2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction

Eradicating poverty in all its forms remains one of the major challenges of sustainable development. Beyond the statistics, poverty limits access to education, health, employment, and human dignity.

Aware of its societal role, the Euromed University of Fez places social inclusion and equal opportunities at the heart of its mission. Through its policies promoting access to education, its student support programs, its community outreach initiatives, and its partnerships with local stakeholders, UEMF takes concrete action to reduce socio-economic inequalities and empower everyone to build their future.

As a space for training, research and civic engagement, the University considers education as an essential lever in the fight against poverty, thus contributing to building a fairer, more inclusive and sustainable society.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

As part of its commitment to poverty reduction and the promotion of social inclusion, the Euromed University of Fez implements several key policies. Its social and societal responsibility policy affirms the University's commitment to integrating social impact and equal opportunities into its mission, particularly through mechanisms that guarantee equitable access to education, employment, and apprenticeships. Furthermore, the Corporate Social Responsibility (CSR) Charter reinforces this commitment by contributing to social and economic development and the improvement of living conditions, in line with the objectives of poverty reduction and social progress.

Politique de l'Université Euromed de Fès (UEMF) en matière de Responsabilité Sociale et Sociétale
(version révisée 2025)

L'une des missions de l'UEMF est de former des citoyens conscients de leurs devoirs et droits, imprégnés de valeurs de vivre ensemble, d'altérité et d'esprit critique, tout en étant responsables en matière de protection de l'environnement et de respect d'autrui et de la nature. À cet effet, l'ensemble de la communauté universitaire est mobilisé pour atteindre les Objectifs de Développement Durable (ODD) autour des axes suivants :

I. Égalité de chances : parité, équité salariale et inclusion

L'UEMF promeut et met en œuvre une politique proactive d'égalité des chances et d'opportunités parmi son corps professoral, son personnel administratif et de soutien ainsi que parmi ses étudiants. Cette politique donne l'accès à tous à l'UEMF sans discrimination aucune que ce soit pour l'emploi, pour les études ou encore pour l'apprentissage tout au long de la vie. Cette politique s'articule autour des piliers suivants :

1. L'Université garantit l'égalité des chances et d'opportunités et quiconque constate ou subit un traitement inégal a le droit de déposer plainte au niveau du vice-Président en charge des Affaires Académiques pour les étudiants et au niveau du Secrétaire Général pour le corps professoral et le personnel administratif et de soutien (ODD 5, 10).
2. Les plaintes peuvent aussi être déposées auprès de l'ombudsman de l'Université.
3. Tout candidat pour un poste de travail à l'Université est traité par la Direction des Ressources Humaines en plus d'une commission de recrutement qui agit en toute transparence et rigueur et assure un traitement équitable pour tous.
4. L'Université s'est fixée comme objectif de :

    a. Atteindre et maintenir la parité genre en nombre femme-homme, en utilisant la discrimination positive en cas d'égalité des profils et des compétences (ODD 5).

    b. Assurer le même salaire pour les mêmes fonctions entre femmes et hommes.

    c. Promouvoir la parité genre en matière d'accès aux hautes fonctions de l'Université.

    d. Inclure un maximum de personnes aux capacités physiques réduites.
    e. Inclure des personnes issues de l'immigration.

This policy embodies UEMF's commitment to integrating social responsibility into all of its missions. It highlights the importance of reconciling academic performance, respect for the environment, and a positive societal impact.

3. Ancrage territorial et implication locale

Être un moteur de développement économique, social et culturel de la Région Fès-Meknès, et plus largement du Maroc, contribuant à l'objectif de réduction de la pauvreté et d'amélioration des infrastructures (ODD 1 et ODD 11).

4. Insertion professionnelle

Soutenir nos lauréats dans leur insertion professionnelle et la création d'entreprises innovantes, favorisant la croissance économique et l'emploi décent (ODD 8).

5. Egalité Femmes-Hommes

Garantir l'égalité entre les sexes en termes de recrutement, inclusion, formation, accès aux postes de responsabilité, et égalité salariale à compétences égales, en conformité avec l'ODD 5 (Égalité des sexes).

6. Protection des groupes vulnérables

Assurer une inclusion et une protection pour les personnes vulnérables (handicapés, femmes, émigrants, demandeurs d'asile), en accord avec les principes d'inclusion sociale et de justice pour tous (ODD 10).

7. Engagement envers la santé

Avec l'émergence du **pôle santé** et le projet de construction d'un **CHU**, l'UEMF s'engage à contribuer activement à l'amélioration de la santé et du bien-être (ODD 3) au niveau régional et national. Le campus intègre également un **complexe sportif aux normes internationales**, promouvant un mode de vie sain parmi les étudiants et la communauté.

This charter formalizes the integration of social responsibility at the heart of the UEMF's missions. It outlines concrete commitments in the areas of ethics, governance, respect for the environment and contribution to sustainable development.

Student events

Health & Solidarity Caravan in Tigrigra – October 2025 - Elite Club

The Elite club organized a multidisciplinary medical caravan in Tigrigra, in the Ifrane-Azrou region, in order to bring healthcare closer to local populations and meet their medical needs.

This initiative mobilized 20 doctors from various specialties, including cardiology, gynecology, urology, ENT, ophthalmology, and dentistry. The beneficiaries were able to access:

- A variety of consultations tailored to each specialty.
- Comprehensive dental care, including extractions, restorative treatments, scaling and the fabrication of dentures,
- Free distribution of medication, for comprehensive and effective care.

This action embodied a true moment of solidarity and humanitarian commitment, strengthening the link between the Elite club and local communities while contributing to the well-being and health of the inhabitants of Tigrigra.

School Health Caravan in Ain Chkef – November 2025 - Elite Club

A school health caravan was organized to improve access to healthcare and raise students' awareness of the importance of health. In the area of dental care, beneficiaries received consultations and treatments, including extractions and cleanings, as well as the distribution of oral hygiene kits containing toothpaste and toothbrushes, to encourage good habits from a young age. The medical component offered general consultations for basic screenings, as well as ophthalmological consultations to assess students' visual health. This caravan was a vital preventive and educational initiative, contributing to children's well-being and promoting a culture of health in schools.

Health & Solidarity Caravan – Initiative of the Elite Club in Sais

Club Elite organized a multidisciplinary medical caravan, bringing together several specialties to offer comprehensive and free care to local communities. This initiative took place on November 16th and mobilized 20 dedicated volunteers. Medical services offered: We set up several specialized booths including general medicine for basic consultations, pediatrics for children's checkups, gynecology for women's health, dermatology, ophthalmology, and dental care. Paramedical examinations (blood pressure, blood sugar, wound dressings) were also provided by our teams of medical and nursing students. Awareness and prevention: Beyond providing care, we conducted awareness workshops on hygiene, disease prevention, and good health practices, reaching the entire community. Impact: This caravan allowed us to treat several beneficiaries in a single day, identify several cases requiring medical follow-up, and, most importantly, establish a close connection with a population often far removed from healthcare facilities.

CaravanMedical and Dental Care in Tamedit: A Commitment to Solidarity in Service of Rural Communities

A multidisciplinary medical caravan was organized in Tamedit, in the Taounate region, to strengthen access to care for local populations and to meet the health needs of rural communities.

This initiative mobilized several medical specialties, allowing beneficiaries to access tailored consultations in various healthcare fields. Dental care played a central role, with consultations, extractions, restorative treatments, scaling, and the fitting of dental prostheses provided, ensuring comprehensive and high-quality treatment.

Furthermore, the pharmacy service provided free dispensing of prescribed medications, contributing to appropriate therapeutic monitoring and the improvement of patients' health.

Through this high-impact social action, the club reaffirms its commitment to health equity, the well-being of rural populations and the promotion of sustainable solidarity.

School Health Caravan in Aïn Chkef: Prevention and Well-being of Students by the Elite Club

On December 20, 2025, the Elite Club organized a school health caravan in Aïn Chkef, in the Moulay Yaacoub region, aimed at promoting prevention and the well-being of students.

The dental component offered consultations, preventive care and awareness campaigns, in order to instill good oral hygiene habits and prevent dental diseases from a young age.

In parallel, general medical consultations were conducted to assess the overall health of the students, while the ophthalmology department ensured the screening of visual disorders, guaranteeing comprehensive and preventive care.

This initiative by the Elite Club constitutes an essential educational and preventive action, strengthening the culture of health in schools and contributing significantly to the well-being and protection of students.

Solidarity Iftar: Student solidarity and engagement during Ramadan - Rotaract Club

As part of their social and community service activities, the Rotaract Club UEMF organized a humanitarian effort to distribute Ramadan iftar meals to the most vulnerable members of the community. Driven by the students' commitment and spirit of solidarity, this initiative resulted in the distribution of over 250 meals, providing moments of sharing, generosity, and fellowship during the holy month. Beyond simply distributing food, the action exemplifies the values of social responsibility, mutual support, and cohesion that motivate the student community, while also raising awareness among young people about social issues and the importance of taking action for the well-being of those living in precarious situations.

Solidarity Iftar – Ramadan 2026

As part of its Ramadan activities, Club Élite organized the "Solidarity Iftar – Ramadan 2026" initiative, aimed at promoting the values of solidarity, sharing, and civic engagement. This initiative involved preparing and distributing 150 iftar meals to people in need.

Made possible through the active mobilization of club members and the involvement of its partners, this initiative provided concrete support to beneficiaries, while strengthening the spirit of mutual aid and social cohesion, particularly significant during the holy month of Ramadan.

Beyond its humanitarian aspect, this action fully illustrates the Elite Club's identity as a committed actor, working towards a positive and lasting social impact. It also demonstrates the club's ability to initiate and lead solidarity projects with strong human value, responding to the needs of communities.

Tazouta Medical-Humanitarian Caravan – Sefrou Province

On March 8, 2026, the Elite Club of the Euromed University of Fez organized a mobile medical and dental outreach program in Tazouta, in the province of Sefrou, to benefit the local population. This humanitarian and healthcare initiative involved 15 doctors and 5 dentists, all working together towards a common goal: bringing healthcare closer to the inhabitants of rural areas and improving access to specialist consultations.

The mobile clinic provided medical consultations in several specialties, including gynecology (with ultrasound examinations), cardiology, gastroenterology, rheumatology, and dental care and consultations. Thanks to the commitment of healthcare professionals, student volunteers, and mobilized partners, this initiative helped meet the medical needs of many beneficiaries in a spirit of solidarity, prevention, and social support.

School Health Caravan – Ben Khlif School Group, Ouled Mimoun 11/04

On April 11, 2026, Club Élite organized the "School Health Caravan – Ben Khlif School Group, Ouled Mimoun," as part of its community health and school-based prevention initiatives. This initiative aimed to promote the health and well-being of students while reinforcing preventative practices from a young age.

During the day, students received general medical consultations, dental care and procedures, as well as visual acuity tests. Oral health prevention workshops were also held, along with the distribution of toothbrushes and toothpaste, to raise children's awareness of good dental hygiene practices.

This initiative fully illustrates the Elite Club's commitment to youth health and prevention, while demonstrating its ability to organize comprehensive and structured interventions to serve school communities. It also reflects the club's spirit of solidarity and social responsibility towards children and their educational environment.

Source: Elite UEMF club report 25-26

Blood Donation Campaign – April 2 & 3, 2026

As part of its civic and solidarity actions, the Elite Club organized the "Blood Donation Campaign - April 2 & 3, 2026", an initiative aimed at raising awareness of the importance of blood donation and actively contributing to strengthening national reserves.

Over these two days, club members mobilized to encourage student and staff participation, while also ensuring logistical organization and providing optimal support to donors. This campaign resulted in a significant number of donations, contributing to saving lives and meeting the urgent needs of healthcare facilities.

Beyond its health impact, this initiative also provided a powerful moment for raising awareness and fostering solidarity, strengthening the spirit of commitment and social responsibility within the university community. It fully reflects the values of the Elite Club, founded on mutual support, volunteerism, and positive impact in service to society.

School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi 18/04

On April 18, 2026, the Elite Club organized the "School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi," as part of its health and prevention initiatives for students. This action aimed to promote well-being and health prevention within the school environment.

During the day, students were able to receive general medical consultations, dental care and procedures, as well as visual acuity tests. In addition, oral hygiene workshops were held, along with the distribution of toothbrushes and toothpaste, to raise awareness among young people about the importance of hygiene and preventative care.

This intervention illustrates the Elite Club's commitment to improving student health and strengthening prevention from a young age, while demonstrating its ability to deploy comprehensive and structured health caravans, meeting the needs of local school communities.

Source: Elite UEMF club report 25-26

Mobile Medical and Dental Clinic in Ksar Jdid 26/04

On April 26, 2026, the Elite Club of the Euromed University of Fez organized a medical-dental caravan in Ksar Jdid, in the province of Rissani, as part of its humanitarian and social actions aimed at strengthening access to care in rural and remote areas.

This initiative mobilized a team of healthcare professionals and volunteers to provide multidisciplinary medical consultations to local residents. The services offered covered several specialties, including cardiology, gastroenterology, gynecology, dermatology, and ophthalmology, in addition to dental consultations and care, as well as general medicine.

The caravan aimed to bring health services closer to local populations, promote early detection, and raise awareness of the importance of prevention and medical follow-up. It thus enabled comprehensive and accessible healthcare for beneficiaries.

Through this action, the Elite Club reaffirms its commitment to solidarity, health promotion and social development in service of vulnerable communities.

Source: Elite UEMF club report 25-26

Humanitarian caravan in Ksar Jdid: 150 blankets to support rural families

On May 3, 2026, the Elite Club of the Euromed University of Fez organized a humanitarian caravan to Ksar Jdid, in the province of Rissani, as part of its solidarity actions aimed at supporting rural populations and improving their living conditions.

This initiative is part of a local humanitarian approach, driven by values of mutual aid, solidarity, and social commitment. It enabled the distribution of 150 blankets to beneficiary families, helping them cope with the weather and meet their basic daily needs, particularly during cold periods.

Beyond the material aid, this caravan provided a powerful moment of sharing and connection with the residents, strengthening the bonds between the volunteers and the local population. This initiative reflects the Elite Club's commitment to providing concrete solutions to the needs of vulnerable communities and contributing to the improvement of their living conditions.

Through this type of initiative, the Elite Club confirms its long-term commitment to humanitarian action, social development and territorial solidarity.

Source: Elite UEMF club report 25-26

A social and educational day for the benefit of the children of the Lalla Amina Center

On Thursday, May 7, 2026, the Elite Club of the Euromed University of Fez, in collaboration with the Directorate of Student Affairs, participated in the organization of a cultural and sporting day for the benefit of the children of the Lalla Amina Center for the Protection of Children.

This solidarity initiative was marked by the distribution of Elite bags containing school supplies, including pencil cases, pens, notebooks and coloring books, in order to support and encourage children in their educational journey.

During the day, the Elite Club also ran an oral hygiene awareness workshop, along with the distribution of toothbrushes and toothpaste. The workshop aimed to educate children about the importance of brushing their teeth and good hygiene practices to maintain their oral health.

Through this social and educational action, the Elite Club reaffirms its commitment to children, education and the promotion of health.

Source: Elite UEMF club report 25-26

Mobile dental clinic in Izlafene: strengthening access to care and prevention

On May 9, 2026, the Elite Club of the Euromed University of Fez, in partnership with the IAA Club of the Faculty of Sciences and Techniques of Fez, organized a medical and dental caravan in Izlafene, in the province of Taza, as part of its community health and prevention initiatives. This initiative provided medical consultations in general medicine, cardiology, and gynecology, along with the dispensing of medication to diagnosed patients. A significant oral health prevention component was also implemented through awareness campaigns and the distribution of 400 toothbrushes and toothpaste to beneficiaries. Through this initiative, the two clubs helped bring healthcare services closer to rural populations while reinforcing awareness of the importance of prevention and medical follow-up.

Source: Elite UEMF club report 25-26

Humanitarian action in Izlafene: solidarity and support for rural families

As part of the medical and humanitarian caravan organized on May 9, 2026, in Izlafene, the Elite Club of the Euromed University of Fez and the IAA Club of the Faculty of Sciences and Techniques of Fez also carried out a significant humanitarian effort to benefit families in the region. This act of solidarity enabled the distribution of 150 food baskets to beneficiary families, supporting vulnerable populations and contributing to the improvement of their living conditions. In addition, recreational and entertainment activities were organized for children, creating a moment of sharing, joy, and connection with the local community. This initiative reflects the values of mutual aid, solidarity, and civic engagement upheld by both clubs in support of social and human development.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

Aware of the importance of combating hunger and food insecurity, the Euromed University of Fez is actively committed to SDG 2 through structured institutional initiatives and solidarity actions led by its university community. Through educational projects, partnerships, and awareness campaigns, as well as the remarkable involvement of its student clubs in food aid campaigns and support for vulnerable populations, UEMF contributes to promoting solidarity, human dignity, and equitable access to sufficient and sustainable food.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

E-SDG

As part of its commitment to SDG 2 – Zero Hunger, UEMF integrates nutrition, dietetics, and health issues into its educational offerings. Through its Dietetics-Nutrition program and various Bachelor's-Master's-Doctorate (LMD) pathways, the University contributes to skills development and the training of qualified professionals in the fields of nutrition, health, and prevention.

FACULTY OF NURSING AND HEALTH TECHNOLOGY

1. Sectors:

- MULTI-SKILLED NURSE
- Anesthesia and Resuscitation Nurse
- SPEECH THERAPIST
- PSYCHOMOTOR TRACKER
- DIETETICS - NUTRITION
- LABORATORY TECHNIQUES
- RADIOLOGY TECHNIQUES

2. LMD pathway:

- BACHELOR'S DEGREE PROGRAM:

3-year cycle, practical work in laboratory, rehabilitation rooms, simulation center, internships in health centers, hospitals, clinics and specialized centers.

- MASTER'S PROGRAM:

Advanced training accessible to licensed students. Two-year program divided into four semesters.

- DOCTORAL PROGRAM:

A 3-year program focused on scientific research in the fields of nursing, rehabilitation care, health techniques and nutrition.

Research, Innovation & Entrepreneurship

Research topics - Doctoral cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 2 has been identified. This work focuses in particular on food security, smart agriculture, crop health, agricultural biotechnologies, agri-food quality, and the sustainable use of resources.

The table below presents the main research topics contributing to this objective.

Thesis Subject	related SDGs
Computer Vision for Smart Farming and Agriculture Practices	SDG 2
Design and Pilot Scale Yeast-Based Production of Bluetongue Virus Capsid Particles as An Alternative to Live Attenuated Virus Vaccine	SDG 2
Green Production: Leveraging Bio-Based Polymers for Developing Thin-Film Composite Forward Osmosis Membranes for Fertigation	SDG 2
High-field Nuclear Magnetic Resonance (NMR) Spectroscopy for Quality Control: Development of New Analytical Methods in Agri-Food Using NMR	SDG 2
Self-Supervised and Semi-Supervised AI Framework for Almond Disease Detection Under Limited Annotation and Agriculture Practices	SDG 2

3e and last Tech4Farmers Bootcamp of the 2e Cohort

From September 23 to 25, 2025, the Euromed University of Fez, via the Euromed Innovation Center, hosted the third and final bootcamp of the Tech4Farmers – Tamkin LiTanmia program, intended for AgriTech project leaders of the second cohort.

Organised as part of the programme funded by the AFD, this bootcamp focused on business maturation, pitching and preparation for fundraising, through workshops, mentoring and exchanges with experts.

It marks the end of the incubation cycle and confirms UEMF's commitment to innovation and impact entrepreneurship in the service of sustainable agriculture in the Fes-Meknes region.

Tech4Farmers Demo Day: closing of the second cohort

Organised by the Euromed Innovation Centre, the AgriTech Demo Day marked the closing of the second cohort of the Tech4Farmers programme, after 12 months of incubation of innovative startups within the framework of the AgriTech Regional Innovation and Entrepreneurship Hub.

The event allowed project leaders to present their solutions to an ecosystem composed of investors, institutional investors, researchers and agricultural professionals, fostering concrete opportunities for collaboration and deployment.

With the participation of partners such as the French Development Agency and major players in the sector, this initiative illustrates the commitment of the Euromed University of Fez to sustainable agricultural innovation with environmental impact..

From Fes-Meknes to Berlin: our AgriTech startups meet international markets.

From Fes-Meknes to Berlin: our AgriTech startups meet international markets.

From February 4 to 6, as part of the Tech4Farmers incubation program of the Euromed innovation center (EIC), the Euromed University of Fez accompanied six partner startups to the international trade fair FRUIT LOGISTICA 2026 in Berlin, one of the world's largest events dedicated to the fruit and vegetable sector.

A true strategic space for exchanges and opportunities, this event allowed startups to present their innovative solutions, meet international buyers, exchange with manufacturers and better understand the dynamics of a constantly evolving global market.

Objectives achieved: qualified connections, concrete business opportunities, and enhanced visibility for Moroccan AgriTech on a demanding international stage. The teams were thus able to generate their first international leads, engage in advanced discussions with European distributors, and consolidate their positioning with key players in the sector.

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF.Euromed innovation center (EIC)organized, in partnership withTAMWILCOMvia the InnovInvest Fund and BlueSpace (Bank of Africa), on April 16 and 17, the Hack'Days of the Fes-Meknes region, bringing together students, project leaders and young entrepreneurs around an intensive bootcamp dedicated to the creation and development of innovative solutions.

As part of a dynamic of supporting high-potential talent, this program aims to support the emergence of projects in strategic sectors such as digital, health, agritech, cybersecurity, greentech, fintech or edtech, thus contributing to the development of the regional entrepreneurial ecosystem.

Over the course of two days, participants were supported in structuring their ideas, designing concrete solutions and preparing their projects, in an environment conducive to experimentation, collaboration and collective intelligence.

A true space for learning and co-creation, this event allowed each team to develop their project, benefiting from constructive feedback, dedicated mentoring and guidance that fosters the maturation of entrepreneurial initiatives.

The Hack'Days concluded with pitch sessions, offering participants the opportunity to present their projects, compare their ideas and reveal their full potential, in a dynamic focused on innovation and impact.

We extend our sincere congratulations to all participants for their commitment, creativity, and entrepreneurial spirit. This initiative confirms the role of the UEMF, through the Euromed Innovation Center, as a key player in structuring and supporting innovation at the regional and national levels.

Participation in SIAM: promoting innovative initiatives in AgriTech

At the heart of agricultural innovation and AgriTech entrepreneurship in Morocco 🌱,

The Euromed University of Fez, through its Euromed Innovation Center (EIC), is participating in the 18th e SIAM edition with the Tech4Farmers – Tamkin Li Tanmia program, supported by the French Development Agency and deployed within the framework of the PRIE Fès-Meknès.

The program highlights several innovative startups (OBENS, Wasit, BOVICLOUDS, ARWA Solutions, Jodoor, DeepLeaf, Green Innovation, PCS AGRI) illustrating the potential of technology in the service of sustainable and efficient agriculture.

The stand was visited by several personalities, including the President of the Euromed University of Fez and the Director of the AFD, as well as the participation of institutional partners during the closing ceremony of the program, marking a strong moment of highlighting the results and collaborations.

This initiative brings together many key players in the agricultural and digital ecosystem in Morocco and confirms the role of the university as a driver of innovation and entrepreneurship serving the territories.

AgreenTech Bootcamp2026: Immersion in the heart ofinnovationagriculture at the UEMF

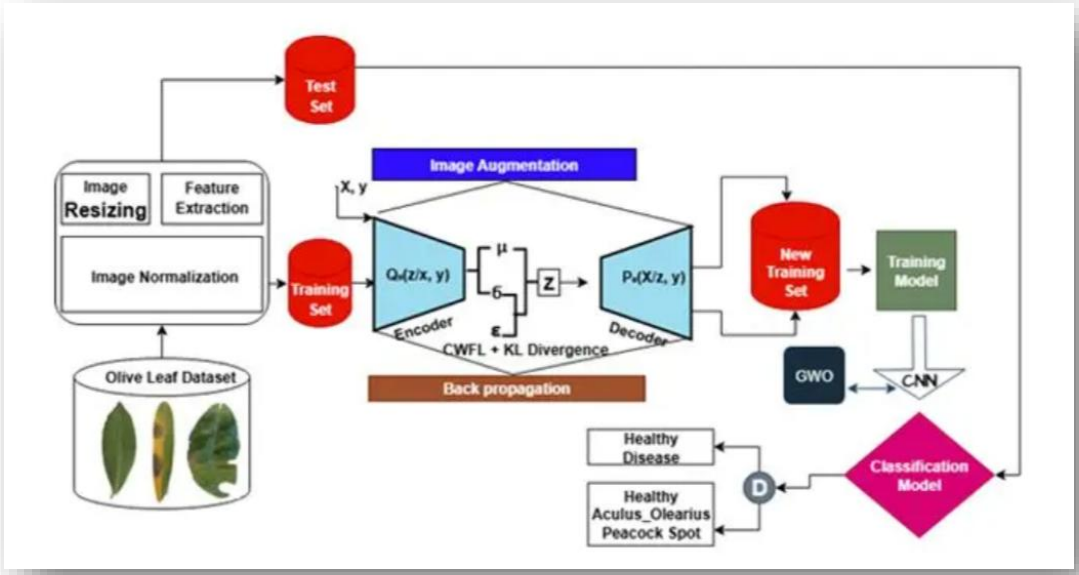

As part of its commitment to innovation, entrepreneurship, and sustainable development, the Euromed Innovation Center (EIC) of the UEMF hosted the AgreenTech 2026 Bootcamp, organized in partnership with Tamwilcom and Bank of Africa. This initiative brought together innovative project leaders to develop solutions aimed at modernizing and transforming Moroccan agriculture.

Over two days, participants worked on structuring their projects, developing business models, and creating technological solutions to address agricultural challenges, including water management, precision agriculture, digitalization, and climate change adaptation. The projects utilized technologies such as artificial intelligence, IoT, computer vision, LoRa, and solar energy.

The Bootcamp thus constitutes an important step towards the prototyping and deployment of solutions with economic, social and environmental impact, strengthening the role of the UEMF in innovation and the sustainable transition of the agricultural sector in Morocco.

Doctoral activities

Doctoral Thesis Defense in Artificial Intelligence by Mr. Kaloma Usman MAJIKUMNA

This research investigates the impact of climate change, particularly drought stress, on olive tree cultivation in the Mediterranean region. It integrates artificial intelligence, satellite remote sensing, deep learning, and field experimentation to enhance plant survival and disease management.

Sentinel-2 satellite imagery (2018–2023) combined with machine learning techniques revealed significant changes in olive cultivation areas closely linked to rainfall variability. A novel deep learning model (FLVAEGWO-CNN) achieves high accuracy in olive disease detection, including minority classes, offering an effective tool for precision agriculture.

Field experiments demonstrated that the Languedoc variety showed the highest drought resilience, and optimized deficit irrigation strategies significantly improved yield performance. Overall, the study provides practical and scalable solutions for sustainable olive cultivation and climate risk mitigation in drought-prone regions.

Student events

Solidarity Iftar: Student solidarity and engagement during Ramadan - Rotaract Club

As part of their social and community service activities, the Rotaract Club UEMF organized a humanitarian effort to distribute Ramadan iftar meals to the most vulnerable members of the community. Driven by the students' commitment and spirit of solidarity, this initiative resulted in the distribution of over 250 meals, providing moments of sharing, generosity, and fellowship during the holy month. Beyond simply distributing food, the action exemplifies the values of social responsibility, mutual support, and cohesion that motivate the student community, while also raising awareness among young people about social issues and the importance of taking action for the well-being of those living in precarious situations.

Solidarity Iftar – Ramadan 2026

As part of its Ramadan activities, Club Élite organized the "Solidarity Iftar – Ramadan 2026" initiative, aimed at promoting the values of solidarity, sharing, and civic engagement. This initiative involved preparing and distributing 150 iftar meals to people in need.

Made possible through the active mobilization of club members and the involvement of its partners, this initiative provided concrete support to beneficiaries, while strengthening the spirit of mutual aid and social cohesion, particularly significant during the holy month of Ramadan.

Beyond its humanitarian aspect, this action fully illustrates the Elite Club's identity as a committed actor, working towards a positive and lasting social impact. It also demonstrates the club's ability to initiate and lead solidarity projects with strong human value, responding to the needs of communities.

Humanitarian caravan in Ksar Jdid: 150 blankets to support rural families

On May 3, 2026, the Elite Club of the Euromed University of Fez organized a humanitarian caravan to Ksar Jdid, in the province of Rissani, as part of its solidarity actions aimed at supporting rural populations and improving their living conditions.

This initiative is part of a local humanitarian approach, driven by values of mutual aid, solidarity, and social commitment. It enabled the distribution of 150 blankets to beneficiary families, helping them cope with the weather and meet their basic daily needs, particularly during cold periods.

Beyond the material aid, this caravan provided a powerful moment of sharing and connection with the residents, strengthening the bonds between the volunteers and the local population. This initiative reflects the Elite Club's commitment to providing concrete solutions to the needs of vulnerable communities and contributing to the improvement of their living conditions.

Through this type of initiative, the Elite Club confirms its long-term commitment to humanitarian action, social development and territorial solidarity.

Humanitarian action in Izlafene: solidarity and support for rural families

As part of the medical and humanitarian caravan organized on May 9, 2026, in Izlafene, the Elite Club of the Euromed University of Fez and the IAA Club of the Faculty of Sciences and Techniques of Fez also carried out a significant humanitarian effort to benefit families in the region. This act of solidarity enabled the distribution of 150 food baskets to beneficiary families, supporting vulnerable populations and contributing to the improvement of their living conditions. In addition, recreational and entertainment activities were organized for children, creating a moment of sharing, joy, and connection with the local community. This initiative reflects the values of mutual aid, solidarity, and civic engagement upheld by both clubs in support of social and human development.

Partnership

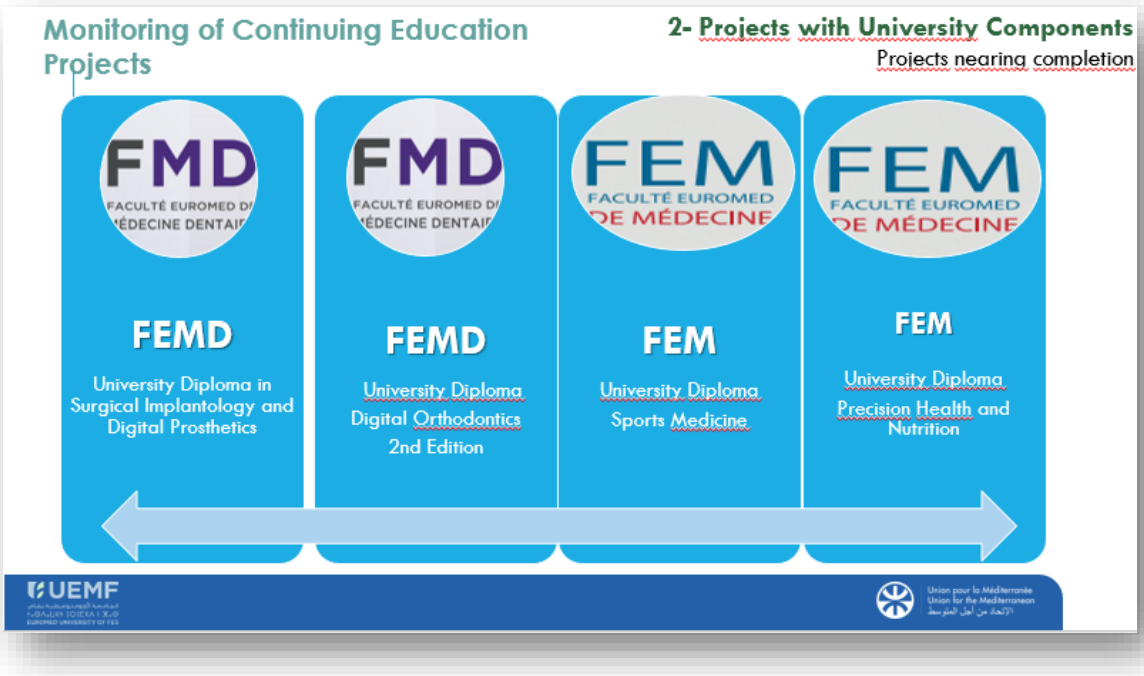

Agreement with Agritech – Training and Professional Integration

The UEMF (Union of Moroccan Farmers) has developed a partnership agreement with Agritech for a training and professional integration project in the agricultural sector. The UEMF provides support through two main areas: firstly, by proposing a structured rationale for the training and professional integration project; and secondly, by designing an organizational framework to ensure the project's effective implementation. This initiative is part of the digital transformation of the Moroccan agricultural sector and aims to train qualified professionals capable of meeting the sector's growing need for technological skills applied to agriculture.

University Diploma in Precision Health and Nutrition – FEM

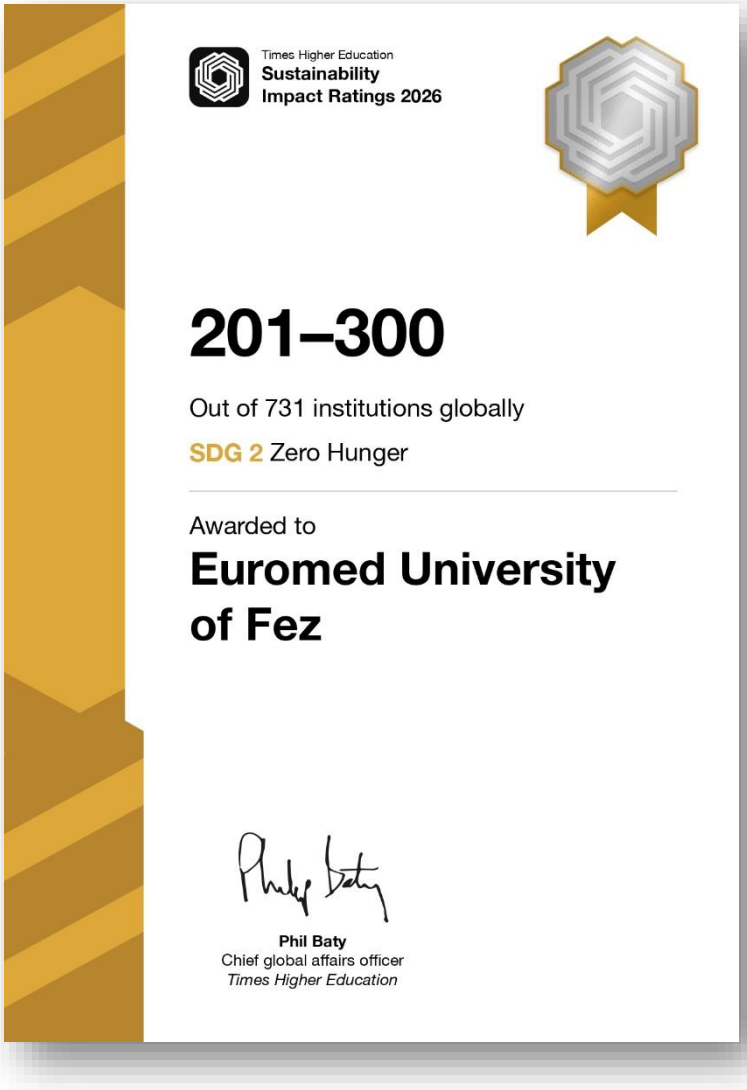

The Euromed Faculty of Medicine (FEM) is finalizing a University Diploma in Precision Health and Nutrition, an innovative program at the intersection of precision medicine, genomics, and nutritional science. This cutting-edge continuing education program aims to train healthcare professionals capable of integrating personalized precision medicine approaches into clinical and nutritional practice, thus addressing recent advances in personalized medicine and the growing importance of prevention through diet.

Awards and Distinctions

UEMF's performance in THE Impact Ratings 2026 – SDG 2

In the THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 201–300 range out of 731 institutions for SDG 2: Zero Hunger. This performance highlights its contributions to food security, nutrition, sustainable agriculture, and the development of innovative solutions in the agri-food sector.

2026 : The Euromed University of Fez consolidates its impact in support of the SDGs

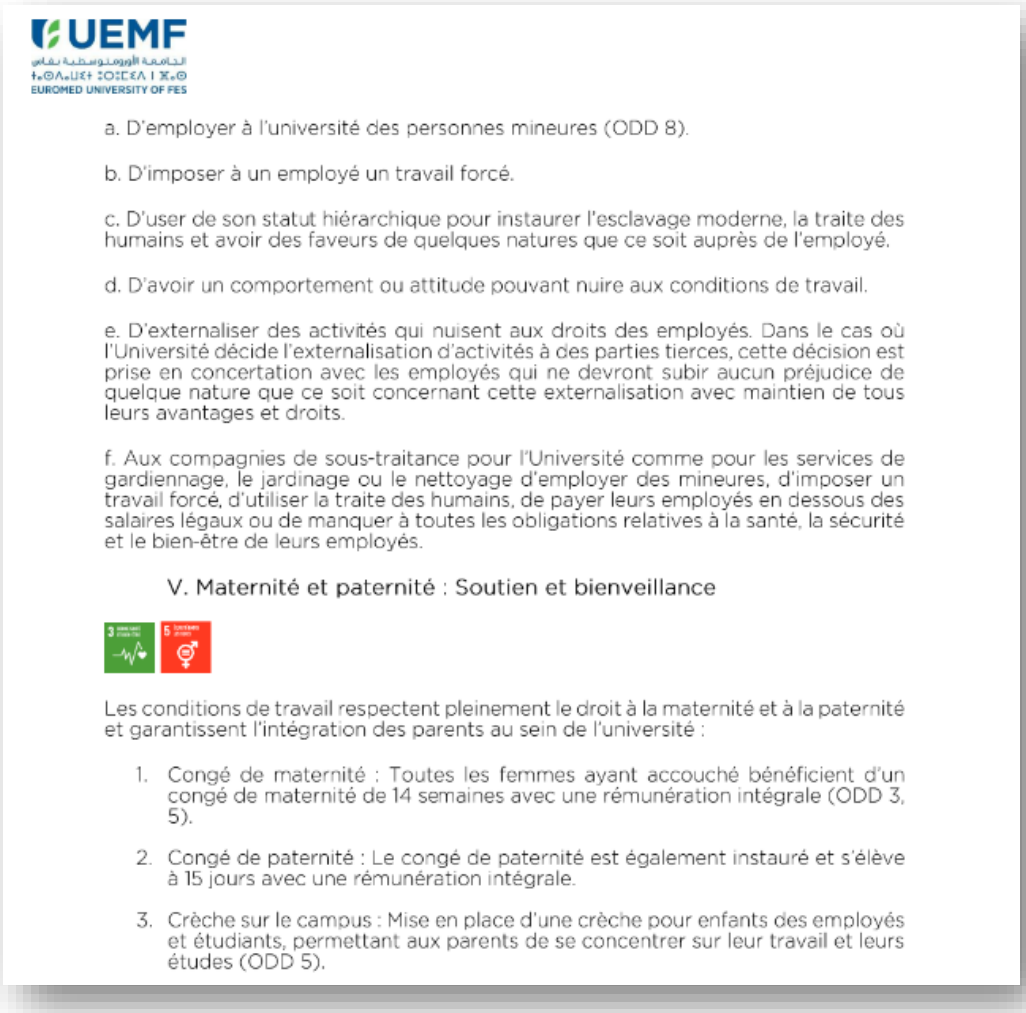

Introduction :

The Euromed University of Fez is actively committed to the health and well-being of its students, staff, and wider community. Through educational projects and awareness campaigns, regular blood drives within the University, and the organization of humanitarian caravans throughout Morocco—including dental, medical, and community healthcare initiatives—UEMF and its student clubs implement concrete and supportive actions. These actions reflect the University's institutional commitment to promoting an inclusive, preventative, and sustainable health culture, while strengthening solidarity and the social impact of its activities.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

As part of its commitment to sustainable development, the Euromed University of Fez pays particular attention to promoting the health and well-being of its university community. Recognizing the importance of a healthy environment for academic and professional success, the university integrates responsible practices aimed at preventing health risks and improving the quality of life on its campus. This approach is based on structuring policies, particularly in the areas of social and societal responsibility, waste management, and responsible procurement. These measures help to limit environmental impacts that could affect human health. Furthermore, the Euromed University of Fez strives to promote responsible behavior and raise awareness among its users about good hygiene and health practices. Integrating these policies into its governance helps create a balanced and sustainable living environment. Thus, the university actively contributes to achieving SDG 3 by fostering an environment conducive to physical and mental well-being.

UEMF
EUROMED UNIVERSITY OF FES

a. D'employer à l'université des personnes mineures (ODD 8).

b. D'imposer à un employé un travail forcé.

c. D'user de son statut hiérarchique pour instaurer l'esclavage moderne, la traite des humains et avoir des faveurs de quelques natures que ce soit auprès de l'employé.

d. D'avoir un comportement ou attitude pouvant nuire aux conditions de travail.

e. D'externaliser des activités qui nuisent aux droits des employés. Dans le cas où l'Université décide l'externalisation d'activités à des parties tierces, cette décision est prise en concertation avec les employés qui ne devront subir aucun préjudice de quelque nature que ce soit concernant cette externalisation avec maintien de tous leurs avantages et droits.

f. Aux compagnies de sous-traitance pour l'Université comme pour les services de gardiennage, le jardinage ou le nettoyage d'employer des mineures, d'imposer un travail forcé, d'utiliser la traite des humains, de payer leurs employés en dessous des salaires légaux ou de manquer à toutes les obligations relatives à la santé, la sécurité et le bien-être de leurs employés.

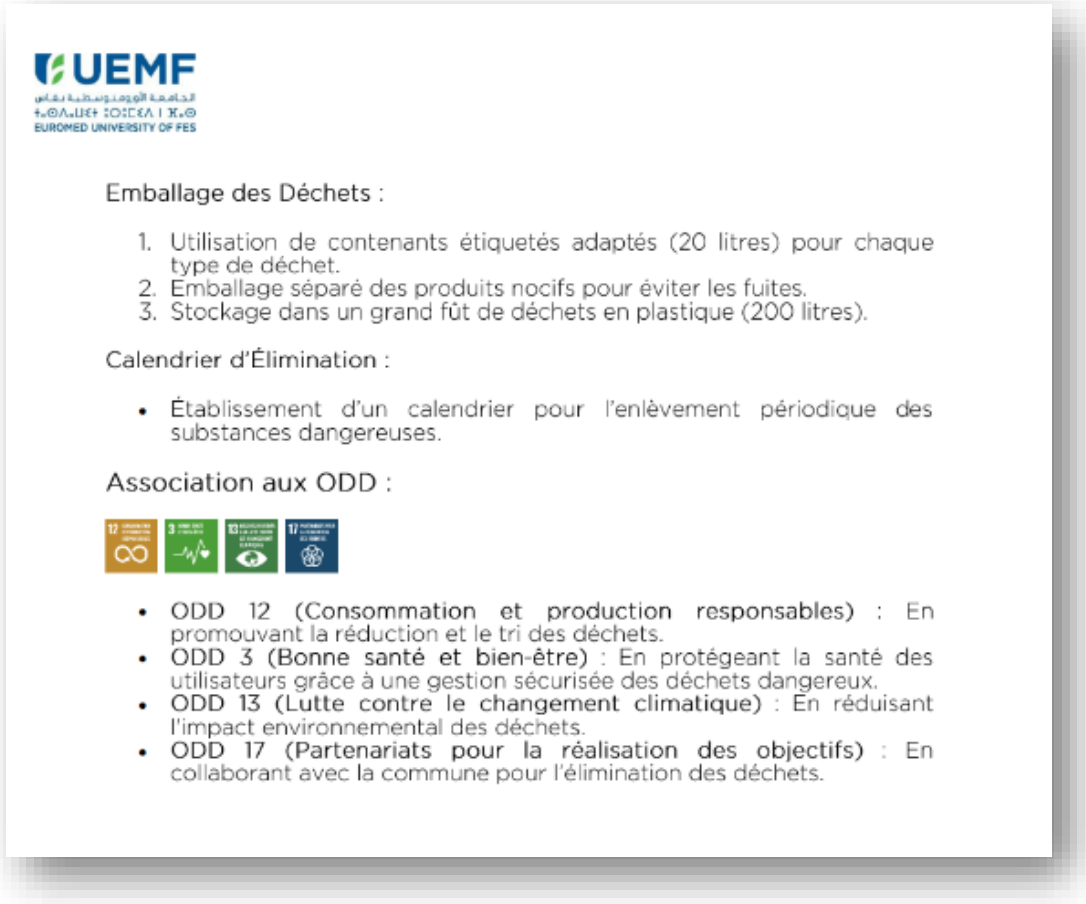

V. Maternité et paternité : Soutien et bienveillance

Les conditions de travail respectent pleinement le droit à la maternité et à la paternité et garantissent l'intégration des parents au sein de l'université :

1. Congé de maternité : Toutes les femmes ayant accouché bénéficient d'un congé de maternité de 14 semaines avec une rémunération intégrale (ODD 3, 5).
2. Congé de paternité : Le congé de paternité est également instauré et s'élève à 15 jours avec une rémunération intégrale.
3. Crèche sur le campus : Mise en place d'une crèche pour enfants des employés et étudiants, permettant aux parents de se concentrer sur leur travail et leurs études (ODD 5).

This policy embodies UEMF's commitment to integrating social responsibility into all of its missions. It highlights the importance of reconciling academic performance, respect for the environment, and a positive societal impact.

Waste management policy

UEMF
EUROMED UNIVERSITY OF FES

Emballage des Déchets :

1. Utilisation de contenants étiquetés adaptés (20 litres) pour chaque type de déchet.
2. Emballage séparé des produits nocifs pour éviter les fuites.
3. Stockage dans un grand fût de déchets en plastique (200 litres).

Calendrier d'Élimination :

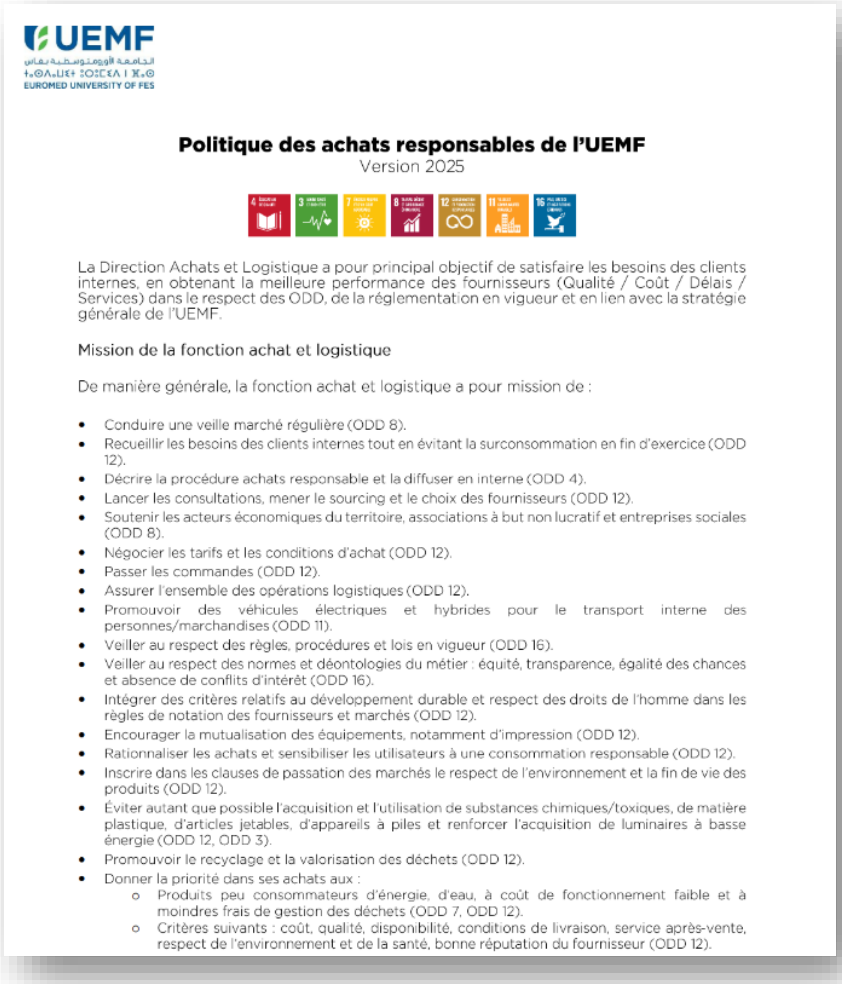

- Établissement d'un calendrier pour l'enlèvement périodique des substances dangereuses.

Association aux ODD :

- ODD 12 (Consommation et production responsables) : En promouvant la réduction et le tri des déchets.
- ODD 3 (Bonne santé et bien-être) : En protégeant la santé des utilisateurs grâce à une gestion sécurisée des déchets dangereux.
- ODD 13 (Lutte contre le changement climatique) : En réduisant l'impact environnemental des déchets.
- ODD 17 (Partenariats pour la réalisation des objectifs) : En collaborant avec la commune pour l'élimination des déchets.

This policy sets out the UEMF's guidelines for sustainable and responsible waste management. It is based on source reduction, selective sorting, recycling and recovery.

