthen its legal framework for personal data protection. The recent update of Law No. 09-08, which governs the processing of personal data, represents a decisive turning point for Moroccan businesses, particularly in the field of digital marketing.

Opinion piece by Professor Othmane Benmoussa of the Euromed Polytechnic School published on Medias24

The three inhibitors of innovation: how to identify them and mitigate their impacts

Reinvention remains a response to an unexpected existential threat. This form of reactive reinvention reveals dangerous pitfalls that can derail or even bankrupt an organization. One need only recall how the iPhone's built-in camera dealt Kodak the final blow after the company had struggled for years.

Some organizations certainly have more difficulty than others in reinventing themselves, not because they neglect technological or market changes, but because they find themselves caught in three traps anchored in their identity, their organizational architecture and the way their members collaborate.

In this column, we will explain how these pitfalls can limit a company's ability to find new avenues for growth and how to avoid them by establishing the right communication foundations to foster a coherent identity, implementing new organizational structures, and paying close attention to interpersonal dynamics at both the team and individual levels.

https://ueuromed.org/actualites/articles/tribune-du-pr-othmane-benmoussa-de-leuromed-polytechnic-school-parue-sur-2

Partnership concluded between UEMF and Tech Education Rights and Technologies

On November 27, 2024, the Euromed University of Fez (UEMF) and the Spanish group TECH signed a strategic partnership to jointly develop virtual, multilingual, and dual-degree educational programs. This partnership aims to promote new teaching models and enrich UEMF's academic offerings, particularly online, from undergraduate to doctoral levels. TECH will make its educational and technological resources available in French and English and will contribute to the continuing education of students and professionals. This project is part of UEMF's commitment to providing quality distance learning, in collaboration with renowned international partners.

460 graduates from the Euromed University of Fez serving the development of Morocco and the Euro-Mediterranean and African region

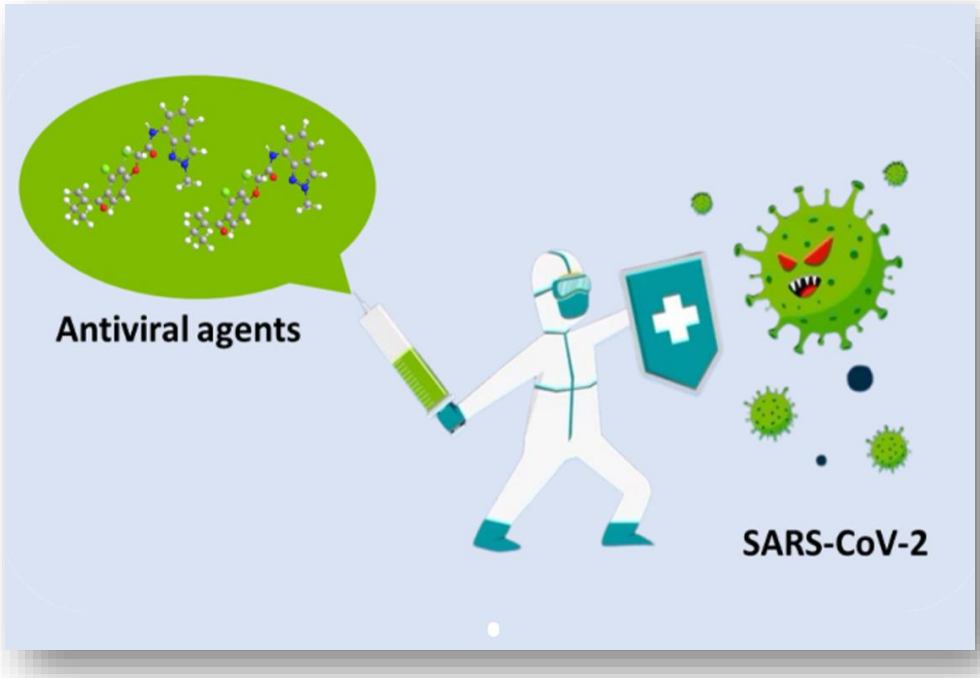

The Euromed University of Fez (UEMF) held its graduation ceremony on November 29, 2024, in honor of the 2023-2024 class, in the presence of more than 2,000 guests from the academic, political, and socio-economic worlds. The event marked a significant step forward for the university with the graduation of 460 students, including 107 African engineers specializing in artificial intelligence, trained exclusively on the continent.

Graduates come from a variety of fields, including mechanical engineering, electrical engineering, information technology, artificial intelligence, architecture, design, political and legal sciences, business, and humanities and social sciences. The diversity of its programs and international partnerships demonstrate UEMF's academic standing.

The ceremony featured speeches by prestigious figures such as Professor Mostapha Bousmina, Professor Azzeddine El Midaoui, Driss Jettou, Nasser Kamel, and Abdelhak Azzouzi, as well as several ministers, ambassadors, business leaders, and representatives of international organizations. The event also welcomed 70 young people from 21 Euro-Mediterranean nationalities, present as part of a cooperation program with the Union for the Mediterranean, the Anna Lindh Foundation, and the German government.

Doctoral thesis defense in Organic and medicinal chemistry by Mr. Abdelali CHIHAB

COVID-19, caused by SARS-CoV-2, has caused an unprecedented global health crisis, highlighting the urgency of developing new antiviral therapies. Among the promising therapeutic targets, the main viral protease (Mpro) plays a crucial role in the maturation of viral polyproteins required for virus replication. Inhibiting this enzyme represents a key strategy to block the viral life cycle.

This thesis focuses on the development of new bioactive molecules targeting the main enzymes of SARS-CoV-2, notably Mpro and PLpro, in order to contribute to the fight against COVID-19. This work combines organic chemistry, molecular modeling, and ADMET evaluation approaches to design and synthesize ethacrynic acid-based derivatives of indole as well as other molecules derived from modified amino acids.

The studied compounds were characterized using spectroscopic techniques (NMR, IR, UV, HRMS) and tested for their interaction with target enzymes. The results show promising properties, including favorable binding energies and good reactivity with key residues, suggesting inhibitory potential. In vivo validation was also considered to confirm the efficacy and safety of the compounds.

This research paves the way for the design of new antivirals that can be developed to treat viral infections, while enriching knowledge on medicinal chemistry applied to emerging viruses.

UEMF at the heart of discussions on renewable energies at EnerGaïa

The Euromed University of Fez participated, as part of the Moroccan delegation led by the Green H2 Cluster, in the renewable energy forum.EnerGaïafrom December 10 to 12, 2024.

Several contacts have been made, in particular with the Vice-Presidency for the Economy of the Occitanie Region for partnerships in terms of training with universities and institutes in the Region, incubation and cultural and sporting activities with the ambition of initiating lines of research in these fields alongside the creation of courses in sports and team management.

Green hydrogen and the entire inherent value chain were also at the center of discussions with France Hydrogène, as were the theme of water and the underlying technologies, in addition to the Agritech or precision agriculture sector.

The participation of the Euromed University of Fez in the Technocampus Hydrogène Occitanie, which aims to be the largest center in France for research, testing, technological innovation and teaching in the field of green mobility, was also discussed.

International conference: The Architectural and Landscape Identity Confronting Natural Risks in the Euro-Mediterranean Region

The Euromed School of Architecture, Design and Urban Planning (EMADU) of the Euromed University of Fez organized on December 12, 2024 an international symposium on architectural and landscape identity in the face of natural risks in the Euro-Mediterranean region. The event brought together experts and decision-makers to discuss the challenges related to increased natural risks such as earthquakes, floods, fires and landslides in a context of climate change and rapid urbanization. The discussions highlighted the vulnerability of heritage buildings such as those affected by the Al Haouz earthquake in 2023. Participants addressed several areas including the adaptation of construction practices to risks, the use of local materials and traditional techniques, the role of infrastructure and sustainable urban planning in risk management. The symposium highlighted the importance of reconciling population safety and the preservation of architectural heritage in Euro-Mediterranean territories.

2nd edition of the Students' Innov'UP 2024 Hackathon: Innovating in the face of water stress

The 2024 Students' Innov'Up Innovation Hackathon, organized by the European Union in Morocco, the EIB, and the Euromed University of Fez, took place on December 16 and 17 under the theme "Transforming Water Stress into a Driver of Resilience." Following a three-week pre-hackathon phase, 11 finalist teams presented their innovative projects to address water-related challenges.

Three teams were awarded prizes:

- Hydrovision (1st prize) for the “Aqua” application`Noah`",
- Pure Aqua White (2nd prize) for a wastewater reuse system,
- Créatech (3rd prize) for a solar device for producing drinking water.

The “coup de cœur” prize was awarded to Raha for HydroPoly, an educational game on water management.

Euromed University of Fez shines in the AD Scientific Index ranking: A recognition of scientific excellence

New and remarkable recognition for the Euromed University of Fez. A remarkable distinction in the AD Scientific Index ranking, coming 3rd among the 47 Moroccan universities evaluated. The first two positions go to historical institutions, the Mohammed V University of Rabat and the Hassan II University of Casablanca, closely followed by the UEMF, a young institution that has quickly positioned itself as a key player in the fields of research and innovation, with 8 scientists and research professors in the top 10% for Rabat, 5 for Casablanca and 3 for the UEMF.

This ranking is based on rigorous criteria, including the Total H-Index, the Last 6 Years H-Index, the Total i10 Index, the Last 6 Years i10 Index, as well as the Total Number of Citations and the Last 6 Years Citations.

With this distinction, the UEMF will continue to strengthen its influence through innovation, knowledge and science.

Euromed University of Fez joins the prestigious AACSB network

Euromed University of Fez (UEMF) is now a member of the Association to Advance Collegiate Schools of Business (AACSB), a leading international organization dedicated to excellence in management education. This membership places UEMF alongside the world's most influential institutions in this field, strengthening its international reach.

Recognized for its demanding standards and its major role in improving the quality of management education, the AACSB brings together a vast network of universities and schools that are pioneers in innovation and research. UEMF's integration into this network demonstrates its commitment to providing training that meets the highest standards of excellence.

This milestone once again underlines UEMF's position as a key player in the international academic landscape.

Moroccan Parliament: Professor Mostapha Bousmina presents Morocco's strategy for energy transition and sustainable development

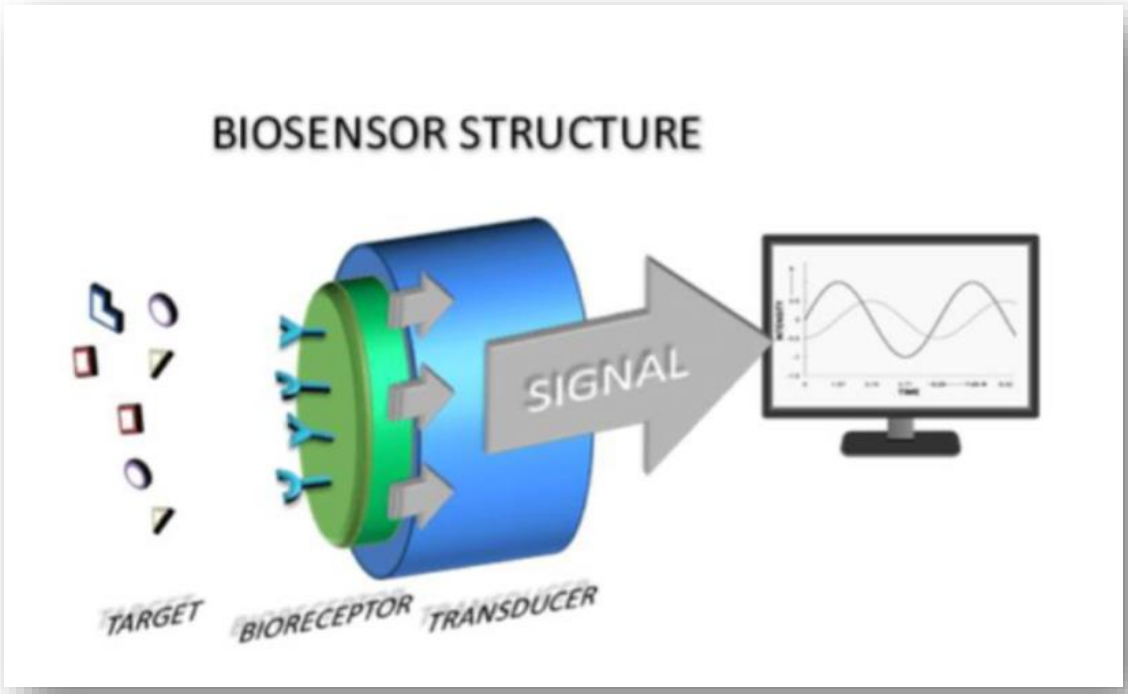

The Moroccan Parliament, in collaboration with the Fondation des Rencontres du Futur, the Chamber of Deputies and the Senate of the Republic of Chile, hosted the "Congress of the Future" on December 17 and 18, 2024 at the Parliament headquarters in Rabat.

This event brought together several Moroccan and Chilean ministers and parliamentarians. It provided an opportunity to discuss future issues. On this occasion, the President of the Euromed University of Fez, Professor Mostapha Bousmina, presented Morocco's strategy for energy transition and sustainable development, highlighting the country's commitment to these crucial areas.

He also presented the Moroccan renewable energy plan, the production of green hydrogen and its applications, including ammonia production, seawater desalination, battery and electric vehicle production, as well as the Nigeria-Morocco gas pipeline project. The focus was on the achievements, challenges, and areas of concern, while emphasizing technological and research-innovation challenges in these different areas.

Doctoral Thesis Defense in Materials Science and Modeling by Ms. Nidal EL BIYARI

"Design, Modeling and Realization of Optofluidic Sensors Based on Surface Plasmon Resonance for Precision Sensing."

This thesis focuses on the development of high-performance optofluidic biosensors based on the surface plasmon resonance (SPR) phenomenon. A novel golden ratio approach was proposed to optimize the geometric properties of a gold-silver bimetallic configuration, achieving rapid optimization with enhanced sensitivity and resolution.

Additionally, a dual-mode plasmonic configuration combining guided modes in a dielectric waveguide and plasmonic modes on a gold film was studied. This configuration generates a detection mode (PIT) with high performance and a reference mode (TM1) to improve measurement reliability by minimizing false positives.

Finally, a new approach for microfluidic system manufacturing using stereolithography additive manufacturing was developed, integrating real-time temperature control. This method improved the mechanical and structural properties of microfluidic chips, making them highly suitable for biosensing applications, as confirmed by microscopic analyzes and mechanical tests.

New Academic Collaboration between the Euromed University of Fez and the University of Surrey

Euromed University of Fez (UEMF) is proud to announce its partnership with the University of Surrey, a prestigious institution in the United Kingdom, recognized for its academic excellence and innovative programs.

This strategic partnership opens up new opportunities for UEMF students, particularly in the field of Civil Engineering. Thanks to this agreement, students who have completed their Civil Engineering studies at UEMF can now access world-renowned programs, such as the MSc and BEng in Civil Engineering at the University of Surrey.

With this partnership, UEMF reaffirms its commitment to offering its students academic and professional opportunities of international stature. This collaboration not only strengthens student mobility, but also promotes excellence and innovation in training and research.

Launch of Fez Smart Factory activities at UEMF

On January 16, 2025, the Euromed University of Fez (UEMF) launched the Fez Smart Factory, the first Moroccan ecosystem dedicated to Industry 4.0. This ambitious project, supported by a broad public-private and international partnership, aims to transform Moroccan industry by integrating advanced technologies such as artificial intelligence, robotics, and 3D printing.

Located on 6.6 hectares within the UEMF eco-campus, the platform includes an incubator, an R&D center, a business center, and a Pilot School Factory 4.0, currently under construction, which will offer nearly one million hours of training. This project, funded in particular by FONZID and the MCC, embodies a new industrial dynamic based on innovation, training, cooperation, and sustainability.

Visit of a delegation from the University of Quebec in Trois-Rivières (UQTR)

The Euromed University of Fez (UEMF) was pleased to welcome a delegation from the University of Quebec in Trois-Rivières (UQTR), led by its Vice-Rector for Research and Development. This meeting strengthened scientific ties between the two institutions and laid the foundations for a promising collaboration in the field of impactful and engaging scientific research.

During this visit, researchers and professors from UEMF and UQTR discussed advances and opportunities for cooperation in the following areas: medicinal chemistry, materials chemistry, management, artificial intelligence, nursing sciences, electrical engineering, renewable energies and green hydrogen.

This meeting provided an opportunity to explore new perspectives for cooperation, with a shared ambition to provide concrete solutions to current challenges through research and education. UEMF welcomes this collaborative dynamic and is committed to continuing to develop this strategic partnership with UQTR.

MLUMSE Project Kick-Off Meeting in Cairo: A Collaboration for the Modernization of Urban Management in the Mediterranean

The Euromed University of Fez (UEMF) participated in the launch meetings of the MLUMSE project (Modernization of Land and Urban Management Education in the Southern Mediterranean), in Cairo in February 2025, represented by Professor Wafae Belarbi, Director of the Euromed School of Architecture, Design and Urban Planning (EMADU). This project brings together several universities in the Mediterranean region, including UEMF.

UEMF stands out for its commitment to digital technologies and artificial intelligence through its EIDIA school, with the ambition of becoming a regional innovation center. The university's teams work on themes such as urban resilience, smart cities, and landscape planning. The university also focuses on modernizing its curriculum and strengthening its human and technological capacities, with the aim of contributing to the development of smart and sustainable cities.

This project underlines UEMF's ambition to become a center of excellence in urban management, sustainable development and digital technologies, by strengthening its international partnerships to meet contemporary challenges.

Nobel Laureates Gather at UEMF: Discussing Advances in Quantum Physics and Laser Technologies

On February 27, 2025, the Euromed University of Fez (UEMF) hosted a high-level scientific roundtable, bringing together world experts in quantum physics and laser technologies. Speakers included Nobel laureates Alain Aspect and Serge Haroche, as well as Eugene Polzik of the Niels Bohr Institute. The event addressed topics such as quantum entanglement, quantum simulations, and the applications of lasers in fields such as quantum computing and secure communications.

This meeting highlighted recent advances in quantum and optical physics, while exploring the challenges of bringing these innovations to fruition. It reinforced UEMF's role as a key player in international scientific research, providing a platform for dialogue between researchers and experts. The event generated great interest among the students, researchers, and professionals in attendance, creating opportunities for future collaboration.

Strengthening academic ties between Morocco and Madagascar: Visit of HE Mr. Johary Hoela Rajobson to the UEMF

The Euromed University of Fez (UEMF) had the honor of welcoming HE Mr. Johary Hoela Rajobson, Madagascar's first ambassador to Rabat, accompanied by his wife. Welcomed by the University's President, Prof. Mostapha Bousmina, this visit symbolizes the long-standing fraternal relations between Morocco and Madagascar.

This meeting also highlighted the shared commitment of both countries to promote cooperation in the fields of higher education, research, and innovation. The presence of Malagasy students within the UEMF already demonstrates this dynamic and strengthens intercultural and academic exchanges between the two nations.

As part of this partnership, UEMF donated two 3D printing machines to the University of Madagascar, marking a new milestone in scientific and technological collaboration. This symbolic gesture embodies the two institutions' commitment to leveraging innovation to meet the challenges of tomorrow.

This visit, marked by fraternity and shared vision, opens the way to a promising future for academic and diplomatic relations between Morocco and Madagascar.

Morocco200: a milestone at the Euromed University of Fez

The Euromed University of Fez had the pleasure of hosting “Morocco200” on February 26, 2025, a major initiative led by the Ministry of Digital Transition and Administrative Reform, GITEX AFRICA, KAOUN International and the Digital Development Agency (ADD).

This ambitious operation highlighted the potential of Moroccan startups through a national roadshow, stopping in Casablanca, Tangier, Agadir and Fez, with the aim of inviting young entrepreneurs to take part in Africa's largest tech event, GITEX AFRICA.

UEMF thanks Mr. Chakib Achour, Country Chief Representative of GITEX Africa in Morocco, as well as all the partners who contributed to the success of this initiative. A special tribute is paid to POGO, a startup born within UEMF, and to ARWA Solutions, who shared their experience and commitment by participating in the 2024 edition of GITEX.

With innovation at the heart of UEMF's mission, the university remains committed to supporting the startup ecosystem and guiding Moroccan talent towards excellence and technological entrepreneurship.

New Dynamics: Health Tourism at the Euromed University of Fez

A pioneer in promoting synergies between research, innovation and territorial development, the Euromed University of Fez (UEMF) hosted, from April 10 to 12, 2025, the first edition of the Regional Forum on Health Tourism, under the theme: "Thermal waters of the Fez-Meknes region: Health and Tourism".

Organized in partnership with the Wilaya of the Fez-Meknes Region, the province of Moulay Yacoub, the Regional Tourism Council and the Regional Council, this major event is fully in line with the UEMF's commitment to actively contribute to the dynamics of sustainable regional development, particularly in sectors with high potential such as health tourism.

A meeting place for experts, researchers, economic operators, and public stakeholders, the Forum offered a rich program including scientific seminars, presentations of innovative projects, and roundtable discussions on the challenges of developing spa resorts. Through this event, the UEMF leverages its academic and scientific expertise to fuel reflection and support public policies in structuring a regional ecosystem focused on health, well-being, and sustainable tourism.

By hosting this Forum, the University confirms its role as a catalyst for strategic projects at the national and regional levels, and reaffirms its mission as a center of excellence promoting dialogue between knowledge, innovation and inclusive development.

[Tribune] Donald Trump's reciprocal customs duties, "A clear challenge to the spirit of the Morocco-United States Free Trade Agreement"

A promise is a promise. On April 2, Donald Trump released his much-feared "reciprocal tariffs" announced in February. To usher in what he calls his "declaration of economic independence" and usher in "the golden age of the United States," the 47th president in the country's history imposed an import duty on his economic partners for every product crossing U.S. customs.

"Foreign leaders have stolen our jobs, foreign leaders have ransacked our industries, and these scavengers have ripped apart our American Dream. We will produce the cars, boats, potato chips, planes, minerals, and medicines we need right here in the United States," he said, illustrating the ultra-protectionist policy he has been pursuing since taking office.

Ode to Mathematics: Moroccan Day of Mathematics Worthily Welcomed by UEMF

The Moroccan Day of Mathematics (MDM) was held on April 19, 2025, at the Euromed University of Fez, bringing together nearly 800 participants around the theme "Mathematics as a vector of development." Co-organized with several scientific institutions, the event celebrated the excellence of Moroccan research in mathematics and highlighted the international recognition of Moroccan researchers and students in this field.

The day featured interactive workshops, lectures, and a keynote address by Professor Abdelhaq El Jai, a specialist in distributed systems. The MDM also emphasized the importance of democratizing mathematics, inspiring young talent, and promoting the dissemination of scientific knowledge in a spirit of openness, rigor, and innovation.

Promoting artisanal heritage: a strategic framework agreement for the region

On April 17, 2025, the Euromed University of Fez participated in the signing of partnership agreements during the visit of Mr. Lahcen Essaadi, Secretary of State for Crafts, to the Fez-Meknes Chamber of Crafts.

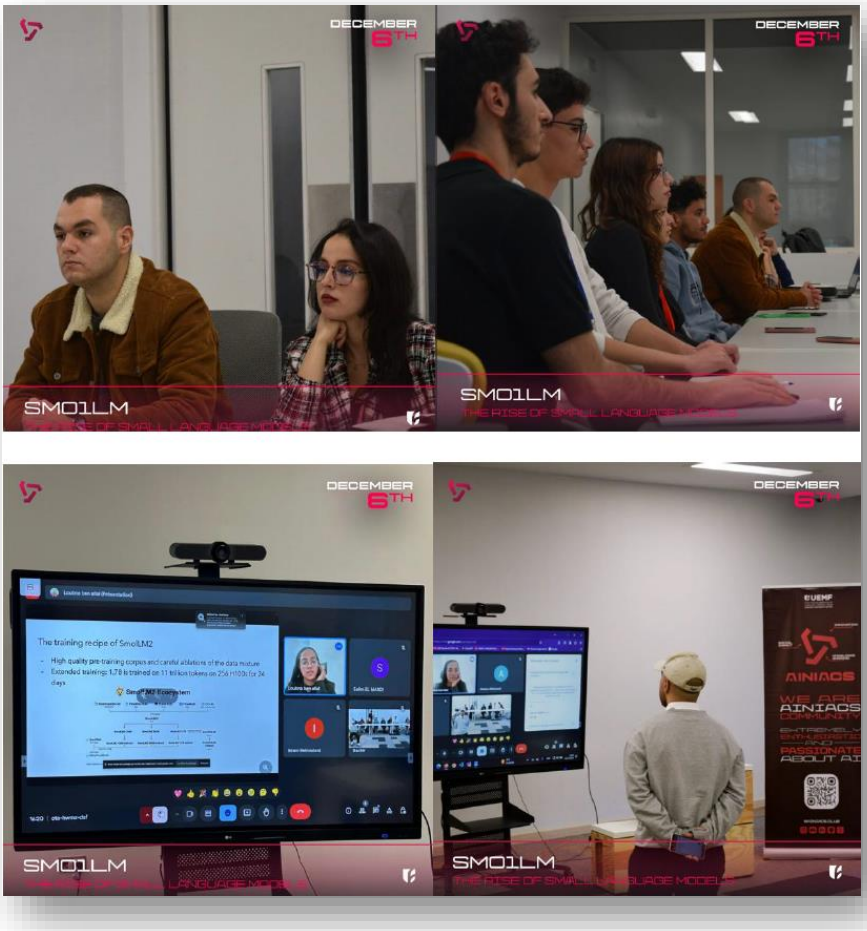

A framework agreement was signed between the UEMF State Secretariat and the Chamber of Crafts to develop specialized university training in craft trades, support innovative projects, conduct socio-economic studies, promote craft heritage and integrate digitalization to modernize the sector.

The UEMF is committed to mobilizing its resources to train professionals who combine tradition, innovation and sustainability while respecting the environment and social values.

A second partnership was signed with the Federation of Craft Businesses to strengthen training in glass techniques in collaboration with CERFAV in France.

SMOILM: THE RISE OF SMALL LANGUAGE MODELS

THE RISE OF SMALL LANGUAGE MODELS is a conference organized at the incubator, hosted by our special guest, Ms. Loubna Ben Allal, an engineer at Hugging Face. Her career has been marked by remarkable contributions to the development of NLP models such as StarCoder, as well as her recent involvement in SMoLLM, a series of small language models. With extensive expertise, Loubna Ben Allal regularly shares her knowledge at prestigious conferences at renowned universities, such as Stanford.

- Present the advances in small language models (LLMs) and their applications.
- Allow participants to interact with an internationally renowned expert.
- Inspire students and professionals to explore opportunities in the field of NLP.

AInnovathon: Innovation in the service of health and education thanks to AI

On April 22 and 23, more than 50 students from EBS and EIDIA participated in the AInnovathon, a hackathon organized by the Euromed Innovation Center as part of the STARTECH program, in partnership with Tamwilcom. For 48 hours, they developed innovative solutions in health and education, putting AI at the service of society. Supervised by experts, the participants presented their projects during a final pitch, and three teams—Ru'ya, MedPass, and Eschool4GenZ—were awarded prizes and received tailored support.

STARTECH Bootcamp: Two days of ideation and innovation at the Euromed Innovation Center

On April 18 and 19, the Euromed Innovation Center (EIC) hosted the STARTECH program cohort for an intensive bootcamp, in partnership with Tamwilcom. This ideation session was a decisive step in the project leaders' journey, supporting them in transforming their ideas into concrete prototypes (Proof of Concept).

For two days, participants benefited from targeted support and practical training focused on several strategic areas: in-depth understanding of their market, validation of business models, personalized coaching sessions, and development of impactful pitches. The goal was clear: to refine projects and prepare entrepreneurs to convince future partners or investors.

This event highlighted the quality of the support provided by the experts involved, as well as the remarkable commitment of the project leaders, driven by the desire to bring out innovative and viable solutions. In this regard, the Euromed Innovation Center warmly thanks all the participants for their motivation, as well as the speakers for generously sharing their expertise.

Mystery Gift, a startup incubated at UEMF, selected at GITEX

Among the 200 Moroccan startups selected to participate in the continent's largest technology fair, GITEX, Zahira Boulanouar, a second-year student at the School of Digital Engineering and Artificial Intelligence (EIDIA), proudly represented the Euromed University of Fez with her "Mystery Gift" project.

Born from an idea developed in her bedroom, this innovative personalized gift concept combines customer focus, creativity, and artificial intelligence. Driven by an original vision of tailor-made products, Zahira transformed her initiative into a promising startup, now supported by the UEMF's Euromed Innovation Center (EIC).

His career path reflects the spirit of innovation, perseverance, and entrepreneurial commitment that the University encourages in its students. The recognition obtained through this national selection confirms the quality of the support offered by the EIC and the UEMF's ambition to train the leaders and innovators of tomorrow.

Our congratulations to Zahira on this great achievement and our best wishes for the rest of her adventure at GITEX Africa 2025 and beyond.

Tech4Farmers: Three days of support for the 2nd cohort of AgriTech startups

From May 13 to 15, 2025, the Euromed University of Fez organized the second bootcamp of the Tech4Farmers program, in partnership with the French Development Agency (AFD). This program is part of the Regional AgriTech Innovation and Entrepreneurship Center (PRIE) of Fez-Meknes.

For three days, 16 AgriTech startups benefited from intensive support to:

Structure their economic model,

Build their business plan and develop strategic partnerships,

Explore opportunities for territorial deployment through panels with regional institutions (DRA, ENA Meknès, Agrinova).

Supervised by UEMF, IMPACT Lab and the Euromed Innovation Center, this bootcamp strengthened the participants' entrepreneurial capacities while connecting them with key players in the Moroccan agricultural ecosystem.

Visit of a Senegalese delegation to the UEMF: focus on innovation and African synergies

Euromed University of Fez hosted a Senegalese government delegation led by the Secretary of State for the Development of Small and Medium-Sized Industries, as part of an official visit focused on South-South cooperation. The meeting provided an opportunity to present UEMF's strategic initiatives in innovation, entrepreneurship, and sustainable development, while exploring avenues for collaboration in supporting SMEs and training young entrepreneurs. This visit strengthened ties between Morocco and Senegal, illustrating the key role of African universities in the continent's transformation.

UEMF and NOVA University of Lisbon join forces for intercontinental collaboration

The Euromed University of Fez (UEMF) and the NOVA University of Lisbon have signed a strategic collaboration agreement, a significant step towards developing student mobility opportunities, research projects and intercultural exchanges.

This agreement marks an important step in strengthening academic and scientific relations between Africa and Europe. The Nova University of Lisbon, ranked among the top 8 European universities in the QS Top 50 Under 50 ranking, shares a common vision with UEMF: placing research, innovation, and civic engagement at the heart of its actions.

Mr. João Sàágua, Rector of Nova University of Lisbon, highlighted the strategic importance of this collaboration, recalling that NOVA, rooted in European culture and Iberian identity, prioritizes relations with three major geographical areas: Europe, the Mediterranean, and the South Atlantic. These regions represent major axes for innovative and sustainable academic cooperation. For its part, UEMF, a leading Euro-Mediterranean university, stands out for its role as a bridge between continents and its leadership in high-impact projects in the fields of education, research, and innovation in the region.

During this visit, the NOVA delegation was able to discover UEMF's modern infrastructure, a testament to its academic and scientific ambition. The guests toured the research and innovation platforms, including the 3D printing platform, the largest on a university campus in Africa. They also explored the university's sports complex, including a FIFA-certified football pitch and an Olympic-sized swimming pool, which positions UEMF as a key player in promoting well-being and sporting excellence.

Strategic reading of Moroccan intelligence: Moulay Abdelmalek Alaoui in conference at the UEMF

As part of its high-level intellectual meetings, the Euromed University of Fez welcomed Mr. Abdelmalek Alaoui, president of IMIS and recognized expert in strategy, for a conference dedicated to his reference work "The Time of Morocco: Resilience and Emergence of the Cherifian Kingdom".

The event provided an opportunity to revisit Morocco's major strategic directions in the face of the Covid-19 pandemic, while analyzing the far-reaching reforms undertaken in the institutional, economic, digital, and geopolitical spheres. Through a structured and lucid approach, Mr. Alaoui presented Morocco as a country undergoing transformation, focusing on political anticipation, innovation, and a sovereign vision of development.

The discussions highlighted the central role of youth in this dynamic, perceived not only as beneficiaries, but also as key agents of change. Students were thus able to interact around the issues of national leadership, digital transition, continental integration, and productive sovereignty.

The session concluded with a book signing and a special moment of sharing, confirming the importance of such meetings in civic education, the formation of critical thinking and the promotion of a culture of resilience.

Doctoral Thesis Defense in Management and Innovation by Mr. Olugbenga Ayo OJUBANIRE

As part of its mission to promote scientific research and innovation, the Euromed University of Fez (UEMF) organized, on Friday, June 20, 2025 at 10:00 a.m., a doctoral thesis defense in Management, Innovation and Entrepreneurship. This defense, held in the Great Hall of the Incubator (LOC001994), was an opportunity for Mr. Olugbenga Ayo OJUBANIRE to present his research work, thus contributing to the enrichment of knowledge in the fields of managerial innovation and entrepreneurship.

Under the theme: "Determinants of Smart Factory Model Adoption among Industrial Enterprises in Emerging Economies: A comparative Study of the Automotive Industry in Negiria and Morocco"

UEMF PhD student awarded at the international MEDPore25 congress for his promising research

Mohamed Amine Benzaouia, a doctoral student in the NANOMat (Nanomaterials) team at Euromed University of Fez, is conducting innovative research on the development of new antibacterial and antiviral materials. This project, supported by the Hassan II Academy of Science and Technology, is part of a national strategy to strengthen scientific capacity in the face of pandemics, particularly COVID-19.

As part of his work, Mr. Benzaouia participated in the international conference MEDPore25 (Mediterranean Conference on Porous Materials), recently held in Marrakech. He presented a scientific poster entitled: “Nitrogen-containing mesoporous organosilicas as antibacterial materials.” This presentation was awarded the Best Poster Award, recognizing scientific excellence, clarity of the subject, and visual quality of the poster.

Currently pursuing a thesis at the NANOMat laboratory, this distinction highlights the dynamism of research conducted at UEMF in the field of nanomaterials applied to health. It also illustrates the university's growing impact on the international scientific scene.

Euromed University of Fez warmly congratulates Mohamed Amine Benzaouia for this well-deserved recognition.

Information and discussion day on European research programs

Euromed University of Fez hosted a day dedicated to European research funding programs, with a particular focus on Horizon Europe and Erasmus+. The event provided a better understanding of the opportunities these programs offer to researchers, teachers, and project leaders.

Presentations focused on several key themes, including health, digital technology, industry, space, and higher education. Participants received detailed presentations on project submission mechanisms, eligibility criteria, and the support tools available to assist applications. A practical workshop, held in the second half of the day, provided participants with an interactive setting to discuss their project ideas and refine their preparation processes.

This event helped strengthen UEMF's participation in European calls for projects, while paving the way for new international collaborations in the fields of research, teaching, and innovation. It is fully in line with the university's strategy of scientific and academic outreach on a Euro-Mediterranean scale.

HackAI Morocco: UEMF on the podium!

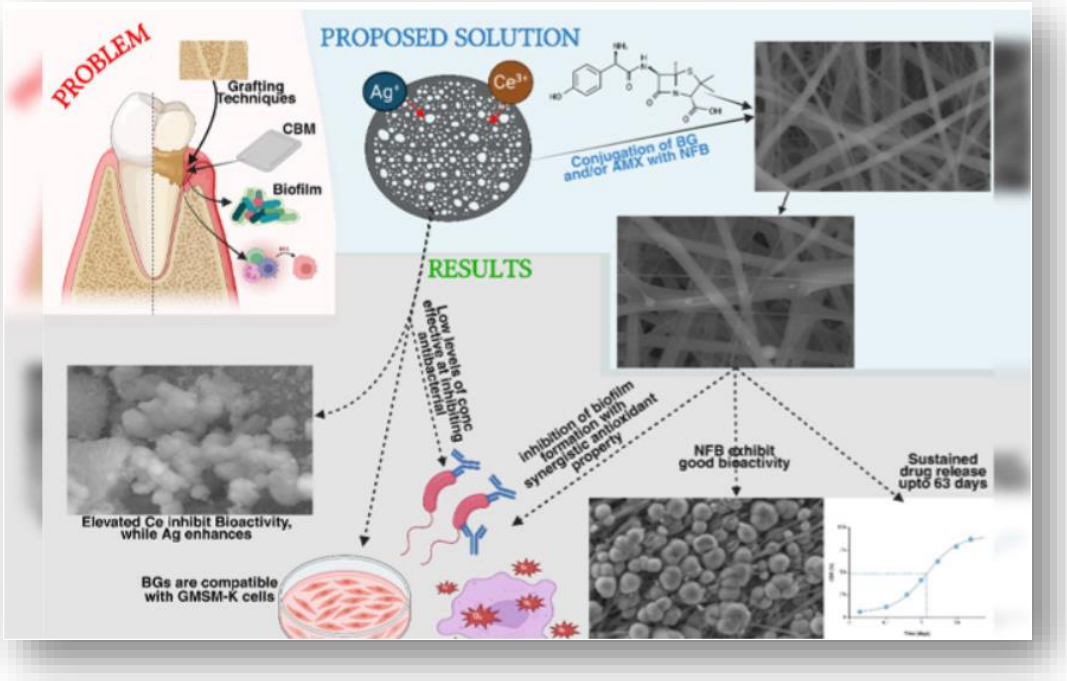

Among more than 200 applications, our students from the School of Digital Engineering and Artificial Intelligence (EIDIA) distinguished themselves in this prestigious national generative artificial intelligence (GenAI) challenge, organized at 1337AI.

A team of three students, proudly representing UEMF, brilliantly defended their ideas during this competition, which brought together the country's top talent. Their project, Tomouhi, is an intelligent job interview simulation platform, offering personalized support to help students and job seekers hone their skills. A true demonstration of creativity and commitment!

Congratulations to Imane AMAAZ, Imane Benchrif and Hiba SOFYAN for this remarkable achievement, as well as to the mentors who accompanied them throughout the journey.

Participation in the National Conference on Investment, Employment and Digital Transition

As part of the annual session of the House of Councillors of the Kingdom of Morocco, a National Conference on Investment, Employment and Digital Transition was held on June 11, 2025 at the House of Councillors, under the theme: "Investment, Employment and Structural Transformation in Morocco: Towards a New Inclusive Territorial Governance".

The Euromed University of Fez was represented by Professor Ahlam Mohammadi, lecturer and researcher at the Euromed Business School (EBS), who took part in the thematic workshop entitled: "Investment, governance, gender and territorial dynamics: points of convergence to improve inclusive employment in Morocco."

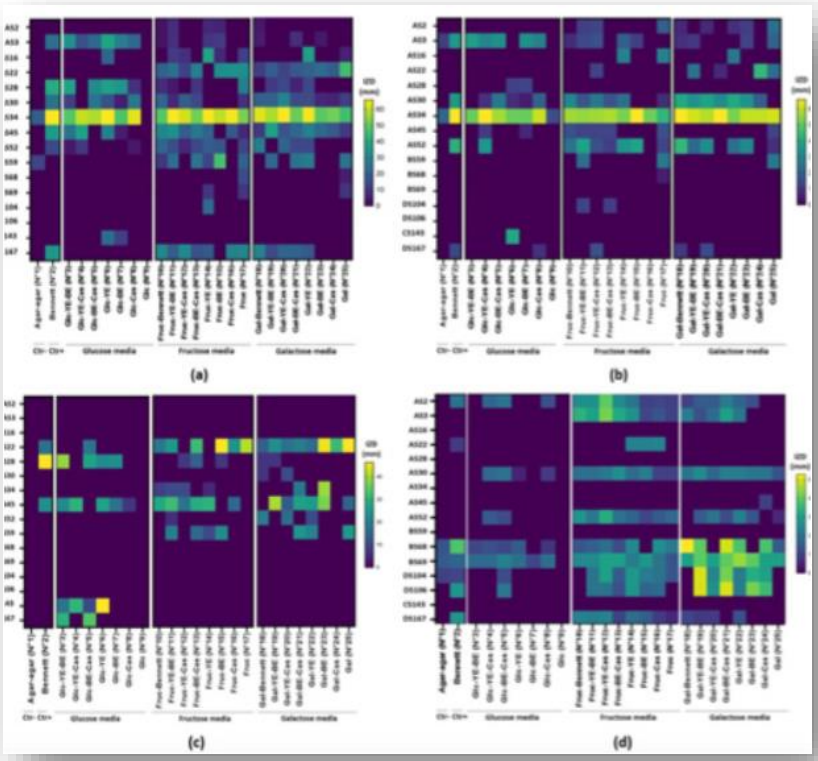

Her speech highlighted the conditions necessary to make public investment a lever for inclusive job creation and balanced territorial development. She emphasized the importance of governance rooted in local realities, capable of responding to the structural challenges of the labor market.

Calling for a strategic repositioning of public policies, Professor Mohammadi stressed the need to place the creation of productive, sustainable and accessible jobs for all at the heart of national priorities.

This participation illustrates the active engagement of the UEMF academic body in the major debates that shape the future of the country.

Sport & Performance at UEMF

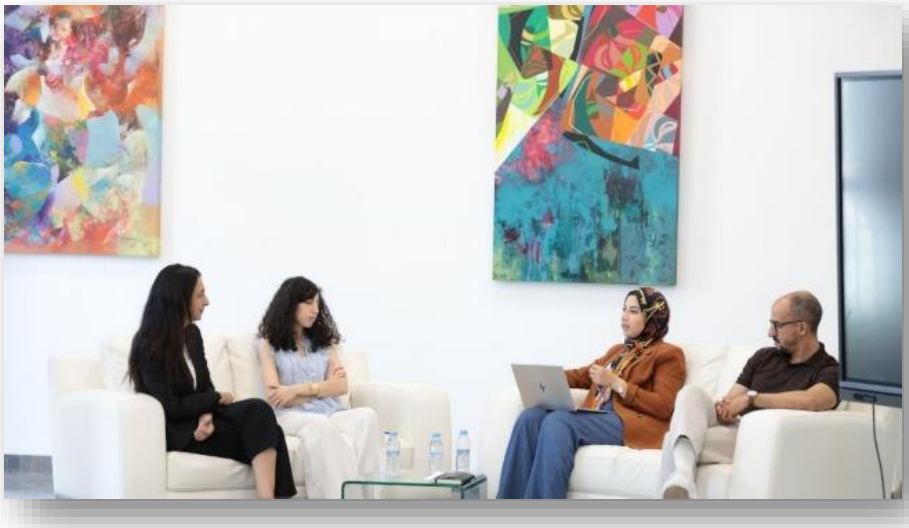

In May 2025, the UEMF organized, via the Euromed Sports Centre and the VP-ACVU, a series of events around the theme "Sport & Performance".

On May 7, several conferences were led by experts, addressing key themes: sports performance, sports psychology, artificial intelligence in the service of athletes, and reconciling studies and high-level sport.

On May 21, the National Meeting "Sport & Performance – UEMF 2025" brought together researchers, federations, athletes, students and decision-makers for a day of discussions focused on research, innovation and improving performance in sport.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Round table: Changing African territories

On June 12, 2025, as part of the African Week organized at UEMF, a round table was held on the theme:

“Transformations of territories and infrastructures in Africa: technology, culture and human capital as levers of resilience”.

Led by Prof. Iman Meriem Benkirane, Prof. Mariame Bouchaqour, Ms. Rim El Harrouni and Mr. Ouassim Bensouda, this session brought together students, researchers and experts to discuss the profound changes in African territories in the face of technological, social and environmental challenges.

The discussions highlighted the strategic role of innovation, cultural identity and human capital in building more resilient, sustainable and inclusive African territories.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Roundtable: Entrepreneurship in Africa – Innovate locally, impact globally

As part of African Week, a round table hosted by Bank of Africa was held on June 12, 2025 around the theme:

"Entrepreneurship in Africa: Innovate locally, impact globally."

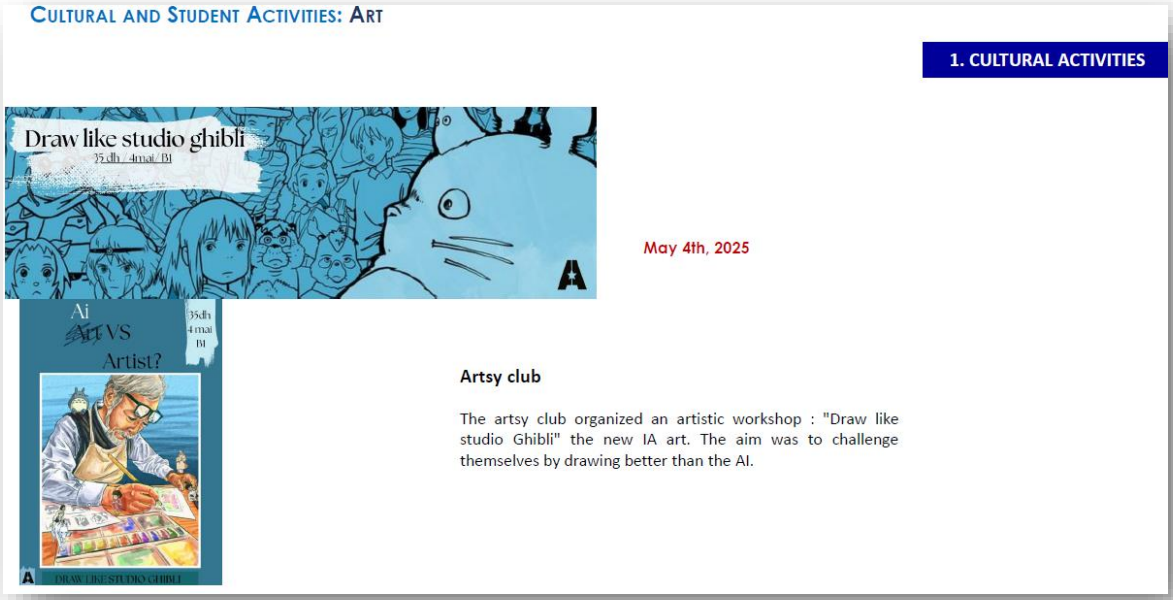

This session brought together students and professionals to explore the role of local innovation in the continent's economic transformation and its global influence.

The discussions highlighted success stories, challenges encountered, and opportunities for young African entrepreneurs, with a particular focus on innovation, sustainability, and inclusive growth.

The event illustrated the full potential of the African entrepreneurial spirit in building a more dynamic, connected and resilient economy.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Art Workshop “Drawing like Studio Ghibli: A Challenge Against Artificial Intelligence”

On May 4, 2025, the Art Club held a workshop titled “Drawing Like Studio Ghibli: The New Artistic AI.”

The goal was to challenge participants to draw better than artificial intelligence, thus stimulating their creativity and artistic skills.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

SOC Fundamentals Webinar – Sparksec Club

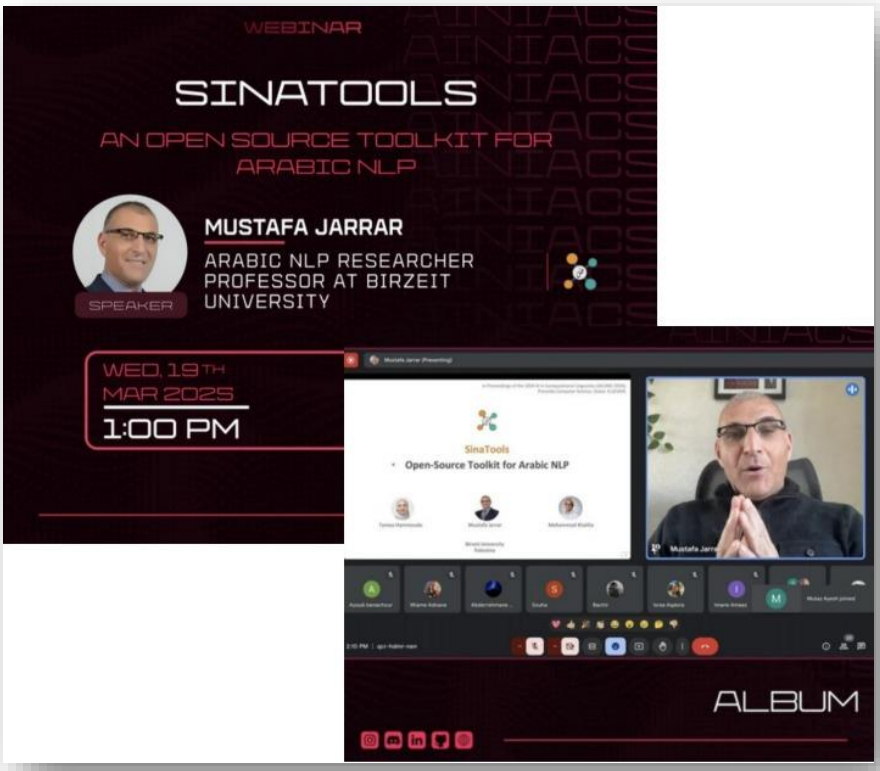

On March 18, 2025, the Sparksec Club organized a webinar on the fundamentals of a Security Operations Center (SOC).

The session covered the role and key functions of a SOC, essential skills for joining a SOC team, and concrete strategies for detecting and responding to cyber threats.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

International Webinar on Advances in Artificial Intelligence – Club AIniacs

The AIniacs club organized an international webinar focused on concrete advances in artificial intelligence in specialized fields.

This event brought together doctors, researchers and experts from France, Qatar and other countries.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Sparksec Webinar: Securing Red Hat Servers

On March 27, 2025, as part of its ongoing webinar series, the Sparksec Club hosted a session on securing Red Hat servers.

This talk focused on methods to fix critical vulnerabilities before they are exploited by hackers.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Participation in Gitex Africa – Club AIniacs

On April 16, 2025, the AIniacs club participated in Gitex Africa, a major event dedicated to cutting-edge technologies.

This participation allowed students to discover the latest advances in artificial intelligence, to interact with innovation players, and to share the knowledge acquired with the UEMF student community.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Practical Web Pentest Session – Sparksec Club

On April 24, 2025, the Sparksec club organized a practical web penetration testing session (web pentest), providing students with concrete experience of ethical hacking in a secure environment.

Participants learned how to scan, exploit, and defend computer systems through live demonstrations and interactive cybersecurity labs.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

“Children of the Moon” Project – Hands Club

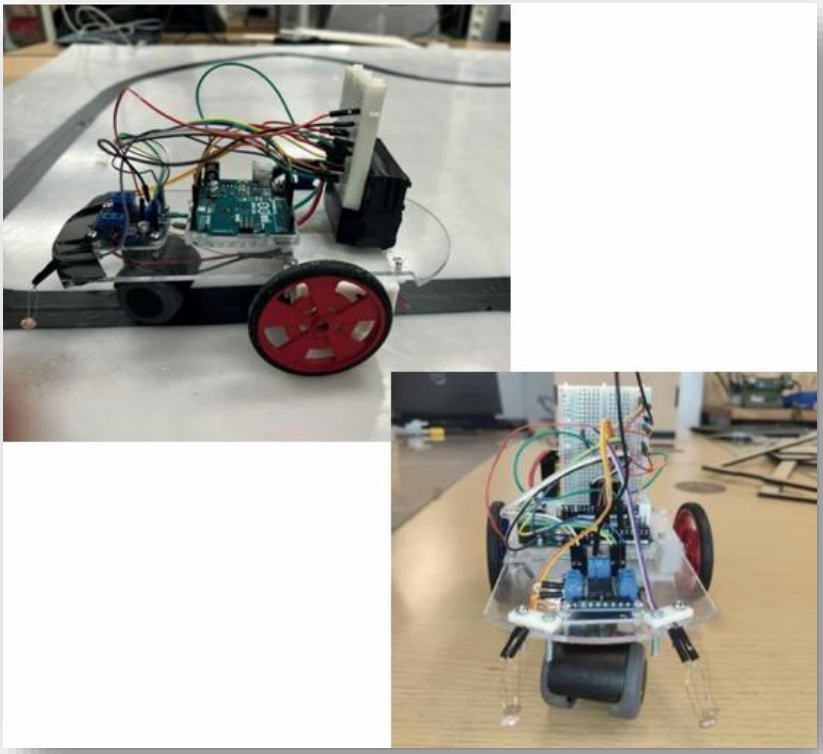

On February 15, 2025, the Hands Club participated in the “Children of the Moon” competition organized at ENSAM in Meknes.

On this occasion, the club presented a project to develop 100% natural creams, specially designed for people suffering from Xeroderma Pigmentosum. This project was carried out in partnership with pharmacy and biomedical students from Euromed University.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Autonomous Robotics Competition – Hi-Tec Club

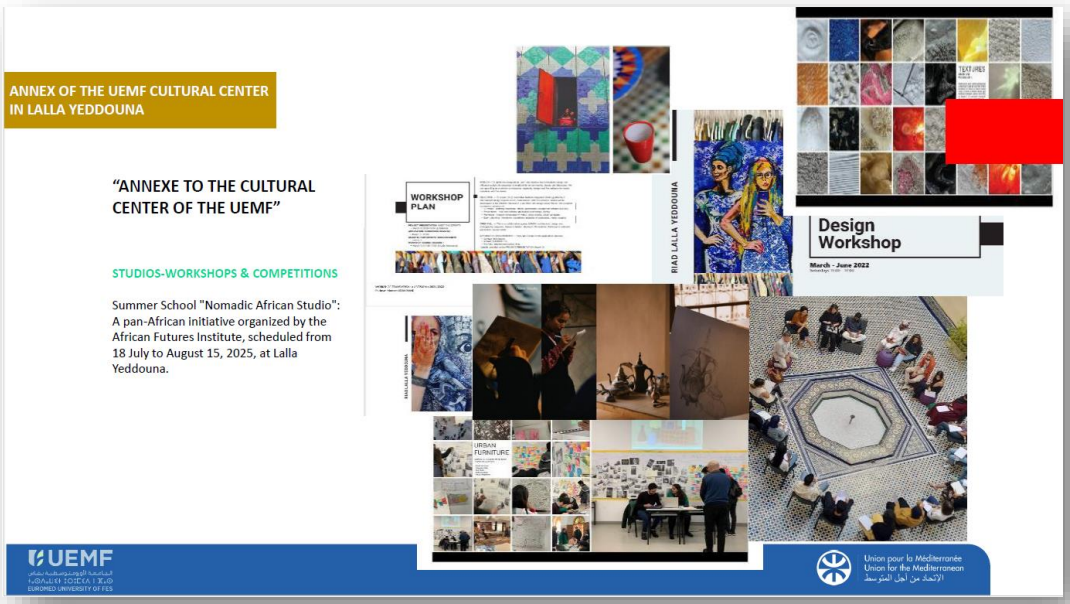

On May 27, 2025, the Hi-Tec Club held a technical competition where students had to design a prototype of an autonomous robot capable of following a path defined by light sensors, while avoiding obstacles.

This challenge allowed participants to put into practice key concepts in electronics, programming and digital manufacturing, following a "learning by doing" approach in line with the project-based pedagogy adopted at UEMF.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Annex of the UEMF Cultural Center in Lalla Yeddouna

The UEMF Cultural Center Annex at Lalla Yeddouna, located in the heart of the Fez medina, embodies an innovative initiative aimed at strengthening the link between heritage, knowledge, and innovation. A truly immersive journey, the exhibition offers an exploration between past and future, integrating advanced technologies developed by UEMF research laboratories, such as virtual reality. Structured into several rooms, it highlights the historical role of Al Quaraouiyine and the madrasas in the transmission of knowledge (Circuit du Savoir), the use of technologies to preserve and promote heritage (Tech & Heritage), the dialogue between traditional crafts and academic research (Tech & Craft), as well as a collaborative FabLab (El Beldi FabLab) bringing together artisans, students, and researchers. The UEMF promotes a vision of the medina as an "open-air school," where learning, tangible heritage, and know-how meet. The annex also hosts international events, such as the Pan-African summer school "Nomadic African Studio" (July 18 – August 15, 2025), highlighting its openness to cultural exchange and transdisciplinary training.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Activities to promote entrepreneurship held on 2024-2025

April, 2025
The AInnovathon bootcamp brought together +50 students from EIDIA and EBS for a 2-day hackathon tackling health and education challenges. Eight projects were co-developed, with three selected for follow-up training and support.

April, 2025
Euromed Innovation Center held its first Startech bootcamp, an ideation program co-developed with Tamwilcom, guiding early-stage innovators toward building their first Proof of Concept (P.O.C)

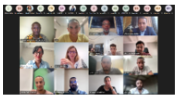

April 2025
The Euromed Innovation Center participated as an exhibitor at GITEX Africa, following its official labelling by Tamwilcom, showcasing its commitment to supporting innovative startups in the region.

March, 2025
The Euromed Innovation Center launched Euromed Startup Launch, a 4-week evening ideation program held during Ramadan, helping UEMF students develop innovative ideas alongside their academic journey.

November, 2024
In November 2024, Les Domaines Agricoles held a launching event for their innovation and startups division : DOMSEEDS. This AgriTech event brought together actors of Moroccan AgriTech Ecosystem to discuss its evolution. Ghada Bouhlal, Director of the Euromed Innovation Center (EIC), contributed to the roundtable discussion by emphasizing the critical role of innovation and collaboration in driving sustainable growth within the Agritech sector.

September, 2024
In collaboration with TamwilCom, Launching of the bootcamps of Euromed Innovation Center's Ideation program : STARTECH. This initiatives aims to support innovative projects holders to reach their Proof of Concept by providing them the right tools for their journey.

September, 2024
The 2nd Bootcamp of Tech4Farmers Program was held with a focus on challenging the 15 Projects' Business Model. Between Mastarclass and individual coaching, startups had the opportunity to exchange with other peers-entrepreneurs and PRIE's Members.

July, 2024
Link Up Africa Incubation Program held its selection committee to identify promising entrepreneurial projects from across Africa. This initiative, aimed at fostering youth entrepreneurship willing to open their Business in Morocco or a Sub-Saharan Country.

November, 2024
As part of the Innovation Management course at Euromed Business School, 100 students took part in a hands-on workshop led by the Euromed Innovation Center, exploring empathy and design thinking through a practical learning experience.

November, 2024
70 young participants from 21 nationalities gathered at the Euromed University of Fes for the UfM Med Youth Lab 2024 — a Euro-Mediterranean Hackathon co-organized with the UfM, GIZ, Anna Lindh Foundation, and IEMed — to co-create solutions on green skills, youth mobility, and civic engagement.

November, 2024
The UfM and EIB held their second joint training on EU project financing at the Euromed University of Fes, gathering students from Euromed Business School as part of a their new education initiative.

November, 2024
As part of its commitment to fostering innovation and investment, the Euromed Innovation Center hosted a visit and official signing ceremony with Azur Investment Fund. This partnership marks a new step toward supporting early-stage startups and high-impact entrepreneurial initiatives across the region.

February, 2025
70 young participants from 21 nationalities gathered at the Euromed University of Fes for the UfM Med Youth Lab 2024 — a Euro-Mediterranean Hackathon co-organized with the UfM, GIZ, Anna Lindh Foundation, and IEMed — to co-create solutions on green skills, youth mobility, and civic engagement.

February, 2025
As part of the Link Up Africa program led by Enabel and AMCI, the Euromed Innovation Center team took part in a "training of trainers" workshop focused on designing and implementing effective incubation programs.

December, 2024
The Euromed University of Fes hosted the 2nd edition of the **Students' Innov'Up Hackathon**, co-organized with the EU and EIB, where 11 teams tackled water scarcity through innovative tech-driven solutions.

December, 2024
Launch of **Bootcamp 3 for the first cohort of the Tech4Farmers program**, bringing together AgriTech entrepreneurs to accelerate their projects through hands-on training and expert support.

Activity report: Department of Social-Economic Partnerships and Partnerships

THE Impact Ranking 2025:1st at regional level and3rd nationally in the SDG 9 category: Innovation and infrastructure

Rank	Name	Industry, Innovation, and Infrastructure	Overall
301–400	Mohammed V University of Rabat Morocco	61.8–70.7	60.9–65.5
301–400	Université Hassan II de Casablanca Morocco	61.8–70.7	60.9–65.5
401–600	Euromed University of Fez Morocco	47.9–61.5	65.6–70.2
401–600	Ibn Tofaïl University Morocco	47.9–61.5	70.3–76.1
401–600	International University of Rabat Morocco	47.9–61.5	70.3–76.1
401–600	Moulay Ismail University Morocco	47.9–61.5	49.8–60.8

The 2nd edition for the STARTECH program

The Euromed Innovation Center (EIC), in partnership with Tamwilcom, the Fez-Meknes Regional Investment Center and Bank of Africa, organized an intensive bootcamp for innovative project leaders.

The objective of this initiative is to support the region's talents in structuring their ideas, to encourage their transformation into high-potential startups and to promote local innovation through concrete actions, collaboration and impact.

On July 10 and 11, participants from the Fez-Meknes region benefited from two days structured around practical workshops, mentoring sessions, and constructive exchanges. These days were marked by a collective dynamic promoting mutual support, energy, and creativity, driven by committed and action-oriented project leaders.

Information day on European programs: Erasmus+ & Horizon Europe

The Euromed University of Fez organized a day dedicated to the European Erasmus+ and Horizon Europe Programs, marked by enriching discussions around the opportunities offered in research and higher education.

This meeting provided an opportunity to deepen understanding of European funding mechanisms, to discover major calls for projects and to strengthen the skills of project leaders in building sustainable partnerships on a Euro-Mediterranean scale.

The morning concluded with an interactive exchange between speakers and participants, bringing together teacher-researchers, academic managers, project leaders and doctoral students.

Our sincere thanks to the speakers for the quality of their contributions:

Prof. Noureddine El Aouad, National Contact Point Horizon Europe – Health

Prof. Najiba Amrani, National Contact Point Horizon Europe – Digital, Industry & Space

Dr. Latifa Daadaoui, National Coordinator of the Erasmus+ Office

Euromed Innovation Center launches Tech4Farmers, a springboard for agritech

At Euromed University of Fez, we make innovation and entrepreneurship major levers of transformation to meet the major challenges of today and tomorrow.

Through our incubator, the Euromed Innovation Center, we support young people with high-impact projects by leveraging digital tools, applied research, and co-creation. This dynamic led to the creation of Tech4Farmers, a support program designed to foster, structure, and accelerate digital projects that meet the real needs of the agricultural world.

Training, mentoring, prototyping, field immersion, presentations before a jury... Relive in this video the highlights of the first Tech4Farmers cohort, led by committed young talents, passionate experts and a common desire: to transform agricultural challenges into levers for innovation.

Doctoral Thesis Defense in "Organic and Medicinal Chemistry" by Ms. Nassima SAGHDANI

This thesis project focuses on the design and synthesis of novel anticancer molecules derived from ethacrynic acid and indazole, combined with sulfonamides. Through advanced structural modifications, including coupling of heterocyclic groups via the Sonogashira reaction, several compounds have shown promising antiproliferative activity in vitro. A new class of ligands has also been developed to form metal complexes, including one with ruthenium, paving the way for future developments in cancer chemotherapy.

Dental research: a look back at the IADR 2025 congress in Barcelona

Professor Khalil El Mabrouk represented the Euromed University of Fez (UEMF) at the 103rd IADR General Session and Exhibition, held in Barcelona from June 25 to 28, 2025. This event, bringing together more than 4,000 international participants, is one of the most important in the field of dental research.

On this occasion, Prof. El Mabrouk chaired a scientific session on polymer materials applied to tissue regeneration and presented an oral communication entitled "Bioresorbable Hybrid Membranes for Bone Regeneration", highlighting advances in biomaterials for bone regeneration.

A member of the IADR, Professor El Mabrouk is one of the few Moroccan representatives of this international scientific organization, thus strengthening the UEMF's visibility in global research networks. His participation reflects the university's commitment to cutting-edge research and innovation.

Launch of the second edition of the Regional Prize for Scientific Research - Fez-Meknes Region

2eEdition of the Regional Prize for Scientific Research – Fez-Meknes Region

The Fez-Meknes Regional Council, in collaboration with partner universities and higher education establishments, is launching the call for applications for the 2eedition of the Regional Scientific Research Prize for the year 2025.

The aim of this prize is to recognize the best scientific contributions in six major fields, across three distinct categories:

- Works
- Doctoral theses
- Registered patents

Areas concerned:

- Human and social sciences
- Economics and Management Sciences
- Legal Sciences
- Basic sciences
- Medical and Pharmaceutical Sciences
- Innovation and technology

Application deadline: July 25, 2025

African Futures Institute: Launch of the Nomadic African Studio in Fez

The Euromed University of Fez hosted the African Futures Institute, an initiative founded in 2021 in Accra by Professor Lesley Lokko OBE, which offers a new model of architectural education combining training, research, and public events.

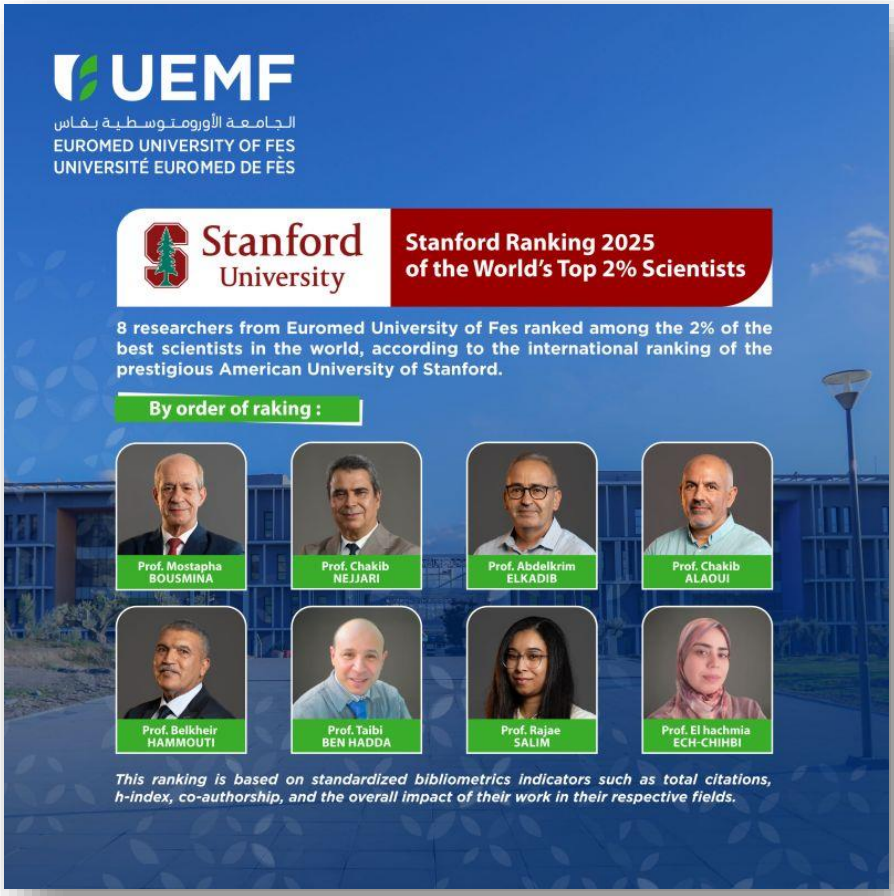

This meeting took place at the eco-campus, on the occasion of the inaugural establishment of the Nomadic African Studio in Fez, the result of an innovative partnership between UEMF and AFI, led by professors Aziza Chaouni and Alex Toshkov.