UEMF Responsible Procurement Policy (Version 2025)

UEMF
EUROMED UNIVERSITY OF FES

Politique des achats responsables de l'UEMF

Version 2025

La Direction Achats et Logistique a pour principal objectif de satisfaire les besoins des clients internes, en obtenant la meilleure performance des fournisseurs (Qualité / Coût / Délais / Services) dans le respect des ODD, de la réglementation en vigueur et en lien avec la stratégie générale de l'UEMF.

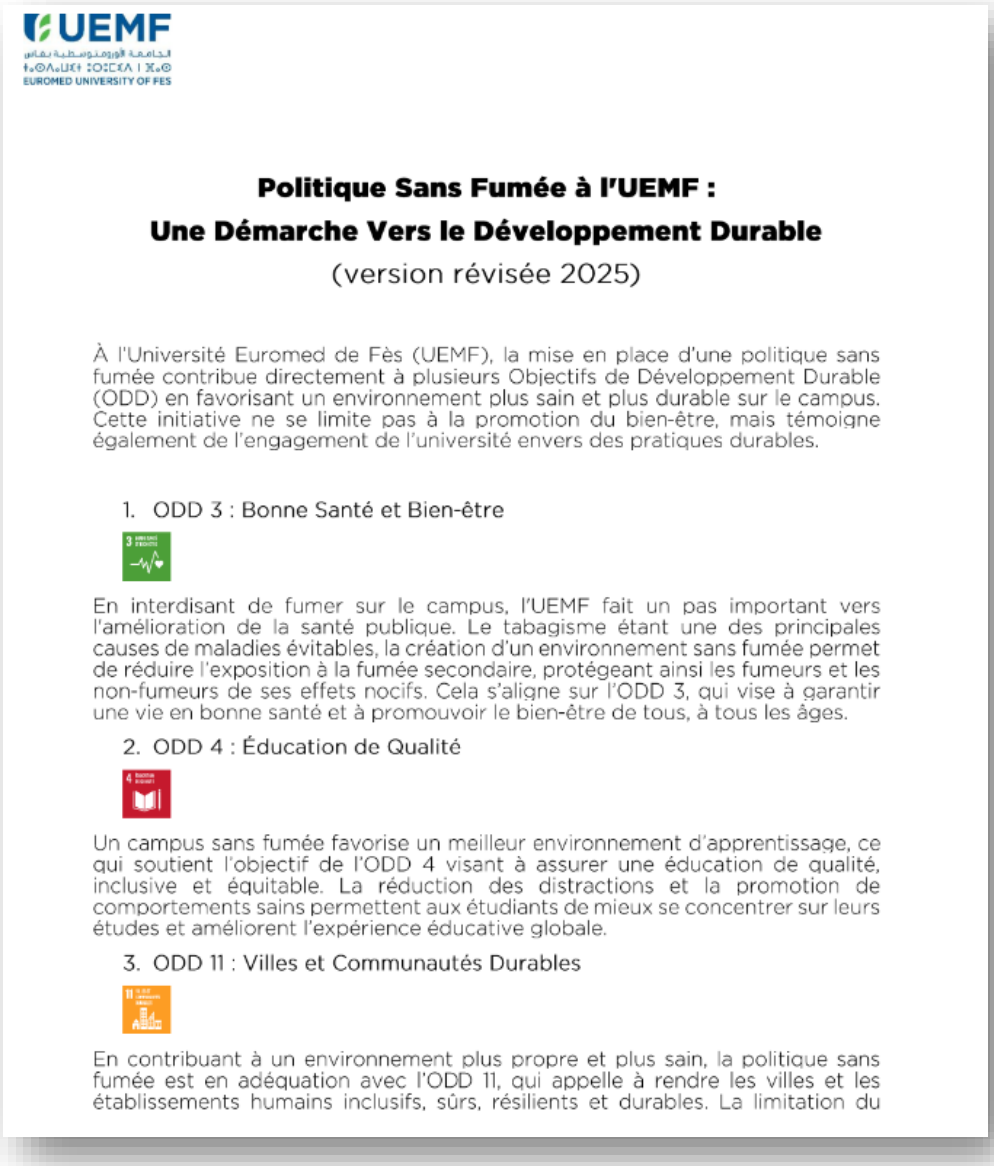

Mission de la fonction achat et logistique

De manière générale, la fonction achat et logistique a pour mission de :

- Conduire une veille marché régulière (ODD 8).
- Recueillir les besoins des clients internes tout en évitant la surconsommation en fin d'exercice (ODD 12).
- Décrire la procédure achats responsable et la diffuser en interne (ODD 4).
- Lancer les consultations, mener le sourcing et le choix des fournisseurs (ODD 12).
- Soutenir les acteurs économiques du territoire, associations à but non lucratif et entreprises sociales (ODD 8).
- Négocier les tarifs et les conditions d'achat (ODD 12).
- Passer les commandes (ODD 12).
- Assurer l'ensemble des opérations logistiques (ODD 12).
- Promouvoir des véhicules électriques et hybrides pour le transport interne des personnes/marchandises (ODD 11).
- Veiller au respect des règles, procédures et lois en vigueur (ODD 16).
- Veiller au respect des normes et déontologies du métier : équité, transparence, égalité des chances et absence de conflits d'intérêt (ODD 16).
- Intégrer des critères relatifs au développement durable et respect des droits de l'homme dans les règles de notation des fournisseurs et marchés (ODD 12).
- Encourager la mutualisation des équipements, notamment d'impression (ODD 12).
- Rationnaliser les achats et sensibiliser les utilisateurs à une consommation responsable (ODD 12).
- Inscrire dans les clauses de passation des marchés le respect de l'environnement et la fin de vie des produits (ODD 12).
- Éviter autant que possible l'acquisition et l'utilisation de substances chimiques/toxiques, de matière plastique, d'articles jetables, d'appareils à piles et renforcer l'acquisition de luminaires à basse énergie (ODD 12, ODD 3).
- Promouvoir le recyclage et la valorisation des déchets (ODD 12).
- Donner la priorité dans ses achats aux :
  - Produits peu consommateurs d'énergie, d'eau, à coût de fonctionnement faible et à moindres frais de gestion des déchets (ODD 7, ODD 12).
  - Critères suivants : coût, qualité, disponibilité, conditions de livraison, service après-vente, respect de l'environnement et de la santé, bonne réputation du fournisseur (ODD 12).

With this policy, the UEMF is establishing a framework for ethical and sustainable procurement. It encourages the selection of suppliers who share values of transparency, social and environmental responsibility.

Smoke-free policy (Revised version 2025)

UEMF

الجامعة الأورومتوسطية بفاس

EUROMED UNIVERSITY OF FES

Politique Sans Fumée à l'UEMF :

Une Démarche Vers le Développement Durable

(version révisée 2025)

À l'Université Euromed de Fès (UEMF), la mise en place d'une politique sans fumée contribue directement à plusieurs Objectifs de Développement Durable (ODD) en favorisant un environnement plus sain et plus durable sur le campus. Cette initiative ne se limite pas à la promotion du bien-être, mais témoigne également de l'engagement de l'université envers des pratiques durables.

1. ODD 3 : Bonne Santé et Bien-être

En interdisant de fumer sur le campus, l'UEMF fait un pas important vers l'amélioration de la santé publique. Le tabagisme étant une des principales causes de maladies évitables, la création d'un environnement sans fumée permet de réduire l'exposition à la fumée secondaire, protégeant ainsi les fumeurs et les non-fumeurs de ses effets nocifs. Cela s'aligne sur l'ODD 3, qui vise à garantir une vie en bonne santé et à promouvoir le bien-être de tous, à tous les âges.

2. ODD 4 : Éducation de Qualité

Un campus sans fumée favorise un meilleur environnement d'apprentissage, ce qui soutient l'objectif de l'ODD 4 visant à assurer une éducation de qualité, inclusive et équitable. La réduction des distractions et la promotion de comportements sains permettent aux étudiants de mieux se concentrer sur leurs études et améliorent l'expérience éducative globale.

3. ODD 11 : Villes et Communautés Durables

En contribuant à un environnement plus propre et plus sain, la politique sans fumée est en adéquation avec l'ODD 11, qui appelle à rendre les villes et les établissements humains inclusifs, sûrs, résilients et durables. La limitation du

UEMF is committed to preserving the health and well-being of its community by implementing a smoke-free policy on its campus. This initiative promotes a healthy environment conducive to learning and community life.

E-SDG

The UEMF integrates SDG 3 – Good Health and Well-being – into the heart of its educational offerings, mobilizing several institutions and disciplines around the challenges of health, prevention, and medical innovation. From medicine, dentistry, and pharmacy to nursing and biomedical engineering, this approach is strengthened by the contributions of artificial intelligence, robotics, and data analytics, particularly for developing technological solutions to serve healthcare.

This diversity of training reflects an interdisciplinary approach to health education, where medical, scientific, technological and digital skills converge to meet current and future challenges of well-being and health.

1. Initial training leading to a diploma

Doctor of Medicine, Specialist Physician and Teacher-Researchers in Medicine.
Students enrolled at FEM have the opportunity to spend two to three semesters studying abroad. FEM offers this opportunity through the following programs :

- Exchange agreements established with our partners;
- Credit mobility agreements within the framework of the ERASMUS+ program.

Opportunities for international and intercultural internships may be offered.

2. CONTINUING EDUCATION

The FEM is progressively developing continuing education programs qualifying or diploma-granting courses, in various forms: full-time or part-time continuing education or work-study training.

3. DOCTORAL (Ph.D.) TRAINING

The doctoral program is a research-based training program culminating in the award of a Doctor of Medicine (Ph.D.) degree in Medical and Biomedical Sciences, following the defense of research work before a jury. This doctoral research training is organized at the Doctoral Studies Center in Medical Sciences at the Euromed University of Fez.

1. Initial Diploma Training

•Title of Doctor of Dental Medicine after six years of training.

•Possibility of an exchange semester during the professional immersion internship in partner Euro-Mediterranean establishments or within the framework of the mobility agreements provided for by the ERASMUS+ program.

2. CONTINUING EDUCATION

•A rich and diverse continuing education offer that meets the training needs of dentists;
•Updating their knowledge and strengthening their skills;
•Continuous adaptation to the digital transformation linked to technological progress.

Euromed Faculty of Pharmacy

The Euromed Faculty of Pharmacy (FEP), a component of the Euromed University of Fez, offers a six-year program leading to a Doctor of Pharmacy degree. This program is part of a strong international strategy, based on structured academic collaborations with European universities, promoting student and faculty mobility, particularly within the Erasmus+ program, as well as the development of joint programs, double degrees, and collaborative research projects. This degree opens doors to numerous promising careers, particularly in the following sectors:

- The pharmaceutical industry,
- The hospital pharmacy,
- The pharmacy,
- Pharmaceutical R&D.

The Euromed Faculty of Pharmacy (FEP) offers a comprehensive program designed to train dedicated pharmacists capable of addressing current healthcare challenges under optimal safety conditions. The Doctor of Pharmacy degree is recognized by the Moroccan state, and the FEP aims to develop dual degree programs with European universities, fostering a dynamic of international collaboration.
The training program is based on innovative teaching methods that integrate artificial intelligence, data analysis, and biotechnology to improve treatment effectiveness and the quality of care. Furthermore, the FEP offers international mobility opportunities through academic exchanges, the Erasmus+ program, and internships abroad.

FACULTY OF NURSING AND HEALTH TECHNOLOGY

1. Sectors:

- MULTI-SKILLED NURSE
- Anesthesia and Resuscitation Nurse
- SPEECH THERAPIST
- PSYCHOMOTOR TRACKER
- DIETETICS - NUTRITION
- LABORATORY TECHNIQUES
- RADIOLOGY TECHNIQUES

2. LMD pathway:

- BACHELOR'S DEGREE PROGRAM :

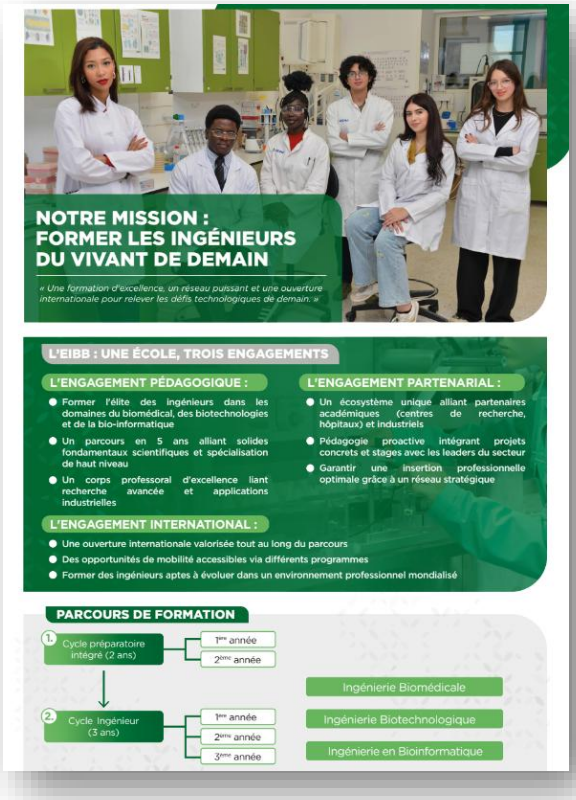

3-year cycle, practical work in laboratory, rehabilitation rooms, simulation center, internships in health centers, hospitals, clinics and specialized centers.

- MASTER'S PROGRAM :

Advanced training accessible to licensed students. Two-year program divided into four semesters.

- DOCTORAL PROGRAM :

A 3-year program focused on scientific research in the fields of nursing, rehabilitation care, health techniques and nutrition.

1.INTEGRATED PREPARATORY CYCLE (2 YEARS)

This program prepares students with the essential foundations for success in engineering fields. It enables them to:

- Acquérir des connaissances scientifiques solides : mathématiques, physique appliquée, chimie, biologie cellulaire et moléculaire.
- Maîtriser les outils numériques et informatiques pour la modélisation, la simulation et l'analyse.
- Développer des compétences transversales : communication scientifique, travail collaboratif, gestion de projet et éthique professionnelle.
- S'initier à la recherche et à l'innovation travers des projets intégrateurs et des stages pratiques.

2. CYCLE INGÉNIEUR (3 ANS)

Filière : Ingénierie Biomédicale

Objectif : Former des ingénieurs capables de concevoir et maintenir des dispositifs médicaux, exploiter les technologies d'imagerie et de robotique, et proposer des solutions innovantes pour améliorer le parcours patient.

Filière : Ingénierie Biotechnologique

Objectif : Préparer les étudiants à concevoir, développer et superviser des procédés biotechnologiques, développer des produits innovants et assurer la conformité aux normes et réglementations.

Filière : Ingénierie en Bio-informatique

Objectif : Former des ingénieurs capables d'analyser et modéliser les données biologiques, développer des outils numériques pour la santé et intégrer l'intelligence artificielle dans les pratiques biomédicales.

1. PREPARATORY CYCLE

The Integrated Preparatory Cycle at the School of Digital Engineering and Artificial Intelligence is designed to provide students with in-depth scientific and technical training, enabling them to access the various digital engineering tracks. This program combines courses in computer science, electronics, applied mathematics, and humanities and social sciences, in order to lay a solid foundation for the rest of their studies in the engineering cycle.

2. ENGINEERING PROGRAM

Sectors:

- Artificial Intelligence (AI)
- Robotics and Cobotics
- Big Data Analysis
- Information Technology and Cybersecurity
- Full Stack and Multimedia Engineering

3. MASTER'S PROGRAM

ICT Security and Artificial Intelligence (dual degree program with George Washington University)

Applications of artificial intelligence, robotics and data analysis can be used in the field of health (diagnosis, medical assistance, intelligent systems), although this is not the main purpose of the school.

Research, Innovation & Entrepreneurship

Research topics - Doctoral cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 3 has been identified. This work focuses in particular on public health, medical artificial intelligence, disease detection and treatment, biomaterials, biomedical engineering, and rehabilitation.

The table below presents the main research topics contributing to this objective.

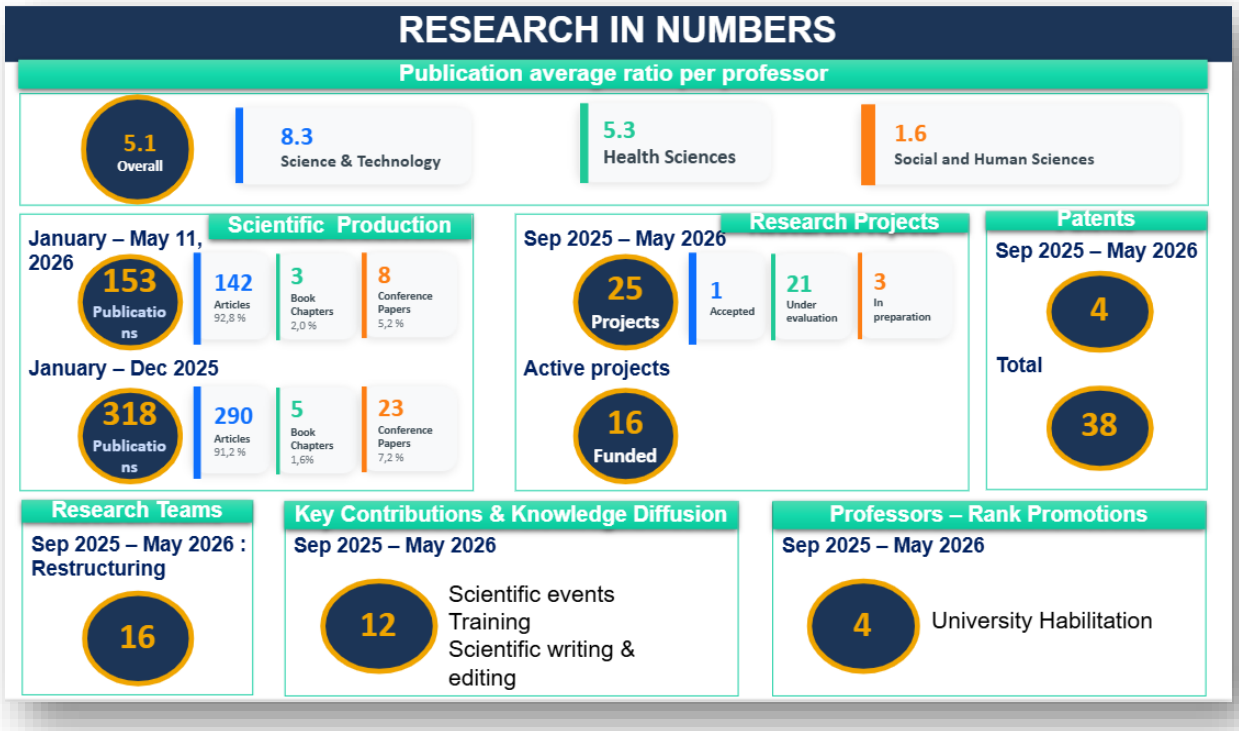

Thesis Subject	related SDGs
Human Resources in Healthcare in Morocco: Public Health Challenges and Solution Approaches	SDG 3
Combating Antibiotic Resistance Using Artificial Intelligence and Experiment-Driven Solutions	SDG 3
Formulation of a New Composite Biomaterial for Bone Tissue Engineering	SDG 3
Design and Synthesis of New Biocompatible Dendrimers for the Encapsulation of Superparamagnetic Iron Oxide Nanoparticles: Application in MRI	SDG 3
Structural and mechanistic elucidation and monitoring by NMR spectroscopy of the synthesis of bioactive molecules in eutectic solvents	SDG 3
Development of Optical Biosensors for Breast Cancer Detection	SDG 3
Design of IoT Platform for Cancer Detection Using High Frequency Ultrasounds	SDG 3
Design and Synthesis via CH Bond Activation of the Pyrazino-[1a,3a,6a]-Triazapentalene (PyTAP): Application to Other Heterocycles Containing Nitrogen	SDG 3
Design and Pilot Scale Yeast-Based Production of Bluetongue Virus Capsid Particles as An Alternative to Live Attenuated Virus Vaccine	SDG 3
Human-Robot Interaction in Assisting Individuals with Disabilities Using Deep Learning	SDG 3
Synthesis and Application of Polymers Based on Glyconanomicelles and Glycodendrimers for Transporting and Releasing Substances to Treat Antimalarial Drug Resistance	SDG 3
Design, Synthesis and Evaluation of New Bioactive Analogues of Fluoroquinolones/ea	SDG 3
Interdisciplinary Spaces in Educational Architecture: Influencing Behavior, Perceptions, and Emotions in the Learning Experience	SDG 3
Development of Methods of Expression, Optimization and Characterization of Recombinant THCAS Enzyme in Pichia Pastoris Expression System	SDG 3
High-field Nuclear Magnetic Resonance (NMR) Spectroscopy for Quality Control: Development of New Analytical Methods in Agri-Food Using NMR	SDG 3
Mathematical Modeling and Artificial Intelligence for Predicting Glycemic Dynamics and Insulin Response in Biomedical Engineering for Diabetes Management	SDG 3
Development of artificial intelligence algorithms for the early detection of breast cancer	SDG 3
Cooling the city – microclimatic strategies for thermal comfort and energy efficiency	SDG 3
Identification and characterization of new active molecules from a Moroccan variety of Cannabis sativa (C. sativa) against breast tumors	SDG 3
Towards an integrative artificial intelligence for the prognostic classification of mature B-cell neoplasms	SDG 3
An Explainable Hybrid AI System for Early Detection of Chronic Diseases from Multimodal Medical Data	SDG 3
Microbial Colonization and Biofilm Formation on Dental Biomaterials Under Various Oral Conditions: From Periodontal Disease to Bone Regeneration	SDG 3
Robotic-Assisted AI for Rehabilitation: Adaptive Control Based on Patient Feedback Loops	SDG 3

Thesis Subject	related SDGs
Plant-Derived Exosomes as Bio-Nanoplatforms for Antiviral therapy and Vaccine Delivery: A Cross-Mediterranean Approach	SDG 3
Design and implementation of a portable optical bio-detection device for real-time analysis of pathological biomarkers	SDG 3

Digi-Hackathon “Mobile Health”: three days of innovation and engagement in service of youth health at UEMF

The Euromed University of Fez hosted the 4th^e The "Mobile Health" Digi-Hackathon, a national event dedicated to innovation in digital health and the development of technological solutions addressing public health challenges, was held in partnership with the Ministry of Health and Social Protection, the Euromed Innovation Center (EIC), and with the support of UNFPA. This hackathon placed particular emphasis on youth mental health and the prevention of psychoactive substance use.

For three days, students, experts, healthcare professionals, and project leaders collaborated in an environment that fostered innovation, entrepreneurship, and collective intelligence. The participating teams received technical and strategic support to develop innovative digital solutions tailored to the needs of teenagers and young adults.

The event also featured conferences and discussion forums on current issues in digital health and improving access to healthcare services through mobile technologies. Through this initiative, the UEMF reaffirms its commitment to socially impactful innovation, developing young people's skills, and fostering collaboration between health, technology, and entrepreneurship.

Ramadan AI Hackathon: UEMF projects distinguished at the regional and national level.

As part of the RamadanIA program, supported by theMinistry of Digital Transition and Administrative ReformThe Euromed University of Fez hosted the Fez-Meknes regional final, bringing together students, project leaders and young entrepreneurs around artificial intelligence solutions applied to territorial challenges.

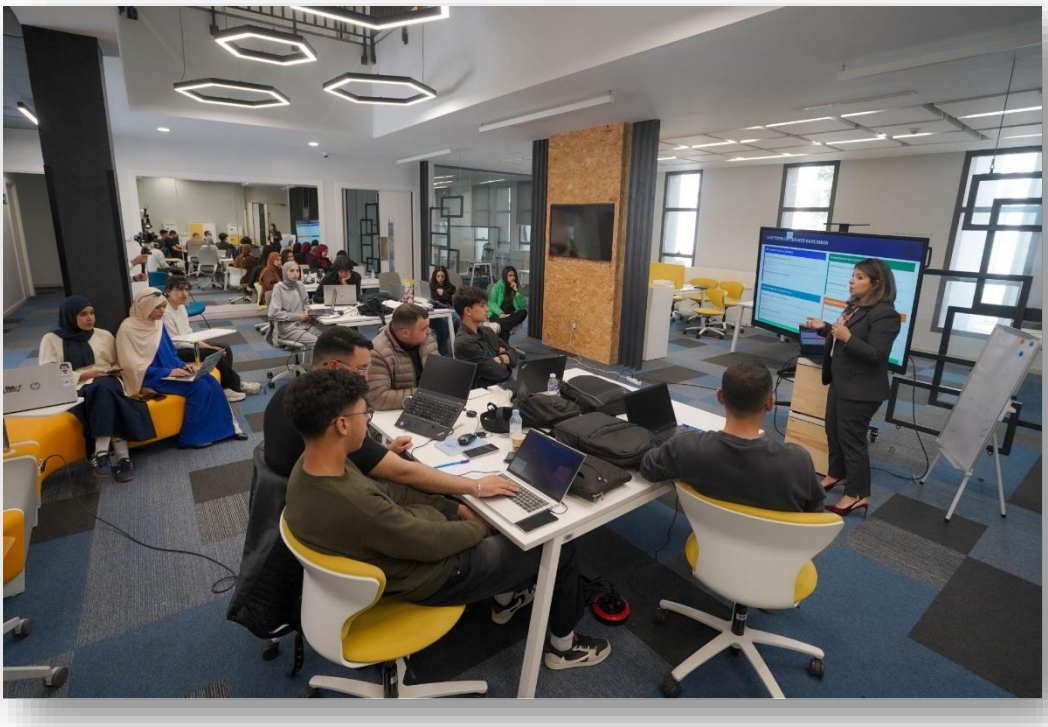

At the end of this stage, two projects from the UEMF community stood out: 🥇GaiaEye – Grand Prize for Regional Excellence. 💡 Audacity Alwarid – Innovation & Creativity Award.

These projects then represented the region at the national hackathon in Rabat, bringing together the best teams from the Kingdom's 12 regions. At this event, the Audacity Alwarid project distinguished itself once again, winning 2nd prize nationally, as well as the Jazari Jury's Choice Award, confirming the relevance and impact of its solution in the field of digital healthcare transformation.

Congratulations to our students.

Lamiae HADI,Nada E.,Ahlam TARK,Chaimae OuarabAndHamel GOUNGOU, for their commitment, their creativity and the quality of the work accomplished through this project.

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF.Euromed innovation center (EIC)organized, in partnership withTAMWILCOMvia the InnovInvest Fund and BlueSpace (Bank of Africa), on April 16 and 17, the Hack'Days of the Fes-Meknes region, bringing together students, project leaders and young entrepreneurs around an intensive bootcamp dedicated to the creation and development of innovative solutions.

As part of a dynamic of supporting high-potential talent, this program aims to support the emergence of projects in strategic sectors such as digital, health, agritech, cybersecurity, greentech, fintech or edtech, thus contributing to the development of the regional entrepreneurial ecosystem.

Over the course of two days, participants were supported in structuring their ideas, designing concrete solutions and preparing their projects, in an environment conducive to experimentation, collaboration and collective intelligence.

A true space for learning and co-creation, this event allowed each team to develop their project, benefiting from constructive feedback, dedicated mentoring and guidance that fosters the maturation of entrepreneurial initiatives.

The Hack'Days concluded with pitch sessions, offering participants the opportunity to present their projects, compare their ideas and reveal their full potential, in a dynamic focused on innovation and impact.

We extend our sincere congratulations to all participants for their commitment, creativity, and entrepreneurial spirit. This initiative confirms the role of the UEMF, through the Euromed Innovation Center, as a key player in structuring and supporting innovation at the regional and national levels.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

On May 7th and 8th, 2026, theEuromed innovation center (EIC)organized the regional Hack'Days Oriental bootcamp, organized as part of the Hack'Days by Region 2026 program, supported by Tamwilcom via the Innov Invest Fund, in partnership with Blue Space by Bank of Africa

For two days, project leaders from the Oriental region participated in intensive support designed to transform innovative ideas into structured, viable projects ready to accelerate their development.

Seven projects were selected following the initial rounds to participate in this edition and benefit from mentorship provided by experts and key players in the entrepreneurial ecosystem. Participants worked on key aspects of their projects: strategic vision, business model, market positioning, validation of the value proposition, and growth prospects.

The projects developed covered several high-stakes sectors: • Cleantech & hybrid energy • EdTech & financial education • HealthTech & drug safety • FinTech & algorithmic trading • Applied AI & cybersecurity
Beyond technical support, this bootcamp primarily created a space for meetings, reflection and experimentation where participants could challenge their ideas, share their experiences and develop their projects by interacting with experts and other entrepreneurs.

UEMF Health Hub : training, care, prevention and innovation

Source : Health Cluster Annual Report 2025-2026

1. Strengthening the healthcare supply and system

- Project for the future Euromed University Hospital:354 beds and 15 operating rooms, with services including emergency care, intensive care, oncology, nuclear medicine, imaging, laboratories, dialysis and rehabilitation.
- The university hospital is organized around 13 clinical and cross-functional departments, covering in particular mother-child medicine, emergency care, intensive care, oncology, rehabilitation and precision medicine.
- Development of centers of excellence in maternal and child health, oncology, cardiology, traumatology, personalized medicine, regenerative medicine and sports medicine.

2. Training of healthcare professionals

- Five components contribute to training in the health field: Medicine, Pharmacy, Dentistry, Nursing and Health Sciences, Biomedical Engineering and Biotechnology.
- Development of practical training programs integrating simulation, clinical placements, interprofessional learning and patient safety.
- Recruitment of the first class of four dental residents.

3. Simulation and safety of care

- The Simulation Centre allows students to practice technical skills, clinical situations, emergencies, resuscitation, communication and teamwork.
- Development of interprofessional learning, debriefing and educational innovation, particularly around the virtual patient and AI-assisted debriefing.
- Participation of medical and pharmacy students in the SimCup 2025 in Rabat, focusing on technical and non-technical skills.

4. Health prevention and promotion

- Organization, on October 15, 2025, of a conference dedicated to breast cancer, from prevention to integrated care.
- Raising awareness of early detection, psychological support and social support.

5. Youth health and mental health

- Organization of the Digi-Hackathon Mobile Health, from May 20 to 22, 2026, dedicated in particular to youth health, mental health and the prevention of risky behaviors.
- Mobilizing digital innovation to address public health challenges and promote solutions developed by students.

6. Maternal, child and reproductive health

- Integration of a Mother-Child unit including gynecology-obstetrics, pediatrics, neonatology and neonatal intensive care.
- Positioning of the University Hospital on maternal and child health and medically assisted reproduction.

7. Health research and innovation

- Development of research areas focusing on precision medicine, biotechnology, artificial intelligence in health, biomedical engineering, public health and quality of care.

- Plans for centers dedicated to clinical research, bioequivalence and biotechnology.

- Development of health technologies, including interventional imaging, minimally invasive techniques and robot-assisted surgery.

8. Partnerships in the service of health

- Cooperation with the Regional Health Directorate of Fes-Meknes, the Hassan II University Hospital of Fes, the Health Service of the Royal Armed Forces and the Mohammed VI National Center for the Disabled.

- Partnerships with clinics, practices, pharmaceutical industries and professional associations around internships, training, prevention and specialized cooperation.

- Dialogue with healthcare professionals in Fez about the skills of tomorrow, training, innovation and the needs of the territory.

9. Ethics, quality and safety of care

- Integration of principles related to patient rights, confidentiality, consent, safety, continuity of care and incident prevention.

- Consideration of ethics in health research, protection of individuals, data governance and the use of artificial intelligence.

The Euromed University of Fez contributes to SDG 3 through the development of its hospital-university ecosystem, the training of health professionals, prevention and health promotion, simulation and safety of care, as well as health research and innovation.

This contribution is based in particular on the future Euromed University Hospital, the five components of health training, prevention actions, youth health initiatives and partnerships with local health stakeholders.

General presentation of the Euromed University of Fez Sports Complex

Located in the heart of the Euromed University of Fez (UEMF) eco-campus, the Euromed Sports Center (ESC) is a sports complex designed to offer a comprehensive and inclusive sporting experience. Built according to international standards, it embodies the university's vision of holistic education, combining academic excellence, well-being, and social responsibility.

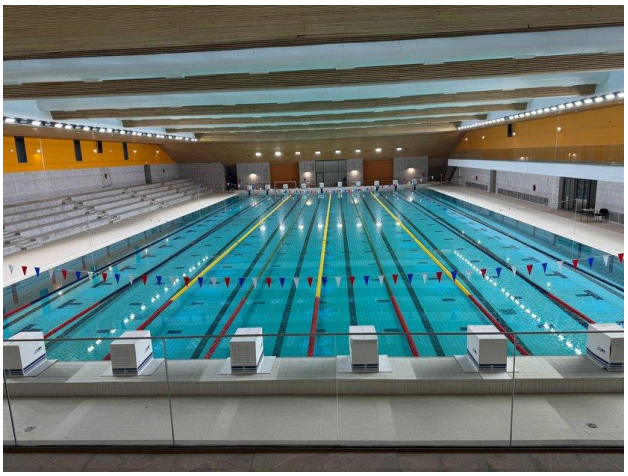

A true leading sports hub, the complex welcomes a large and diverse community: students, university staff and their families, sports clubs, national federations, and the general public. It thus constitutes a space where university life converges with the local, regional, and national sports movement, actively contributing to the UEMF's influence beyond its walls.

Infrastructure & Equipment

ESC has a full range of high-level sports infrastructure, spread across several distinct functional zones, each catering to specific uses and audiences.

Football stadium — 3,800 seats (FIFA)

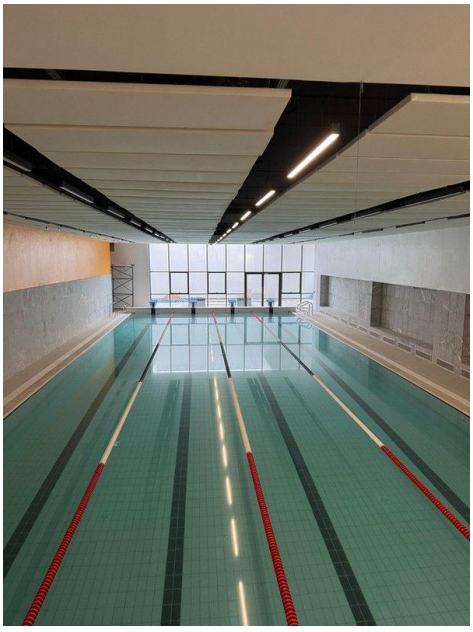

Olympic swimming pool 50×25 m (FINA)

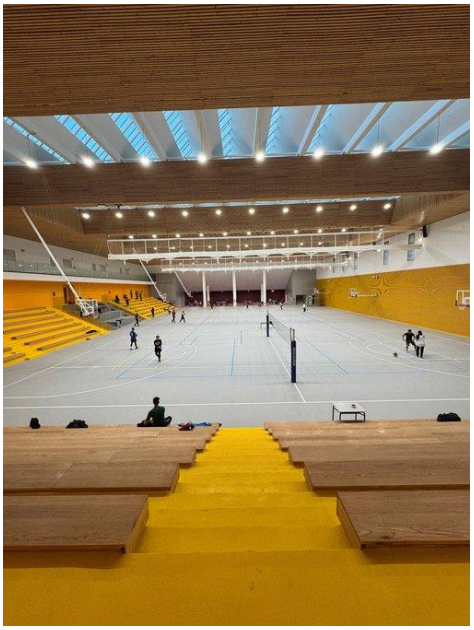

Components & equipment of the Euromed Sports Center:

Zone / Space	Main features
football stadium FIFA	3,800 seats — professional lighting at 1,500 lux — competitions and broadcasts
Olympic swimming pool FINA	50×25 m, depth reregulatory, several lanes—freestyle swimming and competitionetitions
Semi-Olympic pool	Learning, leisure, aquagym — accessible to all levels
Multi-sports hall 3 simultaneous fields	Basketball, volleyball, handball, badminton, table tennis
Cardio/weight training rooms×2	2 large rooms (Techno Gym type) — machines and free weights
Fitness class room	Cardio, strength training, step — group classes
Dance studio	Mirrors, adapted flooring, barre — all styles of dance
Yoga room	Quiet zone — meditation, flexibility, relaxation
Martial Arts Room	Tatami mats, ring, punching bags — boxing, taekwondo

Zone / Space	Main features
Climbing wall	Difficulty course with full safety equipment
Wellness/Outdoors Area	Stretching circuit, outdoor cross-fit area with equipment
Changing rooms 6 spaces / 780 lockers	Distribution of men/women/teams — fluidity of flows

Semi-Olympic pool

Multi-sports hall — 3 simultaneous courts

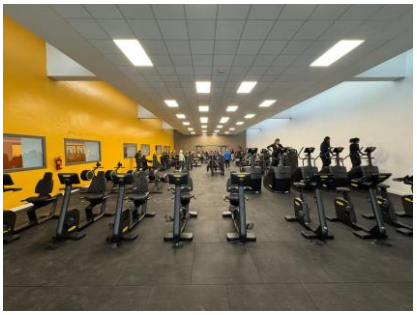

Beyond their sporting purpose, these spaces contribute directly to several sustainability objectives. The eco-campus in which the complex is located incorporates principles of sustainable design: responsible resource management, universal accessibility of facilities, and shared use of spaces between internal users and the external community.

Diverse offering & accessibility

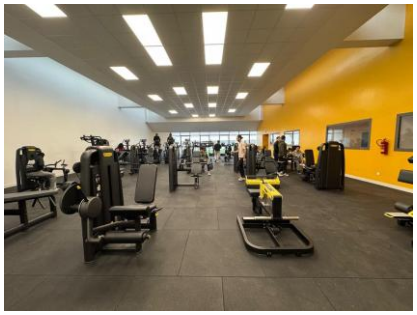

ESC deploys a range of programs and services structured around six complementary axes, covering audiences from very young children to competitive athletes.

The Fitness Hub

The vibrant heart of ESC, the Fitness Hub includes two ultra-equipped weight training and cardio rooms (Techno Gym type), a combat room with a boxing ring, a dance room, a yoga room, a climbing wall and a sauna.

Cardio room

Weight room

Cardio room with stadium view

Difficulty climbing wall — complete safety equipment

1. Group classes included

A range of disciplines led by certified instructors:

- ZenFlow — yoga, meditation, relaxation
- PowerCore — dynamic muscle strengthening
- CardioRush — high-intensity cardio workout
- Fight Club — martial arts and self-defense
- DanseFlow — dance and body expression

2. Tailored access to specialized spaces

Users create their own routine by freely combining weight training, team sports, water sports or wellness according to their preferences (Strength & Cardio Zone, The Arena & The Pitch, RacketMotion, The Oasis).

3. Mentoring by certified coaches and trainers

Each user benefits from personalized support from qualified professionals, whose methods are adapted to individual objectives: weight loss, sports performance, endurance or rehabilitation.

4. Premium Services

Private coaching

Swimming lessons for children/adults

Semi-private/duo lessons

Discovery Pack

Transformation Program and Small Group Training

5. Preferential offer for UEMF staff & families

The Euromed Sports Center offers a special rate exclusively for UEMF staff and their families, with flexible payment options to facilitate access to all facilities. Children's sports schools are also available, covering a wide range of disciplines: swimming, football, basketball, dance, and climbing—allowing families within the university community to benefit from professional coaching from a young age.

6. Mixed time slots and 100% women's time slots

Women-only time slots are available in all areas. This initiative promotes women's access to regular sports activities in a suitable environment.

7. Children's Offer — Euromed Academy

The Euromed Sports Center, through its Euromed Academy, offers a sports education program for children, structured around four specialized schools. Each school is supervised by certified professionals and uses a progressive, fun, and safe teaching method adapted to the age and skill level of each child.

Football SchoolThe football school introduces children to the fundamentals of teamwork, motor coordination, and the values of fair play. Through progressive and fun sessions, each child develops their technical and tactical skills at their own pace, in a motivating environment that fosters team spirit and physical fitness from a young age.

Swimming SchoolThe swimming school guides children in mastering the aquatic environment, from initial learning to advanced swimming techniques. Supervised by certified swimming instructors, the sessions progress according to each child's level, strengthening self-confidence, water safety, and overall physical development.

Basketball SchoolThe basketball school offers a dynamic approach focused on developing agility, precision, and teamwork. Children discover the rules of the game and technical skills in a fun way, in sessions adapted to their age and level, promoting coordination, reaction time, and cooperation.

Climbing SchoolThe climbing school introduces children to climbing on a specially designed wall, in complete safety and under the supervision of passionate professionals. This unique discipline simultaneously develops concentration, fine motor skills, effort management, and self-confidence, offering a particularly enriching physical and mental activity.

Events

Academic events

Orientation Week 2025: Discovery, conviviality and commitment

From September 15 to 19, the Euromed University of Fez organized an integration week on its Eco-campus to welcome new students, promote exchanges and strengthen cohesion within the university community.

Through institutional presentations, academic meetings, an orientation masterclass, sports and cultural activities, students discovered the world, values and opportunities offered by UEMF.

The week concluded with acts of solidarity and eco-citizenship, illustrating the university's commitment to social and environmental responsibility.

This event allowed new students to create lasting bonds and to embrace the values of openness, excellence, and citizenship.

Pink October : Breast Cancer, from Prevention to Integrated Care

As part of the Euromed University of Fez's lecture series, a meeting was held on the theme "Breast Cancer: From Prevention to Integrated Care", led by Professor Chakib Nejjari, Vice-President in charge of the Health Department of UEMF.

During this conference, Professor Nejjari emphasized the importance of early detection, a determining factor in improving the chances of recovery, as well as the need for an integrated approach combining care, psychological support and social support.

This initiative is part of the Pink October campaign.🎗️, an international awareness movement. Through this action, the UEMF reaffirms its commitment to public health, prevention and the promotion of well-being within the university community.

Beyond this conference, the UEMF (Euromed University of Marseille) carries out various awareness and screening initiatives throughout the year for its students, faculty, and staff: blood donation drives, prevention workshops, free consultations, and partnerships with regional healthcare facilities. These initiatives reflect the University's commitment to making the Euromed campus an exemplary space for health, solidarity, and civic responsibility.

Carl Jung and the Individuation Process: A lecture by Professor Rachid Achachi

As part of its lecture series, the Euromed University of Fez welcomed Professor Rachid Achachi for a presentation devoted to a central theme of analytical psychology: "Carl Jung and the process of individuation".

This meeting provided an opportunity to explore the inner journey by which individuals learn to know themselves, integrate the different dimensions of their personality, and build a balanced identity. The aim was not only to present Jung's thought, but also to reflect on how this process can shed light on contemporary human and existential challenges.

Professor Achachi emphasized that individuation is a continuous dynamic, in which the confrontation with the conscious and the unconscious becomes a lever for personal development, psychic maturity, and meaning.

The conference concluded with in-depth discussions with the students, who asked questions and shared their thoughts, illustrating the interest and resonance of this topic within the university community.

Cognitive Development and the Humanities: A lecture by Professor Majda Nniya in collaboration with the Cervantes Institute

In collaboration with the Cervantes Institute, this session of the lecture series was devoted to the theme: “From Symbolic Peace to Transformative Science: Women, Childhood, and the Architecture of Knowledge.” The meeting was moderated by Professor Majda Nniya, Assistant Professor at the Faculty of Humanities and Social Sciences of UEMF.

The intervention offered a detailed analysis of cognitive development throughout life, from early childhood to adulthood, highlighting the importance of the educational framework, emotional regulation, and stress management in learning.

The discussions also highlighted the role of the family environment, and more specifically that of the mother, in supporting the child's intellectual and emotional development. They reiterated that cognitive abilities are built gradually through experiences, social interactions, and the surrounding environment.

Bringing together students, teachers and members of the university community, as well as representatives from the Cervantes Institute, this conference offered an enriching space for dialogue on contemporary issues in education, human development and cognitive science.

This initiative is part of the UEMF's commitment to promoting interdisciplinary approaches and encouraging reflection on current educational and societal challenges.

Project-Based Approach: Engagement and innovation at the heart of nursing and health technology training.

As part of our active teaching based on the Project-Based Approach (PBA), the Faculty of Nursing Sciences and Health Techniques (FSITS) – UEMF organized a day dedicated to the presentation of projects carried out by its students.

Throughout the day, the students presented work developed around concrete problems observed in the field, illustrating their ability to mobilize their scientific knowledge, technical skills and analytical skills in the service of care and prevention.

The presentations were also enhanced by the screening of short educational films produced by students, highlighting awareness and support messages, as well as a play entitled "Civilization at the Heart of Care", emphasizing the importance of ethics, humanity and values in the practice of health professions.

Through this initiative, the APP confirms its role as an essential educational lever, promoting autonomy, critical thinking and student engagement, in line with the UEMF's vision of training competent, responsible healthcare professionals capable of responding to the current challenges of the sector with rigor and empathy.

Conference on Stress Management by Professor Rachid Boudri

As part of our Conference Series for the 2025–2026 academic year, we organised a conference entitled: "Stress Management: An Introduction", led by Prof. Rachid Boudri, Professor-Researcher in Marketing at Euromed Business School – UEMF.

Through an intervention that was both educational and interactive, this meeting made it possible to explore the mechanisms of stress, its impacts on concentration, decision-making and academic and professional performance.

Professor Boudri also highlighted concrete tools and practical approaches to better understand, anticipate and manage stress, emphasizing the importance of emotional intelligence, personal organization and a balanced lifestyle.

Bringing together students, teachers and members of our university community, this conference provided a real space for discussion around a major issue in the academic and professional world: learning to transform stress into a lever for performance rather than a hindrance.

An enriching encounter which is fully in line with the UEMF's commitment to offering interdisciplinary spaces for reflection, serving the well-being and personal development of its community.

BIONET Conference: An edition that marks a turning point for Euro-African health

The BIONET International Conference on Occupational Surveillance and Environmental Health concluded successfully at the Euromed University of Fez, bringing together researchers, experts and international partners for three days of rich and constructive scientific exchanges.

Through plenary sessions, thematic sessions and collaborative discussions, the event advanced the dialogue on occupational health, environmental biomonitoring and the One Health approach, while strengthening Euro-African cooperation.

Thanks to the leadership of Professor Salim Bounou and the commitment of all participants, IC-OSEH has been a dynamic platform for learning, innovation and partnership, consolidating a common commitment to safer workplaces and healthier environments.

Oral health prevention: raising awareness today to better care tomorrow.

As part of the launch of the prevention project within the framework of the Project-Based Approach (PBA), the Faculty of Dental Medicine – UEMF welcomed Dr. Errachidi, President of the Moroccan Association for Oral and Dental Prevention – Fes section, for an exchange and awareness session dedicated to dental medicine students.

This meeting provided an opportunity to discuss the foundations of oral health prevention, the importance of patient awareness, as well as the good practices and professional ethics that should guide the practice of the profession.

Through an enriching dialogue, the students were introduced to the challenges of prevention in public health, the responsibility of the practitioner in educating patients and the essential role of the dentist in promoting a sustainable culture of prevention.

This initiative is fully in line with the UEMF's vision of training competent, committed healthcare professionals who are aware of their societal role, placing prevention and ethics at the heart of medical practice.

Student project presentation day in pharmacy

The Faculty of Pharmacy at Euromed University of Fez organized a day dedicated to showcasing projects completed by students within the framework of the Project-Based Approach (PBA). This event allowed future pharmacists to put their knowledge of pharmaceutical sciences, pharmacology, and biomedical research into practice through innovative projects addressing health and pharmaceutical issues.

Throughout the day, students presented their work to teachers and supervisors, illustrating the different stages of their projects, from ideation to scientific analysis. This initiative also fostered academic and scientific exchange, providing a space for dialogue, sharing experiences, and reflecting on current challenges in pharmaceutical research and innovation.

Through this activity, the Euromed University of Fez confirms its commitment to promoting active teaching methods that place the student at the heart of learning, while developing critical thinking, collaboration and the scientific skills needed by the health professionals of tomorrow.

Changing our perspective on disability: towards an inclusive and equitable university.

As part of our Conference Series, the Euromed University of Fez organized a conference entitled: "Changing perspectives on disability: the inclusive university, a lever for equity and excellence", led by Dr. Khalid Benhassan and Professor Hajjoui Abderrazak.

Through this meeting, the speakers offered an in-depth reflection on the challenges of inclusion in higher education, highlighting the central role of the university in promoting equal opportunities and valuing all talents.

Drawing on their expertise in public health, rehabilitation and support for people with disabilities, they emphasized the need to move beyond traditional approaches to build more accessible, inclusive and tailored academic environments that reflect the realities of each individual.

The conference also provided an opportunity to examine perceptions of disability, inviting a renewed perspective based on inclusion, dignity and recognition of abilities, rather than limitations.

Rich in exchanges and perspectives, this meeting highlighted the importance of placing inclusion at the heart of university policies, as a lever for equity, but also as a factor of excellence and social transformation.

Conference: Training the healthcare professionals of tomorrow for a more resilient Moroccan healthcare system

The UEMF had the honor of welcoming Professor El Houssaine Louardi, a physician specializing in
anesthesia, resuscitation and emergency medicine, former Minister of Health, at a conference dedicated to the challenges of training health professionals and the prospects for the evolution of the Moroccan health system.

This meeting provided an opportunity to discuss current challenges in the health sector, the importance of multidisciplinary training adapted to contemporary medical transformations, and the strategic role of new generations of professionals in building a more efficient, innovative and resilient health system.