Located in the heart of the Fez medina, within the Riad Lalla Yeddouna, which is made available to the University, this nomadic studio offers participants a unique setting to foster creative reflections that resonate with the history and culture of the place. It is part of a transnational dynamic, bringing together a broad cohort of international critics.

This event enabled rich exchanges between the studio teams and the university community, opening new perspectives for education and innovation in Africa.

Eight UEMF researchers recognized among the world's top 2% of most influential scientists

The Euromed University of Fez (UEMF) is once again in the spotlight on the international scientific scene.Eight of its research professors were ranked among the top 2% of the world's most influential scientists according to the 2025 edition of the Stanford University ranking, produced in partnership with Elsevier and Scopus.

This distinction is based on demanding bibliometric criteria (citations, h-index, co-publications, overall impact) and reflects the progress of Moroccan research, which now has 134 distinguished researchers. UEMF stands out in particular by doubling the number of its recognized researchers, going from 4 in 2024 to 8 in 2025.

This international recognition confirms the quality and impact of the work carried out at UEMF, strengthens its global visibility and constitutes a source of pride for the Moroccan scientific community.

Tamkin LiTanmia: Agritech Project Steering Committee

THEOn September 25, 2025, the Euromed University of Fez hosted the steering committee of the "Regional Innovation and Entrepreneurship Hub in Agritech" project, part of the Tamkin Li Tanmia program funded by the AFD. Launched in 2022, this project aims to build a regional agricultural innovation ecosystem connecting researchers, institutions, businesses, start-ups, and farmers to develop appropriate technological solutions.

The meeting, bringing together numerous institutional and private partners, made it possible to present theproject progress, monitor the Tech4Farmers program, plan the mobilab and awareness-raising activities, while defining the next steps. It confirms UEMF's commitment to technological and entrepreneurial innovation in the service of agriculture and the Fez-Meknes region.

https://ueuromed.org/actualites/annonces-diverses/tamkin-litanmia-comite-de-pilotage-du-projet-agritech

3e and last Tech4Farmers Bootcamp of the 2e Cohort

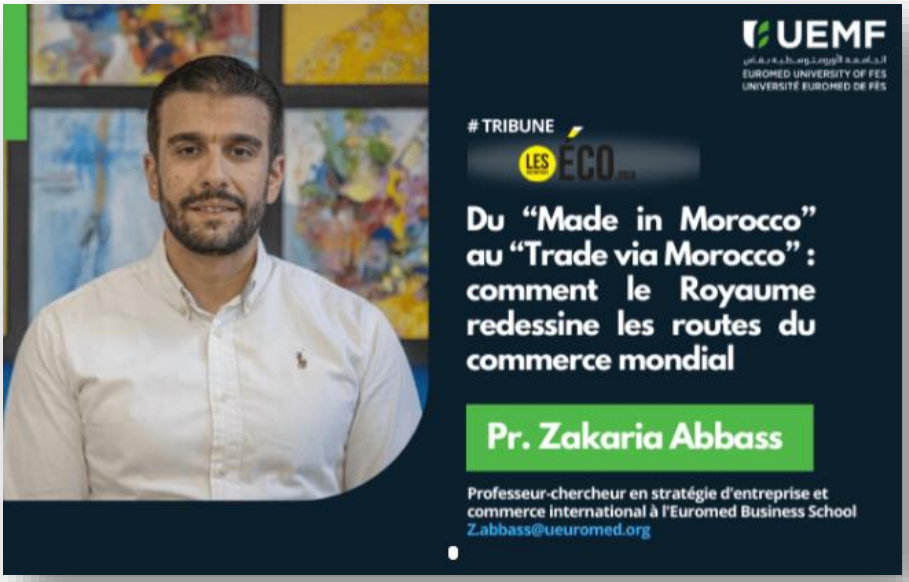

From September 23 to 25, 2025, the Euromed University of Fez, through its Euromed Innovation Center incubator, hosted the third and final Tech4Farmers – Tamkin LiTanmia bootcamp, funded by AFD. Dedicated to AgriTech project leaders from the second cohort, this bootcamp allowed startups to refine their business model, strengthen their pitching skills, and prepare for fundraising through practical workshops, mentoring, and discussions with experts.

This step completes the incubation cycle and prepares entrepreneurs to scale up and fully integrate into the regional and national Agritech ecosystem. It illustrates UEMF's commitment to technological innovation, sustainable agriculture, and impact entrepreneurship in the Fez-Meknes region.

[Tribune] From "Made in Morocco" to "Trade via Morocco": How the Kingdom is redrawing the routes of global trade

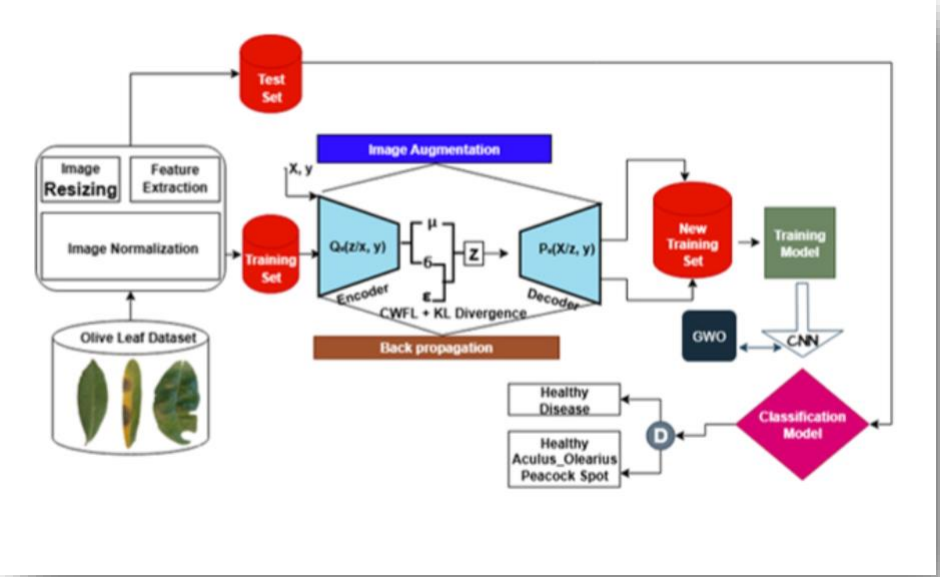

The "Made in Morocco" label has long symbolized an emerging industrial pride. Textiles, leather, then automobiles and aeronautics were the showcases of this Moroccan producer. But in 2025, this label is no longer sufficient to reflect the Kingdom's ambition.

The country is not just a manufacturing territory: it is becoming a logistical and strategic crossroads, at the heart of the reshaping of global flows. This profound transformation heralds the shift from "Made in Morocco" to "Trade via Morocco," an expression of a deliberate repositioning.

Doctoral thesis defense in “Artificial Intelligence” by Mr. Kaloma Usman MAJIKUMNA

Thesis defense – Kaloma Usman MAJIKUMNA
Title: Managing plant survival and disease risks under water stress using artificial intelligence: the case of olive trees in Morocco

This thesis studies the impact of water stress and diseases on olive trees in Morocco, by combiningartificial intelligence, remote sensing and field experiments. An innovative deep learning model has been able to detect diseases with 99.2% of predecision, while tests of'irrigation have identifiedethe varietiesetes and most resilient indicators. The results provideconcrete recommendations for sustainable and climate-adapted agriculture.

SDG 10 Report: Reduced Inequalities

Introduction

Morocco has ratified all UN conventions relating to inclusion and diversity. As such, Morocco recognizes the right of vulnerable people to education and is committed to developing inclusive environments that facilitate their full and equal participation in the education system and, more broadly, in community life. The Constitution of the Kingdom of Morocco of July 1, 2011, places these issues at the heart of the issues of individual rights and freedoms.

Furthermore, the Higher Council for Education, Training and Scientific Research (CSEFRS) has developed the Strategic Vision 2015-2030. The latter's recommendations converge towards a fair, high-quality school that promotes the advancement of individuals and tends towards the development of a genuine strategy for inclusion and diversity.

The creation of the Euromed University of Fez (UEMF) is the result of a Royal Initiative and is fully in line with the recommendations set out. Its objective is to establish in Fez a platform for intercultural dialogue, exchange & cooperation between the two shores of the Mediterranean with a natural extension to sub-Saharan Africa. The UEMF is a non-profit Foundation with public utility status and is certified by the Union for the Mediterranean (UfM) with the support of its 43 member countries. The UEMF is placed under the High Honorary Presidency of His Majesty King Mohammed VI and its degrees (MS. BS. MBA & Ph.D.) are recognized by the Moroccan State and all its courses have been accredited by the national quality assurance agency.

Diversity of the UEMF community

UEMF strives to welcome diverse and sometimes distant audiences in order to contribute to the construction of an egalitarian and tolerant society. It makes its admissions procedures more inclusive, to facilitate access to higher education for all by reducing financial barriers and promoting social and cultural inclusion and diversity on its campus.

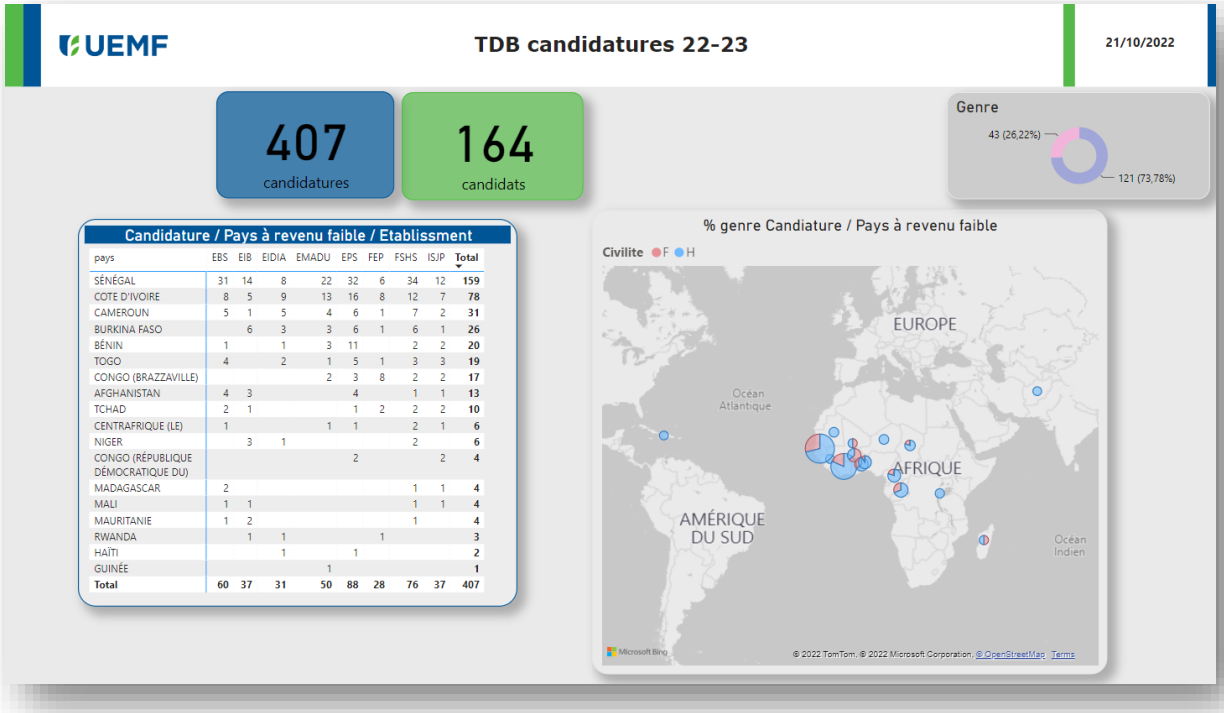

Students, academic & administrative staff and local partners:

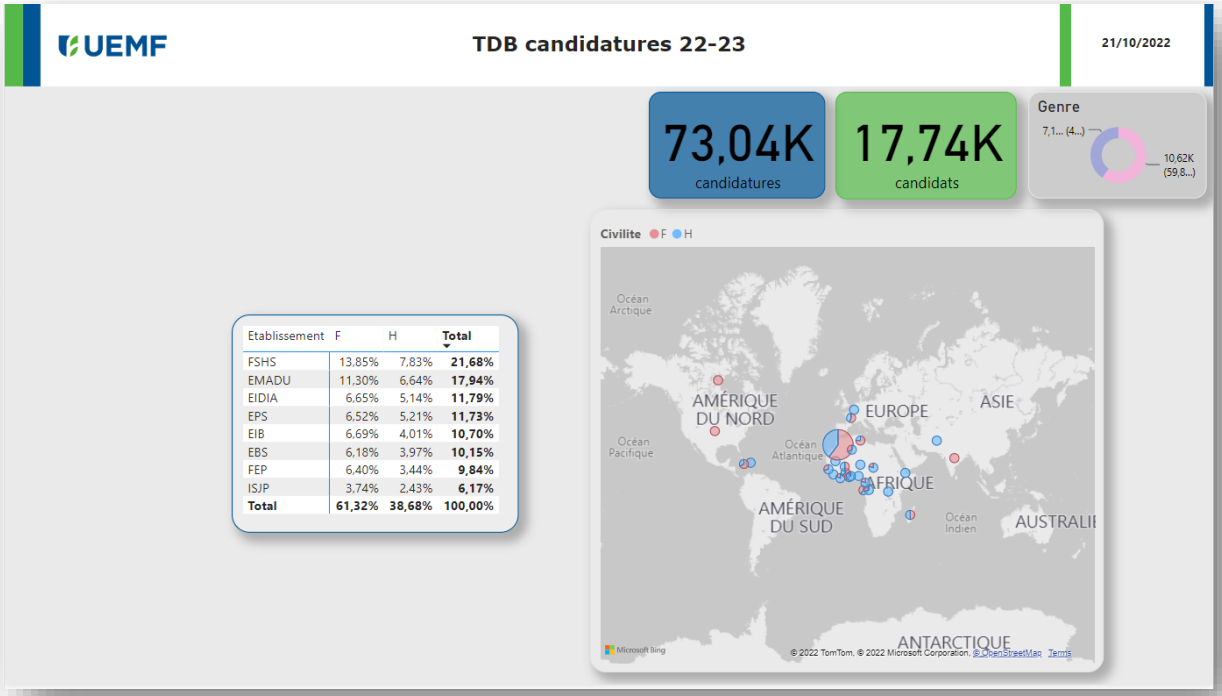

Inclusion: The university has over 3,000 students (54% women) and this number will reach 7,000 by 2026. In 2022-2023, students represent over 30 nationalities: North Africa: Morocco, Algeria, Tunisia, Egypt; Sub-Saharan countries: Senegal, Ivory Coast, Republic of Congo, Benin, Mali, Gabon, Burkina Faso, Comoros, Nigeria, Cameroon, Ethiopia, Tanzania, Togo, Ghana, Guinea, Mauritius, Rwanda; Europe: France, Spain, Italy, Portugal, Ukraine; Americas: Haiti; Middle East: Iraq, Syria. Administrative and teaching members come from 16 different countries: Morocco, Algeria, Tunisia, France, Spain, Italy, Portugal, Ukraine, Poland, Germany, Belgium, Russia, USA, Canada, Peru, Colombia

The goal is not only to train experts who master the most modern knowledge and techniques and technologies, but also and above all to train citizens aware of their rights, their duties and imbued with universal and multidimensional values in terms of openness, living together, knowing how to be, critical thinking and respect for others and the environment. In addition, all our students receive training throughout their studies on soft skills, study skills, life skills, professional skills and entrepreneurial skills.

In addition to its academic and socio-economic role, the University has a social responsibility promoting access to its training programs to a greater number of students through several types of scholarships dedicated in particular to brilliant students from low-income backgrounds and also to students from Sub-Saharan Africa.

Application Tracking for Women + Low-Income Countries

Values

The UEMF:

- is open to the world and promotes the values of inclusion, moderation, tolerance, interculturality and sharing;
- is open to all students and staff, national and international, without discrimination based on origin, family situation, gender, disability or belief;
- is based on equal opportunities;
- advocates gender equality and implements a proactive policy of including as many women as possible as well as people with reduced capacities;
- recognizes and rewards excellence through evaluation at all levels, both top-down and bottom-up;
- promotes critical thinking, rationality, civic values, commitment, a sense of duty and common interest, as well as respect for others and the environment;
- encourages initiative, entrepreneurship, innovation and mastery of languages and cultures;
- has social responsibility and offers scholarships, accommodation and food to the best students from low-income families and sub-Saharan Africa.

UEMF Eco-campus

UEMF has an Eco-Campus designed to the highest international standards with state-of-the-art teaching and research facilities. As part of this, the UEMF campus has been certified by COP22 and selected as a finalist for the International Green Gown Awards 2022.https://www.greengownawards.org/2022-finalists, and awarded the "Responsible Establishment of the Year" label during the 8th edition (2022) of the Francophone Responsible Campus Trophies.https://www.ueuromed.org/en/node/28

Societal policy

https://ueuromed.org/sites/default/files/upload/files/politique-de-luemf-en-matiere-de-responsabilite-sociale-et-societale-version-revisee-2022_0.pdf

The UEMF's societal policy (periodically revised) advocates:

- Equal opportunities in employment, career development, access to education and lifelong learning
- Parity, pay equity: achieve and maintain parity in numbers of men and women, using positive discrimination in cases of equality of profiles and skills,
- Banishment of all discrimination based on social rank, gender, belief, age, ethnic origin, immigration status or disability.
- Welcoming foreign students, particularly from sub-Saharan Africa: offering merit scholarships (accommodation, food, tuition fees, etc.) for better integration, inclusion and success. African students are active and organized within a dynamic association (African day, forums, product exhibitions, arts and culture, sports, etc.) (https://greatyop.com/asric-and-uemf-scholarships/)
- Inclusion of disadvantaged people, people with disabilities and immigrants:

1. all buildings and all premises within the University buildings are accessible to PRM (Persons with Reduced Mobility) and all stairs and elevators are equipped with signage written in Braille for the blind and visually impaired;

2. on all floors and in all areas of the University, sanitary facilities complying with international standards are made available to people with reduced mobility;

3. in all parking areas, specific spaces are reserved for people with reduced mobility and significant fines are applied to anyone who parks there without the right to do so;

4. adapted accommodation is made available to students with disabilities and in cases of severe disability, the University authorizes a family member to stay with the disabled student.

5. a personalized service for the disabled, including a shuttle (transport by electric car) from the campus gate to the teaching rooms. Production of adapted course materials and application of the one-third time rule during assessments;

Gender policy

The University has a Women and Men Equality Charter shared and validated by its authorities.

https://ueuromed.org/sites/default/files/upload/files/charte-egalite-homme-femme-a-luemf_1.pdf

Positive discrimination towards women is applied: access to studies, employment, promotion, high positions, etc.

Discrimination against women or moral or sexual harassment are severely punished.

Discrimination of any kind whatsoever, and especially against women, is prohibited from the practices and operations of the University.

Any person who:

1. making derogatory remarks towards women regarding:

a. physical appearance, b. style of dress, c. manner of being, speaking and behaving

2. disadvantaging women in: a. the exercise of their functions, b. access to responsibilities when they have the required qualifications and skills, c. staff evaluations,

d. the awarding of grades and academic assessments for female students;

3. exercising moral or physical harassment.

UEMF is also a member of the international consortium of universities for gender equality. https://www.ueuromed.org/en/news/various-announcements/luemf-ete-selectionnee-en-tant-que-membre-du-consortium-international

Statistics and Scientific Works on Gender

The female gender constitutes approximately 51% of students with a relatively increasing progression.

Detailed statistics and scientific work on gender are provided in the SDG5 report.

Digital Inclusion

The "Women in Science: AI and the Future" chairhttps://ueuromed.org/en/chaire-iawas born from the collaboration between the Islamic World Educational, Scientific and Cultural Organization, ICESCO and UEMF. It is a chair entirely dedicated to the promotion of science and in particular artificial intelligence among girls and women. Some results were presented at the UNESCO World Conference on Higher EducationWHEC2022.

Prof. Maha Gmira raises the role of AI in learning at the UNESCO World Conference on Higher Education | UEMF (ueuromed.org)

UEMF, partner of the Digital Development Agency (ADD)https://ueuromed.org/actualites/visites/visite-de-la-delegation-de-lagence-du-developpement-digital-luemf is a member of the Moroccan digital academy ACADEMYRAQMYA, which is a national and inclusive e-learning platform offering a rich training catalog in the digital field, for the general public, administrations and businesses: https://academiaraqmya.gov.ma

Criteria and indicators

Non-exhaustive list of strategic criteria and indicators adopted to evaluate the university's societal policy (inclusion and diversity):

- Integration of societal issues into the strategic objectives of the UEMF;
- Existence of a specific action plan;

- Raising awareness among teachers and students about inclusive pedagogy.
- Creation of training modules on gender studies and female entrepreneurship
- Participation in national and international university inclusion networks
- Contribution through research, publications and annual reports on topics related to inclusion, diversity and equity;
- Existence of indicators to assess the impact of action plans;
- Presence of a mediator on social and societal issues: his place in the hierarchy, the size of his team, the transversality of his missionshttps://www.ueuromed.org/equipe-presidentielle/conseiller-du-president-developpement-communication-et-partenariat-afrique
- Presence of an advisor to the President for relations with sub-Saharan African countries
- Participation in national and international labeling competitions;
- Willingness to commit to increasingly restrictive charters;
- Encouragement of student engagement (clubs, sociocultural activities, etc.) Amazigh Day | UEMF (ueuromed.org) https://ueuromed.org/evenements/activites-des-etudiants/visite-du-mellah-la-decouverte-du-patrimoine-judeo-marocain
- Existence of a support unit for students or staff members;
- Existence of a referent, an ethics committee, cells to combat all forms of violence and against discriminatory or harassing acts;
- Rate of scholarship students per year;
- Rate of students from remote areas;
- Parent diversity;
- Rate of students whose parents did not complete their higher education;
- Rate of students with disabilities;
- Student diversity rate;
- Diversity of geographical origin of students;
- Existence of awareness-raising actions on sociocultural inclusion (partnership with local authorities to promote higher education for students from disadvantaged neighborhoods, etc.);
- Compliance with legal provisions relating to the employment of disabled people;
- Disability accessibility of internal information systems & Disability accessibility of signage on campus;
- Possibility of teleworking and distance learning;
- Diversity of languages spoken within the UEMF: Arabic, English, French, Amazigh, Spanish, Chinese, African languages;
- Strengthening staff capacity for training and support.

Support for students with specific needs

Make training accessible to people with disabilities.

Moodle

Possibility of:

- asynchronous training and take advantage of delayed course materials.
- secondly, ask the trainer about the content of the materials.

Coursera Offer

Support for accessibility policy for people with disabilities or learning difficulties.

Solidarity actions during the Covid period

The university, supported by its partners (EU, EIB), provided scholarships, laptops and 4G modems with internet subscriptions to enable students from disadvantaged backgrounds to follow, without difficulty, the distance learning provided by the University during the Covid period. This action allowed students from vulnerable families to continue their education in optimal conditions and contributed to the sustainability of digital pedagogy.https://ueuromed.org/en/actualites?field_category_target_id=62

Other actions promoting inclusion

- Production of an institutional video intended for the public in sub-Saharan Africa with the participation of the partner Event Advisor.
- Annual organization of African Week in the presence of ambassadors
- Organization of the "Laser Tag Party" event for children with reduced mobility.

- Support for: associations, orphanages, public hospital infirmaries, etc. through donations of food, equipment, clothing, etc. and the organization of socio-educational events or the development of spaces and premises
- Through several agreements, the UEMF acts as a partner and a fundamental player in the socio-economic development of the region.https://ueuromed.org/en/actualites?field_category_target_id=58

Observed impacts of the policy to combat inequalities

- Equal opportunities
- Change in attitude and behavior towards inclusion
- Academic success
- Socio-professional integration
- Capacity building for students and academic and administrative staff
- Partnership with NGOs and national and international inclusion networks
- Problem solving by the mediator team
- Improving services for students or staff with special needs
- Team spirit and good governance (transparency, accountability)
- Pleasant living and working environment
- National and international influence following the multiple awards and labels obtained by UEMF (responsible innovation, responsible campus, professional equality)

In conclusion, a fine example of the fight against inequality is presented in the video showing the emotion of a father with a modest income and living in an arid geographical area far from the center, whose son was accepted to study engineering at UEMF with a scholarship covering all his needs:https://www.youtube.com/watch?v=T4G3nlIYPgs&ab_channel=PACCMorocComp%C3%A9titivit%C3%A9etcroissanceverte

Reproducibility

Reproducibility of the results achieved is possible with adaptation to the local context in the MENA region and sub-Saharan Africa.

- Adaptations depend on the size of the partner institution and its motivation
- A fund initiated by the UEMF Foundation aims to finance student and/or staff projects and to support the transfer to partners around diversity and inclusion.
- Provision by the local authorities of 2 Riads in the medina of Fez (open-air school) for transfer and replication of experiences between students and artisans https://ueuromed.org/actualites/visites/visite-de-deux-riads-mis-la-disposition-de-luemf-par-une-delegation-accompagnee
- Awareness and training seminars were organized for the benefit of certain partner universities in Morocco (Soltane Moulay Sliman in Beni Mellal city) and in sub-Saharan Africa (Yaoundé 2 Cameroon, Gaston Berger Senegal)

Other actions 2022/2023

Artistic social action December 2022

The Rotaract club organized a social action for the benefit of autistic children from the Assabah association who benefited from a series of educational and fun artistic workshops and activities.

On December 10, the Lions Club participated in a social event at the Fez Child Protection Center.

Round table on the theme “Immigration: Cross-cutting Facets” January 23, 2023

On February 23, 2023, the IESJP held a round table on: "Immigration: Cross-Facets". This scientific event was hosted by:

Mustapha MERIZAK, sociologist: "The struggles of Moroccans in France from the colonial era to independence."

Khalid MOUNA, anthropologist: "Moroccan skills, can we count on the emotional connection?"

Pierre OYONO MVOGO, doctoral student at the Institute: "Regional integration and free movement in Africa: Myth or reality?"

https://ueuromed.org/actualites/congres-et-colloques/table-ronde-autour-du-theme-limmigration-facettes-croisees

Amazigh Day February 22, 2023

The Tawesna Fez club organized an Amazigh theme day on February 15, 2023. This rich day, both cultural and artistic in nature, aimed to promote Amazigh culture through an exhibition of books, carpets and crafts, an Ahidous animation with the Amasasa troupe as well as performances of contemporary songs representing the different regions and facets of Amazigh culture.

The event was an opportunity to showcase the cultural richness of Morocco to members of the UEMF community and to various students from several countries around the world.

UEMF organizes a ftour in honor of its foreign students April 3, 2023

During his speech, the President of Euromed University, Mostapha Bousmina, noted that students and lecturers currently represent 43 nationalities who meet every day on campus, work together and some are shaping a common future.

He then reviewed the university's major projects, whose surface area will soon increase from 50 hectares to 120 hectares with the construction of a university hospital, a faculty of

medicine which will be operational from next September, a faculty of dentistry and a nursing training center.

He also mentioned the Fez Smart Factory project, based on Industry 4.0, which will be completed soon, as well as the second phase of the campus, which includes a conference center that can accommodate around 3,500 people, a large library, a sports complex with an Olympic swimming pool and a FIFA-standard football pitch, in addition to shops, a mini-market, bookstores, cafes and restaurants, a beauty salon, a pharmacy, etc.

2nd edition of African Week: UEMF celebrates Africa differently! May 25, 2023

After a successful first edition in 2021, the Euromed University of Fez is organizing African Week on May 24 and 25, 2023.

This year's highly anticipated event coincides with World Africa Day and celebrates the dialogue, richness and diversity of our continent by featuring numerous cultural, scientific, artistic and recreational activities.

Through these events, the Euromed University of Fez continues to play its role as a place of meeting and intercultural exchange between the two shores of the Mediterranean with a natural extension towards Sub-Saharan Africa in perfect harmony with the Clairvoyant Vision of His Majesty King Mohamed VI.

This event, which is part of the University's strategic vision aimed at promoting exchange and the values of sharing and coexistence, constitutes an opportunity to communicate and reflect together on the challenges and opportunities linked to Africa.

This edition adopted a rather varied program including a day dedicated to artistic animations performed by dance groups from different countries and a screening of the film "The boy who harnessed the wind". Followed by a second day animated by musical performances, artistic parades, conferences, round tables, exhibitions and to finish in style, an "African night" evening performed by UEMF students.

2024: Euromed University of Fez at the heart of action for the SDGs

Promoting community health and human well-being

"January 31, 2024, we had the privilege of collaborating with the Blood Transfusion Center and the Sidi El Hadi Kriou Youth Center in Zouagha during an unforgettable charity event! Our main objective was to promote community health and well-being by encouraging a sense of solidarity among the youth of our region.

https://www.instagram.com/p/C3YebETMor5/?igsh=MzRlODBiNWFlZA==

Promoting the Health and Well-being of Children with Disabilities

Sharing joyful moments with our Hands UEMF Club team, celebrating diversity and joy with the children of the Prince Moulay Abdellah Foundation - Space of Hope for children with special needs. A morning filled with games, music, and laughter with these extraordinary children.

https://www.instagram.com/p/C3YebETMor5/?igsh=MzRlODBiNWFlZA==

Organization of a day at the retirement home

“An emotional day at the retirement home. We were touched and inspired by our elders as we spent time with 151 residents, listening to their stories and thoughts, often filled with nostalgia and sadness. Although it was sometimes difficult to hear their poignant stories, we were deeply moved by their wisdom and kindness.

In the privacy of the retirement home, we shared unique moments of connection and camaraderie. Together, we laughed, danced, sang, and shared a warm meal. These precious moments of sharing will remain etched in our memories forever, reminding us of the richness and depth of human relationships.

We would like to express our gratitude to our elders for their warm welcome and generosity. Their presence brightened our day and reminded us of the importance of intergenerational solidarity.

https://www.instagram.com/p/C38MWX3s4iu/?igsh=MzRlODBiNWFlZA%3D%3D&img_index=4

Organization of a humanitarian caravan

"On December 9, the Lions/Leos of Fes spread the warmth of Winter to the Warmth of Tawnat Thar Esouk, which was transformed into a festive haven, illuminated by generosity and solidarity.

Amidst the bursts of laughter from children playing soccer and singing, our action came to life around the gaming tables, providing warm clothing to families, wrapping them in warmth for the coming winter.

This day, etched in the memories of Tawnat, more precisely Thar Esouk, was much more than a celebration. It was a shining demonstration of the Lions/Leos spirit, where joy blends with social action, creating a web of solidarity and friendship in the heart of winter.

https://www.instagram.com/reel/C0xP8T4sqc5/?igsh=MzRlODBiNWFlZA%3D%3D

Enriching Stay at UEMF: A Cultural, Sports and Recreational Immersion for Students of the Aghbalou Association

From May 29th to 31st, the Euromed University of Fez had the pleasure of welcoming around fifty students from the Aghbalou Association as part of the Fez Sacred Music Festival. During these three days, the students stayed at the UEMF university residence. A rich and varied program was offered to them, aimed at enriching their cultural and educational experience. They had the opportunity to visit the old medina of Fez, discovering the historical and cultural heritage of the city, and to attend the various performances of the festival, enjoying the musical and spiritual diversity of artists from around the world.

In addition to cultural activities, the students also explored the Euromed University of Fez during a guided tour, which was followed by sports activities in the UEMF's modern facilities. On the last day, before taking the train back to Marrakech, the students spent some time relaxing and entertaining in a Virtual Reality gaming space, offering an immersive gaming and relaxation experience. This stay, organized annually for the association's students, provides an enriching experience, combining cultural discovery, sports, and recreation.

Harmonies and Colors: Success of the 6th Edition of the UEMF Talents Show

Euromed University of Fez showcased the talents and creativity of its students during the 6th edition of its flagship event, the UEMF Talents Show, on Thursday, April 25. The event was an opportunity to celebrate diversity and creativity within the UEMF community, highlighting a variety of artistic talents, from music and dance to poetry and live painting.

Under the watchful eye of a jury of experts, including renowned personalities such as Ms. Nabila Maane, Ms. Nejjari Latifa and Mr. EL Alaoui Abdelouahab, the participants competed in daring to win the coveted prizes.

The evening's participants dazzled the audience with their performances. Ismail El Ayachi moved the audience with his cover of Abdelhalim Hafez's song "Ahwak," while Pitake Maureen Glaubert captivated the audience with her rap. Imane Essaber, accompanied by the group Umusic Academy, also caused a stir with a musical composition. Participant Imane Zguida was honored with a special jury prize for her poetic performance.

This evening embodied the richness and vitality of art in all its forms, reflecting UEMF's commitment to the cultural development of its student community.

Towards equitable Universal Health Coverage: Focusing on the contribution of nurses

On April 18, 2024, the Euromed Faculty of Nursing and Health Technology at the Euromed University of Fez organized the 2024 edition of the African Conferences, in partnership with SIDIIEF. This event brought together health experts from several African countries to discuss the challenges of Universal Health Coverage (UHC) in Africa. The discussions highlighted best nursing practices and innovations, as well as challenges and solutions to improve access to healthcare on the continent. Interactive panels and networking sessions allowed participants to share their experiences and strengthen their commitment to promoting equitable and sustainable UHC in Africa, while highlighting the importance of international collaboration to address these challenges.

Participation of Professor Mostapha Bousmina at the International Conference in Rome: training and social cohesion

On March 13, 2024, an event entitled "Higher Education and Social Cohesion for Managing International Demographic Dynamics" was organized in Rome, at the Sistine Chapel, by Multiversity, Pegaso Digital University, and MEDEA. The event brought together influential figures, including Italian President Sergio Mattarella, Maltese President Marie-Louise Coleiro-Preca, and European Commission Vice-President DubravkaŜuica.

Professor Mostapha Bousmina, President of the Euromed University of Fez (UEMF), participated to highlight the importance of cooperation between Europe and Africa in education and vocational training. Luciano Violante, President of Multiversity, emphasized the role of digital universities in promoting skills, social inclusion, and sustainability. Emphasis was placed on the importance of digital training in preparing young African generations to contribute to socio-economic development.

This commitment reflects UEMF's priorities, focused on inclusion, innovation and digital technology, to strengthen training and research.

Roundtable: The Empirical Realist School of Law at the Intersection of Law and CSR

The Euromed Institute of Legal and Political Sciences organized a roundtable discussion on March 11, 2024, on "The Empirical Realist School of Law at the Intersection of Law and CSR," moderated by Dr. Duma Martin (Laval University) and moderated by Prof. Hasna Slamti (Euromed University of Fez). The event explored the empirical realist approach to examining labor law and protective law, emphasizing the importance of collecting empirical data to answer legal questions. The discussions presented four models of corporate social responsibility (CSR)—accompaniment, engagement, elucidation, and opposition—that illustrate the interactions between state law, efficiency, and effectiveness. The roundtable also introduced students to the concept of "consumocratic law," where consumers exert influence over companies through societal marketing.

UEMF celebrates International Mountain Day differently

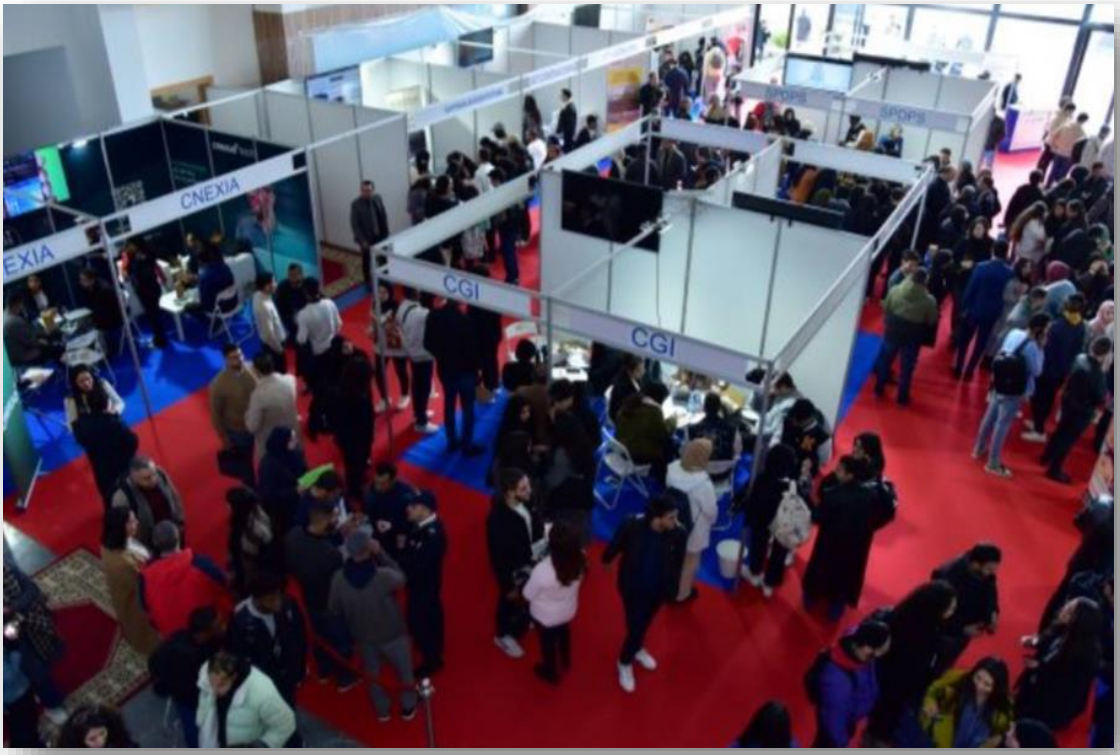

On March 1, 2024, the Euromed University of Fez organized an international conference entitled "Restoring mountain ecosystems: the case of the Fez-Meknes region," in collaboration with several partners, including the Institute of Legal and Political Sciences (ISJP) and the African Network for Sustainable Development (RA2D). The event, organized in conjunction with International Mountain Day, addressed the challenges of restoring mountain ecosystems, in line with the initiative of the United Nations Decade on Ecosystem Restoration (2021-2030).

Over two days, the conference brought together experts, researchers, and field stakeholders to discuss ecological issues and sustainable development in the mountains through panels focused on the social, economic, and political challenges of this theme. The second day took place in the municipality of Tazouta, with practical activities such as hiking, awareness-raising workshops, and local product exhibitions. This edition highlighted the importance of preserving mountain ecosystems while involving local populations and strengthening the solidarity economy.

Euromed Career Day: UEMF strengthens its links with the socio-economic world

On February 28, 2024, Euromed University of Fez hosted the second edition of Euromed Career Day at its Eco-campus, bringing together a wide range of companies and human resources professionals. This event aims to facilitate the professional integration of students and graduates by opening doors to the job market. Participating companies included Webhelp, Attijariwafa Bank, Bank of Africa, Safran Aerosystems, and Huawei.

The forum began with a roundtable discussion on the theme of artificial intelligence and its impact on employees in Africa, featuring experts from various sectors. The event also allowed students to interact with recruiters, attend workshops on soft and power skills, and participate in individual interviews. Students from various backgrounds, such as health, artificial intelligence, architecture, and the humanities, had access to coaching programs and professional opportunities. This edition was a great success thanks to the diversity of its activities and the constructive exchanges between recruiters and students.

Between tradition and modernity: what path for Morocco? » Conference by Dr. Rachid ACHACHI

As part of the conference cycle, this Wednesday, February 28, 2024 was marked by a conference by Dr. Rachid ACHACHI around the theme "Between tradition and modernity: what path for Morocco?" within the Eco-campus of the Euromed University of Fez.

During this afternoon, students from various institutions of the University attended a session of reflections from the fields of sociology and ethnology. The speaker took the opportunity to elucidate the distinction between tradition, modernity, and modernization. Mr. ACHACHI also defined archeo-modernity, which is an approach aimed at understanding contemporary society and culture by examining its structures.

With the aim of making this meeting a place for constructive exchange and collective production of knowledge, the audience was able to participate in an enriching debate on the different aspects discussed during this conference.

Conference by Mr. Ghazi Gherairi: What alliances for what world in 2024?

As part of its conference cycle, the Euromed University of Fez organized a meeting led by Mr. Ghazi GHERAIRI on February 7, under the theme "What alliances for what world in 2024?" Mr. GHERAIRI, a doctor of public law and former Tunisian Ambassador to UNESCO, led a collective reflection on the alliances of civilizations and the need for a new, more just and united world order, taking into account the diversity of contemporary societies.

During this conference, Mr. Gherairi addressed crucial issues related to international relations, including the climate crisis, humanitarian crises, and the emergence of new technologies. He emphasized the importance of constructive dialogue and international cooperation to address these challenges and build a peaceful world.

The event also provided an opportunity for students of the Master's program in "Conflict Management and the Alliance of Civilizations" to engage directly with the speaker on the topics discussed. This meeting is part of the activities of the Alliance of Civilizations Chair, created during the United Nations Alliance of Civilizations World Forum in November 2022, with the aim of stimulating reflection and intellectual exchange among UEMF students.

FRANCO-GERMAN VISIT: Opportunities for partnership and cooperation between Europe, Morocco and Africa

On January 30, 2024, the Euromed University of Fez welcomed the Ambassadors of France and Germany to Morocco, Mr. Christophe Lecourtier and Mr. Robert Dölger. After a presentation by the President of the UEMF, Prof. Mostapha Bousmina, on the University's missions in terms of intercultural dialogue and cooperation between the two shores of the Mediterranean, the guests visited the Eco-Campus and its technological facilities.

The ambassadors then shared their views on European foreign policy towards Morocco, addressing political, economic, and security aspects. They also discussed Europe's role as a reliable partner for Africa. This event provided an opportunity for students and lecturers to discuss ways to strengthen cooperation between Morocco, France, and Germany to promote peace and security in the region.

Information and orientation week for students at GSU Jean-de-La-Fontaine

In order to promote its training offer and the wide range of professional courses providing access to it, the Euromed University of Fez is taking part in a week of information and guidance for students of the GSU Jean-de-la-Fontaine in Fez, as well as their parents.

The opening speech was delivered by Professor Taoufik OUAZZANI CHAHDI, Vice-President in charge of Academic and Cultural Affairs at UEMF, who presented the program for the coming week, emphasizing the importance of the presence of the university teams within the GSU.

The goal of this initiative is to create a meaningful opportunity to inspire, inform, and engage the next generation of students. By providing information, guidance, and insights into academic and career opportunities, the goal is to guide students on their educational journey while motivating them to explore new and exciting horizons.

The week includes several components, including workshops led by UEMF teachers, covering the university's various teaching fields such as health, engineering and architecture, as well as humanities and social sciences. Also on the program are tours outside the GSU premises, videoconferences led by alumni, and discussion spaces available for parents.

Euromed Innovation Center: UEMF inaugurates its new innovation center (EIC)

The Euromed University of Fez has announced the creation of the Euromed Innovation Center (EIC), a support structure dedicated to the creators of innovative projects. The selection committee evaluates projects based on their scientific and innovative nature, as well as the technical, entrepreneurial, and managerial skills of the project leaders.

The EIC aims to provide personalized support throughout the business creation process, including inspiring events, diverse training, and privileged access to university resources. This center positions itself as a catalyst for innovation, both regionally and nationally, contributing to the importance of universities in the technological and entrepreneurial landscape.

Labeled by "Tamwilcom" among the four SAP structures at the national level in the "Ideation" segment, the EIC allows project leaders to access programs such as "Tech Start" and "Tech Boost", thus reinforcing the center's commitment to transforming innovative ideas into successful startups.

EMADU: “Faces & Faces” Exhibition

The Euromed School of Architecture, Design, and Urban Planning (EMADU) illuminated its spaces with the "Faces & Faces" exhibition. Showcasing the artistic talents of first-year Architecture and Design students, this exhibition captivated visitors by immersing them in a vibrant and striking visual world. Each canvas on display was a window onto the soul, where gazes, smiles, and frozen expressions testified to the richness and complexity of human beings.

She celebrated the uniqueness of each person and appreciated the richness of the human condition. EMADU students showcased their talent by creatively and sensitively capturing the complexity of the human soul through these inspiring portraits. This visual experience certainly touched the minds and hearts of visitors, inspiring them to reflect on the diversity and beauty behind every face.

Cooperation and Strategic Alliance between UEMF and EMUNI

As part of their commitment to the objectives of the Euro-Mediterranean Partnership, the Euromed University of Fez (UEMF) and the Euro-Mediterranean University (EMUNI) agree to enter into a strategic alliance to promote the flow of knowledge between the shores of the Mediterranean and to cooperate within the framework of this agreement. They will encourage long-term mutual cooperation in the fields of higher education, research, and innovation in order to consolidate the Barcelona Process, which, in a broader sense, is also integrated into the Union for the Mediterranean.

The Parties will promote the dissemination of knowledge through joint educational, cultural, and scientific activities. To this end, they will use instruments such as joint applications for and implementation of international scientific and technical projects, the development and implementation of joint or dual study programs, and the exchange of students and academic and administrative staff. Other initiatives will include the exchange of expert and research missions, the development of modules in Euro-Mediterranean studies, and the launch of strategic courses. They will also engage in science diplomacy, the expansion of joint academic offerings, the organization of scientific events, and the joint use of educational and scientific resources, as well as any other cooperative activities agreed upon by the Parties.

Third Entrepreneurship Training Workshop of the Link Up Africa Program at UEMF

On July 17 and 18, 2024, the Euromed Innovation Center (EIC), an innovation center at the Euromed University of Fez, hosted its third entrepreneurship training workshop as part of the Link Up Africa pre-incubation program. Funded by the European Union and implemented by AMCI and the Belgian agency Enabel, this event aims to support project leaders in creating their businesses, whether in Morocco or in their native country for students and graduates from sub-Saharan African countries.

At the heart of this training, participants explored value creation and structuring their business model. They also honed their pitching skills, essential for capturing investors' attention. The intensive sessions, led by EIC experts and mentors, enabled budding entrepreneurs to refine their value proposition, develop their presentation skills, and build a solid business model.

This workshop offered a unique opportunity for students and winners to prepare their projects for pitch sessions in front of a panel of experts. The best projects will be selected to join the pre-incubation program, an invaluable opportunity for young entrepreneurs to turn their ideas into reality.

[Integration Week] Dynamic Welcome Week Starts at UEMF

Euromed University of Fez is delighted to announce the organization of its traditional Integration Week, which will take place from September 17 to 21, 2024. This event, specially designed for new students, aims to facilitate their transition to university life and promote a community spirit within the Eco-campus, a favorable setting for successful integration.

During this week, numerous activities are planned, ranging from information sessions on the services offered by the university to personal and professional development workshops. Thematic lectures, led by renowned professors and professionals, will offer students a better understanding of the academic and professional challenges that await them.

At the same time, recreational and sporting activities will complement this program, fostering cohesion between newcomers and alumni. These friendly moments will allow everyone to build relationships and immerse themselves in the values of openness, diversity, and excellence that characterize UEMF.

This week represents a unique opportunity for students to start their university career in the best possible conditions, surrounded by a caring and dynamic community.

International Conference in Fez: Health of Refugees and Migrants

On October 29-30, 2024, Euromed University of Fez hosted an international conference dedicated to the health of refugee and migrant populations, organized in partnership with IOM, WHO, and UNHCR. This event brought together more than 150 participants representing ministries of health, researchers, academics, and civil society actors from various countries. The conference addressed the health challenges facing migrants and refugees and shared best practices from the MENA region.

Professor Chakib Nejjari, Vice-President of UEMF, highlighted the university's commitment to ensuring equitable access to healthcare, particularly for vulnerable populations. The WHO representative in Morocco, Ms. Maryam Bigdeli, reiterated that universal health coverage is essential to eliminate barriers to care and promote equity. Recommendations were made to improve access to healthcare for migrants, including the digitalization of medical records and South-South cooperation.

Funded by the Finnish Ministry of Foreign Affairs, this initiative aims to strengthen health policies for migrants in the region and promote coordinated action between countries of origin, transit and destination.

Franco-Moroccan Conference on Business Law

The conference, co-organized by the Euromed University of Fez (UEMF) and the Law and Commerce Association, under the theme "Franco-Moroccan Cross-Perspectives on Business Law," brought together renowned experts from both shores of the Mediterranean to discuss contemporary legal issues in business law. This event highlighted Franco-Moroccan collaboration and provided a valuable platform for exchanging views on legal practices, particularly in the areas of arbitration, contract law, and financing.

The opening ceremony was marked by speeches by prominent figures, such as Professor François-Xavier Lucas, Director of the Sorbonne Law School's outsourced program at UEMF, and Mr. Antoine Diesbecq, President of the Law & Commerce Association. The presence of Mrs. Carine Foeller Viallon, Consul General of France in Fez, as well as numerous jurists, lawyers, and researchers, reinforced the international and academic dimension of the event, highlighting the importance of cooperation between France and Morocco in the legal field.

Conference at UEMF: Art Therapies and Cultural Inclusion with ICESCO

The Euromed University of Fez (UEMF) was honored to host the "World Thinkers Invited to ICESCO" conference, bringing together international experts in art therapy and music therapy. This event, organized in partnership with the Islamic World Educational, Scientific, and Cultural Organization (ICESCO), addressed key issues surrounding art therapy, cultural inclusion, and the rights of people with disabilities.

Speakers included renowned figures such as Professor Emeritus Edith Lecourt, a pioneer in music therapy and founder of university art therapy programs, and André Fertier, a fervent defender of cultural rights. The program included lively lectures and discussions, focusing on art therapy training methods, music therapy as a cultural therapy, and the importance of ensuring access to artistic culture for all.

The event, which took place at the UEMF premises before continuing in Rabat, demonstrates the Euromed University of Fez's commitment to promoting inclusive culture and well-being through the arts.

Morality and Ethics: A Reflection with Pr. Rachid ACHACHI

The Euromed University of Fez's lecture series continues with a new, exciting session led by Professor Rachid ACHACHI, faithful to his habit of intellectual exchanges with students and faculty.

During this conference on November 20, 2024, Prof. ACHACHI addressed the theme "Morality and Ethics," exploring the links between moral principles and contemporary ethical challenges. Through an in-depth reflection, he invited participants to reflect on the foundations of morality and ethical issues in today's world, while emphasizing the importance of these concepts in building a just and equitable society.

As usual, this meeting provided a stimulating framework for dialogue and the exchange of points of view, thus enriching the academic experience of the students and teacher-researchers present.

Doctoral Thesis Defense in Political Science by Mr. Muhammad Reza SULEIMAN

“Transregionalism and National Interest: An Analysis of the Challenges and Opportunities of Morocco’s Membership of ECOWAS”.

Morocco's bid to join ECOWAS, initiated in 2017, has encountered several challenges despite initial support. This thesis examines the interests and concerns of ECOWAS member states that shape the accession process. It highlights Morocco's strong historical, cultural, and economic ties with West Africa, but also notes that national interests, identity concerns, and the lack of a legal framework hinder its membership. The study argues that Morocco offers strategic advantages—such as infrastructure, security cooperation, and economic development—and recommends enhancing diplomatic efforts, aligning trade policies, and using soft power. Ultimately, it suggests that Morocco's inclusion could reshape African regionalism by prioritizing economic cooperation over traditional geographic boundaries.

An exceptional evening in tribute to Frank Sinatra

The Euromed University of Fez, in partnership with the Royal Symphony Orchestra, recently orchestrated an exceptional musical evening, celebrating the timeless legacy of Frank Sinatra. This event, marked by elegance and emotion, brought together an audience of music lovers who came to savor the greatest classics of Ol' Blue Eyes..

At the heart of this performance, the Royal Symphony Orchestra's Jazz Band, accompanied by renowned vocalist Sergey Arkhipov, delivered masterful performances that captivated the audience. The performer's warm voice, combined with the musicians' virtuosity, brought iconic songs such as "Fly Me to the Moon," "Sway," and "New York" to life, transporting the audience to the heart of the great jazz scenes that defined the 20th century.

Through this event, the Euromed University of Fez once again confirms its commitment to promoting culture and the arts, offering the university community and the general public exceptional moments that nourish the soul and spirit..

The French Institute of Fez and the Euromed University of Fez strengthen their partnership

The Euromed University of Fez (UEMF) welcomed Ms. Carine Foeller Viallon, Consul General of France in Fez, to formalize the renewal of the partnership agreement with the French Institute of Fez. This agreement aims to strengthen language teaching with certification through the UEMF language center, in line with academic and professional needs.

The collaboration also includes joint cultural programming for the university community and the general public. Thanks to its modern infrastructure, such as a 2,000-seat agora and cultural spaces under construction (theatre and cinema), the UEMF is positioning itself as a major player in educational and cultural cooperation. This partnership illustrates the shared commitment to intercultural dialogue and the influence of Franco-Moroccan cooperation..

[Tribune] Wage inequality in Morocco: three months of “free” work for women

According to a report by the High Commission for Planning, published in 2024, the wage gap between men and women reached 23%. This means that in 2024, Moroccan women symbolically worked "for free" from October 8 until the end of the year. This observation highlights the urgent need for concrete action to reduce these inequalities and ensure true pay equity. This represents nearly three months of unpaid work compared to men, an alarming inequality that remains largely ignored in the public debate.

Screening-debate with Filmmaker Abd Elilah El Jouahri at the UEMF

As part of its Conference Series, the Euromed University of Fez welcomed, on Wednesday, April 9, 2025, the Moroccan filmmaker Abd Elilah El Jouahri for a screening and debate around his film The Slave, produced in 2023.

A director, film critic, and President of the Union of Moroccan Directors and Authors, Mr. El Jouahri also holds a PhD in cinema, focusing on "Space in Cinema through Examples of Moroccan Films." He is the author of several reference works, including "Cinema of Developing Countries Between Marginalization and Self-Assertion" and "Ouarzazate, a Space for Cinema." His cinematic work includes numerous award-winning fiction and documentary films, including "The Dancer," "Water and Blood," "Rajaa, the Daughter of the Mellah," "Hala Madrid, Visca Barça," "The Window of Paradise," and "The Wedding of Si Tayeb."

His latest film, The Slave, boldly addresses the issue of voluntary enslavement through the journey of Ibrahim, a young man in search of a master. The power of the story also lies in the performances of its actors, notably Saad Mouaffak in the lead role, accompanied by Omar Lotfi, Sahar Seddiki, Naima Ilyas, Ismail Abou-El-Kanater, Mohamed El Atir, and Hajar Chergui.

The meeting concluded with a rich exchange with the students, teachers and guests present, around the themes raised by the film and the contemporary issues of Moroccan cinema.

[Tribune] Donald Trump's reciprocal customs duties, "A clear challenge to the spirit of the Morocco-United States Free Trade Agreement"

A promise is a promise. On April 2, Donald Trump released his much-feared "reciprocal tariffs" announced in February. To usher in what he calls his "declaration of economic independence" and usher in "the golden age of the United States," the 47th president in the country's history imposed an import duty on his economic partners for every product crossing U.S. customs.

"Foreign leaders have stolen our jobs, foreign leaders have ransacked our industries, and these scavengers have ripped apart our American Dream. We will produce the cars, boats, potato chips, planes, minerals, and medicines we need right here in the United States," he said, illustrating the ultra-protectionist policy he has been pursuing since taking office.

Ode to Mathematics: Moroccan Day of Mathematics Worthily Welcomed by UEMF

The Moroccan Day of Mathematics (MDM) was held on April 19, 2025, at the Euromed University of Fez, bringing together nearly 800 participants around the theme "Mathematics as a vector of development." Co-organized with several scientific institutions, the event celebrated the excellence of Moroccan research in mathematics and highlighted the international recognition of Moroccan researchers and students in this field.

The day featured interactive workshops, lectures, and a keynote address by Professor Abdelhaq El Jai, a specialist in distributed systems. The MDM also emphasized the importance of democratizing mathematics, inspiring young talent, and promoting the dissemination of scientific knowledge in a spirit of openness, rigor, and innovation.

UEMF welcomes the 3e edition of the National Para-Karate Kata Open

The Euromed University of Fez had the honor of hosting, on Wednesday, April 16, 2025, the third edition of the National Para-Karate Kata Open, organized in partnership with the Mohammed VI National Center for the Disabled, on the occasion of the National Day of People with Disabilities.

In an atmosphere marked by respect and determination, the Euromed Sports Complex was adorned with the dazzling white kimonos of these young athletes from all over the Kingdom. Fifty athletes with disabilities delivered impressive demonstrations, embodying both the discipline of karate and the power of perseverance.

Through this initiative, the UEMF reaffirms its strong commitment to inclusion, diversity, and sport for all. This sporting and educational event provided a wonderful showcase for the talents of these champions and helped raise awareness within the university community about the issues of accessibility and equal opportunity.

Euromed University would like to thank all the supervisors, guides, referees and volunteers who contributed to the success of this event, as well as the regional sports delegations for their mobilization.

Cancer awareness in Sain by the Hands club

The event involved a visit to the Ziyat Child Protection Center for Girls, with the aim of providing advice and raising awareness about breast cancer prevention. It was a memorable and joyful experience, marked by enriching exchanges with the young girls on site, meaningful conversations, and the sharing of valuable advice to help them protect themselves. An unforgettable day, filled with laughter, connection, and kindness.

Bouhouda Medical-Dental Caravan: July 5-7, 2024

Key points:

- Specialties covered: general medicine, pediatrics, cardiology, gynecology, radiology, ENT, rheumatology, gastroenterology, pharmacy and dentistry.
- Additional activities: free distribution of medicines and awareness-raising workshops. This action had a significant impact by providing quality care to a remote rural community.

Organized in the Taounate region, this caravan enabled more than 1,400 medical and dental consultations to be carried out thanks to collaboration with the health delegation and the APSMIRS association.

https://www.instagram.com/p/DABLDm4Mtxg/

Breast Cancer Awareness Workshop: October 19, 2024

As part of Pink October, the Elite Club organized a breast cancer awareness workshop at the Avicenne Clinic in Fez. This workshop, led by Dr. Guennoun Ahmed, a specialist in gynecology, obstetrics, and infertility, brought together 20 students from Euromed University. Dr. Guennoun addressed key topics such as the importance of self-examination for early cancer detection and best practices for regular screening. Through clear explanations and interactive demonstrations, participants were able to acquire practical knowledge while sharing their questions in a friendly atmosphere. The workshop was very enriching thanks to the speaker's expertise and the dynamic discussions, providing both an educational and entertaining experience. The students expressed their satisfaction and their intention to share this knowledge within their communities.

Preventive screening day in Moulay Yaakoub for breast and cervical cancer

In partnership with the Moulay Yaakoub delegation, the Elite Club organized a preventive screening day dedicated to breast and cervical cancer. This event aimed to raise awareness in the local community about the importance of early detection to improve treatment and survival rates.

Key points:

- 68 peoplewere examined during free clinical consultations and examinations.
- 2 womenshowing signs of breast cancer were immediately referred to the Fez University Hospital for in-depth diagnosis and rapid treatment.
- Adviceon prevention and the importance of regular check-ups.

This initiative provided essential medical services to rural populations, detected critical cases early and increased awareness of cancer prevention.

UEMF Elite Club Report

Hamria-Settat Medical-Dental Caravan: October 25-27, 2024

The Elite Club, in partnership with the Sahwa Association and the NGO Neya Charity, organized a medical-dental caravan in Hamria from October 25 to 27, 2024, offering free care to the local population. A total of 1,463 consultations were carried out, spread across various specialties. Details of Consultations: General Medicine: 300 consultations Ophthalmology: 200 consultations Dentistry: 130 consultations Cardiology: 80 consultations Gastroenterology: 120 consultations Pediatrics: 210 consultations Rheumatology: 140 consultations Gynecology: 70 consultations The event provided essential medical care to rural and vulnerable populations. It also helped raise awareness among residents about the importance of prevention. The success of this caravan illustrates the Elite Club's commitment to improving local health conditions.

https://www.instagram.com/p/DBuBzbUNULu/

Blood Donor Day: November 14, 2024

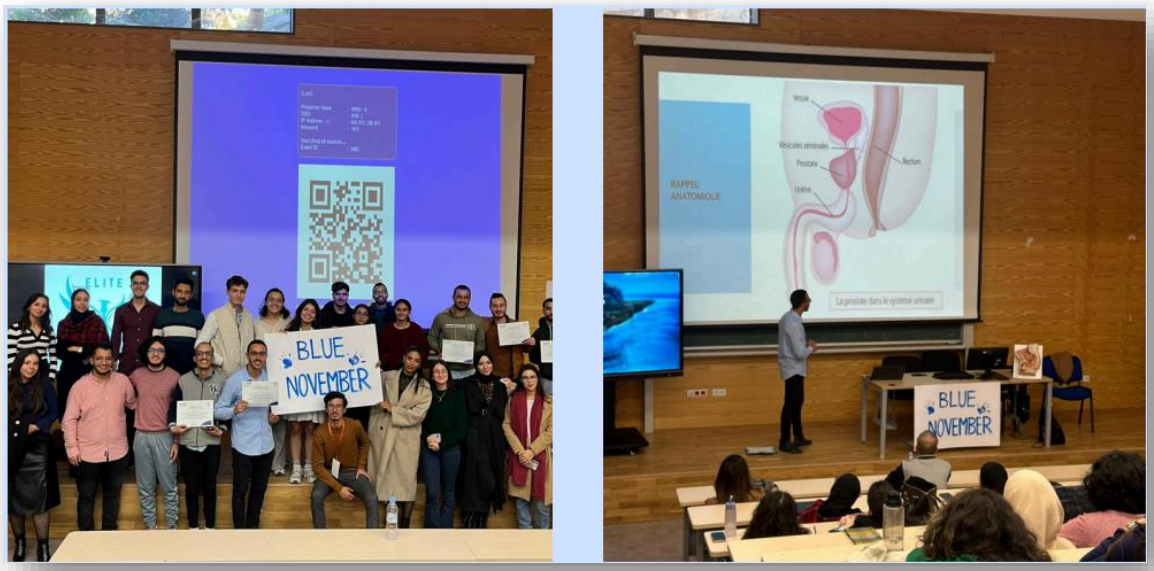

The Elite Club, true to its humanitarian vocation, organized a blood drive day on November 14, 2024, in partnership with the Blood Transfusion Center and the Moroccan Volunteer Corps. This event was held at the Euro-Mediterranean University of Fez and was part of an effort to raise awareness among the university community about the importance of blood donation, a simple but fundamental act that can save lives. During this day, 62 donations were recorded, reflecting a strong mobilization of students, teachers, and staff members. Each blood bag collected represents a chance of survival for a patient in distress, whether following an accident, surgery, or as part of complex medical treatment. Beyond the collection itself, the event was a true moment of solidarity and commitment. It helped strengthen civic spirit within the university, by promoting volunteerism and the social responsibility of young people. This initiative perfectly illustrates the mission of the Elite Club: to take concrete action for the common good and to inspire a dynamic of lasting mutual aid among university youth.

https://www.instagram.com/p/DCzpBaXxoh7/?img_index=2

Prostate Cancer Awareness Conference

On November 20, 2024, the Elite Club organized an interactive conference at the Euromed University of Fez to raise awareness about prostate cancer, a disease that is still too often ignored. The event brought together health science students, teachers, and medical professionals. Two experts, Dr. Oumaima Syouri, an oncologist, and Dr. Mohamed Amine Guessab, a urologist, discussed treatment, screening, and the importance of early diagnosis. The conference's interactive format allowed for rich, open-ended discussions, reinforced by a fun quiz to test participants' knowledge. This initiative highlighted the importance of prevention and highlighted university youth as key actors in social change, spreading values of solidarity and kindness.

Training workshop for elected officials of the province of Taounate

As part of the partnership between the Euromed University of Fez and the Fez-Meknes Regional Council, a training workshop for elected officials of the province of Taounate was organized on April 29 and 30, 2025, in Taounate, under the theme "Local development".

The workshop aimed in particular at the dynamics of strengthening local capacities around four priority Sustainable Development Goals (SDGs):

SDG 1: Eradication of povertySDG 4: Quality educationSDG 10: Reduced inequalitiesSDG 11: Sustainable cities and communities

This workshop supports the mobilization of resources and territorial actors around and in response to the specific needs of local populations, while promoting their economic, social, and cultural potential. This participatory approach, rooted in local realities, promotes inclusion, resilience, and social innovation.

One day of impact, one life of change

On February 16, 2025, in Skoura M'daz, our humanitarian dental caravan brought care, joy and solidarity to the Ichanaaki School Group.

- 260 students benefited from free dental consultations provided by dedicated professionals
- Oral hygiene awareness sessions to teach children how to take care of their smiles
- A complete renovation of the school's exterior walls, bringing their learning environment back to life
- Unforgettable moments of sharing: music, dance, thinking games and creative activities with children
- Distribution of dental kits, thanks to the generous support of Colgate Morocco

It was not just about medical care, but also about spreading happiness, inspiring hope and leaving a lasting mark.

https://www.instagram.com/p/DGv5cdyumpV/?img_index=2

Medical & Humanitarian Caravan: ROTARACT UEMF

February 22-23, 2025, this weekend, we took winding roads and crossed rain-soaked paths to reach the heights of Ikaouen—where access to healthcare is limited, but solidarity knows no boundaries.

Thanks to @association_arads, our incredible doctors and specialists, the generosity of @sante_bio_premium for their donation of feminine hygiene products, and above all the unwavering commitment of our members, we were able to:

- Raise awareness about feminine hygiene and measles prevention
- Provide gynecological and pediatric consultations
- Distribute essential medicines and warm clothing
- Bringing comfort to a community in need

Despite the rain, despite the distance, our mission remained intact. Because it is in these moments—between fatigue and satisfaction—that we fully grasp the meaning of commitment.

https://www.instagram.com/p/DHjSYyEMzXn/?img_index=12

150 Meals, 150 Stories

On March 19, 2025, a solidarity initiative led to the distribution of 150 Iftar meal baskets in several neighborhoods of Fez, benefiting people in need: workers, the homeless, and marginalized people. More than just a simple gesture of food, it was an act of humanity, comfort, and solidarity, made possible thanks to the generosity of donors.

https://www.instagram.com/p/DH8oR52MLaj/?img_index=13

Medical-Dental Caravan in Tayanza

On December 14, 2024, the Elite Club of the Euromed University of Fez organized a medical-humanitarian caravan in Taynza (Taounate), aimed at providing essential medical care to an isolated population. A multidisciplinary team provided consultations in several medical specialties, while conducting awareness-raising and screening activities. This initiative helped improve access to care, detect undiagnosed pathologies, and strengthen health prevention, while promoting values of solidarity, humanity, and sustainable commitment.

https://www.instagram.com/p/DHrIstLNUsG/?img_index=8

Medical-Dental Caravan in Sebaa Rouadi

On January 25, 2025, the Elite Club of the Euromed University of Fez organized a medical-humanitarian caravan in Sebaa Rouadi. This initiative aimed to provide free, quality medical care, raise awareness among children about oral hygiene, and screen for vision problems. The multidisciplinary team provided general consultations, dental care via a mobile unit, ophthalmological examinations, and health education workshops. Hygiene kits were distributed to participants, thus strengthening prevention and awareness.

EL Mers Medical-Dental Caravan,Boulmane

On January 26, 2025, the Elite Club of the Euromed University of Fez, in collaboration with the Association of Young Volunteers, organized a medical-humanitarian caravan in El Mers, in the province of Boulemane. This solidarity initiative aimed to facilitate access to free, quality medical care for populations living in isolated areas. It also aimed to raise awareness among children about the importance of oral hygiene and to screen for visual disorders. Thanks to a multidisciplinary team, consultations were provided in several specialties: general medicine, pediatrics, cardiology, gynecology, dermatology, ophthalmology, and dental care. Health education workshops complemented this action, emphasizing prevention and daily hygiene.

https://www.instagram.com/p/DFyUHTdtv5h/?img_index=6&igsh=MTc2cWhhaHVpdGd4ZQ

Medical-Dental-Humanitarian Caravan – Oulad Ali Youssef, Boulemane

On February 8, 2025, the ELITE Club of the Euromed University of Fez, in collaboration with the Cultisio Club of the ESTF, organized a medical-humanitarian caravan in Oulad Ali Youssef, in the province of Boulemane, in the heart of the Middle Atlas. Supported by local authorities, partner associations, and volunteer medical staff, this initiative aimed to provide multidisciplinary medical support to the inhabitants of a landlocked area, while distributing essential humanitarian aid (food, clothing, school supplies).

A diverse medical team provided consultations in general medicine, pediatrics, gynecology, cardiology, ophthalmology, dentistry, and traumatology, as well as health education workshops. Dental care was provided on board a mobile unit, while ophthalmological examinations allowed for the screening of visual disorders and referral to appropriate solutions.

For the youngest members of the family, fun and educational activities were organized: toothbrushing workshops, readings, distribution of hygiene kits, candy, and toys, in a friendly atmosphere led by mascots. More than 100 food baskets, as well as warm clothing and school supplies, were distributed, providing concrete support to families during the winter.

School health caravan in Aouzay

As part of its community health initiatives, the Elite Club of the Euromed University of Fez organized a medical-school caravan in the remote village of Aouzay, in partnership with the Health and Social Security Delegation. This initiative aimed to improve access to healthcare for the most vulnerable rural populations, particularly students and their families.

A multidisciplinary team of five general practitioners and three dentists provided general medical consultations as well as oral care (extractions, scaling, hygiene advice). The operation provided care to 279 beneficiaries, while strengthening health education through discussions on prevention, daily health habits, and the importance of medical monitoring.

Beyond the care provided, this caravan highlighted the urgent health needs in rural areas and fostered greater synergy between the educational community, families, and healthcare professionals. The Elite Club aims to replicate this model in other regions, as part of a drive to promote school health and equal opportunity.

https://www.instagram.com/p/DIwwQZvt7QW/?igsh=MTB2Y3R4MHFxYnhwZw

Medical-Dental Caravan in Dar Abkhtie

As part of its commitment to access to healthcare in remote areas, the Elite Club of the Euromed University of Fez organized a large-scale medical and dental caravan in Dar Abkhtie. This solidarity initiative was distinguished by the exceptional mobilization of 15 general practitioners and specialists (gynecology, pediatrics, cardiology, ophthalmology, internal medicine, etc.) and 7 dental surgeons, allowing more than 1,489 consultations to be carried out in a single day.

Beneficiaries received free care, accurate diagnoses, personalized medical advice, and appropriate treatment. Medications were also distributed on site with the support of volunteer pharmacists. At the same time, awareness-raising workshops on oral health, hygiene, and chronic disease prevention were offered, particularly for women and children.

The event received significant media coverage, notably from Agence MAP, Al Aoula, and Fez regional radio, helping to highlight the impact of student solidarity initiatives. This caravan, now considered one of the Elite Club's greatest successes, illustrates its ability to unite partners around a common cause: providing free, humane, and accessible care where it is most needed.

https://www.instagram.com/p/DIZNOhZNg25/?igsh=ZnR0emxmZHp6Z2d3

Medical-Dental Caravan in Agoudim

To mark the holy month of Ramadan, the Elite Club of the Euromed University of Fez, in partnership with the Hand in Hand Club of Al Akhawayn University, organized a two-day medical-dental caravan to the isolated village of Agoudim, in the Middle Atlas. This humanitarian mission was distinguished by the diversity of medical specialties involved, the quality of the welcome given to patients, and its deep roots in the local community.

Over the course of a weekend, general practitioners and specialists (in ophthalmology, gynecology, dermatology, and ENT) provided free consultations to residents, mostly women, children, and the elderly. A comprehensive dental component was also provided, with basic care, extractions, scaling, and awareness-raising activities on oral hygiene.

One of the highlights of the mission was the distribution of hygiene kits (toothbrushes, toothpaste) and medicines, extending the positive impact of the intervention beyond the caravan.

Beyond healthcare, this initiative strengthened ties between students from different universities, promoted young people's involvement in social work, and raised awareness among the local population about the importance of prevention and medical monitoring. Covered by MAP Agency and the national channel Al Aoula, the event also helped highlight the civic and solidarity role of Moroccan youth.

https://www.instagram.com/p/DIkAQhlNs82/?img_index=3&igsh=amw3eXowZmNxc3Zh

Medical-dental caravan - Tisi Ouassli, Taza

On April 13, 2025, the Elite Club of the Euromed University of Fez organized a medical-dental caravan in the village of Tisi Ouassli, located in the province of Taza. This initiative aimed to facilitate access to oral health care, offer specialized medical consultations, and distribute essential medicines to the local population.

A multidisciplinary team provided consultations in general medicine, pediatrics, gynecology, cardiology, and dentistry. Clinical examinations and electrocardiograms (ECGs) were performed, along with appropriate diagnoses and treatments. A mobile unit provided basic dental care, including extractions, preventative care, and referrals to specialists if necessary.

At the same time, educational workshops were organized for children: learning how to brush their teeth, educational readings, and distribution of hygiene kits, treats and play materials, thus creating a friendly and preventative atmosphere.

https://www.instagram.com/p/DIznayPoOzM/?igsh=MWhkaWFtOGJzbGMzeA

Medical-dental and Humanitarian Caravan - Oued Nja, Moulay Yaacoub

On April 19, 2025, the Elite Club of the Euromed University of Fez, in collaboration with the Rotaract Club EMSI Fez, organized a medical-humanitarian caravan in the village of Oued Nja, in the province of Moulay Yaacoub. This solidarity initiative aimed to improve oral hygiene, provide basic medical consultations, and distribute suitable clothing to families in precarious situations.

Consultations were provided by a multidisciplinary team consisting of general practitioners, pediatricians, gynecologists, and dentists. Patients received free care, treatments tailored to common conditions, and referrals to specialized facilities if necessary.

Dental care was provided on board a mobile unit, including basic treatments, extractions, and preventive measures. At the same time, educational workshops were organized for children, including toothbrushing demonstrations, playful readings, and the distribution of hygiene kits, treats, and small gifts.

Finally, warm clothing was given to more than 100 beneficiaries of all ages, providing material support to families facing the harsh winter weather.

https://www.instagram.com/p/DI96kMkIRFX/?img_index=10&igsh=MWgzZzQzajVpYW5saw

Medical-dental and Humanitarian Caravan - Kandar Sidi Khiar, Sefrou

On April 20, 2025, the Elite Club of the Euromed University of Fez organized a medical, dental and humanitarian caravan in Kandar Sidi Khiar, in the province of Sefrou. This action aimed to facilitate access to dental and medical care for the residents of this locality, while ensuring the distribution of basic treatments and raising awareness about hygiene.

A multidisciplinary medical team provided care to the beneficiaries through consultations in general medicine, pediatrics, gynecology, cardiology, and dentistry. Physical examinations, ECGs, and therapeutic guidelines were performed, along with the free dispensing of medication.

The dental component was provided on board a mobile unit, with a variety of interventions: basic care, extractions, prevention, and referral to specialists if necessary.

At the same time, awareness workshops for children were organized: tooth brushing demonstrations, educational readings, and distribution of hygiene kits, sweets and small gifts, thus creating a moment that was both educational and festive.

Solidarity Iftar – A Moment of Sharing and Humanity

On March 29, 2025, during the holy month of Ramadan, the Elite Club organized a solidarity Iftar for 100 people in precarious situations in Fez. This initiative is in line with the fundamental values of Ramadan: generosity, fraternity, and solidarity.

The main objective of this action was to provide more than just a meal: to offer a moment of comfort and dignity, while strengthening human ties and raising awareness among club members of the importance of social commitment.

The event began with the preparation of complete and balanced meals, respecting hygiene standards, followed by direct distribution on the ground, promoting human contact and listening. The warm and friendly atmosphere helped strengthen the bonds between volunteers and beneficiaries.

This action highlighted the values of active solidarity, social inclusion and civic responsibility, thus affirming the role of the Elite Club as an actor of social change, committed to a more just and united society.

_ISCAE Olympics: Performancesexceptional sports performance of the UEMFists and title of best delegation

Euromed University of Fez is proud to celebrate the achievements of its students who flew its flag at the Olympics organized by ISCAE in Casablanca. This exceptional competition brought together 14 universities and colleges around demanding sporting events, and our 15 students, accompanied by two supervisors, achieved remarkable performances.

Our champions have distinguished themselves in all disciplines, collecting prestigious titles:

• In Basketball, our team won the first cup.

• In Table Tennis, our students triumphed in both the boys' and girls' categories, with two first cups.

• In Swimming:

- 50m boys: 1st place (gold medal) and 3rd place (bronze medal).

- 50m girls: 2nd place (silver medal) and 3rd place (bronze medal).

- Mixed relay: 1st place (gold medal).

At the end of this event, the Euromed University of Fez was elected "Best Delegation" by the organizers, an accolade that testifies to the commitment, team spirit and excellence of our students.

Italian Design Day: Reading nature and protecting its culture

As part of its Conference Series, the Euromed University of Fez is sharing its activities promoting "Made in Italy" in partnership with the Italian Embassy in Morocco, by welcoming the Italian writer, botanist and landscaper Umberto Pasti this Wednesday, April 23, 2025. A renowned international figure, he is committed to the preservation of biodiversity, the enhancement of landscapes and the transmission of knowledge.

This meeting is part of the 9th edition of the "Italian Design Days" (IDD), organized around the theme "Reading nature and protecting its culture, for a design that repairs inequalities." A theme that resonates with that of the 2025 edition of the International Triennale of Milan, which highlights innovative approaches to design that serve the preservation of heritage – tangible and intangible – with a view to sustainability and inclusion.

Italian Design Day is an unmissable event celebrating Italian excellence in all its creative expressions. For several years, it has highlighted the synergies between innovation, craftsmanship, sustainability, and transmission, in close collaboration with Moroccan institutions and local communities. Through this exchange, Pasti demonstrated the profound connections between nature, culture, and design, and their role in building a more equitable future.

Taking place at the Euromed University of Fez, a proven partner, this initiative demonstrates the importance given to intercultural dialogue and academic cooperation in the service of a fairer and more sustainable society.

UEMF opens its doors to representatives of parents of students from high schools in Fez

In a strong desire to strengthen synergies between the academic and school worlds, the Euromed University of Fez welcomed, on May 28, the presidents of the parents' associations of the high schools of Fez for a visit under the sign of discovery and dialogue.

This meeting allowed our guests to discover up close the many riches of our eco-campus, through an immersive journey including technological and scientific platforms, simulation rooms, sports infrastructures, as well as exhibitions highlighting the achievements of students.

Much more than a simple visit, this event was a moment of authentic exchange around the values that form the basis of our academic project: pedagogical innovation, learning through practice and student well-being.

This rapprochement marks an important step in the development of lasting relationships between the Euromed University of Fez and the educational communities of the region, serving a shared vision of excellence and inclusion.

UEMF's Got Talent: The student scene shines brightly

The 2025 edition of UEMF's Got Talent once again lit up the stage at the Euromed University of Fez, revealing the full range of talent within its student community. In a festive and warm atmosphere, the participants took turns impressing the audience with their performances in singing, dance, music, theater, and visual art. Each performance on stage was enthusiastically received, carried by a captivated audience, vibrant with energy and emotion.

The jury, composed of staff members and guest artists, praised the artistic quality and originality of the performances. The diversity of styles, inspirations, and messages conveyed made selecting the winners particularly difficult. Between humorous moments, poetic moments, and daring acts, the show lived up to all its promises and highlighted the creative richness of UEMF students.

Beyond the competition, UEMF's Got Talent was a true celebration of the cultural diversity and community spirit that characterize the university. The audience's applause, the cheers between participants, and the shared energy on stage made the evening a memorable one for everyone. It was a wonderful demonstration that artistic expression has its place at the heart of the university curriculum, as a space for growth, self-confidence, and collective creativity.

UEMF seals strategic partnerships with seven national sports federations

On May 21, 2025, the Euromed University of Fez organized the "National Sports and Performance Meeting," during which it signed seven partnership agreements with Moroccan sports federations. This event, marked by the presence of representatives from federations such as the Royal Moroccan Ski Federation, Disabled Sports, and Triathlon, reinforced the UEMF's commitment to the development of high-level sport. Ms. Iman Meriem Benkirane, Vice-President of the UEMF, emphasized the strategic importance of this initiative for talent training, innovation, and applied research in the sports field. In addition, the partner federations praised the UEMF's infrastructure, which meets international standards, including the Olympic swimming pool and the FIFA-certified field. Thematic sessions on sports performance, sports psychology, and the contribution of artificial intelligence in training also enriched this meeting.

African Week at UEMF: Youth at the Heart of Continental Dynamics

The 3rd edition of Africa Week at UEMF, held from June 11 to 13, 2025, under the theme "Youth, the Future of Africa," celebrated the strategic role of young people in the continent's development. The event brought together diplomats, experts, students, and artists for conferences, fairs, performances, and debates on major issues such as energy, agriculture, and culture. The UEMF President emphasized the importance of supporting young talent, while diplomatic representatives welcomed this initiative. UEMF thus affirms its commitment to a strong, united, and innovative Africa, driven by its youth.

Participation in the National Conference on Investment, Employment and Digital Transition

As part of the annual session of the House of Councillors of the Kingdom of Morocco, a National Conference on Investment, Employment and Digital Transition was held on June 11, 2025 at the House of Councillors, under the theme: "Investment, Employment and Structural Transformation in Morocco: Towards a New Inclusive Territorial Governance".

The Euromed University of Fez was represented by Professor Ahlam Mohammadi, lecturer and researcher at the Euromed Business School (EBS), who took part in the thematic workshop entitled: "Investment, governance, gender and territorial dynamics: points of convergence to improve inclusive employment in Morocco."

Her speech highlighted the conditions necessary to make public investment a lever for inclusive job creation and balanced territorial development. She emphasized the importance of governance rooted in local realities, capable of responding to the structural challenges of the labor market.

Calling for a strategic repositioning of public policies, Professor Mohammadi stressed the need to place the creation of productive, sustainable and accessible jobs for all at the heart of national priorities.

This participation illustrates the active engagement of the UEMF academic body in the major debates that shape the future of the country.

Roundtable: Entrepreneurship in Africa – Innovate locally, impact globally

As part of African Week, a round table hosted by Bank of Africa was held on June 12, 2025 around the theme:

"Entrepreneurship in Africa: Innovate locally, impact globally."

This session brought together students and professionals to explore the role of local innovation in the continent's economic transformation and its global influence.

The discussions highlighted success stories, challenges encountered, and opportunities for young African entrepreneurs, with a particular focus on innovation, sustainability, and inclusive growth.

The event illustrated the full potential of the African entrepreneurial spirit in building a more dynamic, connected and resilient economy.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Solidarity medical mission in Boutaghrar – Hands Club

For three days, the Hands Club, in collaboration with a medical team, carried out a humanitarian mission in Boutaghrar, a remote village.

More than 1,400 patients were consulted, medicines distributed, and moments of joy shared with children, in a spirit of solidarity and community service.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Solidarity mission in Meknes – Lions Euromed Club

As part of Global Service Week, the Lions Euromed Club participated in a relief mission for the benefit of the local populations of Meknes and neighboring areas.

This initiative aimed to respond to the social needs of vulnerable communities, through solidarity actions and local social interventions, in a spirit of active citizenship and humanitarian commitment.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Solidarity and ecological day at the Abdelaziz Ben Driss Center – Lions Euromed Club

The Lions Euromed Club organized a solidarity day at the Abdelaziz Ben Driss Center, dedicated to the protection of children.

The event began with a friendly ftour shared between the children and the club members.

Football matches then allowed the young people to experience moments of leisure and cohesion.

Finally, 50 trees were planted within the center, marking a strong commitment to the environment and the children's living environment.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Solidarity distribution of ftour – Lions Euromed Club

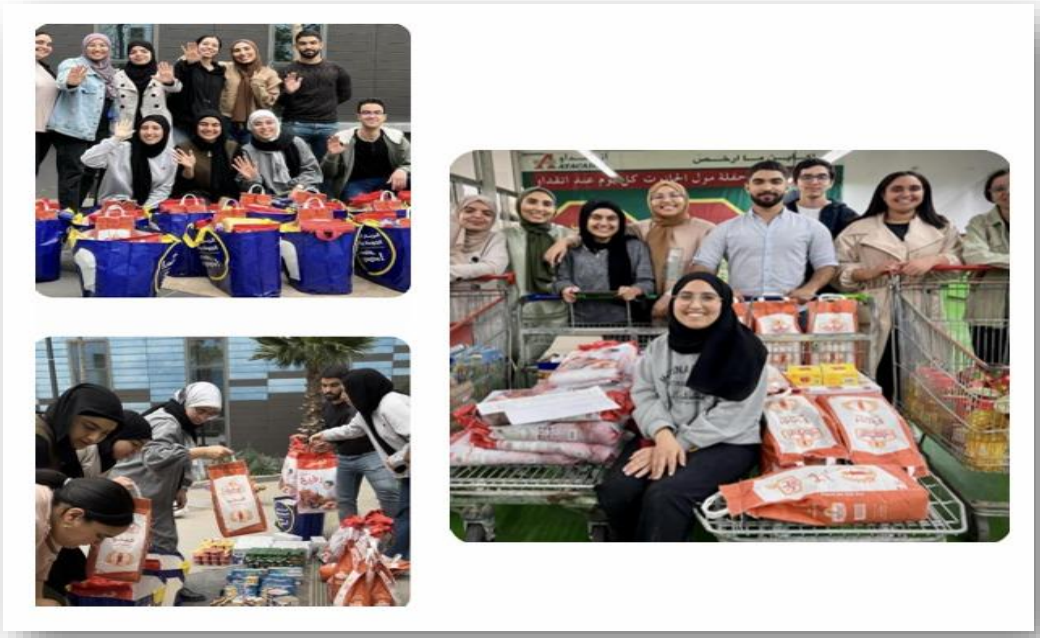

On the occasion of the holy month of Ramadan, the Lions Euromed Club organized a ftour meal distribution in several neighborhoods, offering a moment of sharing and solidarity to around 100 people in precarious situations.

This initiative helped to strengthen social cohesion and provide concrete support to vulnerable populations during a symbolic period.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Solidarity distribution and collective iftar – Hands Club

During the holy month of Ramadan, the Hands Club distributed 20 food baskets to families in difficulty, in order to ease their daily lives and strengthen solidarity within the university community.

The club also organized a collective iftar, which brought together more than 100 participants, promoting a moment of sharing and conviviality.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Laylat Al Qadr Evening – Hands Club

On the occasion of Laylat Al Qadr, the Hands Club organized a festive evening full of laughter, games and celebration of Moroccan traditions.

The event created a warm atmosphere, marked by solidarity and shared joy among the participants.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Art Workshop for Autistic Children – Rotaract Club

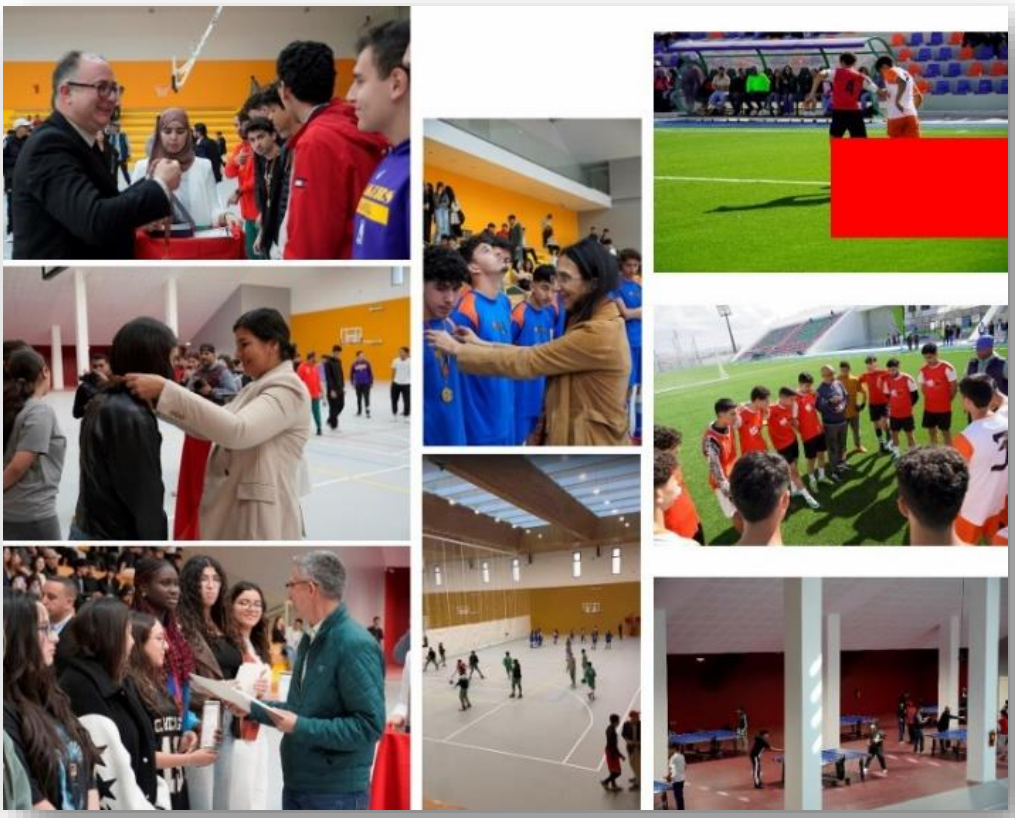

The Rotaract Club, in partnership with the National Center for the Disabled in Fez, organized an art workshop for autistic children.

Thanks to canvases, brushes, paints and other coloring materials, the children were able to give free rein to their imagination in a caring and stimulating environment.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

UEMF Inter-High School Tournament – 1st edition

The first edition of the UEMF Inter-High School Tournament brought together eight private high schools from Fez and Sefrou, involving only their final year students accompanied by their physical education teachers.

The disciplines offered were 7-a-side football, basketball (boys and girls) and table tennis (boys and girls).

In total, approximately 187 students, nine supervisors, 12 administrative staff members, and around fifty supporters and parents participated in the preliminary rounds. The final, held on April 4, 2025, brought together more than 300 people, including school principals, their communications officers, as well as teams and spectators.

This tournament highlighted the university's growing appeal and the positive impact of the opening of the sports complex on UEMF attendance and visibility. A second edition is already planned with an expansion of the participating high schools.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

International conference at UEMF: A reflection on regulation and governance in the face of social complexity

On November 20 and 21, 2024, the Euromed University of Fez (UEMF) hosted the first edition of the international conference entitled "Regulation and Governance of Public Action in the Face of Social Complexity." This event brought together experts in sociology, economics, political science, law, as well as practitioners from various backgrounds, to analyze the major transformations of public policies in a context marked by social complexity.

Through concrete case studies and multidisciplinary discussions, the conference explored new dynamics of governance and regulation. Participants debated the challenges associated with the growing interdependence between public and private actors, the emergence of multi-level models, and current sociopolitical changes.

This meeting also served as a bridge between academic reflection and operational practices, offering innovative perspectives to better understand and respond to the challenges of contemporary public action.

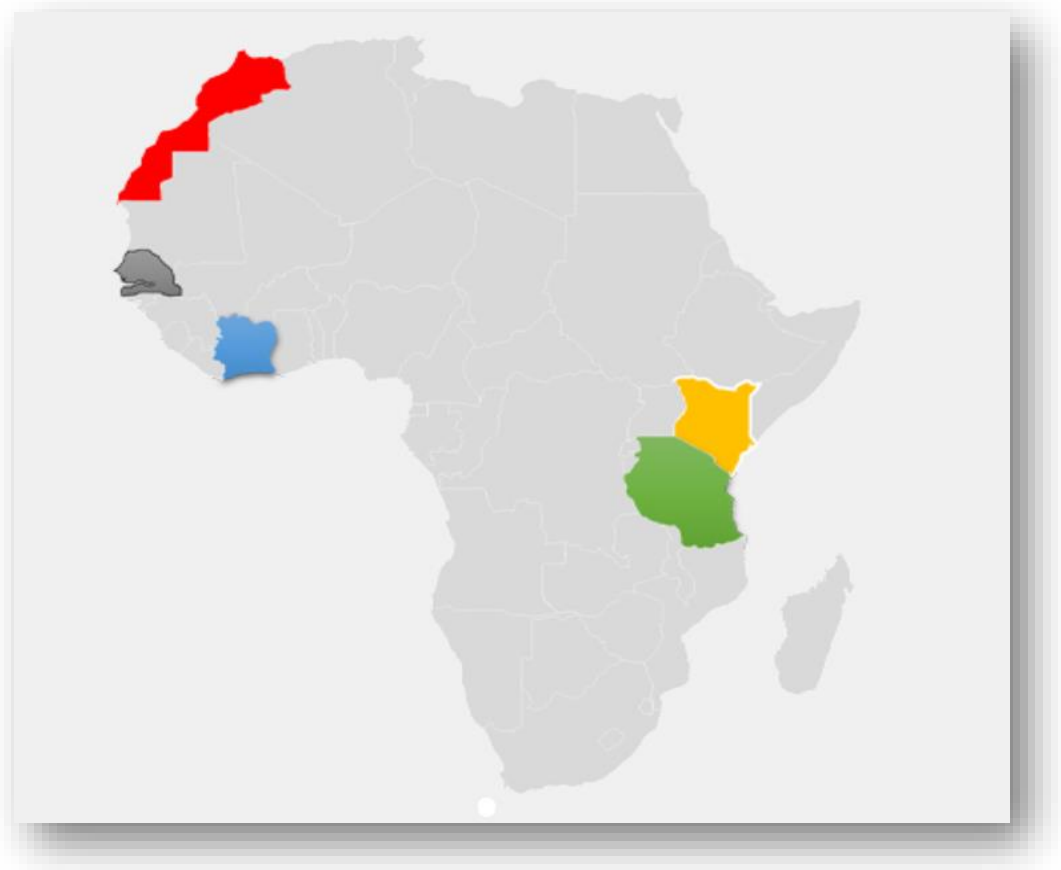

The UEMF thanks all the speakers and participants for their enriching contributions to this major scientific event.

THE Impact Ranking 2025: 1st at the regional level and 2nd at the national level in the category SDG 10: Reduced inequalities

Rank	Name	Reducing inequalities	Overall
201–300	Université Hassan II de Casablanca Morocco	62.5–68.6	60.9–65.5
401–600	Euromed University of Fez Morocco	49.1–57.2	65.6–70.2
401–600	International University of Rabat Morocco	49.1–57.2	70.3–76.1
401–600	Mohammed V University of Rabat Morocco	49.1–57.2	60.9–65.5
601–800	Ibn Tofaïl University Morocco	40.5–49.0	70.3–76.1
801–1000	Moulay Ismail University Morocco	31.1–40.4	49.8–60.8

Doctoral Thesis Defense in “International Relations” by Mr. Othman SQALLI HOUSSAINI

This thesis explores the role of culture and religion in socio-economic development and the strengthening of bilateral relations between Morocco and other African countries. Through the analysis of cooperation policies, field initiatives, and interviews with African institutional actors, it highlights the impact of these dimensions on the political, economic, and social spheres. The study aims to promote cultural and religious values as levers for sustainable development and cohesion, while proposing concrete recommendations to strengthen African cooperation.

Welcome and integration day for new students at UEMF

Yesterday, our new students wrote the first page of their adventure at UEMF. A day punctuated by discoveries, encounters, and shared enthusiasm, where everyone left their mark on campus. An inspiring start, full of promise for the months to come.

Welcome everyone to the big UEMF family.

SDG 11 Report: Sustainable Cities and Communities

City of Fez: Sustainable Heritage of Humanity

The choice to locate Euromed University in the city of Fez is not accidental. The cultural and historical dimension of this city, more than twelve centuries old, which is home to one of the oldest universities in the world, the Quaraouiyne, embodies all the traditional values of human openness and cultural symbiosis of Morocco, based on mutual respect and influence of the region's cultural and civilizational differences.

Its medina, classified as a UNESCO World Heritage Site since 1980, is first and foremost a living museum of art and culture, where several creative activities coexist harmoniously, representing Moroccan craftsmanship in all its splendor. It is also a popular destination for tourists in search of spirituality and a major place of pilgrimage, particularly for African visitors, due to the symbolism of the place, a space of knowledge and religion, conferred on it by its medersas, mosques and mausoleums.

But beyond this fundamental cultural and historical aspect, Fez also constitutes an essential economic hub in the Moroccan development strategy. Fez's geostrategic position on the Moroccan motorway network, linking Tangier to Agadir, from north to south, and Casablanca to Oujda, from west to east, constitutes a nodal point in Morocco's logistics plan and the construction of the Maghreb motorway, which will link Nouakchott (Mauritania) to Tobruk (Libya).

Construction standards (UEMF Eco-Campus Note – Polyprogramme January 2014)

"The construction of the UEMF campus is firmly in line with the Union for the Mediterranean's exemplary policy in terms of sustainable development. The objective is the creation of an eco-campus. In this context, four priorities have been set: • Integration into the site, • Water and energy management, • Sustainability and ease of maintenance, • Comfort and health.

The performance levels set also take into account the objectives of cost compliance and flexibility. The concept of an eco-campus can be understood as a place of sustainable

development combining these three environmental, economic and social criteria. Thus, apart from the heritage policy in terms of environmental performance, the eco-campus also aims to develop social and economic orientations in accordance with sustainable development, namely: • The research topics developed, • The potential for technology transfer to be disseminated throughout the territory and to create local jobs, • Integration into the surrounding neighborhoods (student life, shared facilities, jobs and services), • The mix of populations, uses and activities.

For construction, the focus is on low-energy or passive buildings while maintaining comfort standards, for example with highly energy-efficient bioclimatic buildings that integrate renewable energy. Particular attention is paid to outdoor spaces:

• To the limitation of waterproofing (parking, roads), infiltration and storage of rainwater and runoff on site (ditches, basins, draining roads). • To plantations (woody plants, shrubs, lawns) whose needs in water, phytosanitary treatment and fertilization are limited. • To lighting and atmospheres. We are therefore approaching the criteria of the HQE approach, which makes it possible to define priorities in the environmental approach.

Remote work

Unable to offer on-campus learning during the lockdown periods, UEMF hastened to ensure academic continuity through distance learning. Digital platforms were installed, and all courses and administrative work were delivered. Limited travel to the partially closed campus was permitted, taking all precautions recommended by medical authorities. While lectures were delivered, it is clear that laboratory work requiring equipment suffered despite catch-up classes.

Remote working is however permitted in limited cases (post covid) pending the regulations concerning it because itis not regulated by Moroccan law. Some texts have been adapted to this crisis context, but remote working remains a mode of organization without its own legal framework.

UEMF-community partnership

The UEMF is a privileged partner of the Fez-Meknes Regional Council, the city of Fez and the Regional Investment Council.

The University is also a partner with several rural communities and supports elected officials on sustainable development issues (training, student internships, impact studies, etc.)

Institutional agreements have been signed since the establishment of the UEMF

https://www.ueuromed.org/partenariats-institutionnels

Sustainable Cities Training

This is one of the important themes for the UEMF to which training courses and research work are dedicated.

EMADU (Euro-Mediterranean School of Architecture, Design and Urban Planning)

EMADU is a joint venture between UEMF and the University of Florence, with the involvement of the Polytechnic University of Madrid and the École Nationale Supérieure des Arts Décoratifs (ENSAD Paris). Its mission is to train architects, designers, urban planners, landscape architects, and specialists in heritage conservation, particularly Euro-Mediterranean heritage. The School provides innovative training that combines the skills of architects and engineers to create profiles capable of better contributing to the design and organization of the living space of 21st-century citizens, while respecting quality and environmental standards.

Architecture & Urban Planning Department

The urban dynamics and economic and socio-spatial changes that our region is experiencing require mastery of urban space for the creation of sustainable environments, widely open to modernity, economic globalization, progress and human development;

Real estate programs and construction projects are more numerous, more complex, more diversified and require qualified architectural project management in sufficient numbers;

The requirements of sustainable development and taking into account environmental constraints require an upgrade of architectural techniques that respect the environment and ecology (new design of buildings, new techniques to reduce the energy needs of buildings, new materials, etc.);

National programs for the rehabilitation of architectural heritage and the preservation of historical monuments in Morocco and other countries of the Euro-Mediterranean area require qualified specialists in sufficient numbers.

Master: Urban planning and its territories

Objective :

- Work for respect for heritage and the environment, for differences and cultural specificities and develop in students an awareness of the demands of society, of individual and collective well-being;
- Promote professional expertise in the field of urban planning;
- Disseminate knowledge and promote the quality of urban production;

EMADU Activities

Questions about the role of urban planning in managing the Covid-19 pandemic

Covid-19 has depopulated the streets and repopulated homes. Cities, villages, douars, and other settlements; none of these human settlements are exempt.

Euromed Polytechnic School (EPS)

EPS operates training courses aimed at highlighting the importance of sustainable mobility, well-designed supply chains, renewable energy and water through 4 master's courses and one in logistics:

- Bachelor's Degree in Logistics
- Master in Transport and Sustainable Mobility(see brochure for this program)
- Master in Green Building Design and Engineering(see brochure for this program)
- Master in Renewable Energies and Energy Efficiency
- Master's in Environmental Engineering and Water Management
- Engineering cycle in Operations and Logistics Engineering
- Civil Engineering Cyclewith, in the 5th year, a Transport and Urban Planning option

Executive Master in Transport Systems, Mobility and Territories

The study of mobility and transport systems is approached not only in a technical-economic context, but also through socio-political, cultural, institutional and environmental interactions.

The range of training modules offered aims to:

- Consolidate mastery of aspects related to transport modeling.
- Deepen understanding of the economic aspects of transport.
- Understanding the interaction between territory and transport.
- Integrate environmental and social aspects.

Master's in Transport and Sustainable Mobility

This training aims to provide students with the essential skills in transport and logistics in the face of the explosion in demand for transport and the importance of the challenges linked to mobility and urban logistics.

Various themes are covered, such as:

- Transport in the economy;
- Demand and costs (direct, indirect costs and negative externalities of transport);
- Organization of the offer;
- Transport-urban planning integration models (LUTI).

By teaching them to mobilize very varied fields of knowledge (engineering, economics, environmental sciences), the objective of this master's degree for our students is to allow them to resituate the different aspects on which they will be required to work by simultaneously taking into account the social, economic and environmental dimensions and by understanding the problems over the long term.

Faculty of Human and Social Sciences

Master: Management and promotion of tourism heritage

Goals :

- To ensure that students receive excellent quality training in the management and promotion of heritage tourism through the dual diploma system made possible by the partnership between UEMF and the Institute for Research and Higher Studies in Tourism at Paris 1 Panthéon-Sorbonne.
- Ensure exchanges that are absolutely rewarding both from the point of view of the teaching teams and the mobility of students in the two institutions (UEMF and IREST).
- Promote theoretical knowledge but also the practical methodologies necessary for the successful conduct of fieldwork and internships leading to future employment, as well as those helping to construct writings revealing an analytical, critical and innovative spirit.
- Training in the two cultures of tourism and heritage aimed at integration into heritage establishments and sites, local and territorial communities and tourism organizations.

UEMF promotes electric mobility! (May 6, 2022)

UEMF has entered into a new partnership with the Moroccan start-up "POGO", which consists of the development of soft and electric mobility within the UEMF eco-campus.

For an initial incubation phase, “POGO” deployed a fleet of 12 electric scooters for internal travel needs within the campus, in addition to 10 electric motorcycles for external travel.

POGO will benefit from the services offered by the UEMF incubator, namely technical assistance, individualized monitoring, access to technological platforms and access to the UEMF partner network.

Research Projects

Mobility Online Market For Optimized Trips - Benmoussa & Bennouna

Project selected following a call for tenders (AL-KHAWARIZMI Program) launched by the CNRST in partnership with the Digital Development Agency and the Ministries of Industry and Higher Education. Funding acquired 180,000 MAD

Project Summary: The mechanisms that control mobility are about to be profoundly disrupted by the intrusion of information technology, telecommunications, and, more recently, artificial intelligence (AI). These technological innovations will change both transportation needs and the means of meeting them, constituting a clear opportunity to resolve the difficulties that plague mobility.

The proposed AI application will enable better traffic flow management. Intelligent transportation will offer optimization opportunities and open up areas of choice that are currently understudied and underexplored, including schedule shifts and real-time modal transfers. This will result in increased elasticity of specific demands expressed at a given time on a given route.

This research project in transport, sustainable mobility and urban logistics is being carried out in the city of Casablanca with the participation of 4 professors, 3 doctoral students and in partnership with professional organizations such as Casa Transport SA and MobilizeYourCity.

https://www.cnrst.ma/index.php/fr/component/k2/item/446-programme-al-khawarizmi-resultats-de-l-appel-a-projets-dans-le-domaine-de-l-intelligence-artificielle-et-ses-applications?highlight=WyJhbCIsImtoYXdhcml6bWkiLCJhbCBraGF3YXJpem1pIl0=

Research work in progress

The Euromed Polytechnic School (EPS), an establishment of the Euromed University of Fez, is active, from an educational and research point of view, in various fields including sustainable development and green and smart mobility.

Artificial intelligence (AI) is becoming increasingly important in all sectors, including transportation, whether by sea, air, road, for passengers or goods.

More specifically, the use of AI applications in public transport could be one of the key solutions to improve the quality and efficiency of the public transport sector. Indeed, cities around the world are undergoing radical changes in their transport systems with the advent of technological advances such as autonomous vehicles, electric vehicles, vehicle-to-vehicle (V2V) communication, autopilot functions, and on-demand urban transport services.

Recent trends benefit from the proliferation of on-demand and shared services, which are increasing interest in intelligent transportation systems (ITS), smart mobility, and real-time network management as potential solutions to alleviate congestion problems.

Transportation researchers and practitioners have developed simulation models and tools for use in ITS planning, design, and operation. However, with new technologies based on big data processing, these techniques need to be upgraded and also include social and economic

considerations to comprehensively improve the performance of the transportation ecosystem.

Article 1:A study submitted to an indexed scientific journal dealing with the issue of transport was conducted highlighting a spatio-temporal analysis of traffic congestion patterns in Casablanca at the level of its 22 municipalities. Using different algorithms including K-means, Casablanca was subdivided into various zones qualified from "low congestion" to "highly congested" using various criteria, some commonly used, others much less. The generated model made it possible to identify the explanatory variables contributing to the increase in traffic congestion levels.

Article 2:The modal choice stage is a crucial element that experts rely on to design a valid and sustainable transport system. Various techniques are used to model modal choice behavior, including discrete choice models (DCMs) and machine learning (ML) techniques. Existing reviews mainly focus on DCMs or ML techniques. The main objective of this article is to cover the main discrete choice models and ML techniques while conducting an analysis on the accuracy of existing and so-called "hybrid" models.

International Conference on November 30 and December 1, 2022 held in Israelwith Shenkar College: “Moving forward with AI in Urban Mobility”

Mobility in large cities has been identified as one of the causes of growing dissatisfaction among residents, with a direct impact on their quality of life. Recently, due to new technological developments, cities are becoming "smart," and smart and sustainable mobility is gaining increasing importance. However, little is known about the effectiveness of smart mobility and how it can positively impact sustainability in everyday urban life. This conference aims to understand the behavioral intentions of potential transport users regarding their mobility choices and to identify the main perceived barriers that may prevent them from making more sustainable mobility decisions. The findings will provide a useful basis for the ideation phase, as part of a design process aimed at finding solutions capable of motivating users towards greener choices.

Tribune in Medias24 on the general theme of sustainable development:“Businesses and Climate Change: A Structural Relationship for a Clear Reduction in Carbon Emissions” by Prof. Othmane Benmoussa

Summary :
Do we still have time to stop climate change? How much room do we have for maneuver?

If the question seems scientifically, politically, and emotionally fraught, that's because it is, and it can be frightening and depressing for those unsure how to sustainably embrace the process of decarbonizing the economy as a whole. This doesn't mean, of course, that the actual answer is uncertain; the science is quite clear on this.

Indeed, the Intergovernmental Panel on Climate Change (IPCC) released a report in August 2021 that provided a sobering answer to the question: "We don't have time. We're out of time."

This statement should be interpreted with seriousness, indicating that we are at a pivotal moment in the future of future generations, in the sense that this does not mean that there is nothing more to be done or that our future is entirely out of our hands. Businesses and decision-makers can still and must take systemic actions to position our economy and our world on a truly more sustainable path.

Spending on arts and heritage

The UEMF devotes more than 5% of its budget to expenses including:

- operating expenses of libraries, galleries, exhibition spaces, theatres and spaces open to the public;
- expenditure on musical resources (instruments, payment of travel and music teachers, etc.);
- the regular operating costs of buildings dedicated to the arts and heritage.

Transport

The UEMF encourages and subsidizes more sustainable travel (walking, cycling, carpooling, public transport (UEMF buses and public shuttles), motorcycles, scooters or mopeds, or electric vehicles). In particular, travel expenses are better reimbursed in the case of carpooling.

The campus has priority pedestrian and cycle paths.

Sustainable housing for students and employees

The UEMF has an agreement with a large real estate development group in Fez which allowed it to build the U Village student residence (https://www.uvillage.ma/) Whoprovides its residents with a comfortable, warm, healthy, secure, and environmentally friendly living environment. Located in the heart of UEMF, U VILLAGE offers sustainable accommodation tailored to the needs of students and their budgets.

Affordable housing for employees

Access to decent housing is, according to the Moroccan Constitution, a right that guarantees the dignity and contributes to the social cohesion of citizens. Considered as such, the housing sector is a social sector by nature. In this sense, the Ministry of National Territorial Planning, Urban Planning, Housing and Urban Policy initiated the social housing program in 2010 at a cost of 250,000 MAD.

For employees wishing to acquire sustainable housing at affordable prices, the same developer has budget housing in various districts of the city of Fez.

Round table: advanced regionalization and new development model in the Fez-Meknes region

As part of the second part of the round tables organized by Horizon Press on advanced regionalization and the new development model, Professor Hicham Sebti took part in the panel of this edition under the theme: Challenges of Fez-Meknes for a new regional development policy.

During this debate, two panels were scheduled. The first focused on the actions of regional actors in the service of development, addressing issues that revolve around the governance of the Territory and the federation of regional actors, the assets of the Region including qualified human capital as well as major regional development projects and ambitious roadmaps to successfully meet the challenge of implementing the NMD. As for

the second panel, it raised the question of how to establish the Region as a new hub serving regional growth.

Kick-off of the 1st edition of the ArtiSign Academic Biennial in the historic site of Lalla Yeddouna

The School of Architecture, Design and Urban Planning (EMADU) of the Euromed University of Fez is kicking off the first edition of the ArtiSign Academic Biennial. The event will take place in the heart of the Fez medina, a UNESCO World Heritage Site, from Thursday, June 23 to Sunday, June 26, primarily at the historic site of Lalla Yedouna.

The ArtiSign Academic Biennial is an academic, inclusive, eclectic and international event involving internationally renowned artisans, designers, students, academics and professionals, with the aim of creating a new synergy with a holistic vision combining the world of Craft with that of Design while celebrating the diversity of learning models.

This unifying event is part of the Royal vision to promote the tangible and intangible heritage of the city of Fez, to promote our ancestral know-how by making it one of our socio-economic levers and to bring the academic world closer to the world of craftsmanship to innovate and internationalize Moroccan knowledge and know-how and made in Morocco.

To this end, a tripartite agreement initiated by the Wilaya of Fez-Meknes was signed between the UEMF, ADER-Fez and the Fez-Meknes Chamber of Crafts as part of the program for the requalification and rehabilitation of the Medina of Fez aimed at promoting ancestral knowledge and know-how as well as the valorization of Moroccan artisanal heritage and the revitalization of traditional trades. This biennial is also the result of the participation and close collaboration of the artisans of the Federation of Crafts of Lalla Yeddouna.

In preparation for more than a year, the ArtiSign academic biennial has the involvement of EMADU's privileged partners: the DIA-UNIFI School of Architecture and Design in Florence, the École Nationale des Arts Décoratifs de Paris-ENSAD-, the Portuguese University of Évora, the Aga Khan Trust for Culture of Switzerland, the Polish Academy of Design Sztukai W Szczecinie, the Kan Ya Makan Association, the CFQMA Centre for Training and Qualification in Crafts of Fez, the French Institute of Fez, the Federation of Craftsmen of Lalla Yeddouna and internationally renowned Designers, among others.

VERNACULAR ARCHITECTURE IN MOROCCO: Intensive Workshop on the Medina of Sefrou December 18-20, 2022

This international workshop includes the identification of a case study of vernacular architecture in the Euro-Mediterranean area (here it is the Medina of Sefrou). The workshop is characterized by an interdisciplinary approach based on the integration of different levels of analysis: ethnographic, geographical, climatic, environmental, historical, geomatic, constructive, energetic, economic and organizational.

The objective of this workshop is to introduce students to the use of methods and tools for the analysis of vernacular architecture and to understand the relationship between environment, culture, local architecture and development.

URBAN PLANNING & ARCHITECTURE WORKSHOP December 20-23, 2022

The objective of the workshop is to implement and implement the complete urban planning process (including the regulatory one in force in Morocco). From there, and according to a hierarchical sequence of urban planning documents and scales, the urban development project will emerge. The outcome of this staging of the planning approach and tools would obviously be the architectural project. Said architectural project would be a unifying urban facility of cohesion, emanating from the realistic urban problem of Fez, namely, urban fragmentation.

We green Club at the “Learning Planet Festival” January 23, 2023

On Monday, January 23, 2023, the WeGreen Club participated in the "Learning Planet Festival" program for the benefit of students at the "Chabab Al Ghad" primary school in Fes. The purpose of this action was to confront students with environmental issues related to waste, such as plastic bottles. Participants took part in several workshops, which allowed them to transform this problem into an artistic opportunity.

Clean-up campaign March 4, 2023

The "We Green" club in collaboration with the "UEMF Lions" club organized a public space cleaning day in the city of Fez on March 4, 2023.

During this day, members of both clubs as well as student volunteers had the opportunity to participate in this event and to intervene on the edges overlooking the rails which cross the city of Fez in the "Bab El Ghoul" district.

Workshop on Intelligent Transportation (ITS), Mobility and Urban Planning May 16, 2023

On May 15 and 16, 2023, UEMF organized, in collaboration with its partner Shenkar College of Engineering and Design, two workshops, one on AI applied to agriculture and food security and the other on intelligent transport (ITS), mobility and urban planning.

The 2nd day of joint work on transport and urban planning between the Euromed University of Fez and Shenkar College of Engineering and Design saw massive participation and frank interest from the two university institutions, respective presidencies and deaneries, researchers and students.

Various themes were addressed, including:

- Regional planning, urban planning and architecture, all areas being reshaped thanks to artificial intelligence and new techniques for processing, extracting, exploiting and analyzing massive data;

- Hybrid models combining Machine Learning and Deep Learning techniques with those of discrete choice analysis;

- The application of artificial intelligence to civil air transport as an important axis.

The Euromed University of Fez and the University of Toronto are organizing 3 symposia in Fez on the theme: "CO-DESIGNING PUBLIC SPACES IN THE MEDINA OF FEZ" May 12, 2023

As part of the partnerships of the Euromed University of Fez with the international academic world, its School of Architecture, Design and Urbanism (EMADU) and the John H. Daniels Faculty of Architecture, Landscape and Design at the University of Toronto are organizing a joint architecture course from May 8 to June 16, 2023. For the first time, this course offers a summer architecture studio on the African continent, with full immersion in the site of their interventions, Canadian students, Sierra Leonean students (Fourah Bay College), students from EMADU and other students from the Municipality of Fez Medina as well as artisans.

The workshop is conceived as a series of dialogues between students, experts, and local stakeholders in the Medina of Fez. Designed in a transversal manner, bringing together undergraduate and graduate students from the three schools of architecture, this workshop will focus on the design of new typologies of public spaces in the Medina of Fez, through the development of acupuncture urban strategies and small-scale architectural proposals for micro-public spaces.

Round table: Territorial marketing

The Euroemd Institute of Legal and Political Sciences organized, on Thursday, May 4, 2023, a round table on: Territorial marketing.

The event was hosted by Professor Hassan Azouaoui, Professor of Economics and Management, Vice-Dean of the Faculty of Economics of Kenitra and member of the Daraa Tafilalet Regional Council.

The holding of the activity was an opportunity to question the mechanisms and opportunities for sustainable and equitable development.

https://ueuromed.org/actualites/congres-et-colloques/table-ronde-le-marketing-territorial

School renovation work

On May 23, 2023, the LIONS club participated in the renovation of the "Lhit Charef" school in the province of Moulay Yaccoub.

The Euromed School of Architecture, Design and Urbanism presents the 6th edition of the Annual International Meeting of Artists in Fez

EMADU is actively participating in the sixth edition of the annual International Artists' Meeting in Fez, Morocco. This edition addresses the topic of "Gentrification, Art and Cultural Heritage." In collaboration with Fez Gathering, this edition focuses on how art is used to address the current challenges of gentrification. This objective will be addressed through several discussion panels, art installations, performances, and various activities, in the presence of Pr. Wafae Belarbi, Director of EMADU, Mr. Hamza El Fasiki, Artisan and Writer, Mr. Mohammed Hamdouni, PhD student-researcher, and Mr. Philip Kojo Metz, Artist based in Germany.

Through the involvement of design and architecture students in several workshops, as well as the involvement of our permanent professors in round tables and workshops. This event is organized as part of the 6th edition of the Annual International Meeting of Artists of Fez from October 5 to 8, 2023 in the old medina of Fez.

Conference organized under the theme of "Fez and the Mediterranean area" led by the academic body of the Euromed University of Fez on the occasion of the 10th edition of the Mediterranean Tourism Forum "MediTour 2023"

In partnership with the Euromed University of Fez and many other institutions, the Fez-Meknes Chamber of Commerce, Industry and Services (CCIS) is organizing the 10th edition of the Mediterranean Tourism Forum "Meditour 2023" from October 24 to 26, 2023 under the theme "Investments, cultures and innovation: The future of Mediterranean tourism".

This large-scale event, held at the Palais des Congrès of the Marriot Hotel in Fez, was marked by the participation of several UEMF lecturers-researchers and directors of establishments who shared their knowledge with the participants during the workshops and conferences organized on the sidelines of this Forum.

The conference on Wednesday, October 25, organized under the theme "Fez and the Mediterranean Space," was led primarily by the academic staff of the Euroemd University of Fez. The topics discussed during the day focused on the influence of tourism trends, the Mediterranean dimension, and the spiritual influence of the city of Fez in a Mediterranean context. The speakers therefore highlighted the opportunities and challenges associated with adapting to tourism trends, establishing lasting links between Mediterranean communities, and promoting the region's assets.

CLUB WE GREEN IN ACTION: "ENHANCING IFRANE NATIONAL PARK: LET'S OPEN OUR EYES!"

Saturday, October 28, 2023; the “We Green” club of students from the Euromed University of Fez (UEMF) organized an awareness day for its members through visits to several environmental centers as well as a clean-up action in the Ifrane National Park.

As part of these social activities, the "We Green" club kicked off this day aimed at raising public awareness of environmental issues with the main objective of: Encouraging reflection on environmental issues, creating ecological habits through a cleaning action and awareness of biodiversity issues through a visit to the Ifrane National Park, its fish farming station in Ras El Mae and its cedar house. The day was marked in particular by a cleaning action in the forest of the Zerouka I lake in Ifrane with the ambition of reducing the negative impact of waste and residues that affect the environment.

Note that Zerrouka I is a small, shallow, drainable artificial fish pond. It is located on the Zerrouka (or Zrouka) wadi, the main tributary of the Tizguite wadi. The dike is about 300m from the spring, so its waters flow directly into it. The reservoir is limited by a concrete wall, at least on the west bank. The spring waters are also used to supply the city of Ifrane with drinking water.

At the level of this body of water which is an integral part of the Ramsar Site of Oued Tizguite; the vegetation is not very varied (around fifteen species with a wide geographical distribution) and very limited in space, the edges of the lake being concreted and mowing is frequent there.

It is a fairly sheltered trout lake, somewhat interesting for birds. It is home to few wintering birds (less than 400 birds), the population being composed mainly of divers: coots and crested coots, little grebes, pochards, tufted ducks and ferruginous wagtails, with occasional shovelers and/or mallards. Among the breeders, the common coot (20-25 pairs), the crested coot (about 10 pairs) and the little grebe (5-8 pairs) are the most regular.

Finally, it should be noted that the Euromed University of Fez is a public utility, non-profit institution with an eco-campus that meets international standards and provides a pleasant and stimulating environment for its students from more than 40 nationalities.

UEMF graduates are equipped with training in soft skills, study skills, life skills and professional skills and this profile; based on several pillars; allows students to acquire numerous skills related in particular to multilingualism, multiculturalism, innovation and entrepreneurship, the digital environment, international mobility, and sustainable development in addition to the pillar of social responsibility and eco-citizenship through which students are instilled with the values of respect for the environment, sustainable development and civic responsibility.

2024: Euromed University of Fez at the heart of action for the SDGs

Launch of the GreenTech Roadshow: A Partnership for Sustainable Innovation

Euromed University of Fez and BMCI are partnering to create an ecosystem conducive to innovation and sustainable development. This partnership reflects both institutions' commitment to supporting entrepreneurship and the ecological transition.

The Euromed University of Fez (UEMF) and the Moroccan Bank for Commerce and Industry (BMCI) are proud to announce the launch of the GreenTech Roadshow, a major event dedicated to sustainable innovation and entrepreneurship. This challenge is aimed at startups with a functional minimum viable product (MVP) ready to impact two essential sectors: agritech/blue economy and low-carbon.

In a global context of growing water stress and climate emergency, the GreenTech Roadshow aims to identify and support innovative technological solutions capable of meeting these challenges.

1. Agritech / Blue Economy: This theme targets startups offering solutions to reduce water stress, essential for the sustainability of water resources.

2. Low Carbon: This theme addresses innovative solutions aimed at reducing carbon emissions, which are crucial in the fight against climate change.

EMADU Cultural Event: Global Perspective on Contemporary Architecture

The School of Architecture of the Euromed University of Fez welcomed, on Thursday, May 28, 2024, Sean Anderson, a major player in the field of architecture and former associate curator at the Museum of Modern Art (MoMA), New York.

Sean Anderson, currently an Associate Professor at Cornell University, has brought a wealth of knowledge and experience to our Architecture students. With an impressive background that includes teaching and practicing architecture in countries such as Afghanistan, Australia, India, Italy, Morocco, Sri Lanka and the United Arab Emirates, his presentations offer global perspectives on current innovations and challenges in his field.

How can we begin to unravel commonly held assumptions about architecture in order to move beyond the boundaries, structures, and systems that limit, or even prohibit, knowledge? This was the central question at this meeting, as Anderson addressed issues related to the manifestation of the past in our present, through the tools used by architects, designers, and other actors. He suggested ways to dismantle these legacies to create new spaces for reflection, habitation, and liberation.

[Workshop] Architectural Exploration in Fez: Tradition Reinvented

Master of Architecture students from the Euromed School of Architecture, Design and Urban Planning (EMADU) immersed themselves in the history and future of Fez on April 24 during a workshop at Riad Lalla Yeddouna.

In collaboration with the University of Mons, students explored the adaptive transformation of Foundouks in Fez, a precious heritage site of the city. From creative reuse to the preservation of traditional practices, the students' commitment to community and sustainable urban planning is a guide to an inclusive and inspiring future.

Between tradition and modernity: what path for Morocco? » Conference by Dr. Rachid ACHACHI

As part of the conference cycle, this Wednesday, February 28, 2024 was marked by a conference by Dr. Rachid ACHACHI around the theme "Between tradition and modernity: what path for Morocco?" within the Eco-campus of the Euromed University of Fez.

During this afternoon, students from various institutions of the University attended a session of reflections from the fields of sociology and ethnology. The speaker took the opportunity to elucidate the distinction between tradition, modernity, and modernization. Mr. ACHACHI also defined archeo-modernity, which is an approach aimed at understanding contemporary society and culture by examining its structures.

With the aim of making this meeting a place for constructive exchange and collective production of knowledge, the audience was able to participate in an enriching debate on the different aspects discussed during this conference.

https://ueuromed.org/actualites/cycle-de-conferences/entre-tradition-et-modernite-quelle-voie-pour-le-maroc-conference

International Conference: “Techniques and Environment”

On January 25, 2024, the ICESCO-Euromed Chair in “Arts, Societies and Civilizations” organized an international conference in collaboration with CETCOPRA of the University of Paris 1 Panthéon-Sorbonne on the theme of “Technology and Environment”. The event brought together Moroccan and international figures, including Dr. Mohamed Zinelabidine of ICESCO, as well as a panel of researchers from the University of Paris 1.

The conference explored multidimensional approaches to responding to social and humanitarian crises, focusing on the interactions between technology, society, ethics, and the environment. Two discussion sessions were organized: one on the use of technology in emergency situations, and the other on the social issues related to technology.

This meeting provided a platform for enriching debates between speakers, teacher-researchers and students from the Euromed University of Fez.

https://ueuromed.org/actualites/annonces-diverses/colloque-international-techniques-et-environnement

UEMF is helping to shape the digital and sustainable future of the Fez-Meknes region

The Euromed Institute of Legal and Political Sciences (IESJP) participated in the kick-off meeting of the Smart Sustainable City project in Ifrane on January 12, 2024, thus showing its support for the inclusive digital transition of the Fez-Meknes region.

This is a Belgian-Moroccan project carried out in partnership with the Belgian universities UC Louvain and UNamur, as well as the consortium of four universities in the Fez-Meknes region, including the Euromed University of Fez.

This Belgian-Moroccan project embodies the university's vision of a smart and sustainable urban future. It aims to achieve two primary objectives: the region's inclusive digital transition and the emergence of new forms of governance and citizen participation.

"The mausoleum of Georgi Dimitrov as a place of memory" with Pr. Maria Todorova

As part of the lecture series organized by the Euromed University of Fez, Maria Todorova, renowned historian and eminent professor at the American University of Illinois Urbana-Champaign, captivated the audience this Wednesday, December 20, by addressing the theme "Blowing up the Past: The mausoleum of Georgi Dimitrov as a place of memory."

During her presentation, Ms. Todorova took an in-depth look at the Georgi Dimitrov Mausoleum as an emblematic place of memory, focusing on its role in the construction and deconstruction of Bulgarian national identity. She also analyzed the different representations of the past conveyed by this historical symbol and their impact on the collective consciousness.

This conference provided an opportunity for reflection and intellectual exchange, allowing students to deepen their understanding of collective memory, its challenges, and its influence on the construction of history and national identities. The Euromed University of Fez distinguished itself once again by inviting an internationally renowned expert to share her expertise and stimulate critical thinking within its academic community.

EMADU: “Faces & Faces” Exhibition

The Euromed School of Architecture, Design, and Urban Planning (EMADU) illuminated its spaces with the "Faces & Faces" exhibition. Showcasing the artistic talents of first-year Architecture and Design students, this exhibition captivated visitors by immersing them in a vibrant and striking visual world. Each canvas on display was a window onto the soul, where gazes, smiles, and frozen expressions testified to the richness and complexity of human beings.

She celebrated the uniqueness of each person and appreciated the richness of the human condition. EMADU students showcased their talent by creatively and sensitively capturing the complexity of the human soul through these inspiring portraits. This visual experience certainly touched the minds and hearts of visitors, inspiring them to reflect on the diversity and beauty behind every face.

Launch of new professional training courses at EMADU

The Euromed University of Fez, through the Euromed School of Architecture, Design and Urban Planning, is launching a continuing education program in hospital architectural programming and architectural and urban planning, intended for architects, engineers, and hospital managers. This training, open nationally and internationally, aims to master programming, a crucial stage of the architectural process, where the programmer translates the project owner's needs into a realistic program, taking into account budgetary, social, environmental, and regulatory constraints. The program combines theory and practical cases to train participants to anticipate and avoid unforeseen events and cost and deadline overruns.

Architect Mind Exhibition: Architecture as a Tool for Art and Culture

The Euromed School of Architecture, Design, and Urban Planning is organizing an exhibition from October 16 to 26 at Riad ALIF, in collaboration with socio-cultural actors in Fez. This opening showcases creative works (drawings, collages, installations, paintings) created by architecture and design students, illustrating the importance of architecture in shaping civilizations and preserving cultural heritage. By exploring the role of architecture as a tool for culture and art, the event aims to foster cultural exchange between the academic community, local creators, and the general public, while celebrating Fez's unique architectural heritage.

2025: Euromed University of Fez intensifies its commitment to the SDGs

International conference: The Architectural and Landscape Identity Confronting Natural Risks in the Euro-Mediterranean Region

On December 12, 2024, the Euromed School of Architecture, Design and Urbanism (EMADU) of the UEMF organized an international conference on the theme: "Architectural and landscape identity in the face of natural risks in the Euro-Mediterranean region."

This event brought together experts and decision-makers to discuss the impacts of climate change and natural hazards (earthquakes, floods, fires, landslides) on built heritage, particularly after the Al Haouz earthquake (September 2023).

Among the key areas covered:

- Adapting buildings to seismic and climatic risks.
- The use of local materials and traditional techniques for greater resilience.
- The role of public infrastructure in risk management.
- Sustainable urban planning to reduce vulnerability.

The conference highlighted the importance of reconciling security and the preservation of heritage identity, a central issue for the Euro-Mediterranean region.

An exceptional evening in tribute to Frank Sinatra

The Euromed University of Fez, in partnership with the Royal Symphony Orchestra, recently orchestrated an exceptional musical evening, celebrating the timeless legacy of Frank Sinatra. This event, marked by elegance and emotion, brought together an audience of music lovers who came to savor the greatest classics of Ol' Blue Eyes..

At the heart of this performance, the Royal Symphony Orchestra's Jazz Band, accompanied by renowned vocalist Sergey Arkhipov, delivered masterful performances that captivated the audience. The performer's warm voice, combined with the musicians' virtuosity, brought iconic songs such as "Fly Me to the Moon," "Sway," and "New York" to life, transporting the audience to the heart of the great jazz scenes that defined the 20th century.

Through this event, the Euromed University of Fez once again confirms its commitment to promoting culture and the arts, offering the university community and the general public exceptional moments that nourish the soul and spirit..

https://www.ueuromed.org/actualites/ceremonie/une-soiree-dexception-en-hommage-frank-sinatra

The French Institute of Fez and the Euromed University of Fez strengthen their partnership

The Euromed University of Fez (UEMF) welcomed Ms. Carine Foeller Viallon, Consul General of France in Fez, to formalize the renewal of the partnership agreement with the French Institute of Fez. This agreement aims to strengthen language teaching with certification through the UEMF language center, in line with academic and professional needs.

The collaboration also includes joint cultural programming for the university community and the general public. Thanks to its modern infrastructure, such as a 2,000-seat agora and cultural spaces under construction (theatre and cinema), the UEMF is positioning itself as a major player in educational and cultural cooperation. This partnership illustrates the shared commitment to intercultural dialogue and the influence of Franco-Moroccan cooperation..

MLUMSE Project Kick-Off Meeting in Cairo: A Collaboration for the Modernization of Urban Management in the Mediterranean

The Euromed University of Fez (UEMF) participated in the launch meetings of the MLUMSE project (Modernization of Land and Urban Management Education in the Southern Mediterranean), in Cairo in February 2025, represented by Professor Wafae Belarbi, Director of the Euromed School of Architecture, Design and Urban Planning (EMADU). This project brings together several universities in the Mediterranean region, including UEMF.

UEMF stands out for its commitment to digital technologies and artificial intelligence through its EIDIA school, with the ambition of becoming a regional innovation center. The university's teams work on themes such as urban resilience, smart cities, and landscape planning. The university also focuses on modernizing its curriculum and strengthening its human and technological capacities, with the aim of contributing to the development of smart and sustainable cities.