Through his intervention, Professor El Houssaine Louardi also shared his expertise and perspective on the changes taking place in the health sector today, while highlighting the challenges related to governance, medical innovation, research, and the development of human skills.

This conference illustrates the commitment of the Euromed University of Fez to promoting academic dialogue, openness to major societal issues and meetings between students, teachers and leading figures from different strategic sectors.

UEMF Meeting – Health Professionals of the City of Fez: thinking together about the health challenges of tomorrow.

The Health Hub of the Euromed University of Fez was pleased to welcome health professionals from the city of Fez for a meeting focused on exchange and reflection on the major transformations taking place today in the health sector, and on the responses to the growing needs for expertise, innovation and training.

This meeting was an opportunity to present the UEMF Health Hub, which brings together the Faculty of Medicine, the Faculty of Pharmacy, the Faculty of Dental Medicine, the Faculty of Nursing and Health Sciences, as well as the School of Biomedical Engineering and Biotechnology, illustrating an integrated approach to training, research and innovation in the service of health.

The discussions also highlighted the progress of the future Euromed Hospital Complex, a structuring project intended to strengthen the training, research and care ecosystem developed by the University, while also opening up reflection on the new training and skills required to meet the evolving needs of the sector and the emerging needs of the health system.

Beyond the presentation of its infrastructure and academic offerings, this meeting provided a genuine space for dialogue between the academic world and professionals in the field, reaffirming UEMF's commitment to actively contributing to the development of an innovative, high-performing, and resolutely future-oriented health ecosystem.

Cultural activities

A memorable final experienced collectively on our Eco-campus

During the Arab Cup 2025 final between Morocco and Jordan, the university's eco-campus was the setting for a powerful moment of gathering and sharing. Students, faculty, and administrative staff came together to watch this decisive match in an atmosphere filled with enthusiasm and conviviality.

Throughout the match, the emotion was palpable: every action, every goal sparked passionate reactions, reflecting the deep attachment of the university community to the Moroccan national team. This collective mobilization made the final a true highlight of campus life, strengthening the bonds between the different components of the university.

Morocco's victory, following an intense and thrilling final, sparked a spontaneous and unifying celebration. This moment of shared joy exemplified the values of cohesion, solidarity, and collective pride that drive our institution. Beyond the sporting result, this event underscored the campus's role as a space for living, exchanging ideas, and building an engaged and united community around meaningful experiences.

End-of-year celebration: a dinner of sharing and conviviality

As part of its commitment to fostering community and intercultural dialogue, the Euromed University of Fez organized an end-of-year dinner for its international staff. This gathering celebrated the values of diversity, respect, and cohesion that underpin the University's identity, while also providing a special setting for conversation, laughter, and convivial moments.

The academic and administrative staff, accompanied by their families, shared a unique moment around a communal table. The evening was enlivened by enriching discussions, moments of dancing and lightheartedness, perfectly illustrating the spirit of community and cultural richness that characterize the UEMF campus.

Through this initiative, the Euromed University of Fez reaffirms its commitment to an inclusive and supportive community, where sharing and exchanges contribute to strengthening human ties and the sense of belonging.

Sports activities

The Mini Africa Cup of Nations in Fez: three days dedicated to sport and community spirit

The Euromed University of Fez hosted a football tournament bringing together sixteen teams from several African countries, in collaboration with the Fez-Meknes Regional Football League and CESAM Fez. Organized over several days, the competition took place in a spirit of commitment, respect, and fair play, fostering exchange and closer ties among the participants.

The matches, supported by an enthusiastic crowd, highlighted collective discipline, the quality of play, and the players' commitment. Equatorial Guinea won the final against Chad, while the Moroccan team secured third place.

Through this initiative, the UEMF confirms its commitment to sport as a lever for cohesion, cultural openness and dynamism within university life.

1re eedition of the'Open Taekwondo of the'UEMF: sport, discipline and commitment

The Euromed University of Fez organised the first edition of the UEMF Taekwondo Open, in partnership with the Royal Moroccan Taekwondo Federation and the Fez-Meknes Regional Taekwondo League.

Conceived as a highlight of meeting and sharing, this event brought together athletes around fights and sporting demonstrations, in a structured framework where rigor, discipline and commitment were expressed in respect of the rules and values of taekwondo.

The day concluded with medal ceremonies, celebrating the investment, determination and quality of performance of the participants, and recalling the essential role of sport in building pathways based on excellence, respect and civic engagement.

Through the organization of this first edition, the UEMF reaffirms its commitment to the development of university sports activities, while consolidating its position as an actor involved in the sporting dynamic at the national level.

National spirit, sport and youth: our campus proudly celebrated the 50th anniversary of the Green March

On November 6th, the Euromed Sports Center hosted a sports day combining mixed water polo and a men's basketball tournament, bringing together our students and junior teams from FAS, MAS, and USF. A competitive and dynamic atmosphere that reflects the commitment of our youth.

On the court, our students shone: a semi-final victory against FAS (47–30) and an intense final win against MAS (45–40). With over 80 participants, the event highlighted the commitment of our young athletes, the quality of play, and the excellent synergy between the teams.

Beyond the results, this day was a true moment of unity and patriotism, bringing together students, coaches, and officials around the values of solidarity and national pride. A memorable event that will remain etched in the sporting history of our campus.

UEMF Inter-University Tournament: two days dedicated to sport, sharing and collective commitment

To mark International Day of Sport, the Euromed University of Fez organised an inter-university tournament on April 4 and 5, bringing together students from several institutions around a rich and multidisciplinary sports programme.

Over two intense days, participants competed in various disciplines, including basketball, volleyball, table tennis, and water polo, in a spirit that combined performance, commitment, and fair play. Beyond the results, each match was marked by the quality of play, collective energy, and mutual respect. Much more than a competition, this event established itself as a true space for encounters and exchanges between university communities, fostering diverse interactions, the sharing of experiences, and the building of connections between students from different academic backgrounds.

🏅Tournament results:
🏓Boys' Table Tennis : 1re place – AUI (Al Akhawayn University of Ifrane) 2e Place – USMBA (Sidi Mohamed Ben Abdellah University) Girls: 1re and 2e places – AUI
🏐Boys' Volleyball: 1re place – USMBA | 2e Place – UEMF Girls: 1re place – USMBA | 2e place – UEMF
🏀Boys' Basketball: 1re place – USMBA | 2e Place – UEMF Girls: 1re place – USMBA | 2e Place – UIT (Ibn Tofail University)

Heading towards the 4th edition of the Open Para-Karate Kata Fes at the UEMF.

The UEMF was pleased to host the fourth edition of the Open Para-Karate Kata Fes, organised by the Mohammed VI Foundation for Persons with Disabilities, in a dynamic of promoting inclusive sport and the values of self-improvement.

In an atmosphere marked by respect, discipline, and determination, theEuromed Sports CenterThe atmosphere came alive with demonstrations from these young athletes who came from all corners of the Kingdom. Through their performances, they powerfully embodied the values of karate, combining mastery, perseverance, and commitment.

Beyond the competition, this event was a powerful moment for raising awareness, highlighting the role of sport as a lever for inclusion, personal development and social cohesion.

We extend our sincere thanks to all the supervisors, chaperones, referees, volunteers, and participating delegations for their commitment and contribution to the success of this edition.

Through this initiative, the UEMF reaffirms its commitment to inclusion, diversity and sport for all, by offering an environment conducive to the expression of talents and the promotion of inspiring journeys.

The Euromed University of Fez hosts the Moroccan Swimming Championships

The Euromed University of Fez hosted the Moroccan Swimming Championships from July 30 to August 1, 2026, organized by the Royal Moroccan Swimming Federation at the Euromed Sports Center. This national competition brought together swimmers from several clubs for various events, ranging from 50 to 1,500 meters, as well as relays.

The event showcased the UEMF's sports facilities and promoted the values of discipline, perseverance, respect, and excellence, while bringing together clubs, coaches, families, and sports enthusiasts. The University thus reaffirmed its commitment to promoting sport and hosting high-level national competitions.

Institutional and diplomatic visits

Visit to the infrastructure and innovation hubs of the UEMF

The institutional visit continued with a tour of the main facilities of the Euromed University of Fez, illustrating its integrated model based on innovation, excellence in education, and social engagement. The delegation notably visited the Euromed Sports Center, the Euromed Innovation Center (EIC), and the experimental farm of the Agritech cluster.

This immersive experience highlighted the university's efforts in developing innovative solutions, encouraging student entrepreneurship, and promoting sustainable technologies to address environmental and economic challenges. The visited facilities also demonstrated UEMF's commitment to student well-being, applied research, and the transition to a more sustainable and resilient development model.

Student events

Kidney transplantation: everything you need to know

As part of the national campaign to raise awareness about organ and tissue donation, the Rotaract UEMF club is committed with conviction to a profoundly human cause: saving lives through donation.

Because a gesture can offer a second chance, this initiative aims to inform, raise awareness and encourage everyone to reflect on the impact of this act of solidarity.

Under the banner of life, sharing and hope, this action is in line with the values upheld by the UEMF and the Rotaract movement: civic engagement, social responsibility and the promotion of health for all.

A scientific and human conference on the theme "Kidney transplantation: everything you need to know" marked this great momentum, with moving testimonies from transplant recipients.

Led by experts from the Faculty of Medicine of Fez, including Professor Tarik Sqalli Houssaini, Dean of the Faculty and Head of the Nephrology, Dialysis and Transplantation Department at Hassan II University Hospital, and Professor Basmat-Amal Chouhani, Associate Professor in Nephrology, Dialysis and Kidney Transplantation, this meeting provided a rich and hopeful space for exchange.

In partnership with the Errahma Association, the Health and Development Aid Initiative (ISAAD), the Hassan II University Hospital and the Faculty of Medicine of Fez, this meeting aims to be a space for exchange, awareness and hope, intended to change perspectives and encourage a culture of giving.

Hygiene awareness in a primary school

On October 14, 2025, the Hands Club organized a hygiene awareness event at a primary school in Bensouda. The initiative aimed to educate students about the importance of personal and collective hygiene in preventing illness and promoting good health practices. Through age-appropriate explanations and interactive discussions, the children learned essential daily hygiene practices, contributing to a healthier and more responsible school environment.

Tribute to the Doctors and Committed Members – Elite Club

The Elite Club held a thank-you ceremony to express its deep gratitude to the doctors and club members for their commitment and efforts during the caravans and humanitarian missions of the previous term. This event provided an opportunity to highlight their contributions, present them with certificates of recognition, and celebrate together the successes and positive impact of their actions on the communities they helped.

Breast Cancer Awareness and Prevention Workshop: Date: October 29, 2025
Location : Avicenne Clinic

As part of the Pink October campaign, the Elite Club organized a breast cancer awareness workshop at the Avicenne Clinic in Fez, led by Dr. Ahmed Guennoun, a specialist in gynecology, obstetrics, and infertility. The workshop brought together 20 female students from Euromed University to discuss this crucial public health issue.

The presentation focused on the importance of breast self-examination for the early detection of breast cancer and on best practices for regular screening. Through clear explanations and interactive demonstrations, participants were able to gain practical knowledge, ask questions, and exchange ideas in a friendly and participatory atmosphere.

This workshop was particularly enriching, combining medical expertise with dynamic discussions. It allowed the students to better understand the issues surrounding screening and encouraged them to disseminate this essential information within their communities, thus strengthening the impact of the awareness campaign.

Blood Donation Campaign – Rotaract Club

The Rotaract Club organized a two-day blood donation campaign on the university campus, with the aim of raising awareness within the academic community about the importance of blood donation and making a concrete contribution to saving lives.

This act of solidarity mobilized a large number of students, teachers, and administrative staff, all united around a vital humanitarian cause. In collaboration with qualified medical teams, a dedicated space was set up to ensure a warm welcome for donors and strict adherence to hygiene and safety standards.

Beyond the blood drive, this initiative promoted the values of solidarity, social responsibility, and civic engagement within the university community. It also strengthened the spirit of cohesion and cooperation among the various stakeholders on campus, demonstrating the positive impact that collective action can have in service of society.

Creative Outing - Crafty Fall Themed Picnic

Organized atIn Ifrane, more precisely at the natural site of Aïn Vittel, this outdoor activity was part of a dynamic of strengthening the links between the members of the club, while promoting creativity in the open air.

Taking advantage of the autumn season and its inspiring natural setting, the club organized a creative, autumn-themed picnic, combining relaxation, art, and conviviality. The main objective was to foster group cohesion through an immersive experience, far removed from the usual academic environment.

In a warm and peaceful atmosphere, participants took part in various craft and artistic activities such as drawing, crocheting, and other hands-on crafts, directly in contact with nature. This time allowed everyone to freely express their creativity, while sharing moments of exchange and connection.

Beyond the artistic aspect, this initiative contributed to the well-being of the members, strengthening team spirit and consolidating human relationships within the club in a natural environment conducive to inspiration and rejuvenation.

Halloween Party – Elite Club

On November 7, 2025, the Elite Club, in partnership with Neverland Events, organized a Halloween party at the Euromed University of Fez. This festive event offered students a fun-filled break filled with creativity, music, and community spirit. The evening was a great success, drawing over a hundred students who came to enjoy a lively and friendly atmosphere. Performances by DJs MZ and Samado kept the crowd entertained, while Halloween costumes added a fun and original touch. The lighting and sound system contributed to creating an immersive and welcoming ambiance. Through this initiative, the Elite Club aimed to foster cohesion among students, promote well-being on campus, and enrich university life through unifying events. The party was a resounding success, strengthening the sense of community and reaffirming the club's commitment to enriching student life.

Health & Solidarity Caravan in Tigrigra – October 2025 - Elite Club

The Elite club organized a multidisciplinary medical caravan in Tigrigra, in the Ifrane-Azrou region, in order to bring healthcare closer to local populations and meet their medical needs.

This initiative mobilized 20 doctors from various specialties, including cardiology, gynecology, urology, ENT, ophthalmology, and dentistry. The beneficiaries were able to access:

- A variety of consultations tailored to each specialty.
- Comprehensive dental care, including extractions, restorative treatments, scaling and the fabrication of dentures,
- Free distribution of medication, for comprehensive and effective care.

This action embodied a true moment of solidarity and humanitarian commitment, strengthening the link between the Elite club and local communities while contributing to the well-being and health of the inhabitants of Tigrigra.

School Health Caravan in Ain Chkef – November 2025 - Elite Club

A school health caravan was organized to improve access to healthcare and raise students' awareness of the importance of health. In the area of dental care, beneficiaries received consultations and treatments, including extractions and cleanings, as well as the distribution of oral hygiene kits containing toothpaste and toothbrushes, to encourage good habits from a young age. The medical component offered general consultations for basic screenings, as well as ophthalmological consultations to assess students' visual health. This caravan was a vital préventive and educational initiative, contributing to children's well-being and promoting a culture of health in schools.

Health & Solidarity Caravan – Initiative of the Elite Club in Sais

Club Elite organized a multidisciplinary medical caravan, bringing together several specialties to offer comprehensive and free care to local communities. This initiative took place on November 16th and mobilized 20 dedicated volunteers. Medical services offered: We set up several specialized booths including general medicine for basic consultations, pediatrics for children's checkups, gynecology for women's health, dermatology, ophthalmology, and dental care. Paramedical examinations (blood pressure, blood sugar, wound dressings) were also provided by our teams of medical and nursing students. Awareness and prevention: Beyond providing care, we conducted awareness workshops on hygiene, disease prevention, and good health practices, reaching the entire community. Impact: This caravan allowed us to treat several beneficiaries in a single day, identify several cases requiring medical follow-up, and, most importantly, establish a close connection with a population often far removed from healthcare facilities.

Conference-Debate “End Plastic Soup”: Reflection and Commitment for a Sustainable Future

The Oratio Club, in partnership with the Rotaract Euromed Club, organised a conference-debate as part of the international “End Plastic Soup” week, an initiative aimed at raising awareness of the issues related to plastic pollution.

This event brought together students and members of both clubs for an enriching exchange on the role of plastic in our society today, its environmental and social impacts, and the long-term challenges it poses. The discussions also highlighted innovative solutions and sustainable alternatives for reducing our plastic footprint and promoting more responsible consumption patterns.

Through this interactive meeting, participants were encouraged to adopt a proactive stance and become agents of change, thus contributing to building a more environmentally friendly future.

Medical and Humanitarian Caravan for the Benefit of the Residents of the El Haj El Hadi Tajmouti Retirement Home

On November 20, 2025, a medical and humanitarian caravan was organized at the El Haj El Hadi Tajmouti retirement home in the city of Fez. The aim of this initiative was to provide medical, psychological, and human support to the elderly residents of the facility.

The program included medical consultations to assess the residents' health and address their specific needs. Simultaneously, activities to provide emotional support and entertainment were organized to encourage interaction, combat isolation, and offer moments of conviviality and well-being.

The caravan also featured the distribution of donations aimed at improving the daily lives of those receiving assistance. This act of solidarity reflects a strong commitment to the respect, dignity, and well-being of the elderly, while reinforcing the values of solidarity and social responsibility among the participating volunteers.

HIV Screening Day at the Euromed University of Fez: Awareness, Prevention, Action – Elite Club

On November 20, 2025, an HIV screening was organized within the Euromed University of Fez, in collaboration with ALCS, as part of health awareness and prevention actions.

This initiative aimed to inform students about the importance of early detection, to dispel misconceptions about HIV, and to encourage a responsible attitude towards sexual health. Through educational support and open discussions, participants received reliable and relevant information.

The screening took place in a strictly confidential, secure environment, supervised by qualified professionals. Students benefited from personalized advice and supportive guidance. This initiative helped strengthen the culture of prevention, responsibility, and solidarity within the university community.

Mobile Medical and Dental Clinic in Tamedit: A Commitment to Solidarity in Service of Rural Communities

A multidisciplinary medical caravan was organized in Tamedit, in the Taounate region, to strengthen access to care for local populations and to meet the health needs of rural communities.

This initiative mobilized several medical specialties, allowing beneficiaries to access tailored consultations in various healthcare fields. Dental care played a central role, with consultations, extractions, restorative treatments, scaling, and the fitting of dental prostheses provided, ensuring comprehensive and high-quality treatment.

Furthermore, the pharmacy service provided free dispensing of prescribed medications, contributing to appropriate therapeutic monitoring and the improvement of patients' health.

Through this high-impact social action, the club reaffirms its commitment to health equity, the well-being of rural populations and the promotion of sustainable solidarity.

School Health Caravan in Aïn Chkef: Prevention and Well-being of Students by the Elite Club

On December 20, 2025, the Elite Club organized a school health caravan in Aïn Chkef, in the Moulay Yaacoub region, aimed at promoting prevention and the well-being of students.

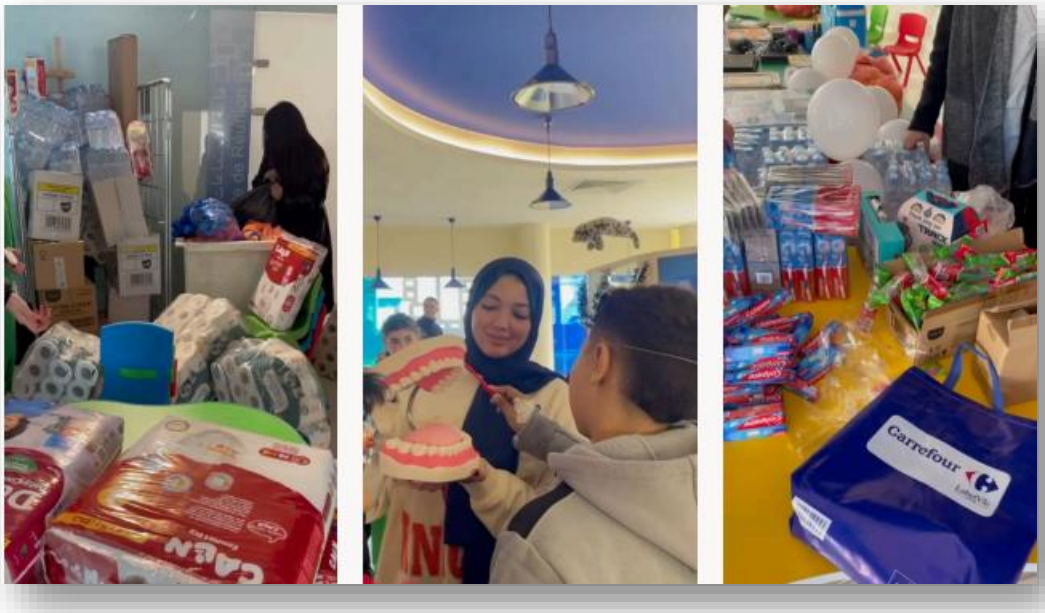

The dental component offered consultations, preventive care and awareness campaigns, in order to instill good oral hygiene habits and prevent dental diseases from a young age.

In parallel, general medical consultations were conducted to assess the overall health of the students, while the ophthalmology department ensured the screening of visual disorders, guaranteeing comprehensive and preventive care.

This initiative by the Elite Club constitutes an essential educational and preventive action, strengthening the culture of health in schools and contributing significantly to the well-being and protection of students.

Solidarity visit to the Pediatric Hematology-Oncology Department of the University Hospital by the Elite Club

On January 8, 2026, the Elite Club, in collaboration with the PISE project and the Prosthetists Association, organized a solidarity visit to the pediatric hematology-oncology department of the University Hospital, with the aim of bringing comfort, entertainment and awareness to hospitalized children.

A specially designed space allowed the children to enjoy games and fun activities, two PlayStation consoles, and a library to encourage reading. Desserts and bottles of water were distributed to make their day more pleasant and enjoyable.

In parallel, the club carried out an oral health prevention campaign, distributing hygiene kits (toothbrushes and toothpaste), as well as essential products such as diapers, toilet paper and wipes.

This initiative made it possible to combine fun, education and care, strengthening the well-being of children and illustrating the solidarity and human commitment of the Elite Club towards young hospitalized patients.

Solidarity Caravan of the Mémoire en Scène Club: Support for Families in Need

The Mémoire en Scène Club organised a solidarity caravan aimed at providing concrete support to families in vulnerable situations.

Through this initiative, 26 families received essential assistance, including food, basic necessities and social support.

This initiative reflects the club's commitment to social responsibility and community support, while raising awareness among its members of the values of solidarity, mutual aid, and active citizenship. It contributes to strengthening the local social fabric and improving the daily lives of those it serves.

ECG Interpretation Training led by Dr. Mohamed Amine Guessab 02/04

As part of its internal training program, the Elite Club organized, on Thursday, April 2, 2026, a training session in electrocardiogram (ECG) interpretation, led by Dr. Mohamed Amine Guessab.

The aim of this session was to strengthen the clinical skills of club members in reading and analyzing ECG tracings, an essential tool in the diagnosis of cardiovascular diseases. Through a combined theoretical and practical approach, participants acquired the fundamental principles of interpretation, as well as keys to applied clinical reasoning.

This initiative reflects the Elite Club's commitment to promoting excellence, capacity building, and skills development among its members by offering high-quality training led by experienced healthcare professionals. It also demonstrates the club's dedication to effectively preparing its members for the challenges they face in the field, particularly during medical caravans and community health initiatives.

Blood Donation Campaign – April 2 & 3, 2026

As part of its civic and solidarity actions, the Elite Club organized the "Blood Donation Campaign - April 2 & 3, 2026", an initiative aimed at raising awareness of the importance of blood donation and actively contributing to strengthening national reserves.

Over these two days, club members mobilized to encourage student and staff participation, while also ensuring logistical organization and providing optimal support to donors. This campaign resulted in a significant number of donations, contributing to saving lives and meeting the urgent needs of healthcare facilities.

Beyond its health impact, this initiative also provided a powerful moment for raising awareness and fostering solidarity, strengthening the spirit of commitment and social responsibility within the university community. It fully reflects the values of the Elite Club, founded on mutual support, volunteerism, and positive impact in service to society.

Solidarity Iftar – Ramadan 2026

As part of its Ramadan activities, Club Élite organized the "Solidarity Iftar – Ramadan 2026" initiative, aimed at promoting the values of solidarity, sharing, and civic engagement. This initiative involved preparing and distributing 150 iftar meals to people in need.

Made possible through the active mobilization of club members and the involvement of its partners, this initiative provided concrete support to beneficiaries, while strengthening the spirit of mutual aid and social cohesion, particularly significant during the holy month of Ramadan.

Beyond its humanitarian aspect, this action fully illustrates the Elite Club's identity as a committed actor, working towards a positive and lasting social impact. It also demonstrates the club's ability to initiate and lead solidarity projects with strong human value, responding to the needs of communities.

Tazouta Medical-Humanitarian Caravan – Sefrou Province

On March 8, 2026, the Elite Club of the Euromed University of Fez organized a mobile medical and dental outreach program in Tazouta, in the province of Sefrou, to benefit the local population. This humanitarian and healthcare initiative involved 15 doctors and 5 dentists, all working together towards a common goal: bringing healthcare closer to the inhabitants of rural areas and improving access to specialist consultations.

The mobile clinic provided medical consultations in several specialties, including gynecology (with ultrasound examinations), cardiology, gastroenterology, rheumatology, and dental care and consultations. Thanks to the commitment of healthcare professionals, student volunteers, and mobilized partners, this initiative helped meet the medical needs of many beneficiaries in a spirit of solidarity, prevention, and social support.

ECG Interpretation Training led by Dr. Mohamed Amine Guessab 02/04

As part of its internal training program, the Elite Club organized, on Thursday, April 2, 2026, a training session in electrocardiogram (ECG) interpretation, led by Dr. Mohamed Amine Guessab.

The aim of this session was to strengthen the clinical skills of club members in reading and analyzing ECG tracings, an essential tool in the diagnosis of cardiovascular diseases. Through a combined theoretical and practical approach, participants acquired the fundamental principles of interpretation, as well as keys to applied clinical reasoning.

This initiative reflects the Elite Club's commitment to promoting excellence, capacity building, and skills development among its members by offering high-quality training led by experienced healthcare professionals. It also demonstrates the club's dedication to effectively preparing its members for the challenges they face in the field, particularly during medical caravans and community health initiatives.

School Health Caravan – Ben Khlif School Group, Ouled Mimoun 11/04

On April 11, 2026, Club Élite organized the "School Health Caravan – Ben Khlif School Group, Ouled Mimoun," as part of its community health and school-based prevention initiatives. This initiative aimed to promote the health and well-being of students while reinforcing preventative practices from a young age.

During the day, students received general medical consultations, dental care and procedures, as well as visual acuity tests. Oral health prevention workshops were also held, along with the distribution of toothbrushes and toothpaste, to raise children's awareness of good dental hygiene practices.

This initiative fully illustrates the Elite Club's commitment to youth health and prevention, while demonstrating its ability to organize comprehensive and structured interventions to serve school communities. It also reflects the club's spirit of solidarity and social responsibility towards children and their educational environment.

Source : Elite UEMF club report 25-26

School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi 18/04

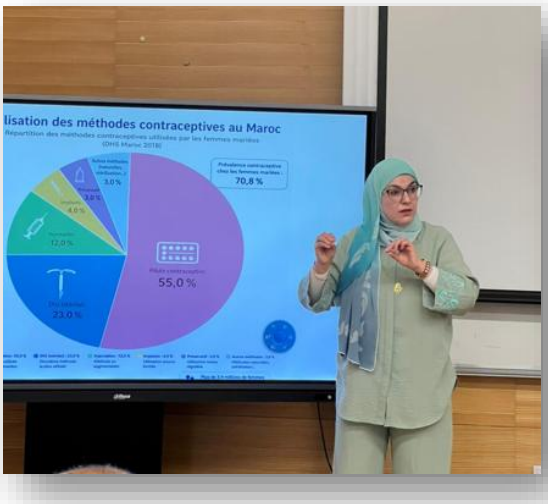

On April 18, 2026, the Elite Club organized the "School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi," as part of its health and prevention initiatives for students. This action aimed to promote well-being and health prevention within the school environment.

During the day, students were able to receive general medical consultations, dental care and procedures, as well as visual acuity tests. In addition, oral hygiene workshops were held, along with the distribution of toothbrushes and toothpaste, to raise awareness among young people about the importance of hygiene and preventative care.

This intervention illustrates the Elite Club's commitment to improving student health and strengthening prevention from a young age, while demonstrating its ability to deploy comprehensive and structured health caravans, meeting the needs of local school communities.

Sexual and reproductive health: raising awareness for better prevention

On April 23, 2026, the Elite Club of the Euromed University of Fez organized a conference on sexual and reproductive health in partnership with ALCS and the Espace Santé Jeunes Ville Nouvelle Fez. The aim of this event was to raise student awareness of issues related to sexual and reproductive health through an educational, preventative, and participatory approach.

The conference focused primarily on three major themes: sexually transmitted infections (STIs), sex education, and contraception. Speakers emphasized the importance of access to reliable information, prevention, and adopting responsible behaviors to promote the health and well-being of young people.

Through interactive exchanges and enriching discussions, this initiative has created a space for open and constructive dialogue, helping to break taboos around sexual health and raising student awareness of these essential public health issues.

Mobile Medical and Dental Clinic in Ksar Jdid 26/04

On April 26, 2026, the Elite Club of the Euromed University of Fez organized a medical-dental caravan in Ksar Jdid, in the province of Rissani, as part of its humanitarian and social actions aimed at strengthening access to care in rural and remote areas.

This initiative mobilized a team of healthcare professionals and volunteers to provide multidisciplinary medical consultations to local residents. The services offered covered several specialties, including cardiology, gastroenterology, gynecology, dermatology, and ophthalmology, in addition to dental consultations and care, as well as general medicine.

The caravan aimed to bring health services closer to local populations, promote early detection, and raise awareness of the importance of prevention and medical follow-up. It thus enabled comprehensive and accessible healthcare for beneficiaries.

Through this action, the Elite Club reaffirms its commitment to solidarity, health promotion and social development in service of vulnerable communities.

Humanitarian caravan in Ksar Jdid: 150 blankets to support rural families

On May 3, 2026, the Elite Club of the Euromed University of Fez organized a humanitarian caravan to Ksar Jdid, in the province of Rissani, as part of its solidarity actions aimed at supporting rural populations and improving their living conditions.

This initiative is part of a local humanitarian approach, driven by values of mutual aid, solidarity, and social commitment. It enabled the distribution of 150 blankets to beneficiary families, helping them cope with the weather and meet their basic daily needs, particularly during cold periods.

Beyond the material aid, this caravan provided a powerful moment of sharing and connection with the residents, strengthening the bonds between the volunteers and the local population. This initiative reflects the Elite Club's commitment to providing concrete solutions to the needs of vulnerable communities and contributing to the improvement of their living conditions.

Through this type of initiative, the Elite Club confirms its long-term commitment to humanitarian action, social development and territorial solidarity.

A social and educational day for the benefit of the children of the Lalla Amina Center

On Thursday, May 7, 2026, the Elite Club of the Euromed University of Fez, in collaboration with the Directorate of Student Affairs, participated in the organization of a cultural and sporting day for the benefit of the children of the Lalla Amina Center for the Protection of Children.

This solidarity initiative was marked by the distribution of Elite bags containing school supplies, including pencil cases, pens, notebooks and coloring books, in order to support and encourage children in their educational journey.

During the day, the Elite Club also ran an oral hygiene awareness workshop, along with the distribution of toothbrushes and toothpaste. The workshop aimed to educate children about the importance of brushing their teeth and good hygiene practices to maintain their oral health.

Through this social and educational action, the Elite Club reaffirms its commitment to children, education and the promotion of health.

Mobile dental clinic in Izlafene: strengthening access to care and prevention

On May 9, 2026, the Elite Club of the Euromed University of Fez, in partnership with the IAA Club of the Faculty of Sciences and Techniques of Fez, organized a medical and dental caravan in Izlafene, in the province of Taza, as part of its community health and prevention initiatives. This initiative provided medical consultations in general medicine, cardiology, and gynecology, along with the dispensing of medication to diagnosed patients. A significant oral health prevention component was also implemented through awareness campaigns and the distribution of 400 toothbrushes and toothpaste to beneficiaries. Through this initiative, the two clubs helped bring healthcare services closer to rural populations while reinforcing awareness of the importance of prevention and medical follow-up.

Source : Elite UEMF club report 25-26

Humanitarian action in Izlafene: solidarity and support for rural families

As part of the medical and humanitarian caravan organized on May 9, 2026, in Izlafene, the Elite Club of the Euromed University of Fez and the IAA Club of the Faculty of Sciences and Techniques of Fez also carried out a significant humanitarian effort to benefit families in the region. This act of solidarity enabled the distribution of 150 food baskets to beneficiary families, supporting vulnerable populations and contributing to the improvement of their living conditions. In addition, recreational and entertainment activities were organized for children, creating a moment of sharing, joy, and connection with the local community. This initiative reflects the values of mutual aid, solidarity, and civic engagement upheld by both clubs in support of social and human development.

UEMF's Got Talent: a 6ème an edition dedicated to talent, creativity and emotion

As part of its policy to promote student well-being and the development of artistic and creative skills, the Euromed University of Fez (UEMF) organized the 6thème The UEMF's Got Talent edition, a cultural event that has become a key part of university life, brought together students, teachers, and members of the university community to celebrate creativity, cultural diversity, and artistic expression.

Throughout the evening, participants presented a variety of performances showcasing their talents in diverse fields such as singing, dancing, stage performance, and other forms of artistic expression. This event provided students with a platform to share their passions, develop their self-confidence, improve their communication skills, and strengthen their ability to speak in front of an audience. Beyond its artistic dimension, UEMF's Got Talent fosters inclusion, diversity, and cohesion within the university community. By celebrating individual talent and the cultural richness of students, this event helps strengthen the sense of belonging to the University and promotes an environment that respects the diversity of backgrounds, cultures, and forms of expression.

This initiative illustrates UEMF's commitment to a holistic educational approach that goes beyond the acquisition of academic knowledge to also foster students' personal development, creativity, initiative, and social skills. It thus contributes to creating a stimulating university environment conducive to individual growth and the development of talents.

Partnership

[Call for applications] Mobility at the University of Angers

As part of its efforts to develop international student mobility, the Euromed University of Fez has launched a call for applications for an academic exchange at the University of Angers, aimed at second-year students in the biomedical engineering program at the BiomedTech Engineering School (EIB). This opportunity allows selected students to pursue a period of study in an international academic environment, fostering the acquisition of scientific, linguistic, and intercultural skills.

Candidate selection is based on academic excellence, language proficiency, and student motivation. The process includes several stages, including application submission, internal pre-selection, file evaluation, and interviews before final appointment by the university.

This initiative reflects UEMF's commitment to promoting international openness, strengthening university partnerships and training engineers capable of evolving in a global scientific and professional context.

The Euromed University of Fez hosts a strategic event on AI and signs a structuring agreement for Industry X.0

The Euromed University of Fez hosted a high-level event on March 10, 2026, dedicated to the role of artificial intelligence in the digital transformation of organizations, with a focus on Industry X.0 and the healthcare industries. Organized in partnership with the Ministry of Digital Transition and Administrative Reform and the Ministry of Industry and Trade, this meeting was marked by the signing of the Jazari Industry X.0 agreement, aimed at strengthening synergies between academic research, industry, and public institutions in order to accelerate technology transfer and the commercialization of scientific research.

As part of the "AI Made in Morocco" program, this initiative aims to structure a national artificial intelligence ecosystem that fosters innovation, industrial competitiveness, and the creation of economic and societal value. The event also brought together public decision-makers, researchers, and industry representatives for two panels dedicated to technology transfer and the impact of AI in the healthcare industry, highlighting the opportunities and challenges associated with the deployment of artificial intelligence technologies.

2026 : The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

The Euromed University of Fez places quality education at the heart of its academic and societal mission. Through innovative training programs, educational projects, the regular organization of scientific and intellectual conferences, and the active promotion of academic mobility, UEMF strives for an inclusive, rigorous, and globally oriented education. This commitment aims to train competent and responsible citizens capable of meeting the challenges of sustainable development and global transformations.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez places quality education at the heart of its mission, in line with the objectives of SDG 4. Through an integrated approach, the university is committed to offering inclusive and innovative teaching that addresses contemporary challenges of sustainable development. This commitment is reflected in the implementation of policies aimed at strengthening teaching quality, integrating sustainability principles, and promoting responsible digital transformation. The Euromed University of Fez also strives to create a supportive learning environment by guaranteeing equal opportunities and access to quality educational resources. The institutional policies adopted contribute to developing students' skills while raising their awareness of environmental and societal issues. This dynamic fosters responsible and engaged citizens. Thus, the university affirms its role in promoting sustainable and inclusive education.

- Projets étudiants et doctorants sur le bilan carbone, le recyclage, l'éco-design et l'adaptation climatique-résilience.

d. Innovation, incubation et entrepreneuriat vert

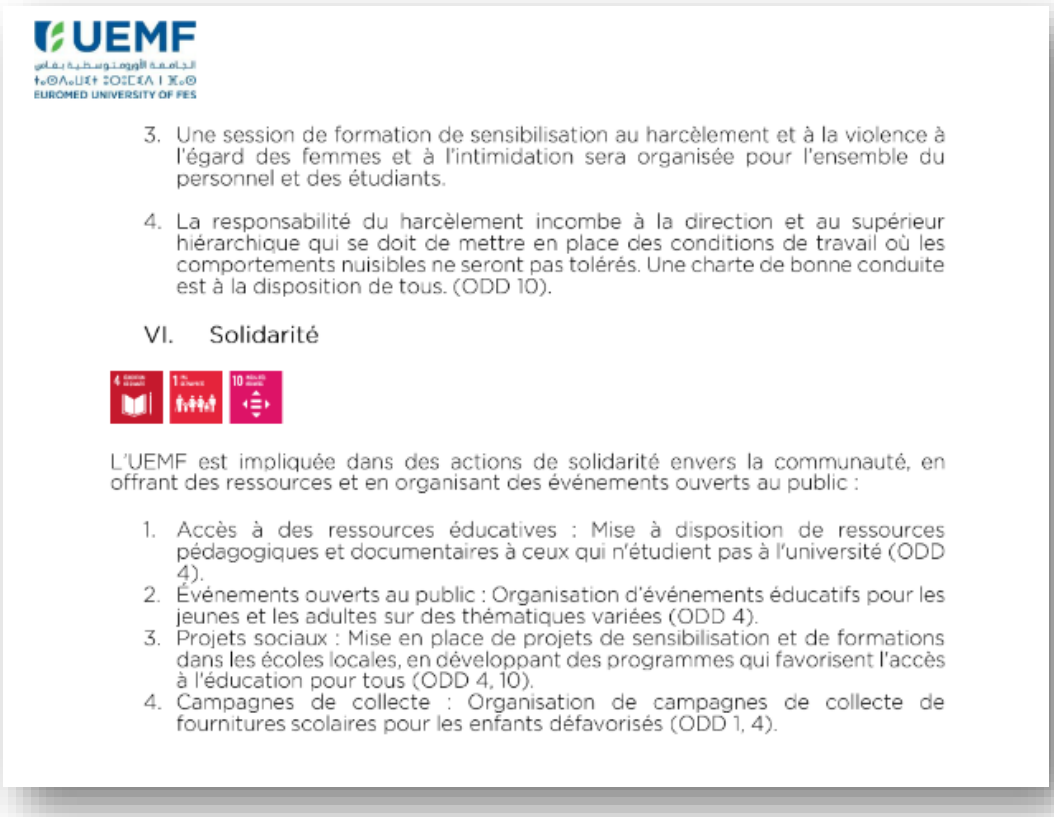

- Incubation de start-up dans les domaines de la mobilité électrique, de la technologie propre, de l'agritech, et des énergies renouvelables ;
- Organisation régulière de hackathons sur l'agritech, l'énergie, la gestion durable et la réduction du carbone, mobilisant étudiants, chercheurs et partenaires industriels ;
- Accompagnement des porteurs de projets à impact environnemental au sein de l'Euromed Innovation Center et de l'écosystème Fez Smart Factory, à travers des programmes d'incubation, de mentorat et de valorisation technologique favorisant la mobilité électrique, l'agritech, les énergies renouvelables et l'économie circulaire.e. Partenariats et coopération

  Depuis septembre 2024, l'Euromed Innovation Center accompagne la transformation des idées en projets à fort impact, avec des résultats concrets :

  - 143 projets accompagnés et mentorés,
  - 632 personnes sensibilisées à l'entrepreneuriat,
  - 27 startups incubées et juridiquement établies.

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

UEMF
الجامعة الأورومتوسطية بفاس
EUROMED UNIVERSITY OF FES

3. Une session de formation de sensibilisation au harcèlement et à la violence à l'égard des femmes et à l'intimidation sera organisée pour l'ensemble du personnel et des étudiants.

4. La responsabilité du harcèlement incombe à la direction et au supérieur hiérarchique qui se doit de mettre en place des conditions de travail où les comportements nuisibles ne seront pas tolérés. Une charte de bonne conduite est à la disposition de tous. (ODD 10).

VI. Solidarité

L'UEMF est impliquée dans des actions de solidarité envers la communauté, en offrant des ressources et en organisant des événements ouverts au public :

1. Accès à des ressources éducatives : Mise à disposition de ressources pédagogiques et documentaires à ceux qui n'étudient pas à l'université (ODD 4).
2. Événements ouverts au public : Organisation d'événements éducatifs pour les jeunes et les adultes sur des thématiques variées (ODD 4).
3. Projets sociaux : Mise en place de projets de sensibilisation et de formations dans les écoles locales, en développant des programmes qui favorisent l'accès à l'éducation pour tous (ODD 4, 10).
4. Campagnes de collecte : Organisation de campagnes de collecte de fournitures scolaires pour les enfants défavorisés (ODD 1, 4).

This policy embodies UEMF's commitment to integrating social responsibility into all of its missions. It highlights the importance of reconciling academic performance, respect for the environment, and a positive societal impact.

UEMF
EUROMED UNIVERSITY OF FES

Actions d'enseignement et de recherche-innovation

L'UEMF a plusieurs programmes de formation et de recherche concernant l'efficacité énergétique :

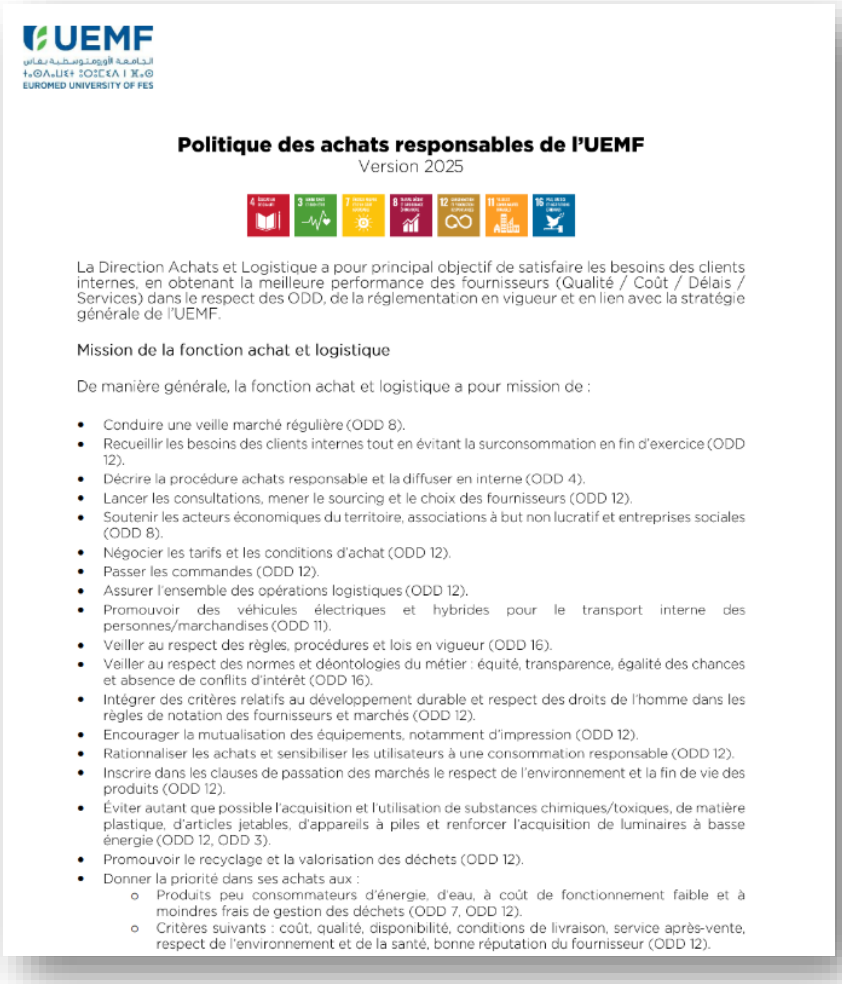

1. Master en Énergies Renouvelables et Efficacité Énergétique (ODD 4).
2. Master en Conception et Ingénierie des Bâtiments Verts (ODD 9, ODD 12).
3. Master en Transport et Mobilité Durable (ODD 11).
4. Équipe de recherche sur les Énergies Renouvelables et Efficacité Énergétique (ODD 7).
5. Équipe de recherche sur les Matériaux Bio-Sourcés (ODD 12).
6. Équipe de recherche sur l'Hydrogène vert (ODD 7).
7. Équipe de recherche sur l'Efficacité Énergétique (ODD 7).
8. Équipe de recherche sur les Matériaux robustes et légers pour l'aéronautique (ODD 9).
9. Projet de Centre pour le Climat en cours d'installation à l'UEMF en collaboration avec l'Union pour la Méditerranée (ODD 13).
10. Installation de Fès-Smart Factory sur l'Éco-campus de l'UEMF avec une grande composante concernant l'innovation en matière d'efficacité énergétique (ODD 9).
11. Plusieurs laboratoires concernant le développement durable, le dessalement d'eau et les énergies renouvelables, incluant une maison sur campus concernant les études et la recherche sur l'efficacité énergétique (ODD 9).
12. Participation à l'élaboration des politiques aux niveaux local, régional et national pour contribuer à la réalisation des engagements internationaux du Maroc pour le développement durable et des technologies des énergies propres (ODD 17).
13. Sensibilisation de la communauté et offre de services aux industries locales visant à améliorer l'efficacité énergétique (ODD 9).
14. Assistance à la communauté locale en soutenant le démarrage d'entreprises durables par le biais de formation et de mentorat (incubateur régional, conférences, ...) (ODD 8).

Application et révision

L'application de la politique énergétique relève de la direction du patrimoine qui doit s'assurer que les programmes concernant la gestion énergétique sont mis en œuvre. La Politique est révisée sur une base triennale.

UEMF is committed to optimizing its energy consumption and promoting the use of renewable energy. This policy aims to reduce the University's carbon footprint while ensuring the efficiency of its infrastructure.

UEMF Responsible Procurement Policy (Version 2025)

UEMF
EUROMED UNIVERSITY OF FES

Politique des achats responsables de l'UEMF

Version 2025

La Direction Achats et Logistique a pour principal objectif de satisfaire les besoins des clients internes, en obtenant la meilleure performance des fournisseurs (Qualité / Coût / Délais / Services) dans le respect des ODD, de la réglementation en vigueur et en lien avec la stratégie générale de l'UEMF.

Mission de la fonction achat et logistique

De manière générale, la fonction achat et logistique a pour mission de :

- Conduire une veille marché régulière (ODD 8).
- Recueillir les besoins des clients internes tout en évitant la surconsommation en fin d'exercice (ODD 12).
- Décrire la procédure achats responsable et la diffuser en interne (ODD 4).
- Lancer les consultations, mener le sourcing et le choix des fournisseurs (ODD 12).
- Soutenir les acteurs économiques du territoire, associations à but non lucratif et entreprises sociales (ODD 8).
- Négocier les tarifs et les conditions d'achat (ODD 12).
- Passer les commandes (ODD 12).
- Assurer l'ensemble des opérations logistiques (ODD 12).
- Promouvoir des véhicules électriques et hybrides pour le transport interne des personnes/marchandises (ODD 11).
- Veiller au respect des règles, procédures et lois en vigueur (ODD 16).
- Veiller au respect des normes et déontologies du métier : équité, transparence, égalité des chances et absence de conflits d'intérêt (ODD 16).
- Intégrer des critères relatifs au développement durable et respect des droits de l'homme dans les règles de notation des fournisseurs et marchés (ODD 12).
- Encourager la mutualisation des équipements, notamment d'impression (ODD 12).
- Rationnaliser les achats et sensibiliser les utilisateurs à une consommation responsable (ODD 12).
- Inscrire dans les clauses de passation des marchés le respect de l'environnement et la fin de vie des produits (ODD 12).
- Éviter autant que possible l'acquisition et l'utilisation de substances chimiques/toxiques, de matière plastique, d'articles jetables, d'appareils à piles et renforcer l'acquisition de luminaires à basse énergie (ODD 12, ODD 3).
- Promouvoir le recyclage et la valorisation des déchets (ODD 12).
- Donner la priorité dans ses achats aux :
  - Produits peu consommateurs d'énergie, d'eau, à coût de fonctionnement faible et à moindres frais de gestion des déchets (ODD 7, ODD 12).
  - Critères suivants : coût, qualité, disponibilité, conditions de livraison, service après-vente, respect de l'environnement et de la santé, bonne réputation du fournisseur (ODD 12).