This project underlines UEMF's ambition to become a center of excellence in urban management, sustainable development and digital technologies, by strengthening its international partnerships to meet contemporary challenges.

[Call for participation] Volunteer work placements in collaboration with the Union Rempart association

Within the framework of the framework agreement established between the Euromed School of Architecture, Design and Urban Planning (EMADU), an establishment of the Euromed University of Fez, and the REMPART Union, the two institutions are developing cooperative relations based on shared objectives of transmission, safeguarding, maintenance, promotion and opening of heritage to the public.

EMADU, as an institution training architects and designers, focuses on raising awareness of heritage among its students; the REMPART Union, through the organization of volunteer work camps open to all, carries out restoration projects. This proximity is realized through joint seminars, site visits, educational interventions, and any project promoting exchanges between their respective audiences.

https://ueuromed.org/actualites/annonces-diverses/appel-participation-stages-des-chantiers-benevoles-en-collaboration

New Dynamics: Health Tourism at the Euromed University of Fez

A pioneer in promoting synergies between research, innovation and territorial development, the Euromed University of Fez (UEMF) hosted, from April 10 to 12, 2025, the first edition of the Regional Forum on Health Tourism, under the theme: "Thermal waters of the Fez-Meknes region: Health and Tourism".

Organized in partnership with the Wilaya of the Fez-Meknes Region, the province of Moulay Yacoub, the Regional Tourism Council and the Regional Council, this major event is fully in line with the UEMF's commitment to actively contribute to the dynamics of sustainable regional development, particularly in sectors with high potential such as health tourism.

A meeting place for experts, researchers, economic operators, and public stakeholders, the Forum offered a rich program including scientific seminars, presentations of innovative projects, and roundtable discussions on the challenges of developing spa resorts. Through this event, the UEMF leverages its academic and scientific expertise to fuel reflection and support public policies in structuring a regional ecosystem focused on health, well-being, and sustainable tourism.

By hosting this Forum, the University confirms its role as a catalyst for strategic projects at the national and regional levels, and reaffirms its mission as a center of excellence promoting dialogue between knowledge, innovation and inclusive development.

Promoting artisanal heritage: a strategic framework agreement for the region

On April 17, 2025, the Euromed University of Fez participated in the signing of partnership agreements during the visit of Mr. Lahcen Essaadi, Secretary of State for Crafts, to the Fez-Meknes Chamber of Crafts.

A framework agreement was signed between the UEMF State Secretariat and the Chamber of Crafts to develop specialized university training in craft trades, support innovative projects, conduct socio-economic studies, promote craft heritage and integrate digitalization to modernize the sector.

The UEMF is committed to mobilizing its resources to train professionals who combine tradition, innovation and sustainability while respecting the environment and social values.

A second partnership was signed with the Federation of Craft Businesses to strengthen training in glass techniques in collaboration with CERFAV in France.

Training workshop for elected officials of the province of Taounate

As part of the partnership between the Euromed University of Fez and the Fez-Meknes Regional Council, a training workshop for elected officials of the province of Taounate was organized on April 29 and 30, 2025, in Taounate, under the theme "Local development".

The workshop aimed in particular at the dynamics of strengthening local capacities around four priority Sustainable Development Goals (SDGs):

SDG 1: Eradication of povertySDG 4: Quality educationSDG 10: Reduced inequalitiesSDG 11: Sustainable cities and communities

This workshop supports the mobilization of resources and territorial actors around and in response to the specific needs of local populations, while promoting their economic, social, and cultural potential. This participatory approach, rooted in local realities, promotes inclusion, resilience, and social innovation.

Blood donation

The 9eThis edition of the Blood Donation was organized outside the university campus to broaden the target audience and involve a wider community. This action helped raise awareness among a wider audience about the importance of blood donation, while also facilitating collection for hospitals and patients in need. The event was carried out in collaboration with local institutions to ensure broad participation.

The main objective of this edition was to broaden the reach of the initiative, raise awareness among more people about blood donation, and contribute to blood collection by supporting the needs of hospitals and patients, while strengthening the spirit of solidarity beyond the university framework.

Training program for elected officials and staff of the Fez-Meknes region

On April 24 and 25, 2025, the Euromed University of Fez organized a training workshop for elected officials from the Province of Moulay Yacoub on "Mastering local taxation and the governance of local authorities." This initiative is part of the UEMF's openness and its commitment to strengthening the skills of local stakeholders.

Dedicated to the control of local taxation as a strategic lever for public financing and the governance of local authorities, this session aimed to strengthen the capacities of elected officials, improve the efficiency of resource collection, promote transparency and tax fairness, as well as consolidate efficient and attractive governance for investment.

Italian Design Day: Reading nature and protecting its culture

As part of its Conference Series, the Euromed University of Fez is sharing its activities promoting "Made in Italy" in partnership with the Italian Embassy in Morocco, by welcoming the Italian writer, botanist and landscaper Umberto Pasti this Wednesday, April 23, 2025. A renowned international figure, he is committed to the preservation of biodiversity, the enhancement of landscapes and the transmission of knowledge.

This meeting is part of the 9th edition of the "Italian Design Days" (IDD), organized around the theme "Reading nature and protecting its culture, for a design that repairs inequalities." A theme that resonates with that of the 2025 edition of the International Triennale of Milan, which highlights innovative approaches to design that serve the preservation of heritage – tangible and intangible – with a view to sustainability and inclusion.

Italian Design Day is an unmissable event celebrating Italian excellence in all its creative expressions. For several years, it has highlighted the synergies between innovation, craftsmanship, sustainability, and transmission, in close collaboration with Moroccan institutions and local communities. Through this exchange, Pasti demonstrated the profound connections between nature, culture, and design, and their role in building a more equitable future.

Taking place at the Euromed University of Fez, a proven partner, this initiative demonstrates the importance given to intercultural dialogue and academic cooperation in the service of a fairer and more sustainable society.

Euromed University of Fez welcomes the new Director General for MENA of the European Commission, HE Mr. Stefano Sannino

As part of the consultations on the New Pact for the Mediterranean, HE Stefano Sannino, Director General for the Middle East, North Africa and the Gulf (DG MENA) at the European Commission, visited the Euromed University of Fez on 14 May 2025. Accompanied by HE Patricia Llombart Cussac, Ambassador of the European Union to Morocco, this visit strengthened the strategic partnerships between the UEMF and the European institutions.

Welcomed by UEMF President Prof. Mostapha Bousmina, the guests explored the campus's state-of-the-art facilities, including a state-of-the-art sports complex, a 3,500-seat conference center, and a research library. A highlight of the visit was an interactive dialogue with students on topics of importance to the region, such as education, mobility, employment, climate, and academic cooperation.

This meeting confirmed the UEMF as a strategic player in Euro-Mediterranean cooperation and a catalyst for innovation and sustainable development in the region. The visit concluded with a symbolic immersion in the historic medina of Fez, highlighting the importance of knowledge in strengthening ties between peoples.

Towards better local governance: UEMF equips municipal elected officials

As part of its ongoing efforts to build the capacity of local stakeholders and improve the performance of public services, the Euromed University of Fez, under the supervision of the Fez-Meknes Regional Council, organized a training workshop on the theme of administrative policing on Wednesday, May 14 and Thursday, May 15. This workshop is part of the Continuing Education Master Plan, led by the University, which aims to equip elected officials and strengthen their skills to meet the requirements of modern territorial governance.

The workshop was actively attended by more than 80 municipal councilors, demonstrating the growing awareness of the importance of training in improving daily practices within local authorities. During these two days, practical cases inspired by real-life situations encountered by councilors were discussed, offering participants the opportunity to understand the legal concepts related to administrative policing through concrete examples, and thus strengthen their ability to effectively manage issues on the ground.

The workshop also provided an opportunity to delve deeper into the legal and regulatory frameworks governing the missions of the administrative police, to examine the municipality's intervention mechanisms, its areas of action, as well as the principles of balance between the preservation of public order and respect for individual rights.

This initiative confirms the importance of continuing education as a key lever for modernizing local administration, improving the quality of public services, and strengthening trust between citizens and elected institutions. This workshop thus illustrates the shared commitment of the Euromed University of Fez and the Fez-Meknes Regional Council to establish an innovative training model, based on the convergence of academic knowledge and the reality on the ground, in the service of sustainable and effective local development.

Round table: Changing African territories

On June 12, 2025, as part of the African Week organized at UEMF, a round table was held on the theme:

“Transformations of territories and infrastructures in Africa: technology, culture and human capital as levers of resilience”.

Led by Prof. Iman Meriem Benkirane, Prof. Mariame Bouchaqour, Ms. Rim El Harrouni and Mr. Ouassim Bensouda, this session brought together students, researchers and experts to discuss the profound changes in African territories in the face of technological, social and environmental challenges.

The discussions highlighted the strategic role of innovation, cultural identity and human capital in building more resilient, sustainable and inclusive African territories.

Regional Forum on Health Tourism: Promoting the Thermal Resources of Fez-Meknes

From April 10 to 12, 2025, the Euro-Mediterranean University of Fez (UEMF) organized the first edition of the Regional Forum on Health Tourism, focusing on the theme "Thermal Waters of the Fez-Meknes Region: Health and Tourism." This event brought together experts, researchers, as well as public and private stakeholders to discuss the sustainable development of the region through wellness and thermal tourism.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Creation of a fresco at the Abdellah Ibn Yassine College

On April 27, 2025, the art club created a fresco at Abdellah Ibn Yassine College, offering students a great opportunity to express their creativity and artistic talents.

This initiative encourages the development of artistic skills while enhancing the school environment through art.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Environmental Project and International Exchange – Rotaract Club

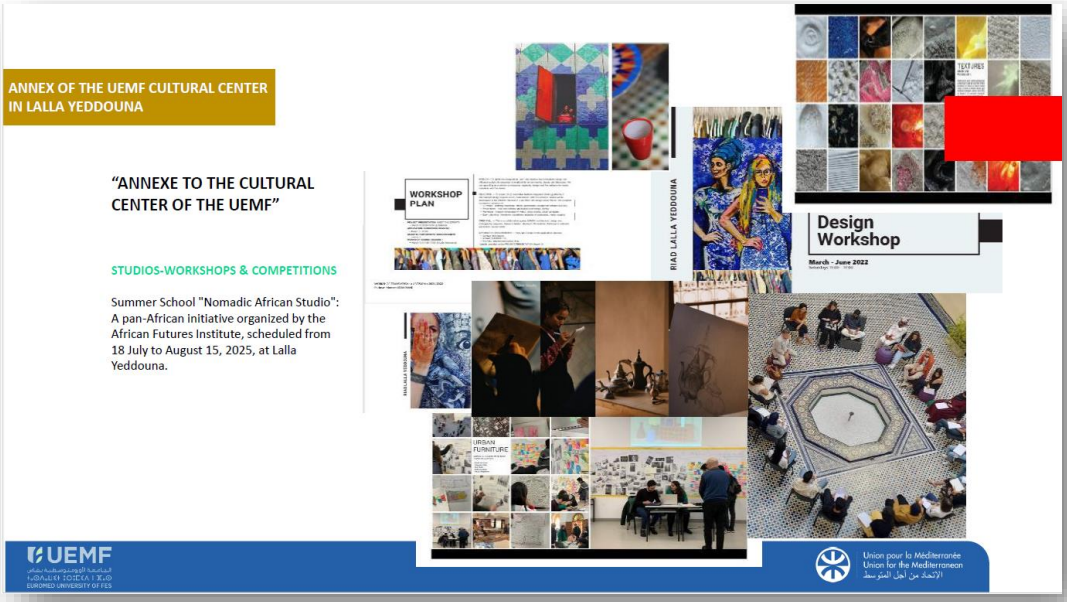

The Rotaract Club of UEMF, in partnership with the Rotaract Club USME of India, carried out a project combining environmental commitment and international exchange.

Members collected waste in the Ain Chqef forest, collecting a total of fifteen 100-liter bags, thus contributing to the preservation of the environment.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Annex of the UEMF Cultural Center in Lalla Yeddouna

The UEMF Cultural Center Annex at Lalla Yeddouna, located in the heart of the Fez medina, embodies an innovative initiative aimed at strengthening the link between heritage, knowledge, and innovation. A truly immersive journey, the exhibition offers an exploration between past and future, integrating advanced technologies developed by UEMF research laboratories, such as virtual reality. Structured into several rooms, it highlights the historical role of Al Quaraouiyine and the madrasas in the transmission of knowledge (Circuit du Savoir), the use of technologies to preserve and promote heritage (Tech & Heritage), the dialogue between traditional crafts and academic research (Tech & Craft), as well as a collaborative FabLab (El Beldi FabLab) bringing together artisans, students, and researchers. The UEMF promotes a vision of the medina as an "open-air school," where learning, tangible heritage, and know-how meet. The annex also hosts international events, such as the Pan-African summer school "Nomadic African Studio" (July 18 – August 15, 2025), highlighting its openness to cultural exchange and transdisciplinary training.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

THE Impact Ranking 2025: 1st at the regional level and 2nd at the national level in the category SDG 11: Sustainable Cities and Communities

Rank	Name	Sustainable cities and communities	Overall
201–300	Ibn Tofaïl University Morocco	58.8–65.2	70.3–76.1
401–600	Euromed University of Fez Morocco	43.6–53.0	65.6–70.2
601–800	International University of Rabat Morocco	34.4–43.5	70.3–76.1
601–800	Université Hassan II de Casablanca Morocco	34.4–43.5	60.9–65.5
801–1000	Mohammed V University of Rabat Morocco	23.4–34.3	60.9–65.5
801–1000	Université Chouaïb Doukkali Morocco	23.4–34.3	1.7–49.7

UEMF participation in the MLUMSE project in Zagreb

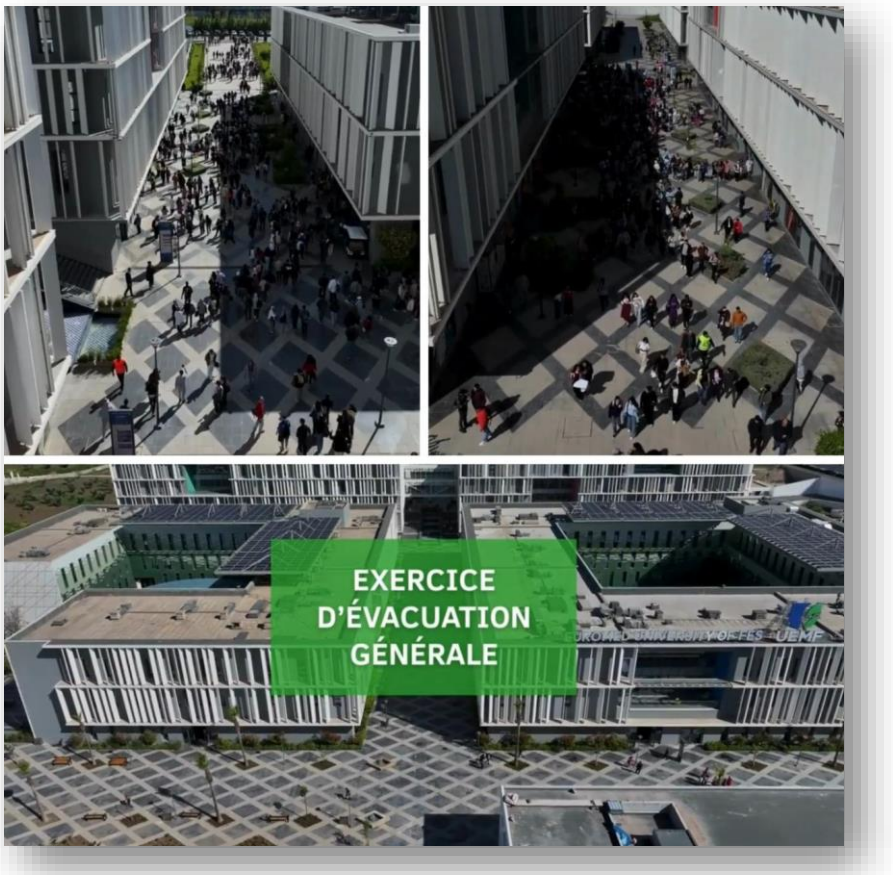

From June 30 to July 6, 2025, the Euromed University of Fez participated in a week of thematic workshops and strategic meetings at the University of Zagreb, as part of the Erasmus+ CBHE MLUMSE project, dedicated to the modernization of teaching in land management and urban planning in the Southern Mediterranean.

This mission has enabled the consolidation of Euro-Mediterranean academic collaborations around key themes such as the New European Bauhaus, smart cities, strategic planning, heritage enhancement, digital tools and geospatial governance.

UEMF was also represented at the IDS3Geo doctoral seminar and presented the first version of its Quality Plan to the project steering committee. This participation demonstrates UEMF's strong commitment to academic excellence, internationalization and knowledge sharing.

Dialogue with Nature: Umberto Pasti at UEMF, between heritage and sustainable landscape

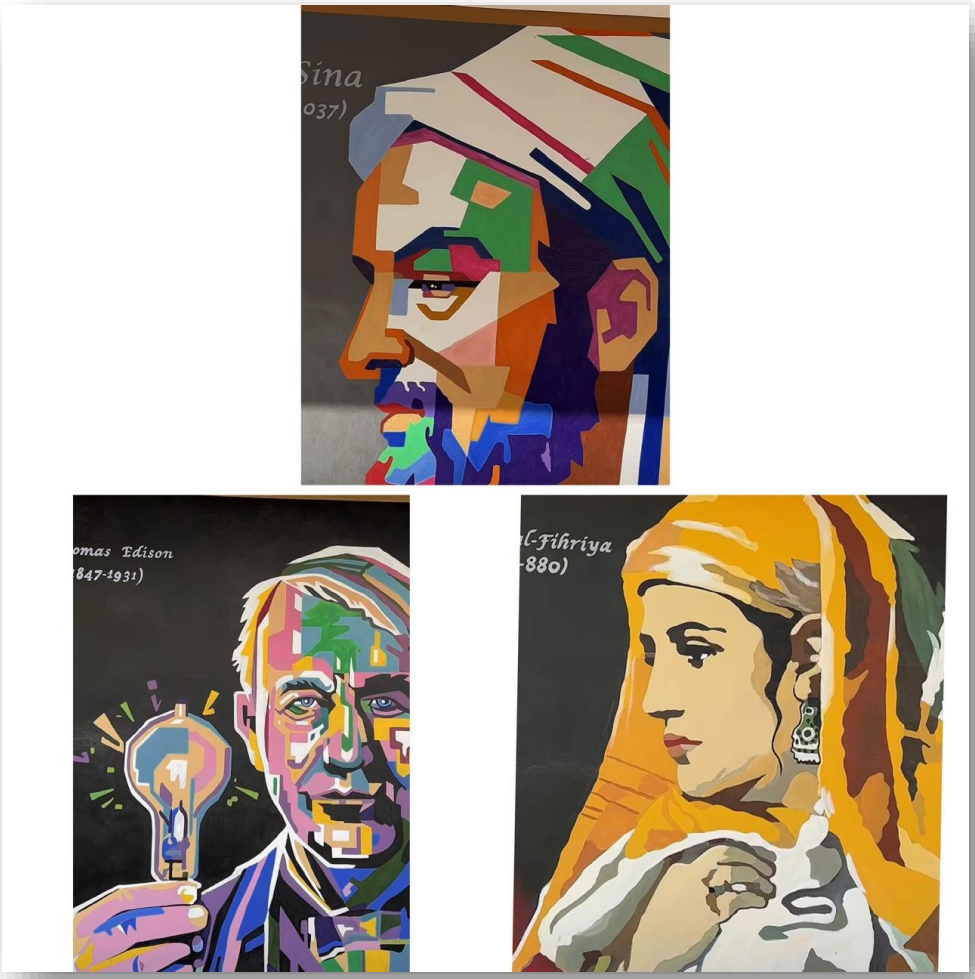

The visit by Mr. Umberto Pasti, Italian writer, botanist and landscaper, was a true invitation to reconnect with the profound intelligence of nature and to reflect on our connection with it..Pr. Imane Benkirane, Vice-President in charge of cultural activities and campus life, stressed the importance, more than ever, of taking the time and perspective necessary to better involve ourselves in the preservation of our heritage, whether tangible or intangible.

For Oumayma Fassi Fihri, a PhD student in Landscape Architecture at UEMF, Mr. Umberto Pasti's presentation was a source of inspiration. She found valuable answers to a key question: how can we integrate landscapes not only into our daily lives, but also into urban development projects?

https://www.linkedin.com/posts/universit-euro-m-diterran-enne-de-f-s_idd-2025-umberto-pasti-interroge-les-in%C3%A9galit%C3%A9s-activity-7322931662743334912-847e?utm_source=share&utm_medium=member_desktop&rcm=ACoAADTGRfcBC1u9wYbkACypuAdXhOuzPcQwP94

When art celebrates knowledge

The walls of our campus pay tribute to the great thinkers, scientists, and historians who have left their mark on humanity. A daily source of inspiration for our students, at the heart of an environment dedicated to knowledge and reflection.

African Futures Institute: Launch of the Nomadic African Studio in Fez

The Euromed University of Fez hosted the African Futures Institute, an initiative founded in 2021 in Accra by Professor Lesley Lokko OBE, which offers a new model of architectural education combining training, research, and public events.

This meeting took place at the eco-campus, on the occasion of the inaugural establishment of the Nomadic African Studio in Fez, the result of an innovative partnership between UEMF and AFI, led by professors Aziza Chaouni and Alex Toshkov.

Located in the heart of the Fez medina, within the Riad Lalla Yeddouna, which is made available to the University, this nomadic studio offers participants a unique setting to foster creative reflections that resonate with the history and culture of the place. It is part of a transnational dynamic, bringing together a broad cohort of international critics.

This event enabled rich exchanges between the studio teams and the university community, opening new perspectives for education and innovation in Africa.

SDG12 Report: Responsible Consumption and Production

Introduction

At UEMF, the Purchasing and Logistics Department's main objective is to satisfy the needs of internal customers, by obtaining the best performance from suppliers (Quality / Cost / Deadlines / Services) in compliance with current regulations and in line with UEMF's general strategy.

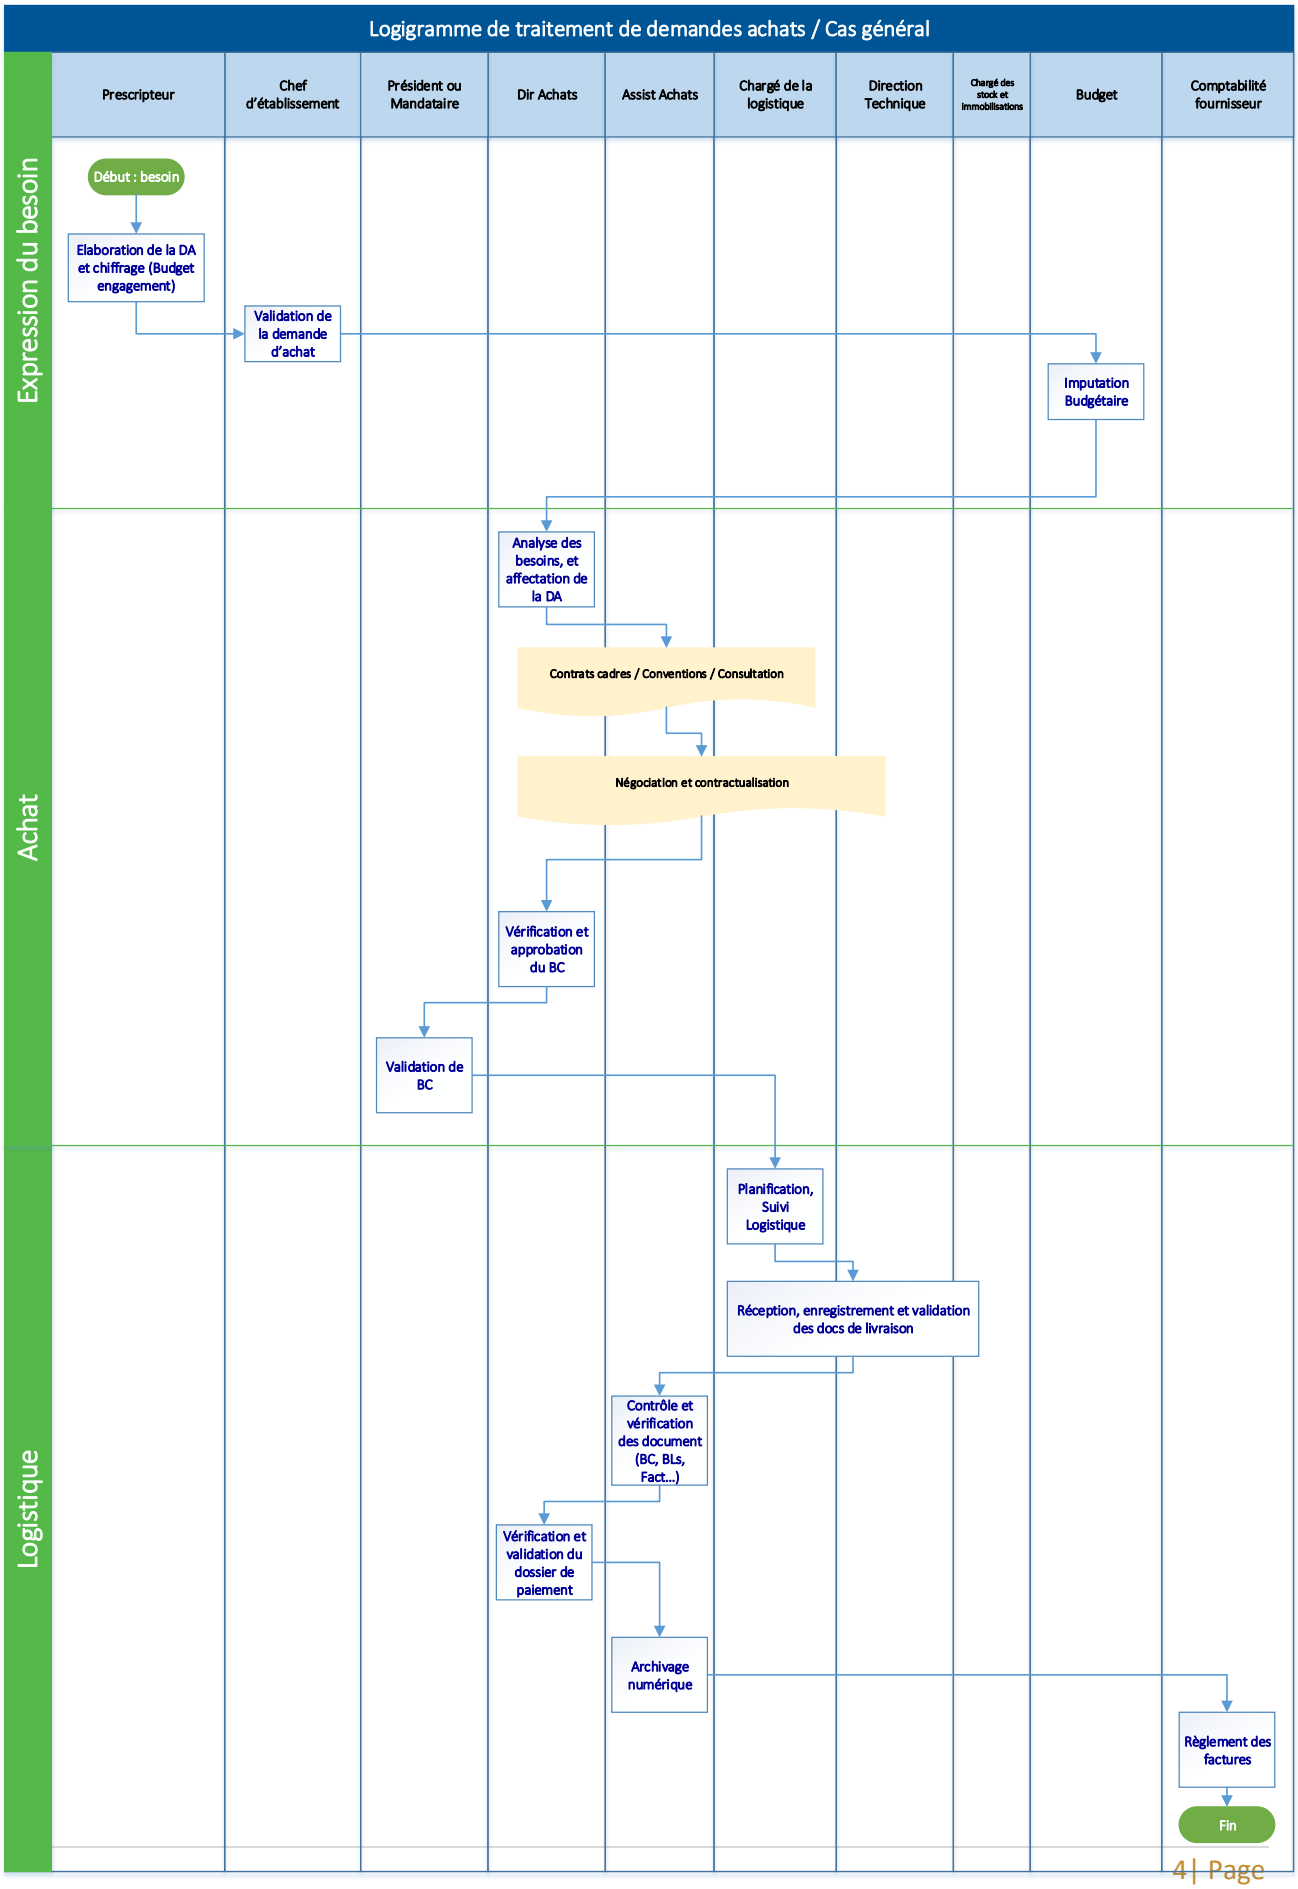

Generally speaking, the purchasing and logistics function has the mission of:

- conduct regular market monitoring;
- collect the needs of internal customers while avoiding overconsumption at the end of the financial year;
- launch consultations, conduct sourcing and supplier selection;
- negotiate prices and purchasing conditions;
- place orders;
- ensure all logistics operations;
- ensure compliance with the rules, procedures and laws in force;
- ensure compliance with professional standards and ethics: fairness, transparency, equal opportunities and absence of conflicts of interest
- integrate sustainable development criteria into market rating rules
- to encourage the sharing of equipment, particularly printing (installation of floor copiers)

The UEMF is concerned with:

- rationalize purchases and raise awareness among users about responsible consumption
- include respect for the environment and the end of life of products in procurement clauses
- give priority in its purchases to the following criteria: cost, quality, availability, delivery conditions, after-sales service, product guarantee and the good reputation of the supplier

The purchasing procedure (accompanied by the flowchart) is described in detail in the UEMF quality assurance manual

The UEMF is aware of the challenges of the purchasing professions and their role in protecting the environment (characteristics of the goods and services requested, energy efficiency of the products, carbon footprint linked to their manufacture, distances traveled and mode of transport used and their impact on energy consumption and climate change, etc.).

Responsible purchasing policy

A responsible purchasing policy requires a significant investment in training and an additional burden on buyers. That said, a drafting effort is underway. Part of it was presented in the "Responsible UEMF" project, which received the responsible innovation label.

https://ueuromed.org/sites/default/files/upload/files/politique-des-achats-responsables-uemf-2023.pdf

Responsible Digital Charter

https://ueuromed.org/sites/default/files/upload/files/charte-numerique-responsable-2023.pdf

Fight against waste

The UEMF encourages subcontractors to control food quality and avoid waste. The energy use of organic waste for the production of bioenergy (biogas, liquid biofuels) and compost is currently being tested in student projects.

- Choice of food suppliers
- Protection and preservation of food products in compliance with the national standards of the National Office for Food Safety (ONSSA)http://www.onssa.gov.ma/
- Delivery of food products in the best conditions
- Anticipation of public needs by analyzing questionnaire responses
- Menus composed with a dietician in response to individual needs: light menu, full menu
- Meal structure and consideration of specific customer needs (quantities/portions served)
- Training restaurant staff in waste sorting
- Daily donation of food leftovers to charities
- Composting peelings

Waste management

UEMF waste management policy

https://ueuromed.org/sites/default/files/upload/files/politique-uemf-de_gestion-des-dechets-2023.pdf

Waste minimization

This mission is carried out by the UEMF Heritage Department

Its objective is the protection of the environment and the health of users on the one hand and the quantitative and progressive reduction of waste on the other.

It consists of:

- responsible management of consumables and waste by encouraging sorting and reserving several spaces for sorting and temporary storage of waste
- the supply of products for maintenance, cleaning, repair and eco-designed, reusable and recyclable work
- The economy of resources used on the eco campus in particularrainwater harvesting for watering and maintaining gardens and green spaces

General principles:

- Prevention (limit production)
- Recovery (recycling, energy, etc.)
- Elimination

The waste produced is stored and then transported by the municipality's trucks.

The heritage department has a physical plan for prevention, collection, sorting (paper, glass, plastic) and waste collection: wastepaper baskets (classrooms, offices), skips, household waste and restaurant container, battery container, container for the reuse of refillable inkjet cartridges, bins of different sizes, bin bags, and a general collection station, not forgetting the collection of garden waste.

In order to limit consumption, it was decided to limit the use of plastic, disposable items, battery-powered devices and to increase the purchase of low-energy lighting.Some of the sorted items are offered (old furniture, computers, components, etc.) to student clubs upon request.

Hazardous waste (chemical products from laboratories)

Practical teaching and laboratory research generate various hazardous materials: chemical synthesis products, biological waste, used oils, contaminated objects. This waste is handled carefully (glove boxes, special gloves) and according to regulated procedures in order to reduce its harmful effects on the health of the students and researchers who handle it and on the environment.

The disposal of this hazardous waste is carried out in accordance with national regulations and with the resources of the municipal services.

General approach to waste packaging

1. Container (20 liters) labeled (indicating the type of product, the laboratory and the person responsible) suitable for the storage of each type of waste (do not mix incompatible products to avoid any explosion or fire)
2. Separate packaging of harmful, toxic or reactive products (avoid leaks)
3. All containers are inserted into a large plastic waste drum (200 liters)

The Heritage Department establishes a schedule for the periodic removal of hazardous substances.

Training courses offered by UEMF in the field of Responsible Consumption and Production

- Mandatory and cross-curricular modules (7 pillars of the UEMF) are integrated into the training of all students, in particular awareness of the sustainable environment.
- Other modules are taught in particular at the Euromed Business School (EBS): law ofthe environment, social and solidarity economy, circular economy, ethical finance, business ethics, entrepreneurship, etc.
- Several scientific fields address these aspects, in particular:
    - Master's in Water and Environmental Management (water saving, waste management, etc.)
    - Master's degree in purchasing and supply chain management in continuing education (Manage physical, financial and information flows throughout the company's supply chain, Integrate digital technologies into purchasing and supply chain management, Define and implement an effective purchasing strategy)

Research

Energy Tic Valley Platform

- The development of research and innovation activities, as well as their promotion and the valorization of initiatives aimed at scientific and technological development in the fields of bioenergy and energy storage;
- The recovery of different types of green waste and agricultural by-products for energy purposes (production of biogas, electricity, heat, etc.) as well as the development of new processes and materials for the storage of different forms of energy, including electrochemically;
- Analysis, comparison, optimization and development of new technologies for energy recovery from biomass and energy storage.

Water desalination by forward osmosis: stretch solutes and recovery methods – review

Imane Chaoui

Prof. Souad Abderafi

Prof. Sébastien Vaudreuil

Professor Tijani Bounahmidi

Water production has become a serious concern these days due to numerous environmental and social factors. Conventional desalination processes are considered energy-intensive, as energy consumption accounts for 50 to 60% of the cost of water production.

In this article, a state-of-the-art update of newly developed suction solutes such as deep eutectic solvents, ionic liquids, smart materials, and conventional FO suction solutes was performed. Finally, the challenges, opportunities, and future prospects of FO technology were discussed.

[Water Desalination by Forward Osmosis: Suction Solutes and Recovery Methods – Review: Environmental Technology Reviews: Vol 8, No 1 (tandfonline.com)]

EBS_Talks Conference: Circular Economy: Challenges, Issues and Limits

Guest on the show "avec ou sans parure" on Luxe Radio, Pr. Abdessamad RHALIMI, lecturer at the Euromed Business School, highlights the importance of the circular economy in the face of the exponential growth of global consumption by transforming our linear economy (produce, consume, throw away) and accelerating the change in production and consumption models in order to limit waste and preserve natural resources, biodiversity and the climate.

Circular economy vs. economic growth: two reconcilable notions? - With or without adornment - Podcast | Luxe Radio

UEMF Labels

Eco campus

1- The UEMF campus is an Eco-Campus that meets the highest international standards in terms of sustainable development. It was certified by COP 22 and recently obtained the French-speaking label for responsible innovation.

2-the buildings of the UEMF Eco-campus are built according to the "High Environmental Quality" approach limiting any harmful environmental impact through precise choices: low energy local materials, materials ensuring good thermal and sound insulation, open architecture ensuring maximum natural light and brightness, clean and renewable energy sources: installation of photovoltaic panels on large areas of the roofs of the buildings for the production of electrical energy with real-time measurement of the recovered energy, installation of thermal solar panels for the production of hot water, installation in progress of pipes and basins for the recovery of rainwater, recirculation of gray water (in progress), construction / rehabilitation of positive energy buildings, installation throughout the Eco-campus of sorting bins for waste, creation of sports, leisure and relaxation areas, use of a circular economy (minimizing waste by optimizing value generated by resources), installation on the UEMF Eco-campus of charging stations for electric cars. These stations are the only ones in the Fez-Meknes region and the only ones on a university campus in Morocco. Advertising panels have been placed in several places in the city of Fez inviting motorists to come and recharge the batteries of their electric cars for free on the UEMF Ecocampus, total accessibility and in all University buildings for people with reduced mobility (PRM), installation on all floors, in front of all doors, in stairways and in elevators of braille signs for the blind and visually impaired, installation on all floors and in all buildings of sanitary facilities (toilets) for people with reduced mobility.

The Green Gown Award

- UEMF is a finalist for the Green Gown Award for its exemplary sustainable development initiatives.

The Green Gown Award is an award that recognizes outstanding sustainability initiatives undertaken by universities and colleges worldwide. It is organized in partnership with the United Nations Environment Programme (UNEP) and supported by the AUF, the Association of Commonwealth Universities (ACU), and the International Association of Universities (IAU).

This year, 56 finalists were selected, representing 19 countries around the world. Among them are five member institutions of the Agence Universitaire de la Francophonie:

In Canada:HEC Montreal

In France :Mines-Telecom North Europe Institute

In Morocco:Euromed University of Fez (UEMF)

In Mexico:National Autonomous University of Mexico and University of Veracruzana

UEMF Winner of the "RESPONSIBLE CAMPUS of the YEAR" Award

Euromed University of Fez was named winner of the "RESPONSIBLE CAMPUS of the YEAR" Award, during the ceremony organized in Paris, on Tuesday, October 4, 2022, under the effective presidency of the Minister of Higher Education and Research of the French Government.

The "Responsible Establishment of the Year" category recognizes UEMF's commitment to the SDGs and its lasting impact in becoming a responsible organization with regard to the challenges of the transition in four main areas:

Leadership and governance;

Real estate and operations;

Learning, teaching and research;

Partnership and commitment.

https://www.ueuromed.org/actualites/annonces-diverses/luemf-laureate-du-prix-campus-responsable-de-lannee

UEMF Activities

Club We Green

https://www.ueuromed.org/clubs/we-green

The club's mission is to promote respect for the environment through educational and awareness-raising activities. The club creates initiatives to implement programs that encourage reflection on environmental issues, the creation of ecological habits within the community and the region, and the integration of environmental issues into daily life. The club incorporates the following themes into its action plan:

- Production and recycling of waste
- Creation of ecological urban spaces
- Energy optimization
- Raising awareness about the use of renewable energies

Hackathon

Hackathon organized by students (EBS and EMADU) in partnership with the Koutoubia groupon the theme of the revaluation of production waste. This hackathon aims to introduce students to the issues of sustainable development and the circular economy and to bring out initiatives for the revaluation of waste from the poultry production system

[Hackaton] The Euromed Sustainable Impact Challenge: by Euromed Business School and Royal Air Maroc

The EUROMED UNIVERSITY OF FEZ and its partner, ROYAL AIR MAROC (RAM), are co-organizing the Euromed Sustainable Impact Challenge, a Hackathon whose objective is to engage participants in the CSR approach with reference to the ROYAL AIR MAROC value chain. This 2nd edition takes place at the UEMF eco-campus where students from EBS (Euromed Business School), EMADU (Euromed School of Architecture, Design and Urban Planning) and EIDIA (School of Digital Engineering and Artificial Intelligence) are exploring the theme by contributing ideas for projects that are both innovative and responsible.

13 teams are supervised by RAM specialists, by Mr. Ayoub Makhloufi, founder and president of "The Mediterranean Intelligence and Public Affairs Institute (MIPAI)" as well as professors from the Euromed University of Fez in the fields of business and management as well as in architecture and artificial intelligence to respond to this problem with effectiveness and efficiency. Workshops rich in information and learning are led throughout the Hackathon in order to reflect on and propose an internal communication plan based on the game to facilitate employee awareness of CSR issues.

More than just an opportunity to democratize the theme of CSR, the values of RAM and UEMF in this sense among the various stakeholders, this Hackathon is a unique opportunity, of educational interest, allowing students to present their ideas in front of a panel of high-level experts.

[Hackaton] The Euromed Sustainable Impact Challenge: 2nd edition by Euromed Business School and Royal Air Maroc | UEMF (ueuromed.org)

#LearningPlanet Festival

On Wednesday, January 26, 2022, a hybrid conference was organized on the Eco-Campus of the Euromed University of Fez and online, dealing with the Sustainable Development Goals (SDGs) and climate change.

On the program of this hybrid conference:

- Welcome address (President of the University)
- How does the UEMF contribute to the SDGs? Mr. Bennouna (Vice-President) and Mr. Ouazzani Chahdi
- SDGs in training at UEMF – Case of the Euromed Business School (EBS): Messrs. Sebti, Rhalimi and Marhraoui
- EBS Student Activities:

    - Sharing experience on the "En-Road" simulation around climate change: 2nd year students
    - Presentation of the "Green My Eco-campus" projects of Master 1 students

- Designation of the 3 best projects
- Fence

https://festival.learning-planet.org/fr/event/green-my-eco-campus/

As part of the UNESCO World Conference on Higher Education 2022, our Professor Maha Gmira participated as a panelist on the application of AI in higher education on May 20 in Barcelona.

Objectives of participation:

- Recognize how AI can impact higher education and the challenges this poses for HEIs.
- Understanding the role of HEIs in promoting and developing AI towards the achievement of the SDGs.
- Strengthen international cooperation and partnership to promote equitable, inclusive and transparent use of #AI in higher education.

Sustainable European investment in Morocco: the subject of the round table held at the Spanish Chamber of Commerce at the initiative of RIEMAS December 16, 2022

The Research Institute for European, Mediterranean and African Studies (RIEMAS) of the Euromed University of Fez, in partnership with the Delegation of the European Union (EU) in Morocco, the Spanish Chamber of Commerce and Industry, and Eurocham Morocco, organized a round table on the theme of European sustainable investment in Morocco. Thanks to the opinions of experts, research professors from the Euromed Business School, and economic stakeholders participating in this round table, rich discussions were discussed, including the contribution of investments in the energy sector and the opportunities offered by the adoption of the investment charter and the Green Partnership concluded between the EU and the Kingdom of Morocco.

We Green Action from December 6 to 14, 2022

The We Green club made a strong comeback thanks to several awareness-raising activities on December 6 and 14.

The club also assembled a Christmas tree made from recycled materials, an opportunity to promote the importance of environmental awareness.

Other events

- Project in collaboration with the region:Green accounting / Pilot project on waste and water in the Fez-Meknes region
- From waste to nano-structured materials, bio-sourced polysaccharides and metal ions

2024: Euromed University of Fez at the heart of action for the SDGs

Launch of the first Bootcamp of the Tech4Farmers program at the Euromed University of Fez

Taking place over three days, from June 10 to 12, this event marks an important milestone for AgriTech innovators supported by the French Development Agency (AFD) as part of the "Tamkin LiTanmia" project, in collaboration with the Regional AgriTech Innovation and Entrepreneurship Hub.

Participants include a selection of promising companies representing the future of AgriTech, such as DeepLeaf, Jafife, ARWA Solutions, Yadag, Jodoor, Lombrisol, Agrinotech, AgrI-bOT, MadjiX, and EJ Solutions. Other startups are expected, promising to make this bootcamp even richer in innovation and potential synergies. Each company brings its unique expertise and vision to transform the agricultural sector and contribute to a sustainable future for the Fez-Meknes region.

The opening day was dedicated to welcoming participants, presenting the program and partners, followed by an introduction to Design Thinking and problem framing. Participants had the opportunity to interact with experts, discover development opportunities for their technological solutions, visit the University's prototyping infrastructure, and work on the proto-personas of AgriTech in Morocco.

The second day focused on developing the full-life cycle of projects, rapid prototyping, and user interview scenarios. Participants also explored the funding, expertise, and networking opportunities offered by the program.

The third and final day focused on corporate partnerships, with feedback from AgriTech companies and working groups to identify potential partners and synergies between startups. The bootcamp concluded with individual coaching sessions. This program represents a unique opportunity for startups to revolutionize the agricultural sector through innovative solutions, while contributing to the sustainable development of the Fez-Meknes region.

Wahid BENKHADDA wins the Best Oral Communication Award at the ISMESH 2024 International Symposium

We are proud to announce that Mr. Wahid BENKHADDA, a fourth-year doctoral student, won the prestigious award for best oral presentation at the ISMESH 2024 International Symposium. This distinction was awarded to him for his outstanding presentation during the event, which was held on May 7 and 8 at the Ecole Supérieure de Technologie in Fez.

Mr. BENKHADDA's participation in this symposium was part of his thesis project in the field of materials and environmental chemistry, in which he raised the issue of olive margins; a widespread problem at the regional, national level but also throughout the Mediterranean basin region.

We extend our sincere congratulations to Mr. Wahid BENKHADDA for this well-deserved recognition, which underlines the commitment of UEMF and its community to academic excellence and innovative research.

Doctoral Thesis Defense in "Additive Manufacturing and Materials Science" by Mr. Patrick MUNYENSANGA

This thesis explores the widespread use of metallic implants in medical and orthopedic surgery, which is faced with limitations such as implant degradation and long-term bonding incompatibilities. To address these limitations, the thesis proposes to improve the interfacial surface of implants, promote faster bone regeneration and better bioactivity, as well as improve biocorrosion resistance. A lightweight and porous metallic implant coated with bioactive glass was developed to stimulate osteogenic cell proliferation, promote bone ingrowth, and overcome structural bonding incompatibilities. The bioactive glass demonstrates the ability to impregnate antibacterial and therapeutic agents essential for osseointegration with the host organism. The results confirmed the formation of a bone-like layer on the implant surface, as well as improved biocorrosion resistance. This surface modification approach shows significant potential for improving the durability of orthopedic implants.

Doctoral thesis defense in Artificial Intelligence by Mr. Abebaw Degu

This thesis explores the use of reinforcement learning (RL) to improve shop floor scheduling in smart manufacturing. Due to the complexity and dynamic nature of modern production environments, traditional scheduling techniques are not sufficient. The thesis proposes a Deep Reinforcement Learning (DRL) model to minimize production duration and a Triple Deep Q Network (TDQN) model for flexible scheduling, taking into account machine breakdowns and other dynamic events. The results show that these approaches improve the efficiency, accuracy, and stability of shop floor scheduling, thus increasing the competitiveness of manufacturers in smart manufacturing.

THE Impact Ranking: 1st at the regional level and 2nd at the national level in the category SDG 12: Responsible Consumption and Production

Rank	Name	Responsible consumption and production	Overall
401–600	Abdelmalek Essaâdi University Morocco	41.1–57.4	58.8–64.4
401–600	Euromed University of Fez Morocco	41.1–57.4	64.5–69.8
401–600	Ibn Tofaïl University Morocco	41.1–57.4	69.9–75.7

Strengthening collaborations for sustainable agriculture

Euromed University of Fez hosted an American delegation as part of the LeadAR program, a University of Arkansas project focused on training leaders in agriculture and sustainable economics. The visit, led by industry professionals and researchers, was welcomed by Prof. Salim Bounou, Vice President for Research and Partnerships, and provided an opportunity to explore synergies for sustainable agricultural development in Morocco.

Through this meeting, the UEMF reaffirms its commitment to innovative solutions for a greener and more responsible future.

Roundtable: The Empirical Realist School of Law at the Intersection of Law and CSR

The Euromed Institute of Legal and Political Sciences organized a roundtable discussion on March 11, 2024, on "The Empirical Realist School of Law at the Intersection of Law and CSR," moderated by Dr. Duma Martin (Laval University) and moderated by Prof. Hasna Slamti (Euromed University of Fez). The event explored the empirical realist approach to examining labor law and protective law, emphasizing the importance of collecting empirical data to answer legal questions. The discussions presented four models of corporate social responsibility (CSR)—accompaniment, engagement, elucidation, and opposition—that illustrate the interactions between state law, efficiency, and effectiveness. The roundtable also introduced students to the concept of "consumocratic law," where consumers exert influence over companies through societal marketing.

UEMF and AFD launch the “Tech4Farmers” program

Launch of the Tech4Farmers call for applications, a support program specially designed for project leaders in the innovative agricultural technologies (AgriTech) sector.

During a launch conference that brought together key players in the agricultural sector of the Fez-Meknes region this Thursday, March 7, at the Euromed University of Fez (UEMF), the University and the French Development Agency (AFD) officially launched the Tech4Farmers program, whose objective is to support the development and marketing of AgriTech solutions that meet the needs of national agriculture and that of the Fez-Meknes region, in particular.

The Tech4Farmers program is part of an ambitious project to build a Regional Hub for Innovation and Entrepreneurship in Agriculture and Agri-Food in the Fez-Meknes region. This project is led by UEMF and AFD in partnership with the Ministry of Agriculture, Maritime Fisheries, Rural Development, and Water and Forests, the Digital Agriculture Hub, and a consortium of partners including government agencies, sectoral federations, universities, and research centers.

UEMF celebrates International Mountain Day differently

On March 1, 2024, the Euromed University of Fez organized an international conference entitled "Restoring mountain ecosystems: the case of the Fez-Meknes region," in collaboration with several partners, including the Institute of Legal and Political Sciences (ISJP) and the African Network for Sustainable Development (RA2D). The event, organized in conjunction with International Mountain Day, addressed the challenges of restoring mountain ecosystems, in line with the initiative of the United Nations Decade on Ecosystem Restoration (2021-2030).

Over two days, the conference brought together experts, researchers, and field stakeholders to discuss ecological issues and sustainable development in the mountains through panels focused on the social, economic, and political challenges of this theme. The second day took place in the municipality of Tazouta, with practical activities such as hiking, awareness-raising workshops, and local product exhibitions. This edition highlighted the importance of preserving mountain ecosystems while involving local populations and strengthening the solidarity economy.

Third steering committee meeting of the Regional Agritech Innovation and Entrepreneurship Hub

On February 21, 2024, the Euromed University of Fez hosted the third steering committee of the "Regional Hub for Innovation and Entrepreneurship in Agritech" project, as part of the "Tamkin Li Tanmia" program, funded by the French Development Agency (AFD). This event brought together various partners, including the AFD, the Digital Agriculture Hub, the IAV Institute, and other regional stakeholders, to take stock of the progress of the Agritech project.

The meeting provided an opportunity to share perspectives on progress made and discuss next steps, followed by the signing of a partnership agreement. The support program for innovative projects was presented, and an inaugural conference of the call for projects is planned for March 7, 2024, at the UEMF, focusing on agricultural issues in the Fez-Meknes region.

This event strengthened collaboration and innovation in the AgriTech sector, contributing to the creation of a strong ecosystem for agricultural entrepreneurship in Morocco.

Signing of an agreement to launch the Pan-African Chair in Sustainability & Impact Finance

The Euromed University of Fez signed an agreement with the Bank of Africa group and six other partners to launch a chair entitled Pan-African Chair in Sustainability and Impact Finance on December 19. The chair aims to promote and support scientific research and training as well as the transfer of skills and expertise in sustainability and impact finance to various stakeholders. It is a joint initiative involving several universities and institutes such as the ISCAE Group, the Faculty of Legal, Economic and Social Sciences of Casablanca, the Hassania School of Public Works, Cadi Ayyad University and the Higher School of Education and Training of the University of Agadir, with the aim of improving the competitiveness of businesses, increasing the attractiveness of the country in terms of responsible investment and contributing to the interest of the community..

Launch of an Executive MBA with a dual international degree by EPS and the Health Center

The "HEALTHCARE SUPPLY CHAIN MANAGEMENT" program trains healthcare supply chain professionals, addressing the specific needs of the sector through a modular and flexible approach. The objective is to strengthen managerial and operational skills by integrating key supply chain management concepts, developing expertise tailored to the medical, pharmaceutical, and biotechnology sectors, and facilitating the practical application of acquired knowledge. The program also emphasizes managing stakeholder interests, applying relevant KPIs, and adopting a holistic view of the value chain.

2025: Euromed University of Fez intensifies its commitment to the SDGs

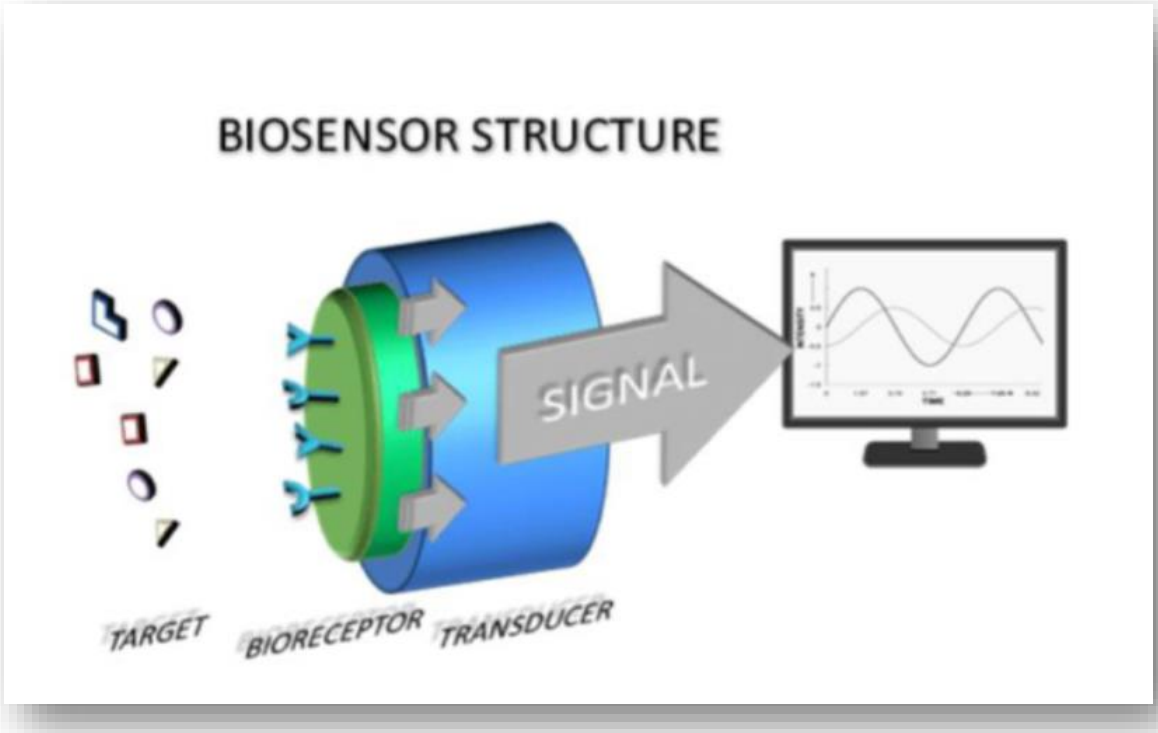

Resounding Success of the Second Tech4Farmers Bootcamp at UEMF

From September 24th to 26th, the Euromed University of Fez hosted the second Bootcamp of the Tech4Farmers incubation program for Moroccan agritech startups. Organized in partnership with the AFD and PRIE, this event aimed to sustainably transform the agricultural sector through innovative solutions. Over three days, entrepreneurs participated in feedback sessions, value creation workshops, masterclasses on social and environmental impact, and benefited from expertise to structure their business plans. This Bootcamp strengthened their role as stakeholders in agricultural innovation and their commitment to an economic and sustainable future for Morocco.

Doctoral Thesis Defense in Materials Science and Modeling by Ms. Nidal EL BIYARI

"Design, Modeling and Realization of Optofluidic Sensors Based on Surface Plasmon Resonance for Precision Sensing."

This thesis focuses on the development of high-performance optofluidic biosensors based on the surface plasmon resonance (SPR) phenomenon. A novel golden ratio approach was proposed to optimize the geometric properties of a gold-silver bimetallic configuration, achieving rapid optimization with enhanced sensitivity and resolution.

Additionally, a dual-mode plasmonic configuration combining guided modes in a dielectric waveguide and plasmonic modes on a gold film was studied. This configuration generates a detection mode (PIT) with high performance and a reference mode (TM1) to improve measurement reliability by minimizing false positives.

Finally, a new approach for microfluidic system manufacturing using stereolithography additive manufacturing was developed, integrating real-time temperature control. This method improved the mechanical and structural properties of microfluidic chips, making them highly suitable for biosensing applications, as confirmed by microscopic analyzes and mechanical tests.

Launch of Fez Smart Factory activities at UEMF

On January 16, 2025, the Euromed University of Fez (UEMF) launched the Fez Smart Factory, the first Moroccan ecosystem dedicated to Industry 4.0. This ambitious project, supported by a broad public-private and international partnership, aims to transform Moroccan industry by integrating advanced technologies such as artificial intelligence, robotics, and 3D printing.

Located on 6.6 hectares within the UEMF eco-campus, the platform includes an incubator, an R&D center, a business center, and a Pilot School Factory 4.0, currently under construction, which will offer nearly one million hours of training. This project, funded in particular by FONZID and the MCC, embodies a new industrial dynamic based on innovation, training, cooperation, and sustainability.

Regional Forum on Health Tourism: Promoting the Thermal Resources of Fez-Meknes

From April 10 to 12, 2025, the Euro-Mediterranean University of Fez (UEMF) organized the first edition of the Regional Forum on Health Tourism, focusing on the theme "Thermal Waters of the Fez-Meknes Region: Health and Tourism." This event brought together experts, researchers, as well as public and private stakeholders to discuss the sustainable development of the region through wellness and thermal tourism.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Environmental Project and International Exchange – Rotaract Club

The Rotaract Club of UEMF, in partnership with the Rotaract Club USME of India, carried out a project combining environmental commitment and international exchange.

Members collected waste in the Ain Chqef forest, collecting a total of fifteen 100-liter bags, thus contributing to the preservation of the environment.

SDG 13 Report: Actions to Combat Climate Change

Greenhouse gas (GHG) emissions in Morocco

At the time of COP 27, what greenhouse gas emissions from energy in Morocco?https://www.researchgate.net/publication/355809620

In 2018, and according to official data, Morocco contributed 1/500th of global greenhouse gas emissions, and ranked 47th in the ranking of total emissions of 160 countries.

After increasing by +0.4% compared to the previous year, greenhouse gas emissions from energy consumed in Morocco would have reached 63,953 Gigajoules (Gg) in 2020 (million tonnes of CO2 equivalent)

In 2020, greenhouse gas emissions break down as follows:

- 34,650 Gg (+2.8% in 2020) due to oil, or 54.2% of the total
- 27,510 Gg (+0.5% in 2020) due to coal, or 43.0% of the total
- 1,793 Gg (-29.2% in 2020) of natural gas, or 2.8% of the total,

Emissions from the 6,988 GWh of renewable electricity from wind, solar, and hydroelectric power are zero. As a result, greenhouse gas emissions from energy consumed in Morocco amount to 1.78 tonnes of CO2 equivalent per capita per year in 2020.

Climate change is a brake on development, particularly for emerging countries like Morocco. It leads to increased poverty and slows economic growth, hence the need to help address it.

The process of combating global warming is a voluntary national commitment to reduce its GHG emissions by 2030 by 45.5% (of which 18% is unconditional and without international cooperation:https://www.ecoactu.ma/emissions-de-ges-maroc/ and requiring a total investment of $50 billion.

The European Union and Morocco have strengthened their cooperation on environmental protection, biodiversity preservation, and the fight against climate change with the launch of the EU-Morocco Green Partnership. This is the first EU Green Partnership with a partner country aimed at advancing the external dimension of the European Green Deal through action on the ground. The work will focus on key thematic areas such as climate and energy, the environment, including marine and maritime issues, and the green economy.

Climate change in the Fez Meknes region

"Adaptation to Climate Change in Maghreb Agriculture" Project (ACCAGRIMAG)

MAIN LESSONS

- A rise in temperatures predicted by all climate projection models.
- A downward trend in precipitation surrounded by more uncertainty.
- A crop growth period that will tend to shrink, shortening the production period by one to three months.
- Olive and almond crops will be little affected by 2050.
- Spring crops, such as chickpeas, will be hit hard by the effects of climate change.
- A significant reduction in the use of land for wheat cultivation, although conditions are more favourable in the North and in mountain areas.

In the Fez-Meknes region, yields remain unchanged across the region in a moderate climate change scenario (RCP4.5), with geographically disparate effects: lowland areas are heavily affected and possible production gains in mountain areas. Conversely, in a more pessimistic scenario (RCP8.5), yields fall sharply throughout the region with more frequent dry periods and more irregular yields increasing the risk for producers. The large-scale implementation of climate change adaptation measures is becoming necessary: agroforestry, direct seeding, agricultural insurance, the use of certified seeds, plant protection, supplemental irrigation and soil fertility management.

What is the university doing to help combat the harmful effects of climate change?

Eco campus

The UEMF project was designed using the Negawatt approach: The buildings at UEMF are new and less than 7 years old. UEMF reaffirms its firm commitment to ensuring that all renovations, restorations, or new constructions meet the highest standards of energy efficiency and sustainable development:

The Eco-Campus meets the highest international standards in terms of sustainable development.

The buildings are constructed according to the HQE "High Environmental Quality" approach, limiting any harmful environmental impact through precise choices: low-energy local materials, materials ensuring good thermal and sound insulation, open architecture ensuring maximum natural light and brightness, clean and renewable energy sources: installation of photovoltaic panels on large areas of the buildings' roofs for the production of electrical energy with real-time measurement of the recovered energy, installation of thermal solar panels for the production of hot water, ongoing installation of pipes and basins for rainwater recovery, recirculation of gray water (in progress), construction / rehabilitation of positive energy buildings, installation of sorting bins for waste throughout the Eco-campus, creation of sports, leisure and relaxation areas, use of a circular economy (minimizing waste by optimizing the value generated by resources), installation on the UEMF Eco-campus of charging stations for electric cars. These stations are the only ones in the Fez-Meknes region and the only ones on a university campus in Morocco. Billboards have been placed in several places in the city of Fez inviting motorists to come and recharge the batteries of their electric cars for free on the UEMF Eco campus, total accessibility and in all University buildings for people with reduced mobility (PRM),

installation on all floors, in front of all doors, in the stairways and in the elevators of braille signs for the blind and visually impaired, installation on all floors and in all buildings of sanitary facilities (toilets) for PRM.

The UEMF eco campus was certified by COP 22 and obtained the French-speaking label for responsible innovation for its "sustainable UEMF" project, as well as receiving the "Responsible Campus of the Year" label in 2022.

Awareness and information conferences

Conference-Debate: Climate Change: Challenges for the Fez-Meknes Region » November 10, 2021 (An event co-organized by UEMF and the World Bank and the participation of the think tanks Policy Center for the New South and the Research Institute for European, Mediterranean, and African Studies (RIEMAS))

As indicated in the report on the New Development Model (NMD) (https://www.csmd.ma/rapport-en), territories represent a key level for anchoring development in a sustainable and inclusive trajectory. Even though the challenges of climate change are global, it is clear that local actors will have a leading role to play in defining and implementing the solutions most suited to the challenges but also to the opportunities of each territory. This event aims to gather from key actors in the Fez-Meknes Region their perspectives on the challenges posed by climate change but also their recommendations for actions to be implemented locally to anchor the region in a resilient and sustainable development trajectory.

The Fez-Meknes region has a powerful tool for this purpose: the Regional Information System for the Environment and Sustainable Development.https://siredd.environnement.gov.ma/fes-meknes/ChangementClimat/?idICible=0

As the upcoming 27th edition of the Conference of the Parties (COP27) scheduled to take place in Sharm El Sheikh, Egypt, from November 6 to 18, Mr. Mourinho Félix, Vice-President of the European Investment Bank (EIB), has booked a visit to UEMF to discuss with students and lecturers the challenges and opportunities of the climate transition as well as the role of the EIB, as a Climate Bank, in promoting sustainable models in Morocco and around the world.

Training

Master: DESIGN AND ENGINEERING OF GREEN BUILDINGS (CIBV)

Modules taught:

- Transfer phenomena;
- Fluid mechanics;
- General and applied thermodynamics;
- Materials for energy efficiency in buildings;
- Standards and climate;
- Ventilation and lighting of the building;
- Air conditioning, heating and energy integration;
- Renewable energy for buildings;
- Eco-design of a building;
- Energy analysis and economic evaluation of the building;
- Green and smart buildings;
- Sustainable development and waste management;
- Preliminary design of an efficient building;

Specialized Master's: Environmental Engineering and Water Management

The program aims to train managers with a cross-disciplinary vision of environmental issues and water management in particular. The development of clean technologies (processes, methods, or tools) to solve environmental problems attributable to human activities is emphasized, with a focus on the Euro-Mediterranean region.

To do this, the student acquires in this sector advanced knowledge in the field of the environment (scientific and technical methods, knowledge of ecosystems, techniques for analyzing and treating pollutants, water management and treatment, remote sensing and GIS tools, national and international policy, green economy, climate and climate change, etc.) and energy efficiency.

Climate Continuing Education Project

Title of the Training Module*

Background on the UNFCCC process and IPCC reports

State of knowledge on climate change, Conference of the Parties (COP) and Sustainable Development Goals (SDGs)

Implementation of National Greenhouse Gas Inventory Systems: Case of Morocco's SNI-GES

The Role of NEXUS Water/Energy/Food Security

Integrating climate change adaptation into urban environments

Climate Change and Adaptation in the Rural World

Mainstreaming Climate Change into National Development Planning and Budgeting: NDC and PNA

Project financing tools to combat climate change: Example of the Green Climate Fund

The MRV system

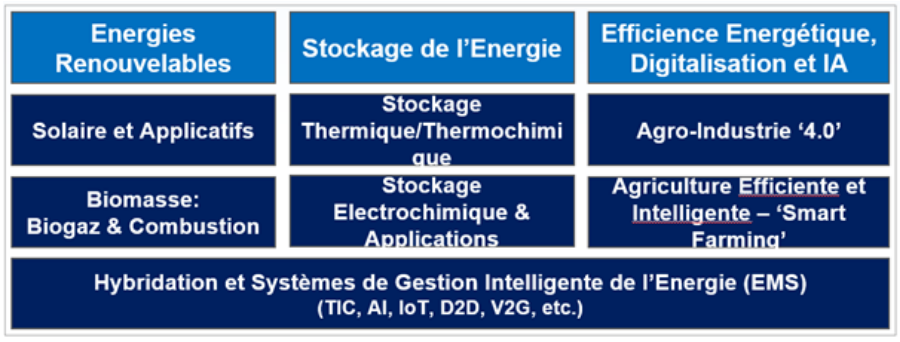

Climate diplomacy

Research and Development: Renewable Energies

Innovation structures

Agro Energy TIC Valley

It is a joint platform for testing, research and training in the fields of bioenergy and energy storage, created jointly by the EuroMed University of Fez and the Institute for Research in Solar Energy and New Energies (IRESEN).

Renewable Energy, Storage and Energy Efficiency Platform

The Renewable Energy, Storage, and Energy Efficiency Platform encompasses several facilities for the design, manufacturing, and characterization of devices that meet sustainable energy development criteria. In addition to this intramural infrastructure, the university also has open-air laboratories, including a house equipped with several types of sensors for energy efficiency research.

Research topics

Renewable Energies and Energy Efficiency

- Technological and operational development of solar thermal, photovoltaic, wind and hydroelectric production technologies. This work will cover both possible technical developments in current energy production and storage technologies and the development of new materials aimed at increasing energy efficiency in the production, storage and distribution of renewable energies.
- Management and control of the various study phases (installation, operation, maintenance of electrical installations and equipment);
- Improvement of processes and devices related to energy engineering;
- Integration of renewable energies into industrial processes;
- Mastery of the different methods of calculating energy and thermal systems;
- Development of identification and prognosis methods for wind generators (Project to be developed with the EDF Energies Nouvelles group);
- Systems for cleaning, aligning and maintaining solar parks to maintain high transformation efficiency (Project to be developed with the EDF Energies Nouvelles group).
- New classes of nano-composite and bio-composite polymers (Project to be developed with the PSA group for the design of materials with minimal ecological impact and mechanical characteristics suitable for the construction of automobile shells);

Cooperation projects

AgriTech

The French Development Agency (AFD) and the Euromed University of Fez (UEMF) signed a financing agreement for the design and implementation of aAgriTech hub in the Fez-Meknes regionThis is a unique project in Morocco that involves the structuring of a regional innovation and entrepreneurship hub in the agriculture and agro-industry sector. To this end, the AFD is providing the UEMF with a grant of 16.3 million dirhams (1.5 million euros) for the design and implementation of this project within its Eco-campus. In the Fez-Meknes region, this pilot project aims to support the upgrading of the agro-industrial sector. Several capacity-building actions, through support for entrepreneurs, the promotion of research and development and the adaptation of the local agricultural sector to international standards and the fight against the effects of climate change, will be financed by this technical assistance. The ambition is to see the emergence of an agro-industrial cluster driven by entrepreneurship and the digitalization of economies.

Eumed Climate Hub (in cooperation with the UfM)

Euro-Mediterranean Climate Change Capacity Building Hub Project

Functions and justification.

The Euro-Mediterranean region – challenged by an urgent need to reduce emissions and adapt to climate change – possesses relevant and considerable know-how, but it is nevertheless fragmented and differentiated between communities, difficult to understand outside of universities or specialized institutions, poorly shared, not pooled as a common set of resources, and rarely accessible to professionals called upon to materialize progress on mitigation and adaptation in their ordinary working lives: across the region, actors in fields such as agriculture, fisheries, urban management, construction, infrastructure, water, energy, transport, finance, trade, manufacturing, etc. have unequal access to training, information and the exchange of essential good practices.

The Euro-Mediterranean Capacity Building Centre on Climate Change – "EuMed Climate Hub" – is therefore designed as a physical location and an online web resource to connect regional knowledge and best practices and provide pragmatic training to field actors at all levels, with the aim of accelerating sustainability through widespread capacity building.

On site and online it will host:

- EUMED CLIMATE SEMINARS - pragmatic training on adaptation, resilience and mitigation through adaptation, for central and local administrations, the private sector and NGOs
- EUMED ENERGY FOR CLIMATE SEMINARS - pragmatic training on SDG-oriented energy efficiency, the transition to renewable energy and systems integration;
- THE EUMED TECHNOLOGY CLEARING HOUSE - a virtual and on-site meeting space to share, compare and integrate diverse know-how and promote reciprocal technology transfer, based on the awareness that technology also includes all the fruits of a thousand-year-old experience held in the South in the management of arid zones, urban and rural landscapes, infrastructure, construction, energy efficiency solutions, etc.
- THE EUMED CLIMATE SCIENCE AND POLICY PLATFORM - responding to the pragmatic needs for data-, information- and science-based solutions emerging from central and local institutions, based on the contribution of existing scientific networks, including MEDECC
- THE EUMED CLIMATE PORTAL - a web portal assisting in the coordination and communication of the above-mentioned activities, but also serving as a separate engine

for capacity building and access to climate finance, particularly for local governments and stakeholders

UEMF Activities

A scientific research published in the media under the title: "Businesses and climate change: a structural relationship for a clear reduction in carbon emissions", carried out by Professor Othmane BENMOUSSA. Media 24. Edition of July 26, 2022

Most greenhouse gases come from electricity production, transportation, and industrial and agricultural operations—three "levers" that we can use to reduce carbon emissions in particular.

– Regarding electricity, the cost of renewable energy has fallen much faster than expected. With some energies such as wind and centralized solar, we are beginning to reach the threshold where it is now cheaper to build new facilities than to operate existing fossil fuel infrastructure. However, we must continue to invest in cheaper, more efficient energy storage solutions and update our energy grids while finding ways to circumvent some of the entrenched lobbies that are slowing the transition to renewable energy.

– Transportation, on the other hand, represents a more difficult technological challenge. While there has been some momentum in the transition to greener passenger vehicles, other transportation vectors such as freight trucking, maritime shipping, and air travel are not as easily electrified. These modes of transport require incredibly dense and portable energy sources. This will require continued development of new technologies such as "green

hydrogen," i.e., hydrogen produced by electrolysis from renewable energy sources, while highlighting a limiting factor: water resources, which are becoming increasingly scarce in several countries, regions, subcontinents, and continents.

– The last lever that can be pulled concerns industry and agriculture. The industries that produce the most greenhouse gases are those that consume a lot of energy and heat, primarily those that use iron, steel, and cement. For agriculture, the production of fertilizers, methane (from livestock), and deforestation are major emissions concerns.

Participation in the Learning Planet Festival with the Green My Eco-campus project

https://festival.learning-planet.org/fr/event/green-my-eco-campus/

Pr. Hafsa El Bekri represents UEMF at COP 27 in Sharm el-Sheikh, November 17, 2022

Prof. Hafsa El Bekri traveled to Sharm el-Sheikh for COP 27 to represent the Euromed University of Fez at this global event, which brought together approximately 200 countries, delegations, media, NGOs, businesses, observers, and researchers. The objective of this African COP is to put new actions to combat global warming and its impacts on the negotiation agenda.

Pr. Hafsa El Bekri also released a pre-cop column entitled "From Marrakech to Sharm El-Sheikh: Africa at the center of the climate agenda" published by challenge magazine in which she raises, among other things, the role of the RIEMAS (Research Institute for European, Mediterranean and African Studies) Think Tank of the UEMF in the study of the new narrative of climate action in Africa and for Africa.

As a reminder, the first African COP was held in Marrakech in 2016, following which the UEMF eco-campus received the COP 22 Label for its ecological assets and compliance with environmental standards and sustainable development (lower energy consumption, integration of renewable energy technologies, maximum natural light, recycling, green spaces, etc.).

Roundtable: Water, Agriculture and Food Security, Building a Nexus Approach to Africa's Climate Change Narrative February 2, 2023

The Research Institute for European, Mediterranean, and African Studies (RIEMAS), a Think-Tank at the Euromed University of Fez, organized its first roundtable of the 1.5 Hours for Climate - Africa Moonshot Initiative, which focused on the theme "Water, Agriculture and Food Security: Building a Nexus Approach to the Climate Change Narrative in Africa".

1.5 hours for Climate – Africa Climate Moonshot Initiative, is a project led by RIEMAS, 4C Maroc, Euro-Mediterranean Economists Association - EMEA, Mercure Cab Fatima B. NDOYE and Positive Agenda Advisory. These monthly thematic meetings aim to bring together high-level guests and regional experts around major issues related to climate action in order to contribute to the creation of a dynamic conducive to advocacy in favor of a climate agenda anchored in African realities ahead of COP28.

This round table was moderated by Professor Hafsa El Bekri, lecturer at the Euromed Business School and Co-Director of RIEMAS.

Webinar: "Climate emergency in the Mediterranean: what action is the University taking?" March 8, 2023

With a view to presenting the important role of universities in raising awareness among university communities and the actions they can take to promote sustainable development, Alumni for the Planet and AUF - North Africa are co-organizing a free webinar on the theme: "**Urgence climatique en Me diterrane e:quelle action de l'Universite ?Agir en faveur du climat dans son organisation**"

Indeed, in order to encourage higher education graduates to commit to the climate and the environment in their university, this webinar aims to:

- Present the challenges of climate change;

- Provide access to specialized resources and networks to learn about and take action in support of your university;
- Show that it is possible to deploy climate awareness actions

Speakers:

- Dr. Philippe Drobinski, Climatologist, Director of the Dynamic Meteorology Laboratory and the Energy4Climate Interdisciplinary Center
- Prof. Mustapha Bennouna, Advisor to the President of the Euromed University of Fez, will share his testimony. He will present the actions he has taken within his university to address climate and environmental issues.

UEMF students head to Tel Aviv for Jamweek in Shenkar to address climate change issues February 27, 2023

The impact of global warming is already irreversible, and environmental issues are now a strategic issue at all levels. With the current rate of population growth and the intensification of industrial activities, among other things, major challenges must be addressed. In response to these concerns, Shenkar College of Engineering, Design and Art in Tel Aviv organizes the annual "JAMWEEK," a creative hackathon that aims to bring together students and experts to propose solutions that can reduce CO2 emissions and limit global warming.

This year, the 11th edition of JAMWEEK, which took place from February 27 to March 2, 2023, was very special because it saw the participation of around ten students from the Euromed University of Fez, who traveled to Tel Aviv to meet students from Israel, Germany and New York to work hand in hand and conduct a collective brainstorming session. With a focus on specific regions such as the Mediterranean Sea, the Red Sea and the desert, the goal is to

find ideas that promote awareness of environmental problems and propose measures to mitigate them.

Various academic backgrounds from UEMF were represented: Artificial Intelligence, International Business, Management, and even Humanities and Social Sciences. Participants were invited to propose, in teams, solutions applicable to several areas: water pollution, biodiversity preservation, and the protection of flora and fauna.

UEMF participates in the third edition of the Mediterranean Climate Forum June 22, 2023

The third edition of the Conference of the Parties of the Mediterranean Rim Countries on Climate Change (MedCop Climate) took place from June 22 to 23 in Tangier, Morocco.

This contribution calls for accelerating the pace of the fight against climate change on the one hand, and on the other hand for intensifying actions to preserve ecosystems in the territories.

At this international conference, Professor Hafsa El Bekri, a lecturer and researcher at UEMF and Co-Director of the Think Tank Research Institute for European, Mediterranean and African Studies (RIEMAS), moderated the Side Event "Assessment of environmental considerations in regional budgets" by addressing several issues related to the implementation and promotion of climate governance at the local level. Professor El Bekri also spoke on the Panel "Local Stocktake and Way Forward."

This event was attended by ministers, public organizations, donors, businesses, territories and NGOs to address the various challenges faced by the Mediterranean under climate pressure.

Professor Azzouzi's speech on climate change

As part of the preparations for the "COP28" events, which will be held from November 30 to December 12, 2023 in the United Arab Emirates, Professor Azzouzi, President of the Chair of the Alliance of Civilizations and member of the Board of Directors of the Euromed University of Fez, was invited by Emirati television in Abu Dhabi to discuss the evolution of global climate change.

During this meeting, Professor Azzouzi stressed the seriousness of the situation facing our planet due to global warming resulting from gas emissions and environmental pollution which threatens the future of the Earth on land and at sea.

He also stressed the need for positive action and to activate proposals and recommendations that would help reduce this phenomenon and take the necessary measures, at the national and international levels, to reduce the negative effects resulting from climate change, similar to what countries such as the United States are doing. This is what the Emirates and the Kingdom of Morocco are doing, which are making tireless efforts to develop the fields of renewable energy and green technologies.

In his speech, Professor Azzouzi stressed the importance of the participation of all stakeholders, particularly industrialized countries that directly contribute to the exacerbation of this environmental crisis, and propose realistic solutions that would help reduce carbon dioxide emission levels.

CLUB WE GREEN IN ACTION: "ENHANCING IFRANE NATIONAL PARK: LET'S OPEN OUR EYES!"

Saturday, October 28, 2023; the “We Green” club of students from the Euromed University of Fez (UEMF) organized an awareness day for its members through visits to several environmental centers as well as a clean-up action in the Ifrane National Park.

As part of these social activities, the "We Green" club kicked off this day aimed at raising public awareness of environmental issues with the main objective of: Encouraging reflection on environmental issues, creating ecological habits through a cleaning action and awareness of biodiversity issues through a visit to the Ifrane National Park, its fish farming station in Ras El Mae and its cedar house. The day was marked in particular by a cleaning action in the forest of the Zerouka I lake in Ifrane with the ambition of reducing the negative impact of waste and residues that affect the environment.

Note that Zerrouka I is a small, shallow, drainable artificial fish pond. It is located on the Zerrouka (or Zrouka) wadi, the main tributary of the Tizguite wadi. The dike is about 300m from the spring, so its waters flow directly into it. The reservoir is limited by a concrete wall, at least on the west bank. The spring waters are also used to supply the city of Ifrane with drinking water.

At the level of this body of water which is an integral part of the Ramsar Site of Oued Tizguite; the vegetation is not very varied (around fifteen species with a wide geographical distribution) and very limited in space, the edges of the lake being concreted and mowing is frequent there.

It is a fairly sheltered trout lake, somewhat interesting for birds. It is home to few wintering birds (less than 400 birds), the population being composed mainly of divers: coots and crested coots, little grebes, pochards, tufted ducks and ferruginous wagtails, with occasional shovelers and/or mallards. Among the breeders, the common coot (20-25 pairs), the crested coot (about 10 pairs) and the little grebe (5-8 pairs) are the most regular.

Finally, it should be noted that the Euromed University of Fez is a public utility, non-profit institution with an eco-campus that meets international standards and provides a pleasant and stimulating environment for its students from more than 40 nationalities.

UEMF graduates are equipped with training in soft skills, study skills, life skills and professional skills and this profile; based on several pillars; allows students to acquire numerous skills related in particular to multilingualism, multiculturalism, innovation and entrepreneurship, the digital environment, international mobility, and sustainable development in addition to the pillar of social responsibility and eco-citizenship through which students are instilled with the values of respect for the environment, sustainable development and civic responsibility.

https://premiumtravelnews.com/2023/10/30/club-we-green-parc-national-difrane/

Other event

- Organization of visits on May 30 (Shenkar) and May 31 (EU) in particular, with the scheduling of a training session on climate change including modeling and simulations, in preparation for the workshop on the subject which is part of the activities on May 31, 2022.

2024: Euromed University of Fez at the heart of action for the SDGs

Conference on the theme: “Power to X: Opportunities and Challenges” by Mr. Andreas Meurer

The Euromed University of Fez had the pleasure of organizing, on the occasion of World Environment Day, the conference "Power-to-X: Opportunities and Challenges", which was held on June 5, 2024 at the University's eco-campus. This conference is part of the University's commitment to environmental protection and the promotion of the eco-responsible approach through the adoption of civic and ecological actions on a daily basis within an ideal setting offered by the UEMF Eco-campus.

The conference was moderated by Dr. Andreas Meurer, a leading expert from the German Aerospace Center (DLR). The Power-to-X (P2X) theme covered a wide range of technologies for converting electricity into various forms of energy or chemical products. These innovations are essential for the integration of renewable energy and the reduction of carbon emissions in industrial sectors. Mr. Meurer shared his expertise on recent advances and challenges to maximize the potential of P2X technologies.

This event was aimed at a diverse audience, including professors, researchers, and students, all engaged in the field of energy and sustainable development. The conference provided a unique opportunity to exchange ideas, discuss future prospects, and build partnerships to promote sustainable energy technologies.

Visit of Swedish Ambassador HE Jörgen Karlsson to the Euromed University of Fez

Euromed University of Fez hosted HE Jörgen Karlsson, Swedish Ambassador to Morocco, to discuss potential future collaborations with the University's President, Prof. Mostapha Bousmina. The meeting focused on topics of mutual interest and explored opportunities for cooperation in areas such as climate change research, immigration, intergenerational dialogue, as well as innovation and entrepreneurship.

Sweden, with its strong diplomatic relations, seeks to strengthen contacts and cooperation with the countries of the MENA region, as evidenced by a dialogue initiative launched in 1997. The Euromed University of Fez shares values of dialogue and multiculturalism with the Swedish Dialogue Institute for the Middle East and North Africa. In 2023, the Institute conducted a participatory process on intergenerational dialogue, aligned with the University's commitment to promoting intercultural dialogue in its research and development projects.

Wahid BENKHADDA wins the Best Oral Communication Award at the ISMESH 2024 International Symposium

We are proud to announce that Mr. Wahid BENKHADDA, a fourth-year doctoral student, won the prestigious award for best oral presentation at the ISMESH 2024 International Symposium. This distinction was awarded to him for his outstanding presentation during the event, which was held on May 7 and 8 at the Ecole Supérieure de Technologie in Fez.

Mr. BENKHADDA's participation in this symposium was part of his thesis project in the field of materials and environmental chemistry, in which he raised the issue of olive margins; a widespread problem at the regional, national level but also throughout the Mediterranean basin region.

We extend our sincere congratulations to Mr. Wahid BENKHADDA for this well-deserved recognition, which underlines the commitment of UEMF and its community to academic excellence and innovative research.

UEMF students make the voices of young Africans and Euro-Mediterraneans heard before the Parliamentary Assembly of the Union for the Mediterranean

On February 14, 2024, students from the Euromed University of Fez organized a summit under the theme "Euro-Mediterranean and Transatlantic Openness" with more than 200 participants from 30 countries. This summit addressed topics such as energy ethics, sustainable development, transportation, climate change, and African challenges.

The summit culminated in the Call for Investment in the Future, read out on February 16 at the 8th Summit of Speakers of Parliaments of the Union for the Mediterranean. This call underscores the need to strengthen cooperation between Europe and Africa through concrete projects, allocate pledged funds for climate resilience, and support initiatives such as the Nigeria-Morocco gas pipeline.

The students also welcomed Morocco's initiatives for economic integration, infrastructure, and education in Africa, while calling for a "Marshall Plan" for education and research in Africa as an investment in the future to combat poverty, terrorism, and illegal immigration.

https://ueuromed.org/actualites/annonces-diverses/les-etudiants-de-luemf-font-entendre-la-voix-des-jeunes-africains-et

Conference by Mr. Ghazi Gherairi : What alliances for what world in 2024?

As part of its conference cycle, the Euromed University of Fez organized a meeting led by Mr. Ghazi GHERAIRI on February 7, under the theme "What alliances for what world in 2024?" Mr. GHERAIRI, a doctor of public law and former Tunisian Ambassador to UNESCO, led a collective reflection on the alliances of civilizations and the need for a new, more just and united world order, taking into account the diversity of contemporary societies.

During this conference, Mr. Gherairi addressed crucial issues related to international relations, including the climate crisis, humanitarian crises, and the emergence of new technologies. He emphasized the importance of constructive dialogue and international cooperation to address these challenges and build a peaceful world.

The event also provided an opportunity for students of the Master's program in "Conflict Management and the Alliance of Civilizations" to engage directly with the speaker on the topics discussed. This meeting is part of the activities of the Alliance of Civilizations Chair, created during the United Nations Alliance of Civilizations World Forum in November 2022, with the aim of stimulating reflection and intellectual exchange among UEMF students.

International Conference: “Techniques and Environment”

On January 25, 2024, the ICESCO-Euromed Chair in “Arts, Societies and Civilizations” organized an international conference in collaboration with CETCOPRA of the University of Paris 1 Panthéon-Sorbonne on the theme of “Technology and Environment”. The event brought together Moroccan and international figures, including Dr. Mohamed Zinelabidine of ICESCO, as well as a panel of researchers from the University of Paris 1.

The conference explored multidimensional approaches to responding to social and humanitarian crises, focusing on the interactions between technology, society, ethics, and the environment. Two discussion sessions were organized: one on the use of technology in emergency situations, and the other on the social issues related to technology.

This meeting provided a platform for enriching debates between speakers, teacher-researchers and students from the Euromed University of Fez.

https://ueuromed.org/actualites/annonces-diverses/colloque-international-techniques-et-environnement

UEMF at the World Power-to-X Summit: Green Hydrogen and Innovation

Professors Tijani Bounahmidi and Othmane Benmoussa represented the Euromed University of Fez (UEMF) at the World Power-to-X Summit in Marrakech. The UEMF-HACE Side Event, held on October 9, brought together experts, decision-makers, and industry leaders to discuss green hydrogen technologies, highlighting innovations and value chain optimization in this booming sector.

Participants, including members of the HVM (Hydrogen Green Marine) Consortium, discussed global trends in green hydrogen and its benefits, sharing their expertise on sustainable solutions for carbon-free energy production. The presence of UEMF professors allowed them to showcase their expertise in sustainable development and establish promising partnerships during the B2B meetings. These collaborations aim to develop technological solutions to make green hydrogen accessible and efficient.

https://ueuromed.org/actualites/congres-et-colloques/luemf-au-world-power-x-summit-hydrogene-vert-et-innovation

2025: Euromed University of Fez intensifies its commitment to the SDGs

COP29: Reinventing global economic models

"The planet is facing an unprecedented climate emergency, and COP29, held in Baku, Azerbaijan, from November 11 to 22, 2024, represented a crucial step towards a sustainable future. In a context where the impacts of climate change are becoming increasingly intense, this conference offered a unique platform to engage in a global dialogue and drive decisive action. At the heart of the debates were two essential levers: international trade and corporate social responsibility (CSR). These two pillars play a fundamental role in the ecological transition by catalyzing innovation, redefining economic models, and strengthening global partnerships. This forum explores the strategic challenges of COP29 and highlights the opportunities for both businesses and nations to collaborate for sustainable development."

https://ueuromed.org/actualites/articles/cop29-reinventer-les-modeles-economiques-mondiaux

UEMF at the heart of discussions on renewable energies at EnerGaïa

The Euromed University of Fez participated, as part of the Moroccan delegation led by the Green H2 Cluster, in the renewable energy forum.EnerGaïafrom December 10 to 12, 2024.

Several contacts have been made, in particular with the Vice-Presidency for the Economy of the Occitanie Region for partnerships in terms of training with universities and institutes in the Region, incubation and cultural and sporting activities with the ambition of initiating lines of research in these fields alongside the creation of courses in sports and team management.

Green hydrogen and the entire inherent value chain were also at the center of discussions with France Hydrogène, as were the theme of water and the underlying technologies, in addition to the Agritech or precision agriculture sector.

The participation of the Euromed University of Fez in the Technocampus Hydrogène Occitanie, which aims to be the largest center in France for research, testing, technological innovation and teaching in the field of green mobility, was also discussed.

https://ueuromed.org/actualites/recherche-developpement/luemf-au-coeur-des-echanges-sur-les-energies-renouvelables

International conference: The Architectural and Landscape Identity Confronting Natural Risks in the Euro-Mediterranean Region

The Euromed School of Architecture, Design and Urban Planning (EMADU) of the Euromed University of Fez organized an international symposium on December 12, 2024, on architectural and landscape identity in the face of natural risks in the Euro-Mediterranean region. The event brought together experts and decision-makers to discuss the challenges related to increased natural risks such as earthquakes, floods, fires and landslides in a context of climate change and rapid urbanization. The discussions highlighted the vulnerability of heritage buildings such as those affected by the Al Haouz earthquake in 2023. Participants addressed several areas including the adaptation of construction practices to risks, the use of local materials and traditional techniques, the role of infrastructure and sustainable urban planning in risk management. The symposium highlighted the importance of reconciling population safety and the preservation of architectural heritage in Euro-Mediterranean territories.

https://ueuromed.org/actualites/congres-et-colloques/colloque-international-architectural-and-landscape-identity

2nd edition of the Students' Innov'UP 2024 Hackathon: Innovating in the face of water stress

The 2024 Students' Innov'Up Innovation Hackathon, organized by the European Union in Morocco, the EIB, and the Euromed University of Fez, took place on December 16 and 17 under the theme "Transforming Water Stress into a Driver of Resilience." Following a three-week pre-hackathon phase, 11 finalist teams presented their innovative projects to address water-related challenges.

Three teams were awarded prizes:

- Hydrovision (1st prize) for the “Aqua” application`Noah`",
- Pure Aqua White (2nd prize) for a wastewater reuse system,
- Créatech (3rd prize) for a solar device for producing drinking water.

The “coup de cœur” prize was awarded to Raha for HydroPoly, an educational game on water management.

Moroccan Parliament: Professor Mostapha Bousmina presents Morocco's strategy for energy transition and sustainable development

The Moroccan Parliament, in collaboration with the Fondation des Rencontres du Futur, the Chamber of Deputies and the Senate of the Republic of Chile, hosted the "Congress of the Future" on December 17 and 18, 2024 at the Parliament headquarters in Rabat.

This event brought together several Moroccan and Chilean ministers and parliamentarians. It provided an opportunity to discuss future issues. On this occasion, the President of the Euromed University of Fez, Professor Mostapha Bousmina, presented Morocco's strategy for energy transition and sustainable development, highlighting the country's commitment to these crucial areas.

He also presented the Moroccan renewable energy plan, the production of green hydrogen and its applications, including ammonia production, seawater desalination, battery and electric vehicle production, as well as the Nigeria-Morocco gas pipeline project. The focus was on the achievements, challenges, and areas of concern, while emphasizing technological and research-innovation challenges in these different areas.

UNESCO-Euromed Chair in Mediterranean Interculturalities: Security and Sustainable Development

The Euromed University of Fez organized a conference led by Professor Abderrahman Tenkoul on the links between security and sustainable development in the Mediterranean. Part of the work of the UNESCO-Euromed Chair in Mediterranean Interculturalities, the conference highlighted the growing threats linked to climate change, socioeconomic challenges (unemployment, migration, co-development), and geopolitical issues in the region. Professor Tenkoul called for a collective response based on sovereignty, innovation, the reappropriation of Mediterranean lifestyles, and a transition to "controlled security." The event provided a framework for reflection, mobilizing students and researchers around a sustainable, united, and resilient vision.

https://ueuromed.org/actualites/cycle-de-conferences/chaire-unesco-euromed-interculturalites-mediterraneennes-securite

Round table: Changing African territories

1- CULTURAL EVENTS

2. CONFERENCES

June 12	Round Table : "Transformations of Territories and Infrastructures in Africa: Technology, Culture, and Human Capital as Levers of Resilience" by Pr Iman Meriem Benkirane, Pr MPr Mariame Bouchaqour, Mme Rim El Harrouni, Mr Ouassim Bensouda

As part of African Week, a round table was held on the theme: **"Transformations of Territories and Infrastructures in Africa: Technology, Culture, and Human Capital as Levers of Resilience."**

The session brought together experts, researchers, and students to discuss how Africa's territories and infrastructures have been evolving in response to social, environmental, and technological challenges.

The session brought together experts, researchers, and students to discuss how Africa's territories and infrastructures have been evolving in response to social, environmental, and technological challenges.

The discussions highlighted the crucial role of **technological innovation, cultural identity, and investment in human capital** as key drivers of sustainable development and resilience across the continent.
This exchange provided valuable insights into the ways African communities are shaping a more resilient and inclusive future.

On June 12, 2025, as part of the African Week organized at UEMF, a round table was held on the theme:

"Transformations of territories and infrastructures in Africa: technology, culture and human capital as levers of resilience".

Led by Prof. Iman Meriem Benkirane, Prof. Mariame Bouchaqour, Ms. Rim El Harrouni and Mr. Ouassim Bensouda, this session brought together students, researchers and experts to discuss the profound changes in African territories in the face of technological, social and environmental challenges.

The discussions highlighted the strategic role of innovation, cultural identity and human capital in building more resilient, sustainable and inclusive African territories.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

UfM Med Youth Lab 2024: 70 young people come together to co-create the Euro-Mediterranean future

In February 2025, the Euromed University of Fez welcomed 70 young people from 21 nationalities as part of the UfM Med Youth Lab 2024, a major Euro-Mediterranean hackathon. Co-organized with the Union for the Mediterranean (UfM), GIZ, the Anna Lindh Foundation, and IEMed, this event allowed participants to co-create concrete solutions around three major themes: green skills, youth mobility, and civic engagement. A true laboratory of ideas for sustainable development and regional cooperation.

Activity report of the Department of Social, Economic and Entrepreneurship Partnerships.

Dialogue with Nature: Umberto Pasti at UEMF, between heritage and sustainable landscape

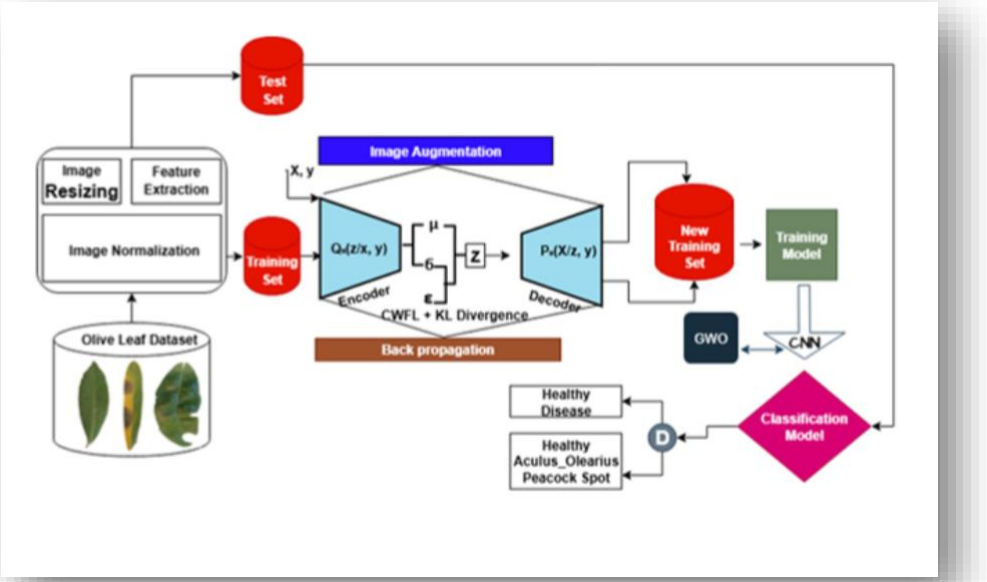

The visit by Mr. Umberto Pasti, Italian writer, botanist and landscaper, was a true invitation to reconnect with the profound intelligence of nature and to reflect on our connection with it..Pr. Imane Benkirane, Vice-President in charge of cultural activities and campus life, stressed the importance, more than ever, of taking the time and perspective necessary to better involve ourselves in the preservation of our heritage, whether tangible or intangible.

For Oumayma Fassi Fihri, a PhD student in Landscape Architecture at UEMF, Mr. Umberto Pasti's presentation was a source of inspiration. She found valuable answers to a key question: how can we integrate landscapes not only into our daily lives, but also into urban development projects?

Doctoral thesis defense in “Artificial Intelligence” by Mr. Kaloma Usman MAJIKUMNA

Thesis defense – Kaloma Usman MAJIKUMNA
Title: Managing plant survival and disease risks under water stress using artificial intelligence: the case of olive trees in Morocco

This thesis studies the impact of water stress and diseases on olive trees in Morocco, by combiningartificial intelligence, remote sensing and field experiments. An innovative deep learning model has been able to detect diseases with 99.2% of predecision, while tests of'irrigation have identifiedethe varietiesetes and most resilient indicators. The results provideconcrete recommendations for sustainable and climate-adapted agriculture.

SDG14 Report : Life Below Water

Introduction

Sustainable Development Goal (SDG) 14, on Life Below Water, is of paramount importance in our shared quest to ensure a sustainable and balanced future for our planet. It highlights the urgent need to preserve and restore marine and coastal ecosystems, which constitute the beating heart of global biodiversity. This report explores the multiple challenges, opportunities, and actions required to achieve the ambitious targets of SDG 14, highlighting the preservation of oceans, seas, and aquatic resources as a key imperative for future generations.

Training

Master's in Environmental Engineering and Water Management

The program aims to train managers with a cross-disciplinary vision of environmental issues and water management in particular. The development of clean technologies (processes, methods, or tools) to solve environmental problems attributable to human activities is emphasized, with a focus on the Euro-Mediterranean region.

To do this, the student acquires in this sector advanced knowledge in the field of the environment (scientific and technical methods, knowledge of ecosystems, techniques for analyzing and treating pollutants, water management and treatment, remote sensing and GIS tools, national and international policy, green economy, etc.) and completes his training with cross-disciplinary knowledge and skills constituting the UEMF profile (common denominator of all training courses offered by the UEMF).

The student is expected to acquire the skills and abilities necessary to analyze the technical, economic, social, and human implications of environmental issues. Simulation sessions, group work, and role-playing are planned for this purpose, as well as outings, visits, and exchanges with university and socio-economic partners.

Events and activities

Euromed University of Fez participates in the INTERNATIONAL COLLOQUIUM – DEVPORT

Following the success of the first three editions, the DEVPORT team organized a fourth event on October 4 and 5, 2023, on the theme of territorial ports. The University of Le Havre Normandy therefore organized a multidisciplinary conference around the theme: "DEVPORT - What place for territorial ports in the maritime system of tomorrow?". The objective of this event is to compare the different disciplinary approaches referring to this theme of maritime activity at the international level.

During the conference, Professor Hasna SLAMTI, a lecturer and researcher at the Euromed University of Fez, presented the role of secondary ports as a vector of regional development in Morocco. She aimed to highlight the progress made in Morocco on the geopolitical and economic levels regarding seaports since the advent of the reign of King Mohamed VI. Ms. SLAMTI also emphasized the policy of creating new specialized ports in Morocco in parallel with the development of existing ports.

The FEMG and EEMGC “Practical Workshops” Master GEGE 1st year and GC 2nd year

As part of the practical illustration of the courses "Disturbed Natural Systems" & "Ecology and Sustainable Development" for the benefit of students in the 1st year of the Master's degree "Environmental Engineering and Water Management" and the 2nd year of the civil engineering cycle, a field trip was carried out on January 29 and 30, 2020.

The first day was devoted to the study of the Moulay Bousselham lagoon (Merja Zerga), a wetland essential to the balance of ecosystems.

The various components of the biodiversity of this lagoon were reviewed, commented on and analyzed with systematic reference to the lessons given. The rest of the day was devoted to visiting the archaeological site of "Lexus", a city founded by the Phoenicians in the 12th century BC and one of the oldest urban centers in the western Mediterranean. The site curator explained to the civil engineering students the techniques of construction, development, design and use of the components of this ancient Phoenician city.

The second day was devoted to a visit to the Tangier Marina, where the students were welcomed by the President of SAPT (Tangier-ville Port Development Company), who indicated that the Tangier-ville port is one of the major projects contributing to making the city of the strait a destination of choice for pleasure and cruise tourism on an international scale and in the Mediterranean basin in particular. A presentation of "Tanja Marina Bay" by the Marketing and Strategic Intelligence Director of SAPT was given, followed by a visit to the "marine" museum, as well as a presentation of the rehabilitation and enhancement program for the ancient walls.

The students were also able to visit the Marina conversion site, a project that perfectly embodies the slogan "Give the port back to the city, unite the port and the city." Explanations were provided by the engineers in charge of carrying out the project and by the site divers. A fruitful exchange between students and engineers then focused on the methodologies used in this conversion.

Finally, a visit to the operational part of the Marina marina took place, detailing the technical aspects of its on-shore and off-shore components presented by the Port Director who also gave an overview of the history of the works, the developments carried out and the works in progress to return the marine domain to the population of Tangier and make this city an essential destination for pleasure and cruise tourism in the Mediterranean basin.

2024: Euromed University of Fez at the heart of action for the SDGs

Wahid BENKHADDA wins the Best Oral Communication Award at the ISMESH 2024 International Symposium

We are proud to announce that Mr. Wahid BENKHADDA, a fourth-year doctoral student, won the prestigious award for best oral presentation at the ISMESH 2024 International Symposium. This distinction was awarded to him for his outstanding presentation during the event, which was held on May 7 and 8 at the Ecole Supérieure de Technologie in Fez.

Mr. BENKHADDA's participation in this symposium was part of his thesis project in the field of materials and environmental chemistry, in which he raised the issue of olive margins; a widespread problem at the regional, national level but also throughout the Mediterranean basin region.

We extend our sincere congratulations to Mr. Wahid BENKHADDA for this well-deserved recognition, which underlines the commitment of UEMF and its community to academic excellence and innovative research.

Raising awareness of the protection of aquatic biodiversity

The Ras El Mae fish farming station was our second stopover. The main mission of the Ras El Mae fish farming station is to develop salmon farming to ensure the restocking of fishing grounds and environmental education and awareness of the protection of aquatic biodiversity with a rich program of excursions and workshops dedicated to the environment, its protection and the development of sport fishing carried out regularly, for the benefit of schoolchildren in order to promote awareness of the main ecological problems of fish, including overfishing, fishing methods that are harmful to the environment and habitat degradation.

SDG15 Report: Life on Land

Introduction

Sustainable Development Goal 15, dedicated to Life on Land, represents a key pillar of our commitment to a balanced planet. It underscores the urgent need to protect, restore, and promote the sustainable use of terrestrial ecosystems, forests, and the biodiversity that sustain them. This report examines the critical challenges and innovative approaches needed to achieve the ambitious goals of SDG 15, highlighting the crucial importance of preserving biological diversity and ensuring the sustainability of terrestrial ecosystems for generations to come.

The fifteenth goal of the United Nations SDGs aims to establish sustainable management of terrestrial ecosystems (forests and mountains) by preserving biodiversity and soils, limiting the long-term impacts of natural disasters.

In this context, a number of educational and research activities are carried out by the Euromed University of Fez through teaching modules, end-of-study projects (PFE), research and patents.

Training

Master's in Environmental Engineering and Water Management (GEGE)

- Natural and Disturbed Systems - Microbiology;
- Materials in the environment and methods of analysis;
- Pollution, nuisances and impacts;
- Environmental economics;
- Environmental policy and society;
- Water, soil and air;
- Water quality in watersheds - Aquatic ecology;
- Water treatment;
- Modeling of hydroecosystems;
- Water management.

Master in Transport and Sustainable Mobility (TMD)

- Energy and climate change;
- Transport externalities: elements of analysis and calculations;
- Environmental and transport economics;
- Sustainable development;
- Sustainable transport;
- “Transport and sustainable mobility” integrative project.

Civil Engineering Cycle (GC)

- Engineering Geology;
- Load hydraulics and free surface hydraulics;
- Hydrology and hydrogeology;
- Road infrastructure;
- Building energy;
- Environment (EIA);
- River hydraulics and watercourse development;
- Maritime hydraulics and port engineering;

- Advanced Geotechnical Engineering;
- Railway infrastructure and remote-controlled systems;
- Land use planning and urbanization suitability;
- Bridges and crossing structures.

Final year projects

- Sanitation and health safety: application on a pilot case – STEP Ain Aouda;
- Valorization of wet pomace for boiler feed;
- Biochar and biogas treatment;
- Activated sludge and MBBR fluidized bed for wastewater treatment;
- Physicochemical characterization of industrial liquid discharges and proposal of treatment solutions;
- Numerical simulations of supercritical flows at the location of narrowing channels: taking into account friction, dispersion and turbulence;
- Route of the Rabat-Fez high-speed line;
- Study of the construction of a crossing structure over the El Qati valley as part of flood protection of the natural, architectural and built environments of Ighil N'Oumgoune;
- Sidi Abbou Dam – Hydraulic and hydrological study, sizing and verification of static and seismic stability (embankment dike system);
- Sizing of a solution to reinforce the excavations of the Wave project in Tangier;
- Study of a treatment plant;
- Physicochemical characterization of sludge from OCP WWTPs: Evaluation of agronomic and environmental quality.

Research projects and doctoral theses

- Antibacterial and antiviral coatings from marine waste (research project);
- Treatment of water contaminated by margins using bio-sourced adsorbents (research project);
- CO2 sequestration by spongy biomass (research project);
- New approach to formulating clay-based geopolymers for additive manufacturing (research project);
- Synthesis of bio-sourced cementitious materials for construction using additive manufacturing (research project);
- Cellulose nanocrystals for the design of biodegradable plastics (doctoral thesis defended);
- Food packaging and catalyst by modification of crustacean shells (doctoral thesis defended).

Patents

- Antibacterial and antiviral adhesive films based on crosslinkable viologens (A. El Kadib, N. Katir, M. Boundor, MA Benzaouia, National Patent MA. National Patent MA. N°60439. 15/05/2023).
- Antibacterial and antiviral sprayable formulations for surface coatings (A. El Kadib, M. Bousmina, MA Benzaouia, N. Katir, M. Elfahime, National Patent MA. N°58510. 21/11/2022).
- Construction process based on monolithic structure technology (Abderrahim Belabid, Hajar Akhzouz, Hanane Elminor, Hassan Elminor. 12/30/2022).

Events and activities

CLUB WE GREEN IN ACTION: "ENHANCING IFRANE NATIONAL PARK: LET'S OPEN OUR EYES!"

Saturday, October 28, 2023; the “We Green” club of students from the Euromed University of Fez (UEMF) organized an awareness day for its members through visits to several environmental centers as well as a clean-up action in the Ifrane National Park.

As part of these social activities, the "We Green" club kicked off this day aimed at raising public awareness of environmental issues with the main objective of: Encouraging reflection on environmental issues, creating ecological habits through a cleaning action and awareness of biodiversity issues through a visit to the Ifrane National Park, its fish farming station in Ras El Mae and its cedar house. The day was marked in particular by a cleaning action in the forest of the Zerouka I lake in Ifrane with the ambition of reducing the negative impact of waste and residues that affect the environment.

Note that Zerrouka I is a small, shallow, drainable artificial fish pond. It is located on the Zerrouka (or Zrouka) wadi, the main tributary of the Tizguite wadi. The dike is about 300m from the spring, so its waters flow directly into it. The reservoir is limited by a concrete wall, at least on the west bank. The spring waters are also used to supply the city of Ifrane with drinking water.

At the level of this body of water which is an integral part of the Ramsar Site of Oued Tizguite; the vegetation is not very varied (around fifteen species with a wide geographical distribution) and very limited in space, the edges of the lake being concreted and mowing is frequent there.

It is a fairly sheltered trout lake, somewhat interesting for birds. It is home to few wintering birds (less than 400 birds), the population being composed mainly of divers: coots and crested coots, little grebes, pochards, tufted ducks and ferruginous wagtails, with occasional shovelers and/or mallards. Among the breeders, the common coot (20-25 pairs), the crested coot (about 10 pairs) and the little grebe (5-8 pairs) are the most regular.

Finally, it should be noted that the Euromed University of Fez is a public utility, non-profit institution with an eco-campus that meets international standards and provides a pleasant and stimulating environment for its students from more than 40 nationalities.

UEMF graduates are equipped with training in soft skills, study skills, life skills and professional skills and this profile; based on several pillars; allows students to acquire numerous skills related in particular to multilingualism, multiculturalism, innovation and entrepreneurship, the digital environment, international mobility, and sustainable development in addition to the pillar of social responsibility and eco-citizenship through which students are instilled with the values of respect for the environment, sustainable development and civic responsibility.

2024: Euromed University of Fez at the heart of action for the SDGs

Cleaning action

A clean-up action in ZROUKA, located at the entrance to the city of IFRANE, thanks to this action, passengers of the lake would no longer be exposed to an annoying and unpleasant sight of garbage scattered all along the way. Also, this campaign aims to reduce the negative impact of waste and residues that affect the environment and cause pollution.

PLANETFLIX; Celebrates Sustainability

Delighted to share the success of the PLANETFLIX event, a sustainability-focused cinematic journey organized by the Global Shapers Community Fez in collaboration with the WE Green Club of the Euro-Mediterranean University of Fez. An inspiring fusion of thought-provoking documentaries, captivating discussions, and a vibrant community dedicated to shaping a more sustainable future. Grateful for the collaborative efforts that made this event a resounding success.

Wahid BENKHADDA wins the Best Oral Communication Award at the ISMESH 2024 International Symposium

We are proud to announce that Mr. Wahid BENKHADDA, a fourth-year doctoral student, won the prestigious award for best oral presentation at the ISMESH 2024 International Symposium. This distinction was awarded to him for his outstanding presentation during the event, which was held on May 7 and 8 at the Ecole Supérieure de Technologie in Fez.

Mr. BENKHADDA's participation in this symposium was part of his thesis project in the field of materials and environmental chemistry, in which he raises the issue of olive margins; a widespread problem at the regional, national level but also throughout the Mediterranean basin region.

We extend our sincere congratulations to Mr. Wahid BENKHADDA for this well-deserved recognition, which underlines the commitment of UEMF and its community to academic excellence and innovative research.

Strengthening collaborations for sustainable agriculture

Euromed University of Fez hosted an American delegation as part of the LeadAR program, a University of Arkansas project focused on training leaders in agriculture and sustainable economics. The visit, led by industry professionals and researchers, was welcomed by Prof. Salim Bounou, Vice President for Research and Partnerships, and provided an opportunity to explore synergies for sustainable agricultural development in Morocco.

Through this meeting, the UEMF reaffirms its commitment to innovative solutions for a greener and more responsible future.

UEMF celebrates International Mountain Day differently

On March 1, 2024, the Euromed University of Fez organized an international conference entitled "Restoring mountain ecosystems: the case of the Fez-Meknes region," in collaboration with several partners, including the Institute of Legal and Political Sciences (ISJP) and the African Network for Sustainable Development (RA2D). The event, organized in conjunction with International Mountain Day, addressed the challenges of restoring mountain ecosystems, in line with the initiative of the United Nations Decade on Ecosystem Restoration (2021-2030).

Over two days, the conference brought together experts, researchers, and field stakeholders to discuss ecological issues and sustainable development in the mountains through panels focused on the social, economic, and political challenges of this theme. The second day took place in the municipality of Tazouta, with practical activities such as hiking, awareness-raising workshops, and local product exhibitions. This edition highlighted the importance of preserving mountain ecosystems while involving local populations and strengthening the solidarity economy.

Italian Design Day: Reading nature and protecting its culture

As part of its Conference Series, the Euromed University of Fez is sharing its activities promoting "Made in Italy" in partnership with the Italian Embassy in Morocco, by welcoming the Italian writer, botanist and landscaper Umberto Pasti this Wednesday, April 23, 2025. A renowned international figure, he is committed to the preservation of biodiversity, the enhancement of landscapes and the transmission of knowledge.

This meeting is part of the 9th edition of the "Italian Design Days" (IDD), organized around the theme "Reading nature and protecting its culture, for a design that repairs inequalities." A theme that resonates with that of the 2025 edition of the International Triennale of Milan, which highlights innovative approaches to design that serve the preservation of heritage – tangible and intangible – with a view to sustainability and inclusion.

Italian Design Day is an unmissable event celebrating Italian excellence in all its creative expressions. For several years, it has highlighted the synergies between innovation, craftsmanship, sustainability, and transmission, in close collaboration with Moroccan institutions and local communities. Through this exchange, Pasti demonstrated the profound connections between nature, culture, and design, and their role in building a more equitable future.

Taking place at the Euromed University of Fez, a proven partner, this initiative demonstrates the importance given to intercultural dialogue and academic cooperation in the service of a fairer and more sustainable society.

Doctoral thesis defense in “Artificial Intelligence” by Mr. Kaloma Usman MAJIKUMNA

Thesis defense – Kaloma Usman MAJIKUMNA
Title: Managing plant survival and disease risks under water stress using artificial intelligence: the case of olive trees in Morocco

This thesis studies the impact of water stress and diseases on olive trees in Morocco, by combiningartificial intelligence, remote sensing and field experiments. An innovative deep learning model has been able to detect diseases with 99.2% of predecision, while tests of'irrigation have identifiedethe varietiesetes and most resilient indicators. The results provideconcrete recommendations for sustainable and climate-adapted agriculture.

SDG 16 Report: Peace, Justice and Strong Institutions

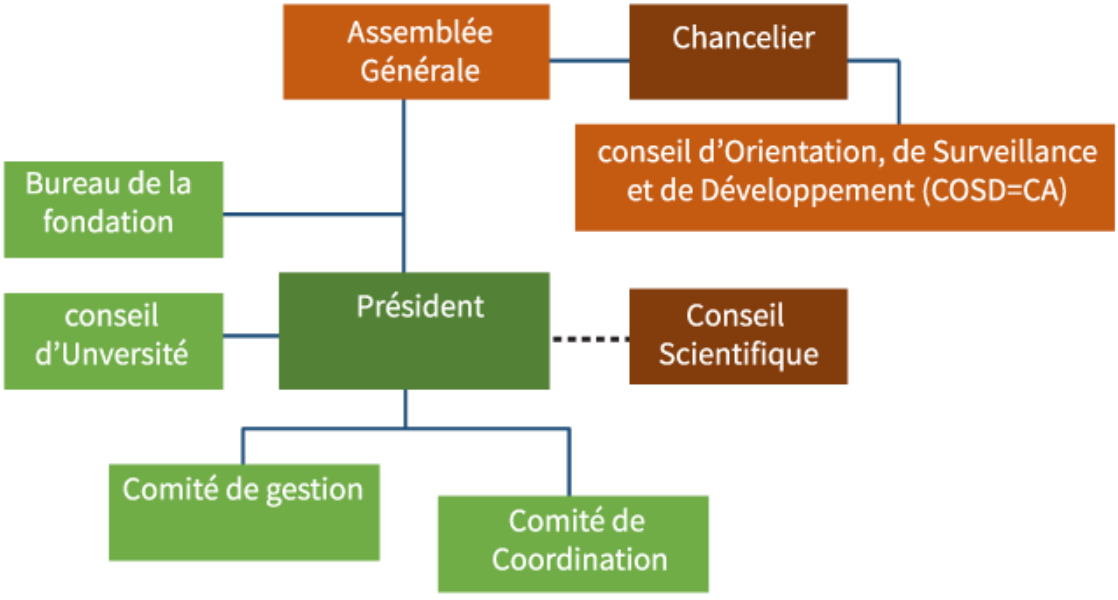

Introduction

The UEMF places the following principles and values at the heart of its operating method:

- openness to the world (languages, cultures, etc.), inclusion, moderation, tolerance, interculturality and sharing;
- fight against all discrimination based on origin, family situation, gender (SDG5 report), disability or belief;
- equity and the fight against inequalities (SDG 10 report)
- equality of opportunity, gender and opportunities;
- citizenship based on civic-mindedness, civility, commitment, a sense of duty and common interest, as well as respect for others and the environment;
- mediation and conflict resolution.

UEMF Governance

The Euromed University of Fez (UEMF) is a non-profit organization (according to the Dahir of 1958), called a Foundation. It enjoys the status of Public Utility and is placed under the High Honorary Presidency of His Majesty the King, Mohammed VI.

The Governance and Management bodies are:

1. The General Assembly

2. The Steering, Monitoring and Development Council (COSD) also called the Board of Directors (CA)

3. The Chancellor

4. The Foundation Office

5. The President of the University

6. The University Council

7. The Scientific Council

8. The Management Committee

9. The Coordination Committee

The UEMF's governing bodies, as well as all its components (establishments, directorates, centers, etc.), work in a democratic, participatory, and inclusive team spirit, and advocate responsibility, transparency, and accountability. The bodies' reports and decisions are shared and communicated to stakeholders.

The internal regulations of the UEMF and its institutions are validated by the authorities and communicated to all stakeholders. The regulations are based on national legislation, respect for citizens' rights, and the Kingdom's constitution. The regulations specify the method of designating and/or electing members of the authorities.

The UEMF has charters and policies validated by the Presidency: social and societal responsibility, energy efficiency, digital responsibility, quality assurance, gender equality, fight against discrimination, etc.

She makes a great effort to raise awareness in the community about these policies and ensures that everyone knows their rights and responsibilities, in a framework of serenity and mutual respect.

Mediator

The mediator's mission is to contribute to the establishment of a calm, pleasant, and respectful working environment. He or she assists in the amicable resolution of conflicts between the parties involved in a dispute.

https://ueuromed.org/le-mediateur-de-luemf

Prerogatives

In the event of a conflict, the university community (teachers, researchers, students, and administrative and support staff) may refer the matter to the mediator, who will examine the case to ensure that its content falls within his or her jurisdiction. If the matter is inadmissible, the mediator will inform the President of the University or may also redirect the matter to the appropriate departments. He or she may conduct investigations, meet with all parties individually and/or collectively, and make recommendations to the parties, who are free to implement them or not.

In a spirit of conflict prevention and to help with team cohesion, he is also responsible for holding meetings with the various departments to help establish a calm and cordial working environment.

The Mediator acts with complete independence, transparency and discretion. He is not vested with any power of decision, injunction or coercion.

He reports on his mission to the President of the UEMF and prepares an annual activity report in compliance with the rules of discretion and confidentiality.

Cases that cannot be subject to mediation:

- serious cases rather falling under the jurisdiction of the courts;
- conflict situation which is not within the scope of work;
- one of the parties does not wish to mediate;
- academic situations which are more the responsibility of the Establishments (cases of student failure, grades, exams, internships, etc.) or the responsibility of the Human Resources Department.

Training in law, political science and alliance of civilizations

Bachelor's Degree in Political and Legal Sciences

https://ueuromed.org/institut-euromed-des-sciences-juridiques-et-politiques/filieres/licence-en-sciences-politiques-et

The Bachelor's degree in Political and Legal Sciences provides general knowledge in the field of social sciences, politics and law, which gradually become more specialized in order to prepare students for one of the master's degrees in the discipline or other related specialties, by providing tools for analyzing and deciphering contemporary political realities in the Euro-Mediterranean.

This degree operates by putting theories and data from political and legal sciences into perspective through a Euro-Mediterranean contextualization and comparisons on a global scale.

The objective of the Bachelor's degree in political and legal sciences is to enable students to:

- To identify and understand the political, economic, administrative and social actors at the local, national, Euro-Mediterranean and global levels.
- To understand the principles of analysis of the contemporary world relating to political regimes, legal and social systems and national and international conflicts.
- To master the mechanisms for analyzing the main issues of the contemporary world, such as environmental problems, development and conflicts.
- To know how to mobilize the concepts and methods of different disciplines to understand and analyze the different aspects of the contemporary world.

Master's in Mediterranean and African Politics

https://ueuromed.org/institut-euromed-des-sciences-juridiques-et-politiques/filieres/master-politiques-mediterraneennes

The Master's in Mediterranean and African Politics is a multidisciplinary course (law, economics, geopolitics, strategy, international peace and security, diplomacy, environment, energy, development, negotiations, etc.) and combines theoretical and methodological dimensions.

With a professional vocation, it aims to provide the explanatory tools essential for understanding international phenomena. It is based on cutting-edge training provided by both international teachers and practitioners.

Among the objectives of this training, we find:

- Deepening knowledge of politics and international law;
- The appropriation of conceptual and technical instruments relating to international relations and diplomacy by grasping the characteristics and constraints of practices specific to the Euromed and African space;

- The perception of the issues, challenges and opportunities in the formation of foreign policies, international cooperation and public policy mechanisms adopted by state orders.
- Mastery of the dimensions of cooperation and development in Africa and the Euro-Mediterranean;
- Understanding the dynamics of conflicts and the processes of their resolution;
- Knowledge of international security issues and challenges;
- The ability to design an appropriate framework for analyzing a problem and interpreting the data collected; ability to present the state of knowledge and debates on a situation or problem relating to international relations.

Master of Business Law, Franco-Moroccan course, relocated to UEMF

https://ueuromed.org/actualites/annonces-diverses/nouvelle-formation-master-droit-des-affaires-parcours-franco-marocain

In partnership with the Sorbonne Law School, EBS offers a new course: The Master's in Business Law.

This Master's degree is based on fundamental subjects in the field of:

- French business law;
- Civil business law;
- Contractual technique;
- Private international law;
- Arbitration Law
- Corporate law;
- Law of companies in difficulty;
- Banking law;
- Intellectual property;
- Tax law;
- Competition law....

An introduction to Moroccan business law as well as courses in African business law (OHADA) are also included in the curriculum.

An internship in a law firm or in a legal department is part of the training, as well as the writing of a dissertation.

Specialized Master's Degree in Conflict Management and Alliance of Civilizations

https://ueuromed.org/institut-euromed-des-sciences-juridiques-et-politiques/filieres/gestion-des-conflits-et-alliance

- To provide the student with a wealth of knowledge drawn from several disciplines in the human and social sciences and legal and political sciences.
- To enable students to better understand the complexity of the issues and challenges of our time, and the importance of establishing processes of dialogue and alliance of civilizations, as a guarantee of preserving the future of the planet and humanity.
- To prepare the student to be able, following his two years of training, to carry out multidirectional analyses on different types of wars and conflicts, to propose innovative solutions and monitoring processes, to lay the foundations for prospective reflections on the risks of devastating chaos to come, to develop the means to anticipate and overcome them.

UEMF hosts the youth event of the 9th United Nations World Forum on the Alliance of Civilizations November 21, 2022

The Euromed University of Fez (UEMF) is hosting, from November 21 to 23, 2022, the youth event of the 9th World Forum of the United Nations Alliance of Civilizations (UNAOC) which is being held in Fez.

The World Forum of the United Nations Alliance of Civilizations is being held for the first time on the African continent. Due to the leadership of His Majesty King Mohammed VI, regarding world peace, the promotion of intercultural and intercultural dialogue, living together and inclusion, this Forum is being held in Morocco and particularly in the spiritual and ancestral city of Fez, which is home to the oldest university in the world, still in operation, the Al Qarawiyine University, which was the rear base of the golden age of Muslim civilization in Andalusia by providing and sharing science and knowledge with the Iberian Peninsula and by extension with Europe and the world.

https://ueuromed.org/actualites/annonces-diverses/luemf-accueille-levenement-des-jeunes-du-9eme-forum-mondial-des

Miguel Ángel Moratinos Cuyaubé, United Nations High Representative for the Alliance of Civilizations

As part of the 9th World Forum of the United Nations Alliance of Civilizations (UNAOC) held in Fez from November 21 to 24, Mr. Miguel Ángel Moratinos Cuyaubé visited the UEMF on the occasion of the youth forum held at the Euromed University of Fez on the sidelines of this event.

Mr. Moratinos Cuyaubé has devoted his professional and political career to international relations and development cooperation, having notably held the positions of Minister of Foreign Affairs and Cooperation (2004-2010), presided over the United Nations Security Council and held the presidencies-in-office of the Organization for Security and Cooperation in Europe (OSCE), the Council of Europe and the Council of the European Union.

Mr. Moratinos Cuyaubé has also held several positions at the national level, including Deputy Director General for North Africa (1987-1991), Director of the Institute for Cooperation with the Arab World (1991-1993) and Director General for Foreign Policy in Africa and the Middle East (1993-1996). He also participated in the organization, in 1992, of the Madrid Conference for Peace in the Middle East.

He began his diplomatic career as Head of the Coordination Section for Eastern Europe (1977-1980). He was subsequently appointed First Secretary and then Chargé d'affaires of the Spanish Embassy in the former Yugoslavia (1980-1984), and then Political Counsellor in Morocco (1984-1987). After serving as Spanish Ambassador to Israel in 1996, Mr. Moratinos Cuyaubé was appointed by the European Union as Special Representative for the Middle East Peace Process (1996-2003), a position in which he promoted peace agreements and acted, on behalf of the European Union, to promote Israeli-Arab dialogue.

Creation of the Alliance of Civilizations Chair within the University and appointment of Abdelhak Azzouzi as President

The creation of this university chair was decreed during the 9th edition of the World Forum of the United Nations Alliance of Civilizations (UNAOC) held in Fez on November 22-23, 2022. The High Representative of the UNAOC, HE Miguel Angel Moratinos, during a press conference organized at the end of the forum announced the creation of this chair within the Euromed University of Fez.

Prof. Abdelhak Azzouzi is a founding member and member of the Board of Directors of the Euromed University of Fez. He is a university professor specializing in diplomacy, strategy, international relations, and comparative political science. He has created and directed several research and development centers. He initiated and organized the Fez forums on the Alliance of Civilizations and those on the Union for the Mediterranean. Prof. Abdelhak Azzouzi has also written about thirty books, including nine volumes on the Alliance of Civilizations and cultural diversity. He has published more than 1,500 international chronicles. He is a consultant to several national and international organizations. He has received several

international distinctions and awards, including that of the Mediterranean Parliamentary Assembly for his commitment to bringing the two shores of the Mediterranean closer together.

Euromed University of Fez welcomes the head of European diplomacy, Mr. Josep Borrell January 6, 2023

The Euromed University of Fez (UEMF) welcomed, this Friday, January 6, 2023, the High Representative of the European Union for Foreign Affairs and Security Policy and Vice-President of the European Commission (EC), HE Josep Borrell Fontelles.

Following his first visit to the UEMF in 2019, Mr. Borrell, accompanied by a delegation of senior officials, went to the Euromed University of Fez for a courtesy visit and also to give a lecture on the theme "Our strategic responsibilities in the current geopolitical context."

This conference was attended by several senior Moroccan and European officials, as well as students and lecturer-researchers from UEMF, in a large, packed amphitheater.

Violence against women" conference by Ms. Najat Vallaud Belkacem December 21, 2022

During her 3rd conference at the Euromed University of Fez, Ms. Najat Vallaud-Belkacem raised the issue of violence against women, a phenomenon that persists today despite efforts to counter this scourge.

"Violence against women is considered one of the most flagrant and widespread violations of human rights worldwide today," said Najat Vallaud-Belkacem. The objective of this conference is to raise awareness among students and staff at the Euromed University of Fez about mutual respect between women and men, about not accepting harassment of any kind, especially against women, and about ensuring a peaceful working environment where everyone can flourish and develop without derogatory remarks and misogyny.

Holiday Celebration December 23, 2022

An annual event that brings together the UEMF community to share moments of joy, happiness, and conviviality during the end-of-year celebrations. Students, professors, and staff members all came together to celebrate the richness and cultural diversity of our University.

Knowing each other better to understand each other better: the purpose of the first meetings of the working group of the Grandes Ecoles Pour la Paix consortium December 8, 2022

The Euromed Polytechnic School (EPS) participated in the first meetings of the working group of the GE2P (Grandes Ecoles Pour la Paix) consortium, which includes around twenty institutions and universities, including Tel Aviv University (Israel), Universidad de Playa Ancha (Chile), Queen's University (Canada), ECAM-EPMI (France), Bar Ilan University (Israel), Beer Sheva School of Engineering (Israel), Moulay Ismail University (Morocco), Ibn Tofail University (Morocco), Mohammed V University (Morocco) and the Polytechnic Virtual University (Mali).

During this meeting, the EPS discussed the development of specific projects, notably with the Beer Sheva Engineering School, and recalled that the first step is to work together in a concrete way, irrigating the various GE2P establishments through the involvement of the teaching staff, researchers, and students. In this regard, apart from traditional teaching and research activities, sport can be a catalyst, carrying the values of good manners and living together.

UEMF welcomes Young Parliamentarians as part of their regional meetings February 10, 2023

The Euromed University of Fez hosted the Moroccan Association of Young Parliamentarians on its eco-campus, which is beginning its first regional meeting with a stopover at the UEMF in the city of Fez.

The Moroccan Association of Young Parliamentarians was born in accordance with the High Royal Guidelines considering young people as “the true wealth of the country” and the conviction of a group of young Moroccans of the need to engage in the development process of our country, as well as their conviction of the interest of a common action within a structured institutional framework outside of any partisan or union affiliation. For its first meeting with students from all backgrounds, the Moroccan Association of Young Parliamentarians chose to address the theme of digitalization in the modernization of the Moroccan administration, a subject that aligns perfectly with the mission of the Euromed University of Fez. “The digital system has always been part of the DNA of the UEMF and constitutes one of its seven pillars which are the basis of its academic, scientific and civic vocation” attests Pr. Taoufik Ouazzani Chahdi, Vice-President for Academic and Cultural Affairs at the UEMF.

Speaking at this session, the President of the Moroccan Youth Parliament, Nizar Berdai, emphasized the effects of the epidemic situation on the organization of this meeting, also marked by the interventions of the "young ministers" who plan to examine the projects amending certain laws relating to each committee, namely: the Committee on Education, Culture and Communication, the Committee on Economy and Finance, the Committee on Justice, Legislation and Human Rights, the Committee on the Interior, Local Authorities,

Housing and Urban Policy, and the Committee on Foreign Affairs, National Defense, Islamic Affairs and Moroccan Expatriates.

Round table led by Mr. Aberrazzak ELHANNOUCHI April 27, 2023

The Euromed Institute of Legal and Political Sciences organized a roundtable discussion led by Mr. Aberrazzak ELHANNOUCHI, a senior member of the House of Representatives and former chief of staff to the President of the National Council of Human Rights (CNDH), on his latest book: Parliament and Human Rights: References and Practices. A book signing ceremony was held at the end of the event.