With this policy, the UEMF is establishing a framework for ethical and sustainable procurement. It encourages the selection of suppliers who share values of transparency, social and environmental responsibility.

Smoke-free policy (Revised version 2025)

UEMF

EUROMED UNIVERSITY OF FES

Politique Sans Fumée à l'UEMF :

Une Démarche Vers le Développement Durable

(version révisée 2025)

À l'Université Euromed de Fès (UEMF), la mise en place d'une politique sans fumée contribue directement à plusieurs Objectifs de Développement Durable (ODD) en favorisant un environnement plus sain et plus durable sur le campus. Cette initiative ne se limite pas à la promotion du bien-être, mais témoigne également de l'engagement de l'université envers des pratiques durables.

1. ODD 3 : Bonne Santé et Bien-être

En interdisant de fumer sur le campus, l'UEMF fait un pas important vers l'amélioration de la santé publique. Le tabagisme étant une des principales causes de maladies évitables, la création d'un environnement sans fumée permet de réduire l'exposition à la fumée secondaire, protégeant ainsi les fumeurs et les non-fumeurs de ses effets nocifs. Cela s'aligne sur l'ODD 3, qui vise à garantir une vie en bonne santé et à promouvoir le bien-être de tous, à tous les âges.

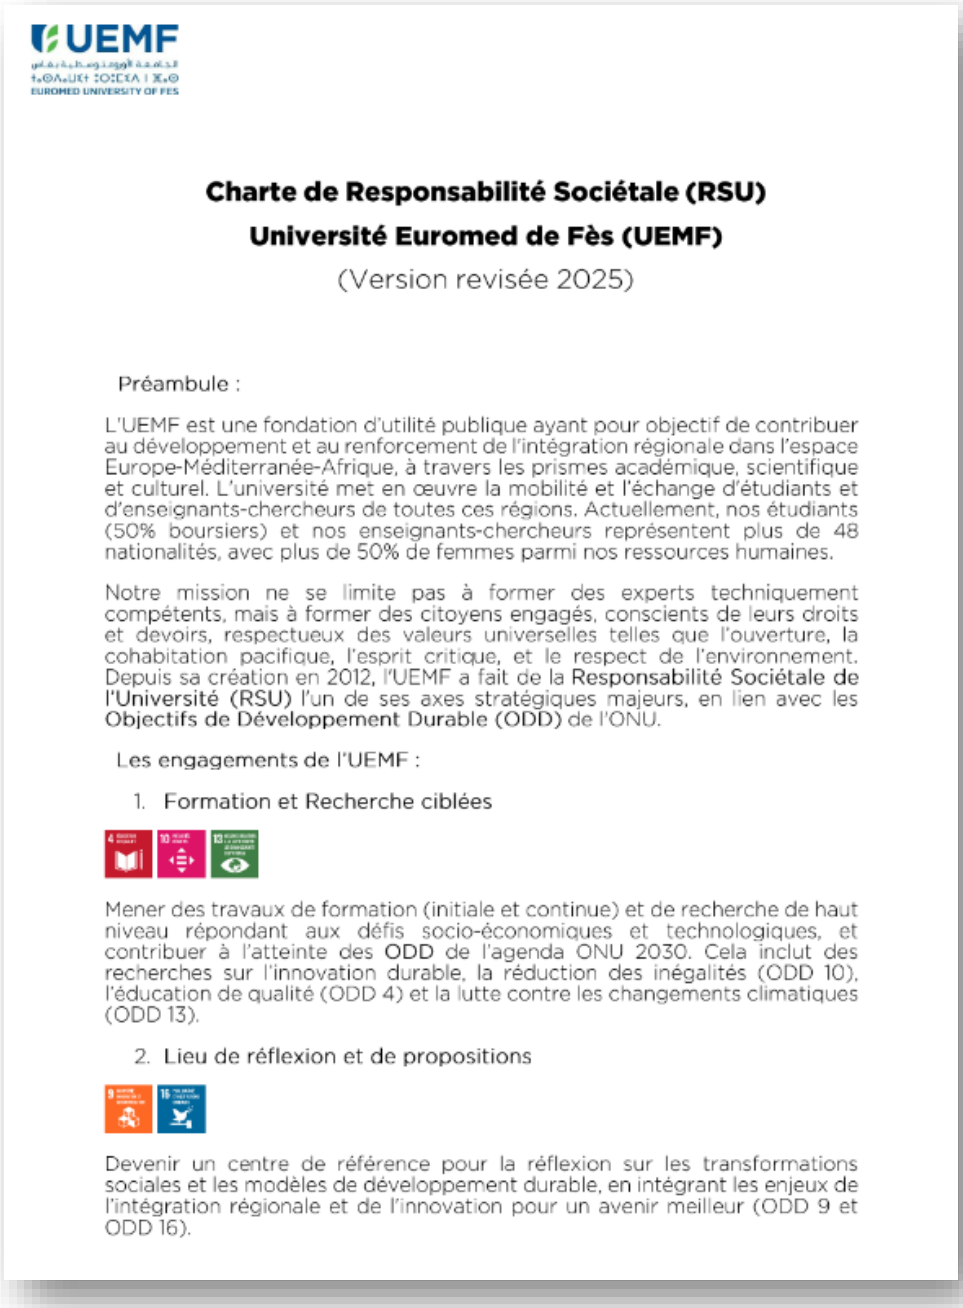

2. ODD 4 : Éducation de Qualité

Un campus sans fumée favorise un meilleur environnement d'apprentissage, ce qui soutient l'objectif de l'ODD 4 visant à assurer une éducation de qualité, inclusive et équitable. La réduction des distractions et la promotion de comportements sains permettent aux étudiants de mieux se concentrer sur leurs études et améliorent l'expérience éducative globale.

3. ODD 11 : Villes et Communautés Durables

En contribuant à un environnement plus propre et plus sain, la politique sans fumée est en adéquation avec l'ODD 11, qui appelle à rendre les villes et les établissements humains inclusifs, sûrs, résilients et durables. La limitation du

UEMF is committed to preserving the health and well-being of its community by implementing a smoke-free policy on its campus. This initiative promotes a healthy environment conducive to learning and community life.

UEMF
EUROMED UNIVERSITY OF FES

Charte de Responsabilité Sociétale (RSU)

Université Euromed de Fès (UEMF)

(Version revisée 2025)

Préambule :

L'UEMF est une fondation d'utilité publique ayant pour objectif de contribuer au développement et au renforcement de l'intégration régionale dans l'espace Europe-Méditerranée-Afrique, à travers les prismes académique, scientifique et culturel. L'université met en œuvre la mobilité et l'échange d'étudiants et d'enseignants-chercheurs de toutes ces régions. Actuellement, nos étudiants (50% boursiers) et nos enseignants-chercheurs représentent plus de 48 nationalités, avec plus de 50% de femmes parmi nos ressources humaines.

Notre mission ne se limite pas à former des experts techniquement compétents, mais à former des citoyens engagés, conscients de leurs droits et devoirs, respectueux des valeurs universelles telles que l'ouverture, la cohabitation pacifique, l'esprit critique, et le respect de l'environnement. Depuis sa création en 2012, l'UEMF a fait de la **Responsabilité Sociétale de l'Université (RSU)** l'un de ses axes stratégiques majeurs, en lien avec les **Objectifs de Développement Durable (ODD)** de l'ONU.

Les engagements de l'UEMF :

1. Formation et Recherche ciblées

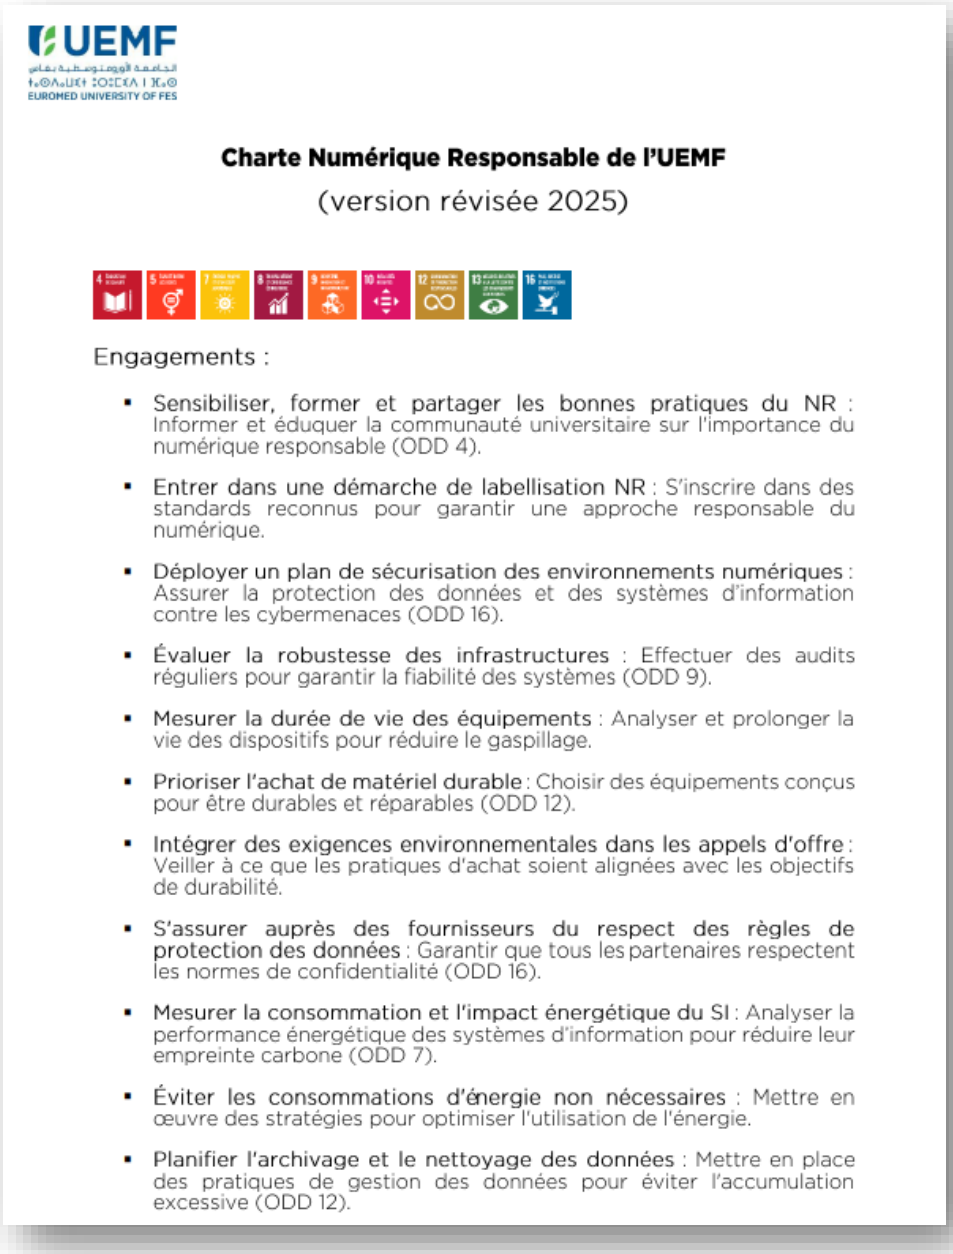

Mener des travaux de formation (initiale et continue) et de recherche de haut niveau répondant aux défis socio-économiques et technologiques, et contribuer à l'atteinte des **ODD** de l'agenda ONU 2030. Cela inclut des recherches sur l'innovation durable, la réduction des inégalités (ODD 10), l'éducation de qualité (ODD 4) et la lutte contre les changements climatiques (ODD 13).

2. Lieu de réflexion et de propositions

Devenir un centre de référence pour la réflexion sur les transformations sociales et les modèles de développement durable, en intégrant les enjeux de l'intégration régionale et de l'innovation pour un avenir meilleur (ODD 9 et ODD 16).

This charter formalizes the integration of social responsibility at the heart of the UEMF's missions. It outlines concrete commitments in the areas of ethics, governance, respect for the environment and contribution to sustainable development.

UEMF Responsible Digital Charter (Revised Version 2025)

UEMF

EUROMED UNIVERSITY OF FES

Charte Numérique Responsable de l'UEMF

(version révisée 2025)

Engagements :

- **Sensibiliser, former et partager les bonnes pratiques du NR** : Informer et éduquer la communauté universitaire sur l'importance du numérique responsable (ODD 4).
- **Entrer dans une démarche de labellisation NR** : S'inscrire dans des standards reconnus pour garantir une approche responsable du numérique.
- **Déployer un plan de sécurisation des environnements numériques** : Assurer la protection des données et des systèmes d'information contre les cybermenaces (ODD 16).
- **Évaluer la robustesse des infrastructures** : Effectuer des audits réguliers pour garantir la fiabilité des systèmes (ODD 9).
- **Mesurer la durée de vie des équipements** : Analyser et prolonger la vie des dispositifs pour réduire le gaspillage.
- **Prioriser l'achat de matériel durable** : Choisir des équipements conçus pour être durables et réparables (ODD 12).
- **Intégrer des exigences environnementales dans les appels d'offre** : Veiller à ce que les pratiques d'achat soient alignées avec les objectifs de durabilité.
- **S'assurer auprès des fournisseurs du respect des règles de protection des données** : Garantir que tous les partenaires respectent les normes de confidentialité (ODD 16).
- **Mesurer la consommation et l'impact énergétique du SI** : Analyser la performance énergétique des systèmes d'information pour réduire leur empreinte carbone (ODD 7).
- **Éviter les consommations d'énergie non nécessaires** : Mettre en œuvre des stratégies pour optimiser l'utilisation de l'énergie.
- **Planifier l'archivage et le nettoyage des données** : Mettre en place des pratiques de gestion des données pour éviter l'accumulation excessive (ODD 12).

Digital technology plays a central role at UEMF, but its use must be responsible. This charter defines best practices regarding digital tools, data security, and reducing environmental impact.

E-SDG

Through SDG 4 – Quality Education, UEMF offers a multidisciplinary and inclusive range of training programs, covering all three of its main areas: Health, Engineering & Architecture, and Humanities & Social Sciences. This diversity encompasses programs ranging from medicine, dentistry, pharmacy, and nursing to engineering, architecture, design, and digital technologies, as well as management, law, political science, and the humanities and social sciences.

This complementarity of disciplines allows the University to develop diverse academic pathways, promoting the acquisition of scientific, professional, digital and human skills, in line with the requirements of a quality education geared towards the needs of society and the professional world.

1Initial training leading to a diploma

Doctor of Medicine, Specialist Physician and Teacher-Researchers in Medicine.
Students enrolled at FEM have the opportunity to spend two to three semesters studying abroad. FEM offers this opportunity through the following programs:

- Exchange agreements established with our partners;
- Credit mobility agreements within the framework of the ERASMUS+ program.

Opportunities for international and intercultural internships may be offered.

2. CONTINUING EDUCATION

The FEM is progressively developing continuing education programs qualifying or diploma-granting courses, in various forms: full-time or part-time continuing education or work-study training.

3. DOCTORAL (Ph.D.) TRAINING

The doctoral program is a research-based training program culminating in the award of a Doctor of Medicine (Ph.D.) degree in Medical and Biomedical Sciences, following the defense of research work before a jury. This doctoral research training is organized at the Doctoral Studies Center in Medical Sciences at the Euromed University of Fez.

1. Initial Diploma Training

- Title of Doctor of Dental Medicine after six years of training.

- Possibility of an exchange semester during the professional immersion internship in partner Euro-Mediterranean establishments or within the framework of the mobility agreements provided for by the ERASMUS+ program.

2. CONTINUING EDUCATION

- A rich and diverse continuing education offer that meets the training needs of dentists;
- Updating their knowledge and strengthening their skills;
- Continuous adaptation to the digital transformation linked to technological progress.

Euromed Faculty of Pharmacy

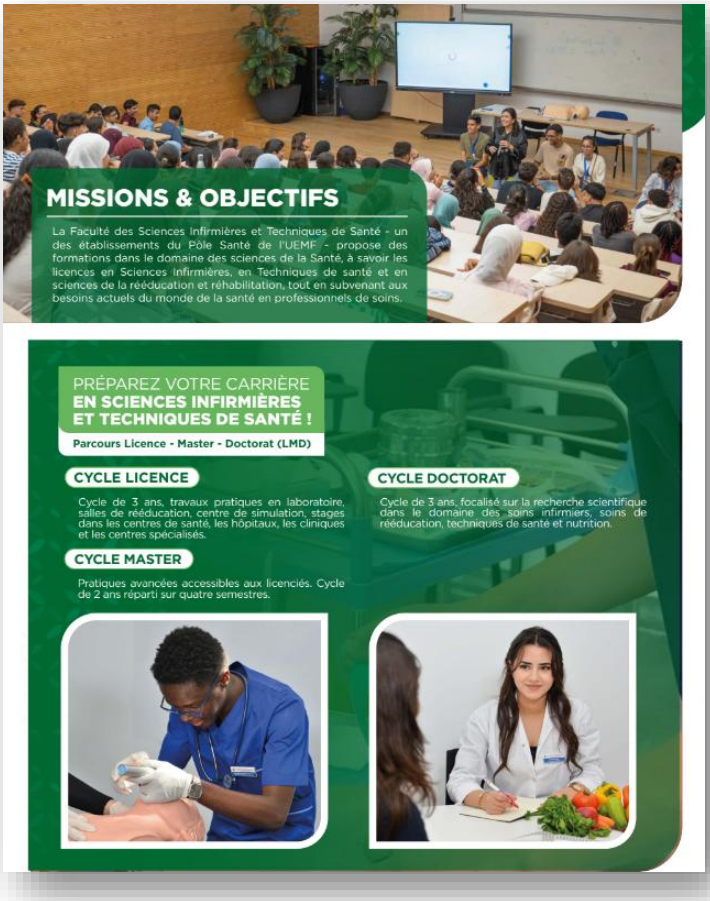

The Euromed Faculty of Pharmacy (FEP), a component of the Euromed University of Fez, offers a six-year program leading to a Doctor of Pharmacy degree. This program is part of a strong international strategy, based on structured academic collaborations with European universities, promoting student and faculty mobility, particularly within the Erasmus+ program, as well as the development of joint programs, double degrees, and collaborative research projects. This degree opens doors to numerous promising careers, particularly in the following sectors:

- The pharmaceutical industry,
- The hospital pharmacy,
- The pharmacy,
- Pharmaceutical R&D.

The Euromed Faculty of Pharmacy (FEP) offers a comprehensive program designed to train dedicated pharmacists capable of addressing current healthcare challenges under optimal safety conditions. The Doctor of Pharmacy degree is recognized by the Moroccan state, and the FEP aims to develop dual degree programs with European universities, fostering a dynamic of international collaboration.
The training program is based on innovative teaching methods that integrate artificial intelligence, data analysis, and biotechnology to improve treatment effectiveness and the quality of care. Furthermore, the FEP offers international mobility opportunities through academic exchanges, the Erasmus+ program, and internships abroad.

FACULTY OF NURSING AND HEALTH TECHNOLOGY

1. Sectors:

- MULTI-SKILLED NURSE
- Anesthesia and Resuscitation Nurse
- SPEECH THERAPIST
- PSYCHOMOTOR TRACKER
- DIETETICS - NUTRITION
- LABORATORY TECHNIQUES
- RADIOLOGY TECHNIQUES

2. LMD pathway:

- BACHELOR'S DEGREE PROGRAM:

3-year cycle, practical work in laboratory, rehabilitation rooms, simulation center, internships in health centers, hospitals, clinics and specialized centers.

- MASTER'S PROGRAM:

Advanced training accessible to licensed students. Two-year program divided into four semesters.

- DOCTORAL PROGRAM:

A 3-year program focused on scientific research in the fields of nursing, rehabilitation care, health techniques and nutrition.

1.INTEGRATED PREPARATORY CYCLE (2 YEARS)

This program prepares students with the essential foundations for success in engineering fields. It enables them to:

- Acquire solid scientific knowledge: mathematics, applied physics, chemistry, cell and molecular biology.
- Mastering digital and computer tools for modeling, simulation and analysis.
- Develop transferable skills: scientific communication, collaborative work, project management and professional ethics.
- To be introduced to research and innovation through integrative projects and practical internships.

2. ENGINEERING PROGRAM (3 YEARS)

Field of study: Biomedical Engineering

Objective: To train engineers capable of designing and maintaining medical devices, utilizing imaging and robotics technologies, and proposing innovative solutions to improve the patient journey.

Field of study: Biotechnological Engineering

Objective: To prepare students to design, develop and supervise biotechnological processes, develop innovative products and ensure compliance with standards and regulations.

Field of study: Bioinformatics Engineering

Objective: To train engineers capable of analyzing and modeling biological data, developing digital tools for health and integrating artificial intelligence into biomedical practices.

1. PREPARATORY CYCLE

The Integrated Preparatory Cycle at the School of Digital Engineering and Artificial Intelligence is designed to provide students with in-depth scientific and technical training, enabling them to access the various digital engineering tracks. This program combines courses in computer science, electronics, applied mathematics, and humanities and social sciences, in order to lay a solid foundation for the rest of their studies in the engineering cycle.

2. ENGINEERING PROGRAM

Sectors:

- Artificial Intelligence (AI)
- Robotics and Cobotics
- Big Data Analysis
- Information Technology and Cybersecurity
- Full Stack and Multimedia Engineering

3. MASTER'S PROGRAM

ICT Security and Artificial Intelligence (dual degree program with George Washington University) *

1. ARCHITECT'S CYCLE: Architect's Degree (Bac +6)

The diploma obtained through this program is an architecture degree with Moroccan recognition and accreditation:

2. BACHELOR'S DEGREE PROGRAM: Bachelor's degree in Design (3 years post-high school)

The EMADU Design degree is designed to train designers capable of creatively managing, beyond the object, decision-making processes, mediation and the integration of multidisciplinary contributions; thus enabling graduates to work across a very wide range of sectors.

3. MASTER'S PROGRAM: Master in Global Design (Bac+5)

EMADU offers an innovative, multidisciplinary and internationally open training program, promoting practical learning, critical thinking, innovation and the development of skills necessary for design professions.

EUROMEDPOLYTECHNIC SCHOOL

1. ENGINEERING PROGRAM

- Civil engineer
- Industrial Engineer
- Energy and Environmental Process Engineer
- Mechanical, production and thermal engineering engineer
- Engineer in Electronics, Electrotechnics and Automation
- Telecommunications Engineer

2. MASTER'S PROGRAM

- Master's degree in logistics and supply chain engineering
- Master's degree in environmental engineering and water management
- Master's degree in entrepreneurial support and technological management
  - Master in Sustainable Energy (double degree with the University of Surrey - UK)
  - Executive master in logistics and supply chain
  - Executive MBA in Healthcare Supply Chain Management

DOUBLE DEGREES INTERNATIONAL MOBILITY

1. BACHELOR'S DEGREE PROGRAM

The Bachelor's degree in Political and Legal Sciences offers a multidisciplinary education in social sciences, law, and political science. After a common core curriculum in the first two years, students choose a specialization in either political science or legal sciences. It prepares students for Master's level studies as well as careers in public administration, local government, research and consulting, communications, journalism, and the non-profit sector. The third year is dedicated to a selective international exchange program.

2. MASTER'S PROGRAM

At the Master's level, the Institute offers a diverse range of courses in political science and legal science, with several specializations:

- Master's Degree in Mediterranean and African Politics –double degree with the University of Paris 1 Panthéon-Sorbonne
- Master's Degree in Conflict Management and the Alliance of Civilizations
- Master of Economic and Social Administration– relocated from the University of Toulouse Capitole
- Master's Degree in Business Law– Sorbonne Law School
- Master's Degree in Digital Law
- Master's Degree in Sports Law

3. DOCTORAL CYCLE

Graduates of Masters programs in political science and law with a research profile could apply to pursue doctoral studies with the possibility of joint supervision with the University of Paris 1 Panthéon-Sorbonne.

Faculty of Humanities and Social Sciences

1. BACHELOR'S DEGREE PROGRAM

- Bachelor's Degree in Translation
- Bachelor's Degree in Social Sciences and Health Management

2. MASTER'S PROGRAM

- Master's Degree in Corporate and Institutional Communication
- Master's degree in Translation Studies
- Master's Degree in Clinical Psychology and Psychotherapy
- Master's Degree in Applied Foreign Languages (LEA): Intelligence and Ecosystems
- Innovators in Europe (Double degree program with the University of Strasbourg)

3. DOCTORAL PROGRAM

The top graduates of the Master's program are admitted to the doctoral program at UEMF or a partner university, receiving a monthly stipend. Research in the humanities and social sciences focuses on eight main themes:

- Heritage and heritage-making in Euro-Mediterranean societies;
- Mobility in the Euro-Mediterranean area;
- Euro-Mediterranean cities and societies;
- The Shattered Museum, a new approach to heritage mediation;
- Teaching Spanish as a foreign language;
- Language teaching and interculturality;
- A chair in "Human Rights" in partnership with the CNDH;
- Social sciences applied to environmental management

1. Preparatory Classes in Business and Management

The two preparatory years in Commerce and Management provide a solid foundation in economics, management and organization, while developing analytical, critical thinking and problem-solving skills, before choosing a specialized track at EBS.

2. Grande École Program (3 years after 2 years of higher education)

The Grande École Program (PGE) at Euromed Business School is a five-year postgraduate program designed to train senior executives and entrepreneurs through an approach focused on internationalization, entrepreneurship, digitalization, and responsibility. It leads to the DENCG diploma, with the option of a dual international degree.

Sectors:

- Finance, Audit and Performance Management (FAPP)
- International Business Management (IBM)
- Human Resources and Digital and Societal Transformations (HRTS)
- E-Marketing and Digital Communication (EMCD)

3. MASTER'S PROGRAM

Sectors:

- Accounting, Control and Auditing (CCA)
- Actuarial Science and Financial Engineering (SAIF)

Research, Innovation & Entrepreneurship

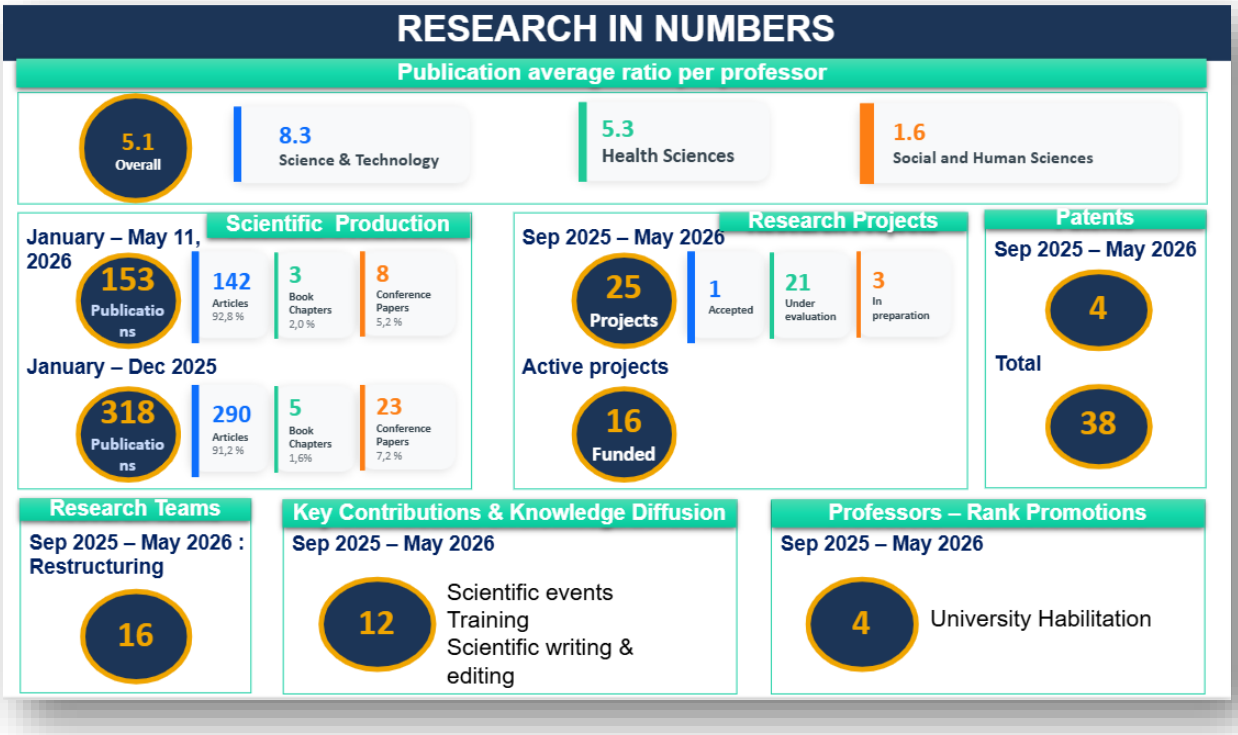

Research Topics - Doctoral Cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 4 has been identified. This work focuses in particular on educational innovation, educational technologies, artificial intelligence applied to learning, university governance, language skills, learning environments, and improving the quality and accessibility of education.

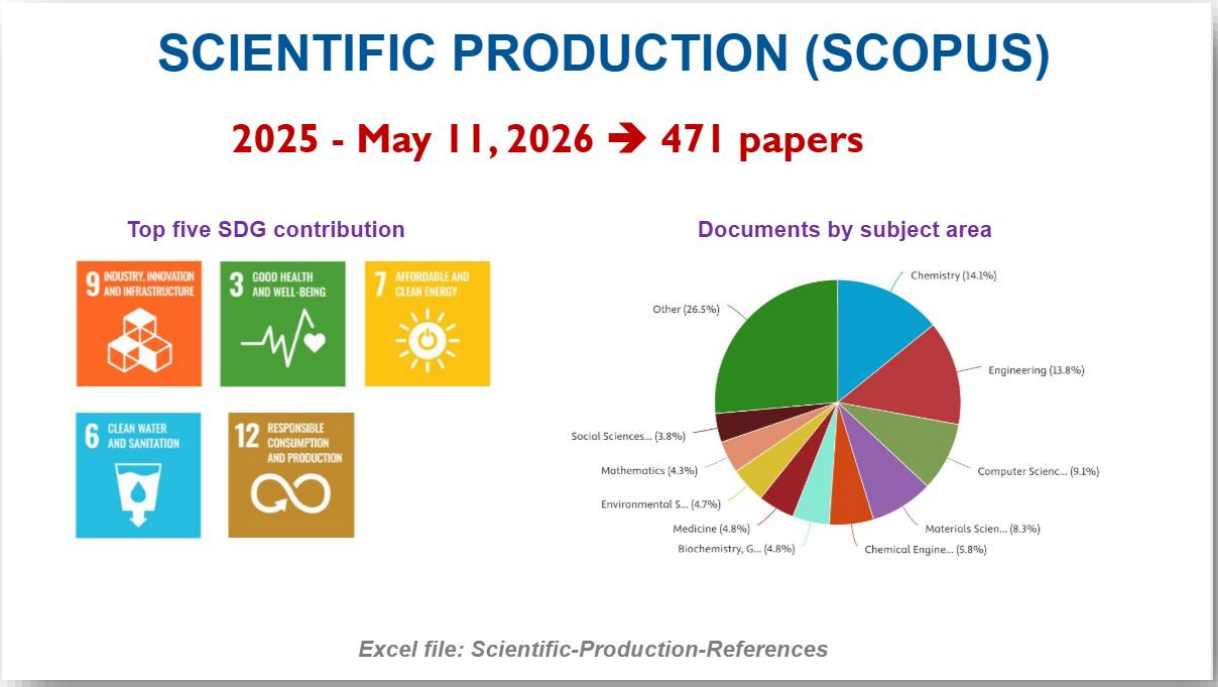

The table below presents the main research topics contributing to this objective.

Thesis Subject	related SDGs
Combating Antibiotic Resistance Using Artificial Intelligence and Experiment-Driven Solutions	SDG 4
The Role of Internal Auditing in Strengthening Governance, Transparency, and Academic Performance in Moroccan Universities	SDG 4
Development of Optical Biosensors for Breast Cancer Detection	SDG 4
About the Normality of Urgency and Emergency: Climate Change Narratives in Video Games	SDG 4
Design of IoT Platform for Cancer Detection Using High Frequency Ultrasounds	SDG 4
Design and Synthesis via CH Bond Activation of the Pyrazino-[1a,3a,6a]-Triazapentalene (PyTAP): Application to Other Heterocycles Containing Nitrogen	SDG 4
Civilization, Culture, and Religion in Perceptions Between East and West: Analysis of Identity Constructions in the Digital Age	SDG 4
Interdisciplinary Spaces in Educational Architecture: Influencing Behavior, Perceptions, and Emotions in the Learning Experience	SDG 4
AI adoption and team performance: success factors and organizational impacts	SDG 4
AI-Powered Copilot for Personalized English's Core Skills Learning with Real Time Advanced Performance Analytics	SDG 4
Assessment of Brain Drain Factors among African Students in Science, Technology, Engineering, Arts, and Medicine (STEAM) Fields	SDG 4
Media and Societies: What Impact on Governance Systems in Africa and the Mediterranean	SDG 4
Media and University in Africa: What governance for What Results?	SDG 4

Entrepreneurship Awareness Day – STARTECH 3e eedition

On November 13, 2025, the Euromed University of Fez (UEMF) organized an entrepreneurship awareness event as part of the 3rdeedition of the STARTECH Call for Projects.

The program includes: presentation of entrepreneurial opportunities in Morocco, exchange with local entrepreneurs, intervention by Bank of Africa on project financing and an introductory workshop on design thinking.

Intended for 3rd grade studentse4eand 5eOrganized this year by students from EBS, EIDIA and EIB, this activity brought together 200 participants and aimed to promote innovation and initiative.

3e and last Tech4Farmers Bootcamp of the 2e Cohort

From September 23 to 25, 2025, the Euromed University of Fez, via the Euromed Innovation Center, hosted the third and final bootcamp of the Tech4Farmers – Tamkin LiTanmia program, intended for AgriTech project leaders of the second cohort.

Organised as part of the programme funded by the AFD, this bootcamp focused on business maturation, pitching and preparation for fundraising, through workshops, mentoring and exchanges with experts.

It marks the end of the incubation cycle and confirms UEMF's commitment to innovation and impact entrepreneurship in the service of sustainable agriculture in the Fes-Meknes region.

Tech4Farmers Demo Day: closing of the second cohort

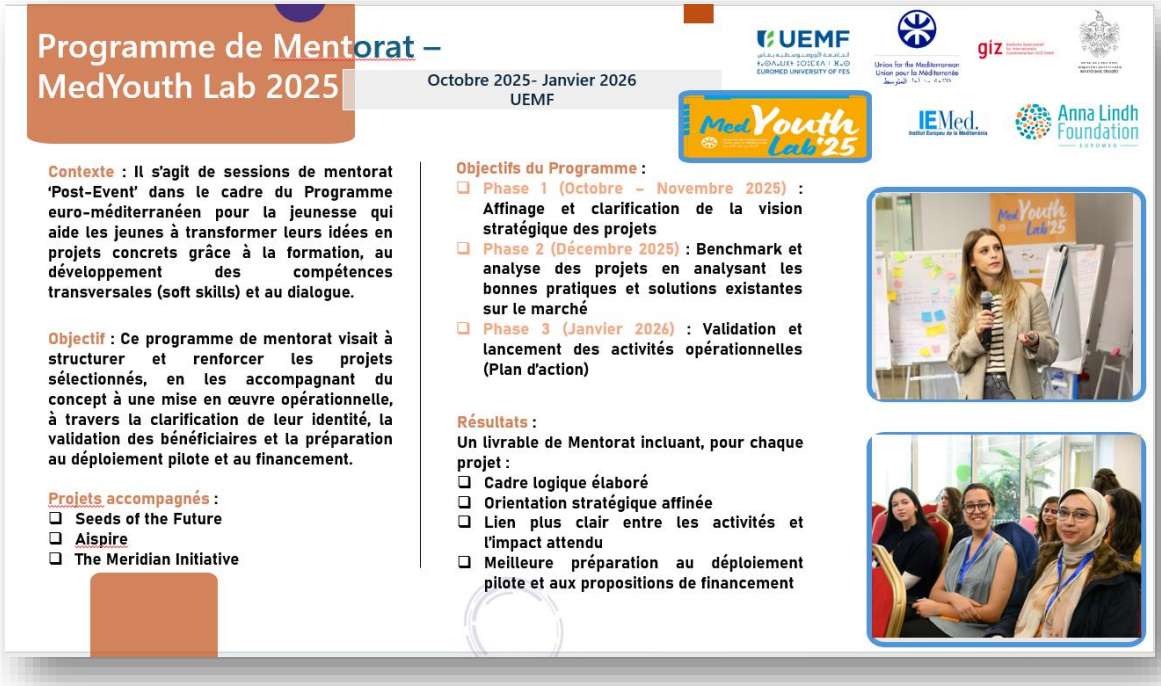

Organised by the Euromed Innovation Centre, the AgriTech Demo Day marked the closing of the second cohort of the Tech4Farmers programme, after 12 months of incubation of innovative startups within the framework of the AgriTech Regional Innovation and Entrepreneurship Hub.

The event allowed project leaders to present their solutions to an ecosystem composed of investors, institutional investors, researchers and agricultural professionals, fostering concrete opportunities for collaboration and deployment.

With the participation of partners such as the French Development Agency and major players in the sector, this initiative illustrates the commitment of the Euromed University of Fez to sustainable agricultural innovation with environmental impact..

Mentoring Program – MedYouth Lab 2025

The Mentorship Programme – MedYouth Lab 2025, organised at UEMF from October 2025 to January 2026, supported young project leaders in structuring and implementing their initiatives.
Through three phases (strategic clarification, benchmarking and validation of the action plan), the Seeds of the Future, Aispire and The Meridian Initiative projects benefited from a strengthened logical framework, better strategic direction and preparation for pilot deployment and funding.

Source : ACTIVITY REPORT OF THE DIRECTORATE OF SOCIO-ECONOMIC PARTNERSHIPS AND ENTREPRENEURSHIP 2025-2026

National Hackathon – ActIn Space 6th Edition

On January 30 and 31, 2026, the UEMF hosted the 6th edition of the national ActIn Space Hackathon, an international competition dedicated to the applications of space technologies.

Following preparatory webinars and technical and entrepreneurial workshops, the teams presented their projects in a final pitch. The AtlasSpace team was selected to represent Morocco in the international phase in Bordeaux.

The event brought together 28 participants divided into 8 teams, reinforcing the dynamics of innovation and technological entrepreneurship within the UEMF.

AI Ramadan Hackathon: Innovation and skills at the service of local development

The Euromed University of Fez hosted the Ramadan AI Hackathon, a national initiative aimed at transforming innovative ideas into concrete solutions based on artificial intelligence. For three days, students, young professionals, and project leaders collaborated in a multidisciplinary setting, guided by mentors, to develop prototypes addressing local challenges. The event fostered skills development, responsible innovation, and entrepreneurship, culminating in final presentations before a jury that allowed participants to showcase their solutions and receive feedback for their development.

Hack'Days 2026: Stimulating regional innovation and entrepreneurship

The Euromed Innovation Center (EIC) has launched the Hack'Days 2026 call for projects, in partnership with TAMWILCOM through the InnovInvest fund and Blue Space by Bank of Africa. This initiative targets project leaders, teams, and startups in the Fes-Meknes, Drâa-Tafilalet, and Oriental regions, aiming to structure and accelerate the development of innovative solutions. Ten projects from each region will be selected to participate in the bootcamp, and three projects will receive post-bootcamp support. This initiative strengthens the regional dynamic of innovation and entrepreneurship by supporting the creation of concrete and competitive solutions.

Ramadan AI Hackathon: UEMF projects distinguished at the regional and national level.

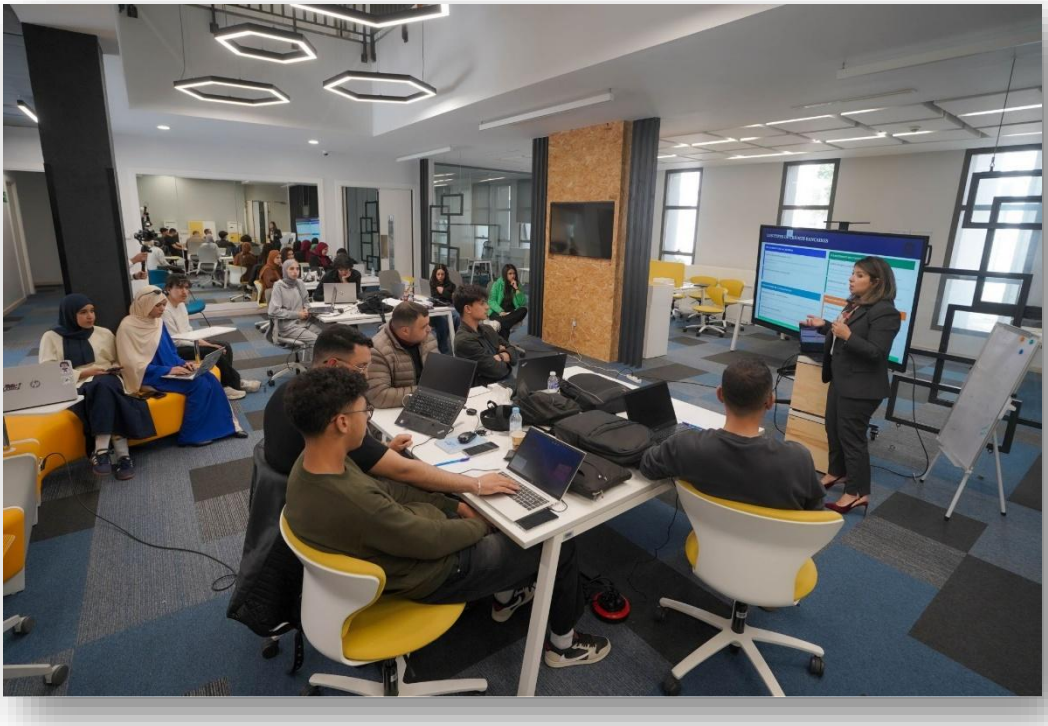

As part of the RamadanIA program, supported by theMinistry of Digital Transition and Administrative ReformThe Euromed University of Fez hosted the Fez-Meknes regional final, bringing together students, project leaders and young entrepreneurs around artificial intelligence solutions applied to territorial challenges.

At the end of this stage, two projects from the UEMF community stood out: 🥇 GaiaEye – Grand Prize for Regional Excellence. 💡 Audacity Alwarid – Innovation & Creativity Award.

These projects then represented the region at the national hackathon in Rabat, bringing together the best teams from the Kingdom's 12 regions. At this event, the Audacity Alwarid project distinguished itself once again, winning 2nd prize nationally, as well as the Jazari Jury's Choice Award, confirming the relevance and impact of its solution in the field of digital healthcare transformation.

Congratulations to our students.
Lamiae HADI,Nada E.,Ahlam TARK,Chaimae OuarabAndHamel GOUNGOU, for their commitment, their creativity and the quality of the work accomplished through this project.

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF

the UEMF. TheEuromed innovation center (EIC) organized, in partnership withTAMWILCOMvia the InnovInvest Fund and BlueSpace (Bank of Africa), on April 16 and 17, the Hack'Days of the Fes-Meknes region, bringing together students, project leaders and young entrepreneurs around an intensive bootcamp dedicated to the creation and development of innovative solutions.

As part of a dynamic of supporting high-potential talent, this program aims to support the emergence of projects in strategic sectors such as digital, health, agritech, cybersecurity, greentech, fintech or edtech, thus contributing to the development of the regional entrepreneurial ecosystem.

Over the course of two days, participants were supported in structuring their ideas, designing concrete solutions and preparing their projects, in an environment conducive to experimentation, collaboration and collective intelligence.

A true space for learning and co-creation, this event allowed each team to develop their project, benefiting from constructive feedback, dedicated mentoring and guidance that fosters the maturation of entrepreneurial initiatives

The Hack'Days concluded with pitch sessions, offering participants the opportunity to present their projects, compare their ideas and reveal their full potential, in a dynamic focused on innovation and impact.

We extend our sincere congratulations to all participants for their commitment, creativity, and entrepreneurial spirit. This initiative confirms the role of the UEMF, through the Euromed Innovation Center, as a key player in structuring and supporting innovation at the regional and national levels.

The Euromed University of Fez at SIAM 2026: a showcase of AgriTech innovation and the closing of the Tamkin Li Tanmia program

On the occasion of the 18th edition of the International Agricultural Show in Morocco in Meknes, Euromed University of Fez, through its Euromed Innovation Center (EIC), actively participated in this major event by highlighting the Tech4Farmers — Tamkin Li Tanmia program, deployed within the framework of the PRIE AgriTech Fez-Meknes.

This participation showcased several innovative AgriTech startups, while also fostering exchanges between entrepreneurs, investors, farmers, and institutional partners. The event also marked the official closing of the Tamkin Li Tanmia program, which supported 33 startups in developing innovative and sustainable agricultural solutions.

Through this initiative, the UEMF confirms its commitment to innovation, entrepreneurship and sustainable territorial development, while strengthening synergies between public, private and academic actors in service of the transformation of the Moroccan agricultural sector.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

On May 7th and 8th, 2026, theEuromed innovation center (EIC)organized the regional Hack'Days Oriental bootcamp, organized as part of the Hack'Days by Region 2026 program, supported by Tamwilcom via the Innov Invest Fund, in partnership with Blue Space by Bank of Africa.

For two days, project leaders from the Oriental region participated in intensive support designed to transform innovative ideas into structured, viable projects ready to accelerate their development.

Seven projects were selected following the initial rounds to participate in this edition and benefit from mentorship provided by experts and key players in the entrepreneurial ecosystem. Participants worked on key aspects of their projects: strategic vision, business model, market positioning, validation of the value proposition, and growth prospects.

The projects developed covered several high-stakes sectors: • Cleantech & hybrid energy • EdTech & financial education • HealthTech & drug safety • FinTech & algorithmic trading • Applied AI & cybersecurity

Beyond technical support, this bootcamp primarily created a space for meetings, reflection and experimentation where participants could challenge their ideas, share their experiences and develop their projects by interacting with experts and other entrepreneurs.

Digi-Hackathon “Mobile Health”: three days of innovation and engagement in service of youth health at UEMF

The Euromed University of Fez hosted the 4th eThe "Mobile Health" Digi-Hackathon, a national event dedicated to innovation in digital health and the development of technological solutions addressing public health challenges, was held in partnership with the Ministry of Health and Social Protection, the Euromed Innovation Center (EIC), and with the support of UNFPA. This hackathon placed particular emphasis on youth mental health and the prevention of psychoactive substance use.

For three days, students, experts, healthcare professionals, and project leaders collaborated in an environment that fostered innovation, entrepreneurship, and collective intelligence. The participating teams received technical and strategic support to develop innovative digital solutions tailored to the needs of teenagers and young adults.

The event also featured conferences and discussion forums on current issues in digital health and improving access to healthcare services through mobile technologies. Through this initiative, the UEMF reaffirms its commitment to socially impactful innovation, developing young people's skills, and fostering collaboration between health, technology, and entrepreneurship.

Amine Driouchi: A Moroccan journey at the heart of biophysical innovation

Moroccan biophysicist based in California, Dr. Amine Driouchi, offered students of the School of Biomedical and Biotechnology Engineering (EIB) at the Euromed University of Fez (UEMF) a general overview of current advances in cell imaging and the study of protein interactions.

A member of CxT Discovery, a research center integrated with the University of Berkeley, Dr. Driouchi presented the main points of his work, highlighting the mechanisms of interaction between proteins and their potential implications in biomedical research.

The speaker also discussed several experimental approaches and imaging tools used throughout his career, illustrating how these technologies now allow us to better understand cellular dynamics and support therapeutic innovation.

The conference also provided an opportunity for exchanges with the students and researchers in attendance, who were particularly inspired by his interdisciplinary vision and his passion for training young scientists. It was a significant encounter that offered a glimpse into the future of innovation in biophysics.

Pink October: Breast Cancer, from Prevention to Integrated Care

As part of the Euromed University of Fez's lecture series, a meeting was held on the theme "Breast Cancer: From Prevention to Integrated Care", led by Professor Chakib Nejjari, Vice-President in charge of the Health Department of UEMF.

During this conference, Professor Nejjari emphasized the importance of early detection, a determining factor in improving the chances of recovery, as well as the need for an integrated approach combining care, psychological support and social support.

This initiative is part of the Pink October campaign.🎗, an international awareness movement. Through this action, the UEMF reaffirms its commitment to public health, prevention and the promotion of well-being within the university community.

Beyond this conference, the UEMF (Euromed University of Marseille) carries out various awareness and screening initiatives throughout the year for its students, faculty, and staff: blood donation drives, prevention workshops, free consultations, and partnerships with regional healthcare facilities. These initiatives reflect the University's commitment to making the Euromed campus an exemplary space for health, solidarity, and civic responsibility.

Rihab Forum: Rethinking the City at UEMF

The Euromed University of Fez welcomed Professor Pascal Le Brun-Cordier, associate professor at the Sorbonne School of Arts and co-founder of the Cultural Urbanism Movement, for a conference entitled "The Gold of Links: How to Breathe More Life into Our Cities".

Organized as part of the first Rihab Forum, this meeting provided a space for reflection on the role of human connections in the vitality of contemporary cities. The Professor emphasized the importance of designing urban spaces as places of conviviality, creativity, and solidarity, capable of strengthening community life and encouraging civic participation.

For students of the School of Architecture, Design and Urbanism (EMADU), this conference was a privileged opportunity to explore new approaches to urbanism, integrating culture and emotion as essential levers of a more humane and vibrant city.

The discussions allowed for the exploration of concepts such as the relational city and cultural urbanism, highlighting the role of the social and artistic dimension in shaping the territories of tomorrow.

A comparative look at Morocco's development: a presentation by Mr. Mohammed Boutaleb at the UEMF

The Euromed University of Fez was pleased to welcome Mr. Mohammed Boutaleb, former Minister of Energy and Mines, for a remarkable conference dedicated to the development of Morocco.

Organised as part of the UEMF Conference Cycle, this meeting allowed the public to delve into the heart of the major economic, social and territorial issues of the Kingdom.

Under the theme "Morocco's Development from Different Perspectives," Mr. Boutaleb delivered an inspiring testimony, the fruit of his extensive experience serving the country and his in-depth reflection on the challenges and prospects for development. He notably highlighted the ongoing structural transformations and emphasized the importance of sustainable, inclusive development rooted in local realities.

For our students, this conference represented a powerful moment of learning and dialogue, inviting them to take an informed look at the major dynamics of transformation in Morocco.

The session concluded with an interactive and constructive exchange, during which numerous questions fueled the discussion.

The Euromed University of Fez extends its sincere thanks to Mr. Mohammed Boutaleb for this rich and inspiring intervention, which is perfectly consistent with the mission of the UEMF: to train engaged citizens, open to the world and actors in sustainable development.

Arbitration Market: Lecture by Professor Walid BEN HAMIDA

The Euro-Mediterranean University of Fez (UEMF) had the honor of hosting Professor Walid BEN HAMIDA, an eminent academic and university professor in France, for a high-level conference on the theme: "The Arbitrage Market".

This meeting is part of the UEMF's ongoing commitment to promoting intellectual openness, academic dialogue and the exchange of ideas on current issues with a strong impact.

During his presentation, Professor Ben Hamida offered a thorough and nuanced analysis of the arbitration market, addressing its legal foundations, economic mechanisms, and strategic challenges within the context of globalization and market transformation. His presentation, rich in concrete examples and comparative perspectives, enabled students to gain a comprehensive and informed understanding of the topic.

This conference also provided an opportunity for students to actively participate in the debate, asking relevant questions and sharing their thoughts. These fruitful exchanges helped strengthen their critical thinking skills and their ability to grasp the complex issues of contemporary law and economics.

The Euromed University of Fez expresses its deepest gratitude to Professor Walid Ben Hamida for the quality of his presentation, the clarity of his remarks, and the generosity with which he shared his experience. His expertise and academic commitment greatly contributed to the success of this meeting, which will remain a highlight of our students' educational journey.

Roundtable: Rethinking the question of the State

Thinking about the State means questioning one of the oldest and most complex human constructs. It was to this exercise that Professor Mohamed El Maazouz, a political anthropologist, devoted himself during a round table bearing the title of his latest work, "On the State," organized jointly by the United Nations Chair – Alliance of Civilizations and the ICESCO Chair "Arts, Societies and Civilizations."

Through a historical, philosophical and anthropological approach, Professor El Maazouz revisited the genesis and metamorphoses of the modern state, questioning its relevance in the era of contemporary upheavals: globalization of flows, recomposition of politics and transformations of living together.

This exchange, rich in perspectives and nuances, offered a space for fruitful dialogue between researchers and students around a central question: how to rethink the State in light of the changes in our societies and the challenges of the globalized world, and consider its resilience in the face of contemporary upheavals?

A moment of high intellectual caliber, illustrating the commitment of the two organizing chairs to dialogue between civilizations, critical thinking and the promotion of knowledge as a vector of unity and mutual understanding.

Enhancing educational quality through innovation: a focus on flipped classrooms

As part of its lecture series, the Euromed University of Fez hosted a presentation by Professor Amal El Ouazzani Ech-Chahdi, Dean of the Euromed Faculty of Dental Medicine, dedicated to quality and pedagogical innovation in higher education.

This meeting highlighted contemporary developments in teaching practices, in particular the flipped classroom approach, which redefines the role of the teacher, strengthens student autonomy and optimizes face-to-face time for the benefit of interaction, critical analysis and active learning.

Beyond the methodological presentation, Professor El Ouazzani Ech-Chahdi emphasized the strategic importance of educational quality, recalling that innovation is an essential lever for meeting constantly evolving academic and professional requirements.

The conference concluded with a constructive exchange with teacher-researchers, demonstrating a shared desire to adopt more agile, engaging and learner-centered teaching practices.

Carl Jung and the Individuation Process: A lecture by Professor Rachid Achachi

As part of its lecture series, the Euromed University of Fez welcomed Professor Rachid Achachi for a presentation devoted to a central theme of analytical psychology: "Carl Jung and the process of individuation".

This meeting provided an opportunity to explore the inner journey by which individuals learn to know themselves, integrate the different dimensions of their personality, and build a balanced identity. The aim was not only to present Jung's thought, but also to reflect on how this process can shed light on contemporary human and existential challenges.

Professor Achachi emphasized that individuation is a continuous dynamic, in which the confrontation with the conscious and the unconscious becomes a lever for personal development, psychic maturity, and meaning.

The conference concluded with in-depth discussions with the students, who asked questions and shared their thoughts, illustrating the interest and resonance of this topic within the university community.

2025 AFCON: The Euromed University of Fez at the heart of the debate on soft power, identity and governance of African football

On January 5, 2026, the Euromed University of Fez, in partnership with the AFCON Organising Committee, organised a conference-debate entitled "CAN 25: soft power, identity and governance of African football".

Before nearly 600 participants, experts, academics, and institutional leaders discussed the role of the 2025 Africa Cup of Nations (AFCON) as a catalyst for international influence, African cooperation, and the sustainable development of sports infrastructure. Discussions also addressed the ethical and governance challenges facing African football.

Through this initiative, the UEMF confirms its role as an academic platform for strategic reflection on major contemporary sporting issues and on the future of African football.

Plato and Civic Ethics: A lecture by Dr. Rachid Achachi

Continuing its series of lectures, the University organised a meeting led by Professor Rachid Achachi, dedicated to the contribution of Platonic thought to reflection on civic ethics.

Based on a reinterpretation of Plato's writings, the presentation addressed essential themes such as justice, shared responsibility, and the role of the citizen in the structuring of the city-state. The analysis transcended the historical framework of this philosophy to demonstrate its relevance to contemporary social and civic challenges.

Professor Rachid Achachi emphasized that civic ethics, far from being an imposed norm, is forged through education, intellectual inquiry, and the active involvement of citizens. This perspective paves the way for a dynamic understanding of philosophy, viewed as a catalyst for reflection and engagement.

The meeting concluded with an interactive exchange with the public, marked by the diversity of contributions and the quality of discussions, demonstrating the interest shown in this topic by the academic community.

Cold plasma: a key technology at the heart of scientific and industrial innovations

A scientific conference dedicated to cold plasma was organized at the University's conference center, highlighting an innovative process at the heart of many cutting-edge technologies, from industry to materials science.

Led by Professor Ahmed Rhallabi, University Professor and expert in microelectronics and VLSI technologies, this meeting provided a clear and accessible explanation of the strategic role of cold plasma processes in current technological innovations.

Through his presentation, Professor Rhallabi shared his research background and experience collaborating with industry, highlighting the concrete applications, scientific challenges, and prospects related to these technologies.

The conference resulted in rich and stimulating exchanges within the academic community, highlighting the importance of knowledge sharing and dialogue around scientific and technological advances.

Round table : Women's career paths: what factors shape women's professional trajectories?

The Euromed University of Fez hosted Ms. Helena Nolan, Ireland's Ambassador to Morocco, for a roundtable discussion on women's career paths entitled "Women'Career Pathways»Speakers from diverse backgrounds sharedeanalyses and expelessons on leadershipemini, the destructural changes and transformations in the world of work were discussed. The event fostered dialogue and reflection on policies and initiatives to support the development of women's talent, and highlighted the importance of sharing experiences to guide new generations. This meeting illustrates UEMF's commitment to intercultural dialogue, knowledge sharing, and the promotion of an academic culture open to the world.

Artificial Intelligence and Divine Understanding: A lecture by Professor Dominique Bourg

As part of its lecture series for the 2025-2026 academic year, the Euromed University of Fez organised a conference dedicated to the links between artificial intelligence, human thought and spiritual questioning, offering a space for reflection on contemporary transformations in the relationship to knowledge in the digital age.

Led by Professor Dominique Bourg, philosopher and honorary professor at the University of Lausanne, this presentation offered a philosophical reading of the issues raised by the development of intelligent technologies, addressing the limits of technological rationality as well as the place of humans in the face of current scientific and societal changes.

Through this conference, participants were invited to question the boundaries between human intelligence and artificial intelligence, through reflections on the notion of understanding, the quest for meaning and new forms of understanding the world in a context marked by technological acceleration.

This meeting is part of the UEMF's desire to promote interdisciplinary dialogue and critical thinking, by fostering academic exchanges around major contemporary philosophical, scientific and societal issues.

Cognitive Development and the Humanities: A lecture by Professor Majda Nniya in collaboration with the Cervantes Institute

In collaboration with the Cervantes Institute, this session of the lecture series was devoted to the theme: “From Symbolic Peace to Transformative Science: Women, Childhood, and the Architecture of Knowledge.” The meeting was moderated by Professor Majda Nniya, Assistant Professor at the Faculty of Humanities and Social Sciences of UEMF.

The intervention offered a detailed analysis of cognitive development throughout life, from early childhood to adulthood, highlighting the importance of the educational framework, emotional regulation, and stress management in learning.

The discussions also highlighted the role of the family environment, and more specifically that of the mother, in supporting the child's intellectual and emotional development. They reiterated that cognitive abilities are built gradually through experiences, social interactions, and the surrounding environment.

Bringing together students, teachers and members of the university community, as well as representatives from the Cervantes Institute, this conference offered an enriching space for dialogue on contemporary issues in education, human development and cognitive science.

This initiative is part of the UEMF's commitment to promoting interdisciplinary approaches and encouraging reflection on current educational and societal challenges.

Orientation Week 2025 : Discovery, conviviality and commitment

From September 15 to 19, the Euromed University of Fez organized an integration week on its Eco-campus to welcome new students, promote exchanges and strengthen cohesion within the university community.

Through institutional presentations, academic meetings, an orientation masterclass, sports and cultural activities, students discovered the world, values and opportunities offered by UEMF.

The week concluded with acts of solidarity and eco-citizenship, illustrating the university's commitment to social and environmental responsibility.

This event allowed new students to create lasting connections and to embrace the values of openness, excellence and citizenship promoted by UEMF.

Decade of Excellence: UEMF celebrates its 585 new award winners

The Euromed University of Fez celebrated the graduation of its tenth class, bringing together more than 2,000 people to honor 585 graduates: 267 engineers, 125 architects and designers, and 193 graduates in Business, Law, Political Science, and Humanities and Social Sciences. The ceremony highlighted the students' perseverance, the support of their teachers and families, and the university's commitment to its youth. Academic, diplomatic, and institutional figures were in attendance. In his address, President Professor Mostapha Bousmina encouraged the graduates to transform obstacles into opportunities. The event celebrated not only academic achievement but also the promise of a generation ready to innovate and contribute to progress.

New class graduates in Political Science – Sorbonne-UEMF track

The graduation ceremony for the Bachelor of Political Science, Sorbonne-UEMF track, marked the culmination of a demanding international curriculum, based on academic rigor, commitment and intellectual openness.

The graduates received their diplomas in the presence of their teachers, who had guided them throughout their studies. The ceremony was held in the presence of the Director of the Institute of Legal and Political Sciences at the Euromed University of Fez, Professor Kamal Kajja, as well as Professors Julien Fretel, Bertrand Simon, Philippe Marchesin, Asmae Kasimi, Mounia S., and Marie-Pierre W., who commended the students' dedication, commitment, and perseverance since the beginning of the program.

Welcoming students of different nationalities, this program fully embodies the spirit of the Sorbonne-UEMF partnership, offering a multicultural education and demanding, designed to train individuals capable of analyzing and understanding contemporary political issues.

The Euromed University of Fez extends its congratulations to all the award winners and wishes them every success in the continuation of their academic and professional careers.

3e eedition of the'Euromed Career Day: a successes at the service of the'employabilitye

The 3e eedition of the'Euromed Career Day s'is heldhasL'The Euromed University of Fez, bringing together more than 400 students and over 20 companies from various sectors, facilitated more than 1,100 interviews, fostering direct exchanges and concrete professional opportunities.

A plenary conference on the theme "University-Business: a strategic alliance for the future" highlighted the importance of dialogue between the academic and professional worlds to strengthen the employability of students.

This initiative illustrates UEMF's commitment to supporting its students towards successful professional integration adapted to market requirements.

Project-Based Approach: Engagement and innovation at the heart of nursing and health technology training.

As part of our active teaching based on the Project-Based Approach (PBA), the Faculty of Nursing Sciences and Health Techniques (FSITS) – UEMF organized a day dedicated to the presentation of projects carried out by its students.

Throughout the day, the students presented work developed around concrete problems observed in the field, illustrating their ability to mobilize their scientific knowledge, technical skills and analytical skills in the service of care and prevention.

The presentations were also enhanced by the screening of short educational films produced by students, highlighting awareness and support messages, as well as a play entitled "Civilization at the Heart of Care", emphasizing the importance of ethics, humanity and values in the practice of health professions.

Through this initiative, the APP confirms its role as an essential educational lever, promoting autonomy, critical thinking and student engagement, in line with the UEMF's vision of training competent, responsible healthcare professionals capable of responding to the current challenges of the sector with rigor and empathy.

Conference on Stress Management by Professor Rachid Boudri

As part of our Conference Series for the 2025–2026 academic year, we organised a conference entitled: “Stress Management: An Introduction”, led by Prof. Rachid Boudri, Professor-Researcher in Marketing at Euromed Business School – UEMF.

Through an intervention that was both educational and interactive, this meeting made it possible to explore the mechanisms of stress, its impacts on concentration, decision-making and academic and professional performance.

Professor Boudri also highlighted concrete tools and practical approaches to better understand, anticipate and manage stress, emphasizing the importance of emotional intelligence, personal organization and a balanced lifestyle.

Bringing together students, teachers and members of our university community, this conference provided a real space for discussion around a major issue in the academic and professional world: learning to transform stress into a lever for performance rather than a hindrance.

An enriching encounter which is fully in line with the UEMF's commitment to offering interdisciplinary spaces for reflection, serving the well-being and personal development of its community.

Oral health prevention: raising awareness today to better care tomorrow.

As part of the launch of the prevention project within the framework of the Project-Based Approach (PBA), the Faculty of Dental Medicine – UEMF welcomed Dr. Errachidi, President of the Moroccan Association for Oral and Dental Prevention – Fes section, for an exchange and awareness session dedicated to dental medicine students.

This meeting provided an opportunity to discuss the foundations of oral health prevention, the importance of patient awareness, as well as the good practices and professional ethics that should guide the practice of the profession.

Through an enriching dialogue, the students were introduced to the challenges of prevention in public health, the responsibility of the practitioner in educating patients and the essential role of the dentist in promoting a sustainable culture of prevention.

This initiative is fully in line with the UEMF's vision of training competent, committed healthcare professionals who are aware of their societal role, placing prevention and ethics at the heart of medical practice.

Innovation & Technology: The Project-Based Approach at the heart of engineering training at EPS.

As part of the implementation of the Project-Based Approach (PBA), the Euromed Polytechnic School (EPS) organised a day to promote student projects, bringing together the different engineering specialties around innovative and interdisciplinary initiatives.

The students presented projects carried out from the design phase to the The creation of prototypes demonstrated their ability to mobilize their scientific and technical skills to address concrete problems. This dynamic highlighted their creativity, analytical skills, and aptitude for collaborative work.

Organised within the Euromed Conference Centre, this initiative illustrates UEMF's commitment to active and professionalizing pedagogy, aimed at training autonomous, innovative engineers capable of supporting technological and industrial transformations.

Interactive Webinar: Mathematical Reasoning in the Age of AI

As part of its scientific activities, the Euromed University of Fez organized an interactive webinar led by Prof. Salem Lahlou from the Mohammed Bin Zayed University of Artificial Intelligence (MBZUAI), entitled: "GFlowNets: Diverse Generation for LLM Mathematical Reasoning".

Primarily intended for doctoral students in science and technology, as well as 2nd-year engineering students This webinar, part of the School of Digital Engineering and Artificial Intelligence (EIDIA), offered an in-depth immersion into the mechanisms of diversified generation applied to large language models (LLMs) and their mathematical reasoning capabilities.

Through a combined theoretical and applied approach, participants were able to discover how GFlowNets open up new perspectives for improving the performance, diversity and robustness of artificial intelligence models in solving complex problems.

Beyond the scientific content, this meeting fostered a rich exchange between researchers, doctoral students and engineering students, strengthening the academic dialogue around advances in AI and computational research.

Contemporary perspectives on architecture, mobility and urban infrastructure with Mr. Anass Amazirh

As part of its academic activities, the School of Architecture, Design and Urban Planning (EMADU) at the Euromed University of Fez organized a conference dedicated to current challenges in urban mobility and infrastructure. Entitled "Architecture, Mobility and Urban Infrastructure," this event was led by Mr. Anass Amazirh, a DPLG-certified architect, and brought together students and faculty to discuss topics central to contemporary professional practices.

Through the presentation of emblematic projects and feedback from field experience, the speaker explored current approaches to the design of structures such as bridges, parking lots, and urban developments. He also shared valuable insights into technical innovations, conceptual choices, and the realities of the architect's profession in the face of the challenges of urban mobility.

This conference offered architecture students a concrete immersion in the professional world, allowing them to better understand the technical, conceptual and operational requirements related to urban infrastructures, while nurturing their critical thinking.

Beyond its educational contribution, this event illustrates UEMF's commitment to strengthening the links between academic training and professional practices, by promoting direct exchanges between experts and students within its eco-campus.

The Project-Based Approach in the Service of Innovation and Engineering Training

As part of its efforts to promote innovation and experiential learning, the School of Digital Engineering and Artificial Intelligence (EIDIA) at the Euromed University of Fez organized a day dedicated to showcasing student projects developed using the Project-Based Approach (PBA). This event highlighted the students' achievements, with presentations of prototypes and innovative solutions developed throughout their studies.

The projects on display drew upon diverse skills in digital technologies, data science, and artificial intelligence, enabling students to propose concrete solutions to current challenges. This initiative also provided a forum for exchange between students, teachers, and supervisors, fostering the sharing of experiences, collective reflection, and the recognition of student initiatives.

Through this day, EIDIA reaffirmed its commitment to active and innovative teaching, placing students at the heart of the problem-solving and creation process, in order to train engineers capable of meeting the technological challenges of tomorrow.

Forgetting: between cognitive mechanism and essential function of memory.

As part of our lecture series for the 2025–2026 academic year, we organised a lecture entitled "Forgetting (benign, malignant and healthy)", led by Prof. Mohamed Taiebine, Lecturer-Researcher in Clinical Neuropsychology at UEMF.

Through this intervention, participants explored the different forms of forgetting, their neuropsychological mechanisms, and their role in cognitive functioning. Far from being perceived solely as a memory failure, forgetting can also be a natural process, sometimes necessary for the brain's balance.

Rich in exchanges and questions, this meeting offered a space for reflection on the links between memory, cognition and daily life, while highlighting the contributions of neuropsychology to the understanding of mental processes.

Through this series of conferences, the UEMF continues its commitment to promoting scientific dialogue, the dissemination of knowledge and the opening of its university community to varied themes at the crossroads of scientific research and the humanities.

Student project presentation day in pharmacy

The Faculty of Pharmacy at Euromed University of Fez organized a day dedicated to showcasing projects completed by students within the framework of the Project-Based Approach (PBA). This event allowed future pharmacists to put their knowledge of pharmaceutical sciences, pharmacology, and biomedical research into practice through innovative projects addressing health and pharmaceutical issues.

Throughout the day, students presented their work to teachers and supervisors, illustrating the different stages of their projects, from ideation to scientific analysis. This initiative also fostered academic and scientific exchange, providing a space for dialogue, sharing experiences, and reflecting on current challenges in pharmaceutical research and innovation.

Through this activity, the Euromed University of Fez confirms its commitment to promoting active teaching methods that place the student at the heart of learning, while developing critical thinking, collaboration and the scientific skills needed by the health professionals of tomorrow.

Women's creativity is in the spotlight at the UEMF Conference Series

As part of its 2025–2026 Conference Series, the Euromed University of Fez hosted a conference entitled “Women and Creativity”, led by Zohra Lhioui, Professor of Comparative Literature at Moulay Ismail University.

During her presentation, the speaker highlighted the essential role of women's creativity in shaping cultures and collective imaginations. She emphasized that women's artistic, literary, and intellectual expression is a major driver of reflection on society, identity, and the human experience.

The conference also featured a reading of works by Moroccan artists, allowing for an exploration of the diverse forms that female creativity can take. These works reveal unique sensitivities and perspectives on the social, cultural, and personal realities that shape the female experience.

Rich in exchanges, the meeting offered participants a space for reflection on the links between artistic creation, critical thinking and the place of women in contemporary cultural production.

Through this series of conferences, the Euromed University of Fez reaffirms its commitment to promoting intellectual dialogue, the dissemination of knowledge and the opening of its university community to themes at the intersection of the humanities, culture and society.

Ibn Khaldun : A foundational thought at the crossroads of disciplin

As part of its Lecture Series for the 2025–2026 academic year, Euromed University of Fes organized a conference titled "Ibn Khaldûn, an Unclassifiable Thinker," led by Prof. Abdessalam Cheddadi, a professor and research fellow in philosophy at the Scientific Research Institute of the University of Rabat.

This presentation allowed participants to explore the richness of Ibn Khaldûn's work, whose thought lies at the intersection of history, sociology, and philosophy. Considered one of the precursors of the social sciences, he proposed an innovative analysis of societal dynamics, power structures, and the cycles of civilizations.

The conference also highlighted the contemporary relevance of his work, whose concepts continue to illuminate current social and political transformations, attesting to the universal dimension of his intellectual legacy.

Marked by rich exchanges, this meeting provided a space for reflection on the foundations of Khaldunian thought and its lasting influence in the field of humanities and social sciences.

Through this Lecture Series, UEMF continues its commitment to the dissemination of knowledge, academic dialogue, and intellectual openness, by proposing themes situated at the crossroads of disciplines.

The Euromed University of Fez hosted the Moroccan Day of Mathematics, an initiative organized by the Maths&Maroc association dedicated to youth and scientific culture.

On March 28, 2026, the Euromed University of Fez hosted the Moroccan Day of Mathematics (MDM), organized by Maths & Maroc with the support of the Hassan II Academy of Sciences and Technologies and Adria. The event brought together a diverse audience to promote scientific culture and the role of mathematics in contemporary transformations.
Through a rich program (conferences, interactive workshops, Maths Sprint), the initiative made mathematics accessible and attractive, while sparking the interest of young people. The presentations by Mr. Omar Fassi Fihri and Professor Mostapha Bousmina highlighted the central role of mathematics in science, technology, and innovation.
Finally, scholarships of excellence and awards were given to the winners, reinforcing the university's commitment to education and the development of talent.

Aesthetics, domination, and artificial intelligence: rethinking the power of images in the contemporary era

Aesthetics, domination, and artificial intelligence: rethinking the power of images in the contemporary era. As part of our lecture series for the current academic year, we organized a conference entitled "The notion of aesthetics and domination, from the 7th art to AI," led by Professor Fouad Souiba, writer and director.

In this presentation, Professor Fouad Souiba offered an in-depth reflection on the close links between aesthetics, representation, and power relations, tracing their evolution from classical cinematic language to new forms of expression shaped by artificial intelligence. Drawing on references from the world of film and contemporary digital transformations, he demonstrated how images are not limited to an artistic dimension, but constitute genuine tools of influence, capable of structuring collective imaginations, shaping perceptions, and sometimes reproducing or challenging forms of domination.

The conference also explored the profound changes brought about by AI in the processes of image creation, dissemination, and reception, thus opening up a discussion on the ethical, cultural, and societal issues related to these new technologies. Rich in exchanges and perspectives, this meeting examined the evolving ways we see in the digital age, highlighting the structuring role of images in contemporary dynamics.

The unlikely rise of a Moroccan tech multinational: the HPS case in the face of the changing landscape of digital payments

The unlikely rise of a Moroccan tech multinational: a look back at a conference at the heart of the changes in digital payment. As part of our Conference Series, we organized a meeting entitled: "The unlikely rise of a Moroccan tech multinational: the HPS case in the face of the changes in digital payment", moderated by Mr.Mohamed Horani, Chairman and CEO ofHPSand member of the Board of Directors of the Euromed University of Fez.

Through this meeting, the speaker offered an in-depth analysis of the growth trajectories of Moroccan technology companies, putting into perspective the structural transformations of the digital payment sector, marked by an acceleration of innovations and an intensification of competition on a global scale.

Drawing on his experience leading a key player, he shared concrete feedback on development strategies, innovation choices and internationalization dynamics that enabled HPS to establish itself as a global leader, while maintaining a strong Moroccan presence.

The conference also provided an opportunity to explore the changes in the fintech sector, addressing the challenges related to the digitalization of payments, the evolution of uses and the adaptation of business models in a constantly changing environment.

Rich in exchanges and perspectives, this meeting highlighted the essential levers for the success of technology companies, while emphasizing the strategic role of innovation, vision and adaptability in the development of leading companies on an international scale.

Euro-Mediterranean dialogue and youth engagement for a sustainable future

During Kaja Kallas' official visit to the Euromed University of Fez, a conference and interactive exchange were organized for students of various nationalities. This meeting addressed several key themes related to international security, regional stability, Euro-Mediterranean dialogue, and the central role of youth in building a sustainable and inclusive future.

The discussions highlighted the importance of education, international cooperation, and civic engagement in promoting peace and sustainable development. Through this initiative, the UEMF strengthened its role as a space for intercultural dialogue and strategic reflection, while also promoting the active participation of young people in global transformation.

Changing our perspective on disability: towards an inclusive and equitable university.

As part of our lecture series, the Euromed University of Fez organized a conference entitled: “Changing perspectives on disability: inclusive university, a lever for equity and excellence”, moderated by Dr. Khalid Benhassan and Prof. Hajjoui Abderrazak.

Through this meeting, the speakers offered an in-depth reflection on the challenges of inclusion in higher education, highlighting the central role of the university in promoting equal opportunities and valuing all talents.

Drawing on their expertise in public health, rehabilitation and support for people with disabilities, they emphasized the need to move beyond traditional approaches to build more accessible, inclusive and tailored academic environments that reflect the realities of each individual.

The conference also provided an opportunity to examine perceptions of disability, inviting a renewed perspective based on inclusion, dignity and recognition of abilities, rather than limitations.

Rich in exchanges and perspectives, this meeting highlighted the importance of placing inclusion at the heart of university policies, as a lever for equity, but also as a factor of excellence and social transformation.

Conference: Training the healthcare professionals of tomorrow for a more resilient Moroccan healthcare system

The

UEMF had the honor of welcoming Professor El Houssaine Louardi, a physician specializing in anesthesia, resuscitation and emergency medicine, former Minister of Health, at a conference dedicated to the challenges of training health professionals and the prospects for the evolution of the Moroccan health system.

This meeting provided an opportunity to discuss current challenges in the health sector, the importance of multidisciplinary training adapted to contemporary medical transformations, and the strategic role of new generations of professionals in building a more efficient, innovative and resilient health system.

Through his intervention, Professor El Houssaine Louardi also shared his expertise and perspective on the changes taking place in the health sector today, while highlighting the challenges related to governance, medical innovation, research, and the development of human skills.

This conference illustrates the commitment of the Euromed University of Fez to promoting academic dialogue, openness to major societal issues and meetings between students, teachers and leading figures from different strategic sectors.

The effects of climate change on water and biodiversity: a conference at the heart of contemporary environmental issues

As part of its commitment to disseminating knowledge and opening up to major contemporary issues, the Euromed University of Fez, in partnership with the Cervantes Institute, organised a conference dedicated to one of the major environmental challenges of our time: the impact of climate change on water resources and biodiversity.

Led by Carmen González Castro, Professor at the University of Vigo, this meeting, entitled "The effects of climate change on water and biodiversity: tools to mitigate it", offered a scientific perspective on the environmental transformations that are currently affecting ecosystems worldwide.

During her presentation, the speaker highlighted the growing consequences of climate change on water resources and natural balances, while also emphasizing the challenges related to preserving biodiversity. She further stressed the need for a better understanding of the interactions between these phenomena in order to anticipate their effects and strengthen adaptive capacities in the face of current environmental changes.

The conference also provided an opportunity to explore various tools and mitigation strategies that could contribute to better management of environmental challenges. Scientific approaches, sustainable strategies, and innovative solutions were presented as essential levers for preserving natural resources and supporting ecological transitions.

Beyond academic exchanges, this meeting provided a space for reflection and dialogue on issues concerning our collective future. It illustrates the shared commitment of the Euromed University of Fez and the Cervantes Institute to promoting cultural and scientific cooperation around major global challenges, while also fostering awareness and the transmission of knowledge to new generations.

Morocco, the challenge of power: Mr. Abdelmalek Alaoui tells us more at the UEMF

As part of its mission to promote academic excellence, intellectual dialogue, and engagement with major contemporary issues, the Euromed University of Fez (UEMF) organized a discussion and debate around the book "Morocco, the Challenge of Power" by Abdelmalek Alaoui, a Moroccan essayist and economist. Moderated by Professor Taoufik Ouazzani Chahdi, Advisor to the University President, this scientific and cultural event brought together students, faculty, administrative staff, and members of the university community for a forum for exchange and reflection on the economic, geopolitical, and strategic transformations of the Kingdom of Morocco.

During this meeting, the author presented the main themes developed in his book, including Morocco's historical evolution since independence, the structural reforms that have shaped its development, the dynamics of economic and diplomatic openness, and the challenges related to competitiveness, sovereignty, innovation, and integration within a rapidly changing international environment. The discussions allowed for an analysis of the factors that have contributed to the country's institutional stability, its resilience in the face of crises, and its growing prominence on the regional and international stage.

The event provided a unique opportunity for students to compare their academic knowledge with the experience of a recognized expert, while simultaneously developing their critical thinking, analytical skills, and understanding of the strategic issues shaping Morocco's future. The discussions also raised awareness of governance, sustainable development, innovation, leadership, and responsible citizenship.

UEMF Youth Debate: Reflecting on the link between the individual and collective ethics in Moroccan society

As part of its mission to promote academic dialogue, citizenship, and youth engagement on major societal issues, the Euromed University of Fez (UEMF) organized the EUROMED Youth Debate on the theme: "Individual and Collective Ethics in Morocco: What Correlation for What Societal Project?" This event brought together students from the Faculty of Humanities and Social Sciences (FSHS), the Euromed Business School (EBS), and the Institute of Legal and Political Sciences (ISJP) to foster critical reflection and discussion on the challenges of living together, citizenship, and collective responsibility.

Through a series of thematic panels, participants analyzed the relationship between individual behaviors and collective values in contemporary Moroccan society. The discussions explored notions of citizenship, freedom, social cohesion, public order, and individual responsibility, while also considering the social, economic, and cultural transformations that influence behaviors within the community.

The discussions also focused on factors that could strengthen collective ethics, civic engagement, and mechanisms that promote greater social cohesion. Students were invited to suggest avenues for reflection and solutions aimed at promoting respect for shared values, civic participation, and the development of a more inclusive and equitable society.

Final Year Project (FYP) defenses of the 2nd cohort of the Master's program "Conflict Management and Alliance of Civilizations"

Final Year Project (FYP) defenses of the 2nd cohort of the Master's program "Conflict Management and Alliance of Civilizations", at the Euromed University of Fez. A decisive step for our students, future experts in intercultural dialogue and diplomacy, who present the fruit of two years of academic and professional commitment.
This master's program is:

- Supervised by the United Nations Chair for the Alliance of Civilizations
- Awarded by UNAoCF! Congratulations to the students for the quality of their work and their exemplary commitment!

UEMF Meeting – Health Professionals of the City of Fez: thinking together about the health challenges of tomorrow.

The Health Hub of the Euromed University of Fez was pleased to welcome health professionals from the city of Fez for a meeting focused on exchange and reflection on the major transformations taking place today in the health sector, and on the responses to the growing needs for expertise, innovation and training.

This meeting was an opportunity to present the UEMF Health Hub, which brings together the Faculty of Medicine, the Faculty of Pharmacy, the Faculty of Dental Medicine, the Faculty of Nursing and Health Sciences, as well as the School of Biomedical Engineering and Biotechnology, illustrating an integrated approach to training, research and innovation in the service of health.

The discussions also highlighted the progress of the future Euromed Hospital Complex, a structuring project intended to strengthen the training, research and care ecosystem developed by the University, while also opening up reflection on the new training and skills required to meet the evolving needs of the sector and the emerging needs of the health system.

Beyond the presentation of its infrastructure and academic offerings, this meeting provided a genuine space for dialogue between the academic world and professionals in the field, reaffirming UEMF's commitment to actively contributing to the development of an innovative, high-performing, and resolutely future-oriented health ecosystem.

Seminars, conferences & congresses

The UEMF is hosting the first day of the NEGIA Summit: Architecture for the Future Generation

The Euromed University of Fez had the honor of hosting, last Wednesday, the first day of the NEGIA Summit (Next Generation Impact Architects), an event organized by the Federation of Francophone Architects of Africa (FAFA), around the theme "Architecture for the future generation".

This inaugural day, held at the University Conference Centre, brought together young architects, urban planners and experts from across the African continent to collectively reflect on the challenges and prospects of African architecture in the face of contemporary technological, environmental and societal issues.

The discussions focused on several major themes, including the impact of new technologies on architectural design, the presentation of the texts and statutes of the G40 (the FAFA Group of Architects Under 40), as well as the role of younger generations in the sustainable transformation of African cities.

For the students of the Euromed School of Architecture, Design and Urbanism (EMADU), this meeting was an enriching learning experience, offering them the opportunity to interact directly with young architects, international experts, and representatives of African professional bodies. It broadened their perspective on the realities of the profession, while highlighting the central role of creativity, technology, and sustainability in contemporary architecture.

This first day of the NEGIA Summit was distinguished by a spirit of inspiration, collaboration and intergenerational transmission, faithful to the values of openness and excellence upheld by the Euromed University of Fez.

Trade secrets at the heart of the Franco-Moroccan dialogue

The Euromed University of Fez organized a study day dedicated to trade secrets, in partnership with the Henri Capitant Association and the Sorbonne Law School's Moroccan branch. Led by Professor Valérie Malabat (University of Bordeaux) and Professor François-Xavier Lucas, the event brought together academic and professional experts to discuss the legal and economic challenges related to the protection of strategic information.

Structured around three roundtables focusing on the legal foundations, practical challenges for businesses, and litigation aspects, this meeting provided a deeper understanding of the trade secret protection framework. Students in the Sorbonne-UEMF Master's program in Business Law benefited from enriching discussions based on comparative and international perspectives.

This initiative is part of Franco-Moroccan academic cooperation and illustrates the UEMF's commitment to excellent legal training, open to international issues and contemporary economic realities.

Seminar on Low-Carbon Hydrogen: with Professor Philippe Tanguy and Professor Nadia Yousfi

The Euromed University of Fez (UEMF), in partnership with the Hassan II Academy of Sciences and Techniques, organised a high-level seminar dedicated to emerging processes for the production of low-carbon hydrogen.

Led by Professor Philippe Tanguy, Director of Strategy for the HTEC Group and Associate Professor at Polytechnique Montréal, and Professor Nadia Yousfi, Corresponding Member of the Hassan II Academy of Sciences and Techniques, this seminar allowed for rich exchanges with students, researchers and teachers on the scientific, technological and economic challenges of low-carbon hydrogen.

This meeting highlighted the strategic role of hydrogen in Morocco's energy transition and confirmed the UEMF's commitment to research, innovation and sustainable development.

African Engineering Education Summit 2025

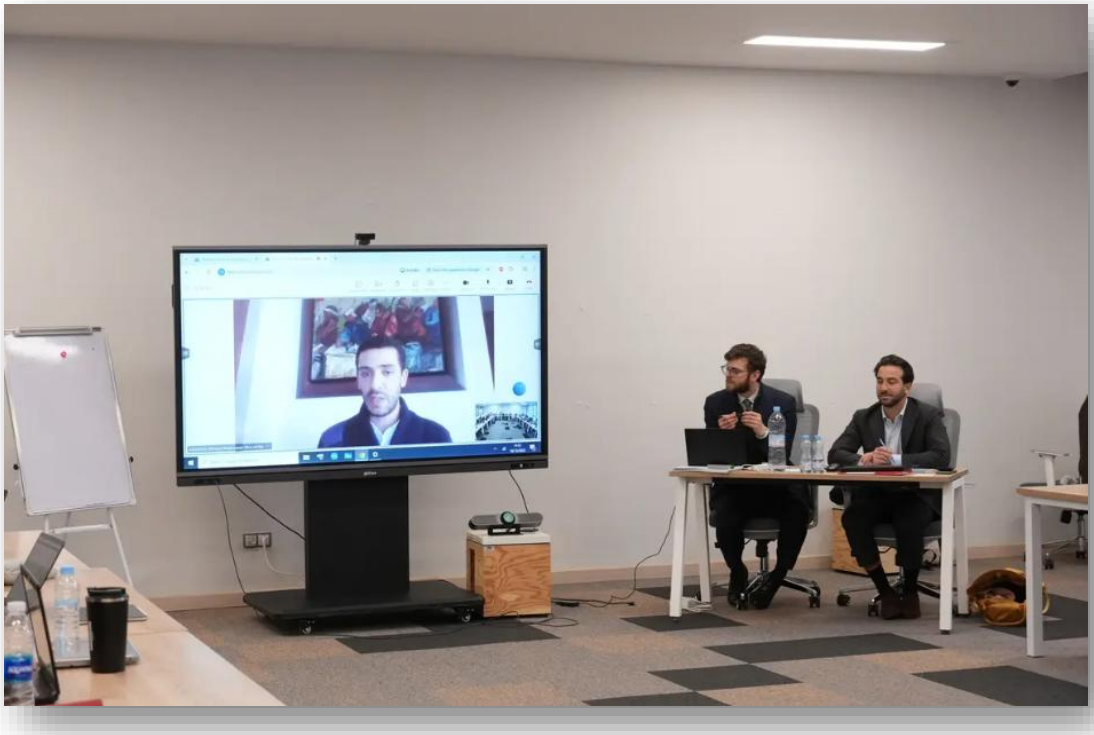

The Euromed University of Fez hosted the "African Engineering Education Summit 2025," a major continental event dedicated to the future of engineering education in Africa. This two-day event brought together experts, researchers, and institutional leaders from across the continent and beyond.

The summit was punctuated by high-level plenary sessions, practical workshops led by ABET on accreditation processes and international standards, and interactive panels dedicated to innovation, academic mobility, and entrepreneurship. These exchanges provided an opportunity to share inspiring experiences and build a common vision for the future of engineering education in Africa.

Organised by the UEMF, in partnership with the IEEE Education Society, ABET, the African Council of Deans of Engineering Schools, and with the support of Bank of Africa, this summit marked an important step in building a strong, inclusive and excellence-oriented African engineering education network.

Together, we have demonstrated that Africa has the talent, ideas and ambition needed to build a sustainable and innovative future for its engineers.

Practical seminar on CSR and Compliance at the Euromed University of Fez

On December 17 and 18, 2025, the Euromed University of Fez organized a practical seminar dedicated to Corporate Social Responsibility (CSR) and Compliance, in partnership with the University of Paris 1 Panthéon-Sorbonne and the international firm Hughes Hubbard & Reed LLP.

For two days, students, teachers, and professionals exchanged ideas on governance issues, the fight against fraud and corruption, and the practical implementation of CSR in business. The sessions combined expert presentations, feedback from experience, and practical case studies, while also raising students' awareness of the principles of the United Nations Global Compact.

This seminar illustrates UEMF's commitment to providing training aligned with international standards and professional realities in ethics and governance.

Third Summit of Young Africans and Euro-Mediterraneans of the Euromed University of Fez: Headquarters of the Academy of the Kingdom, Rabat, January 19, 2026

The Euromed University of Fez organised, under the supervision of the United Nations Chair for the Alliance of Civilisations and in partnership with the Academy of the Kingdom of Morocco and the Hassan II Academy of Sciences and Techniques, the third Summit of African and Euro-Mediterranean Youth on January 19, 2026 in Rabat.

Dedicated to civic engagement and the pluralism of values, the event brought together young people from over 40 nationalities, experts, and Moroccan and international institutional leaders. Discussions focused on citizenship, living together, solidarity, diversity, values education, and contemporary challenges, particularly in the age of hyperconnectivity.

Organised in the form of plenary sessions, the summit concluded with recommendations formulated by the students, giving rise to the UEMF's "Call for the Future", in favour of strengthened civic engagement and a more harmonious society.

The Philosophy Encounters: the university at the heart of intellectual debate in Fez

From February 9 to 11, 2026, the Euromed University of Fez hosted the 11thᵉ eedition of the Philosophy Rendez-vous, on the theme "Ambivalence of passions. OùWhere is the world going?». Thisevenement, in partnership with the'French Instituteitais of Morocco, a transformedediffererenterents spaces of the city in places of rebending and debat, reuniting philosophers, researchers, artists and intellectuals.

Through conferences, workshops, public debates, and readings, the event fostered dialogue between academia and society, promoting critical thinking, understanding of social and cultural transformations, and the development of informed citizens. The Euromed University of Fez reaffirmed its role as an intellectual hub, open to exchange, the dissemination of knowledge, and cultural engagement.

BIONET Conference: An edition that marks a turning point for Euro-African health

The BIONET International Conference on Occupational Surveillance and Environmental Health concluded successfully at the Euromed University of Fez, bringing together researchers, experts and international partners for three days of rich and constructive scientific exchanges.

Through plenary sessions, thematic sessions and collaborative discussions, the event advanced the dialogue on occupational health, environmental biomonitoring and the One Health approach, while strengthening Euro-African cooperation.

Thanks to the leadership of Professor Salim Bounou and the commitment of all participants, IC-OSEH has been a dynamic platform for learning, innovation and partnership, consolidating a common commitment to safer workplaces and healthier environments.

Franco-Brazilian Restructuring Days: Expertise and International Cooperation at the UEMF

Three days of expertise, dialogue and international cooperation within the UEMF.

The University hosted the Franco-Brazilian Restructuring Days this week, a major event organized by the Sorbonne Law School at UEMF. This meeting brought together professors, judges, researchers and practitioners to discuss contemporary issues of restructuring and insolvency from a comparative perspective.

Throughout the sessions and roundtables, participants analyzed the outcomes of insolvency proceedings in France and Brazil, the safeguard and recovery plan mechanisms, and the role and rights of shareholders in difficulty. These fruitful discussions highlighted the diversity of legal approaches and the challenges common to both systems.

This edition was also marked by a highlight: the visit to the Al-Qaraouiyine Library, considered the oldest in the world. A powerful symbol of the link between history, knowledge, and innovation, perfectly aligned with the Euro-Mediterranean and African mission of the UEMF.

The Restructuring Days concluded with a summary roundtable discussion, allowing for the identification of common perspectives and the strengthening of academic collaborations between France, Brazil, and Morocco. This was followed by the presentation of certificates to participants and the graduation ceremony for students of the Sorbonne-UEMF Master's program in Business Law.

Arbitration Colloquium Arab Countries & OHADA: launch of the first day at the UEMF.

This morning, we launched the 1st edition of the Arbitration, Arab Countries & OHADA Colloquium, organized by the Sorbonne Law School – UEMF, in partnership with theHenri Capitant Association.

This first day marks the beginning of two days of discussions bringing together practitioners, academics and renowned experts, around the major issues of international arbitration in Arab countries and the OHADA zone.

This symposium stands out as a true space for dialogue and sharing, promoting the confrontation of expertise and the strengthening of bridges between Arab and African legal cultures.

We thank all the speakers, participants and partners for their commitment and contribution to the success of this first day.

At the Euromed University of Fez, the “Mediterranean 2026” Prizes recognize figures committed to peace, dialogue and humanism.

As part of the Euromed University of Fez meetings on the Alliance of Civilizations, the “Mediterranean 2026” Awards ceremony honored individuals and institutions committed to peace, intercultural dialogue, international cooperation, and human development. Organized around the theme of artificial intelligence and the future of human civilization, the ceremony highlighted the importance of technological progress grounded in ethical, humanist, and solidarity-based values.

The awards recognized initiatives that contribute to bringing people closer together, promoting moderation, sharing knowledge, and developing an inclusive and sustainable vision of international relations. Through this event, the UEMF reaffirms its role as an academic and cultural space that fosters dialogue between civilizations, reflection on major contemporary challenges, and the building of a future based on peace, cooperation, and responsible innovation.

Introductory seminar on Nudge: an exploration of the mechanisms at the heart of decision-making

Yesterday, we organised a seminar dedicated to the introduction of Nudge, bringing together students, teachers and participants around the contributions of behavioural sciences in understanding and guiding individual and collective decisions.

Hosted by Adil GazaliAhmed DahhoukiYacoub Diftar, ProfessorMohcine ZouakImane Elhadart, this seminar allowed us to explore the cognitive foundations, behavioral biases and mechanisms that influence our choices, putting their applications into perspective in various contexts.

Discussions focused in particular on the integration of Nudge into public services, the training of engineers and the challenges of sustainable mobility, illustrating the potential of these approaches to design more effective policies and solutions, in line with the real behaviors of individuals.

A true space for reflection and dialogue, this seminar gave rise to enriching discussions, promoting the cross-fertilization of expertise and a better understanding of the interactions between science, engineering and public action.

An academic event that is fully in line with the UEMF's dynamic, aiming to promote innovative and interdisciplinary approaches to contemporary challenges.

At the UEMF, the 4eThe Fes Restructuring Days edition brings together the leading voices of the sector

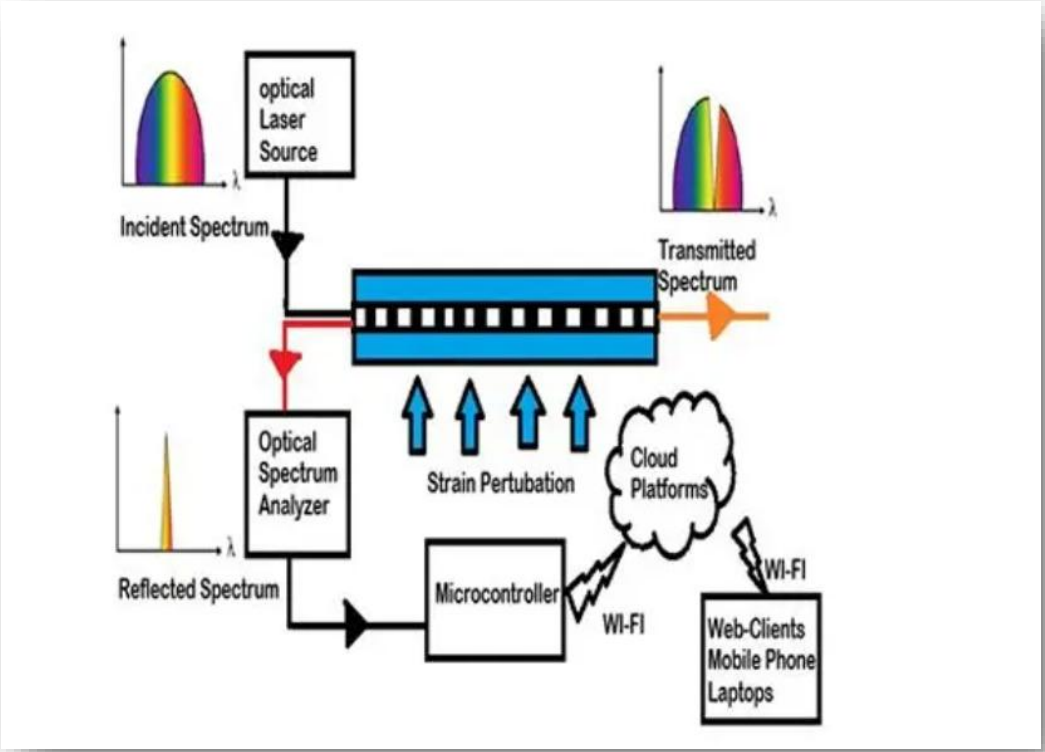

The Euromed University of Fez organized the 4the eJournal editionees Restructuring of Fes, aeveinternational meeting dedicatedetoedevelopments in the law of companies in difficulty and modern restructuring mechanisms. Organised in partnership with the Sorbonne Law School, this meeting brought together more than 300 participants from Europe and Africa, including judges, lawyers, experts, researchers, students and professionals from the legal and economic sector.

Over two days, discussions focused on several themes related to cross-border restructuring, mechanisms for preventing business difficulties, governance, and new legal and economic resilience frameworks. The event also fostered dialogue between academic approaches and professional practices on an international scale.