Round Table: The UN and the New World Order

The Euromed Institute of Legal and Political Sciences organized, on Tuesday, May 23, 2023, a round table on: The UN and the new world order, moderated by Mr. Said Azerkane, Doctor of Law, researcher in international relations and executive of the Ministry of the Interior.

The event provided an opportunity to discuss the role of the UN in resolving current global crises, plans for a necessary reform of this institution and aspects of a possible global order/disorder.

ICESCO-EUROMED Chair "Arts, Societies and CIVILIZATIONS" is organizing a Master class on the theme "Translation and Dialogue of Cultures"

As part of the 2023-2024 activities of the ICESCO-EUROMED Chair "Arts, Societies and CIVILIZATIONS", a Master class was organized on Wednesday, October 18, 2023, led by Ms. Rajae Talbi (poet, writer and translator) on the theme "Translation and dialogue of cultures".

The debate developed from the reflection she initiated, was polarized around crucial questions: 1. the role of Translation in the construction of peace, the rise of interculturality, the transmission of knowledge. 2. The practice of translation as work on the imagination of the self and the perception of the other. 3. Translation and its requirements in relation to the translator and the reader.

The open debate with the students of the Translation department allowed for an even richer extension of these lines of thought, highlighting among other things the problems of Translation faced with the challenges of artificial intelligence, of Translation confronted with the mutations of languages as they undergo today the effects of social media, the isolation in which the translator finds himself forced to constantly invent his own tools.

This Master class actively functioned as a true laboratory for analyzing the mechanisms of Translation and its epistemological foundations.

2024: Euromed University of Fez at the heart of action for the SDGs

Prof. James F. Hollifield at the Euromed University of Fez: "The Challenge of Forced Migration and Human Displacement"

On May 30, 2024, the Euromed University of Fez hosted Professor James F. Hollifield for a lecture on migration governance and global humanitarian crises. A migration expert and member of the Council on Foreign Relations, Professor Hollifield shared his expertise on migration policies and governance dilemmas. He highlighted the challenges states face in balancing the security and human rights of forced migrants.

Professor Hollifield, Ora Nixon Arnold Professor of International Political Economy and Director of the Tower Center at Southern Methodist University, provided valuable insights from his experience as an advisor to various governments and consultant for international organizations such as the United Nations and the World Bank. He discussed the rise of forced migration and its global impact.

This conference provided UEMF students and research professors with an in-depth understanding of the issues surrounding forced migration, while fostering constructive dialogue on ethical and effective state responses. It is part of the activities of the UEMF Alliance of Civilizations Chair, which aims to strengthen intellectual momentum and stimulate student reflection.

International Conference: Mediterranean and Interculturalities: Today's Realities and Future Challenges

The UNESCO Chair of the Euromed University of Fez "Mediterranean Interculturalities" organized on May 24, 2024 an international conference on the theme: "Mediterranean and Interculturalities: realities of today and challenges of the future".

In the presence of Prof. Mansour M'Henni, special guest of this event held within the Eco-campus, a range of participants highlighted different avenues according to which the question of interculturality can constitute a lever for building a Mediterranean reconciled with itself, its peoples and its societies. Thus, the emphasis was placed on the terminologies to be developed to better think of the Mediterranean as a space, historical depth and promise of the future, by approaching the subject from different prisms (in French, English and Spanish).

Likewise, the approaches used, using multiple media (crafts, magazines, literary texts, migration, imagination, communication, etc.), have shown the importance that should be given to training in intercultural values in order to combat exclusion, dogmatism and other forms of extremism that prevent the re-establishment of a Mediterranean considered as a memory of the future.

Meeting with the Swedish Ambassador to the Euromed University of Fez: Strengthening intercultural ties

On May 23, 2024, Euromed University of Fez hosted a Swedish delegation led by HE Jörgen Karlsson, Swedish Ambassador to Morocco, and HE Charlotta Sparre, Director of the Swedish Dialogue Institute for the Middle East and North Africa. The meeting, which included discussions with students, highlighted the historical collaborations between Morocco and Sweden since 1762 and their shared commitment to intercultural dialogue.

Charlotta Sparre emphasized the importance of technological development and multilateral cooperation to strengthen ties between the two countries. Doctoral students Anoire El Attari and Othman Sqalli Houssaini respectively addressed current challenges related to extremism and Morocco's role in Africa through its South-South cooperation.

The event highlighted the importance of dialogue and multiculturalism, central elements in the strategy of the University and the Swedish Institute, and encouraged students to become agents of change by actively participating in these discussions..

Professor ACHACHI's conference on the foundations of Russian geopolitics

The speaker Dr. ACHACHI, once again hosted a large-scale conference on Russian geopolitics within the framework of the Wednesdays of Philosophy, at the eco-campus of the Euromed University of Fez on May 22, 2024.

During this session, Prof. ACHACHI illustrated the geopolitical evolution of Russia, which intended to access warm seas between the 18th century and the beginning of the 20th century as a pragmatic reaction to the principality of the capital Moscow representing a partitioned steppe land. As a result, Russia wanted to conquer the maximum number of regions and territories to create a regional buffer. Subsequently, Mr. ACHACHI mentioned the concept of the "Russian world" which is added to the West/East logic in order to escape an intrinsic encirclement.

The particularity of this meeting lies in its special momentum because it represents the closing of a cycle of conferences that has crisscrossed the entire academic year and has just been completed by means of a conference that deals with a very formidable topical subject which allowed the audience represented by students, doctoral students and professors, to ask many questions in order to assimilate the current geopolitical situation.

Visit of Swedish Ambassador HE Jörgen Karlsson to the Euromed University of Fez

Euromed University of Fez hosted HE Jörgen Karlsson, Swedish Ambassador to Morocco, to discuss potential future collaborations with the University's President, Prof. Mostapha Bousmina. The meeting focused on topics of mutual interest and explored opportunities for cooperation in areas such as climate change research, immigration, intergenerational dialogue, as well as innovation and entrepreneurship.

Sweden, with its strong diplomatic relations, seeks to strengthen contacts and cooperation with the countries of the MENA region, as evidenced by a dialogue initiative launched in 1997. The Euromed University of Fez shares values of dialogue and multiculturalism with the Swedish Dialogue Institute for the Middle East and North Africa. In 2023, the Institute conducted a participatory process on intergenerational dialogue, aligned with the University's commitment to promoting intercultural dialogue in its research and development projects.

Doctoral thesis defense in Artificial Intelligence by Ms. Yasmine GHAZLANE

This doctoral thesis explores anti-drone technology by addressing the gaps in current defense mechanisms against drone proliferation. It proposes a novel anti-drone architecture based on artificial intelligence, blockchain, multi-agent systems, and expert systems. An AI-based electromagnetic neutralization model is developed to counter harmful drones in real time. Real-time detection and identification models, using advanced algorithms and deep learning techniques, are created to quickly identify aerial targets. The thesis also focuses on distinguishing between drones and other aerial targets, such as birds, by developing a "friend or foe" classification model. It also studies the impact of model depth on their classification performance. The "friend or foe" model is integrated into the overall system with a real-time detection module to improve the effectiveness, accuracy, adaptability, and robustness of the anti-drone system in dynamic and complex environments.

Between Cordoba and Marrakech: a barzakh between Ibn Rochd and Averroes

During the April 17 conference, organized as part of the activities of the UNESCO-EUROMED Chair "Mediterranean Interculturalities" and the "Philosophy Wednesdays" at the Eco-campus, Professor Driss Ksikes explored the rationalist thought of Ibn Rochd (Averroes) through the theme "Between Cordoba and Marrakech: A Barzakh between Ibn Rochd and Averroes." Ksikes, an award-winning writer and playwright, presented excerpts from his novel "At the Strait of Averroes," blending fiction and reality to revisit the transfer of Ibn Rochd's physical and spiritual traces between Marrakech and Cordoba. The conference highlighted how Averroes, by appropriating Aristotle's legacy, created a rupture with both the West and the East, finding himself misunderstood and misunderstood by both. Driss Ksikes emphasized the importance of re-examining Ibn Rochd's thought, which had become alien to dominant ideologies, for its timelessness and relevance today. The exchange with the audience opened up new philosophical perspectives, consolidating the impact of this enriching meeting.

Roundtable: The Empirical Realist School of Law at the Intersection of Law and CSR

The Euromed Institute of Legal and Political Sciences organized a roundtable discussion on March 11, 2024, on "The Empirical Realist School of Law at the Intersection of Law and CSR," moderated by Dr. Duma Martin (Laval University) and moderated by Prof. Hasna Slamti (Euromed University of Fez). The event explored the empirical realist approach to examining labor law and protective law, emphasizing the importance of collecting empirical data to answer legal questions. The discussions presented four models of corporate social responsibility (CSR)—accompaniment, engagement, elucidation, and opposition—that illustrate the interactions between state law, efficiency, and effectiveness. The roundtable also introduced students to the concept of "consumocratic law," where consumers exert influence over companies through societal marketing.

Visit of a European Union delegation to Morocco at the UEMF

On March 6, 2024, a European Union delegation, composed of Mr. Daniele Dotto, Ms. Lise Paté, and Mr. Rosenheim Adam, visited the Euromed University of Fez (UEMF) as part of the Euro-Mediterranean Partnership. They discussed democracy and the future of European democratic construction with students from the Euromed Institute of Legal and Political Sciences. Mr. Dotto emphasized the EU's commitment to supporting civil societies in transition countries and promoting citizen inclusion in political dialogue.

At the same time, Ms. Paté discussed ongoing collaboration projects between the EU and UEMF with the University's President, Professor Mostapha Bousmina. The visit concluded with a guided tour of the Eco-campus and research infrastructure.

Round table: The Royal Armed Forces in peacekeeping operations around the world

Euromed University of Fez hosted a lecture on February 27, 2024, hosted by Lieutenant Colonel Mohcine Nadi, a senior officer in the Royal Armed Forces (FAR). The topic discussed was the role of the FAR in peacekeeping operations around the world. Lieutenant Colonel Nadi emphasized that since Morocco's independence, security has been a national priority, leading to the country's continued commitment to the United Nations to support global peace and stability. The FAR's participation in these missions has made Morocco a key partner in promoting peace. The lecture was followed by a discussion with the audience on the role of the FAR and its efforts to strengthen its capabilities in supporting international peace operations.

Between tradition and modernity: what path for Morocco? » Conference by Dr. Rachid ACHACHI

As part of the conference cycle, this Wednesday, February 28, 2024 was marked by a conference by Dr. Rachid ACHACHI around the theme "Between tradition and modernity: what path for Morocco?" within the Eco-campus of the Euromed University of Fez.

During this afternoon, students from various institutions of the University attended a session of reflections from the fields of sociology and ethnology. The speaker took the opportunity to elucidate the distinction between tradition, modernity, and modernization. Mr. ACHACHI also defined archeo-modernity, which is an approach aimed at understanding contemporary society and culture by examining its structures.

With the aim of making this meeting a place for constructive exchange and collective production of knowledge, the audience was able to participate in an enriching debate on the different aspects discussed during this conference.

https://ueuromed.org/actualites/cycle-de-conferences/entre-tradition-et-modernite-quelle-voie-pour-le-maroc-conference

Conference by Mr. Ghazi Gherairi: What alliances for what world in 2024?

As part of its conference cycle, the Euromed University of Fez organized a meeting led by Mr. Ghazi GHERAIRI on February 7, under the theme "What alliances for what world in 2024?" Mr. GHERAIRI, a doctor of public law and former Tunisian Ambassador to UNESCO, led a collective reflection on the alliances of civilizations and the need for a new, more just and united world order, taking into account the diversity of contemporary societies.

During this conference, Mr. Gherairi addressed crucial issues related to international relations, including the climate crisis, humanitarian crises, and the emergence of new technologies. He emphasized the importance of constructive dialogue and international cooperation to address these challenges and build a peaceful world.

The event also provided an opportunity for students of the Master's program in "Conflict Management and the Alliance of Civilizations" to engage directly with the speaker on the topics discussed. This meeting is part of the activities of the Alliance of Civilizations Chair, created during the United Nations Alliance of Civilizations World Forum in November 2022, with the aim of stimulating reflection and intellectual exchange among UEMF students.

FRANCO-GERMAN VISIT: Opportunities for partnership and cooperation between Europe, Morocco and Africa

On January 30, 2024, the Euromed University of Fez welcomed the Ambassadors of France and Germany to Morocco, Mr. Christophe Lecourtier and Mr. Robert Dölger. After a presentation by the President of the UEMF, Prof. Mostapha Bousmina, on the University's missions in terms of intercultural dialogue and cooperation between the two shores of the Mediterranean, the guests visited the Eco-Campus and its technological facilities.

The ambassadors then shared their views on European foreign policy towards Morocco, addressing political, economic, and security aspects. They also discussed Europe's role as a reliable partner for Africa. This event provided an opportunity for students and lecturers to discuss ways to strengthen cooperation between Morocco, France, and Germany to promote peace and security in the region.

International Conference: “Techniques and Environment”

On January 25, 2024, the ICESCO-Euromed Chair in “Arts, Societies and Civilizations” organized an international conference in collaboration with CETCOPRA of the University of Paris 1 Panthéon-Sorbonne on the theme of “Technology and Environment”. The event brought together Moroccan and international figures, including Dr. Mohamed Zinelabidine of ICESCO, as well as a panel of researchers from the University of Paris 1.

The conference explored multidimensional approaches to responding to social and humanitarian crises, focusing on the interactions between technology, society, ethics, and the environment. Two discussion sessions were organized: one on the use of technology in emergency situations, and the other on the social issues related to technology.

This meeting provided a platform for enriching debates between speakers, teacher-researchers and students from the Euromed University of Fez.

https://ueuromed.org/actualites/annonces-diverses/colloque-international-techniques-et-environnement

Conference by Bernard LUGAN: "Colonization and territorial amputations in Morocco"

Bernard Lugan, an expert in history and geopolitics, was welcomed on January 25, 2024 at the Euromed University of Fez for a conference entitled "Colonization and territorial amputations of Morocco", as part of the University's Conference Cycle.

He presented a detailed analysis of the failures and successes of Morocco's reunification, as well as the origins of the conflict over the Moroccan Sahara, highlighting the impact of colonial decisions on the country's territories. Lugan highlighted the crucial role of Kings Mohammed V, Hassan II, and Mohammed VI in this process.

The event also allowed Mr. Lugan to sign his book "History of Morocco: From the Origins to the Present Day," providing a summary of the historical, political, religious and socio-cultural evolution of Morocco.

Participants, including students and research professors, had the opportunity to engage in an enriching debate on various geopolitical issues. Following the conference, Professor Lugan was invited to tour the Eco-Campus and its research platforms.

UEMF is helping to shape the digital and sustainable future of the Fez-Meknes region

The Euromed Institute of Legal and Political Sciences (IESJP) participated in the kick-off meeting of the Smart Sustainable City project in Ifrane on January 12, 2024, thus showing its support for the inclusive digital transition of the Fez-Meknes region.

This is a Belgian-Moroccan project carried out in partnership with the Belgian universities UC Louvain and UNamur, as well as the consortium of four universities in the Fez-Meknes region, including the Euromed University of Fez.

This Belgian-Moroccan project embodies the university's vision of a smart and sustainable urban future. It aims to achieve two primary objectives: the region's inclusive digital transition and the emergence of new forms of governance and citizen participation.

National Scientific Conference: Politics and Digital: Collision or Collusion?

On December 19, the Euromed Institute of Legal and Political Sciences (IESJP) organized a scientific conference at the Euromed University of Fez on the theme "Politics and Digital: Collision or Collusion?" The event brought together experts in law, politics, education, and sociology to discuss the impact of digital technology on the relationship between rulers and the governed, and the transformation of the state in the digital age.

The conference was structured around four sessions. The first focused on communication issues, particularly journalism and political marketing. The second addressed democratic renewal and youth political engagement through digital technology. The third session explored legal issues in the era of GAFAM and data protection. Finally, the fourth session addressed public governance in the digital age and its impact on user and investor trust, as well as on entrepreneurship.

This conference enabled constructive exchanges between experts, teacher-researchers and students, around the relationship between politics and digitalization.

"The mausoleum of Georgi Dimitrov as a place of memory" with Pr. Maria Todorova

As part of the lecture series organized by the Euromed University of Fez, Maria Todorova, renowned historian and eminent professor at the American University of Illinois Urbana-Champaign, captivated the audience this Wednesday, December 20, by addressing the theme "Blowing up the Past: The mausoleum of Georgi Dimitrov as a place of memory."

During her presentation, Ms. Todorova took an in-depth look at the Georgi Dimitrov Mausoleum as an emblematic place of memory, focusing on its role in the construction and deconstruction of Bulgarian national identity. She also analyzed the different representations of the past conveyed by this historical symbol and their impact on the collective consciousness.

This conference provided an opportunity for reflection and intellectual exchange, allowing students to deepen their understanding of collective memory, its challenges, and its influence on the construction of history and national identities. The Euromed University of Fez distinguished itself once again by inviting an internationally renowned expert to share her expertise and stimulate critical thinking within its academic community.

EMADU: “Faces & Faces” Exhibition

The Euromed School of Architecture, Design, and Urban Planning (EMADU) illuminated its spaces with the "Faces & Faces" exhibition. Showcasing the artistic talents of first-year Architecture and Design students, this exhibition captivated visitors by immersing them in a vibrant and striking visual world. Each canvas on display was a window onto the soul, where gazes, smiles, and frozen expressions testified to the richness and complexity of human beings.

She celebrated the uniqueness of each person and appreciated the richness of the human condition. EMADU students showcased their talent by creatively and sensitively capturing the complexity of the human soul through these inspiring portraits. This visual experience certainly touched the minds and hearts of visitors, inspiring them to reflect on the diversity and beauty behind every face.

Launch of new professional DUs at ISJP

Euromed University of Fez is launching two professional university degrees in Land Law and Real Estate Management and Banking and Financial Techniques as part of its continuing education. The first degree aims to provide legal and technical expertise in land law for careers in sectors such as land conservation, notarial work, and real estate development, strengthening investment security. The second degree meets the needs of the financial sector by training professionals in banking and financial techniques, ensuring their mastery of legal and financial tools in compliance with regulations. These training courses are intended for professionals and students wishing to deepen their skills in the real estate and financial fields.

PNDL Pilot Cohort at the Euromed University of Fez: Towards a New Era of Higher Education Governance

Launch of the pilot cohort of the National Leadership Development Program (PNDL) at the Euromed University of Fez, a key player in the implementation of the Erasmus+ CBHE project "Moroccan Higher Education Leadership – MORHEL. This is an ambitious project, coordinated by AUI, UEMF and UMI, aimed at strengthening the capacities of leaders of Moroccan higher education institutions (IES) in governance, strategic planning and management.

Following the opening remarks by Prof. Salim Bounou, Vice-President in charge of Research-Innovation and Partnerships, a series of training sessions led by professors from UM6P and IAV provided participants with a detailed analysis of the current landscape of higher education in Morocco, aimed at equipping future leaders with an in-depth knowledge of the challenges and opportunities present.

The cohort, composed of professors, administrative staff, and key figures in higher education, aims to develop leadership skills to effectively contribute to the development of higher education in Morocco. The initiative aims to train leaders capable of implementing significant improvements in their institutions, particularly in governance, strategic planning, and management.

Cooperation and Strategic Alliance between UEMF and EMUNI

As part of their commitment to the objectives of the Euro-Mediterranean Partnership, the Euromed University of Fez (UEMF) and the Euro-Mediterranean University (EMUNI) agree to enter into a strategic alliance to promote the flow of knowledge between the shores of the Mediterranean and to cooperate within the framework of this agreement. They will encourage long-term mutual cooperation in the fields of higher education, research, and innovation in order to consolidate the Barcelona Process, which, in a broader sense, is also integrated into the Union for the Mediterranean.

The Parties will promote the dissemination of knowledge through joint educational, cultural, and scientific activities. To this end, they will use instruments such as joint applications for and implementation of international scientific and technical projects, the development and implementation of joint or dual study programs, and the exchange of students and academic and administrative staff. Other initiatives will include the exchange of expert and research missions, the development of modules in Euro-Mediterranean studies, and the launch of strategic courses. They will also engage in science diplomacy, the expansion of joint academic offerings, the organization of scientific events, and the joint use of educational and scientific resources, as well as any other cooperative activities agreed upon by the Parties.

International Conference in Fez: Health of Refugees and Migrants

On October 29-30, 2024, Euromed University of Fez hosted an international conference dedicated to the health of refugee and migrant populations, organized in partnership with IOM, WHO, and UNHCR. This event brought together more than 150 participants representing ministries of health, researchers, academics, and civil society actors from various countries. The conference addressed the health challenges facing migrants and refugees and shared best practices from the MENA region.

Professor Chakib Nejjari, Vice-President of UEMF, highlighted the university's commitment to ensuring equitable access to healthcare, particularly for vulnerable populations. The WHO representative in Morocco, Ms. Maryam Bigdeli, reiterated that universal health coverage is essential to eliminate barriers to care and promote equity. Recommendations were made to improve access to healthcare for migrants, including the digitalization of medical records and South-South cooperation.

Funded by the Finnish Ministry of Foreign Affairs, this initiative aims to strengthen health policies for migrants in the region and promote coordinated action between countries of origin, transit and destination.

2025: Euromed University of Fez at the heart of action for the SDGs

Xavier Driencourt's lecture at the UEMF on "The Enigma of Algeria"

Euromed University of Fez welcomes Xavier Driencourt for a conference on his new book "Enigma of Algeria"

The Euromed University of Fez (UEMF) had the honor of welcoming HE Mr. Xavier Driencourt, former French Ambassador to Algeria, for an exceptional conference dedicated to his latest book, Enigma of Algeria. The event, organized in the presence of the President of the UEMF, Prof. Mostapha Bousmina, as well as several Vice-Presidents and Research Professors, brought together an audience of enthusiasts of geopolitical issues and contemporary Algerian history.

The conference allowed Mr. Driencourt to deliver an in-depth and nuanced analysis of contemporary Algeria, exploring the multiple facets of its political, economic, and social history, as well as the country's future prospects. In his presentation, he addressed the challenges facing contemporary Algeria.

UEMF executives and researchers enriched the debate by asking incisive questions and sharing multidisciplinary perspectives on the issues raised by the author. This discussion offered a comparative analysis of regional dynamics, consolidating UEMF's role as a platform for reflection on current issues in the Maghreb and the Mediterranean.

The event concluded with a book signing session, during which Mr. Driencourt interacted directly with the participants, offering everyone a special moment to discuss his work.

Franco-Moroccan Conference on Business Law

The conference, co-organized by the Euromed University of Fez (UEMF) and the Law and Commerce Association, under the theme "Franco-Moroccan Cross-Perspectives on Business Law," brought together renowned experts from both shores of the Mediterranean to discuss contemporary legal issues in business law. This event highlighted Franco-Moroccan collaboration and provided a valuable platform for exchanging views on legal practices, particularly in the areas of arbitration, contract law, and financing.

The opening ceremony was marked by speeches by prominent figures, such as Professor François-Xavier Lucas, Director of the Sorbonne Law School's outsourced program at UEMF, and Mr. Antoine Diesbecq, President of the Law & Commerce Association. The presence of Mrs. Carine Foeller Viallon, Consul General of France in Fez, as well as numerous jurists, lawyers, and researchers, reinforced the international and academic dimension of the event, highlighting the importance of cooperation between France and Morocco in the legal field.

Morality and Ethics: A Reflection with Pr. Rachid ACHACHI

The Euromed University of Fez's lecture series continues with a new, exciting session led by Professor Rachid ACHACHI, faithful to his habit of intellectual exchanges with students and faculty.

During this conference on November 20, 2024, Prof. ACHACHI addressed the theme "Morality and Ethics," exploring the links between moral principles and contemporary ethical challenges. Through an in-depth reflection, he invited participants to reflect on the foundations of morality and ethical issues in today's world, while emphasizing the importance of these concepts in building a just and equitable society.

As usual, this meeting provided a stimulating framework for dialogue and the exchange of points of view, thus enriching the academic experience of the students and teacher-researchers present.

Digital marketing and data protection: what challenges and opportunities do businesses face under the new law?

The digital revolution and the explosion of data have prompted Morocco, like other nations, to strengthen its legal framework for personal data protection. The recent update of Law No. 09-08, which governs the processing of personal data, represents a decisive turning point for Moroccan businesses, particularly in the field of digital marketing.

Euromed University Meetings: Dialogue for a united and plural future

Under the High Patronage of His Majesty King Mohammed VI, the Euromed University of Fez (UEMF) organized the Meetings on the Alliance of Civilizations on December 6 and 7, in partnership with the United Nations. This event brought together international figures around the theme "Rebuilding Trust for a United and Plural World," promoting the principles of tolerance and cultural coexistence dear to Morocco.

Highlights included the inauguration of the Alliance of Civilizations Chair, the presentation of the 2024 Mediterranean Prizes, and an ecumenical concert paying tribute to the three monotheistic religions.

Over two days, rich discussions took place between experts, political leaders and academics such as Miguel Angel Moratinos, André Azoulay, Faouzi Lakjaa, Younès Sekkouri and Mouâd Jamaï, on topics such as preventive diplomacy, migration, artificial intelligence and transparency in international relations.

Through this initiative, the UEMF reaffirms its commitment to intercultural dialogue and peace, and positions itself as a key player in building a more inclusive and harmonious world.

Four emblematic figures honored by the “Mediterranean 2024” Awards during the Euromed University Meetings in Fez

On December 6, 2024, the Euromed University of Fez hosted the 2024 Mediterranean Awards ceremony, organized as part of the Meetings on the Alliance of Civilizations, under the High Patronage of His Majesty King Mohammed VI. Created by the United States of the World with the Fondazione Mediterraneo and the Academy of the Mediterranean, these awards recognize figures who have worked for peace, development and creativity in the Mediterranean region.

Four winners were recognized:

- Fouzi Lekjaa and Miguel Ángel Moratinos (Institutions category)
- Mostapha Bousmina (Culture category)
- Françoise Atlan (Art and Creativity category)

The international jury praised their exceptional contribution to a world of peace, respect, and intercultural dialogue. The UEMF is delighted to have hosted this event and to see its president among the winners, in perfect alignment with its mission to promote universal values in the Euro-Mediterranean area.

Human Rights: A Look at Moroccan Constitutionalism

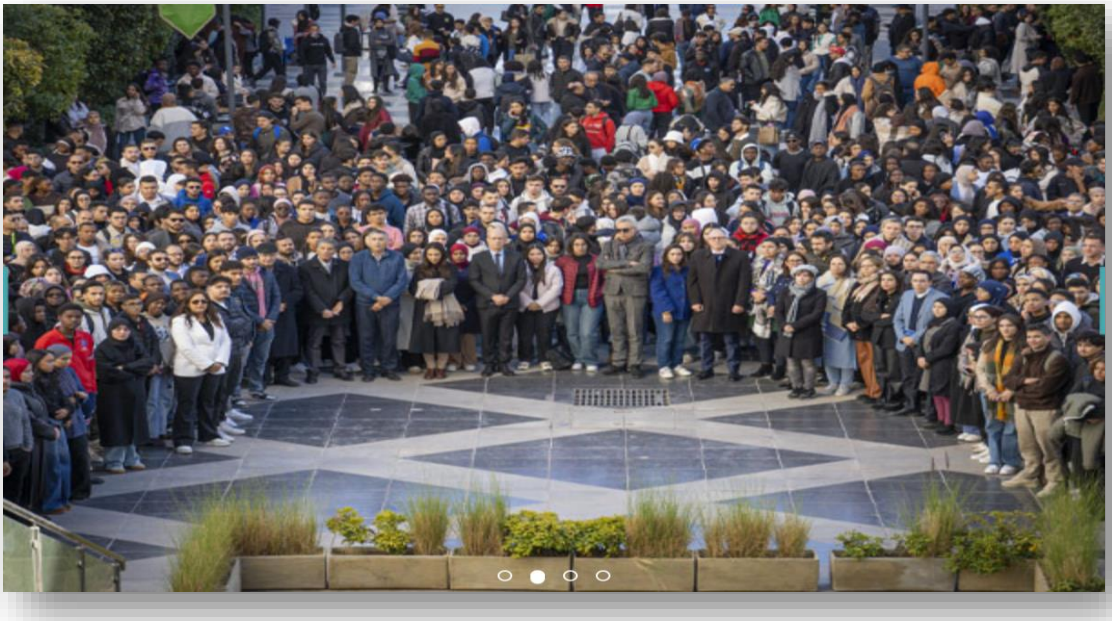

On the occasion of International Human Rights Day, the Euromed Institute of Legal and Political Studies organized a conference on "Human Rights in the Parliamentary Constitutional System" on Tuesday, December 10. This conference was moderated by Mr. Abderrahman LAMRANI, President of the Fez Meknes Regional Human Rights Commission, former member of the House of Representatives and University Professor.

The speaker highlighted the different generations of human rights before showing the legal and institutional anchoring of the question of rights and freedoms in Moroccan constitutionalism.

UEMF in Mourning: Deep Regret Following the Death of Our Laureate

Deeply affected by the death of the late F. Balizi, a graduate engineer of the 2024 class in Civil Engineering, the entire faculty, administrators and students of the Euromed University of Fez observed a minute of silence today in her memory.

This initiative, supported by the entire university community, expresses the immense sadness and solidarity with the family and loved ones of the deceased. F. Balizi, a talented and determined young woman, had recently joined the professional world, full of ambition and hope. Her return to the university on November 29th, during the graduation ceremony, will remain etched as a moment of joy and pride.

Euromed University of Fez, on behalf of its President, its faculty, administration and students, renews its most sincere condolences and shares the pain of those who mourn his loss.

May his soul rest in peace.

Women and the Law: Realities and Challenges

The Euromed Faculty of Human and Social Sciences recently provided a real space for reflection by hosting the conference "Women facing the Law: Realities and Challenges", as part of the Conference Cycle of the ICESCO-EUROMED Chair "Arts, Sciences and Civilizations".

A debate that shifts the boundaries!

On the program:

- The Moudawana reforms and their impact on society
- The place of women in the public and private spheres
- Challenges related to reproductive and maternal health
- And much more...

Graduation Ceremony of the IESJP and Paris 1 Panthéon-Sorbonne

The Euromed Institute of Legal and Political Sciences (IESJP) celebrated academic excellence at the graduation ceremony for the 2023-2024 undergraduate class, held on December 18, 2024.

This prestigious event is part of the strategic partnership and dual degree agreement between the Euromed University of Fez (UEMF) and the University of Paris 1 Panthéon-Sorbonne. This exceptional collaboration, which symbolizes the synergy between two renowned institutions, demonstrates the commitment of both institutions to providing their students with excellent training that meets international standards.

The laureates, who have completed rigorous and enriching academic programs, embody the success and talent of this academic alliance. Through this ceremony, the UEMF, through its Institute, reaffirms its mission to prepare a legal and political elite capable of meeting global challenges.

Warmest congratulations to our dear winners for this well-deserved achievement, the fruit of their perseverance and efforts. We wish them a bright future and a successful career. Has a context menu.

UNESCO-Euromed Chair in Mediterranean Interculturalities: Security and Sustainable Development

The Euromed University of Fez organized a conference led by Professor Abderrahman Tenkoul on the links between security and sustainable development in the Mediterranean. Part of the work of the UNESCO-Euromed Chair in Mediterranean Interculturalities, the conference highlighted the growing threats linked to climate change, socioeconomic challenges (unemployment, migration, co-development), and geopolitical issues in the region. Professor Tenkoul called for a collective response based on sovereignty, innovation, the reappropriation of Mediterranean lifestyles, and a transition to "controlled security." The event provided a framework for reflection, mobilizing students and researchers around a sustainable, united, and resilient vision.

Educational and Scientific Publications: A Commitment to Quality Education

As part of its commitment to quality education and the dissemination of knowledge, the Euromed University of Fez, in collaboration with the Alliance of Civilizations Chair, has published a first batch of scientific journals and educational works.

These publications include the International Journal of European, Mediterranean and African Studies, Médiations Méditerranéennes, and Alternatives Africaines, which explore themes related to identity, Mediterranean and African dynamics, as well as social innovation.

Furthermore, several books from courses given at UEMF have been published in partnership with L'Harmattan, strengthening the scientific and educational vocation of the university.

This initiative demonstrates UEMF's desire to support academic production, encourage research and provide accessible, innovative and multicultural educational resources.

https://acc.ueuromed.org/publications/

United Nations peace operations at the heart of discussions at the UEMF

As part of the activities of the Euromed Institute of Legal and Political Sciences (ISJP), an exceptional conference was organized around the theme: "United Nations Peace Operations: Management, Challenges and Perspectives". Led by a senior officer of the Royal Armed Forces, a recognized expert in peacekeeping operations, this meeting offered our Bachelor's and Master's students a valuable immersion in the realities on the ground and contemporary geopolitical issues.

Drawing on his experience at the United Nations headquarters in New York and Geneva, as well as his numerous participations in peace missions in Africa and the Middle East, our speaker was able to convey, with clarity and pedagogy, an in-depth analysis of the management mechanisms of peace operations, the current challenges they face, as well as the prospects for development in a constantly changing world.

The conference generated a great deal of interest among the students, who were able to freely exchange ideas with our guest and deepen their understanding of the diplomatic and strategic workings of the UN in an increasingly conflictual international context. This initiative is fully in line with the IESJP's mission to foster openness, dialogue, and critical analysis around major international issues.

Screening-debate with Filmmaker Abd Elilah El Jouahri at the UEMF

As part of its Conference Series, the Euromed University of Fez welcomed, on Wednesday, April 9, 2025, the Moroccan filmmaker Abd Elilah El Jouahri for a screening and debate around his film The Slave, produced in 2023.

A director, film critic, and President of the Union of Moroccan Directors and Authors, Mr. El Jouahri also holds a PhD in cinema, focusing on "Space in Cinema through Examples of Moroccan Films." He is the author of several reference works, including "Cinema of Developing Countries Between Marginalization and Self-Assertion" and "Ouarzazate, a Space for Cinema." His cinematic work includes numerous award-winning fiction and documentary films, including "The Dancer," "Water and Blood," "Rajaa, the Daughter of the Mellah," "Hala Madrid, Visca Barça," "The Window of Paradise," and "The Wedding of Si Tayeb."

His latest film, The Slave, boldly addresses the issue of voluntary enslavement through the journey of Ibrahim, a young man in search of a master. The power of the story also lies in the performances of its actors, notably Saad Mouaffak in the lead role, accompanied by Omar Lotfi, Sahar Seddiki, Naima Ilyas, Ismail Abou-El-Kanater, Mohamed El Atir, and Hajar Chergui.

The meeting concluded with a rich exchange with the students, teachers and guests present, around the themes raised by the film and the contemporary issues of Moroccan cinema.

International action

As part of our international outreach, we held an online meeting with the Rotaract Club of Surabaya Selatan. During this meeting, the two clubs had the opportunity to introduce themselves and discuss their respective cultures, as well as ongoing projects. Each club shared its values, initiatives, and operations, strengthening international ties and fostering better intercultural understanding. Each club was also able to create a recipe from the other's country, further strengthening cultural exchange and enrichment.

The main objective of this action was to promote cultural exchanges between Rotaract clubs, to share experiences and projects, and to strengthen relationships between members through a better understanding of each culture, while promoting collaboration for common initiatives.

3ᵉedition of the Restructuring Days of Fez,

The Euromed University of Fez welcomes today and tomorrow the 3ᵉedition of the Restructuring Days of Fez, an event of excellence organized in partnership with the Sorbonne Law School.

Renowned jurists, practitioners, researchers, magistrates and institutional representatives from France, Africa, Morocco and elsewhere come together to discuss the major transformations in corporate restructuring law.

The morning was devoted to two major areas: the reform of amicable and collective procedures, then the international and European issues linked to restructuring.

Rich discussions that fuel reflection and open the way to new perspectives.

Training program for elected officials and staff of the Fez-Meknes region

On April 24 and 25, 2025, the Euromed University of Fez organized a training workshop for elected officials from the Province of Moulay Yacoub on "Mastering local taxation and the governance of local authorities." This initiative is part of the UEMF's openness and its commitment to strengthening the skills of local stakeholders.

Dedicated to the control of local taxation as a strategic lever for public financing and the governance of local authorities, this session aimed to strengthen the capacities of elected officials, improve the efficiency of resource collection, promote transparency and tax fairness, as well as consolidate efficient and attractive governance for investment.

International Conference: Cross-examinations of Mediterranean epistemes

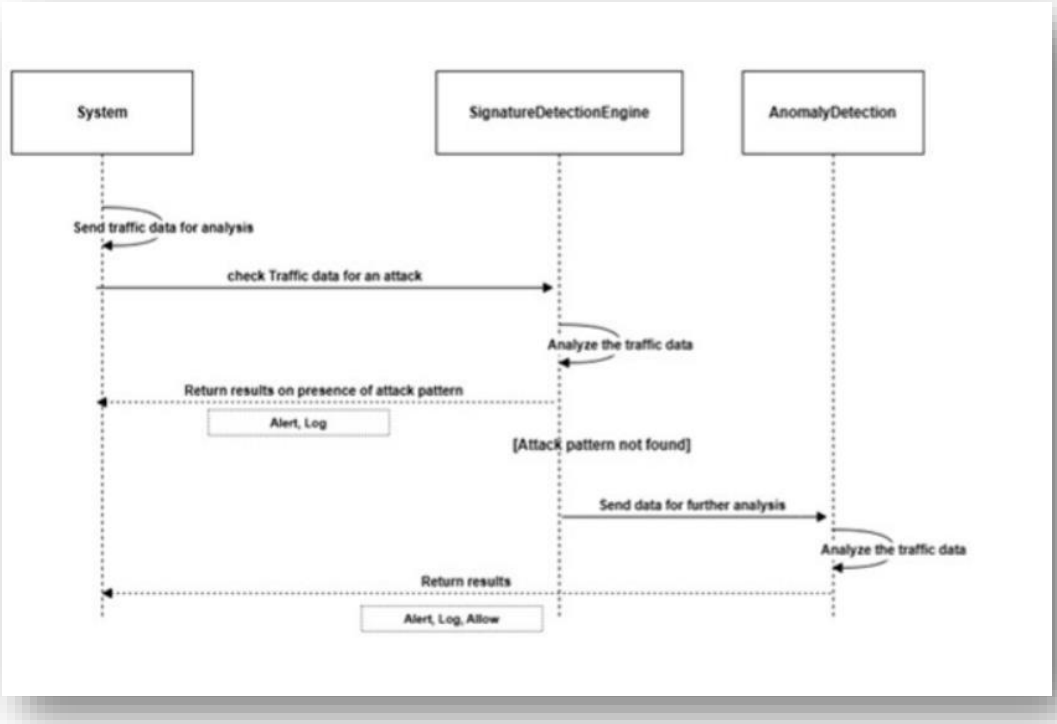

On May 29 and 30, 2025, the Euromed University of Fez hosted a major international conference entitled "From the Mediterranean, Significant Epistemes: in Philosophy, Art and Literature." Jointly organized by the Faculty of Human and Social Sciences, the ICESCO-EUROMED Chair (Arts, Societies and Civilizations) and the UNESCO-EUROMED Chair (Mediterranean Interculturalities).

This conference brought together researchers, philosophers, artists, and writers from diverse backgrounds to reflect deeply on the forms of thought, creation, and transmission that have marked the shores of the Mediterranean. Through lectures, presentations, and discussions, the speakers explored how Mediterranean philosophy, art, and literature continue to resonate today, carrying a legacy that is still alive and constantly renewed.

The event was marked by the richness of the exchanges, the quality of the contributions, and a genuine intellectual openness. It highlighted the complexity of Mediterranean cultural dynamics, between continuities and ruptures, and allowed for new avenues of interpretation of the works and thoughts emerging from this plural and fertile space.

Doctoral Thesis Defense in "Artificial Intelligence and Cybersecurity" by Mr. Oluwadamlare Harazem ABDULGANYU

The Euromed University of Fez organized, on Thursday, July 10, 2025 at 9:00 a.m., in the Gallery of Building 1, the defense of the doctoral thesis of Mr. Oluwadamlare Harazem ABDULGANYU, on the theme of artificial intelligence applied to cybersecurity.

Entitled "Design of a Hybrid Network-Based Intrusion Detection System (NIDS) Using Artificial Intelligence (AI)", this research aims to develop an intelligent system capable of detecting computer intrusions using innovative AI-based approaches. The main objective is to contribute to improving the security and resilience of computer networks.

Towards better local governance: UEMF equips municipal elected officials

As part of its ongoing efforts to build the capacity of local stakeholders and improve the performance of public services, the Euromed University of Fez, under the supervision of the Fez-Meknes Regional Council, organized a training workshop on the theme of administrative policing on Wednesday, May 14 and Thursday, May 15. This workshop is part of the Continuing Education Master Plan, led by the University, which aims to equip elected officials and strengthen their skills to meet the demands of modern territorial governance. The workshop was actively attended by more than 80 municipal councilors, demonstrating the growing awareness of the importance of training in improving daily practice within local authorities. During these two days, practical cases inspired by real-life situations encountered by councilors were discussed, offering participants the opportunity to understand the legal concepts related to administrative policing through concrete examples, and thus strengthen their ability to effectively manage field issues. The workshop also provided an opportunity to delve deeper into the legal and regulatory frameworks governing the missions of the administrative police, to examine the municipality's intervention mechanisms, its areas of action, as well as the principles of balance between the preservation of public order and respect for individual rights.

This initiative confirms the importance of continuing education as a key lever for modernizing local administration, improving the quality of public services, and strengthening trust between citizens and elected institutions. This workshop thus illustrates the shared commitment of the Euromed University of Fez and the Fez-Meknes Regional Council to establish an innovative training model, based on the convergence of academic knowledge and the reality on the ground, in the service of sustainable and effective local development.

Strategic reading of Moroccan intelligence: Moulay Abdelmalek Alaoui in conference at the UEMF

As part of its high-level intellectual meetings, the Euromed University of Fez welcomed Mr. Abdelmalek Alaoui, president of IMIS and recognized expert in strategy, for a conference dedicated to his reference work "The Time of Morocco: Resilience and Emergence of the Cherifian Kingdom".

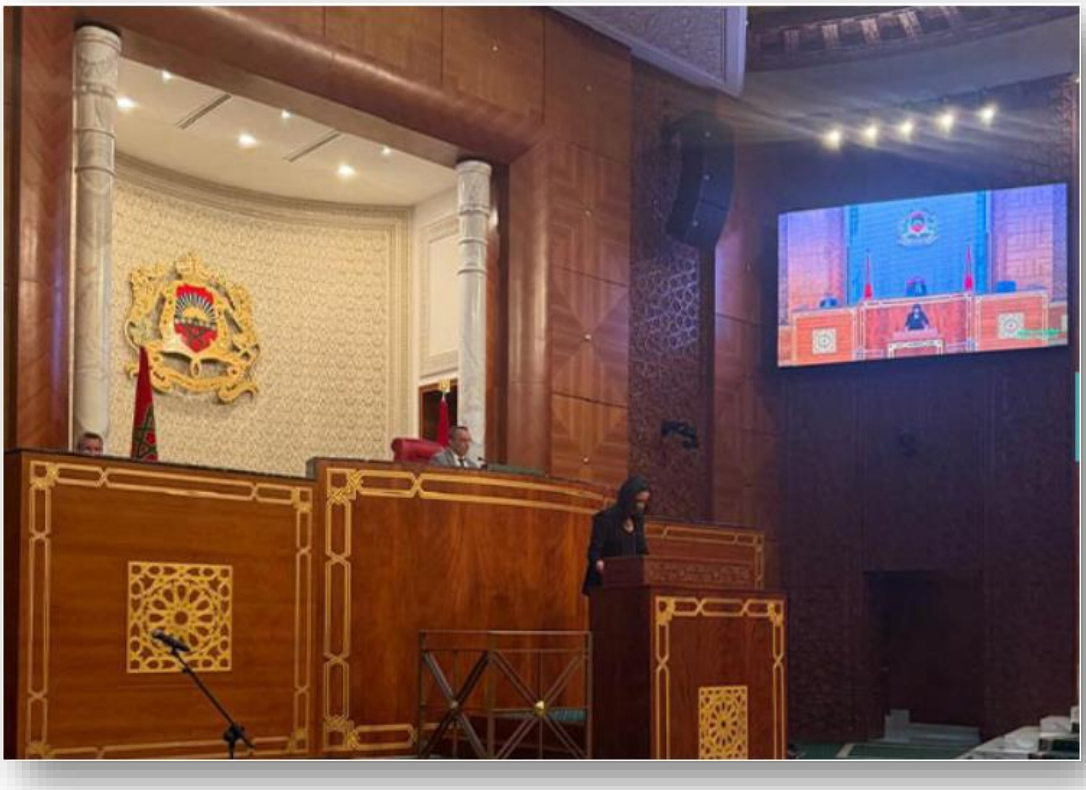

The event provided an opportunity to revisit Morocco's major strategic directions in the face of the Covid-19 pandemic, while analyzing the far-reaching reforms undertaken in the institutional, economic, digital, and geopolitical spheres. Through a structured and lucid approach, Mr. Alaoui presented Morocco as a country undergoing transformation, focusing on political anticipation, innovation, and a sovereign vision of development.

The discussions highlighted the central role of youth in this dynamic, perceived not only as beneficiaries, but also as key agents of change. Students were thus able to interact around the issues of national leadership, digital transition, continental integration, and productive sovereignty.

The session concluded with a book signing and a special moment of sharing, confirming the importance of such meetings in civic education, the formation of critical thinking and the promotion of a culture of resilience.

Participation in the National Conference on Investment, Employment and Digital Transition

As part of the annual session of the House of Councillors of the Kingdom of Morocco, a National Conference on Investment, Employment and Digital Transition was held on June 11, 2025 at the House of Councillors, under the theme: "Investment, Employment and Structural Transformation in Morocco: Towards a New Inclusive Territorial Governance".

The Euromed University of Fez was represented by Professor Ahlam Mohammadi, lecturer and researcher at the Euromed Business School (EBS), who took part in the thematic workshop entitled: "Investment, governance, gender and territorial dynamics: points of convergence to improve inclusive employment in Morocco."

Her speech highlighted the conditions necessary to make public investment a lever for inclusive job creation and balanced territorial development. She emphasized the importance of governance rooted in local realities, capable of responding to the structural challenges of the labor market.

Calling for a strategic repositioning of public policies, Professor Mohammadi stressed the need to place the creation of productive, sustainable and accessible jobs for all at the heart of national priorities.

This participation illustrates the active engagement of the UEMF academic body in the major debates that shape the future of the country.

International conference at UEMF: A reflection on regulation and governance in the face of social complexity

On November 20 and 21, 2024, the Euromed University of Fez (UEMF) hosted the first edition of the international conference entitled "Regulation and Governance of Public Action in the Face of Social Complexity." This event brought together experts in sociology, economics, political science, law, as well as practitioners from various backgrounds, to analyze the major transformations of public policies in a context marked by social complexity.

Through concrete case studies and multidisciplinary discussions, the conference explored new dynamics of governance and regulation. Participants debated the challenges associated with the growing interdependence between public and private actors, the emergence of multi-level models, and current sociopolitical changes.

This meeting also served as a bridge between academic reflection and operational practices, offering innovative perspectives to better understand and respond to the challenges of contemporary public action.

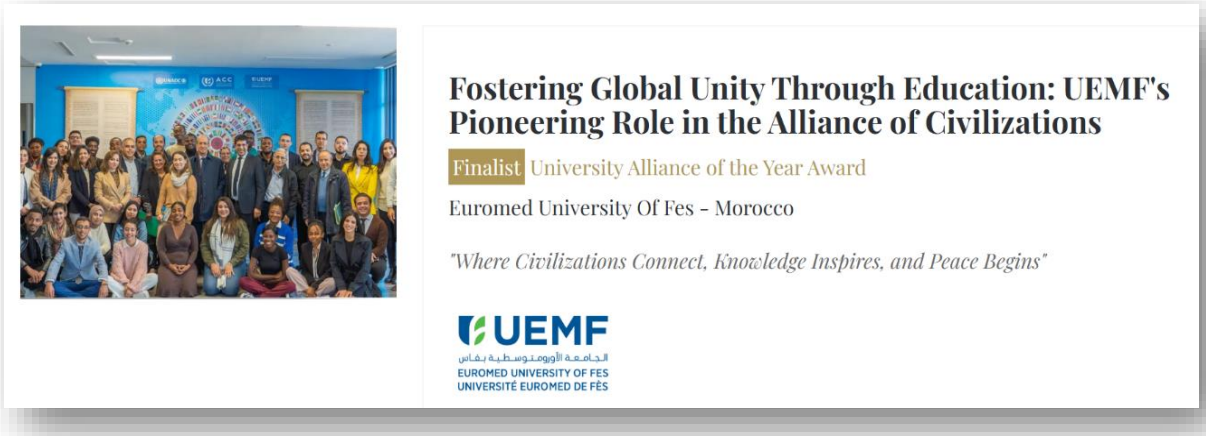

The UEMF thanks all the speakers and participants for their enriching contributions to this major scientific event.

Doctoral Thesis Defense in "Information and Communication Sciences" by Mr. Anoire EL ATTARI

This research offers a retrospective analysis of the role of Moroccan media during the Covid-19 crisis, focusing on their adaptation strategies and their influence on public perceptions and behaviors. By adopting a mixed methodology combining a thematic analysis of 30 semi-structured interviews and a statistical analysis of the responses of 562 participants to a questionnaire, the study highlights how journalists faced challenges such as disinformation, mobility restrictions, and the tension between speed and accuracy of information. The results highlight the essential role of the media as a relay of reliable information and confirm the impact of media consumption on preventive behaviors. Finally, the study makes theoretical and practical recommendations regarding communication in times of crisis, media literacy, and the use of technologies to combat disinformation during emergency situations.

Doctoral Thesis Defense in “International Relations” by Mr. Othman SQALLI HOUSSAINI

This thesis explores the role of culture and religion in socio-economic development and the strengthening of bilateral relations between Morocco and other African countries. Through the analysis of cooperation policies, field initiatives, and interviews with African institutional actors, it highlights the impact of these dimensions on the political, economic, and social spheres. The study aims to promote cultural and religious values as levers for sustainable development and cohesion, while proposing concrete recommendations to strengthen African cooperation.

SDG17 Report: Partnerships for the Goals

Introduction

The UEMF is a partnership project. Itemanates from the Royal Initiative with the desire to create in Fez a framework for higher education and research based on intercultural dialogue, exchange and cooperation between the two shores of the Mediterranean, with a natural extension towards Sub-Saharan Africa, while offering excellent training and conducting very high-level scientific research in close connection with the socio-economic world. UEMF welcomes more than 35 nationalities between students and professors and therefore constitutes a multicultural platform.

The Moroccan government has significantly supported the implementation of the UEMF through subsidies for its operation and for the land base for its eco-campus as well as for its investments.

The UEMF also benefited from donations from the European Union and a loan of 50% of its investments from the European Investment Bank and also from support from the Union for the Mediterranean.

Several partnerships are operational on the plans:

Academics

Training courses at the Faculty of Human and Social Sciences

Bachelor's Degree in Translation and International Relations

It is a multidisciplinary program combining various contributions from the humanities, social sciences, as well as legal and political sciences. Euromed University of Fez is the first and only university in Morocco to offer this original and innovative academic format.

Today's global challenges require professionals with a sound understanding of international institutions and organizations, as well as a solid grounding in the humanities, enabling them to gain an in-depth understanding of the evolution and complexity of societies. The Bachelor's degree in Translation and International Relations is a university degree that meets this need. It integrates various fields of knowledge and aims to equip students with skills useful for analyzing the complex problems of our time.

This program offers solid training in translation and international relations, complemented by legal, economic and sociological subjects and skills.

https://ueuromed.org/faculte-des-sciences-humaines-et-sociales/filieres/diplome-bac3-en-traduction

Bachelor's Degree in Methods and Professions of Cultural Engineering

The main objective of this course is to train students in knowledge of the field of culture, its components and forms of expression, its production and dissemination strategies based on cross-disciplinary and complementary disciplines.

The aim is to prepare them to be professional actors in the cultural field, with the ability to use the knowledge acquired to:

- Make this field a real lever for economic and social development.
- Play a major role in the emergence of new creative and cultural industries in Morocco.

https://ueuromed.org/faculte-des-sciences-humaines-et-sociales/filieres/methodes-et-metiers-de-lingenierie-culturelle

Bachelor's Degree in Social Sciences and Health Management

The sector aims to train managers qualified to exercise a certain number of professions and responsibilities with added value:

- Expertise and consulting in public health in its social dimension;
- Support and coaching of local authorities in defining and implementing preventive health programs;
- The management of an establishment or hospital center;
- Health education project engineering intended for any public or private institution wishing to develop professional skills in this sector.

https://ueuromed.org/faculte-des-sciences-humaines-et-sociales/filieres/sciences-sociales-et-management-de-la-sante

Master of Business Law, Franco-Moroccan course, relocated to UEMF

The Sorbonne Law School, in partnership with the Euromed University of Fez, is offering a new training course: delivered by the University of Paris I Panthéon Sorbonne.

The program spans two years of training (Master 1 and Master 2) taught in Fez by professors and lecturers from the Sorbonne Law School. Following their studies, students can also obtain a Master's degree in Moroccan law, which will allow them to take the bar exam in both France and Morocco.

[NEW COURSE] Master's in Business Law, Franco-Moroccan course, relocated to UEMF | UEMF (ueuromed.org)

Research

Production co-written with low- and middle-income countries

The UEMF develops partnerships with sub-Saharan African countries at the academic level: welcoming students, doctoral students and developing partnerships between research teams.

NASAC– The Network of African Science Academies (nasaconline.org)

The President of UEMF, Chancellor of the Hassan 2 Academy of Sciences and Technology, is a former President of NASAC and has contributed to the writing of several works and reports with his African academic colleagues.

ASRIC Scholarships

Several dozen African students on scholarships from UEMF and theAfrican Science, Research and Innovation Council (ASRIC) do their thesis work in UEMF research laboratorieshttps://www.ueuromed.org/en/news/various-announcements/asric-uemf-scholarships-african-students-are-now-open-application

ASRIC is mandated to implement the Science, Technology and Innovation Strategy for Africa (STISA-2024) and to promote scientific research and innovation to address Africa's socio-economic development challenges.
Application Instructions:https://greatyop.com/bourses-asric-uemf-etudiants-africains/

Different University labels

THE International Ranking of the best universities in the world: UEMF presents itself with eight other Moroccan universities

The THE ranking is based on a multidimensional analysis of higher education institutions through their achievement of the United Nations Sustainable Development Goals, as measured by Thomson Reuters and Elsevier. It is noteworthy that recently established universities, such as the Euromed University of Fez and the International University of Rabat, rank higher than other major national universities.

It is a global ranking, by subject and reputation, and it also provides regional and national rankings. Along with the Shanghai and QS rankings, the THE ranking is one of the most influential university rankings worldwide.

The 2022 ranking covered universities from 106 countries. Eight Moroccan universities are ranked among the top 1,000 universities in this global ranking this year. Nationally, the UEMF ranking is as follows:

4th: Euromed University of Fez

https://ueuromed.org/actualites/annonces-diverses/classement-international-des-meilleures-universites-au-monde-luemf

The UEMF will be a candidate for THE IR ranking in future editions.

UEMF finalist for The Green Gown Award (2022)

The Green Gown Award is an award that recognizes outstanding sustainability initiatives undertaken by universities and colleges worldwide. It is organized in partnership with the United Nations Environment Programme (UNEP) and supported by the AUF, the Association of Commonwealth Universities (ACU), and the International Association of Universities (IAU).

This year, 56 finalists were selected, representing 19 countries around the world. Among them are five member institutions of the Agence Universitaire de la Francophonie:

- In Canada: HEC Montréal;
- In France: Institut Mines-Télécom Nord Europe;
- In Morocco: Euromed University of Fez (UEMF);
- In Mexico: National Autonomous University of Mexico and University of Veracruzana.

Responsible Campus of the Year

Euromed University of Fez was named winner of the "RESPONSIBLE CAMPUS of the YEAR" Award, during the ceremony organized in Paris, on Tuesday, October 4, 2022, under the effective presidency of the Minister of Higher Education and Research of the French Government.

The "Responsible Establishment of the Year" category recognizes UEMF's commitment to the SDGs and its lasting impact in becoming a responsible organization with regard to the challenges of the transition in four main areas:

- Leadership and governance;
- Real estate and operations;
- Learning, teaching and research;
- Partnership and commitment.

UEMF was recognized for its gender equality strategy at the 6th edition of the Professional Equality Awards ceremony.

The UEMF won the certificate of excellence for its Gender Equality Strategy by obtaining the highest score in each of the ten themes proposed in the Trophy application file.

The Professional Equality Trophy aims to recognize the commitment of institutions and reward the best actions undertaken in terms of gender equality, to promote and share good practices initiated by institutions for the promotion of professional equality and to raise awareness among all economic and social actors of the benefits of the recognition of professional equality on the performance of institutions.

International Consortium "Equality between Women and Men"

UEMF was selected following an international call for proposals to be a member of the international consortium of eleven member institutions of the Agence Universitaire de la Francophonie (AUF) that will work to achieve gender equality on their campuses. The consortium's goal is to achieve gender equality and empower all women and girls. The consortium operates in a collaborative and participatory manner, centered on the notions of sharing and pooling. The work will take place over one year, from June 2021 to June 2022.

Conferences, partnerships and partnership projects

Framework Partnership Agreement between Huawei Mobile and the Euromed University of Fez

The Euromed University of Fez has signed a partnership agreement with Huawei Morocco to accelerate digitalization and promote ICT skills within universities and higher education institutions, as part of the "Huawei ICT Academy" program.

In line with the national strategy to promote the employability of young graduates, "Huawei ICT Academy" aims to support structuring national projects in the ICT sector and to reduce the gap between the knowledge acquired in universities and higher education institutions and the needs of the job market, by issuing Huawei certifications in fundamental and cutting-edge technologies.

This unique program, born from the convergence of the two partners' visions, focuses on promoting innovation, consolidating training, and encouraging excellence. The training programs are implemented by both partners for the benefit of the institution's teachers and students.

In this context, Mr. Nicolas YUAN assured that Huawei Morocco pays particular attention to the transfer of ICT knowledge and skills to its various stakeholders.

"Huawei considers social engagement as a structuring parameter of its growth model. This strategic partnership with the Euromed University of Fez confirms our long-term commitment to Moroccan students and teachers," he emphasized.

New partnership between ECS Informatique and Euromed University of Fez

ECS Informatique and Euromed University of Fez signed today a framework partnership agreement for the promotion of continuing education and lifelong learning aimed at supporting the development and modernization of businesses through the promotion and development of human capital.

ECS Informatique, a leader in the integration of IT solutions for more than 30 years on the Moroccan market, is expanding its training offering to align with business professions and respond to the new issues and requirements of the economic world.

UEMF is a University of Excellence whose mission is to promote exchanges, intercultural dialogue and academic and cultural partnerships in the Euro-Mediterranean region as well as initial and continuing training and high-level scientific and technical research.

"We are very pleased to be working with UEMF," said Mr. M'Hammed LAMRANI ALAOUI, Managing Director of ECS Informatique.

"Our partnership with UEMF will enable us to offer continuing education courses leading to certification and diplomas in new professions that are in high demand on the job market and new themes that address the technological issues and challenges of Moroccan companies."

Professor Mostapha Bousmina, President of UEMF, stated that this framework agreement constitutes an innovative model of university-business partnership, which will enrich the continuing education offer at national and international levels.

UEMF and the BERNARDO O'HIGGINGS University of Chile sign a cooperation agreement

The Euromed University of Fez and the BERNARDO O'HIGGINS University of Chile have signed a cooperation agreement aimed at carrying out joint activities in the areas of education, research, cultural dissemination and international mobility.

Sharing the same values, the two institutions intend to implement a program rich in academic activities aimed primarily at the exchange of teaching staff, researchers, administrators and students between the two countries.

Partnership agreement signing ceremony

As part of the celebrations of the 45th anniversary of the Green March, the President of the Euromed University of Fez, Mr. Mostapha BOUSMINA, attended today, November 6, 2020,

the grand signing ceremony of partnership agreements between the supervisory ministry, the Fez-Meknes region and the universities of the region.

The ceremony was chaired by the Minister of National Education, Vocational Training, Higher Education and Scientific Research, Mr. Said Amzazi, and the Minister Delegate in charge of Higher Education and Scientific Research, Mr. Driss Aouicha, in the presence of the Wali of the Fez-Meknes region, the President of the Fez-Meknes region, and the governors of the region's provinces.

These agreements will give rise to several projects aimed at boosting the qualitative development of higher education in the Fez-Meknes region.

Among these projects, an incubator will be set up within the Euromed University of Fez and will allow project leaders to create their start-ups in an innovative environment promoting productivity and the development of know-how.

The University also signed a partnership agreement with the Wilaya of the region, the Regional Council, Sidi Mohamed Ben Abdellah University, Moulay Ismail University of Meknes and Al Akhawayn University of Ifrane. This agreement aims to implement a project to support research and innovation in the digital field and will contribute to preparing the region for the exploitation of technologies of the Internet of Things, robotics and cobotics, additive manufacturing and artificial intelligence.

Signing of contracts to support scientific research projects in artificial intelligence

As part of the encouragement of scientific research in artificial intelligence through the National Center for Scientific and Technical Research (CNRS) and the ADD, Pr. Mostapha

Bousmina represented the Euromed University of Fez during the signing ceremony of the contracts to support the Al Khawarizmi artificial intelligence program under the aegis of:

- Mr. Said Amzazi, Minister of National Education, Vocational Training, Higher Education and Scientific Research;
- Mr. Moulay Hafid Elalamy, Minister of Industry, Trade and the Green and Digital Economy.

This ceremony was also attended by university presidents, project leaders and the Digital Development Agency (ADD).

During this meeting, 45 eligible projects were selected according to well-defined criteria and were then evaluated by CNRS experts for funding. As a reminder, the "Al Khawarizmi" program has a budget of 50 million Dhs, allocated 70% by the Department of National Education and 30% by the ADD.

Signing of a framework partnership agreement between the OFPPT and the UEMF

The Euromed University of Fez (UEMF) and the Office of Vocational Training and Work Promotion (OFPPT) signed, this Friday, February 26, 2021, a framework partnership agreement for the development of vocational training and the sharing of expertise, particularly in the fields of Digital and Artificial Intelligence.

This framework agreement co-signed at the UEMF by Ms. Loubna TRICHA, Director General of the OFPPT and Prof. Mostapha Bousmina, President of the Euromed University of Fez, will ensure a real synergy between the UEMF and the future "City of Trades and Skills" of the Fez-Meknes Region; a project that is part of the continuity of the program to create 12 Cities of Trades and Skills by 2023-2024, in accordance with the new roadmap for the development of vocational training, presented before His Majesty King Mohammed VI, may God assist him, on April 4, 2019.

Both parties mutually agree to develop partnership projects with high added value, in particular through the development of training programs, training of trainers, support for entrepreneurship and continuing education, as well as participation in research projects and end-of-training projects and the joint development of training projects for the benefit of African partner countries.

UEMF's involvement through this new partnership project confirms its commitment to supporting training structures in centers of excellence that develop training and research programs, promoting innovation. Thanks to its eco-campus designed to the highest international standards, UEMF will allow the "City of Trades and Skills" of the Fez-Meknes Region, which aims to be a center of excellence, to have access to its technological platforms, designed to international standards, in particular those dedicated to digital engineering and artificial intelligence, 3D printing, 4.0 technology, nanotechnologies, renewable energies, biotechnology and biomedicine.

Signing of agreement between UEMF and CNDP

A cooperation agreement was signed between the UEMF and the CNDP, represented respectively by their presidents, Pr. Mostapha Bousmina and Mr. Omar Seghrouchni.

The objectives of the convention are to:

- Jointly organize events (workshops, seminars, conferences, congresses) in areas of common interest;

- Promote partnerships and cutting-edge training in the processing and protection of personal data;

- Strengthen research and development in the areas of personal data protection;

- Encourage the exchange of expertise in areas of common interest;

- Co-produce and exchange documentation and publications.

The National Commission for the Control of Personal Data Protection also intends to support the UEMF in the process of compliance with Law 09-08.

The UEMF, for its part, will organize training sessions for trainers on the protection of personal data by the CNDP.

Signing of an agreement between the National School of Agriculture of Meknes and the UEMF

The Euromed University of Fez and the National School of Agriculture of Meknes have signed a cooperation agreement covering the following areas:

- Pooling of human and material resources and diversification of educational experiences between the two Parties;

- Mobility of teachers and exchange of teaching practices between teachers in Agriculture, Agri-food and Artificial Intelligence from both Parties;

- Co-direction of research work by Masters and Doctoral students within the framework of the Parties' activities;

- Student exchange and supervision of PFEs, particularly in the fields of Agriculture, Agri-food and Artificial Intelligence;

- Delivery of courses, continuing education, conferences and seminars, particularly in the fields of Agriculture, Agri-food and Artificial Intelligence;

- Exchange of scientific knowledge and experiences in the field of Agriculture, Agri-food and Artificial Intelligence and carrying out joint research work;

- Joint participation in national or international calls for projects;

- Publication of joint scientific work;

- Organization of joint scientific and cultural activities for the benefit of students from both Parties.

Climate Conference in the Fez Meknes region

The New Development Model reinforces the importance of a territorially focused approach to sustainable and inclusive development. In this sense, regions have a key role to play. What are the main climate change issues facing the Fez-Meknes region? Are they well reflected in the region's strategies and priorities? How can coordination between different entities be facilitated to maximize the impact of climate action?

The city of Fez is one of the first cities in Morocco to adopt a Climate Change Resilience Strategy. Why is it so important for a city like Fez to adopt such a strategy? How does it influence the preparation of the new municipal action plan?

In Morocco, as in all countries around the world, the financing needs to combat climate change far exceed public resources. The private sector is therefore called upon to play an important role, both in terms of the financing it can mobilize and the innovations it brings. What political support is needed for the development of investments in green industries and sectors? What new skills are needed to facilitate the development of private sector activities?

How is the university preparing young people for the issues and challenges of climate change? How is the academic world equipping itself to best meet future skill demands? How can the university curriculum be adjusted to prepare for the green jobs of tomorrow? What commitment is there for students?

Do NGOs in the region have a climate change action plan? What support can NGOs and think tanks provide to combat the harmful effects of climate change?