Through this initiative, the UEMF confirms its commitment to academic excellence, international cooperation and the development of spaces for reflection on major contemporary legal and economic transformations.

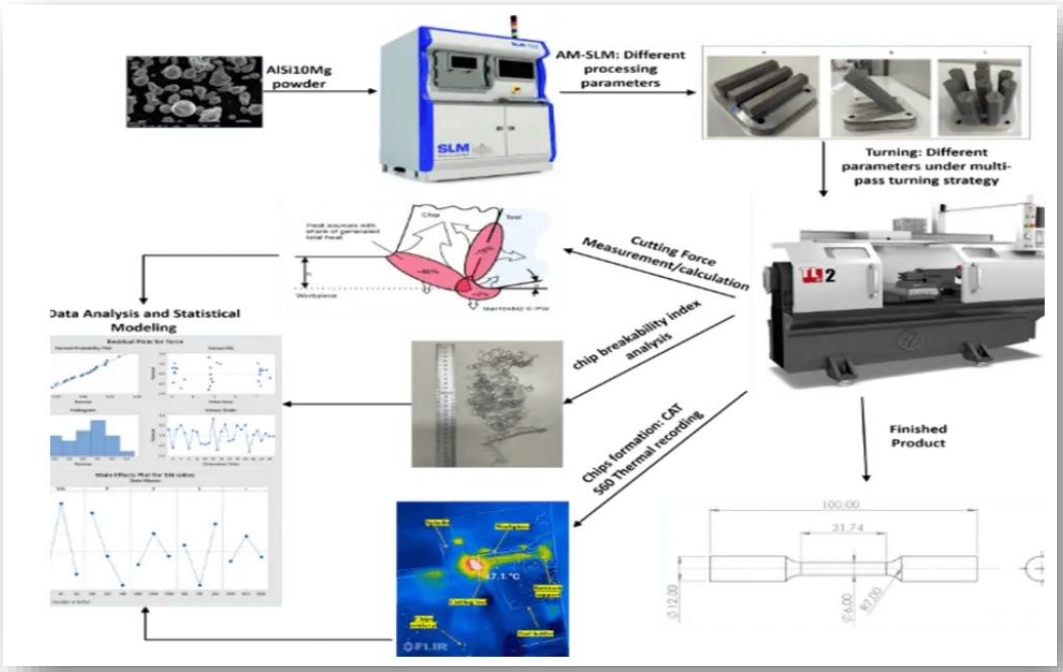

Doctoral activities

Defense of Doctoral Thesis in "Optics and Photonics" by Mr. Paul Stone MACHESO

This study explores the development and optimization of Fiber Bragg Grating (FBG) sensors for measuring key physical parameters such as temperature, strain, and pressure in harsh and dynamic environments. By using Finite Difference Time Domain (FDTD) simulations, the research enhances sensor performance and investigates applications in Industry 4.0, smart factories, and the Internet of Things. The work also compares single-mode and multimode FBG sensors and proposes an innovative phase-shifted and tilted grating design to improve temperature-sensing sensitivity.

Doctoral Thesis Defense in “Mechanical Engineering” by Mr. Nnamdi Chukwunenye IGWE

The Euromed University of Fez announces the thesis defense in mechanical engineering ofNnamdi Chukwunenye IGWE, scheduled forDecember 20, 2025 at 10am, at the Incubator's Main Hall.

His research focuses on theadditive manufacturing of AlSi10Mg aluminum alloyusing the techniqueLaser Powder Bed Fusion (LPBF)The study analyzes the impact of several manufacturing parameters (construction orientation, laser power, scanning speed, energy density, etc.) on the mechanical, microstructural and functional properties of the material.

Through a rigorous experimental methodology (Taguchi L9 Design of Experiments), the thesis evaluates criteria such as porosity, density, hardness, corrosion resistance and machining performance.

The results show that certain key parameters strongly influence the quality and performance of the parts produced, thus providing valuable recommendations for optimizing the LPBF process and improving the integrity and performance of industrial components.

Cultural activities

Yennayer at the UEMF: a vibrant celebration of traditions and community

On the occasion of Yennayer, the campus of the Euromed University of Fez came alive to the rhythm of Amazigh traditions, celebrating a living culture deeply rooted in sharing and diversity.
Throughout the day, art, food, and music filled the university spaces, offering the university community a vibrant and emotionally rich experience. Artistic performances, cultural expressions, and convivial moments fostered a dialogue between heritage and modernity in a festive and inclusive atmosphere.
More than just an event, Yennayer at UEMF was a true time of gathering, highlighting the values of community, transmission and openness that enrich life on campus.
A memorable day, marked by culture, creativity and community spirit.

Art & Design Driven Strategies

As part of its cultural activities, the School of Architecture, Design and Urbanism (EMADU) of the Euromed University of Fez organized a conference entitled "Art & Design Driven Strategies", bringing together students, teachers and enthusiasts around the contemporary challenges of artistic creation and design.

Hosted by Dr. Monika Klein, creator and researcher specializing in creative industries, and René Holm, multimedia artist, this meeting offered a space for reflection and dialogue around current artistic dynamics, creative innovation and new approaches to design in contemporary practices.

Through their presentations and discussions with the public, the speakers shared inspiring perspectives, illustrating the richness of the intersections between art, research and creation.

Beyond a conference, this event reflects UEMF's commitment to promoting cultural openness, interdisciplinary thinking and international dialogue within its eco-campus.

Let's celebrate the women who inspire and transform the UEMF

On the occasion of International Women's Day, we celebrate those who inspire, innovate and shape the future every day.

Students, teachers, researchers, staff, security guards, maintenance workers... each in her own way contributes to the life and progress of our community within UEMF. Through their experiences, their commitment, and their daily presence, they all contribute to the richness and strength of our university.

Today and every day, we salute their strength, their talent and their determination.

UEMF's Got Talent: a 6ème an edition dedicated to talent, creativity and emotion

The Euromed University of Fez vibrated to the rhythm of the 6th edition of UEMF's Got Talent, an event that has become an essential part of student life and celebrates creativity, the diversity of artistic expressions and the talents of its university community.
Bringing together numerous participants and an enthusiastic audience, this latest edition offered an evening rich in emotion and captivating performances. Singing, dancing, stage performances, artistic displays, and creative demonstrations followed one another on stage, revealing the breadth of talent within the University. Each participant shared their unique world, their passion, and their energy, contributing to making this event a true moment of celebration and conviviality. Through this initiative, UEMF reaffirms its commitment to encouraging the personal development of its students and promoting a university environment where artistic expression plays a vital role. Far more than a competition, UEMF's Got Talent provides a special space for students to express their creativity, develop their self-confidence, and showcase their passions.
This 6eThis edition was also marked by the quality and diversity of the services offered, illustrating the cultural and human richness that characterizes the community of the Euromed University of Fez.
Following the performances, three participants particularly distinguished themselves and were rewarded for their contributions :

🥇 Gabrielle EBABU 🥈 Benjamin CHIZUE 🥉 Sara ALAMI
The Euromed University of Fez extends its congratulations to the winners and all participants for their commitment, creativity, and contribution to the success of this evening. This latest edition confirms, once again, that talent flourishes in all its forms at UEMF.

Sports activities

The Mini Africa Cup of Nations in Fez: three days dedicated to sport and community spirit

The Euromed University of Fez hosted a football tournament bringing together sixteen teams from several African countries, in collaboration with the Fez-Meknes Regional Football League and CESAM Fez. Organized over several days, the competition took place in a spirit of commitment, respect, and fair play, fostering exchange and closer ties among the participants.

The matches, supported by an enthusiastic crowd, highlighted collective discipline, the quality of play, and the players' commitment. Equatorial Guinea won the final against Chad, while the Moroccan team secured third place.

Through this initiative, the UEMF confirms its commitment to sport as a lever for cohesion, cultural openness and dynamism within university life.

1re UEMF Open Taekwondo edition: sport, discipline and commitment

L'Université Euromed de Fès a organisé la première édition de l'Open Taekwondo de l'UEMF, en partenariat avec la Fédération Royale Marocaine de Taekwondo et la Ligue Régionale Fès-Meknès de Taekwondo.

Pensé comme un temps fort de rencontre et de partage, cet événement a rassemblé des athlètes autour de combats et de démonstrations sportives, dans un cadre structuré où rigueur, discipline et engagement se sont exprimés dans le respect des règles et des valeurs du taekwondo.

La journée s'est conclue par des cérémonies de remise de médailles, saluant l'investissement, la détermination et la qualité des performances des participants, et rappelant le rôle essentiel du sport dans la construction de parcours fondés sur l'excellence, le respect et l'engagement citoyen.

À travers l'organisation de cette première édition, l'UEMF réaffirme son engagement en faveur du développement des activités sportives universitaires, tout en consolidant son positionnement en tant qu'acteur impliqué dans la dynamique sportive à l'échelle nationale.

Esprit national, sport et jeunesse : notre campus a célébré avec fierté le 50e anniversaire de la Marche Verte

Le 06 novembre, l'Euromed Sports Center a accueilli une journée sportive alliant waterpolo mixte et tournoi de basketball masculin, réunissant nos étudiants et les équipes juniors du FAS, du MAS et de l'USF. Une atmosphère compétitive et dynamique qui reflète l'engagement de notre jeunesse.

Sur le terrain, nos étudiants ont brillé : victoire en demi-finale face au FAS (47–30) et finale intense remportée contre le MAS (45–40). Avec plus de 80 participants, l'événement a mis en lumière l'engagement de nos jeunes athlètes, la qualité du jeu et la belle synergie entre les équipes.

Au-delà des résultats, cette journée a constitué un véritable moment de cohésion et de patriotisme, rassemblant étudiants, encadrants et responsables autour des valeurs de solidarité et de fierté nationale. Une édition mémorable qui restera gravée dans l'histoire sportive de notre campus.

Tournoi interuniversitaire UEMF : deux jours placés sous le signe du sport, du partage et de l'engagement collectif

À l'occasion de la Journée internationale du sport, l'Université Euromed de Fès a organisé, les 4 et 5 avril, un tournoi interuniversitaire réunissant des étudiants issus de plusieurs établissements autour d'un programme sportif riche et multidisciplinaire.

Over two intense days, participants competed in various disciplines, including basketball, volleyball, table tennis, and water polo, in a spirit that combined performance, commitment, and fair play. Beyond the results, each match was marked by the quality of play, collective energy, and mutual respect. Much more than a competition, this event established itself as a true space for encounters and exchanges between university communities, fostering diverse interactions, the sharing of experiences, and the building of connections between students from different academic backgrounds.

🏅 Tournament results:
🏓 Boys' Table Tennis: 1re place – AUI (Al Akhawayn University of Ifrane) 2e Place – USMBA (Sidi Mohamed Ben Abdellah University) Girls: 1re and 2e places – AUI
🏐 Boys' Volleyball: 1re place – USMBA | 2e Place – UEMF Girls: 1re place – USMBA | 2e place – UEMF
🏀 Boys' Basketball: 1re place – USMBA | 2e Place – UEMF Girls: 1re place – USMBA | 2e Place – UIT (Ibn Tofail University)

Sporting and civic engagement: UEMF at the heart of the Fes Spiritual Marathon

As part of its commitment to well-being and active citizenship, the Euromed University of Fez participated in the Fez Spiritual Marathon as an official partner. On this occasion, the campus served as a checkpoint along the route, welcoming runners in a vibrant and friendly atmosphere.
University students also participated in this sporting event, demonstrating the values of pushing personal limits, teamwork, and collective commitment. Their participation reflects the university community's involvement in initiatives that promote a healthy and active lifestyle.

Beyond its sporting dimension, this participation reflects UEMF's desire to strengthen its connection with its local community by fully engaging in local social, cultural, and civic initiatives. It thus contributes to promoting an engaged university, connected to its city and an active participant in community development.

Heading towards the 4th edition of the Open Para-Karate Kata Fes at the UEMF.

The UEMF was pleased to host the fourth edition of the Open Para-Karate Kata Fes, organised by the Mohammed VI Foundation for Persons with Disabilities, in a dynamic of promoting inclusive sport and the values of self-improvement.

In an atmosphere marked by respect, discipline, and determination, theEuromed Sports CenterThe atmosphere came alive with demonstrations from these young athletes who came from all corners of the Kingdom. Through their performances, they powerfully embodied the values of karate, combining mastery, perseverance, and commitment.

Beyond the competition, this event was a powerful moment for raising awareness, highlighting the role of sport as a lever for inclusion, personal development and social cohesion.

We extend our sincere thanks to all the supervisors, chaperones, referees, volunteers, and participating delegations for their commitment and contribution to the success of this edition.

Through this initiative, the UEMF reaffirms its commitment to inclusion, diversity and sport for all, by offering an environment conducive to the expression of talents and the promotion of inspiring journeys.

The Euromed University of Fez hosts the Moroccan Swimming Championships

The Euromed University of Fez hosted the Moroccan Swimming Championships from July 30 to August 1, 2026, organized by the Royal Moroccan Swimming Federation at the Euromed Sports Center. This national competition brought together swimmers from several clubs for various events, ranging from 50 to 1,500 meters, as well as relays.

The event showcased the UEMF's sports facilities and promoted the values of discipline, perseverance, respect, and excellence, while bringing together clubs, coaches, families, and sports enthusiasts. The University thus reaffirmed its commitment to promoting sport and hosting high-level national competitions.

Admissions activities and open house

Open Day: More than 2,900 high school students discover UEMF

More than 2,900 high school students passed through the doors of the Euromed University of Fez on the occasion of the Open Day, organized to support future students in their reflection on university orientation.

Upon arrival on campus, participants were welcomed and had the opportunity to speak with representatives from the university's schools and faculties to gain a better understanding of the courses offered, academic pathways, and study and career prospects.
The day continued with a tour of the facilities, offering a concrete glimpse into the learning and university life environment: classrooms, laboratories, living spaces and sports facilities.

For one day, the university was transformed into a true space for dialogue and discovery, fully mobilizing its academic and administrative teams to listen to, guide and support high school students in building their future university path.

The UEMF Caravan: Going to meet the talents of tomorrow

True to its international focus and its African roots, the Euromed University of Fez continues its annual tour of meetings and exchanges across the continent, in order to support students in their study projects. For the 2026/2027 academic year, the university teams visited Tunis and Sousse, Dakar, Cotonou and Abidjan in particular.

The program for these meetings includes: participation in information and guidance fairs, exchanges with the parents of current and future students, training and coordination with local partner offices, as well as the signing of agreements and partnerships with universities and companies.

This approach not only allows us to present the training offer, but also to listen to, advise and support students in building their academic path.

Through these meetings, the University reaffirms its commitment: to support students in their study projects and to strengthen ties with families and academic partners across the continent.

Open Day at UEMF, an immersion into the heart of our eco-campus

This Saturday, the UEMF welcomed more than 800 high school students, who came to discover a unique academic environment, combining innovation, sustainability and international openness.

Throughout the day, visitors were able to explore our latest generation eco-campus, designed as a true place for living, learning and experimentation and equipped with state-of-the-art educational and technological infrastructure.

It is also an opportunity to discover a rich and diverse range of training programs, covering a wide range of disciplines, and to interact directly with teaching staff, students and various university services, in order to better build their academic project.

Between immersive visits, inspiring encounters and personalized exchanges, this day allowed each participant to concretely envision their future university journey, within a stimulating and multicultural environment.

Through this initiative, UEMF reaffirms its commitment to supporting the talents of tomorrow, by offering them an environment of excellence conducive to personal development and academic success.

Institutional and diplomatic visits

UEMF–EMUNI Conference at the European Parliament: Higher education at the heart of Euro-Mediterranean cooperation

On December 11, 2025, the Euromed University of Fez and EMUNI organised the “Bridging Continents” conference at the European Parliament in Brussels, highlighting the strategic role of universities in Euro-Mediterranean cooperation.

The event highlighted the co-creation of programs, joint degree programs and two-way mobility of students and teacher-researchers, as well as the importance of strengthening existing institutions (UEMF, EMUNI, UNIMED, TETHYS) to support applied research, innovation, technology transfer and scientific valorization.

The conference brought together academics, representatives of the European Commission, the Union for the Mediterranean, ambassadors and political decision-makers, confirming that the challenges of the Euro-Mediterranean area require joint and partnership action between the North and the South to promote innovation, scientific cooperation and sustainable development.

Visit of members of the Hassan II Academy of Sciences and Technologies to the Euromed University of Fez

The Euromed University of Fez (UEMF) hosted a delegation from the Hassan II Academy of Sciences and Technologies for a visit to its eco-campus and cutting-edge scientific and technological infrastructure. The delegation explored the Euromed Sports Complex, as well as several major technological platforms, including Morocco's largest additive manufacturing and 3D prototyping platform, partly resulting from innovation developed within the University itself.

The visit continued at Fez Smart Factory, a model 4.0 factory, and in various specialized laboratories in civil engineering, biotechnology, biomedicine, virtual reality, robotics and cobotics, as well as at the Euromed Innovation Center, an incubator dedicated to supporting young project leaders.

On this occasion, the President of the UEMF, Professor Mostapha Bousmina, highlighted the University's contribution to academic diplomacy through its international chairs and the strategic role of RIEMAS. This meeting underscored the UEMF's integrated vision and its commitment to the scientific development and international reach of higher education and research in Morocco.

Visit of the EPF Engineering School delegation to the Euromed University of Fez

The Euromed University of Fez (UEMF) was pleased to welcome a delegation from EPF Engineering School, one of the leading French engineering schools, led by Mr. Emmanuel Duflos, Director General of the institution.

This visit is part of strengthening academic cooperation between the two institutions, aimed at developing synergies around engineering programs and encouraging student and faculty mobility through internships, seminars and integrated training.

This meeting marks the continued development of the UEMF's international network of academic partners, and reaffirms its commitment to training engineers who are open to the world.

Courtesy visit of H.E. Tomasz Orłowski, Ambassador of Poland, to the UEMF

The Euromed University of Fez was pleased to welcome His Excellency Mr. Tomasz Orłowski, Ambassador of Poland to Morocco, for a courtesy visit.

Received by the President of the UEMF, Prof. Mostapha Bousmina, the Ambassador expressed his joy at being received at a university of international stature, whose multiculturalism constitutes one of the seven fundamental pillars.

During his speech, His Excellency also highlighted the pleasure of visiting Fez, an emblematic city of Moroccan heritage twinned since 1986 with the city of Krakow in Poland, a symbolic twinning between two former university capitals that share a long tradition of openness and intellectual exchange.

During this meeting, several avenues for academic and cultural cooperation were discussed, including student and teacher mobility between the two countries, the development of joint projects in the educational and cultural fields, as well as the possibility of collaborating on themes related to the alliance of civilizations, a strong focus at UEMF, supported by the Chair in Alliance of Civilizations and the RIEMAS Think Tank, dedicated to Euro-Mediterranean and African studies.

Courtesy and friendship visit of the Ambassador of Benin to the UEMF

The Euromed University of Fez (UEMF) welcomed His Excellency Mr. Joseph Ahanhanzo, Ambassador of the Republic of Benin to the Kingdom of Morocco, for a courtesy visit aimed at strengthening academic cooperation between Morocco and African countries. Received by the President of UEMF, Professor Mostapha Bousmina, the Ambassador praised the quality of the university's academic model, infrastructure, and equipment, as well as its role in training African talent.

This meeting resulted in the agreement of a concrete action plan for developing academic partnerships with Beninese universities, including joint training programs, capacity building in health and emerging technologies, and support for research, innovation, and entrepreneurship. Within this framework, the UEMF also donated two 3D printers to Beninese universities.

Placed under the banner of South-South cooperation, this visit illustrates the UEMF's commitment to African higher education geared towards sustainable development and the sharing of expertise.

The Euromed University of Fez welcomes Her Excellency Ms. Helena Nolan, Ambassador of Ireland to Rabat

The Euromed University of Fez had the honor of welcoming Her Excellency Mrs. Helena Nolan, Ambassador of Ireland to Rabat, accompanied by a delegation composed of Melanie Lynch, Founder, CEO & Creative Director of HerStory and Our Story, Dr. Antonia Hart, historian of women's entrepreneurship, Dr. Salomé Mbugua, CEO of AkiDwA and Commissioner at the Irish Human Rights and Equality Commission, as well as Nour-Elhouda Loqmane, Public Diplomacy and Consular Officer, for a courtesy visit within a dynamic of academic and cultural rapprochement.

This visit allowed the delegation to discover the University's eco-friendly campus, its academic, research, and wellness facilities, as well as the breadth of its multidisciplinary educational offerings. Discussions focused in particular on prospects for cooperation between UEMF and Irish institutions, especially regarding student mobility, academic partnerships, and cultural collaborations, all within a spirit of international openness and intercultural dialogue.

The holding of the conference “Women’s Career Pathways: what shapes women’s professional lives?”, organized as part of the celebrations of St. Brigid’s Day, an emblematic day in Ireland honoring the creativity, resilience and contribution of women to society, provided a space for exchange between international speakers, students and teacher-researchers, but above all supported the University’s commitment to equality, female leadership and knowledge production..

Visit to the infrastructure and innovation hubs of the UEMF

The institutional visit continued with a tour of the main facilities of the Euromed University of Fez, illustrating its integrated model based on innovation, excellence in education, and social engagement. The delegation notably visited the Euromed Sports Center, the Euromed Innovation Center (EIC), and the experimental farm of the Agritech cluster.

This immersive experience highlighted the university's efforts in developing innovative solutions, encouraging student entrepreneurship, and promoting sustainable technologies to address environmental and economic challenges. The visited facilities also demonstrated UEMF's commitment to student well-being, applied research, and the transition to a more sustainable and resilient development model.

Student events

Kidney transplantation: everything you need to know

As part of the national campaign to raise awareness about organ and tissue donation, the Rotaract UEMF club is committed with conviction to a profoundly human cause: saving lives through donation.

Because a gesture can offer a second chance, this initiative aims to inform, raise awareness and encourage everyone to reflect on the impact of this act of solidarity.

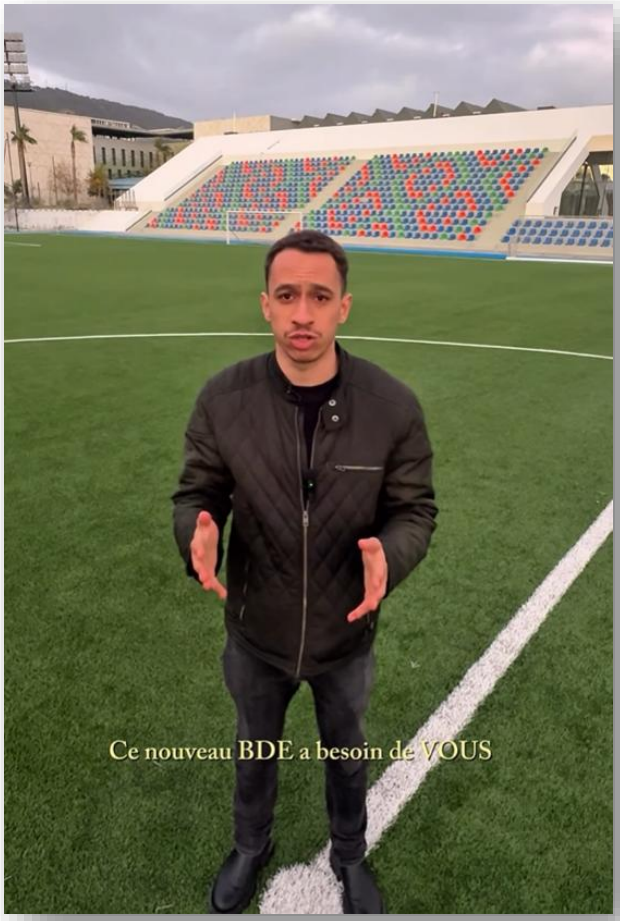

Under the banner of life, sharing and hope, this action is in line with the values upheld by the UEMF and the Rotaract movement: civic engagement, social responsibility and the promotion of health for all.

A scientific and human conference on the theme "Kidney transplantation: everything you need to know" marked this great momentum, with moving testimonies from transplant recipients.

Led by experts from the Faculty of Medicine of Fez, including Professor Tarik Sqalli Houssaini, Dean of the Faculty and Head of the Nephrology, Dialysis and Transplantation Department at Hassan II University Hospital, and Professor Basmat-Amal Chouhani, Associate Professor in Nephrology, Dialysis and Kidney Transplantation, this meeting provided a rich and hopeful space for exchange.

In partnership with the Errahma Association, the Health and Development Aid Initiative (ISAAD), the Hassan II University Hospital and the Faculty of Medicine of Fez, this meeting aims to be a space for exchange, awareness and hope, intended to change perspectives and encourage a culture of giving.

UEMF Welcomes its New Student Union

A new chapter begins at Euromed University of Fez with the creation of the Student Union. Presented in a recent video on the university's Instagram account, this union is founded on the values of unity, solidarity, and commitment. Supported by all the student clubs, its ambition is to restore students' confidence, take concrete action, and revitalize student life, making participation and cohesion the cornerstones of university life.

Distribution of flowers and messages to the teachers

On October 5, 2025, for World Teachers' Day, the University's Hands Club organized a wonderful initiative to celebrate and honor the role of teachers. Students had the opportunity to express their appreciation and gratitude by offering flowers accompanied by positive messages to their professors. This symbolic action aimed to highlight the importance of teachers' roles, not only in the transmission of academic knowledge but also in the human and personal development of students. Through this initiative, the Hands Club helped strengthen the bonds between teachers and students while emphasizing the essential impact of education in building a supportive and respectful university community.

Hygiene awareness in a primary school

On October 14, 2025, the Hands Club organized a hygiene awareness event at a primary school in Bensouda. The initiative aimed to educate students about the importance of personal and collective hygiene in preventing illness and promoting good health practices. Through age-appropriate explanations and interactive discussions, the children learned essential daily hygiene practices, contributing to a healthier and more responsible school environment.

Crochet Workshop

This introductory crochet session was organized with the aim of introducing participants to the fundamental basics of this craft practice, in an educational, friendly and accessible setting for all.

During the workshop, participants learned how to handle the necessary materials, including crochet hooks and yarn, while familiarizing themselves with essential basics techniques. Particular attention was paid to learning fundamental stitches, demonstrated step by step to ensure a gradual understanding adapted to the beginners' level.

Led by an experienced instructor, the session fostered hands-on, interactive, and personalized learning, allowing each participant to progress at their own pace. This initiative not only enabled the acquisition of basic technical skills but also encouraged creativity, concentration, and a spirit of collaboration among the participants.

Through this initiative, the objective was also to promote manual activities as a means of artistic expression and relaxation, while strengthening ties within the group.

Tribute to the Doctors and Committed Members – Elite Club

The Elite Club held a thank-you ceremony to express its deep gratitude to the doctors and club members for their commitment and efforts during the caravans and humanitarian missions of the previous term. This event provided an opportunity to highlight their contributions, present them with certificates of recognition, and celebrate together the successes and positive impact of their actions on the communities they helped.

Breast Cancer Awareness and Prevention Workshop: Date: October 29, 2025 Location: Avicenne Clinic

As part of the Pink October campaign, the Elite Club organized a breast cancer awareness workshop at the Avicenne Clinic in Fez, led by Dr. Ahmed Guennoun, a specialist in gynecology, obstetrics, and infertility. The workshop brought together 20 female students from Euromed University to discuss this crucial public health issue.

The presentation focused on the importance of breast self-examination for the early detection of breast cancer and on best practices for regular screening. Through clear explanations and interactive demonstrations, participants were able to gain practical knowledge, ask questions, and exchange ideas in a friendly and participatory atmosphere.

This workshop was particularly enriching, combining medical expertise with dynamic discussions. It allowed the students to better understand the issues surrounding screening and encouraged them to disseminate this essential information within their communities, thus strengthening the impact of the awareness campaign.

Creative Outing - Crafty Fall Themed Picnic

Organized atIn Ifrane, more precisely at the natural site of Aïn Vittel, this outdoor activity was part of a dynamic of strengthening the links between the members of the club, while promoting creativity in the open air.

Taking advantage of the autumn season and its inspiring natural setting, the club organized a creative, autumn-themed picnic, combining relaxation, art, and conviviality. The main objective was to foster group cohesion through an immersive experience, far removed from the usual academic environment.

In a warm and peaceful atmosphere, participants took part in various craft and artistic activities such as drawing, crocheting, and other hands-on crafts, directly in contact with nature. This time allowed everyone to freely express their creativity, while sharing moments of exchange and connection.

Beyond the artistic aspect, this initiative contributed to the well-being of the members, strengthening team spirit and consolidating human relationships within the club in a natural environment conducive to inspiration and rejuvenation.

Design thinking workshop – Enactus

The Enactus Club organised a Design Thinking training session within the incubator, led by Omar Ameur.

This training aimed to introduce participants to the various key stages of the Design Thinking process, including empathy, problem definition, ideation, prototyping, and testing. Through an interactive and dynamic approach, students were able to understand the importance of a user-centered approach in solving complex problems.

The session also included practical workshops allowing participants to concretely experience methods of collaborative thinking, brainstorming and rapid prototyping.

Beyond theoretical learning, this initiative fostered a spirit of innovation, teamwork, and the development of essential skills in entrepreneurship and project management, thereby strengthening the culture of innovation within the student community.

Speed debating – ORATIO

The ORATIO Club organised a Speed Debating session at Euromed University, offering members a dynamic and stimulating experience based on the Oxford style debate format.

During this activity, participants took part in rapid-fire debates, alternating between defending and opposing the same topic. This demanding format encouraged responsiveness, argumentation skills, and the ability to adapt to differing viewpoints, while fostering constant interaction among the participants.

Beyond the oral presentation skills, this session aimed to develop critical thinking, open-mindedness, and self-confidence. It allowed members to improve their communication skills, structure their ideas effectively, and learn to defend a position rigorously and respectfully within an enriching and collaborative academic environment.

Meet the alumni of EPS – Club GENIUS

The Alumni Meet was a powerful moment of sharing, inspiration, and knowledge transfer within the club. This gathering created a genuine intergenerational bridge between current members and alumni of the Euromed University of Fez (UEMF), who are now fully integrated into the professional world.

In this first episode dedicated to EPS graduates, the speakers shared their academic journeys, professional experiences, and the challenges they faced after graduation. Through authentic and inspiring stories, they offered practical advice on career guidance, preparing for the job market, skills development, and the importance of networking.

Beyond a simple exchange, this event is part of the Create. Enhance. Sustain vision:

- Create: create opportunities for dialogue and mentorship,
- Enhance: strengthen students' ambitions and skills,
- Sustain: maintaining a lasting link between the university and its community of alumni.

This initiative has thus strengthened the sense of belonging to UEMF while motivating students to actively build their own professional trajectory.

Halloween Party – Elite Club

On November 7, 2025, the Elite Club, in partnership with Neverland Events, organized a Halloween party at the Euromed University of Fez. This festive event offered students a fun-filled break filled with creativity, music, and community spirit. The evening was a great success, drawing over a hundred students who came to enjoy a lively and friendly atmosphere. Performances by DJs MZ and Samado kept the crowd entertained, while Halloween costumes added a fun and original touch. The lighting and sound system contributed to creating an immersive and welcoming ambiance. Through this initiative, the Elite Club aimed to foster cohesion among students, promote well-being on campus, and enrich university life through unifying events. The party was a resounding success, strengthening the sense of community and reaffirming the club's commitment to enriching student life.

Health & Solidarity Caravan in Tigrigra – October 2025 - Elite Club

The Elite club organized a multidisciplinary medical caravan in Tigrigra, in the Ifrane-Azrou region, in order to bring healthcare closer to local populations and meet their medical needs.

This initiative mobilized 20 doctors from various specialties, including cardiology, gynecology, urology, ENT, ophthalmology, and dentistry. The beneficiaries were able to access:

A variety of consultations tailored to each specialty.

Comprehensive dental care, including extractions, restorative treatments, scaling and the fabrication of dentures,

Free distribution of medication, for comprehensive and effective care.

This action embodied a true moment of solidarity and humanitarian commitment, strengthening the link between the Elite club and local communities while contributing to the well-being and health of the inhabitants of Tigrigra.

School Health Caravan in Ain Chkef – November 2025 - Elite Club

A school health caravan was organized to improve access to healthcare and raise students' awareness of the importance of health. In the area of dental care, beneficiaries received consultations and treatments, including extractions and cleanings, as well as the distribution of oral hygiene kits containing toothpaste and toothbrushes, to encourage good habits from a young age. The medical component offered general consultations for basic screenings, as well as ophthalmological consultations to assess students' visual health. This caravan was a vital preventive and educational initiative, contributing to children's well-being and promoting a culture of health in schools.

Meet the Laureates – Episode 2: Spotlight on the EIDIA Laureates

The Alumni Meet – Episode 2 was a powerful moment of sharing, inspiration, and knowledge transfer within the club. This meeting created a genuine intergenerational bridge between current members and alumni of the Euromed University of Fez (UEMF), who are now fully integrated into the professional world.

In this second episode dedicated to EIDIA graduates, the speakers shared their academic journeys, professional experiences, and the challenges they faced after graduation. Through authentic and inspiring stories, they offered practical advice on career guidance, preparing for the job market, skills development, and the importance of networking.

Beyond a simple exchange, this event is part of the Create. Enhance. Sustain vision:

- Create: create opportunities for dialogue and mentorship,
- Enhance: strengthen students' ambitions and skills,
- Sustain: maintaining a lasting link between the university and its community of alumni.

This initiative has thus strengthened the sense of belonging to UEMF while motivating students to actively build their own professional trajectory.

Health & Solidarity Caravan – Initiative of the Elite Club in Sais

Club Elite organized a multidisciplinary medical caravan, bringing together several specialties to offer comprehensive and free care to local communities. This initiative took place on November 16th and mobilized 20 dedicated volunteers. Medical services offered: We set up several specialized booths including general medicine for basic consultations, pediatrics for children's checkups, gynecology for women's health, dermatology, ophthalmology, and dental care. Paramedical examinations (blood pressure, blood sugar, wound dressings) were also provided by our teams of medical and nursing students. Awareness and prevention: Beyond providing care, we conducted awareness workshops on hygiene, disease prevention, and good health practices, reaching the entire community. Impact: This caravan allowed us to treat several beneficiaries in a single day, identify several cases requiring medical follow-up, and, most importantly, establish a close connection with a population often far removed from healthcare facilities.

Official launch of the Hult Prize 2025–2026 at the UEMF

The Hult Prize Club UEMF officially launched the 2025–2026 edition of the Hult Prize at the Euromed University of Fez, marking the beginning of a new entrepreneurial adventure focused on social and environmental impact. This launch event provided an opportunity to present the international competition, its objectives, and the opportunities it offers to students wishing to develop innovative, high-impact projects.

Through an interactive and dynamic session, participants discovered the principles of social entrepreneurship, the importance of responsible innovation, and the role of leadership in addressing current challenges. The discussions encouraged students to think about concrete solutions to social and environmental problems, while developing their initiative and creativity.

This initiative is part of a broader effort to promote engaged, ambitious youth who are aware of their role in building a more sustainable future.

Conference-Debate “End Plastic Soup”: Reflection and Commitment for a Sustainable Future

The Oratio Club, in partnership with the Rotaract Euromed Club, organised a conference-debate as part of the international “End Plastic Soup” week, an initiative aimed at raising awareness of the issues related to plastic pollution.

This event brought together students and members of both clubs for an enriching exchange on the role of plastic in our society today, its environmental and social impacts, and the long-term challenges it poses. The discussions also highlighted innovative solutions and sustainable alternatives for reducing our plastic footprint and promoting more responsible consumption patterns.

Through this interactive meeting, participants were encouraged to adopt a proactive stance and become agents of change, thus contributing to building a more environmentally friendly future.

Medical and Humanitarian Caravan for the Benefit of the Residents of the El Haj El Hadi Tajmouti Retirement Home

On November 20, 2025, a medical and humanitarian caravan was organized at the El Haj El Hadi Tajmouti retirement home in the city of Fez. The aim of this initiative was to provide medical, psychological, and human support to the elderly residents of the facility.

The program included medical consultations to assess the residents' health and address their specific needs. Simultaneously, activities to provide emotional support and entertainment were organized to encourage interaction, combat isolation, and offer moments of conviviality and well-being.

The caravan also featured the distribution of donations aimed at improving the daily lives of those receiving assistance. This act of solidarity reflects a strong commitment to the respect, dignity, and well-being of the elderly, while reinforcing the values of solidarity and social responsibility among the participating volunteers.

HIV Screening Day at the Euromed University of Fez: Awareness, Prevention, Action – Elite Club

On November 20, 2025, an HIV screening was organized within the Euromed University of Fez, in collaboration with ALCS, as part of health awareness and prevention actions.

This initiative aimed to inform students about the importance of early detection, to dispel misconceptions about HIV, and to encourage a responsible attitude towards sexual health. Through educational support and open discussions, participants received reliable and relevant information.

The screening took place in a strictly confidential, secure environment, supervised by qualified professionals. Students benefited from personalized advice and supportive guidance. This initiative helped strengthen the culture of prevention, responsibility, and solidarity within the university community.

CaravanMedical and Dental Care in Tamedit: A Commitment to Solidarity in Service of Rural Communities

A multidisciplinary medical caravan was organized in Tamedit, in the Taounate region, to strengthen access to care for local populations and to meet the health needs of rural communities.

This initiative mobilized several medical specialties, allowing beneficiaries to access tailored consultations in various healthcare fields. Dental care played a central role, with consultations, extractions, restorative treatments, scaling, and the fitting of dental prostheses provided, ensuring comprehensive and high-quality treatment.

Furthermore, the pharmacy service provided free dispensing of prescribed medications, contributing to appropriate therapeutic monitoring and the improvement of patients' health.

Through this high-impact social action, the club reaffirms its commitment to health equity, the well-being of rural populations and the promotion of sustainable solidarity.

Master of Speech Club Finalist at Doc's Mic – FMP Fes (English Section)

The Master of Speech Club participated brilliantly in Doc's Mic – FMP Fès (English Section), an event dedicated to oral expression and the art of speech in English, organized within FMP Fès.

Thanks to their commitment and the quality of their performances, the club members proudly reached the final stage of the competition. This experience allowed them to showcase their public speaking skills, their fluency in English, as well as their creativity and ability to captivate an audience.

Beyond performance, this participation illustrates the club's ongoing commitment to promoting excellence in communication, strengthening self-confidence and developing leadership among its members, thus helping to train students capable of expressing themselves with impact and conviction.

Themed Drawing Workshop: Immersing yourself in the world of Harry Potter

The Crafted Knots club organized a Harry Potter-inspired drawing workshop at the university. Designed with an immersive winter theme, this session offered participants the opportunity to delve into a rich narrative world while developing their artistic skills.

Through the exploration of different techniques and materials—gouache, acrylic, watercolor, and other media—students were able to experiment with composition, color work, and narrative illustration. The workshop encouraged each student to express their creativity, tell a story through images, and refine their personal style.

This activity provided a moment of artistic exchange and discovery, strengthening the creative spirit and individual expression within the university community.

Enactus Bootcamp: Strengthening Pitch Skills and Needs Analysis

The Enactus club organised a bootcamp in collaboration with Enactus ENCG Fès and Enactus FMDP Fès, aimed at strengthening the skills of participants in the context of entrepreneurial and social projects.

This event offered interactive sessions on Pitching, allowing students to effectively present their ideas and projects to an audience or juries, and on Needs Assessment, in order to better identify the problems of beneficiaries and design appropriate solutions.

Thanks to this bootcamp, participants were able to develop their confidence, refine their communication skills, and acquire practical tools to maximize the impact of their initiatives. This inter-university collaboration also fostered the exchange of experiences and the creation of a strong network among students engaged in social entrepreneurship.

Third Edition of the UEMF Talks: National Eloquence Competition

The Master of Speech Club organized the third edition of UEMF Talks, a national public speaking competition bringing together participants who speak in French, English, and Arabic. The event gathered 72 participants from 12 universities across Morocco, providing a prestigious platform to showcase talent and skills in oral communication.

This competition allowed students to demonstrate their oral fluency, creativity, and ability to persuade an audience in several languages. It also highlighted the importance of public speaking, critical thinking, and self-confidence in personal and academic development.

The UEMF Talks are a highlight for the club, reflecting its commitment to promoting excellence in communication and developing leaders capable of speaking with impact at the national level.

School Health Caravan in Aïn Chkef: Prevention and Well-being of Students by the Elite Club

On December 20, 2025, the Elite Club organized a school health caravan in Aïn Chkef, in the Moulay Yaacoub region, aimed at promoting prevention and the well-being of students.

The dental component offered consultations, preventive care and awareness campaigns, in order to instill good oral hygiene habits and prevent dental diseases from a young age.

In parallel, general medical consultations were conducted to assess the overall health of the students, while the ophthalmology department ensured the screening of visual disorders, guaranteeing comprehensive and preventive care.

This initiative by the Elite Club constitutes an essential educational and preventive action, strengthening the culture of health in schools and contributing significantly to the well-being and protection of students.

Hult Prize Online Workshop: Discovering Design Thinking for High-Impact Ideas

The Hult Prize Club organized its first online workshop dedicated to Design Thinking, offering participants a complete immersion in the key stages of this methodology: empathy, problem definition, ideation, prototyping and testing.

The workshop encouraged students to design innovative and high-impact solutions based on real human needs, while promoting active engagement, collaboration, and the sharing of ideas within the group.

This session enabled participants to develop their creativity, critical thinking and teamwork skills, while strengthening their understanding of user-centered innovation processes.

Traditional Music Workshop: Discovering Moroccan Musical Heritage

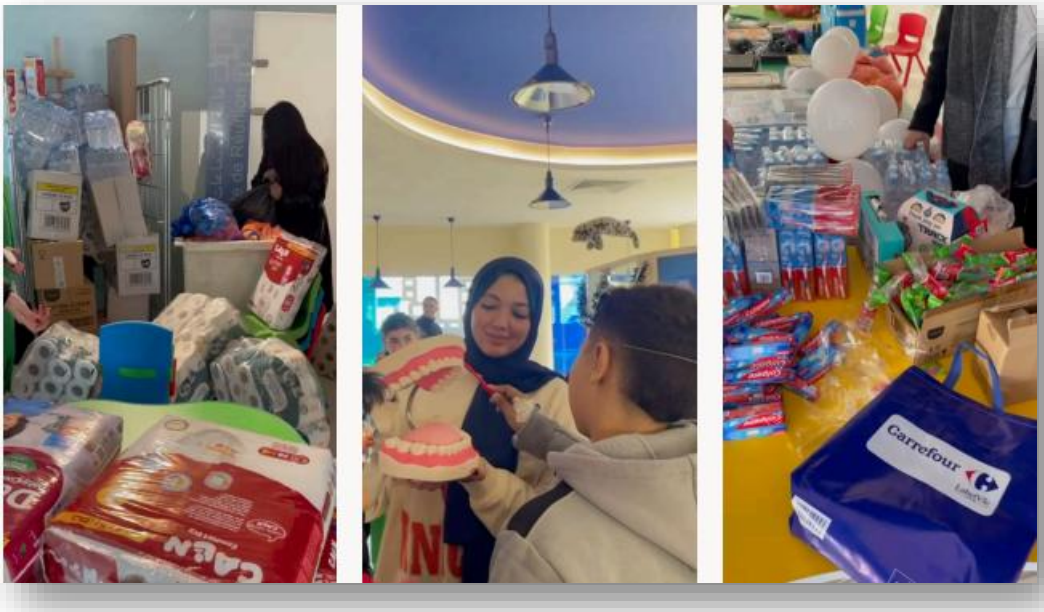

The Mémoire en Scène Club organised a traditional music workshop for students, offering them the opportunity to explore and practice Moroccan musical styles.

During this session, participants learned to play traditional instruments, while discovering the authentic rhythms and sounds that characterize the richness of Morocco's musical heritage.

This workshop aims to preserve and promote Moroccan musical culture, while allowing students to develop their artistic sense, listening skills, and creativity. It also provides an opportunity for cultural exchange and the celebration of local traditions within the university community.

Solidarity visit to the Pediatric Hematology-Oncology Department of the University Hospital by the Elite Club

On January 8, 2026, the Elite Club, in collaboration with the PISE project and the Prosthetists Association, organized a solidarity visit to the pediatric hematology-oncology department of the University Hospital, with the aim of bringing comfort, entertainment and awareness to hospitalized children.

A specially designed space allowed the children to enjoy games and fun activities, two PlayStation consoles, and a library to encourage reading. Desserts and bottles of water were distributed to make their day more pleasant and enjoyable.

In parallel, the club carried out an oral health prevention campaign, distributing hygiene kits (toothbrushes and toothpaste), as well as essential products such as diapers, toilet paper and wipes.

This initiative made it possible to combine fun, education and care, strengthening the well-being of children and illustrating the solidarity and human commitment of the Elite Club towards young hospitalized patients.

Source: ELITE UEMF 25-26 club report

Theatre Workshops: Developing Student Creativity and Expression

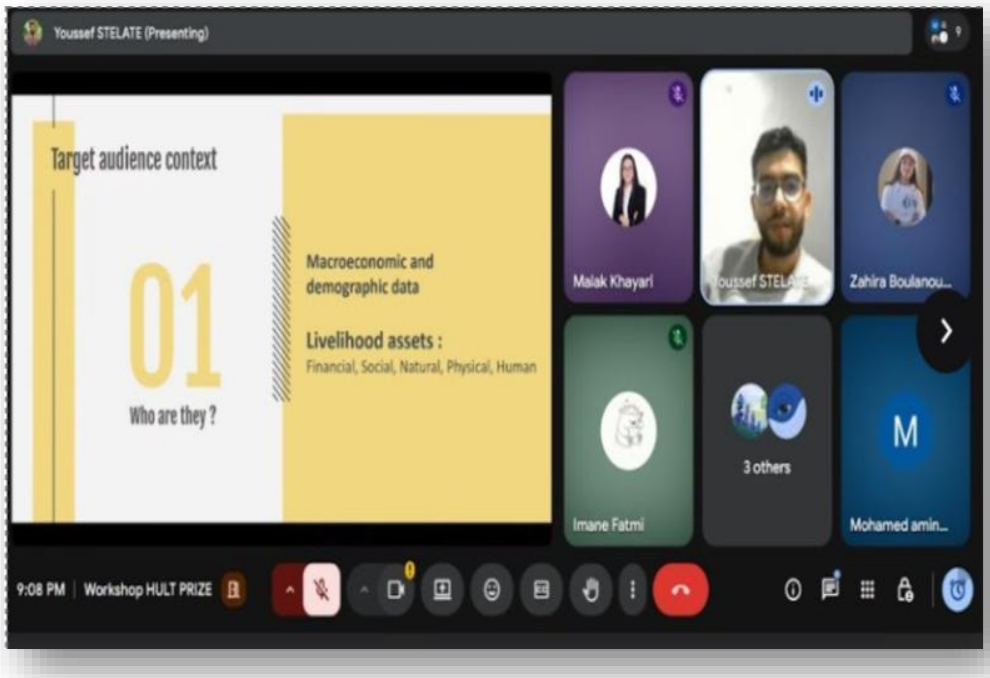

The Mémoire en Scène Club organized theatre courses for students, aimed at stimulating their artistic expression, self-confidence and public speaking skills.

Through interpretive exercises and stage performances, participants explore their creativity, develop their sense of rhythm and body expression, while strengthening communication and teamwork.

These workshops offer a fun and educational setting where students can express themselves freely, experience different roles and improve their interpersonal and public speaking skills, thus contributing to their personal and academic development.

Second Hult Prize Online Workshop: Transforming Ideas into Viable Projects

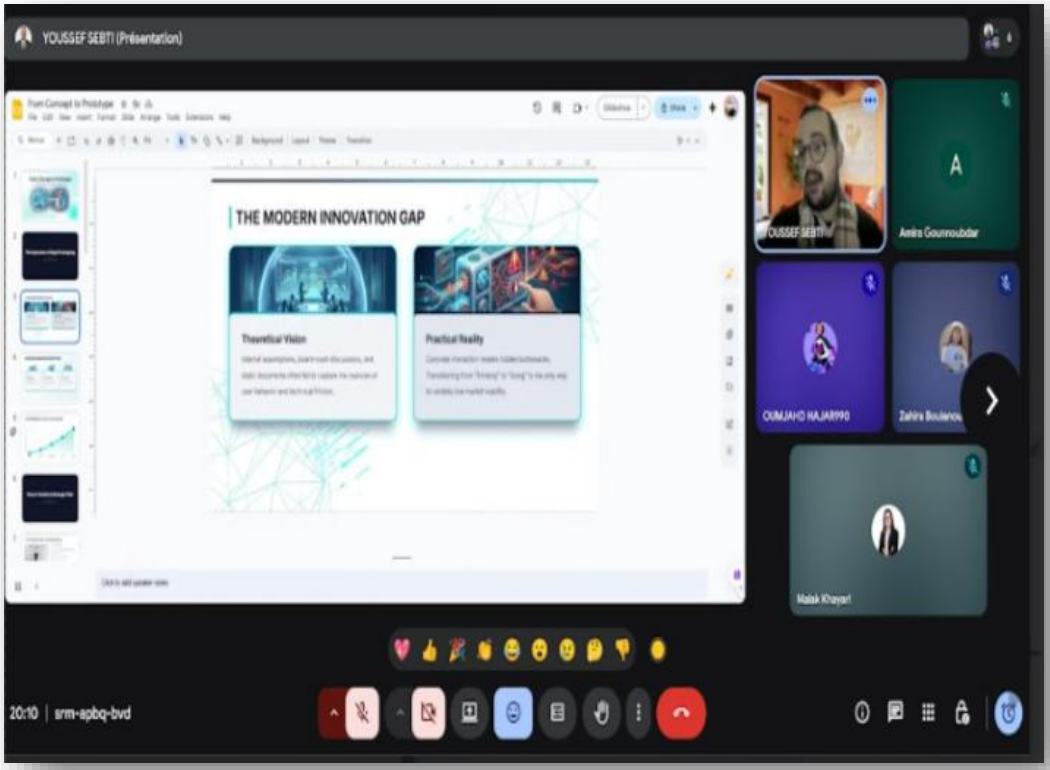

The Hult Prize Club organized its second online workshop, designed to guide participants in transforming their initial ideas into structured and viable projects.

The session combined interactive discussions and practical exercises, covering key stages such as ideation, project development, and concept refinement. Students were thus able to develop their creative thinking, their ability to analyze and structure ideas, and their social entrepreneurship skills.

This workshop provided a collaborative learning space that fostered strategic thinking and innovation, strengthening participants' commitment to creating solutions with a strong social and environmental impact.

Third Hult Prize Online Workshop: From Concept to Prototype

THEHult Prize Club organized its third online workshop, designed to support teams in prototyping their projects, transforming their ideas into concrete and testable solutions.

The participants discoveredpractical tools to structure, refine and validate their concepts, while taking part in interactive exercises, collective reflections and sharing of experience.

This session helped to strengthen thecreativity, rigor and innovative capacity of students, while effectively preparing them to present solid projects during the final Hult Prize competition.

ECG Interpretation Training led by Dr. Mohamed Amine Guessab 02/04

As part of its internal training program, the Elite Club organized, on Thursday, April 2, 2026, a training session in electrocardiogram (ECG) interpretation, led by Dr. Mohamed Amine Guessab.

The aim of this session was to strengthen the clinical skills of club members in reading and analyzing ECG tracings, an essential tool in the diagnosis of cardiovascular diseases. Through a combined theoretical and practical approach, participants acquired the fundamental principles of interpretation, as well as keys to applied clinical reasoning.

This initiative reflects the Elite Club's commitment to promoting excellence, capacity building, and skills development among its members by offering high-quality training led by experienced healthcare professionals. It also demonstrates the club's dedication to effectively preparing its members for the challenges they face in the field, particularly during medical caravans and community health initiatives.

Blood Donation Campaign – April 2 & 3, 2026

As part of its civic and solidarity actions, the Elite Club organized the "Blood Donation Campaign - April 2 & 3, 2026", an initiative aimed at raising awareness of the importance of blood donation and actively contributing to strengthening national reserves.

Over these two days, club members mobilized to encourage student and staff participation, while also ensuring logistical organization and providing optimal support to donors. This campaign resulted in a significant number of donations, contributing to saving lives and meeting the urgent needs of healthcare facilities.

Beyond its health impact, this initiative also provided a powerful moment for raising awareness and fostering solidarity, strengthening the spirit of commitment and social responsibility within the university community. It fully reflects the values of the Elite Club, founded on mutual support, volunteerism, and positive impact in service to society.

School Health Caravan – Ben Khlif School Group, Ouled Mimoun 11/04

On April 11, 2026, Club Élite organized the "School Health Caravan – Ben Khlif School Group, Ouled Mimoun," as part of its community health and school-based prevention initiatives. This initiative aimed to promote the health and well-being of students while reinforcing preventative practices from a young age.

During the day, students received general medical consultations, dental care and procedures, as well as visual acuity tests. Oral health prevention workshops were also held, along with the distribution of toothbrushes and toothpaste, to raise children's awareness of good dental hygiene practices.

This initiative fully illustrates the Elite Club's commitment to youth health and prevention, while demonstrating its ability to organize comprehensive and structured interventions to serve school communities. It also reflects the club's spirit of solidarity and social responsibility towards children and their educational environment.

Source : Club ELITE UEMF Report 25-26

SDG challenge: from idea to impact

On April 16, 2026, the Elite Club of the Euromed University of Fez organized an inspiring workshop entitled "SDG Challenge: From Idea to Impact," led by Hamid Taghlaoui. The workshop aimed to raise students' awareness of the importance of the Sustainable Development Goals (SDGs) and to encourage them to transform their innovative ideas into projects with concrete impact.

Through interactive discussions, case studies, and practical advice, participants were able to discover the various stages involved in designing, structuring, and developing initiatives with social, environmental, and economic objectives. Mr. Hamid Taghlaoui's presentation also highlighted the role of governance, leadership, and citizen engagement in the success of sustainable projects.

This workshop provided a space for inspiration, reflection and creativity, strengthening the entrepreneurial spirit and commitment of students to more inclusive and sustainable development.

Source : Club ELITE UEMF Report 25-26

School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi 18/04

On April 18, 2026, the Elite Club organized the "School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi," as part of its health and prevention initiatives for students. This action aimed to promote well-being and health prevention within the school environment.

During the day, students were able to receive general medical consultations, dental care and procedures, as well as visual acuity tests. In addition, oral hygiene workshops were held, along with the distribution of toothbrushes and toothpaste, to raise awareness among young people about the importance of hygiene and preventative care.

This intervention illustrates the Elite Club's commitment to improving student health and strengthening prevention from a young age, while demonstrating its ability to deploy comprehensive and structured health caravans, meeting the needs of local school communities.

Source : Club ELITE UEMF Report 25-26

AinClean Chkef: an ecological commitment for a sustainable future

On April 18, 2026, the Elite Club of the Euromed University of Fez organized an ecological clean-up action in the Ain Chkef forest, located around Fez, as part of its commitment to the Sustainable Development Goals (SDGs), in particular SDG 13 (Climate Action) and SDG 15 (Life on Land).

This environmental initiative is part of a civic effort to raise awareness among students and participants about the importance of preserving natural ecosystems and biodiversity. Through concrete actions such as collecting and cleaning up waste, volunteers contributed to the restoration of this forest area, which is often damaged by human behavior and a lack of environmental responsibility.

Beyond its operational aspects, this activity provided a genuine moment of collective awareness regarding the urgent need to protect our environment. It reinforced the values of responsibility, commitment, and ecological solidarity among the participants, while also illustrating the essential role of youth in the transition to sustainable development.

Through this action, the Elite Club confirms its commitment to actively participating in the SDG movement, translating ideas into concrete actions with a positive impact on society and the environment.

Source : Club ELITE UEMF Report 25-26

Sexual and reproductive health: raising awareness for better prevention

On April 23, 2026, the Elite Club of the Euromed University of Fez organized a conference on sexual and reproductive health in partnership with ALCS and the Espace Santé Jeunes Ville Nouvelle Fez. The aim of this event was to raise student awareness of issues related to sexual and reproductive health through an educational, preventative, and participatory approach.

The conference focused primarily on three major themes: sexually transmitted infections (STIs), sex education, and contraception. Speakers emphasized the importance of access to reliable information, prevention, and adopting responsible behaviors to promote the health and well-being of young people.

Through interactive exchanges and enriching discussions, this initiative has created a space for open and constructive dialogue, helping to break taboos around sexual health and raising student awareness of these essential public health issues.

A social and educational day for the benefit of the children of the Lalla Amina Center

On Thursday, May 7, 2026, the Elite Club of the Euromed University of Fez, in collaboration with the Directorate of Student Affairs, participated in the organization of a cultural and sporting day for the benefit of the children of the Lalla Amina Center for the Protection of Children.

This solidarity initiative was marked by the distribution of Elite bags containing school supplies, including pencil cases, pens, notebooks and coloring books, in order to support and encourage children in their educational journey.

During the day, the Elite Club also ran an oral hygiene awareness workshop, along with the distribution of toothbrushes and toothpaste. The workshop aimed to educate children about the importance of brushing their teeth and good hygiene practices to maintain their oral health.

Through this social and educational action, the Elite Club reaffirms its commitment to children, education and the promotion of health.

Source : Club ELITE UEMF Report 25-26

Mobile dental clinic in Izlafene: strengthening access to care and prevention

On May 9, 2026, the Elite Club of the Euromed University of Fez, in partnership with the IAA Club of the Faculty of Sciences and Techniques of Fez, organized a medical-dental caravan in Izlafene, in the province of Taza, as part of its community health and prevention actions.

This initiative made it possible to provide medical consultations in general medicine, cardiology, and gynecology, along with the dispensing of medication to diagnosed patients. A significant oral health prevention component was also implemented through awareness campaigns and the distribution of 400 toothbrushes and toothpaste to beneficiaries.

Through this action, the two clubs have helped to bring health services closer to rural populations while strengthening awareness of the importance of prevention and medical follow-up.

UEMF's Got Talent: a 6ème an edition dedicated to talent, creativity and emotion

As part of its policy to promote student well-being and the development of artistic and creative skills, the Euromed University of Fez (UEMF) organized the 6th eThe UEMF's Got Talent edition, a cultural event that has become a key part of university life, brought together students, teachers, and members of the university community to celebrate creativity, cultural diversity, and artistic expression.

Throughout the evening, participants presented a variety of performances showcasing their talents in different areas such as singing, dancing, stage performance, and other forms of artistic expression. This event provided students with a platform to share their passions, develop their self-confidence, improve their communication skills, and strengthen their ability to speak in front of an audience.

Beyond its artistic dimension, UEMF's Got Talent provides a space that fosters inclusion, diversity, and cohesion within the university community. By showcasing individual talents and the cultural richness of students, this event helps strengthen the sense of belonging to the University and promotes an environment that respects the diversity of backgrounds, cultures, and forms of expression.
This initiative illustrates UEMF's commitment to a holistic educational approach that goes beyond the acquisition of academic knowledge to also foster students' personal development, creativity, initiative, and social skills. It thus contributes to creating a stimulating university environment conducive to individual growth and the development of talents.

Partnership

Signing of a cooperation agreement between the UEMF and the Union of French Citizens Abroad (UFE)

The Euromed University of Fez (UEMF) and the Union of French People Abroad (UFE) have signed a strategic partnership agreement aimed at strengthening international mobility, academic exchanges and solidarity between university communities and French people abroad.

This agreement is part of a dynamic of academic, scientific and cultural cooperation, promoting the sharing of expertise, the international influence of UEMF and the networking of talents and laureates on an international scale.

Alongside the signing, the UFE delegation visited several key infrastructures of the University, including the research-innovation platform and the incubator, illustrating UEMF's commitment to innovation and entrepreneurship.

Launch ceremony of the Audencia Executive MBA – UEMF

It was in an atmosphere that was both friendly and full of ambition that the Audencia – UEMF Executive MBA was launched, in the presence of Mr. Taoufik OUAZZANI CHAHDI, Director of the EMBA program and Advisor to the President of UEMF, Ms. Khadija Essafi, Vice-President in charge of Academic and Cultural Affairs at UEMF, and Dr. Valérie Claude-Gaudillat, Head of MSc Business Strategy & Consulting and Professor of Strategy at Audencia, on the occasion of welcoming a first cohort with very diverse profiles.

The result of a collaboration between Audencia Business School (ABS) and the Euromed University of Fez (UEMF), this program of excellence is deployed at UEMF and leads to the awarding of a double degree; the Audencia – UEMF Executive MBA, holder of the triple AMBA, EQUIS and AACSB accreditation, as well as a degree awarded by the Euromed University of Fez.

Designed to support decision-makers in a constantly evolving environment, the Audencia-UEMF EMBA aims to train leaders capable of thriving in complex and uncertain contexts. The program develops a comprehensive understanding of management, combining strategic vision, agility, and the ability to transform, in order to support the creation of sustainable performance.

A new step for high-level executive education, serving leadership and academic excellence.

Towards a new chapter of cooperation between the University of Paris 1 Panthéon-Sorbonne and the Euromed University of Fez

The Euromed University of Fez welcomed Professor Christine Neau-Leduc, President of Paris 1 Panthéon-Sorbonne University, to strengthen a robust academic partnership. This collaboration, already exemplary through the off-campus Master's program in Business Law, will be expanded to include scientific research, social innovation, the recruitment of postdoctoral fellows, and the creation of new dual-degree programs. The initiative aims to enhance talent development, foster innovation, and cultivate a high-impact international partnership.

[Call for applications] Erasmus+ mobility grants at Mykolo Romerio University of Rokiškis in Lithuania

The Euromed University of Fez is launching a call for applications for a scholarshipErasmus+ mobility, intended for academic staff in the fields of law, psychology, management, English, philology, education, commerce and economics wishing to undertake a mobility at Mykolo Romerio University of Rokiškis in Lithuania.

[Call for applications] Erasmus+ mobility grants at Parthenope University of Naples in Italy

The Euromed University of Fez is launching a call for applications for three (3) Erasmus+ mobility grants, intended for doctoral students in the field of translation and interpreting wishing to undertake a mobility period at the Parthenope University of Naples in Italy.

Application deadline : November 14, 2025

Study in Canada (SCS) scholarships at the University of Quebec at Trois-Rivières (UQTR) – Canada

Number of scholarships: 2

Application deadline: January 20, 2026

Academic year: 2026–2027

New international mobility opportunities: University of Sherbrooke, Canada

The UEMF hosted the University of Sherbrooke for a meeting dedicated to strengthening international academic cooperation and presenting opportunities available to our students.

Represented by Ms. Carine Huillier, project manager at the University of Sherbrooke office in France, this meeting highlighted a wide range of opportunities for academic exchanges and training pathways with an international dimension.

Our students were thus able to discover the mobility programs, university partnerships and double degree opportunities offered within the two campuses of the University of Sherbrooke, opening the way to pathways of excellence in strategic fields such as engineering, applied sciences, computer science or software engineering.

Through these initiatives, UEMF confirms its commitment to education that is open to the world, promoting the circulation of knowledge, the sharing of expertise and the employability of its students in an international academic and professional environment.

A meeting offering concrete perspectives for those who wish to build an academic career at the crossroads of continents.

Strengthening the partnership between the Euromed University of Fez and theFrench Institute of Morocco

As part of the strategic partnership between the UEMF and the French Institute of Morocco, a coordination meeting was held on October 29 at the UEMF, jointly chaired by Ms. Khadija Essafi and Ms. Carine Viallon. This meeting provided an opportunity to review the progress of the partnership and identify new areas of cooperation.

The discussions focused on strengthening French for specific purposes and certifications (DELF, DALF, TCF, TEF), the establishment of a joint cultural program, the promotion of Francophone research and cross-mobilities, as well as the development of innovative projects such as the Franco-Digital Lab and Mediterranean hackathons.

The meeting reaffirmed the shared commitment to strengthening the influence of the French-speaking world and consolidating a Euro-Mediterranean space for dialogue, knowledge and shared innovation.

[Call for applications] Mobility at the University of Liège

As part of its efforts to strengthen the international dimension of its programs, the Euromed University of Fez has launched a call for applications for academic mobility at the University of Liège, aimed at 2nd-year students.ᵉand 3ᵉannee of the cycle d'ingenieur en gedenie mecannichasL'Euromed Polytechnic School (EPS). This opportunityeallowseselected students to pursue a period of study in an international academic environment, fostering the development of scientific, linguistic and intercultural skills.

Candidate selection is based on academic criteria, language proficiency, and student motivation and commitment. The process includes several stages, including application submission, internal pre-selection, file evaluation, and interviews before final appointment by the university.

This initiative is part of UEMF's commitment to promoting international mobility, strengthening university partnerships and preparing future engineers to thrive in a globalized scientific and professional environment.

[Call for applications] Mobility at the University of Angers

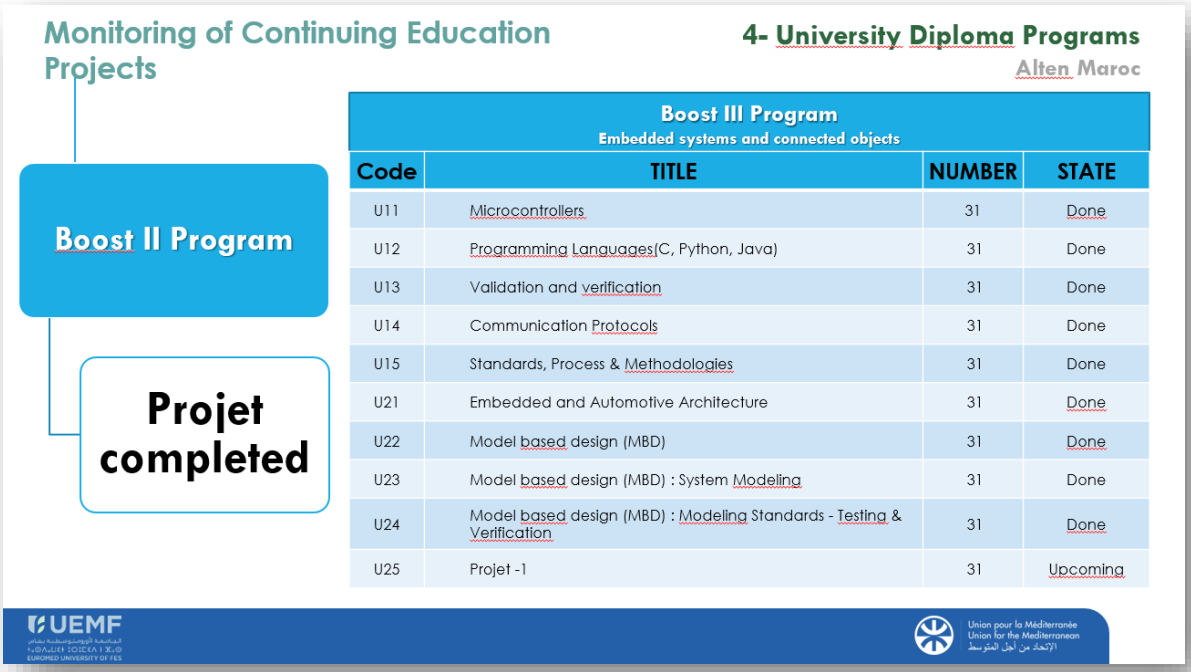

As part of its efforts to develop international student mobility, the Euromed University of Fez has launched a call for applications for an academic exchange at the University of Angers, aimed at second-year students in the biomedical engineering program at the BiomedTech Engineering School (EIB). This opportunity allows selected students to pursue a period of study in an international academic environment, fostering the acquisition of scientific, linguistic, and intercultural skills.

Candidate selection is based on academic excellence, language proficiency, and student motivation. The process includes several stages, including application submission, internal pre-selection, file evaluation, and interviews before final appointment by the university.

This initiative reflects UEMF's commitment to promoting international openness, strengthening university partnerships and training engineers capable of evolving in a global scientific and professional context.

Application to the Call for Expressions of Interest – JobInTech Program (MNC)

On January 28, 2025, the UEMF, represented by its President, Professor Mostapha Bousmina, officially submitted its application to the Call for Expressions of Interest (CEI) launched by Maroc Numeric Cluster (MNC) within the framework of the national JobInTech program. This application, addressed directly to MNC and signed by the President of the UEMF, commits the university to providing the human and technical resources necessary for the success of a potential partnership. The proposal, completed on April 18, 2025, was deemed eligible and selected by the evaluation committee, thus placing the UEMF among the officially listed providers participating in the JobInTech program. This program aims to train qualified digital professionals to meet the regional needs of the digital job market. The actual allocation of training will be determined later in consultation with the JobInTech Monitoring Committee, according to a defined schedule. This selection represents strong institutional recognition of the quality and relevance of UEMF's training offerings in the field of information and digital technologies.

Application for the Restricted Tender – GIMAS Programme (Aerospace Industry)

UEMF submitted its application in response to the Restricted Call for Tenders issued by GIMAS (Groupement des Industries Marocaines Aéronautiques et Spatiales), a professional association founded in 2006 by pioneering aerospace industry leaders in Morocco. This call for tenders concerns the delivery of group training programs for GIMAS members, financed through Special Training Contracts (CSF), which are part of the group training plan. GIMAS's mission is to support industry players, advocate for their interests with public authorities, train employees to meet international aerospace standards, and strengthen the competitiveness of Moroccan aerospace SMEs, particularly through the Be-Max Program (Build the Moroccan Aerospace of Excellence). By responding to this call, UEMF affirms its strategic positioning as an essential player in vocational training in high value-added industrial sectors, and its desire to actively contribute to the development and competitiveness of the Moroccan aeronautical industrial fabric at the national and international level.

CFG Bank's Positive Response – Future Managers Training Program

UEMF developed and proposed to CFG Bank a customized training program designed to develop the managerial and strategic skills of the bank's next generation of executives. CFG Bank responded favorably to this initiative, thus validating the relevance and quality of the pedagogical approach proposed by UEMF. This approval demonstrates the recognition by a major player in the Moroccan financial sector of UEMF's ability to design continuing education programs perfectly tailored to the specific requirements of the banking world. This partnership is part of the university's proactive approach to supporting major Moroccan companies in developing the skills of their human resources and contributes to strengthening human capital within private financial institutions, a key factor in their competitiveness and sustainable development.

Executive Training Programme on Sustainable Social Finance – UNFPA

The UEMF submitted its application to the Executive Training Programme on Sustainable Social Finance and Blended Finance Mechanisms, an initiative fully funded by the United Nations Population Fund (UNFPA). This ambitious program was structured into five cohorts targeting distinct audiences: Civil Society, Government, the Private Sector, the Media, and Academia, for a total of 140 participants. Each cohort followed a modular program covering an introduction to sustainable social finance, blended finance, social bonds and Sukuk, Social Return on Investment (SROI), and tools and methodologies for designing impactful projects. All sessions took place between October and November 2025, culminating in an official closing ceremony on January 16, 2026, at the Bouregreg Palace in Salé, as part of the GIB project aimed at empowering vulnerable girls, particularly NEETs (Not in Education, Employment, or Training). This achievement illustrates UEMF's ability to design and deploy large-scale national certification training programs in partnership with major UN agencies.

Training Plan of the Fes-Meknes Regional Council (CRFM) – Strengthening Administrative and Technical Skills

The UEMF actively participated in the implementation of the 2025 Training Plan of the Fes-Meknes Regional Council (CRFM), aimed at strengthening the administrative and technical skills of the staff of this regional public institution. This process began with an in-depth diagnostic phase conducted in three stages: Phase 1 (May 9, 2025) of meetings with human resources managers, Phase 2 (May 19, 2025) of meetings with directors and department heads, and Phase 3 (May 26-27-30, June 5 and July 22, 2025) of broader interviews with all staff. Based on this diagnosis, a first training module was deployed on Quality Management and the requirements of the ISO 9001:2015 standard, organized on October 9-10 and 16-17, 2025. This intervention demonstrates the UEMF's commitment to strengthening the capacities of regional public institutions for optimized management in accordance with international quality standards.

GIZ Training Programme – Dorscht Impact (Circular Water Economy)

The UEMF has been selected to implement a specialized training program within the framework of the GIZ – Dorscht Impact partnership, focusing on the strategic theme of the circular economy of water in urban areas. This program, deployed in several Moroccan cities (Rabat, Marrakech, and Tangier), is structured into four thematic cohorts: Cohort M1, intended for institutional actors (agencies and ministries) on regulations, governance, and project management related to water (sessions held in Rabat on February 4-5 and 11-12, 2026); Cohort M4, focused on strategic urban planning and the integration of the EccEau concept (sessions in Marrakech and Tangier in February 2026); Cohort M2, targeting teachers and academic staff on the transition from theory to practice (sessions planned in Tangier and Marrakech in March-April 2026); and the M3 Cohort, designed for water sector professionals, focusing on the 5Rs of Water concept (sessions planned in Tangier and Marrakech in April 2026). This program positions UEMF as a leading player in training on environmental issues and the sustainable management of water resources in Morocco.

ALTEN 2025 Training Plan – Developing Innovation Skills

UEMF is actively involved in the implementation of ALTEN's 2025 Training Plan. ALTEN is an international engineering and technology group. This partnership is part of a strategic approach to anticipating future skills needs and supporting innovation within the company. UEMF assists ALTEN in developing the skills of its engineers and employees by offering customized training programs aligned with the technological requirements and innovation challenges of the sector. This collaboration strengthens UEMF's position as a partner of choice for major technology companies seeking to enhance the skills of their human resources, and demonstrates the recognition of its expertise in instructional design within the fields of technology and innovation.

[Call for applications] Dual degree program at the EPF School of Engineering

As part of its efforts to strengthen international engagement, the Euromed University of Fez offers a dual degree program with EPF Engineering School for Big Data and Artificial Intelligence students at EIDIA. This program allows selected students to complete part of their studies abroad, fostering the development of technical, linguistic, and intercultural skills.

Selection is based on academic performance, language level and motivation, through a structured process including application, pre-selection, interviews and final nomination.

This initiative is part of UEMF's commitment to training highly qualified engineers, capable of operating in an international environment and meeting current technological challenges.

[Call for applications] Mobility at the EPF Engineering School

The Euromed University of Fez offers a mobility and dual degree opportunity with EPF Engineering School, designed for students in Big Data and Artificial Intelligence. This program allows selected students to complete part of their studies abroad, strengthening their technical, linguistic, and intercultural skills.

Selection is based on academic results, language level and motivation, through a structured process including application, pre-selection and interviews.

This initiative aims to train engineers capable of thriving in an international environment and meeting current technological challenges.

EMBA Audencia – UEMF: Deployment of the 3rd Self Leadership module

Developing effective leadership begins with a deep understanding of oneself and others!

From March 27 to 29, 2026, as part of the EMBA programAudencia– UEMF, participants took the Self-Leadership module, led by ProfessorAgnes Boissiere Marchand.

Through an interactive teaching approach combining personality tests (MBTI), workshops, simulations and exchanges of experiences, this module made it possible to explore individual preferences, strengthen communication and negotiation skills, and adapt management styles to different contexts.

These three days also provided an opportunity to address key issues in contemporary leadership, such as stress management, team mobilization, and the quality of professional relationships.

A structuring module, at the heart of the training of leaders capable of adapting, inspiring and mobilizing in complex environments.

Applications now open – International Mobility

The Euromed University of Fez is launching a call for applications for academic mobility at the Politecnico di Torino University (Italy), intended for students enrolled in Civil Engineering, Electrical Engineering and Cybersecurity Engineering.

This program offers students the opportunity to gain international academic experience at a renowned partner institution, while developing their skills in strategic engineering fields.

EMBA Audencia – UEMF: Deployment of the Financial Analysis module

EMBA Audencia – UEMF: Deployment of the Financial Analysis module

Understanding a company's performance means knowing how to read beyond the numbers.

From April 17 to 19, 2026, as part of the EMBA programAudencia– UEMF, the participants followed the Financial Analysis module, led by Prof.Karim BENNIS.

Through a rigorous approach rooted in professional practices, this module made it possible to decipher financial statements and to assess the solidity and risk profile of companies.

These three days also provided an opportunity to deepen key skills: performance analysis, identification of risk factors, understanding of growth dynamics and assessment of a company's ability to create value.

An essential module for training capable decision-makers to inform their strategic choices through solid and relevant financial analysis.

Bernspire 2025-2026: Applications open for international student competitions

Bernspire, a Swiss association committed to education, innovation and the development of young talent internationally, announces the official opening of applications for the 2025-2026 edition of its academic competitions.
Organized annually on a supra-regional scale, Bernspire's Graduation Project Challenges are aimed at final-year university students in the fields of engineering and social sciences. This initiative seeks to promote innovative graduation projects that offer concrete solutions to contemporary technological, societal, and environmental challenges.

The competitions bring together participants from several international universities and are evaluated by a jury composed of academic experts and professionals from different countries, thus offering candidates international visibility and a unique opportunity to showcase their research and innovation work.
Applications are open to students preparing their final year project during the 2025-2026 academic year.
Students wishing to participate can consult the application procedures and submit their projects via the official Bernspire website:
www.bernspire.com/the-details
The results of previous editions and the winning projects can be viewed via:
www.bernspire.com/2024-2025-winners

The Euromed University of Fez and the Cervantes Institute of Fez seal a strategic partnership in service of Euro-Mediterranean intercultural dialogue

In a dynamic of strengthening academic and cultural exchanges between the two shores of the Mediterranean, Euromed University of Fez and Cervantes Institute of Fez have formalized a cooperation agreement marking a new stage in their joint commitment to intercultural dialogue and bringing people closer together.

The signing ceremony took place on Wednesday, May 13th, in the presence of Professor Mostapha Bousmina, President of the Euromed University of Fez, and Mr. Òscar Pujol Riembau, Director of the Cervantes Institute of Fez. The event was also graced by the presence of His Excellency Enrique Ojeda Vila, Ambassador of Spain to Morocco, demonstrating the importance attached to this cultural and academic cooperation initiative.

This agreement reflects a shared ambition: to make language and culture essential drivers of rapprochement, mutual understanding, and openness between Mediterranean societies. Through this alliance, the two institutions reaffirm their commitment to promoting intellectual exchange, intercultural dialogue, and academic synergies around Hispanic culture and language.

This partnership will pave the way for the implementation of a rich and diverse program of joint initiatives, including conferences, workshops, training programs and cultural events designed to foster interactions between students, teachers and cultural actors.

Beyond the institutional scope of this cooperation, this initiative illustrates a common vision based on openness, the transmission of knowledge and the development of a Euro-Mediterranean space where culture constitutes a strategic lever for sustainable rapprochement between academic communities and future generations.

UEMF Hosts Strategic Partnership Event to Advance Industry 4.0 and Digital Innovation

Euromed University of Fes hosted a partnership event bringing together UEMF,ANAPEC,CGEMFez-Meknes, andDigital Development Agency-ADDto support Industry 4.0 transformation.

The program opened with a guided tour of UEMF's technological platforms, including spaces dedicated to civil engineering, 3D printing, CNC machining, robotics, big data, and applied industrial technologies.

Speakers included Khadija Essafi,Tijani Bounahmidi,Abdellah CHOUIKH,Omar Tajmouati,Ghada BOUHLAL, andAsmae ABADI, who moderated discussions on how training, innovation, and business support can help companies adapt to new industrial challenges.

EMBA Audencia - UEMF: Deployment of the module "Principles of CSR and Business Law"

From June 19 to 21, the Audencia-UEMF Executive MBA cohort participated in a module on CSR and business law, led by Professor Thomas Blangis. Participants addressed governance issues, stakeholders, CSR frameworks, and the main regulatory frameworks for sustainability, including the CSRD (Consumer Standards and Regulations), due diligence, the European taxonomy, and ESG criteria.

The module also emphasized the integration of CSR into the governance, strategy and management of organizations, highlighting its role as a lever for creating sustainable value.

Awards and Distinctions

Round University Ranking 2026: Euromed University of Fez confirms its position as the undisputed leader in Moroccan higher education

For the second consecutive year, the Euromed University of Fez (UEMF) is ranked first university in Morocco in the prestigious international Round University Ranking (RUR) 2026, one of the most recognized university rankings in the world.

Based on international databases Clarivate / Thomson Reuters, the RUR ranking evaluates universities according to rigorous criteria related to the quality of teaching, scientific research and internationalization.
This distinction confirms the excellence of UEMF's academic model, based on scientific rigor, innovation, entrepreneurship, multilingualism, international mobility, and cooperation with the world's best universities. It also testifies to the relevance of its development strategy and its growing influence at the national and international levels.

This performance is part of a continuous dynamic of international recognition, illustrated by several major distinctions obtained in recent years in the fields of research, innovation, sustainable development and student mobility.
At the crossroads of Europe, the Mediterranean and Africa, UEMF pursues its ambition to build a world-class university capable of meeting the major challenges of our time, in accordance with the vision of its creator and Honorary President, His Majesty King Mohammed VI.

Triple E Awards 2025: The United Nations Chair for the Alliance of Civilizations at the Euromed University of Fez receives an award in Prague

The United Nations Chair for the Alliance of Civilizations at the Euromed University of Fez won the Alliance University of the Year award at the Triple E Awards 2025 on September 11, 2025, in Prague, among hundreds of international candidates. This major distinction recognizes the Chair's unique role as an academic institution committed to intercultural dialogue, peace, and development, extending beyond teaching and research. Offering accredited Master's and Doctoral programs, the Chair provides a space for scientific production and open exchange, bringing together students and international figures to discuss Euro-Mediterranean and African issues. This recognition is fully aligned with Morocco's vision of peace and the strategy of the United Nations Alliance of Civilizations, confirming the international influence and diplomatic role of the Euromed University of Fez.

Eight UEMF researchers distinguished among the 2% most influential scientists in the world

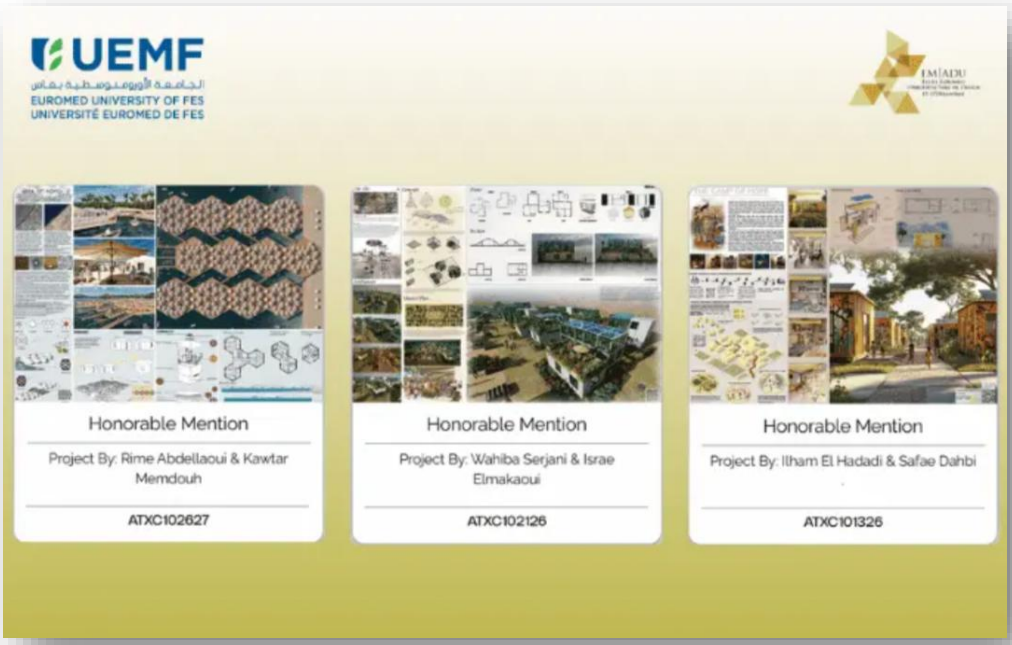

The Euromed University of Fez (UEMF) was distinguished in 2025 on the international scientific scene, with eight teacher-researchers ranked among the 2% of the most influential scientists in the world, according to the Stanford University ranking (Elsevier–Scopus).

The researchers honored are: Prof. Mostapha Bousmina, Prof. Chakib Nejjari, Prof. Abdelkarim Elkadib, Prof. Chakib Alaoui, Prof. Belkheir Hammouti, Prof. Taibi Ben Hadda, Prof. Rajae Salim and Prof. Elhachmia Ech-Chihbi.

This distinction, based on rigorous bibliometric indicators, illustrates the progress of Moroccan research and the growing international influence of the UEMF, whose number of distinguished researchers has doubled compared to 2024.

ATX Design of the Year 2025: Three groups of EMADU students recognized at the international competition

The Euromed University of Fez (UEMF) is proud to announce that six students (3 pairs) from the School of Architecture, Design and Urbanism (EMADU) have obtained three honorable mentions in the prestigious international competition ATX Design of the Year 2025, organized by Architerrax, an international learning platform dedicated to the dissemination of knowledge in architecture and design.

Under the guidance of Professor Jassim Benlemlih, the students competed in the "Design for Change" category, which highlights innovation and social impact through visionary architectural solutions.

The competition challenged participants to develop architectural projects for war refugees, focusing on concrete needs such as housing, community spaces, education, and healthcare. Beyond emergency interventions, the aim was to imagine sustainable, dignified, and resilient solutions to improve the living conditions of displaced populations.

The projects presented by the EMADU students impressed the jury with their creativity, their humanistic approach, and their ability to propose innovative solutions to global challenges. This international recognition testifies to the quality of the education provided at EMADU and the commitment of its students to making a positive contribution to current societal challenges.

Admission to the Paris Bar for students of Sorbonne–Euromed Morocco

The Sorbonne Law School program relocated to the Euromed University of Fez, in partnership with Paris 1 Panthéon-Sorbonne University, achieved exceptional success in the French bar exam in December 2025: five students were admitted, a result higher than that of many prestigious French institutions.

Led by Professor François-Xavier Lucas, this program is highly selective, recruiting from thousands of applicants, with a balanced distribution between Moroccan, European, and sub-Saharan students. Students follow an intensive program combining academic excellence and professional practice, and earn a dual French-Moroccan degree in business law, enabling them to be admitted to the bar in both France and Morocco.

The program's unique feature lies in its strong professional immersion through international events such as the Fes Restructuring Days, which bring together experts, judges, and executives from Europe and Africa each year. The training is also becoming increasingly international, having recently welcomed Brazilian professionals.

Supported by prominent figures in the Moroccan legal profession such as Azzedine Kettani, Hicham Naciri, and Laila Slassi, this program offers students strong professional visibility..

UI GreenMetric International Ranking 2025

The Euromed University of Fez has been ranked the number one university in Morocco in the UI GreenMetric 2025 international ranking and is among the top 400 universities worldwide, representing 105 countries. It notably surpasses Ibn Tofail University, Mohammed VI Polytechnic University, and Mohammed V University of Rabat.

This ranking, based on 51 indicators related to sustainable development, innovation, teaching and research, confirms the national and international leadership of the UEMF.

In 2025, the university was also ranked 1st in Morocco and 2nd in Africa (behind the University of Cape Town) by the Round University Ranking, received the International Alliance University of the Year 2025 award, and had eight of its researchers ranked among the top 2% most impactful in the world according to Stanford's ranking.

These results are the outcome of a strategy focused on:

- Academic excellence,
- Research and innovation,
- International openness,
- Collaboration with the socio-economic world,

And the well-being of the university community.

The Euromed University of Fez ranked first in Morocco by the international ScholarGPS ranking

The Euromed University of Fez (UEMF) has confirmed its position as a leading academic and scientific institution in France, thanks to consistent recognition from several leading international rankings. These distinctions, which recognize both institutional performance and the scientific excellence of its researchers, attest to the university's academic rigor, the quality of its programs, its scientific output, and its ongoing commitment to innovation and societal impact.

ScholarGPS® ranking: UEMF in first place nationally

The results published by ScholarGPS, an international platform for analyzing scientific performance using artificial intelligence, place the Euromed University of Fez and its President, Professor Mostapha Bousmina, at the forefront of Moroccan universities and researchers across all disciplines. This ranking of UEMF reflects the scientific contribution of its faculty and researchers and the University's growing visibility in the international academic landscape.

Tribute to Professor Tijani Bounahmidi: a career of excellence in the service of science, higher education and innovation.

The Euromed University of Fez paid tribute to Professor Tijani Bounahmidi, Vice-President in charge of the University Technology Center, in recognition of his exceptional career in the service of science, higher education and innovation.

This ceremony brought together the university community, academic figures, colleagues, alumni, and relatives of Professor Bounahmidi for a moment of gratitude and recognition. The various tributes highlighted his commitment to research, teaching, and the transmission of knowledge, as well as his lasting impact on several generations of students and researchers.

The ceremony concluded with the presentation of an honorary trophy, a symbol of UEMF's recognition of its remarkable contribution to the development and influence of the institution.

UEMF's performance in THE Impact Rankings 2026 – SDG 4

In the THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 101–200 range out of 1,335 institutions for SDG 4: Quality Education. This result reflects its commitment to inclusive teaching, pedagogical innovation, continuous improvement of learning, and access to lifelong learning.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

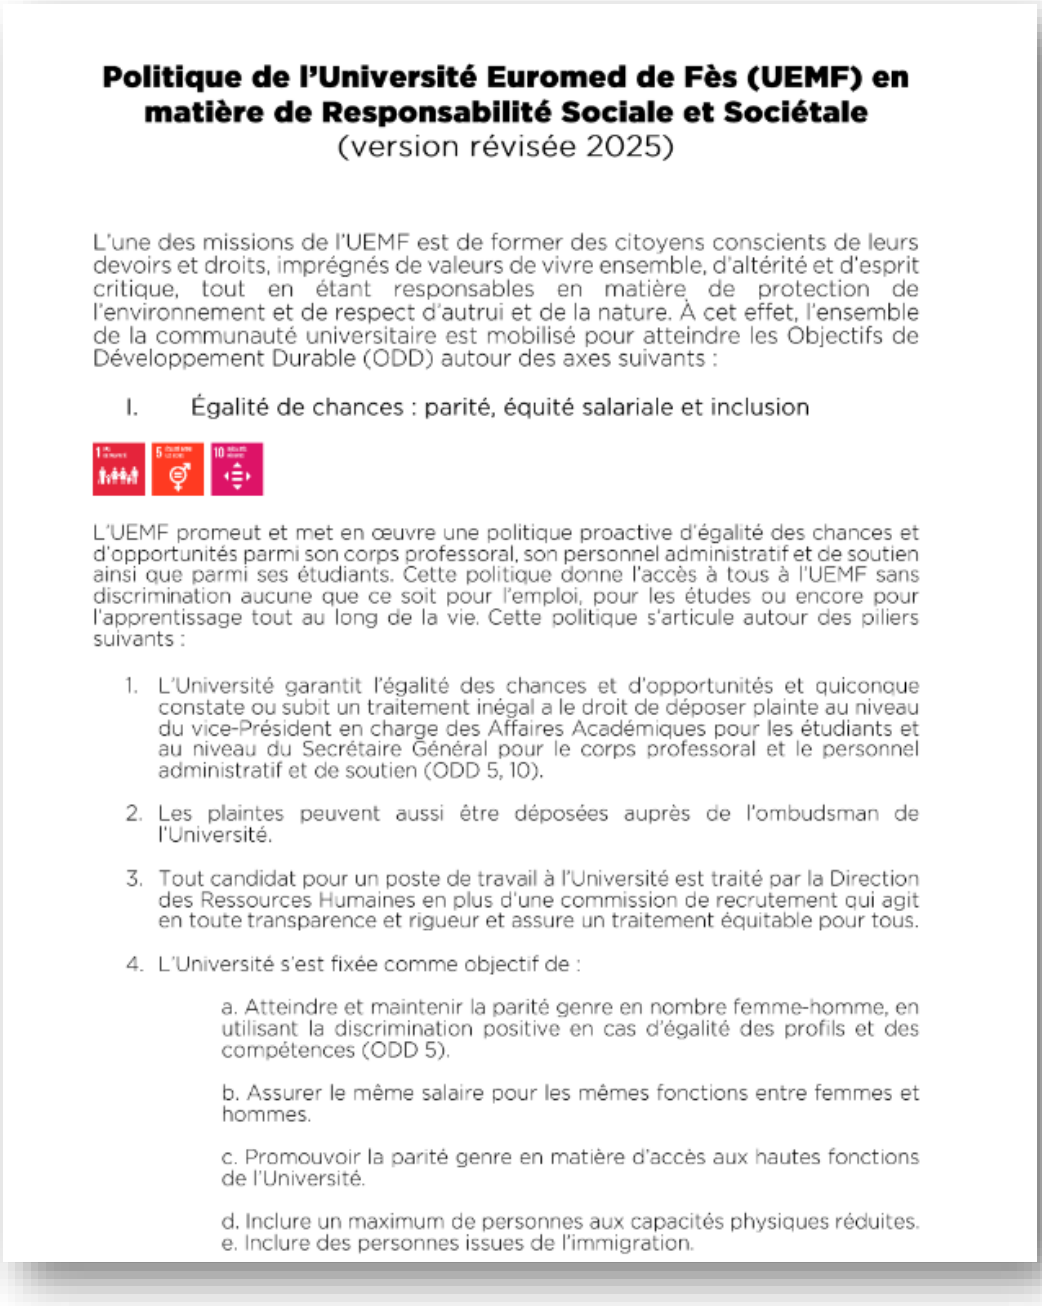

Introduction :

The Euromed University of Fez (UEMF) has made gender equality a fundamental principle of its academic and institutional project. Through inclusive policies, the promotion of equal opportunities in access to education, research, and leadership positions, as well as support for initiatives led by student clubs and university structures, UEMF actively works to empower women and combat all forms of discrimination. By fostering a respectful, equitable, and supportive environment that allows everyone to thrive, the University contributes to building a university community committed to sustainable development based on equality and social justice.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez is actively committed to gender equality, in line with the objectives of SDG 5. Aware of the challenges related to equity and inclusion, the university integrates these principles into its institutional policies and practices. It works to guarantee equal opportunities for women and men, both academically and professionally. This approach is supported by corporate social responsibility policies and specific charters aimed at promoting equality and combating all forms of discrimination. The Euromed University of Fez also encourages the active participation of women in university life and promotes their access to training and leadership opportunities. By creating a respectful and inclusive environment, the university contributes to strengthening social cohesion. In this way, it actively participates in the empowerment of women and the reduction of gender inequalities.

Politique de l'Université Euromed de Fès (UEMF) en matière de Responsabilité Sociale et Sociétale
(version révisée 2025)

L'une des missions de l'UEMF est de former des citoyens conscients de leurs devoirs et droits, imprégnés de valeurs de vivre ensemble, d'altérité et d'esprit critique, tout en étant responsables en matière de protection de l'environnement et de respect d'autrui et de la nature. À cet effet, l'ensemble de la communauté universitaire est mobilisé pour atteindre les Objectifs de Développement Durable (ODD) autour des axes suivants :

I. Égalité de chances : parité, équité salariale et inclusion

L'UEMF promeut et met en œuvre une politique proactive d'égalité des chances et d'opportunités parmi son corps professoral, son personnel administratif et de soutien ainsi que parmi ses étudiants. Cette politique donne l'accès à tous à l'UEMF sans discrimination aucune que ce soit pour l'emploi, pour les études ou encore pour l'apprentissage tout au long de la vie. Cette politique s'articule autour des piliers suivants :

1. L'Université garantit l'égalité des chances et d'opportunités et quiconque constate ou subit un traitement inégal a le droit de déposer plainte au niveau du vice-Président en charge des Affaires Académiques pour les étudiants et au niveau du Secrétaire Général pour le corps professoral et le personnel administratif et de soutien (ODD 5, 10).
2. Les plaintes peuvent aussi être déposées auprès de l'ombudsman de l'Université.
3. Tout candidat pour un poste de travail à l'Université est traité par la Direction des Ressources Humaines en plus d'une commission de recrutement qui agit en toute transparence et rigueur et assure un traitement équitable pour tous.
4. L'Université s'est fixée comme objectif de :

   a. Atteindre et maintenir la parité genre en nombre femme-homme, en utilisant la discrimination positive en cas d'égalité des profils et des compétences (ODD 5).

   b. Assurer le même salaire pour les mêmes fonctions entre femmes et hommes.

   c. Promouvoir la parité genre en matière d'accès aux hautes fonctions de l'Université.

   d. Inclure un maximum de personnes aux capacités physiques réduites.
   e. Inclure des personnes issues de l'immigration.

This policy embodies UEMF's commitment to integrating social responsibility into all of its missions. It highlights the importance of reconciling academic performance, respect for the environment, and a positive societal impact.

UEMF
EUROMED UNIVERSITY OF FES

3. Ancrage territorial et implication locale

Être un moteur de développement économique, social et culturel de la Région Fès-Meknès, et plus largement du Maroc, contribuant à l'objectif de réduction de la pauvreté et d'amélioration des infrastructures (ODD 1 et ODD 11).

4. Insertion professionnelle

Soutenir nos lauréats dans leur insertion professionnelle et la création d'entreprises innovantes, favorisant la croissance économique et l'emploi décent (ODD 8).

5. Egalité Femmes-Hommes

Garantir l'égalité entre les sexes en termes de recrutement, inclusion, formation, accès aux postes de responsabilité, et égalité salariale à compétences égales, en conformité avec l'ODD 5 (Égalité des sexes).