“Women in Science” Charter

The “Women in Science: AI and the Future” chair was born from the collaboration between the Islamic World Educational, Scientific and Cultural Organization, ICESCO and UEMF.

This is a chair entirely dedicated to promoting science, and particularly artificial intelligence, among girls and women. The "Women in Science: AI and Futures" Chair aims to counter the problemeof female underrepresentation in the field of science through various activities aimed at increasing recruitment,etention and the advancement of women in science, particularly in Artificial Intelligence. The objective of this Chair is to create an ecosystem of excellence in Artificial Intelligence, to promote and ensure the participation of women researchers in this field, through collaborations with international experts and by training researchers and innovators.

EPS networking at the aerospace show organized by AMDIE and GIMAS, promotional publication on BIM in the magazine “Chantiers du Maroc”.

On March 15, 2022, an agreement was signed between the Euromed University of Fez and the Aerospace Moroccan Cluster as part of the International Aeronautics and Space Show held in Nouaceur from March 15 to 17, 2022.

A strategic partnership supporting innovation in the fields of aeronautics and space through the development and implementation of training, expertise, studies and research and development projects in collaboration with national and/or international public or private structures has been sealed.

This event, organized by the Moroccan Agency for the Development of Investments and Exports (AMDIE) in partnership with GIMAS (Moroccan Aeronautical and Space Industries Group) and ABE (Advanced Business Event), was attended byEuromed Polytechnic School (EPS)and the Vice-Presidency for Partnerships and International Relations through a highly frequented stand and one-to-one exchanges. This exhibition brought together a group of leading professionals from the aeronautics and space industries operating within the "Technology, Operations, and Supply Chain" triptych with more than 400 participants and 200 companies representing around twenty countries within Midparc Nouaceur located within the Mohammed V Aeropole ecosystem.

Morocco and Israel united again by a partnership between two universities

Euromed University of Fez (UEMF) will collaborate with Sami Shamoon College of Engineering (SCE) on some innovative projects.

The agreement was signed by the presidents of both higher education institutions, Professor Mustafa Bosmina of UEMF and Professor Shimon Levitsky, as well as the university's rector, Yehuda Hadad. The project aims to collaborate in the field of academic research and the submission of research proposals to the European Union.

"The signed agreement will help both higher education institutions improve, expand and deepen academic research and develop research programs," said the SCE rector.

A delegation from the Shenkar College of Engineering and Design visits UEMF to finalize their cooperation

As part of the Memorandum of Understanding in the field of scientific research and innovation, signed in Rabat on May 26, 2022, between the Minister of Innovation, Science and Technology of Israel and the Minister of Higher Education, Scientific Research and Innovation of the Kingdom of Morocco, the Euromed University of Fez welcomes on its campus, on May 30, 2022, a large delegation from the "Shenkar College of Engineering and Design", a leading center of training and research in the fields of Design, Arts and Engineering.

This delegation is composed of the President of Shenkar College, Prof. Sheizaf Rafaeli, accompanied by the Vice-President, Prof. Samuel Kenig and Professors Yael Moria and Yoram Halevi, respectively Deans of the Faculty of Design and the Faculty of Engineering.

The meeting aims to formalize cooperation ties, notably through the signing of a partnership agreement, and to lay the foundations for solid and lasting bilateral relations between two leading institutions in the field of training and research-innovation by developing joint curricula and research programs on themes of common interest, including the digital transition, artificial intelligence, innovative agriculture and energy, as well as art and design. This cooperation also concerns the mobility of students and teacher-researchers.

Med2IH Consortium Meetings: a look back at flagship projects in the Euromed region

As part of the activities of the "Erasmus+, Capacity building in Higher Education (CBHE)" project held by the MED2IaH program The MEDiterranean countries: Towards Internationalisation at Home, the Euromed University of Fez received a delegation composed of specialists and experts to take stock of the project's roadmap and assess the key achievements of this program. Prof. Nada Trunk, Research Professor and Advisor at EMUNI "The Euro-mediterranean University of Slovenia" opened the workshop with an overall presentation of the project.

One example of MED2IaH's initiatives is "The Student Boot Camp," a competition focusing on narrating an intercultural experience in video format, which targeted 34 students from the Euromed region: Morocco, Tunisia, Egypt, Lebanon, and Jordan. The best projects won a trip to Piran, Slovenia, to meet other students from: The Euromed University of Slovenia (EMUNI). Through this bootcamp, the selected students had the opportunity to attend modules to deepen intercultural knowledge, innovation, leadership, creativity, and project management.

The MED2IaH project aims to anchor the concept of internationalization at home in universities in nine countries of the Euro-Mediterranean region: Morocco, Tunisia, Egypt, Lebanon and Jordan, Slovenia, Italy, Spain and France.

From Morocco, the project is seeing the participation of three universities from the Fez-Meknes region, namely the EuroMed University of Fez, the Moulay Ismail University of Meknes, and the Al Akhawayn University of Ifrane, which are pooling their efforts and knowledge to ensure the success of the project and jointly promote the Euro-Mediterranean cultural heritage. Ultimately, the involvement of these three Moroccan universities, with the support of the Erasmus+ Morocco Office, should make it possible to develop and design an "Internationalization at Home" model, tailored and adapted to the Moroccan context.

Signature of a partnership agreement between UEMF and Webhelp Maroc

After a first week full of conferences, student activities, and major events, the Euromed University of Fez (UEMF) today sealed a partnership with Webhelp, which employs more than 10,500 people in Morocco, including 4,500 in Fez, making Webhelp the leading private employer in the Fez-Meknes region.

The agreement, initialed by the President of UEMF, Pr. Mostapha Bousmina and the Managing Director of Webhelp Morocco, Mr. Redouane Mabchour, covers several aspects related to the training and skills development of Webhelp staff who are now tackling the professions of engineering, IoT (Internet of Things), ITO (Information Technology Outsourcing), BPO (Business Process Outsourcing), Big data and digital professions, which is one of the flagship specialties of the Euromed University of Fez which has the only engineering school in the Euro-African space completely dedicated to Digital Engineering and Artificial Intelligence.

This agreement is part of the continuity of the strong relations that the UEMF undertakes with the socio-economic and industrial world and the ongoing implementation of its triptych "training, research-innovation and openness to the professions of the future".

Under this agreement, the two parties undertake to pool their efforts in order to implement a series of measures capable of boosting the professional integration of young UEMF graduates and to support Webhelp in improving the skills of its staff and also the organization of events for the benefit of young people, like the Hackathon co-organized by the two partners from September 21 to 23 for the benefit of around a hundred young people from UEMF. They are called upon to compete in ingenuity to respond to a concrete problem in the presence of experts from Webhelp and the CRI and supervised by professors from the Euromed Business School, the School of Digital Engineering and Artificial Intelligence and the Directorate of Entrepreneurship and Socio-economic Cooperation of UEMF.

A delegation composed of the EU, the EIB and EU Ambassadors visits the UEMF for an unprecedented exchange with students

On the occasion of the European Year of Youth and the celebrations linked to Europe Day, the European Union in Morocco, the European Investment Bank, and thirteen Ambassadors of EU Member States in Morocco, visited the UEMF eco-campus together.

This visit underlines the importance of the Morocco-EU partnership in promoting youth and their ideas. During this event, a plenary session co-chaired by Professor Bousmina, President of the UEMF,

The meeting between Mrs. Patricia Llombart-Cussac, EU Ambassador to Morocco, and Anna Barone, EIB representative in Morocco, was marked by an unprecedented exchange between the ambassadors and students in the framework of three thematic workshops: EU-Morocco partnership; climate change and entrepreneurship; higher education and mobility, as well as a cross-cutting gender theme. In this respect, the UEMF plays a key role in training a future generation of high-level managers, bearers of innovation, nourished by the values of tolerance, openness and excellence in terms of creation and innovation and capable of meeting the multiple challenges of sustainable development.

Visit of EIB Vice-President Mourinho Félix to UEMF for an exchange with students on climate

On an official visit to Morocco for the first time, the Vice-President of the European Investment Bank (EIB), Mr. Ricardo Mourinho Félix, will visit the Euromed University of Fez (UEMF) on Monday, October 17.

In the presence of Professor Mostapha Bousmina, President of UEMF, Mr. Ricardo Mourinho Félix will lead a conference in front of UEMF students to highlight the importance of climate issues for young people in the run-up to the next COP 27.

This visit takes place in a "Team Europe" spirit and underlines the importance of the Morocco-EU partnership to strengthen innovation, inclusion and the pursuit of excellence in higher education.

As the upcoming 27th edition of the Conference of the Parties (COP27) approaches, scheduled to take place in Sharm El Sheikh, Egypt, from November 6 to 18, Mr. Mourinho Félix will discuss with UEMF students and lecturers the challenges and opportunities of the climate transition, as well as the role of the EIB, as a Climate Bank, in promoting sustainable models in Morocco and around the world. In the spirit of Team Europe, this visit to the UEMF eco-campus underlines the importance of the Morocco-EU partnership in strengthening skills, inclusion, and employment prospects for young people. Since 2016, the European Union and the EIB have been working alongside the Moroccan government to support various development projects, including that of UEMF with excellent teaching and research programs.

The EIB and EU support for UEMF amounts to MAD 58 million in grants and MAD 148 million in subsidies, in addition to a MAD 784 million loan from the EIB. This financing has enabled the construction and equipment of the University's eco-campus, which meets the highest international standards and now covers more than 40 hectares and is home to some 3,000 students and lecturer-researchers representing 43 nationalities. This European support has also strengthened access for the most deserving students by supporting the University's scholarship policy. By 2026, UEMF is expected to welcome more than 6,000 students from all backgrounds.

Academic partnerships of excellence between UEMF and three Israeli universities
January 16, 2023

A delegation from the Euromed University of Fez (UEMF), composed of its President Prof. Mostapha Bousmina, the Director of the School of Digital Engineering and Artificial Intelligence, Prof. Maha Gmira and the Director of Partnerships and Innovation, Ms. Ghada Bouhlal, visited Israel to strengthen the academic partnership with Tel Aviv University, Shenkar University and the Hebrew University of Jerusalem. The delegation was also received by high-ranking Israeli figures, including the son of former President of Israel Shimon Perez and also the former minister of Moroccan origin Raphy Edery in the presence of His Excellency Mr. Abderrahim Beyyoudh, head of the liaison office of the Kingdom of Morocco in Tel Aviv.

The partnership focuses on artificial intelligence, robotics, biotechnology, precision agriculture and water issues.

About ten UEMF students will travel to Israel next February before hosting Israeli students at UEMF later this year. Other co-supervised lecturers and doctoral students will also travel in both directions, with stays between UEMF and partner Israeli universities.

Euromed University of Fez welcomes the head of European diplomacy, Mr. Josep Borrell
January 6, 2023

The Euromed University of Fez (UEMF) welcomed, this Friday, January 6, 2023, the High Representative of the European Union for Foreign Affairs and Security Policy and Vice-President of the European Commission (EC), HE Josep Borrell Fontelles.

Following his first visit to the UEMF in 2019, Mr. Borrell, accompanied by a delegation of senior officials, went to the Euromed University of Fez for a courtesy visit and also to give a lecture on the theme "Our strategic responsibilities in the current geopolitical context."

This conference was attended by several senior Moroccan and European officials, as well as students and lecturer-researchers from UEMF, in a large, packed amphitheater.

Signing of the framework partnership agreement with the Digital Hub of the Ministry of Agriculture January 2023

This framework agreement aims to:

- Bringing together research and private sector stakeholders around projects with a territorial impact;

- Supporting the impetus for projects focused on optimizing resources in agriculture by providing support and technical assistance on the Artificial Intelligence component;

- Support for activities implemented by one of the two parties in strategic and operational areas related to the promotion of digital technology in the agricultural and forestry sectors.

Organization of a hackathon at UEMF December 20-22, 2022

As part of the second edition of Digital Week, organized by CRI-Fès Meknès and this year focusing on the theme of "Craftsmanship and Digital", a hackathon took place at the Euromed University of Fez from December 20 to 22.

This unprecedented national competition, which took place over 3 days at the UEMF incubator, saw a significant mobilization of artisans, IT developers and marketers and enabled the generation of innovative ideas to meet challenges linked to the value chain of different sectors in this high-potential sector.

The Virtual University of Senegal welcomes Mr. Chakib Monsif as part of a partnership mission January 17, 2023

The Rector of the Virtual University of Senegal, Prof. Moussa LO, received on Tuesday, January 17, 2023, in his office at the headquarters located in Diamniadio, Mr. Chakib MONSIF, Advisor to the President of the Euromed University of Fez, in charge of development, communication and African partnership and Mr. Moussa NDAO, consultant at Sen Orientation and accompanying those who dream of continuing their studies abroad, particularly at the Euromed University with which he is a partner. This visit was carried out as part of a partnership mission to discuss opportunities for collaboration between the two institutions.

Visit of Mr. Chakib Monsif to the Polytechnic School of Thiès as part of a partnership project January 2023

Euromed University of Fez signs a Memorandum of Understanding with the University of Mango America in Mexico February 28, 2023

The Euromed University of Fez (UEMF) signed, on February 28, 2023, a Memorandum of Understanding with the University of Mango America.

During this meeting, Prof. Mostapha Bousmina, President of the Euromed University of Fez, began with a presentation of the University and its main missions in terms of teaching and scientific research, promotion of intercultural dialogue and Euro-Mediterranean-African exchange and cooperation.

The signing of this agreement aims to establish the foundations of an institutional cooperation relationship between the two universities in order to promote bilateral cooperation in the areas of training, knowledge transfer, academic exchange and research.

UEMF welcomes a delegation from the Hebrew University of Jerusalem March 8, 2023

As part of the signing of a Memorandum of Understanding between the two institutions, the Euromed University of Fez (UEMF) today welcomed a delegation from the Hebrew University of Jerusalem.

This delegation is composed of Prof. Tamir SHEAFER, Rector of the Hebrew University of Jerusalem, HE Mr. Yossi GAL, Vice-President for Development and External Relations, Prof. Oron SHAGRIR, Vice-President for International Affairs, Prof. Mona KHOURY, Vice-President for Strategy and Diversity and Ms. Einat LEVI, Advisor at the Hebrew University of Jerusalem.

During this meeting, Prof. Mostapha Bousmina, President of the Euromed University of Fez, began with a presentation of the University and its main missions in terms of teaching and scientific research, promotion of intercultural dialogue and Euro-Mediterranean-African exchange and cooperation.

The signing of this agreement aims to establish links of cooperation and partnership between the two institutions in the field of training and research-innovation by developing joint research programs targeting themes of common interest, in particular technological sciences, health sciences and innovative agriculture. This agreement also concerns the mobility of students and teacher-researchers in order to promote bilateral cooperation in the areas of training, knowledge transfer, academic exchange and research.

Paris 1 Panthéon Sorbonne University and UEMF strengthen their partnership March 10, 2023

In a setting steeped in history and symbolism at the University of Paris 1 Panthéon-Sorbonne, Christine Neau-Leduc, president of this university, and Mostapha Bousmina, president of the Euromed University of Fez, signed a new letter of intent on Friday, March 10, 2023, affirming the desire for strengthened academic cooperation in teaching and research.

This agreement thus strengthens a partnership of more than eight years, recently renewed by the renewal for five more years of the degree in "political and legal sciences" offered as a double degree and above all by the creation, within Euromed, of the Sorbonne Law School and its delocalized master's degree "Business Law", which confers the Sorbonne diploma at the same time as the UEMF master's degree, for those who wish to do so.

This master's degree, exclusively supervised by distinguished professors from the Sorbonne, welcomes French, Moroccan, and sub-Saharan African students to the Euromed campus according to the mutually agreed rule of three-thirds. Together, they acquire solid training in French, Moroccan, and OHADA (Organization for the Harmonization of Business Law in Africa) business law.

UEMF receives a large Hungarian delegation led by HE Miklos TROMLER, Ambassador of Hungary to Morocco March 18, 2023

Euromed University of Fez today welcomed a delegation of a dozen senior officials representing stakeholders from major Hungarian universities and educational and research organizations.

At the beginning of this meeting, Pr. Salim BOUNOU, Vice-President in charge of Research-Innovation and Partnership, began with a presentation of the University and its main missions in terms of teaching and scientific research, promotion of intercultural dialogue and regional and international cooperation.

This meeting chaired by HE Mr. Miklos TROMLER was an opportunity to discuss several topics, including the possibility of exploring new avenues of collaboration in higher education, scientific research and innovation through the strengthening of partnerships between the Euromed University of Fez and Hungarian universities.

In this sense, it should be recalled that the visit of this important Hungarian delegation to Morocco comes within the framework of the 2nd Morocco-Hungary Academic and Scientific Forum which will be held on March 20 and 21, 2023, at the headquarters of the Ministry of Higher Education, Scientific Research and Innovation, in Rabat.

Pr. Mostapha BOUSMINA welcomes His Excellency the Swiss Ambassador, Mr. Guillaume SCHEURER March 29, 2023

On March 29, the President of the University received His Excellency the Swiss Ambassador, Mr. Guillaume SCHEURER, accompanied by Mrs. Christine PIRINOLI, Vice-Rector of HES-SO, the largest university of applied sciences in Switzerland, as well as other officials from the embassy. The Vice-Presidents of the University and the heads of institutions were also invited to this meeting, during which the two institutions were introduced. Many common points and convergences were highlighted in the discussion that followed, in particular on the opportunities for cooperation in training and research, in areas of common interest, as well as the possibilities of setting up reciprocal mobility for students and professors.

The supervision of joint theses and the possibilities of developing research in partnership with businesses were also discussed. A tour of some infrastructures and technological and development platforms was organized in honor of the illustrious guests, following this meeting. Like the eight other Swiss UAS, the HES-SO has become in 20 years a key partner in training and research in Switzerland and, with its six fields and its network of 28 universities bringing together 22,000 students, it is a major player in socio-economic and cultural development in the seven cantons of Western Switzerland.

UEMF receives a delegation from the French Embassy March 29, 2023

A delegation from the French Embassy, comprising Professor Gérald Brun, head of the Higher Education, Research and Student Mobility division, and Ms. Marie Pelatan, university project manager, was received by the University President on March 29. After a brief presentation of the University, its components, and the structuring teaching, research, and development projects planned for the decade, a rich exchange ensued, focusing in particular on opportunities for collaboration, both academically and culturally.

This is how the organization of the last edition of the Philosophy Days at the Euromed University of Fez was recalled, which was a great success, and the hope that the next edition will be as well. Furthermore, both parties agreed to ensure that the eminent speakers invited by the French Institute can travel to Fez and more specifically to the UEMF to lead conferences or seminars, intended for the university community and citizens; the UEMF conference cycle being open to the city.

The Universities of Man and Euromed of Fez sign a partnership agreement

The President of the Polytechnic University of Man (UPM), Lacina Coulibaly, and the Director of African Relations at the Euromed University of Fez (Morocco), Mounsif Chakib, signed a framework partnership agreement on Friday, May 5, 2023, in Man.

Through this partnership, the UPM and Euromed intend to strengthen their public service missions through six areas of collaboration, including exchanges between researchers, professors and administrative staff.

The objective is to share experiences, also, the realization of joint research projects, the exchange of information and didactic and scientific materials of common interest, the constitution of research teams of common interest in different fields (survey ...), the reflection on the establishment of a joint supervision of thesis and dissertation, the joint organization of conferences, colloquiums and scientific congresses.

This agreement between the University of Man and that of Fez is the consequence of the cooperation agreement signed between the Regional Council of Tonkpi and the region of Fez-Meknes, on January 25, 2023.

Visit to the Euromed University of Fez by His Excellency Mr. José Ulisses Correla e Silva, Prime Minister of the Republic of Cape Verde May 12, 2023

The Euromed University of Fez (UEMF) had the honor of receiving this Friday, May 12, 2023, His Excellency Mr. José Ulisses Correla e Silva, Prime Minister of the Republic of Cape Verde, at the head of a very high-level delegation including many Ministers and officials from the Cape Verdean political, diplomatic and academic world.

At the reception held in their honor, Professor Mostapha Bousmina, President of the UEMF, extended a warm welcome to His Excellency and the accompanying delegation, while expressing his satisfaction at the excellent relations between Morocco and Cape Verde. The President then briefly presented the Euromed University of Fez, created at the initiative of His Majesty King Mohammed VI, may God preserve and assist Him, and placed under His Honorary Presidency. Its governance model, its educational engineering and its research-innovation activities, as well as its various components, were presented.

The delegation then visited the University's facilities, particularly its technological platforms and research and innovation laboratories.

Speaking, His Excellency the Prime Minister of Cape Verde welcomed the excellent relations between his country and Morocco and expressed on behalf of the entire delegation his joy at being in this high place of knowledge and living together, while making it known that he is impressed by the UEMF model, by its achievements and by the excellence of its teaching and research activities.

A partnership agreement was signed on this occasion between the University of Cape Verde and the Euromed University of Fez, marking the beginning of a cooperation that both parties hope will be fruitful and lasting, as well as their mutual commitment to rapidly promote joint initiatives, with the aim of carrying out joint teaching and research programs in all areas of common interest and to promote exchanges of students and teacher-researchers.

Visit of the Liberian Minister of Education and his delegation to the Euromed University of Fez May 19, 2023

On Friday, May 19, Mr. Dao ANSU SONII, Minister of Education of the Republic of Liberia, visited the Euromed University of Fez. He was accompanied by a large delegation including Mr. Saku DUKULY, Secretary of State for Education; Robert YARSUO LORMIA, Ambassador; Theophilus A. SNORTON, Director of Scholarships; Samuel G. WILLIAMS, Coordinator/International Scholarships; and Mrs. Sangay M. FREEMAN, Director of Science, Technology, Engineering and Mathematics Education.

At the reception held in their honor, a brief presentation of the University and its current projects was made, followed by a discussion on opportunities for cooperation between the University and its Liberian counterparts. A detailed tour of the University's laboratories and technological platforms was also organized on the sidelines of this meeting.

Visit of the Liberian Minister of Education and his delegation to the Euromed University of Fez May 19, 2023

The President of the University, Prof. Mostapha BOUSMINA, participated, this Friday, March 17, 2023, in the meeting of UfM higher education stakeholders which brought together representatives of several higher education establishments and networks in the Euro-Mediterranean area.

During this meeting, Mr. BOUSMINA spoke about the achievements and challenges of Euro-Mediterranean cooperation in the field of higher education since 2007 and the Euro-Med Cairo Declaration.

This meeting aims to present and discuss the results of the public consultation in preparation for the 1st Union for the Mediterranean Ministerial Conference on Higher Education. The results of the stakeholders' reflection and debate are expected to feed into the declaration to be adopted at the UfM Ministerial Meeting in the last quarter of 2023. This event is co-organized by the Union for the Mediterranean and Casa Mediterráneo, in Alicante.

UEMF hosts the youth event of the 9th United Nations World Forum on the Alliance of Civilizations November 21, 2022

The Euromed University of Fez (UEMF) is hosting, from November 21 to 23, 2022, the youth event of the 9th World Forum of the United Nations Alliance of Civilizations (UNAOC) which is being held in Fez.

The World Forum of the United Nations Alliance of Civilizations is being held for the first time on the African continent. Due to the leadership of His Majesty King Mohammed VI, regarding world peace, the promotion of intercultural and intercultural dialogue, living together and inclusion, this Forum is being held in Morocco and particularly in the spiritual and ancestral city of Fez, which is home to the oldest university in the world, still in operation, the Al Qarawiyine University, which was the rear base of the golden age of Muslim civilization in Andalusia by providing and sharing science and knowledge with the Iberian Peninsula and by extension with Europe and the world.

Creation of the Alliance of Civilizations Chair within the University and appointment of Abdelhak Azzouzi as President

The creation of this university chair was decreed during the 9th edition of the World Forum of the United Nations Alliance of Civilizations (UNAOC) held in Fez on November 22-23, 2022. The High Representative of the UNAOC, HE Miguel Angel Moratinos, during a press conference organized at the end of the forum announced the creation of this chair within the Euromed University of Fez.

Prof. Abdelhak Azzouzi is a founding member and member of the Board of Directors of the Euromed University of Fez. He is a university professor specializing in diplomacy, strategy, international relations, and comparative political science. He has created and directed several research and development centers. He initiated and organized the Fez forums on the Alliance of Civilizations and those on the Union for the Mediterranean. Prof. Abdelhak Azzouzi has also written about thirty books, including nine volumes on the Alliance of Civilizations and cultural diversity. He has published more than 1,500 international chronicles. He is a consultant to several national and international organizations. He has received several international distinctions and awards, including that of the Mediterranean Parliamentary Assembly for his commitment to bringing the two shores of the Mediterranean closer together.

Euromed University present at the Economic Diplomacy seminar in Rabat

Prof. Hafsa El Bekri, lecturer and researcher at the Euromed Business School and co-director of the Research Institute for European, Mediterranean, and African Studies (RIEMAS), represented the Euromed University of Fez at the seminar on Economic Diplomacy as a Lever for Regional Integration in the Euro-Mediterranean Region, organized on July 21 in Rabat, jointly by the Union for the Mediterranean and the Policy Center for the New South.

During this panel discussion, the following three major themes were addressed:

The move towards cooperation strategies to attract more FDI to the region.

The need for strategic monitoring tools for effective economic diplomacy in the region.

Highlighting some revealing facts related to climate change and sustainable investment criteria.

This meeting was also an opportunity to discuss awareness of new dynamics, challenges and opportunities for integration in the Mediterranean region and ways of developing the economy in the southern Mediterranean region.

Euromed University presents at the WTO Public Forum in Geneva

The Euromed University of Fez was present at the 2023 Public Forum in Geneva through the participation of Prof. Hafsa El Bekri, lecturer and researcher at the Euromed Business School of the UEMF and co-director of the Research Institute for European, Mediterranean, and African Studies (RIEMAS).

The World Trade Organization's (WTO) 2023 Public Forum, which addresses the rules governing trade between countries, was held in Geneva from September 12 to 15 under the theme "It's time for action." This edition of the Forum aimed to explore how trade and the WTO can contribute to a greener and more sustainable future. The focus was on the services sector, digitalization, and inclusive trade policies to support this goal.

Prof. El Bekri attended the 2023 Public Forum. She also moderated a session on "The role of services liberalization under the AfCFTA Agreement in accelerating the green transition in Africa?" This session was an opportunity to highlight the importance of the services sector and its growth in ensuring the transition to a green economy in Africa.

During this meeting, the various speakers were able to interact to respond to the main question of the session: "How could the AfCFTA Agreement accelerate the development of the services sector in Africa?"

UEMF receives a delegation from USAID: Launch of the MERC call for proposals program (2023-2024)

As part of the development of international cooperation, a working meeting was held on Thursday, December 7, 2023, at the Euromed University of Fez between the Vice-Presidency in charge of Research-Innovation and Partnership, the heads of UEMF establishments and the heads of the Middle East Regional Cooperation Program (MERC) of USAID (United States Agency for International Development).

This meeting was an opportunity to present the new call for proposals program (2023/2024) for the funding of applied research projects. These innovative projects are incubated within the Eco-campus of the Euromed University of Fez.

The MERC Program, managed by the U.S. Agency for International Development (USAID), focuses on technology, development, and capacity building for young researchers. The program also aims to support scientific cooperation between Israel and the Middle East and North Africa (MENA) countries.

The main objective of MERC is to provide grants for applied scientific research on topics related to regional development as well as for the organization of one-off events, such as regional workshops and scientific exchanges that aim to promote regional scientific cooperation.

During this meeting, Prof. Salim Bounou, Vice-President in charge of Research-Innovation and Partnership, presented the University's main missions, its values, its training offer as well as the opportunities that the UEMF offers in terms of scientific research and scholarships. He also presented the major project for the development of industrial activities 4.0, the Fez Smart Factory (FSF). In turn, the MERC members present took care to present the evaluation criteria for benefiting from this program, the possible funding opportunities as well as the stages of submission of applications and the evaluation schedule.

At the end of this meeting, the teacher-researchers who attended this meeting enriched the discussion by exchanging questions and answers to address all aspects related to this initiative.

UEMF Welcomes George Washington University for New Collaborative Partnership
September 5, 2023

On September 4, 2023, Euromed University of Fez welcomed a prestigious delegation from the United States to represent George Washington University.

This delegation is composed mainly of Dr. Shahram Sarkani, Director of Online Graduate Engineering Programs and Dr. Mohamed Belkhayat, Professor at George Washington University.

The visit began with a presentation of the university by Prof. Salim Bounou, Vice-President in charge of Research-Innovation and Partnership, who outlined the main missions of the UEMF in terms of academic programs, scientific research, and the promotion of intercultural dialogue.

During this meeting, a discussion of opportunities for developing cooperation took place with the aim of establishing a solid partnership framework covering the field of higher education, notably with the School of Artificial Intelligence and the Euromed Polytechnic School of UEMF.

This meeting was followed by a guided tour of the university's Eco-campus and its research platforms.

UEMF signs a memorandum of understanding with the Shanghai Science and Technology Exchange Center (SSTEC-CHINA) September 21, 2023

The Euromed University of Fez (UEMF) signs a memorandum of understanding with the Shanghai Science and Technology Exchange Center (SSTEC-CHINA).

During this meeting, Prof. Salim BOUNOU, Vice-President in charge of Research-Innovation and Partnership, began with a presentation of the University, recalling the importance of this cooperation which promotes joint scientific research.

This memorandum of understanding aims to establish the foundations of a cooperative relationship between the two institutions in order to develop a solid collaboration in scientific research, joint innovation projects, sharing of information related to innovation policies, technological exchange and development of incubators preparing the launch of start-ups.

Following this meeting, the University's guests took part in a guided tour of the UEMF Eco-campus and its research platforms.

Euromed University of Fez (UEMF) and Paris 1 Panthéon Sorbonne University (UP1PS) strengthen their partnership for solid academic cooperation in teaching and research

As part of the development of academic cooperation relations between the Euromed University of Fez and the University of Paris 1 Panthéon Sorbonne, Professor Moustapha BOUSMINA, President of the UEMF, today welcomed Ms. Christine Neau-Leduc, President of the University of Paris 1 Panthéon Sorbonne, accompanied by a delegation composed of the Vice-President in charge of International Relations, Mr. Camille SALINESI and several directors and heads of schools and institutes of the UP1PS.

After signing the letter of intent in March 2023 in Paris, the two institutions continue to work to strengthen this partnership, which has notably resulted in the proposal of a double degree in the bachelor's program in "Political and Legal Sciences" and the creation, within Euromed, of the Sorbonne Law School with its delocalized master's degree in "Business Law", awarding students a Sorbonne diploma at the same time as the UEMF master's degree.

During this meeting, Professor BOUSMINA began with a presentation of the University, recalling the importance of this fruitful cooperation between the two institutions and highlighting the important issues of this partnership with the possibility of developing this cooperation both at the level of teaching and at the level of scientific research.

Following this meeting, the University's guests took part in a guided tour of the Eco-campus and its research platforms. They also visited the Sorbonne Law School, housed at the UEMF.

Euromed University of Fez welcomes Alten and Bosch Germany

As part of the development of its cooperation relations with the socio-economic world, the Euromed University of Fez received, today, October 10, 2023, a delegation of senior officials from Alten and Bosch Germany.

On this occasion, a working session was held between the stakeholders in order to identify avenues for complementary partnerships with Alten Germany and Bosch Germany.

During this meeting, the institutions gathered discussed ways to develop their collaboration in the fields of training, scientific research and innovation in industry. During this meeting, Professor Mostapha Bousmina, President of the Euromed University of Fez, stressed the importance of this cooperation for the development of scientific research and technological innovation between the University and its socio-economic partners.

This event strengthens the existing collaboration between UEMF and Alten Maroc by diversifying the areas of partnership and exchanging expertise and technology related to projects of common interest.

Ms. Najet Vallaud Belkacem: Sustainable Development Goals 2030: So far, so close?

Decarbonization, reduction of greenhouse gas emissions, eradication of poverty, justice and peace, as well as other priorities defined by the United Nations for 2030, constitute the 17 Sustainable Development Goals designed to address the global challenges we face.

These interconnected goals are so important that it is necessary to ensure that each of them, and each of their targets, is achieved by 2030. Why are these goals a priority and what is the degree of their implications for organizations? This is the question addressed in this conference given by Ms. Najat Vallaud Belkacem. Former Minister of National Education, former Minister of Women's Rights, Urban Affairs, Youth and Sports and currently France Director of ONE, the NGO fighting extreme poverty and preventable diseases, Ms. Najat Vallaud Belkacem accepted the UEMF's invitation to give this conference led by Professor Hafsa El Bekri, lecturer-researcher at the Euromed Business School and Co-Director of the Think Tank Research Institute for European, Mediterranean, and African Studies (RIEMAS).

2024: Euromed University of Fez at the heart of action for the SDGs

Launch of the GreenTech Roadshow: A Partnership for Sustainable Innovation

Euromed University of Fez and BMCI are partnering to create an ecosystem conducive to innovation and sustainable development. This partnership reflects both institutions' commitment to supporting entrepreneurship and the ecological transition.The Euromed University of Fez (UEMF) and the Moroccan Bank for Commerce and Industry (BMCI) are proud to announce the launch of the GreenTech Roadshow, a major event dedicated to sustainable innovation and entrepreneurship. This challenge is aimed at startups with a functional minimum viable product (MVP) ready to impact two essential sectors: agritech/blue economy and low-carbon.

In a global context of growing water stress and climate emergency, the GreenTech Roadshow aims to identify and support innovative technological solutions capable of meeting these challenges.

1. Agritech / Blue Economy: This theme targets startups offering solutions to reduce water stress, essential for the sustainability of water resources.

2. Low Carbon: This theme addresses innovative solutions aimed at reducing carbon emissions, which are crucial in the fight against climate change.

Enriching Stay at UEMF: A Cultural, Sports and Recreational Immersion for Students of the Aghbalou Association

From May 29th to 31st, the Euromed University of Fez had the pleasure of welcoming around fifty students from the Aghbalou Association as part of the Fez Sacred Music Festival. During these three days, the students stayed at the UEMF university residence. A rich and varied program was offered to them, aimed at enriching their cultural and educational experience. They had the opportunity to visit the old medina of Fez, discovering the historical and cultural heritage of the city, and to attend the various performances of the festival, enjoying the musical and spiritual diversity of artists from around the world.

In addition to cultural activities, the students also explored the Euromed University of Fez during a guided tour, which was followed by sports activities in the UEMF's modern facilities. On the last day, before taking the train back to Marrakech, the students spent some time relaxing and entertaining in a Virtual Reality gaming space, offering an immersive gaming and relaxation experience. This stay, organized annually for the association's students, provides an enriching experience, combining cultural discovery, sports, and recreation.

[Interview - Le360] Mostapha Bousmina, President of UEMF: How Morocco is Becoming the Leading African Power in AI

In an interview with the web media "Le360.ma", Pr. Mostapha Bousmina, President of the Euromed University of Fez (UEMF), described how Morocco is becoming the leading African power in artificial intelligence (AI) thanks to the School of Digital Engineering and Artificial Intelligence (EIDIA).

Opened in 2019, EIDIA currently trains 700 students and will award its first degrees in June 2024. It collaborates with various components of the university, integrating cutting-edge technologies for applications in health, agriculture, industry and security, with international partnerships and multilingual training.

The President said: "Our vision was not to create a school of artificial intelligence that was isolated and disconnected from other disciplines. On the contrary, our school was designed holistically, integrating it into a multifaceted environment combining training and research-innovation, and it relies on several other structures of the University."

Euromed University of Fez Strengthens its Partnership with Pinnacle Teaching Solutions

Euromed University of Fez (UEMF) is proud to announce the extension of its partnership with Pinnacle Teaching Solutions, a leading educational provider with nearly 43 years of international expertise in 15 countries. This renewed partnership aligns with our commitment to expanding our English-language teaching, with the ambition of delivering 50% of courses in English by 2025, up from 40% currently. Marking a crucial step in UEMF's international development, this strategic commitment also further strengthens our multilingual academic environment, a central pillar of our vision. The goal is to broaden our students' horizons in terms of international mobility and professional opportunities.

In this spirit, the UEMF has created the Euromed Language Center. Under the direction of Professor Alexander Toshkov, the Euromed Language Center will play a key role in achieving our linguistic and academic goals. Also, thanks to this new agreement, a key component will be dedicated to continuing education. This initiative will allow not only students, but also professionals, to benefit from professional development programs throughout their careers.

Visit of Mrs. Carine Foeller Viallon, Consul General of France, to the Euromed University of Fez

The Euromed University of Fez (UEMF) hosted a French delegation, including Ms. Carine Foeller Viallon, Consul General of France in Fez, and Ms. Agnès Humruzian, Director of the French Institute of Morocco, to strengthen Franco-Moroccan relations in education and culture. Under the direction of Professor Mostapha Bousmina, discussions focused on:

- Organization of cultural events: Focused on philosophy and cultural exchanges.
- Strengthening language skills: Intensive programs to improve French.
- Soft skills development: Programs to improve communication, leadership and critical thinking.
- Facilitating student mobility: Partnerships with French universities, scholarships and academic exchanges.

In collaboration with the Agence Universitaire de la Francophonie (AUF) and the University of Paris 1 Panthéon-Sorbonne, this meeting aims to establish an enriching and lasting cooperation, benefiting students and the university community.

Meeting with the Swedish Ambassador to the Euromed University of Fez: Strengthening intercultural ties

On May 23, 2024, Euromed University of Fez hosted a Swedish delegation led by HE Jörgen Karlsson, Swedish Ambassador to Morocco, and HE Charlotta Sparre, Director of the Swedish Dialogue Institute for the Middle East and North Africa. The meeting, which included discussions with students, highlighted the historical collaborations between Morocco and Sweden since 1762 and their shared commitment to intercultural dialogue.

Charlotta Sparre emphasized the importance of technological development and multilateral cooperation to strengthen ties between the two countries. Doctoral students Anoire El Attari and Othman Sqalli Houssaini respectively addressed current challenges related to extremism and Morocco's role in Africa through its South-South cooperation.

The event highlighted the importance of dialogue and multiculturalism, central elements in the strategy of the University and the Swedish Institute, and encouraged students to become agents of change by actively participating in these discussions..

Visit of Swedish Ambassador HE Jörgen Karlsson to the Euromed University of Fez

Euromed University of Fez hosted HE Jörgen Karlsson, Swedish Ambassador to Morocco, to discuss potential future collaborations with the University's President, Prof. Mostapha Bousmina. The meeting focused on topics of mutual interest and explored opportunities for cooperation in areas such as climate change research, immigration, intergenerational dialogue, as well as innovation and entrepreneurship.

Sweden, with its strong diplomatic relations, seeks to strengthen contacts and cooperation with the countries of the MENA region, as evidenced by a dialogue initiative launched in 1997. The Euromed University of Fez shares values of dialogue and multiculturalism with the Swedish Dialogue Institute for the Middle East and North Africa. In 2023, the Institute conducted a participatory process on intergenerational dialogue, aligned with the University's commitment to promoting intercultural dialogue in its research and development projects.

Signing of an agreement between the Euromed University of Fez and the Moroccan Association of Occupational Health

The Moroccan Association for Occupational Health organized the 18th edition of the spring session on the theme "The sick at work and work-related illness" on May 18, 2024, in Meknes. This symposium brought together experts and professionals to discuss the need to strengthen occupational medicine and adopt new laws to protect employee health. Participants included the regional delegate of the Ministry of Health and Social Protection, the president of the Association, the regional director of the Ministry of Economic Integration, university professors, experts, and occupational physicians.

The discussions focused on important and current topics related to occupational medicine and its legal relations with employees and employers. A key moment of the event was the signing of a partnership agreement between the Moroccan Association of Occupational Health and the Euromed University of Fez. This six-year agreement aims to exchange expertise and knowledge in the fields of training and scientific research, as well as to carry out joint projects to improve the health and safety of workers in Morocco.

Academic and Scientific Cooperation Agreement between the University of Bangui and UEMF

As part of an academic and scientific collaboration between the Central African Republic and Morocco, the University of Bangui (UB) and the Euromed University of Fez (UEMF) signed a Cooperation Agreement on Thursday, May 16, 2024 at the Eco-campus.

This agreement aims to establish cultural, scientific and educational relations in areas of mutual interest. The main areas of this collaboration include the exchange of researchers, professors, administrative staff and students, the implementation of joint research projects, the sharing of information and teaching materials, the formation of research teams, participation in international projects, co-supervision of theses and dissertations, as well as the joint organization of scientific seminars and conferences.

Both universities are committed to finding the necessary means to achieve these objectives, in compliance with the legal provisions of their respective countries. This agreement marks the beginning of a promising cooperation, intended to be expanded through specific agreements detailing responsibilities and expected results.

Elite legal training in Restructuring unrivaled in Africa at UEMF

The Euromed University of Fez and the Sorbonne Law School are organizing the "Restructuring Days" in Fez on May 16 and 17, 2024. This conference, unique in Africa, will bring together more than 250 business leaders, lawyers, judges, and restructuring law experts from France, Morocco, and Sub-Saharan Africa. Professor François-Xavier Lucas and other experts will discuss topics such as the declaration and verification of claims, new developments in bankruptcy law, and developments in security and prevention law.

These days aim to strengthen the partnership between the Euromed University of Fez and the Sorbonne Law School, which offer a dual Master's degree in Business Law. The program is demanding and selective, bringing together students from France, Morocco, and Sub-Saharan Africa. The teaching is dynamic and interactive, including team projects, real-life case studies, and a mandatory internship in a law firm or company. This allows students to acquire practical skills and immerse themselves in the professional world of business law.

Second Semi-final of the Greentech Roadshow Challenge at UEMF: A Crucial Step towards Green Innovation in Morocco

The second semi-final of the Greentech Roadshow Challenge was held on July 10, 2024, in Fez, in partnership with BMCI Groupe BNP Paribas, the Euromed University of Fez (UEMF), and the CRI of Fez-Meknes. This event brought together stakeholders from the regional entrepreneurial ecosystem to evaluate innovative startups in green technologies.

The competition highlighted projects related to low-carbon, agritech and the blue economy, providing entrepreneurs with a platform to present their solutions to a jury of experts and investors.

As part of a process of supporting sustainable innovation, this initiative aims to support the ecological transition and strengthen green entrepreneurship in Morocco.

After this stage in Fez, the competition will continue in Casablanca and Tangier, allowing the most promising projects to be showcased on a national scale.

Partnership between the Euromed University of Fez and the Paris School of Technology and

The Euromed Business School (EBS) of the Euromed University of Fez signed a strategic partnership with the Paris School of Technology and Business (PST&B), a member of the Galileo Global Education network, a leader in higher education in Europe, on May 6. This partnership will allow EBS students to obtain a double degree in the field of Digital Marketing and Data Analytics.
As part of this partnership, EBS students will have the opportunity to complete the first year of the Master's program at UEMF's Euromed Business School and the second year at PST&B in Paris, France. This unique program offers a rich international experience, combining the pedagogical expertise of these two institutions in different cultural and professional environments.
This partnership strengthens the university's efforts in cooperation with international institutions, offering graduates increased recognition in the job market, both nationally and internationally.

World Oral Health Day celebrated at UEMF

On the occasion of World Oral Health Day, the Euromed University of Fez organized, in partnership with the Moroccan Association for Oral Health Prevention (AMPBD), a study day for the benefit of students of the Euromed Faculty of Dental Medicine and dental health professionals, on Friday, March 15, at the University's Eco-campus.

The event highlighted the importance of oral hygiene practices to prevent oral diseases such as cavities, periodontal disease and tooth loss through lectures and interventions by experts, including Dr. Charafa BENNIS and Dr. Frabcesco GARINO. This day was also marked by the screening of a short film produced by students of the Euromed Faculty of Dental Medicine.

World Oral Health Day also provided an opportunity for dental professionals and health organizations present at the event to promote awareness campaigns, offer screening services, and provide information on dental care.

Participation of Professor Mostapha Bousmina at the International Conference in Rome: training and social cohesion

On March 13, 2024, an event entitled "Higher Education and Social Cohesion for Managing International Demographic Dynamics" was organized in Rome, at the Sistine Chapel, by Multiversity, Pegaso Digital University, and MEDEA. The event brought together influential figures, including Italian President Sergio Mattarella, Maltese President Marie-Louise Coleiro-Preca, and European Commission Vice-President DubravkaŜuica.

Professor Mostapha Bousmina, President of the Euromed University of Fez (UEMF), participated to highlight the importance of cooperation between Europe and Africa in education and vocational training. Luciano Violante, President of Multiversity, emphasized the role of digital universities in promoting skills, social inclusion, and sustainability. Emphasis was placed on the importance of digital training in preparing young African generations to contribute to socio-economic development.

This commitment reflects UEMF's priorities, focused on inclusion, innovation and digital technology, to strengthen training and research.

UEMF and AFD launch the “Tech4Farmers” program

Launch of the Tech4Farmers call for applications, a support program specially designed for project leaders in the innovative agricultural technologies (AgriTech) sector.

During a launch conference that brought together key players in the agricultural sector of the Fez-Meknes region this Thursday, March 7, at the Euromed University of Fez (UEMF), the University and the French Development Agency (AFD) officially launched the Tech4Farmers program, whose objective is to support the development and marketing of AgriTech solutions that meet the needs of national agriculture and that of the Fez-Meknes region, in particular.

The Tech4Farmers program is part of an ambitious project to build a Regional Hub for Innovation and Entrepreneurship in Agriculture and Agri-Food in the Fez-Meknes region. This project is led by UEMF and AFD in partnership with the Ministry of Agriculture, Maritime Fisheries, Rural Development, and Water and Forests, the Digital Agriculture Hub, and a consortium of partners including government agencies, sectoral federations, universities, and research centers.

UEMF celebrates International Mountain Day differently

On March 1, 2024, the Euromed University of Fez organized an international conference entitled "Restoring mountain ecosystems: the case of the Fez-Meknes region," in collaboration with several partners, including the Institute of Legal and Political Sciences (ISJP) and the African Network for Sustainable Development (RA2D). The event, organized in conjunction with International Mountain Day, addressed the challenges of restoring mountain ecosystems, in line with the initiative of the United Nations Decade on Ecosystem Restoration (2021-2030).

Over two days, the conference brought together experts, researchers, and field stakeholders to discuss ecological issues and sustainable development in the mountains through panels focused on the social, economic, and political challenges of this theme. The second day took place in the municipality of Tazouta, with practical activities such as hiking, awareness-raising workshops, and local product exhibitions. This edition highlighted the importance of preserving mountain ecosystems while involving local populations and strengthening the solidarity economy.

Visit of a European Union delegation to Morocco at the UEMF

On March 6, 2024, a European Union delegation, composed of Mr. Daniele Dotto, Ms. Lise Paté, and Mr. Rosenheim Adam, visited the Euromed University of Fez (UEMF) as part of the Euro-Mediterranean Partnership. They discussed democracy and the future of European democratic construction with students from the Euromed Institute of Legal and Political Sciences. Mr. Dotto emphasized the EU's commitment to supporting civil societies in transition countries and promoting citizen inclusion in political dialogue.

At the same time, Ms. Paté discussed ongoing collaboration projects between the EU and UEMF with the University's President, Professor Mostapha Bousmina. The visit concluded with a guided tour of the Eco-campus and research infrastructure.

Euromed Career Day: UEMF strengthens its links with the socio-economic world

On February 28, 2024, Euromed University of Fez hosted the second edition of Euromed Career Day at its Eco-campus, bringing together a wide range of companies and human resources professionals. This event aims to facilitate the professional integration of students and graduates by opening doors to the job market. Participating companies included Webhelp, Attijariwafa Bank, Bank of Africa, Safran Aerosystems, and Huawei.

The forum began with a roundtable discussion on the theme of artificial intelligence and its impact on employees in Africa, featuring experts from various sectors. The event also allowed students to interact with recruiters, attend workshops on soft and power skills, and participate in individual interviews. Students from various backgrounds, such as health, artificial intelligence, architecture, and the humanities, had access to coaching programs and professional opportunities. This edition was a great success thanks to the diversity of its activities and the constructive exchanges between recruiters and students.

Visit of a delegation from Pinnacle Teaching Solutions and conference on leadership lessons

On February 22, Euromed University of Fez hosted a delegation from Pinnacle Teaching Solutions, including Dr. Phil Goertzen, Pinnacle Academic Director; Mr. Collin Quigley, Pinnacle Director; and Katie Haynes, Head of Short-Term Academic Programs in Morocco. The team presented the new Pinnacle project, which focuses on online learning. Pinnacle Teaching Solutions is a professional teaching organization committed to excellence in education, collaborating with universities since 1981.

Following this working meeting, Dr. Phil Goertzen gave a lecture entitled "Leadership Lessons Learned: Thoughts on Getting Things Done and Working Across Cultures." The lecture was attended by students from the Euromed Business School (EBS) and the Institute of Legal and Political Sciences (ISJP) of the UEMF, who attended with great interest.

Drawing on his extensive experience working and collaborating with national and international institutions, the speaker shared with the students a set of tools for analyzing knowledge, navigating cultural differences and adapting negotiation styles in different contexts.

The delegation's visit ended with a classroom observation and a meeting with the training teachers of the UEMF Language Center.

Third steering committee meeting of the Regional Agritech Innovation and Entrepreneurship Hub

On February 21, 2024, the Euromed University of Fez hosted the third steering committee of the "Regional Hub for Innovation and Entrepreneurship in Agritech" project, as part of the "Tamkin Li Tanmia" program, funded by the French Development Agency (AFD). This event brought together various partners, including the AFD, the Digital Agriculture Hub, the IAV Institute, and other regional stakeholders, to take stock of the progress of the Agritech project.

The meeting provided an opportunity to share perspectives on progress made and discuss next steps, followed by the signing of a partnership agreement. The support program for innovative projects was presented, and an inaugural conference of the call for projects is planned for March 7, 2024, at the UEMF, focusing on agricultural issues in the Fez-Meknes region.

This event strengthened collaboration and innovation in the AgriTech sector, contributing to the creation of a strong ecosystem for agricultural entrepreneurship in Morocco.

UEMF students make the voices of young Africans and Euro-Mediterraneans heard before the Parliamentary Assembly of the Union for the Mediterranean

On February 14, 2024, students from the Euromed University of Fez organized a summit under the theme "Euro-Mediterranean and Transatlantic Openness" with more than 200 participants from 30 countries. This summit addressed topics such as energy ethics, sustainable development, transportation, climate change, and African challenges.

The summit culminated in the Call for Investment in the Future, read out on February 16 at the 8th Summit of Speakers of Parliaments of the Union for the Mediterranean. This call underscores the need to strengthen cooperation between Europe and Africa through concrete projects, allocate pledged funds for climate resilience, and support initiatives such as the Nigeria-Morocco gas pipeline.

The students also welcomed Morocco's initiatives for economic integration, infrastructure, and education in Africa, while calling for a "Marshall Plan" for education and research in Africa as an investment in the future to combat poverty, terrorism, and illegal immigration.

UEMF hosts international science dissemination project on antimicrobial resistance and the fight against superbugs

The Micromonde project, developed in 17 countries, aims to bring scientific culture and biomedical research closer to students while promoting a vocation for research. The first edition concluded on the campus of the Euromed University of Fez (UEMF), with the participation of more than 100 students in pharmacy, biomedical engineering, and biotechnology. Supervised by professors from UEMF and the University of Valencia, they conducted experiments to discover new bacterial strains that produce antibiotics.

The project uses a project-based learning (PBL) method to encourage critical thinking and problem-solving. This program is part of international initiatives, such as the Small World Initiative, launched at Yale in 2012 to address the need for new antibiotics in the face of bacterial resistance. The project is supported by various consortia, with international funding and cooperation, and is being rolled out for the first time in Morocco under the UEMF-MicroMondeMaroc initiative.

FRANCO-GERMAN VISIT: Opportunities for partnership and cooperation between Europe, Morocco and Africa

On January 30, 2024, the Euromed University of Fez welcomed the Ambassadors of France and Germany to Morocco, Mr. Christophe Lecourtier and Mr. Robert Dölger. After a presentation by the President of the UEMF, Prof. Mostapha Bousmina, on the University's missions in terms of intercultural dialogue and cooperation between the two shores of the Mediterranean, the guests visited the Eco-Campus and its technological facilities.

The ambassadors then shared their views on European foreign policy towards Morocco, addressing political, economic, and security aspects. They also discussed Europe's role as a reliable partner for Africa. This event provided an opportunity for students and lecturers to discuss ways to strengthen cooperation between Morocco, France, and Germany to promote peace and security in the region.

Euromed Innovation Center: UEMF inaugurates its new innovation center (EIC)

The Euromed University of Fez has announced the creation of the Euromed Innovation Center (EIC), a support structure dedicated to the creators of innovative projects. The selection committee evaluates projects based on their scientific and innovative nature, as well as the technical, entrepreneurial, and managerial skills of the project leaders.

The EIC aims to provide personalized support throughout the business creation process, including inspiring events, diverse training, and privileged access to university resources. This center positions itself as a catalyst for innovation, both regionally and nationally, contributing to the importance of universities in the technological and entrepreneurial landscape.

Labeled by "Tamwilcom" among the four SAP structures at the national level in the "Ideation" segment, the EIC allows project leaders to access programs such as "Tech Start" and "Tech Boost", thus reinforcing the center's commitment to transforming innovative ideas into successful startups.

UEMF is helping to shape the digital and sustainable future of the Fez-Meknes region

The Euromed Institute of Legal and Political Sciences (IESJP) participated in the kick-off meeting of the Smart Sustainable City project in Ifrane on January 12, 2024, thus showing its support for the inclusive digital transition of the Fez-Meknes region.

This is a Belgian-Moroccan project carried out in partnership with the Belgian universities UC Louvain and UNamur, as well as the consortium of four universities in the Fez-Meknes region, including the Euromed University of Fez.

This Belgian-Moroccan project embodies the university's vision of a smart and sustainable urban future. It aims to achieve two primary objectives: the region's inclusive digital transition and the emergence of new forms of governance and citizen participation.

International Conference: Prof. Hasna SLAMTI represents UEMF at the Côte d'Azur University in Nice

In its new edition, under the trajectory of the meetings of African Studies in France, the University of Nice-Côte d'Azur organized on its Jean d'Angely campus, from 1er on July 4, an international conference under the themeeme: A race for ports in Africa? Actors, territories and strategies.

During this 8th edition of the African Studies Meetings in France, Professor Slamti gave a presentation entitled: "Territorial issues facing the challenges of connectivity in Africa: the case of the port of Tangier Med" during her participation in panel 37 entitled "A race for ports in Africa? Actors, territories and strategies".

This communication also aimed to shed light on the logistical and geopolitical importance of the Tangier Med port. It also attempted to demonstrate that this port is not only a global logistics and maritime hub, but also a key driver of economic and territorial development.

Signing of the financing agreement for the "Factory Pilot School 4.0" project co-financed by the KFW subsidiary, the Investment Facility for Employment (IFE)

On July 2, 2024, the EuroMed University of Fez (UEMF) and the Investment Facility for Employment (IFE) signed a financing agreement for the Pilot School Factory 4.0. This project, co-financed by the IFE (37.58 million DH, or 3.51 M€) and l'UEMF (own contribution of 30%), mobilizes a total investment of 53.2 million DH (4.97 M€) to build a training centeredie hasIndustry 4.0.

This center, which is expected to open in September 2026, will train 585 graduates and strengthen the skills of more than 1,100 professionals in its first three years of operation, creating 541 new jobs. It is part of the national digital transformation strategy and aims to support Morocco's industrial growth, particularly in the Fez-Meknes region, by offering specialized training for young graduates and professionals.

This signature marks the beginning of several similar projects financed by the IFE, in partnership with Moroccan institutional and industrial players, as part of the development of training infrastructures for the industry of tomorrow.

PNDL Pilot Cohort at the Euromed University of Fez: Towards a New Era of Higher Education Governance

Launch of the pilot cohort of the National Leadership Development Program (PNDL) at the Euromed University of Fez, a key player in the implementation of the Erasmus+ CBHE project "Moroccan Higher Education Leadership – MORHEL. This is an ambitious project, coordinated by AUI, UEMF and UMI, aimed at strengthening the capacities of leaders of Moroccan higher education institutions (IES) in governance, strategic planning and management.

Following the opening remarks by Prof. Salim Bounou, Vice-President in charge of Research-Innovation and Partnerships, a series of training sessions led by professors from UM6P and IAV provided participants with a detailed analysis of the current landscape of higher education in Morocco, aimed at equipping future leaders with an in-depth knowledge of the challenges and opportunities present.

The cohort, composed of professors, administrative staff, and key figures in higher education, aims to develop leadership skills to effectively contribute to the development of higher education in Morocco. The initiative aims to train leaders capable of implementing significant improvements in their institutions, particularly in governance, strategic planning, and management.

Cooperation and Strategic Alliance between UEMF and EMUNI

As part of their commitment to the objectives of the Euro-Mediterranean Partnership, the Euromed University of Fez (UEMF) and the Euro-Mediterranean University (EMUNI) agree to enter into a strategic alliance to promote the flow of knowledge between the shores of the Mediterranean and to cooperate within the framework of this agreement. They will encourage long-term mutual cooperation in the fields of higher education, research, and innovation in order to consolidate the Barcelona Process, which, in a broader sense, is also integrated into the Union for the Mediterranean.

The Parties will promote the dissemination of knowledge through joint educational, cultural, and scientific activities. To this end, they will use instruments such as joint applications for and implementation of international scientific and technical projects, the development and implementation of joint or dual study programs, and the exchange of students and academic and administrative staff. Other initiatives will include the exchange of expert and research missions, the development of modules in Euro-Mediterranean studies, and the launch of strategic courses. They will also engage in science diplomacy, the expansion of joint academic offerings, the organization of scientific events, and the joint use of educational and scientific resources, as well as any other cooperative activities agreed upon by the Parties.

Third Entrepreneurship Training Workshop of the Link Up Africa Program at UEMF

On July 17 and 18, 2024, the Euromed Innovation Center (EIC), an innovation center at the Euromed University of Fez, hosted its third entrepreneurship training workshop as part of the Link Up Africa pre-incubation program. Funded by the European Union and implemented by AMCI and the Belgian agency Enabel, this event aims to support project leaders in creating their businesses, whether in Morocco or in their native country for students and graduates from sub-Saharan African countries.

At the heart of this training, participants explored value creation and structuring their business model. They also honed their pitching skills, essential for capturing investors' attention. The intensive sessions, led by EIC experts and mentors, enabled budding entrepreneurs to refine their value proposition, develop their presentation skills, and build a solid business model.

This workshop offered a unique opportunity for students and winners to prepare their projects for pitch sessions in front of a panel of experts. The best projects will be selected to join the pre-incubation program, an invaluable opportunity for young entrepreneurs to turn their ideas into reality.

UEMF at the World Power-to-X Summit: Green Hydrogen and Innovation

Professors Tijani Bounahmidi and Othmane Benmoussa represented the Euromed University of Fez (UEMF) at the World Power-to-X Summit in Marrakech. The UEMF-HACE Side Event, held on October 9, brought together experts, decision-makers, and industry leaders to discuss green hydrogen technologies, highlighting innovations and value chain optimization in this booming sector.

Participants, including members of the HVM (Hydrogen Green Marine) Consortium, discussed global trends in green hydrogen and its benefits, sharing their expertise on sustainable solutions for carbon-free energy production. The presence of UEMF professors allowed them to showcase their expertise in sustainable development and establish promising partnerships during the B2B meetings. These collaborations aim to develop technological solutions to make green hydrogen accessible and efficient.

International Conference in Fez: Health of Refugees and Migrants

On October 29-30, 2024, Euromed University of Fez hosted an international conference dedicated to the health of refugee and migrant populations, organized in partnership with IOM, WHO, and UNHCR. This event brought together more than 150 participants representing ministries of health, researchers, academics, and civil society actors from various countries. The conference addressed the health challenges facing migrants and refugees and shared best practices from the MENA region.

Professor Chakib Nejjari, Vice-President of UEMF, highlighted the university's commitment to ensuring equitable access to healthcare, particularly for vulnerable populations. The WHO representative in Morocco, Ms. Maryam Bigdeli, reiterated that universal health coverage is essential to eliminate barriers to care and promote equity. Recommendations were made to improve access to healthcare for migrants, including the digitalization of medical records and South-South cooperation.

Funded by the Finnish Ministry of Foreign Affairs, this initiative aims to strengthen health policies for migrants in the region and promote coordinated action between countries of origin, transit and destination.

Welcome to the School of Critical Thinking at UEMF

As part of its collaboration with the Agence Universitaire de la Francophonie (AUF) for the holding of the "RDV de la Philosophie", the Euromed University of Fez is honored to host the School of Critical Thinking, a program dedicated to Moroccan doctoral students or those residing in Morocco. This academic meeting will take place from Monday, November 11 to Thursday, November 14, 2024, and will bring together selected participants to strengthen their skills in analysis and critical thinking.

We warmly thank all the registered doctoral students who will be our guests throughout this period and welcome them to the UEMF.

At the same time, the "Night of Philosophy," organized by the French Institute, will be held on Wednesday, November 13, from 7 p.m. to 11 p.m. at the Palais des Congrès. This cultural event is open to the entire UEMF community, offering a unique opportunity to discuss philosophical questions in a friendly atmosphere.

Promising Visit: Strengthening Moroccan-German Academic Partnerships

The Euromed University of Fez had the honor of welcoming His Excellency Mr. Robert Dölger, Ambassador of the Federal Republic of Germany to Morocco, accompanied by an official delegation, as well as representatives of the German Goethe Cultural Center.

This meeting, rich in exchanges, provided an opportunity to discuss opportunities for collaboration between Germany and the Euromed University of Fez. Discussions focused on strengthening academic mobility for students and teachers, with the aim of creating bridges to renowned German institutions.

Furthermore, this visit was an opportunity to explore new avenues of collaboration, particularly in the field of foreign language learning. After the partnership established with the University of Oxford for the preparation and delivery of the TOEFL following the learning of English, the Euromed University of Fez is now moving towards a strategic partnership with the Goethe-Institut. This partnership will allow students to learn the German language, enriched by internationally recognized certifications.

This is an important step in building a lasting partnership between UEMF and German stakeholders, fully in line with the Euro-Mediterranean mission of our university.

Euromed University Meetings: Dialogue for a united and plural future

Under the High Patronage of His Majesty King Mohammed VI, the Euromed University of Fez (UEMF) organized the Meetings on the Alliance of Civilizations on December 6 and 7, in partnership with the United Nations. This event brought together international figures around the theme "Rebuilding Trust for a United and Plural World," promoting the principles of tolerance and cultural coexistence dear to Morocco.

Highlights included the inauguration of the Alliance of Civilizations Chair, the presentation of the 2024 Mediterranean Prizes, and an ecumenical concert paying tribute to the three monotheistic religions.

Over two days, rich discussions took place between experts, political leaders and academics such as Miguel Angel Moratinos, André Azoulay, Faouzi Lakjaa, Younès Sekkouri and Mouâd Jamaï, on topics such as preventive diplomacy, migration, artificial intelligence and transparency in international relations.

Through this initiative, the UEMF reaffirms its commitment to intercultural dialogue and peace, and positions itself as a key player in building a more inclusive and harmonious world.

UEMF at the heart of discussions on renewable energies at EnerGaïa

The Euromed University of Fez participated, as part of the Moroccan delegation led by the Green H2 Cluster, in the renewable energy forum.EnerGaïafrom December 10 to 12, 2024.

Several contacts have been made, in particular with the Vice-Presidency for the Economy of the Occitanie Region for partnerships in terms of training with universities and institutes in the Region, incubation and cultural and sporting activities with the ambition of initiating lines of research in these fields alongside the creation of courses in sports and team management.

Green hydrogen and the entire inherent value chain were also at the center of discussions with France Hydrogène, as were the theme of water and the underlying technologies, in addition to the Agritech or precision agriculture sector.

The participation of the Euromed University of Fez in the Technocampus Hydrogène Occitanie, which aims to be the largest center in France for research, testing, technological innovation and teaching in the field of green mobility, was also discussed.

Euromed University of Fez joins the prestigious AACSB network

Euromed University of Fez (UEMF) is now a member of the Association to Advance Collegiate Schools of Business (AACSB), a leading international organization dedicated to excellence in management education. This membership places UEMF alongside the world's most influential institutions in this field, strengthening its international reach.

Recognized for its demanding standards and its major role in improving the quality of management education, the AACSB brings together a vast network of universities and schools that are pioneers in innovation and research. UEMF's integration into this network demonstrates its commitment to providing training that meets the highest standards of excellence.

This milestone once again underlines UEMF's position as a key player in the international academic landscape.

Excelia, a prestigious French higher education group, hosted at the Euromed University of Fez

As part of the partnership established between the Euromed University of Fez (UEMF) and Excelia, a prestigious French higher education group, which includes a triple-accredited AACSB, EQUIS, AMBA Business School, a TEDQUAL-accredited Tourism School, and a Communication School, we had the pleasure of welcoming our partner for a session specially organized for the benefit of our students at the Euromed Business School (EBS).

This exchange is part of an academic cooperation approach aimed at strengthening the international prospects of our students. During this visit, the Excelia representative presented in detail the opportunities offered by the dual degree program between the two institutions.

This new partnership allows EBS students, at the end of their five years of post-baccalaureate studies, to obtain:

- Diploma from the Grande École Program in Management issued by UEMF;
- Equivalent diploma from Excelia.

This program provides a springboard for our students, allowing them to benefit from dual academic expertise and develop world-class skills in a multicultural environment.

Graduation Ceremony of the IESJP and Paris 1 Panthéon-Sorbonne

The Euromed Institute of Legal and Political Sciences (IESJP) celebrated academic excellence at the graduation ceremony for the 2023-2024 undergraduate class, held on December 18, 2024.

This prestigious event is part of the strategic partnership and dual degree agreement between the Euromed University of Fez (UEMF) and the University of Paris 1 Panthéon-Sorbonne. This exceptional collaboration, which symbolizes the synergy between two renowned institutions, demonstrates the commitment of both institutions to providing their students with excellent training that meets international standards.

The laureates, who have completed rigorous and enriching academic programs, embody the success and talent of this academic alliance. Through this ceremony, the UEMF, through its Institute, reaffirms its mission to prepare a legal and political elite capable of meeting global challenges.

Warmest congratulations to our dear winners for this well-deserved achievement, the fruit of their perseverance and efforts. We wish them a bright future and a successful career. Has a context menu

Moroccan Parliament: Professor Mostapha Bousmina presents Morocco's strategy for energy transition and sustainable development

The Moroccan Parliament, in collaboration with the Fondation des Rencontres du Futur, the Chamber of Deputies and the Senate of the Republic of Chile, hosted the "Congress of the Future" on December 17 and 18, 2024 at the Parliament headquarters in Rabat.

This event brought together several Moroccan and Chilean ministers and parliamentarians. It provided an opportunity to discuss future issues. On this occasion, the President of the Euromed University of Fez, Professor Mostapha Bousmina, presented Morocco's strategy for energy transition and sustainable development, highlighting the country's commitment to these crucial areas.

He also presented the Moroccan renewable energy plan, the production of green hydrogen and its applications, including ammonia production, seawater desalination, battery and electric vehicle production, as well as the Nigeria-Morocco gas pipeline project. The focus was on the achievements, challenges, and areas of concern, while emphasizing technological and research-innovation challenges in these different areas.

Study in Canada: A gateway to academic excellence with UEMF

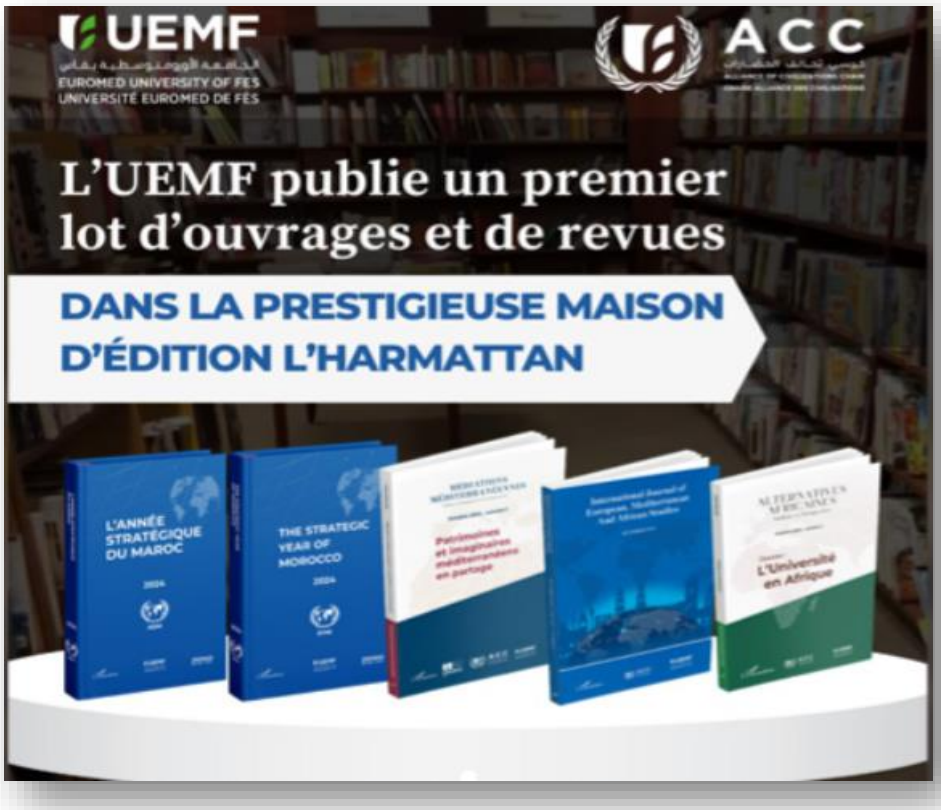

As part of its commitment to promoting international mobility for its students, the Euromed University of Fez facilitates access to prestigious initiatives such as the Scholarships for Study in Canada. This program, under the auspices of Global Affairs Canada, aims to offer short-term academic exchanges to master's and doctoral students.

These scholarships not only enable students to pursue studies or conduct research in Canada, but also strengthen international collaborations in the fields of education and research. They contribute to enriching Canada's bilateral relations with its partners and promoting academic excellence worldwide.

UEMF remains a link between its students and these international opportunities, helping them become competitive players on the global stage.

UEMF Strengthens Its Academic Visibility with New Publications

The Euromed University of Fez (UEMF) announces the publication of a first set of scientific books and journals, under the direction of Professor Mostapha Bousmina, President of the UEMF, and Professor Abdelhak Azzouzi, President of the Alliance of Civilizations Chair. These works are published by the prestigious Paris-based L'Harmattan publishing house.

Among the flagship titles are L'Année Stratégique du Maroc, Strategic Year of Morocco, Médiations Méditerranéennes, Alternatives Africaines, as well as the International Journal of European, Mediterranean and African Studies. More than a hundred authors, including academics, ministers, researchers, and renowned experts, have contributed to these publications, demonstrating academic collaboration on a national and international scale.

These publications mark a significant milestone for the UEMF, strengthening its role as a pillar of scientific research in Morocco, Africa, and the Mediterranean region. Through this editorial output and its growing contributions to leading indexed journals, the UEMF highlights strategic themes that define its scientific identity while addressing major contemporary challenges.

Enriching regional scientific resources, this initiative embodies a vision focused on sustainable development based on the knowledge economy, contributing to academic influence and the growth of Moroccan, African and Mediterranean societies.

New Academic Collaboration between the Euromed University of Fez and the University of Surrey

Euromed University of Fez (UEMF) is proud to announce its partnership with the University of Surrey, a prestigious institution in the United Kingdom, recognized for its academic excellence and innovative programs.

This strategic partnership opens up new opportunities for UEMF students, particularly in the field of Civil Engineering. Thanks to this agreement, students who have completed their Civil Engineering studies at UEMF can now access world-renowned programs, such as the MSc and BEng in Civil Engineering at the University of Surrey.

With this partnership, UEMF reaffirms its commitment to offering its students academic and professional opportunities of international stature. This collaboration not only strengthens student mobility, but also promotes excellence and innovation in training and research.

Launch of Fez Smart Factory activities at UEMF

On January 16, 2025, the Euromed University of Fez (UEMF) launched the Fez Smart Factory, the first Moroccan ecosystem dedicated to Industry 4.0. This ambitious project, supported by a broad public-private and international partnership, aims to transform Moroccan industry by integrating advanced technologies such as artificial intelligence, robotics, and 3D printing.

Located on 6.6 hectares within the UEMF eco-campus, the platform includes an incubator, an R&D center, a business center, and a Pilot School Factory 4.0, currently under construction, which will offer nearly one million hours of training. This project, funded in particular by FONZID and the MCC, embodies a new industrial dynamic based on innovation, training, cooperation, and sustainability.

The French Institute of Fez and the Euromed University of Fez strengthen their partnership

The Euromed University of Fez (UEMF) welcomed Ms. Carine Foeller Viallon, Consul General of France in Fez, to formalize the renewal of the partnership agreement with the French Institute of Fez. This agreement aims to strengthen language teaching with certification through the UEMF language center, in line with academic and professional needs.

The collaboration also includes joint cultural programming for the university community and the general public. With its modern infrastructure, such as a 2,000-seat agora and cultural spaces under construction (theatre and cinema), the UEMF is positioning itself as a major player in educational and cultural cooperation. This partnership illustrates the shared commitment to intercultural dialogue and the influence of Franco-Moroccan cooperation.

Visit of a delegation from the University of Quebec in Trois-Rivières (UQTR)

The Euromed University of Fez (UEMF) was pleased to welcome a delegation from the University of Quebec in Trois-Rivières (UQTR), led by its Vice-Rector for Research and Development. This meeting strengthened scientific ties between the two institutions and laid the foundations for a promising collaboration in the field of impactful and engaging scientific research.

During this visit, researchers and professors from UEMF and UQTR discussed advances and opportunities for cooperation in the following areas: medicinal chemistry, materials chemistry, management, artificial intelligence, nursing sciences, electrical engineering, renewable energies and green hydrogen.

This meeting provided an opportunity to explore new perspectives for cooperation, with a shared ambition to provide concrete solutions to current challenges through research and education. UEMF welcomes this collaborative dynamic and is committed to continuing to develop this strategic partnership with UQTR.

MLUMSE Project Kick-Off Meeting in Cairo: A Collaboration for the Modernization of Urban Management in the Mediterranean

The Euromed University of Fez (UEMF) participated in the launch meetings of the MLUMSE project (Modernization of Land and Urban Management Education in the Southern Mediterranean), in Cairo in February 2025, represented by Professor Wafae Belarbi, Director of the Euromed School of Architecture, Design and Urban Planning (EMADU). This project brings together several universities in the Mediterranean region, including UEMF.

UEMF stands out for its commitment to digital technologies and artificial intelligence through its EIDIA school, with the ambition of becoming a regional innovation center. The university's teams work on themes such as urban resilience, smart cities, and landscape planning. The university also focuses on modernizing its curriculum and strengthening its human and technological capacities, with the aim of contributing to the development of smart and sustainable cities.

This project underlines UEMF's ambition to become a center of excellence in urban management, sustainable development and digital technologies, by strengthening its international partnerships to meet contemporary challenges.

Nobel Laureates Gather at UEMF: Discussing Advances in Quantum Physics and Laser Technologies

On February 27, 2025, the Euromed University of Fez (UEMF) hosted a high-level scientific roundtable, bringing together world experts in quantum physics and laser technologies. Speakers included Nobel laureates Alain Aspect and Serge Haroche, as well as Eugene Polzik of the Niels Bohr Institute. The event addressed topics such as quantum entanglement, quantum simulations, and the applications of lasers in fields such as quantum computing and secure communications.

This meeting highlighted recent advances in quantum and optical physics, while exploring the challenges of bringing these innovations to fruition. It reinforced UEMF's role as a key player in international scientific research, providing a platform for dialogue between researchers and experts. The event generated great interest among the students, researchers, and professionals in attendance, creating opportunities for future collaboration.

Strengthening academic ties between Morocco and Madagascar: Visit of HE Mr. Johary Hoela Rajobson to the UEMF

The Euromed University of Fez (UEMF) had the honor of welcoming HE Mr. Johary Hoela Rajobson, Madagascar's first ambassador to Rabat, accompanied by his wife. Welcomed by the University's President, Prof. Mostapha Bousmina, this visit symbolizes the long-standing fraternal relations between Morocco and Madagascar.

This meeting also highlighted the shared commitment of both countries to promote cooperation in the fields of higher education, research, and innovation. The presence of Malagasy students within the UEMF already demonstrates this dynamic and strengthens intercultural and academic exchanges between the two nations.

As part of this partnership, UEMF donated two 3D printing machines to the University of Madagascar, marking a new milestone in scientific and technological collaboration. This symbolic gesture embodies the two institutions' commitment to leveraging innovation to meet the challenges of tomorrow.

This visit, marked by fraternity and shared vision, opens the way to a promising future for academic and diplomatic relations between Morocco and Madagascar.

Morocco200: a milestone at the Euromed University of Fez

The Euromed University of Fez had the pleasure of hosting “Morocco200” on February 26, 2025, a major initiative led by the Ministry of Digital Transition and Administrative Reform, GITEX AFRICA, KAOUN International and the Digital Development Agency (ADD).

This ambitious operation highlighted the potential of Moroccan startups through a national roadshow, stopping in Casablanca, Tangier, Agadir and Fez, with the aim of inviting young entrepreneurs to take part in Africa's largest tech event, GITEX AFRICA.

UEMF thanks Mr. Chakib Achour, Country Chief Representative of GITEX Africa in Morocco, as well as all the partners who contributed to the success of this initiative. A special tribute is paid to POGO, a startup born within UEMF, and to ARWA Solutions, who shared their experience and commitment by participating in the 2024 edition of GITEX.

With innovation at the heart of UEMF's mission, the university remains committed to supporting the startup ecosystem and guiding Moroccan talent towards excellence and technological entrepreneurship.

Sports activity: ENAM Olympics

The Olympics, organized by the National School of Agriculture of Meknes, took place from April 18th to 20th and brought together male participants in the disciplines of football and basketball. Among the institutions present were ENAM Meknes, ENCG Fez, ENCG Oujda, the Institute of Sports, the Faculty of Medicine Fez, Euromed Fez, and the Institute of Health Professions Fez. A total of three basketball matches and three football matches were played. The results allowed Euromed Fez to secure first place in basketball and second place in basketball, under the supervision of Mohammed Yakhlef and Jouad Kamal.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Sports activity: Inter-University Throne Cup

On February 27, 2025, the Euromed University of Fes men's basketball team participated in the second round of the Inter-University Cities Throne Cup, organized by the Royal Moroccan University Sports Federation in Casablanca. Facing the Private University City of Marrakech, the team of four players left Fez at 7:40 a.m., played the match at 1:30 p.m., and returned at 9:00 p.m., winning the match with a score of 15 to 12. A technical reservation was filed regarding the participation of an opposing player who did not reside at the university city of Marrakech. The team was coached by Mohamed Yakhlef and Jaouad Kamal.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Sports activity: Friendly volleyball match

On February 20, 2025, the Euromed University of Fes organized a friendly men's indoor volleyball match in the sports hall of the campus's sports complex. This event, bringing together 10 participants and supervised by Jaouad Kamal and Mohammed Yakhlef, took place from 6:00 p.m. to 9:00 p.m. and included 5 sets.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

UEMF participation in the University Basketball Championship

On February 12, 2024, the men's and women's basketball teams of the Euromed University of Fez (UEMF) participated in the university championship organized by the Royal Moroccan University Sports Federation (FRMSU). This match took place at the sports hall of the International University of Rabat. UEMF faced Mohammed V University of Rabat, with a total of 18 participants, supervised by Mohammed Yakhlef and Jaouad Kamal. Two matches were played during the day, marked by a departure at 8:30 a.m. and a return at 8:00 p.m. Despite strong involvement, the results ended in two defeats. This participation is part of UEMF's commitment to take an active part in national sporting events.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

New Dynamics: Health Tourism at the Euromed University of Fez

A pioneer in promoting synergies between research, innovation and territorial development, the Euromed University of Fez (UEMF) hosted, from April 10 to 12, 2025, the first edition of the Regional Forum on Health Tourism, under the theme: "Thermal waters of the Fez-Meknes region: Health and Tourism".

Organized in partnership with the Wilaya of the Fez-Meknes Region, the province of Moulay Yacoub, the Regional Tourism Council and the Regional Council, this major event is fully in line with the UEMF's commitment to actively contribute to the dynamics of sustainable regional development, particularly in sectors with high potential such as health tourism.

A meeting place for experts, researchers, economic operators, and public stakeholders, the Forum offered a rich program including scientific seminars, presentations of innovative projects, and roundtable discussions on the challenges of developing spa resorts. Through this event, the UEMF leverages its academic and scientific expertise to fuel reflection and support public policies in structuring a regional ecosystem focused on health, well-being, and sustainable tourism.

By hosting this Forum, the University confirms its role as a catalyst for strategic projects at the national and regional levels, and reaffirms its mission as a center of excellence promoting dialogue between knowledge, innovation and inclusive development.

United Nations peace operations at the heart of discussions at the UEMF

As part of the activities of the Euromed Institute of Legal and Political Sciences (ISJP), an exceptional conference was organized around the theme: "United Nations Peace Operations: Management, Challenges and Perspectives". Led by a senior officer of the Royal Armed Forces, a recognized expert in peacekeeping operations, this meeting offered our Bachelor's and Master's students a valuable immersion in the realities on the ground and contemporary geopolitical issues.

Drawing on his experience at the United Nations headquarters in New York and Geneva, as well as his numerous participations in peace missions in Africa and the Middle East, our speaker was able to convey, with clarity and pedagogy, an in-depth analysis of the management mechanisms of peace operations, the current challenges they face, as well as the prospects for development in a constantly changing world.

The conference generated a great deal of interest among the students, who were able to freely exchange ideas with our guest and deepen their understanding of the diplomatic and strategic workings of the UN in an increasingly conflictual international context. This initiative is fully in line with the IESJP's mission to foster openness, dialogue, and critical analysis around major international issues.

Ode to Mathematics: Moroccan Day of Mathematics Worthily Welcomed by UEMF

The Moroccan Day of Mathematics (MDM) was held on April 19, 2025, at the Euromed University of Fez, bringing together nearly 800 participants around the theme "Mathematics as a vector of development." Co-organized with several scientific institutions, the event celebrated the excellence of Moroccan research in mathematics and highlighted the international recognition of Moroccan researchers and students in this field.

The day featured interactive workshops, lectures, and a keynote address by Professor Abdelhaq El Jai, a specialist in distributed systems. The MDM also emphasized the importance of democratizing mathematics, inspiring young talent, and promoting the dissemination of scientific knowledge in a spirit of openness, rigor, and innovation.

UEMF hosts the 3rd edition of the National Para-Karate Kata Open

The Euromed University of Fez had the honor of hosting, on Wednesday, April 16, 2025, the third edition of the National Para-Karate Kata Open, organized in partnership with the Mohammed VI National Center for the Disabled, on the occasion of the National Day of People with Disabilities.

In an atmosphere marked by respect and determination, the Euromed Sports Complex was adorned with the dazzling white kimonos of these young athletes from all over the Kingdom. Fifty athletes with disabilities delivered impressive demonstrations, embodying both the discipline of karate and the power of perseverance.

Through this initiative, the UEMF reaffirms its strong commitment to inclusion, diversity, and sport for all. This sporting and educational event provided a wonderful showcase for the talents of these champions and helped raise awareness within the university community about the issues of accessibility and equal opportunity.

Euromed University would like to thank all the supervisors, guides, referees and volunteers who contributed to the success of this event, as well as the regional sports delegations for their mobilization.

Blood Donor Day: November 14, 2024

The Elite Club, true to its humanitarian vocation, organized a blood drive day on November 14, 2024, in partnership with the Blood Transfusion Center and the Moroccan Volunteer Corps. This event was held at the Euro-Mediterranean University of Fez and was part of an effort to raise awareness among the university community about the importance of blood donation, a simple but fundamental act that can save lives. During this day, 62 donations were recorded, reflecting a strong mobilization of students, teachers, and staff members. Each blood bag collected represents a chance of survival for a patient in distress, whether following an accident, surgery, or as part of complex medical treatment. Beyond the collection itself, the event was a true moment of solidarity and commitment. It helped strengthen civic spirit within the university, by promoting volunteerism and the social responsibility of young people. This initiative perfectly illustrates the mission of the Elite Club: to take concrete action for the common good and to inspire a dynamic of lasting mutual aid among university youth.

Workshop training for elected officials in the province of Taounate

As part of the partnership between the Euromed University of Fez and the Fez-Meknes Regional Council, a training workshop for elected officials of the province of Taounate was organized on April 29 and 30, 2025, in Taounate, under the theme "Local development".

The workshop aimed in particular at the dynamics of strengthening local capacities around four priority Sustainable Development Goals (SDGs):

SDG 1: Eradication of povertySDG 4: Quality educationSDG 10: Reduced inequalitiesSDG 11: Sustainable cities and communities

This workshop supports the mobilization of resources and territorial actors around and in response to the specific needs of local populations, while promoting their economic, social, and cultural potential. This participatory approach, rooted in local realities, promotes inclusion, resilience, and social innovation.

Blood donation

The 9eThis edition of the Blood Donation was organized outside the university campus to broaden the target audience and involve a wider community. This action helped raise awareness among a wider audience about the importance of blood donation, while also facilitating collection for hospitals and patients in need. The event was carried out in collaboration with local institutions to ensure broad participation.

The main objective of this edition was to broaden the reach of the initiative, raise awareness among more people about blood donation, and contribute to blood collection by supporting the needs of hospitals and patients, while strengthening the spirit of solidarity beyond the university framework.

International action

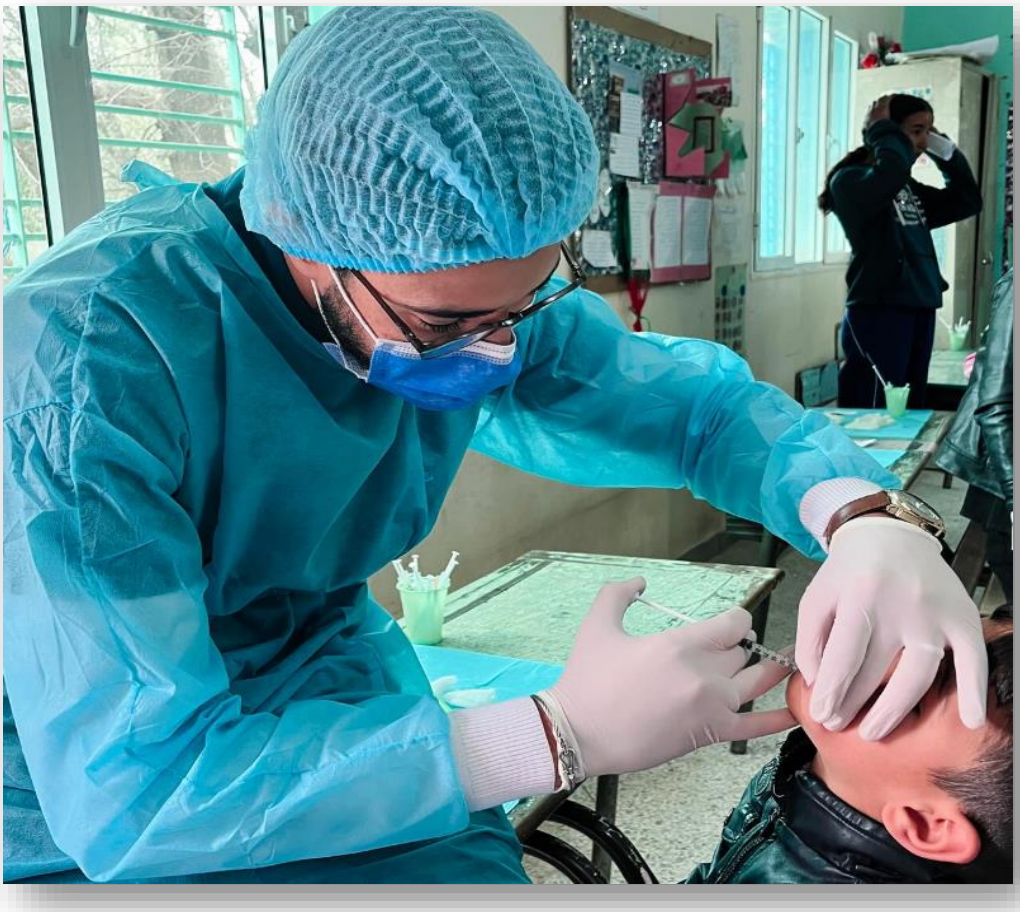

As part of our international outreach, we held an online meeting with the Rotaract Club of Surabaya Selatan. During this meeting, the two clubs had the opportunity to introduce themselves and discuss their respective cultures, as well as ongoing projects. Each club shared its values, initiatives, and operations, strengthening international ties and fostering better intercultural understanding. Each club was also able to create a recipe from the other's country, further strengthening cultural exchange and enrichment.

The main objective of this action was to promote cultural exchanges between Rotaract clubs, to share experiences and projects, and to strengthen relationships between members through a better understanding of each culture, while promoting collaboration for common initiatives.

One day of impact, one life of change

On February 16, 2025, in Skoura M'daz, our humanitarian dental caravan brought care, joy and solidarity to the Ichanaaki School Group.

- 260 students benefited from free dental consultations provided by dedicated professionals
- Oral hygiene awareness sessions to teach children how to take care of their smiles
- A complete renovation of the school's exterior walls, bringing their learning environment back to life
- Unforgettable moments of sharing: music, dance, thinking games and creative activities with children
- Distribution of dental kits, thanks to the generous support of Colgate Morocco

It was not just about medical care, but also about spreading happiness, inspiring hope and leaving a lasting mark.

Training program for elected officials and staff of the Fez-Meknes region

On April 24 and 25, 2025, the Euromed University of Fez organized a training workshop for elected officials from the Province of Moulay Yacoub on "Mastering local taxation and the governance of local authorities." This initiative is part of the UEMF's openness and its commitment to strengthening the skills of local stakeholders.

Dedicated to the control of local taxation as a strategic lever for public financing and the governance of local authorities, this session aimed to strengthen the capacities of elected officials, improve the efficiency of resource collection, promote transparency and tax fairness, as well as consolidate efficient and attractive governance for investment.

UNAOC awards its label: United Nations Chair for the Alliance of Civilizations

At the meeting of the Advisory Council of the United Nations Alliance of Civilizations (UNAOC) held on April 20 in Marrakech, the Euromed University of Fez (UEMF), represented by its President, Prof. Mostapha Bousmina, and Prof. Abdelhak Azzouzi, President of the Alliance of Civilizations Chair, presented the achievements of this unique chair, unanimously praised by the members of the UNAOC. On this occasion, the Chair was officially labeled and renamed "United Nations Chair for the Alliance of Civilizations," recognizing its central role in training, research, and intercultural dialogue. Supported by an accredited Master's and doctoral program, it welcomes students of more than 50 nationalities and regularly organizes major events, such as the Euro-Mediterranean and African meeting at the Moroccan Parliament in February 2024 or the conferences on December 6 and 7, 2024, under the High Patronage of HM King Mohammed VI. Created in Fez during the 9th UNAOC World Forum in November 2022, the Chair embodies Morocco's vision of peace, living together and co-construction between civilizations, a mission reinforced by the official and lasting support of the United Nations.

STARTECH Bootcamp: Two days of ideation and innovation at the Euromed Innovation Center

On April 18 and 19, the Euromed Innovation Center (EIC) hosted the STARTECH program cohort for an intensive bootcamp, in partnership with Tamwilcom. This ideation session was a decisive step in the project leaders' journey, supporting them in transforming their ideas into concrete prototypes (Proof of Concept).

For two days, participants benefited from targeted support and practical training focused on several strategic areas: in-depth understanding of their market, validation of business models, personalized coaching sessions, and development of impactful pitches. The goal was clear: to refine projects and prepare entrepreneurs to convince future partners or investors.

This event highlighted the quality of the support provided by the experts involved, as well as the remarkable commitment of the project leaders, driven by the desire to bring out innovative and viable solutions. In this regard, the Euromed Innovation Center warmly thanks all the participants for their motivation, as well as the speakers for generously sharing their expertise.

ISCAE Olympics: Exceptional sporting performances by UEMF members and title of best delegation

Euromed University of Fez is proud to celebrate the achievements of its students who flew its flag at the Olympics organized by ISCAE in Casablanca. This exceptional competition brought together 14 universities and colleges around demanding sporting events, and our 15 students, accompanied by two supervisors, achieved remarkable performances.

Our champions have distinguished themselves in all disciplines, collecting prestigious titles:

• In Basketball, our team won the first cup.

• In Table Tennis, our students triumphed in both the boys' and girls' categories, with two first cups.

• In Swimming:

- 50m boys: 1st place (gold medal) and 3rd place (bronze medal).

- 50m girls: 2nd place (silver medal) and 3rd place (bronze medal).

- Mixed relay: 1st place (gold medal).

At the end of this event, the Euromed University of Fez was elected "Best Delegation" by the organizers, an accolade that testifies to the commitment, team spirit and excellence of our students.

AInnovathon: Innovation in the service of health and education thanks to AI

On April 22 and 23, more than 50 students from the Euromed Business School (EBS) and the School of Digital Engineering and Artificial Intelligence (EIDIA) took up the challenge of the AInnovathon, an intensive hackathon organized by the Euromed Innovation Center as part of the STARTECH program, in partnership with Tamwilcom.

For 48 hours, participants worked in teams to design innovative solutions in two key areas: health and education. At the heart of this experience was a shared mission: to harness artificial intelligence to serve society through concrete, high-impact projects.

Guided by an agile approach, the students alternated between training workshops, mentoring sessions, and prototyping phases to develop an initial functional demonstration of their ideas. Following this technological and collaborative immersion, several projects were presented during a pitch session before a jury of experts.

Three teams particularly distinguished themselves and will benefit from personalized support to refine and develop their solutions: Ru'ya, MedPass, and Eschool4GenZ. Congratulations to all the students for their creativity, commitment, and team spirit, as well as to the teacher-researchers for their quality support throughout the event.

Italian Design Day: Reading nature and protecting its culture

As part of its Conference Series, the Euromed University of Fez is sharing its activities promoting "Made in Italy" in partnership with the Italian Embassy in Morocco, by welcoming the Italian writer, botanist and landscaper Umberto Pasti this Wednesday, April 23, 2025. A renowned international figure, he is committed to the preservation of biodiversity, the enhancement of landscapes and the transmission of knowledge.

This meeting is part of the 9th edition of the "Italian Design Days" (IDD), organized around the theme "Reading nature and protecting its culture, for a design that repairs inequalities." A theme that resonates with that of the 2025 edition of the International Triennale of Milan, which highlights innovative approaches to design that serve the preservation of heritage – tangible and intangible – with a view to sustainability and inclusion.

Italian Design Day is an unmissable event celebrating Italian excellence in all its creative expressions. For several years, it has highlighted the synergies between innovation, craftsmanship, sustainability, and transmission, in close collaboration with Moroccan institutions and local communities. Through this exchange, Pasti demonstrated the profound connections between nature, culture, and design, and their role in building a more equitable future.

Taking place at the Euromed University of Fez, a proven partner, this initiative demonstrates the importance given to intercultural dialogue and academic cooperation in the service of a fairer and more sustainable society.

Mystery Gift, a startup incubated at UEMF, selected at GITEX

Among the 200 Moroccan startups selected to participate in the continent's largest technology fair, GITEX, Zahira Boulanouar, a second-year student at the School of Digital Engineering and Artificial Intelligence (EIDIA), proudly represented the Euromed University of Fez with her "Mystery Gift" project.

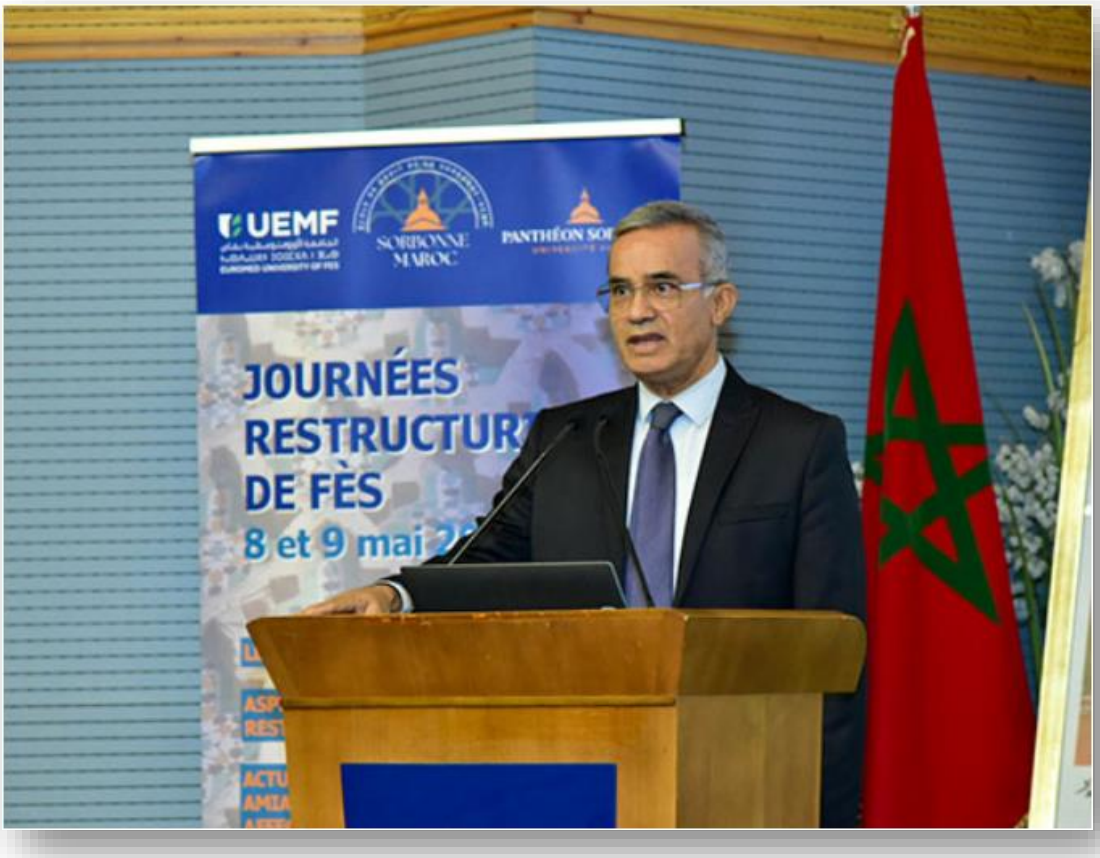

Born from an idea developed in her bedroom, this innovative personalized gift concept combines customer focus, creativity, and artificial intelligence. Driven by an original vision of tailor-made products, Zahira transformed her initiative into a promising startup, now supported by the UEMF's Euromed Innovation Center (EIC).

His career path reflects the spirit of innovation, perseverance, and entrepreneurial commitment that the University encourages in its students. The recognition obtained through this national selection confirms the quality of the support offered by the EIC and the UEMF's ambition to train the leaders and innovators of tomorrow.

Our congratulations to Zahira on this great achievement and our best wishes for the rest of her adventure at GITEX Africa 2025 and beyond.

A center of excellence for French-speaking restructuring, the UEMF is hosting a 3rd edition with strong international resonance

On May 8 and 9, 2025, the Euromed University of Fez, in partnership with the University of Paris 1 Panthéon-Sorbonne, hosted the 3rd edition of the Restructuring Days. This benchmark event in the French-speaking legal world brought together nearly 250 participants from Europe and Africa: lawyers, magistrates, business leaders, researchers, and students.

Created to analyze developments in the law governing companies in difficulty, these days have become a space for exchanges between professionals and academics on legal reforms, innovative practices, and international issues. The rich program addressed the reform of amicable procedures, recovery plans, and transnational cooperation.

This edition was distinguished by a strong African participation, notably from OHADA member delegations, confirming the event's vocation to create a bridge between Europe and Africa.

Fez has thus established itself as a center of excellence in business law, thanks to the UEMF's commitment to research, continuing education and international openness.

Leadership and Individual Effectiveness: An Exceptional Conference with Mr. Reda Bouraoui

The Euromed Business School hosted, under the aegis of its director, Professor Abdessamad Rhalimi, an exceptional conference led by Mr. Reda Bouraoui, a professional with a rich and inspiring career. Under the theme "From Classroom to Career: A Framework for Leadership and Individual Effectiveness," this interactive meeting offered students a captivating immersion into the driving forces of personal and professional leadership.

With over 30 years of experience in leading multinational companies, Mr. Bouraoui captivated his audience by sharing an authentic perspective on the challenges and opportunities of the transition from academia to professional life. Beyond his managerial expertise, his atypical profile—a karate black belt, motorcycle enthusiast, and co-founder of the UniTalk platform—perfectly illustrates the synergy between rigor, passion, and innovation.

Throughout the conference, students were invited to reflect on their own leadership posture, explore the levers of their individual effectiveness, and rethink their vision of career not as a destination, but as an evolving process. In a dynamic atmosphere, the discussions were lively, sometimes even introspective, revealing the deep aspirations of a generation in search of meaning and sustainable performance.

This intervention is fully in line with the Euromed Business School's mission: to train responsible leaders capable of combining professional excellence with human values. Through meetings of this magnitude, the School confirms its commitment to offering its students formative experiences in contact with inspiring figures from the economic and entrepreneurial world.

Tech4Farmers: Three days of support for the 2nd cohort of AgriTech startups

From May 13 to 15, 2025, the Euromed University of Fez organized the second bootcamp of the Tech4Farmers program, in partnership with the French Development Agency (AFD). This program is part of the Regional AgriTech Innovation and Entrepreneurship Center (PRIE) of Fez-Meknes.

For three days, 16 AgriTech startups benefited from intensive support to:

Structure their economic model,

Build their business plan and develop strategic partnerships,

Explore opportunities for territorial deployment through panels with regional institutions (DRA, ENA Meknès, Agrinova).

Supervised by UEMF, IMPACT Lab and the Euromed Innovation Center, this bootcamp strengthened the participants' entrepreneurial capacities while connecting them with key players in the Moroccan agricultural ecosystem.

Visit of a Senegalese delegation to the UEMF: focus on innovation and African synergies

Euromed University of Fez was pleased to welcome, as part of an official visit to Morocco, a large Senegalese government delegation led by the Secretary of State for the Development of Small and Medium-Sized Industries. The delegation also included several senior officials from institutions responsible for investment development and supporting the industrial fabric in Senegal.

This visit, with strong strategic significance, is part of a dynamic of South-South cooperation and sharing of experiences between African countries around common issues related to economic development, technological innovation and the training of human capital.

The University's President, Prof. Mostapha Bousmina, and other officials welcomed the delegation and presented UEMF's main strategic orientations, its commitment to innovation, youth entrepreneurship, and sustainable development. The visitors also discovered the University's cutting-edge technology platforms, as well as its flagship projects such as the Fez Smart Factory (FSF) and the Euromed Innovation Center (EIC).

The visit was punctuated by rich and promising exchanges on the possible synergies between the UEMF and Senegalese industrial development stakeholders, particularly in areas related to supporting SMEs/SMIs, developing the skills of young entrepreneurs and incubating innovative projects with a strong local impact.

This meeting strengthens ties between Morocco and Senegal and confirms the growing role of African universities as catalysts for cooperation and transformation in the service of a more autonomous, united and forward-looking Africa.

Euromed University of Fez welcomes the new Director General for MENA of the European Commission, HE Mr. Stefano Sannino

As part of the consultations on the New Pact for the Mediterranean, HE Stefano Sannino, Director General for the Middle East, North Africa and the Gulf (DG MENA) at the European Commission, visited the Euromed University of Fez on 14 May 2025. Accompanied by HE Patricia Llombart Cussac, Ambassador of the European Union to Morocco, this visit strengthened the strategic partnerships between the UEMF and the European institutions.

Welcomed by UEMF President Prof. Mostapha Bousmina, the guests explored the campus's state-of-the-art facilities, including a state-of-the-art sports complex, a 3,500-seat conference center, and a research library. A highlight of the visit was an interactive dialogue with students on topics of importance to the region, such as education, mobility, employment, climate, and academic cooperation.

This meeting confirmed the UEMF as a strategic player in Euro-Mediterranean cooperation and a catalyst for innovation and sustainable development in the region. The visit concluded with a symbolic immersion in the historic medina of Fez, highlighting the importance of knowledge in strengthening ties between peoples.

UEMF and NOVA University of Lisbon join forces for intercontinental collaboration

The Euromed University of Fez (UEMF) and the NOVA University of Lisbon have signed a strategic collaboration agreement, a significant step towards developing student mobility opportunities, research projects and intercultural exchanges.

This agreement marks an important step in strengthening academic and scientific relations between Africa and Europe. The Nova University of Lisbon, ranked among the top 8 European universities in the QS Top 50 Under 50 ranking, shares a common vision with UEMF: placing research, innovation, and civic engagement at the heart of its actions.

Mr. João Sàágua, Rector of the Nova University of Lisbon, highlighted the strategic importance of this collaboration, recalling that NOVA, rooted in European culture and Iberian identity, prioritizes relations with three major geographical areas: Europe, the Mediterranean, and the South Atlantic. These regions represent major axes for innovative and sustainable academic cooperation. For its part, UEMF, a leading Euro-Mediterranean university, stands out for its role as a bridge between continents and its leadership in high-impact projects in the fields of education, research, and innovation in the region.

During this visit, the NOVA delegation was able to discover UEMF's modern infrastructure, a testament to its academic and scientific ambition. The guests toured the research and innovation platforms, including the 3D printing platform, the largest on a university campus in Africa. They also explored the university's sports complex, including a FIFA-certified football pitch and an Olympic-sized swimming pool, which positions UEMF as a key player in promoting well-being and sporting excellence.

UEMF opens its doors to representatives of parents of students from high schools in Fez

In a strong desire to strengthen synergies between the academic and school worlds, the Euromed University of Fez welcomed, on May 28, the presidents of the parents' associations of the high schools of Fez for a visit under the sign of discovery and dialogue.

This meeting allowed our guests to discover up close the many riches of our eco-campus, through an immersive journey including technological and scientific platforms, simulation rooms, sports infrastructures, as well as exhibitions highlighting the achievements of students.

Much more than a simple visit, this event was a moment of authentic exchange around the values that form the basis of our academic project: pedagogical innovation, learning through practice and student well-being.

This rapprochement marks an important step in the development of lasting relationships between the Euromed University of Fez and the educational communities of the region, serving a shared vision of excellence and inclusion.

UEMF PhD student awarded at the international MEDPore25 congress for his promising research

Mohamed Amine Benzaouia, a doctoral student in the NANOMat (Nanomaterials) team at Euromed University of Fez, is conducting innovative research on the development of new antibacterial and antiviral materials. This project, supported by the Hassan II Academy of Science and Technology, is part of a national strategy to strengthen scientific capacity in the face of pandemics, particularly COVID-19.

As part of his work, Mr. Benzaouia participated in the international conference MEDPore25 (Mediterranean Conference on Porous Materials), recently held in Marrakech. He presented a scientific poster entitled: “Nitrogen-containing mesoporous organosilicas as antibacterial materials.” This presentation was awarded the Best Poster Award, recognizing scientific excellence, clarity of the subject, and visual quality of the poster.

Currently pursuing a thesis at the NANOMat laboratory, this distinction highlights the dynamism of research conducted at UEMF in the field of nanomaterials applied to health. It also illustrates the university's growing impact on the international scientific scene.

Euromed University of Fez warmly congratulates Mohamed Amine Benzaouia for this well-deserved recognition.

Information and discussion day on European research programs

Euromed University of Fez hosted a day dedicated to European research funding programs, with a particular focus on Horizon Europe and Erasmus+. The event provided a better understanding of the opportunities these programs offer to researchers, teachers, and project leaders.

Presentations focused on several key themes, including health, digital technology, industry, space, and higher education. Participants received detailed presentations on project submission mechanisms, eligibility criteria, and the support tools available to assist applications. A practical workshop, held in the second half of the day, provided participants with an interactive setting to discuss their project ideas and refine their preparation processes.

This event helped strengthen UEMF's participation in European calls for projects, while paving the way for new international collaborations in the fields of research, teaching, and innovation. It is fully in line with the university's strategy of scientific and academic outreach on a Euro-Mediterranean scale.

UEMF seals strategic partnerships with seven national sports federations

On May 21, 2025, the Euromed University of Fez organized the "National Sports and Performance Meeting," during which it signed seven partnership agreements with Moroccan sports federations. This event, marked by the presence of representatives from federations such as the Royal Moroccan Ski Federation, Disabled Sports, and Triathlon, reinforced the UEMF's commitment to the development of high-level sport. Ms. Iman Meriem Benkirane, Vice-President of the UEMF, emphasized the strategic importance of this initiative for talent training, innovation, and applied research in the sports field. In addition, the partner federations praised the UEMF's infrastructure, which meets international standards, including the Olympic swimming pool and the FIFA-certified field. Thematic sessions on sports performance, sports psychology, and the contribution of artificial intelligence in training also enriched this meeting.

African Week at UEMF: Youth at the Heart of Continental Dynamics

The 3rd edition of Africa Week at UEMF, held from June 11 to 13, 2025, under the theme "Youth, the Future of Africa," celebrated the strategic role of young people in the continent's development. The event brought together diplomats, experts, students, and artists for conferences, fairs, performances, and debates on major issues such as energy, agriculture, and culture. The UEMF President emphasized the importance of supporting young talent, while diplomatic representatives welcomed this initiative. UEMF thus affirms its commitment to a strong, united, and innovative Africa, driven by its youth.

International Conference: Cross-examinations of Mediterranean epistemes

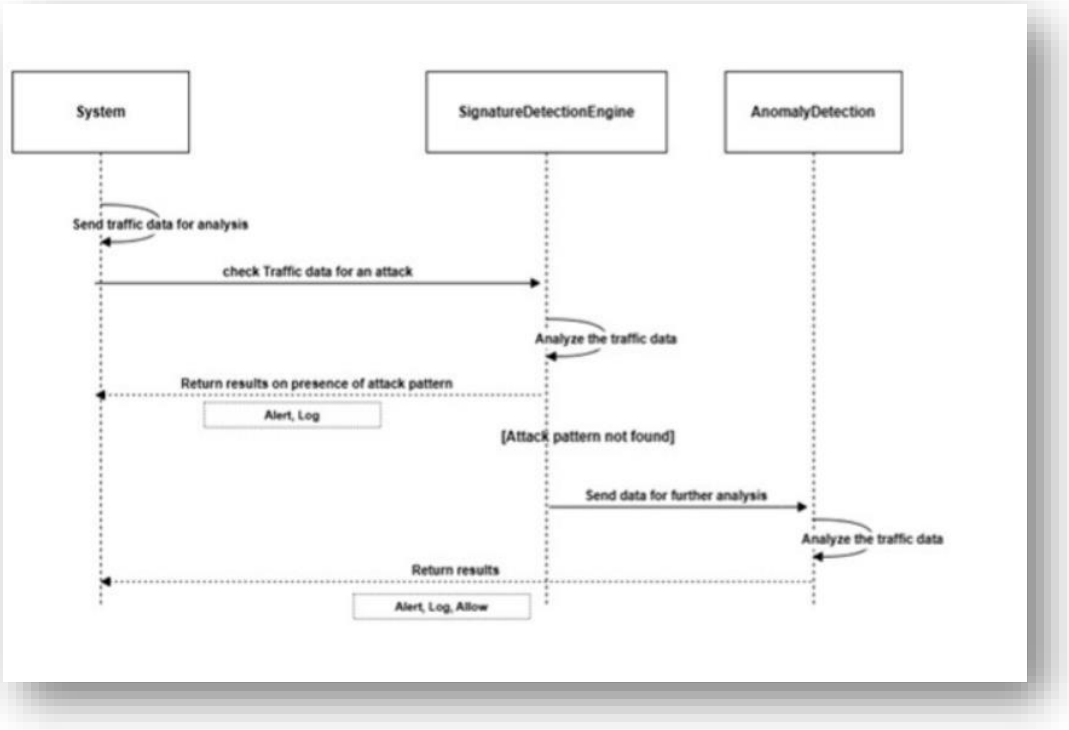

On May 29 and 30, 2025, the Euromed University of Fez hosted a major international conference entitled "From the Mediterranean, Significant Epistemes: in Philosophy, Art and Literature." Jointly organized by the Faculty of Human and Social Sciences, the ICESCO-EUROMED Chair (Arts, Societies and Civilizations) and the UNESCO-EUROMED Chair (Mediterranean Interculturalities).

This conference brought together researchers, philosophers, artists, and writers from diverse backgrounds to reflect deeply on the forms of thought, creation, and transmission that have marked the shores of the Mediterranean. Through lectures, presentations, and discussions, the speakers explored how Mediterranean philosophy, art, and literature continue to resonate today, carrying a legacy that is still alive and constantly renewed.

The event was marked by the richness of the exchanges, the quality of the contributions, and a genuine intellectual openness. It highlighted the complexity of Mediterranean cultural dynamics, between continuities and ruptures, and allowed for new avenues of interpretation of the works and thoughts emerging from this plural and fertile space.

Young Italian Musical Talents in the World Concert Series

Organized by the Italian Embassy in Rabat, the Italian Cultural Institute and the Italian National Music Committee, in collaboration with the Euromediterranean University of Fez, this series offers four concerts highlighting promising young Italian musicians.

On the program:

Pianist Nicolò Cafaro, renowned for his virtuosity (February 7)

The cello-piano duo Lorenza Baldo and Martina Consonni, formed at the Imola Academy (February 9)

Guitarist Stéphan Masserano, internationally renowned soloist (February 11)

The violin duo Julian Kainrath & Giorgio Lazzari, with a repertoire from baroque to contemporary (February 13)

The series closes on February 22 with a jazz tribute concert to Frank Sinatra, performed by the Jazz Band section of the Royal Symphony Orchestra under the direction of Oleg Reshetkin, with vocals by Sergey Arkhipov.

Roundtable: Entrepreneurship in Africa – Innovate locally, impact globally

As part of African Week, a round table hosted by Bank of Africa was held on June 12, 2025, on the theme:

“Entrepreneurship in Africa: Innovate locally, impact globally.”

This session brought together students and professionals to explore the role of local innovation in the continent's economic transformation and its global influence.

The discussions highlighted success stories, challenges encountered, and opportunities for young African entrepreneurs, with a particular focus on innovation, sustainability, and inclusive growth.

The event illustrated the full potential of the African entrepreneurial spirit in building a more dynamic, connected and resilient economy.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Closing of the National School Volleyball Championship

The National School Volleyball Championship ended on April 12, 2025 at the UEMF Sports Center, after four days of intense competition.

The event was marked by a strong sportsmanship spirit as well as environmental awareness actions.

The students also participated in a cultural tour of the historic medina of Fez.

The closing ceremony, held at the UEMF, was an opportunity to present prizes to the winning teams and to recognize key players in school sport in the region.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Sport & Performance at UEMF

In May 2025, the UEMF organized, via the Euromed Sports Centre and the VP-ACVU, a series of events around the theme “Sport & Performance”.

On May 7, several conferences were led by experts, addressing key themes: sports performance, sports psychology, artificial intelligence in the service of athletes, and reconciling studies and high-level sport.

On May 21, the National Meeting “Sport & Performance – UEMF 2025” brought together researchers, federations, athletes, students and decision-makers for a day of discussions focused on research, innovation and improving performance in sport.

District Leadership Camp – Rotaract UEMF

On May 2, 3 and 4, 2025, Rotaract Club UEMF hosted the District Leadership Camp (DLC), a major event bringing together the clubs of District 9010.

During these three days, around forty participants from all over Morocco took part in training sessions, team building activities and enriching discussions on leadership, community service and civic engagement.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

“Children of the Moon” Project – Hands Club

On February 15, 2025, the Hands Club participated in the “Children of the Moon” competition organized at ENSAM in Meknes.

On this occasion, the club presented a project to develop 100% natural creams, specially designed for people suffering from Xeroderma Pigmentosum. This project was carried out in partnership with pharmacy and biomedical students from Euromed University.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Masters of Speech Club Performances

The Masters of Speech Club brilliantly represented the UEMF in three national public speaking competitions in 2025:

On March 1st, at the Lelaplacien competition at ENSA in Fez, the club won first prize.

From March 7 to 9, he also won first prize at the War of Words at Al Akhawayn University.

On April 13, another victory for the Victoria Verba at ENSAM in Meknes.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

Environmental Project and International Exchange – Rotaract Club

The Rotaract Club of UEMF, in partnership with the Rotaract Club USME of India, carried out a project combining environmental commitment and international exchange.

Members collected waste in the Ain Chqef forest, collecting a total of fifteen 100-liter bags, thus contributing to the preservation of the environment.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

University Throne Cup Final

The UEMF men's basketball team distinguished itself by finishing runner-up in the final of the University Throne Cup, held on Tuesday, June 17, 2025 in Safi.

After a remarkable journey, our students successively faced:

Ibn Tofail University (Kenitra) – 1st round

Private University of Marrakech – 2nd round

International University of Rabat (UIR) – semi-final

Al Akhawayn University – final, with a close score of 18 to 17

This performance demonstrates the sporting dynamism of the UEMF, the commitment of the students, as well as the educational value of university sport.

Club Activities Report: Vice-Presidency in charge of Cultural Affairs and University Life

UfM Med Youth Lab 2024: 70 young people come together to co-create the Euro-Mediterranean future

In February 2025, the Euromed University of Fez welcomed 70 young people from 21 nationalities as part of the UfM Med Youth Lab 2024, a major Euro-Mediterranean hackathon. Co-organized with the Union for the Mediterranean (UfM), GIZ, the Anna Lindh Foundation, and IEMed, this event allowed participants to co-create concrete solutions around three major themes: green skills, youth mobility, and civic engagement. A true laboratory of ideas for sustainable development and regional cooperation.

Activity report of the Department of Social, Economic and Entrepreneurship Partnerships.

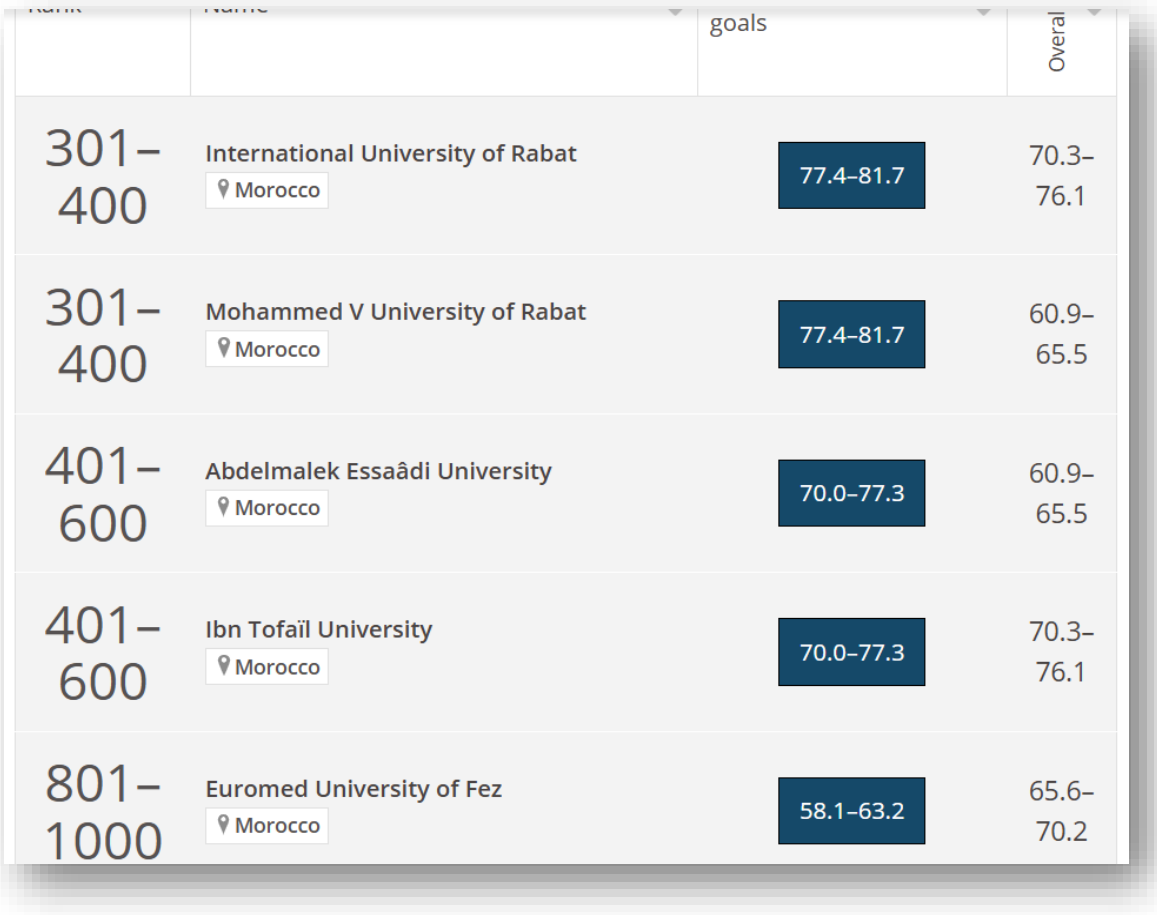

Training of Trainers Workshop on Incubation Programs – Link Up Africa

In February 2025, as part of the Link Up Africa program led by Enabel and AMCI, the Euromed Innovation Center team participated in a training of trainers workshop dedicated to the design and implementation of effective incubation programs.

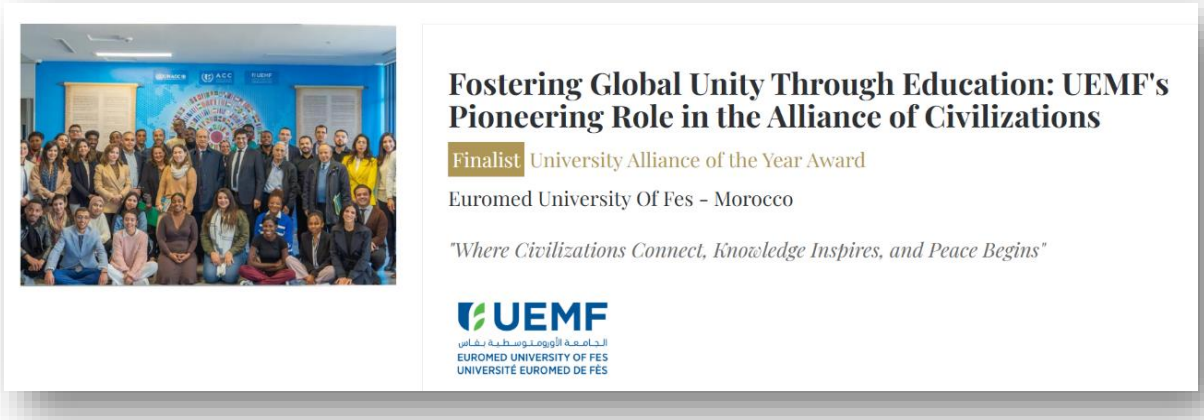

Activity report of the Department of Social, Economic and Entrepreneurship Partnerships.

THE Impact Ranking 2025: 1st at the regional level in the category SDG 17: Partnerships for the achievement of the goals

Rank	Name	goals	Overal
301–400	International University of Rabat Morocco	77.4–81.7	70.3–76.1
301–400	Mohammed V University of Rabat Morocco	77.4–81.7	60.9–65.5
401–600	Abdelmalek Essaâdi University Morocco	70.0–77.3	60.9–65.5
401–600	Ibn Tofaïl University Morocco	70.0–77.3	70.3–76.1
801–1000	Euromed University of Fez Morocco	58.1–63.2	65.6–70.2

UEMF participation in the MLUMSE project in Zagreb

From June 30 to July 6, 2025, the Euromed University of Fez participated in a week of thematic workshops and strategic meetings at the University of Zagreb, as part of the Erasmus+ CBHE MLUMSE project, dedicated to the modernization of teaching in land management and urban planning in the Southern Mediterranean.

This mission has enabled the consolidation of Euro-Mediterranean academic collaborations around key themes such as the New European Bauhaus, smart cities, strategic planning, heritage enhancement, digital tools and geospatial governance.

UEMF was also represented at the IDS3Geo doctoral seminar and presented the first version of its Quality Plan to the project steering committee. This participation demonstrates UEMF's strong commitment to academic excellence, internationalization and knowledge sharing.

The 2nd edition for the STARTECH program

The Euromed Innovation Center (EIC), in partnership with Tamwilcom, the Fez-Meknes Regional Investment Center and Bank of Africa, organized an intensive bootcamp for innovative project leaders.
The objective of this initiative is to support the region's talents in structuring their ideas, to encourage their transformation into high-potential startups and to promote local innovation through concrete actions, collaboration and impact.
On July 10 and 11, participants from the Fez-Meknes region benefited from two days structured around practical workshops, mentoring sessions, and constructive exchanges. These days were marked by a collective dynamic promoting mutual support, energy, and creativity, driven by committed and action-oriented project leaders.

Academic Mobility in China: Experience at the Luojia Global Summer School

As part of strengthening UEMF's international outreach, three students recently participated in the Luojia Global Summer School organized by Wuhan University, China.CN, during the summer of 2025.
Imane and Hiba, students at the Euromed School of Digital Engineering and Artificial Intelligence (EIDIA), and Kamélia, a doctoral student at the Euromed Institute of Legal and Political Sciences (ISJP), took part in this excellence program bringing together students from around the world. Successfully integrated into multicultural groups and academic and intercultural activities, they enriched their academic careers through high-level exchanges and immersion in a stimulating international environment.

This experience illustrates UEMF's desire to train global citizens, capable of evolving in multicultural contexts and building bridges between knowledge, cultures and societies.

Information day on European programs: Erasmus+ & Horizon Europe

The Euromed University of Fez organized a day dedicated to the European Erasmus+ and Horizon Europe Programs, marked by enriching discussions around the opportunities offered in research and higher education.

This meeting provided an opportunity to deepen understanding of European funding mechanisms, to discover major calls for projects and to strengthen the skills of project leaders in building sustainable partnerships on a Euro-Mediterranean scale.

The morning concluded with an interactive exchange between speakers and participants, bringing together teacher-researchers, academic managers, project leaders and doctoral students.

Our sincere thanks to the speakers for the quality of their contributions:

Prof. Noureddine El Aouad, National Contact Point Horizon Europe – Health

Prof. Najiba Amrani, National Contact Point Horizon Europe – Digital, Industry & Space

Dr. Latifa Daadaoui, National Coordinator of the Erasmus+ Office

Dental research: a look back at the IADR 2025 congress in Barcelona

Professor Khalil El Mabrouk represented the Euromed University of Fez (UEMF) at the 103rd IADR General Session and Exhibition, held in Barcelona from June 25 to 28, 2025. This event, bringing together more than 4,000 international participants, is one of the most important in the field of dental research.

On this occasion, Prof. El Mabrouk chaired a scientific session on polymer materials applied to tissue regeneration and presented an oral communication entitled "Bioresorbable Hybrid Membranes for Bone Regeneration", highlighting advances in biomaterials for bone regeneration.

A member of the IADR, Professor El Mabrouk is one of the few Moroccan representatives of this international scientific organization, thus strengthening the UEMF's visibility in global research networks. His participation reflects the university's commitment to cutting-edge research and innovation.

Doctoral Thesis Defense in “International Relations” by Mr. Othman SQALLI HOUSSAINI

This thesis explores the role of culture and religion in socio-economic development and the strengthening of bilateral relations between Morocco and other African countries. Through the analysis of cooperation policies, field initiatives, and interviews with African institutional actors, it highlights the impact of these dimensions on the political, economic, and social spheres. The study aims to promote cultural and religious values as levers for sustainable development and cohesion, while proposing concrete recommendations to strengthen African cooperation.

Courtesy visit of a French delegation to the UEMF

The Euromed University of Fez received a French delegation as part of a courtesy visit aimed at strengthening Franco-Moroccan cooperation in the fields of higher education and research. Among the dignitaries present were Senator Olivier Cadic and Mr. Johann Godin of the French Consulate General in Fez. Discussions focused on the dynamics of collaboration between the two countries, academic mobility, and partnership opportunities in the evolving Euro-Mediterranean context.

African Futures Institute: Launch of the Nomadic African Studio in Fez

The Euromed University of Fez hosted the African Futures Institute, an initiative founded in 2021 in Accra by Professor Lesley Lokko OBE, which offers a new model of architectural education combining training, research, and public events.

This meeting took place at the eco-campus, on the occasion of the inaugural establishment of the Nomadic African Studio in Fez, the result of an innovative partnership between UEMF and AFI, led by professors Aziza Chaouni and Alex Toshkov.

Located in the heart of the Fez medina, within the Riad Lalla Yeddouna, which is made available to the University, this nomadic studio offers participants a unique setting to foster creative reflections that resonate with the history and culture of the place. It is part of a transnational dynamic, bringing together a broad cohort of international critics.

This event enabled rich exchanges between the studio teams and the university community, opening new perspectives for education and innovation in Africa.

Euromed University of Fes's UN Chair for Alliance of Civilizations Wins Top Award

The United Nations Chair for the Alliance of Civilizations at Euromed University of Fez (UEMF) received the prestigious "Alliance University of the Year" award at the Triple E Awards 2025. The ceremony took place on Tuesday at Prague's historic Lobkowicz Palace during the Global ACEEU Forum, which gathered over 150 decision-makers from around the world.

The Chair was ranked first among hundreds of universities and institutions worldwide that competed for this recognition. The Triple E Award represents the first global recognition dedicated to universities' "Third Mission" – their role beyond teaching and research, serving otherness, Alliance of Civilizations, and development.

Organized by the Accreditation Council for Entrepreneurial and Engaged Universities (ACEEU), the only global accreditation body focused on university engagement and entrepreneurship, this award distinguishes the most innovativeinstitutionscommitted to societal transformation.

Eight UEMF researchers recognized among the world's top 2% of most influential scientists

The Euromed University of Fez (UEMF) is once again in the spotlight on the international scientific scene.Eight of its research professors were ranked among the top 2% of the world's most influential scientists according to the 2025 edition of the Stanford University ranking, produced in partnership with Elsevier and Scopus.

This distinction is based on demanding bibliometric criteria (citations, h-index, co-publications, overall impact) and reflects the progress of Moroccan research, which now has 134 distinguished researchers. UEMF stands out in particular by doubling the number of its recognized researchers, going from 4 in 2024 to 8 in 2025.

This international recognition confirms the quality and impact of the work carried out at UEMF, strengthens its global visibility and constitutes a source of pride for the Moroccan scientific community.

Tamkin LiTanmia: Agritech Project Steering Committee

THEOn September 25, 2025, the Euromed University of Fez hosted the steering committee of the "Regional Innovation and Entrepreneurship Hub in Agritech" project, part of the Tamkin Li Tanmia program funded by the AFD. Launched in 2022, this project aims to build a regional agricultural innovation ecosystem connecting researchers, institutions, businesses, start-ups, and farmers to develop appropriate technological solutions.

The meeting, bringing together numerous institutional and private partners, made it possible to present theproject progress, monitor the Tech4Farmers program, plan the mobilab and awareness-raising activities, while defining the next steps. It confirms UEMF's commitment to technological and entrepreneurial innovation in the service of agriculture and the Fez-Meknes region.

3e and last Tech4Farmers Bootcamp of the 2e Cohort

From September 23 to 25, 2025, the Euromed University of Fez, through its Euromed Innovation Center incubator, hosted the third and final Tech4Farmers – Tamkin LiTanmia bootcamp, funded by AFD. Dedicated to AgriTech project leaders from the second cohort, this bootcamp allowed startups to refine their business model, strengthen their pitching skills, and prepare for fundraising through practical workshops, mentoring, and discussions with experts.

This step completes the incubation cycle and prepares entrepreneurs to scale up and fully integrate into the regional and national Agritech ecosystem. It illustrates UEMF's commitment to technological innovation, sustainable agriculture, and impact entrepreneurship in the Fez-Meknes region.

[Tribune] From "Made in Morocco" to "Trade via Morocco": How the Kingdom is redrawing the routes of global trade

The "Made in Morocco" label has long symbolized an emerging industrial pride. Textiles, leather, then automobiles and aeronautics were the showcases of this Moroccan producer. But in 2025, this label is no longer sufficient to reflect the Kingdom's ambition.

The country is not just a manufacturing territory: it is becoming a logistical and strategic crossroads, at the heart of the reshaping of global flows. This profound transformation heralds the shift from "Made in Morocco" to "Trade via Morocco," an expression of a deliberate repositioning.