6. Protection des groupes vulnérables

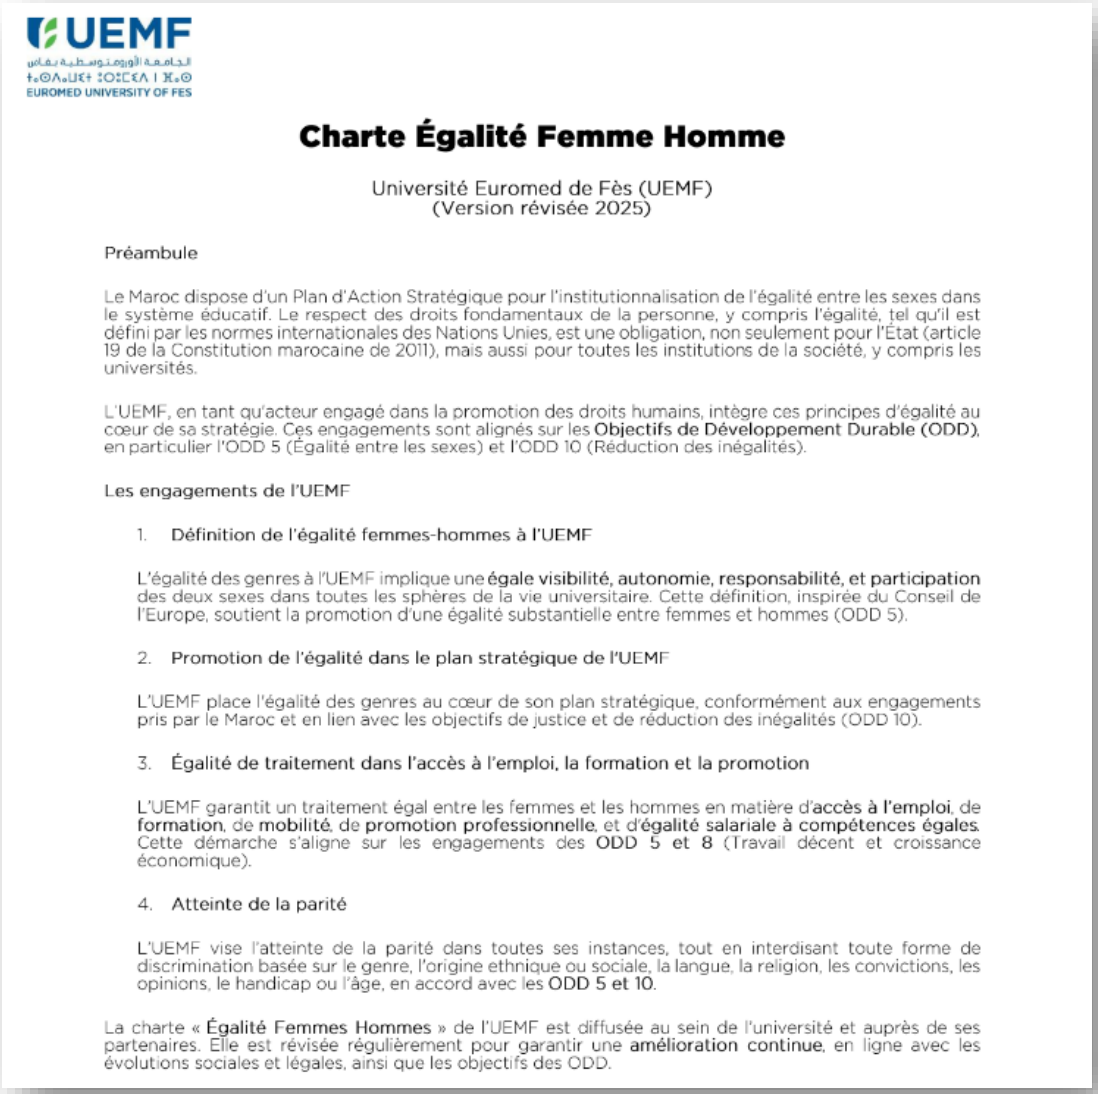

Assurer une inclusion et une protection pour les personnes vulnérables (handicapés, femmes, émigrants, demandeurs d'asile), en accord avec les principes d'inclusion sociale et de justice pour tous (ODD 10).

7. Engagement envers la santé

Avec l'émergence du **pôle santé** et le projet de construction d'un **CHU**, l'UEMF s'engage à contribuer activement à l'amélioration de la santé et du bien-être (ODD 3) au niveau régional et national. Le campus intègre également un **complexe sportif aux normes internationales**, promouvant un mode de vie sain parmi les étudiants et la communauté.

This charter formalizes the integration of social responsibility at the heart of the UEMF's missions. It outlines concrete commitments in the areas of ethics, governance, respect for the environment and contribution to sustainable development.

Gender Equality Charter (Revised version 2025)

UEMF
EUROMED UNIVERSITY OF FES

Charte Égalité Femme Homme

Université Euromed de Fès (UEMF)
(Version révisée 2025)

Préambule

Le Maroc dispose d'un Plan d'Action Stratégique pour l'institutionnalisation de l'égalité entre les sexes dans le système éducatif. Le respect des droits fondamentaux de la personne, y compris l'égalité, tel qu'il est défini par les normes internationales des Nations Unies, est une obligation, non seulement pour l'État (article 19 de la Constitution marocaine de 2011), mais aussi pour toutes les institutions de la société, y compris les universités.

L'UEMF, en tant qu'acteur engagé dans la promotion des droits humains, intègre ces principes d'égalité au cœur de sa stratégie. Ces engagements sont alignés sur les **Objectifs de Développement Durable (ODD)**, en particulier l'ODD 5 (Égalité entre les sexes) et l'ODD 10 (Réduction des inégalités).

Les engagements de l'UEMF

1. **Définition de l'égalité femmes-hommes à l'UEMF**

   L'égalité des genres à l'UEMF implique une **égale visibilité, autonomie, responsabilité, et participation** des deux sexes dans toutes les sphères de la vie universitaire. Cette définition, inspirée du Conseil de l'Europe, soutient la promotion d'une égalité substantielle entre femmes et hommes (ODD 5).

2. **Promotion de l'égalité dans le plan stratégique de l'UEMF**

   L'UEMF place l'égalité des genres au cœur de son plan stratégique, conformément aux engagements pris par le Maroc et en lien avec les objectifs de justice et de réduction des inégalités (ODD 10).

3. **Égalité de traitement dans l'accès à l'emploi, la formation et la promotion**

   L'UEMF garantit un traitement égal entre les femmes et les hommes en matière d'**accès à l'emploi**, de **formation**, de **mobilité**, de **promotion professionnelle**, et d'**égalité salariale à compétences égales**. Cette démarche s'aligne sur les engagements des **ODD 5 et 8** (Travail décent et croissance économique).

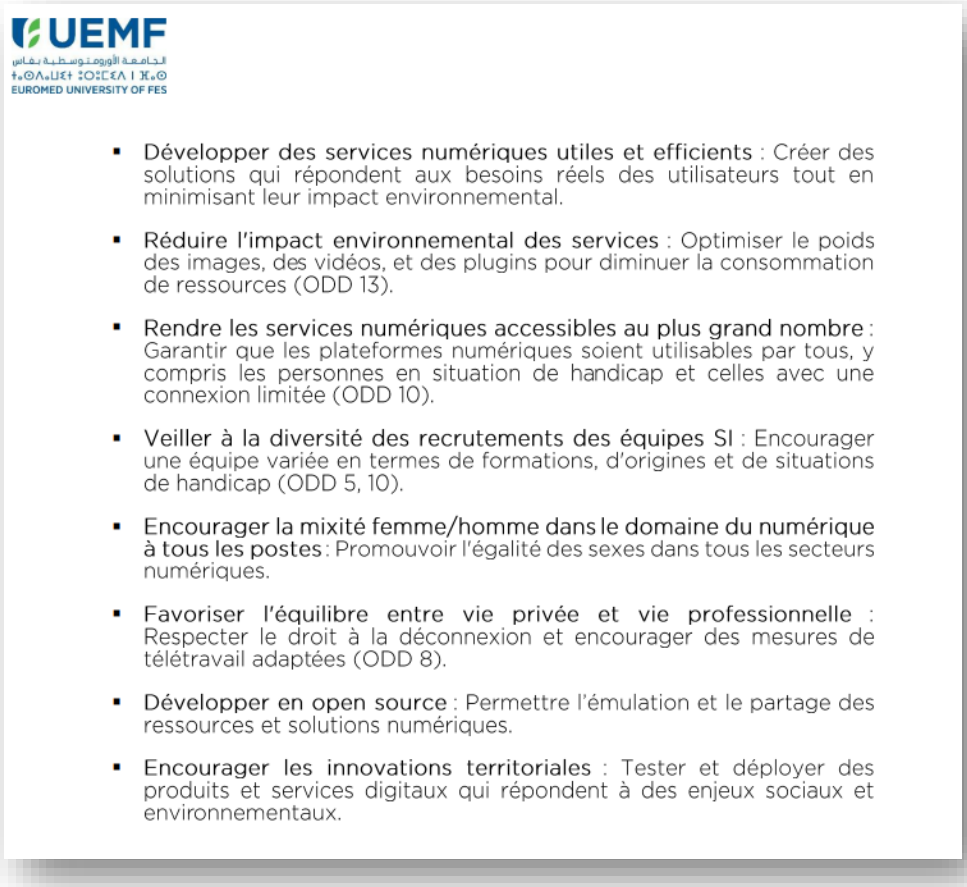

4. **Atteinte de la parité**

   L'UEMF vise l'atteinte de la parité dans toutes ses instances, tout en interdisant toute forme de discrimination basée sur le genre, l'origine ethnique ou sociale, la langue, la religion, les convictions, les opinions, le handicap ou l'âge, en accord avec les **ODD 5 et 10**.

La charte « **Égalité Femmes Hommes** » de l'UEMF est diffusée au sein de l'université et auprès de ses partenaires. Elle est révisée régulièrement pour garantir une **amélioration continue**, en ligne avec les évolutions sociales et légales, ainsi que les objectifs des ODD.

The UEMF places equality between women and men at the heart of its values. This charter commits the University to promoting diversity, combating all forms of discrimination, and fostering inclusion at all levels.

UEMF Responsible Digital Charter (Revised Version 2025)

UEMF
الجامعة الأورومتوسطية بفاس
EUROMED UNIVERSITY OF FES

- **Développer des services numériques utiles et efficients** : Créer des solutions qui répondent aux besoins réels des utilisateurs tout en minimisant leur impact environnemental.
- **Réduire l'impact environnemental des services** : Optimiser le poids des images, des vidéos, et des plugins pour diminuer la consommation de ressources (ODD 13).
- **Rendre les services numériques accessibles au plus grand nombre** : Garantir que les plateformes numériques soient utilisables par tous, y compris les personnes en situation de handicap et celles avec une connexion limitée (ODD 10).
- **Veiller à la diversité des recrutements des équipes SI** : Encourager une équipe variée en termes de formations, d'origines et de situations de handicap (ODD 5, 10).
- **Encourager la mixité femme/homme dans le domaine du numérique à tous les postes**: Promouvoir l'égalité des sexes dans tous les secteurs numériques.
- **Favoriser l'équilibre entre vie privée et vie professionnelle** : Respecter le droit à la déconnexion et encourager des mesures de télétravail adaptées (ODD 8).
- **Développer en open source** : Permettre l'émulation et le partage des ressources et solutions numériques.
- **Encourager les innovations territoriales** : Tester et déployer des produits et services digitaux qui répondent à des enjeux sociaux et environnementaux.

Digital technology plays a central role at UEMF, but its use must be responsible. This charter defines best practices regarding digital tools, data security, and reducing environmental impact.

Events

Academic events

Pink October: Breast Cancer, from Prevention to Integrated Care

As part of the Euromed University of Fez's lecture series, a meeting was held on the theme "Breast Cancer: From Prevention to Integrated Care", led by Professor Chakib Nejjari, Vice-President in charge of the Health Department of UEMF.

During this conference, Professor Nejjari emphasized the importance of early detection, a determining factor in improving the chances of recovery, as well as the need for an integrated approach combining care, psychological support and social support.

This initiative is part of the Pink October campaign. 🎗️, an international awareness movement. Through this action, the UEMF reaffirms its commitment to public health, prevention and the promotion of well-being within the university community.

Beyond this conference, the UEMF (Euromed University of Marseille) carries out various awareness and screening initiatives throughout the year for its students, faculty, and staff: blood donation drives, prevention workshops, free consultations, and partnerships with regional healthcare facilities. These initiatives reflect the University's commitment to making the Euromed campus an exemplary space for health, solidarity, and civic responsibility.

Cognitive Development and the Humanities: A lecture by Professor Majda Nniya in collaboration with the Cervantes Institute

In collaboration with the Cervantes Institute, this session of the lecture series was devoted to the theme: “From Symbolic Peace to Transformative Science: Women, Childhood, and the Architecture of Knowledge.” The meeting was moderated by Professor Majda Nniya, Assistant Professor at the Faculty of Humanities and Social Sciences of UEMF.

The intervention offered a detailed analysis of cognitive development throughout life, from early childhood to adulthood, highlighting the importance of the educational framework, emotional regulation, and stress management in learning.

The discussions also highlighted the role of the family environment, and more specifically that of the mother, in supporting the child's intellectual and emotional development. They reiterated that cognitive abilities are built gradually through experiences, social interactions, and the surrounding environment.

Bringing together students, teachers and members of the university community, as well as representatives from the Cervantes Institute, this conference offered an enriching space for dialogue on contemporary issues in education, human development and cognitive science.

This initiative is part of the UEMF's commitment to promoting interdisciplinary approaches and encouraging reflection on current educational and societal challenges.

Round table: Women's career paths: what factors shape women's professional trajectories?

The Euromed University of Fez hosted Ms. Helena Nolan, Ireland's Ambassador to Morocco, for a roundtable discussion on women's career paths entitled "Women'Career Pathways»Speakers from diverse backgrounds sharedeanalyses and expelessons on leadershipemini, the destructural changes and transformations in the world of work were discussed. The event fostered dialogue and reflection on policies and initiatives to support the development of women's talent, and highlighted the importance of sharing experiences to guide new generations. This meeting illustrates UEMF's commitment to intercultural dialogue, knowledge sharing, and the promotion of an academic culture open to the world.

Women's creativity is in the spotlight at the UEMF Conference Series

As part of its 2025–2026 Conference Series, the Euromed University of Fez hosted a conference entitled “Women and Creativity”, led by Zohra Lhioui, Professor of Comparative Literature at Moulay Ismail University.

During her presentation, the speaker highlighted the essential role of women's creativity in shaping cultures and collective imaginations. She emphasized that women's artistic, literary, and intellectual expression is a major driver of reflection on society, identity, and the human experience.

The conference also featured a reading of works by Moroccan artists, allowing for an exploration of the diverse forms that female creativity can take. These works reveal unique sensitivities and perspectives on the social, cultural, and personal realities that shape the female experience.

Rich in exchanges, the meeting offered participants a space for reflection on the links between artistic creation, critical thinking and the place of women in contemporary cultural production.

Through this series of conferences, the Euromed University of Fez reaffirms its commitment to promoting intellectual dialogue, the dissemination of knowledge and the opening of its university community to themes at the intersection of the humanities, culture and society.

Cultural activities

Let's celebrate the women who inspire and transform the UEMF

On the occasion of International Women's Day, we celebrate those who inspire, innovate and shape the future every day.

Students, teachers, researchers, staff, security guards, maintenance workers... each in her own way contributes to the life and progress of our community within UEMF. Through their experiences, their commitment, and their daily presence, they all contribute to the richness and strength of our university.

Today and every day, we salute their strength, their talent and their determination.

A moment of sharing, celebration and conviviality at the heart of the UEMF

To mark the holy month of Ramadan, the Euromed University of Fez organized a convivial iftar, bringing together members of its university community in a warm and unifying atmosphere. This event also coincided with International Women's Day, providing a wonderful opportunity to celebrate the women of UEMF, recognizing their commitment, contributions, and essential role within our academic ecosystem.

In an atmosphere of sharing, kindness and conviviality, the academic and administrative staff came together for a special moment, illustrating the spirit of solidarity and human values that drive the UEMF family.

Beyond a simple iftar, this meeting reflects the UEMF's commitment to strengthening ties within its community and to celebrating meaningful moments at the crossroads of our cultural, social and human values.

Sports activities

National spirit, sport and youth: our campus proudly celebrated the 50th anniversary of the Green March

On November 6th, the Euromed Sports Center hosted a sports day combining mixed water polo and a men's basketball tournament, bringing together our students and junior teams from FAS, MAS, and USF. A competitive and dynamic atmosphere that reflects the commitment of our youth.

On the court, our students shone: a semi-final victory against FAS (47–30) and an intense final win against MAS (45–40). With over 80 participants, the event highlighted the commitment of our young athletes, the quality of play, and the excellent synergy between the teams.

Beyond the results, this day was a true moment of unity and patriotism, bringing together students, coaches, and officials around the values of solidarity and national pride. A memorable event that will remain etched in the sporting history of our campus.

UEMF Inter-University Tournament: two days dedicated to sport, sharing and collective commitment

To mark International Day of Sport, the Euromed University of Fez organised an inter-university tournament on April 4 and 5, bringing together students from several institutions around a rich and multidisciplinary sports programme.

Over two intense days, participants competed in various disciplines, including basketball, volleyball, table tennis, and water polo, in a spirit that combined performance, commitment, and fair play. Beyond the results, each match was marked by the quality of play, collective energy, and mutual respect. Much more than a competition, this event established itself as a true space for encounters and exchanges between university communities, fostering diverse interactions, the sharing of experiences, and the building of connections between students from different academic backgrounds.

🏅Tournament results:

🏓Boys' Table Tennis: 1re place – AUI (Al Akhawayn University of Ifrane) 2ePlace – USMBA (Sidi Mohamed Ben Abdellah University) Girls: 1re and 2eplaces – AUI

🏐Boys' Volleyball: 1re place – USMBA | 2ePlace – UEMF Girls: 1re place – USMBA | 2eplace – UEMF

🏀Boys' Basketball: 1re place – USMBA | 2ePlace – UEMF Girls: 1re place – USMBA | 2ePlace – UIT (Ibn Tofail University)

The Euromed University of Fez hosts the Moroccan Swimming Championships

The Euromed University of Fez hosted the Moroccan Swimming Championships from July 30 to August 1, 2026, organized by the Royal Moroccan Swimming Federation at the Euromed Sports Center. This national competition brought together swimmers from several clubs for various events, ranging from 50 to 1,500 meters, as well as relays.
The event showcased the UEMF's sports facilities and promoted the values of discipline, perseverance, respect, and excellence, while bringing together clubs, coaches, families, and sports enthusiasts. The University thus reaffirmed its commitment to promoting sport and hosting high-level national competitions.

Institutional and diplomatic visits

The Euromed University of Fez welcomes Her Excellency Ms. Helena Nolan, Ambassador of Ireland to Rabat

The Euromed University of Fez had the honor of welcoming Her Excellency Mrs. Helena Nolan, Ambassador of Ireland to Rabat, accompanied by a delegation composed of Melanie Lynch, Founder, CEO & Creative Director of HerStory and Our Story, Dr. Antonia Hart, historian of women's entrepreneurship, Dr. Salomé Mbugua, CEO of AkiDwA and Commissioner at the Irish Human Rights and Equality Commission, as well as Nour-Elhouda Loqmane, Public Diplomacy and Consular Officer, for a courtesy visit within a dynamic of academic and cultural rapprochement.

This visit allowed the delegation to discover the University's eco-friendly campus, its academic, research, and wellness facilities, as well as the breadth of its multidisciplinary educational offerings. Discussions focused in particular on prospects for cooperation between UEMF and Irish institutions, especially regarding student mobility, academic partnerships, and cultural collaborations, all within a spirit of international openness and intercultural dialogue.

The holding of the conference "Women's Career Pathways: what shapes women's professional lives?", organized as part of the celebrations of St Brigid's Day, an emblematic day in Ireland honoring the creativity, resilience and contribution of women to society, provided a space for exchange between international speakers, students and teacher-researchers, but above all supported the University's commitment to equality, female leadership and the production of knowledge.

Student events

Breast Cancer Awareness and Prevention Workshop: Date: October 29, 2025 Location: Avicenne Clinic

As part of the Pink October campaign, the Elite Club organized a breast cancer awareness workshop at the Avicenne Clinic in Fez, led by Dr. Ahmed Guennoun, a specialist in gynecology, obstetrics, and infertility. The workshop brought together 20 female students from Euromed University to discuss this crucial public health issue.

The presentation focused on the importance of breast self-examination for the early detection of breast cancer and on best practices for regular screening. Through clear explanations and interactive demonstrations, participants were able to gain practical knowledge, ask questions, and exchange ideas in a friendly and participatory atmosphere.

This workshop was particularly enriching, combining medical expertise with dynamic discussions. It allowed the students to better understand the issues surrounding screening and encouraged them to disseminate this essential information within their communities, thus strengthening the impact of the awareness campaign.

Tazouta Medical-Humanitarian Caravan – Sefrou Province

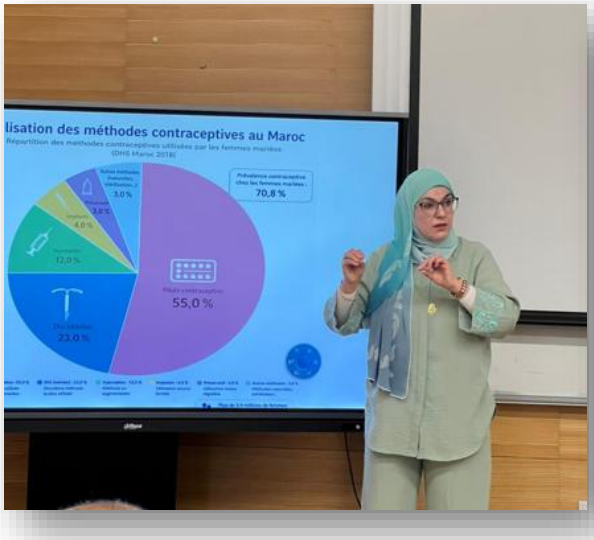

On March 8, 2026, the Elite Club of the Euromed University of Fez organized a mobile medical and dental outreach program in Tazouta, in the province of Sefrou, to benefit the local population. This humanitarian and healthcare initiative involved 15 doctors and 5 dentists, all working together towards a common goal: bringing healthcare closer to the inhabitants of rural areas and improving access to specialist consultations.

The mobile clinic provided medical consultations in several specialties, including gynecology (with ultrasound examinations), cardiology, gastroenterology, rheumatology, and dental care and consultations. Thanks to the commitment of healthcare professionals, student volunteers, and mobilized partners, this initiative helped meet the medical needs of many beneficiaries in a spirit of solidarity, prevention, and social support.

Source: Club ELITE Report 25-26

Sexual and reproductive health: raising awareness for better prevention

On April 23, 2026, the Elite Club of the Euromed University of Fez organized a conference on sexual and reproductive health in partnership with ALCS and the Espace Santé Jeunes Ville Nouvelle Fez. The aim of this event was to raise student awareness of issues related to sexual and reproductive health through an educational, preventative, and participatory approach.

The conference focused primarily on three major themes: sexually transmitted infections (STIs), sex education, and contraception. Speakers emphasized the importance of access to reliable information, prevention, and adopting responsible behaviors to promote the health and well-being of young people.

Through interactive exchanges and enriching discussions, this initiative has created a space for open and constructive dialogue, helping to break taboos around sexual health and raising student awareness of these essential public health issues.

Source: Club ELITE Report 25-26

Mobile Medical and Dental Clinic in Ksar Jdid 26/04

On April 26, 2026, the Elite Club of the Euromed University of Fez organized a medical-dental caravan in Ksar Jdid, in the province of Rissani, as part of its humanitarian and social actions aimed at strengthening access to care in rural and remote areas.

This initiative mobilized a team of healthcare professionals and volunteers to provide multidisciplinary medical consultations to local residents. The services offered covered several specialties, including cardiology, gastroenterology, gynecology, dermatology, and ophthalmology, in addition to dental consultations and care, as well as general medicine.

The caravan aimed to bring health services closer to local populations, promote early detection, and raise awareness of the importance of prevention and medical follow-up. It thus enabled comprehensive and accessible healthcare for beneficiaries.

Through this action, the Elite Club reaffirms its commitment to solidarity, health promotion and social development in service of vulnerable communities.

Source: Club ELITE Report 25-26

Mobile dental clinic in Izlafene: strengthening access to care and prevention

On May 9, 2026, the Elite Club of the Euromed University of Fez, in partnership with the IAA Club of the Faculty of Sciences and Techniques of Fez, organized a medical and dental caravan in Izlafene, in the province of Taza, as part of its community health and prevention initiatives. This initiative provided medical consultations in general medicine, cardiology, and gynecology, along with the dispensing of medication to diagnosed patients. A significant oral health prevention component was also implemented through awareness campaigns and the distribution of 400 toothbrushes and toothpaste to beneficiaries. Through this initiative, the two clubs helped bring healthcare services closer to rural populations while reinforcing awareness of the importance of prevention and medical follow-up.

Partnership

Executive Training Programme on Sustainable Social Finance – UNFPA

The UEMF submitted its application to the Executive Training Programme on Sustainable Social Finance and Blended Finance Mechanisms, an initiative fully funded by the United Nations Population Fund (UNFPA). This ambitious program was structured into five cohorts targeting distinct audiences: Civil Society, Government, the Private Sector, the Media, and Academia, for a total of 140 participants. Each cohort followed a modular program covering an introduction to sustainable social finance, blended finance, social bonds and Sukuk, Social Return on Investment (SROI), and tools and methodologies for designing impactful projects. All sessions took place between October and November 2025, culminating in an official closing ceremony on January 16, 2026, at the Bouregreg Palace in Salé, as part of the GIB project aimed at empowering vulnerable girls, particularly NEETs (Not in Education, Employment, or Training). This achievement illustrates UEMF's ability to design and deploy large-scale national certification training programs in partnership with major UN agencies.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

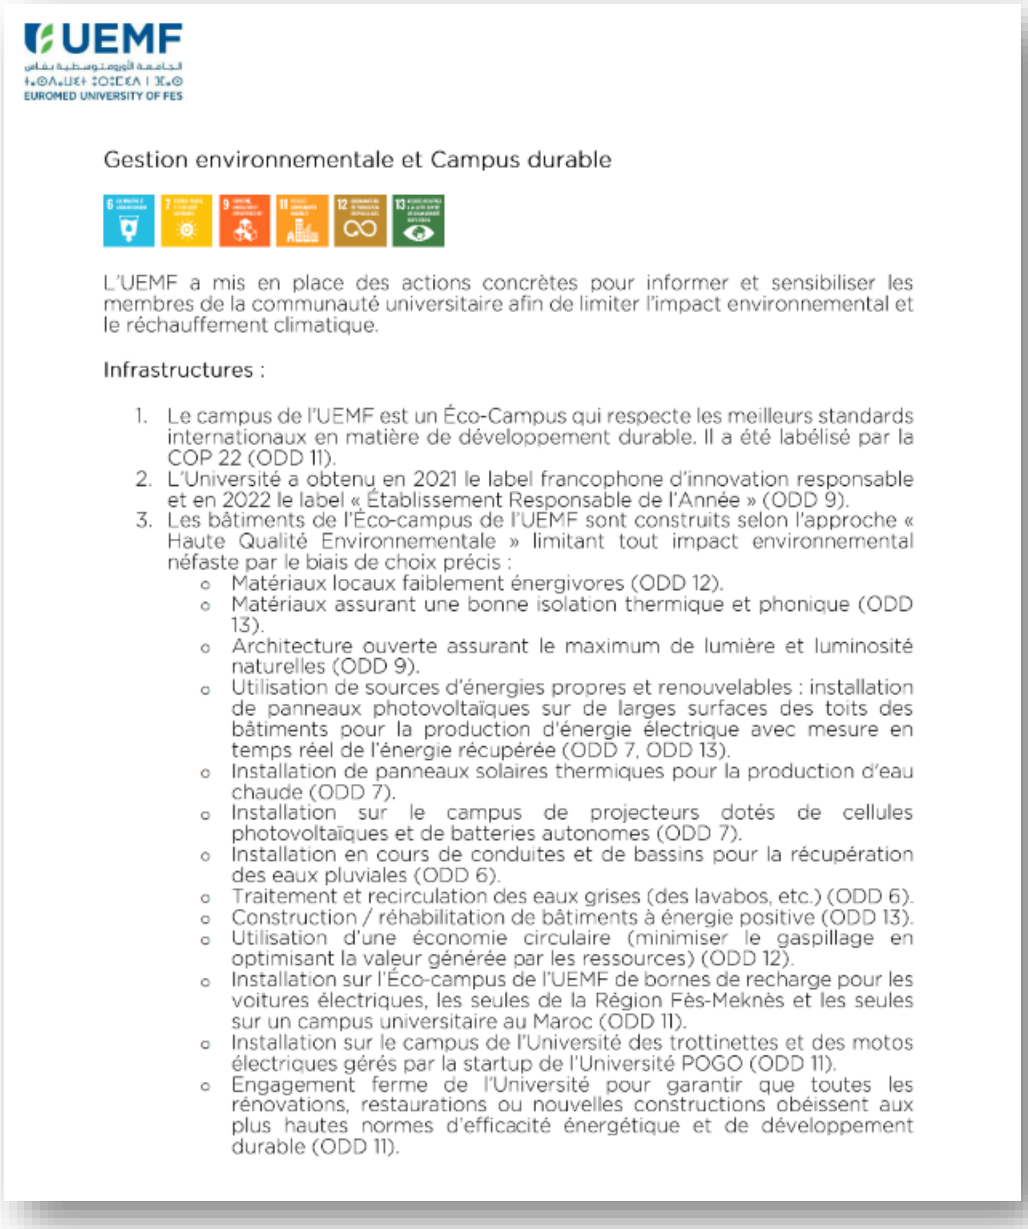

Recognizing the strategic importance of water for sustainable development, the Euromed University of Fez places the responsible management of water resources at the heart of its institutional commitments. Through its eco-campus, research and innovation projects, and awareness-raising activities within the university community, UEMF contributes to promoting sustainable water use and improving sanitation practices. The educational, scientific, and student initiatives undertaken by the University help to train citizens and future professionals who are aware of the challenges related to preserving this vital resource.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

As part of its sustainable development policy, the Euromed University of Fez contributes to the responsible management of natural resources, particularly in relation to SDG 6. While its actions are not exclusively focused on water, the university adopts practices aimed at optimizing resource use and reducing environmental impacts. Energy efficiency is a key lever in this approach, promoting the rational management of equipment and infrastructure. This approach indirectly helps to limit water consumption and improve the efficiency of technical systems. The Euromed University of Fez also raises awareness within its community about the importance of preserving water resources. By integrating these practices into its governance, it contributes to the sustainable and responsible management of water. In this way, the university participates in achieving the objectives related to sanitation and resource sustainability.

Energy Efficiency Policy (2023-2026)

UEMF
EUROMED UNIVERSITY OF FES

Gestion environnementale et Campus durable

L'UEMF a mis en place des actions concrètes pour informer et sensibiliser les membres de la communauté universitaire afin de limiter l'impact environnemental et le réchauffement climatique.

Infrastructures :

1. Le campus de l'UEMF est un Éco-Campus qui respecte les meilleurs standards internationaux en matière de développement durable. Il a été labélisé par la COP 22 (ODD 11).
2. L'Université a obtenu en 2021 le label francophone d'innovation responsable et en 2022 le label « Établissement Responsable de l'Année » (ODD 9).
3. Les bâtiments de l'Éco-campus de l'UEMF sont construits selon l'approche « Haute Qualité Environnementale » limitant tout impact environnemental néfaste par le biais de choix précis :
   - Matériaux locaux faiblement énergivores (ODD 12).
   - Matériaux assurant une bonne isolation thermique et phonique (ODD 13).
   - Architecture ouverte assurant le maximum de lumière et luminosité naturelles (ODD 9).
   - Utilisation de sources d'énergies propres et renouvelables : installation de panneaux photovoltaïques sur de larges surfaces des toits des bâtiments pour la production d'énergie électrique avec mesure en temps réel de l'énergie récupérée (ODD 7, ODD 13).
   - Installation de panneaux solaires thermiques pour la production d'eau chaude (ODD 7).
   - Installation sur le campus de projecteurs dotés de cellules photovoltaïques et de batteries autonomes (ODD 7).
   - Installation en cours de conduites et de bassins pour la récupération des eaux pluviales (ODD 6).
   - Traitement et recirculation des eaux grises (des lavabos, etc.) (ODD 6).
   - Construction / réhabilitation de bâtiments à énergie positive (ODD 13).
   - Utilisation d'une économie circulaire (minimiser le gaspillage en optimisant la valeur générée par les ressources) (ODD 12).
   - Installation sur l'Éco-campus de l'UEMF de bornes de recharge pour les voitures électriques, les seules de la Région Fès-Meknès et les seules sur un campus universitaire au Maroc (ODD 11).
   - Installation sur le campus de l'Université des trottinettes et des motos électriques gérés par la startup de l'Université POGO (ODD 11).
   - Engagement ferme de l'Université pour garantir que toutes les rénovations, restaurations ou nouvelles constructions obéissent aux plus hautes normes d'efficacité énergétique et de développement durable (ODD 11).

UEMF is committed to optimizing its energy consumption and promoting the use of renewable energy. This policy aims to reduce the University's carbon footprint while ensuring the efficiency of its infrastructure.

E-SDG

The Master's program in Environmental Engineering and Water Management contributes to SDG 6 – Clean Water and Sanitation – by developing the skills necessary for the sustainable management of water resources, water treatment, and the preservation of aquatic environments. This program prepares professionals capable of providing scientific and technical solutions to the challenges related to water availability, quality, and sustainable management.

EUROMED POLYTECHNIC SCHOOL

- Master's degree in logistics and supply chain engineering
- Master's degree in environmental engineering and water management
- Master's degree in entrepreneurial support and technological management
- Master in Sustainable Energy (double degree with the University of Surrey - UK)
- Executive master in logistics and supply chain
- Executive MBA in Healthcare Supply Chain Management

Research, Innovation & Entrepreneurship

Research Topics - Doctoral Cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 6 has been identified. This work focuses in particular on water governance, treatment and pollution control, desalination, water resource quality, resilience to water stress, and the link between water and energy.

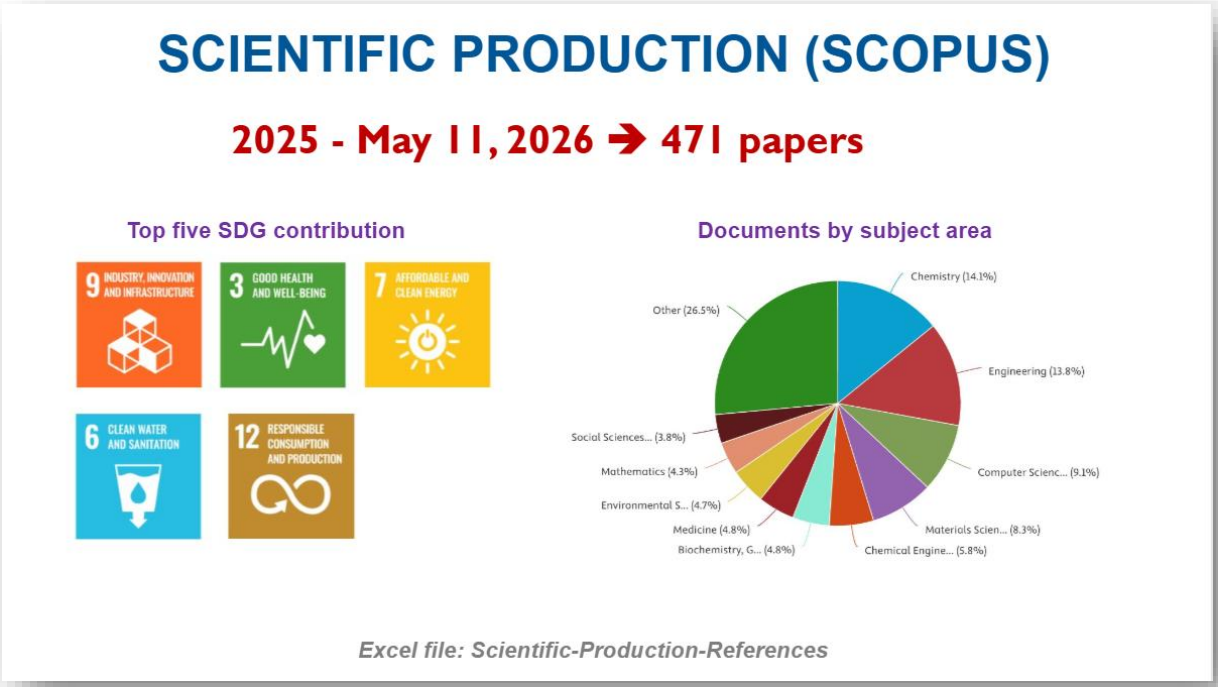

The table below presents the main research topics contributing to this objective.

Thesis Subject	related SDGs
Water Governance for Development in Morocco. The Implementation of IWRM (Integrated Water Resources Management) as a Public Action Modality	SDG 6
AI-Optimized Native Vegetation and Traditional Biofiltration Systems for Waste Water Treatment	SDG 6
Transforming an Unsustainable City into a Sustainable One: The Case of Fez	SDG 6
Nanomaterials for the Removal of Phytosanitary Products from Water	SDG 6
Modeling and Optimization of Green Hydrogen Production from Sea Water Electrolysis: A Systematic Approach to Maximizing Energy Efficiency and Minimizing Environmental Impact	SDG 6
Green Production: Leveraging Bio-Based Polymers for Developing Thin-Film Composite Forward Osmosis Membranes for Fertigation	SDG 6
Water management and sustainable logistics: modeling resilient supply chains in the face of water stress in Morocco	SDG 6
From Light to Power: 2D Graphene Oxide (GO) Platforms for Efficient Solar-Thermal Water-Energy Conversion	SDG 6
Optimum Design of Biomass Gasification Powered Hybrid RO-MED Desalination Plant	SDG 6
Next-Generation 2D MXene /LDH Layered Photothermal Systems for High-Efficiency Solar Evaporation and Sustainable Energy Production	SDG 6

AgreenTech 2026 Bootcamp: Immersion in the heart of agricultural innovation at UEMF

As part of its commitment to innovation, entrepreneurship, and sustainable development, the Euromed Innovation Center (EIC) at the Euromed University of Fez (UEMF) hosted the AgreenTech 2026 Bootcamp, organized in partnership with Tamwilcom (Innov Invest Fund) and Bank of Africa (BlueSpace). This initiative brought together innovative project leaders for an intensive program focused on modernizing the agricultural sector.

Over two days of support, participants strengthened the structuring of their projects and developed solutions addressing the challenges of Moroccan agriculture, including intelligent water management, precision agriculture, digitalization of farms, adaptation to climate change and sustainable development of natural resources.

Leveraging technologies such as artificial intelligence, IoT, smart irrigation systems, computer vision, and solar energy, the projects presented aim to improve the performance, resilience, and sustainability of the agricultural sector. This bootcamp thus confirms UEMF's role as a major player in innovation and the sustainable agricultural transition in Morocco.

Events

Academic events

The effects of climate change on water and biodiversity: a conference at the heart of contemporary environmental issues

As part of its commitment to disseminating knowledge and opening up to major contemporary issues, the Euromed University of Fez, in partnership with the Cervantes Institute, organised a conference dedicated to one of the major environmental challenges of our time: the impact of climate change on water resources and biodiversity.
Led by Carmen González Castro, Professor at the University of Vigo, this meeting, entitled "The effects of climate change on water and biodiversity: tools to mitigate it", offered a scientific perspective on the environmental transformations that are currently affecting ecosystems worldwide.
During her presentation, the speaker highlighted the growing consequences of climate change on water resources and natural balances, while also emphasizing the challenges related to preserving biodiversity. She further stressed the need for a better understanding of the interactions between these phenomena in order to anticipate their effects and strengthen adaptive capacities in the face of current environmental changes.
La conférence a par ailleurs permis d'explorer différents outils et pistes d'atténuation susceptibles de contribuer à une meilleure gestion des enjeux environnementaux. Approches scientifiques, stratégies durables et solutions innovantes ont été présentées comme des leviers essentiels pour préserver les ressources naturelles et accompagner les transitions écologiques.
Au-delà des échanges académiques, cette rencontre a constitué un espace de réflexion et de dialogue autour de questions qui concernent l'avenir collectif. Elle illustre la volonté partagée de l'Université Euromed de Fès et de l'Institut Cervantes de promouvoir la coopération culturelle et scientifique autour des grands enjeux mondiaux, tout en favorisant la sensibilisation et la transmission des connaissances auprès des nouvelles générations.

Partnership

GIZ – Dorscht Impact Training Program (Circular Water Economy)

UEMF has been selected to implement a specialized training program as part of the GIZ–Dorscht Impact partnership, focusing on the strategic theme of the circular water economy in urban areas. This program, implemented in several Moroccan cities (Rabat, Marrakech, and Tangier), is structured into 4 thematic cohorts: Cohort M1, aimed at institutional stakeholders (agencies and ministries), focusing on regulations, governance, and the management of water-related projects (sessions held in Rabat on February 4–5 and 11–12, 2026); Cohort M4, focusing on strategic urban planning and the integration of the EccEau concept (sessions in Marrakech and Tangier in February 2026); Cohort M2, targeting teachers and academic staff, focusing on moving from theory to practice (sessions scheduled in Tangier and Marrakech in March–April 2026); and Cohort M3, aimed at water-sector professionals, focusing on the 5R Water concept (sessions scheduled in Tangier and Marrakech in April 2026). This program positions UEMF as a key player in training on environmental challenges and the sustainable management of water resources in Morocco.

Visit of the UEMF Delegation to SOTHERMA

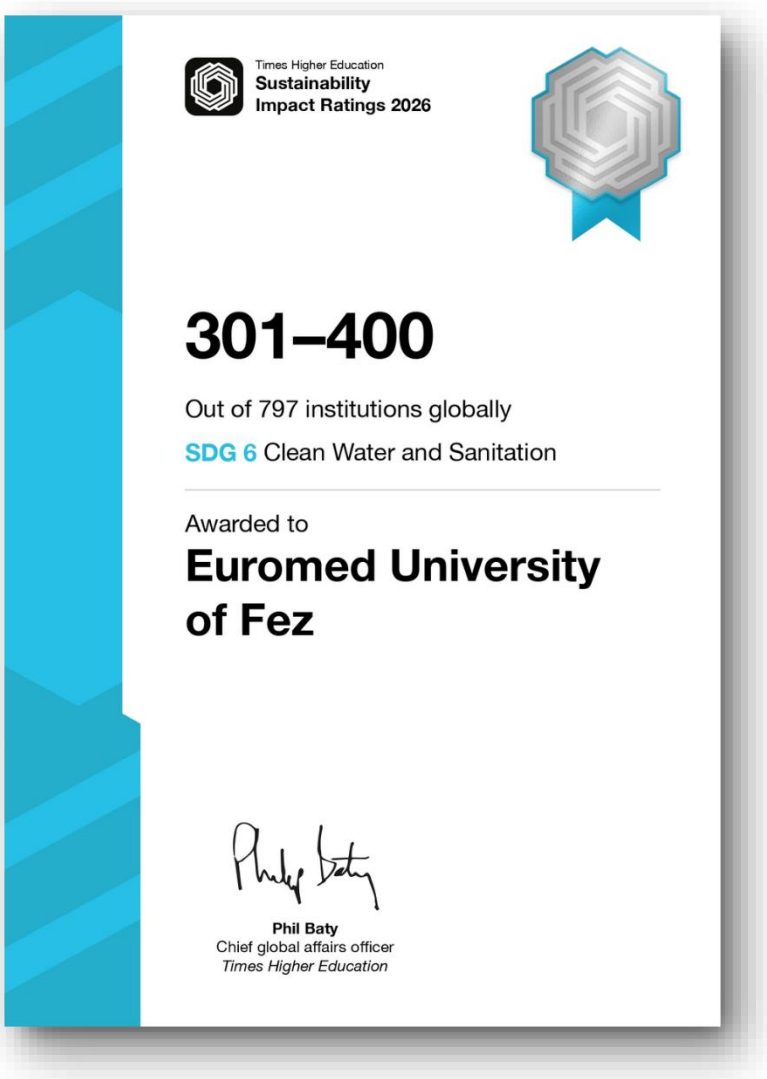

On September 18, 2025, a delegation from UEMF conducted an institutional visit to SOTHERMA, a Moroccan company specializing in the production and distribution of mineral water. This exploratory visit was part of UEMF's strategy to identify the continuing education needs of companies in the agri-food and industrial sectors, with a view to developing tailor-made training programs adapted to the specific requirements of these sectors.

Awards and Distinctions

Performance de l'UEMF dans le THE Impact Rankings 2026 – ODD 6

In the THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 301–400 range out of 797 institutions for SDG 6: Clean Water and Sanitation. This performance recognizes its efforts in sustainable water management, water use efficiency, water resource research, and raising awareness of sanitation issues.

UI GreenMetric International Ranking 2025

The Euromed University of Fez has been ranked the number one university in Morocco in the UI GreenMetric 2025 international ranking and is among the top 400 universities worldwide, representing 105 countries. It notably surpasses Ibn Tofail University, Mohammed VI Polytechnic University, and Mohammed V University of Rabat.

This ranking, based on 51 indicators related to sustainable development, innovation, teaching and research, confirms the national and international leadership of the UEMF.

In 2025, the university was also ranked 1st in Morocco and 2nd in Africa (behind the University of Cape Town) by the Round University Ranking, received the International Alliance University of the Year 2025 award, and had eight of its researchers ranked among the top 2% most impactful in the world according to Stanford's ranking.

These results are the outcome of a strategy focused on:

- Academic excellence,
- Research and innovation,
- International openness,
- Collaboration with the socio-economic world,

and the well-being of the university community.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

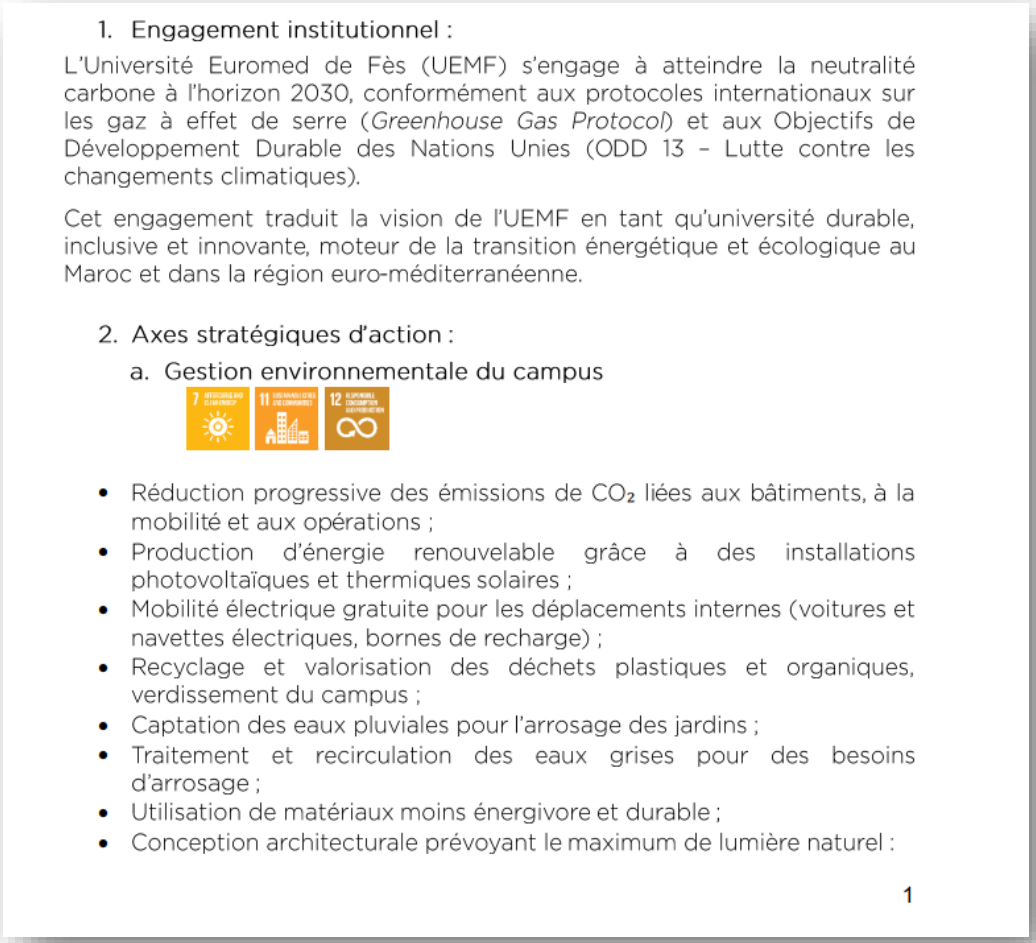

The Euromed University of Fez is fully committed to the national and international energy transition, making sustainable energy a cornerstone of its academic and institutional model. Through its eco-campus, training programs, applied research projects, and scientific and industrial partnerships, UEMF contributes to the development and dissemination of clean and innovative energy solutions. By raising awareness among its university community and supporting innovation in renewable energy, the University actively participates in building a more sustainable, inclusive, and resilient energy future.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez is proactively committed to the energy transition, in line with Sustainable Development Goal 7. Aware of the challenges related to energy consumption and greenhouse gas emissions, the university is implementing policies to improve the energy efficiency of its infrastructure. A carbon neutrality and climate action policy is a central pillar of this strategy. Furthermore, measures are being implemented to encourage the rational use of energy and promote responsible behavior. The Euromed University of Fez also integrates sustainability criteria into its procurement and the management of its digital equipment. This comprehensive approach helps reduce the campus's energy footprint. In this way, the university actively contributes to the promotion of sustainable and accessible energy.

Carbon neutrality and climate action policy of the Euromed University of Fez (Version 2025)

1. Engagement institutionnel :

L'Université Euromed de Fès (UEMF) s'engage à atteindre la neutralité carbone à l'horizon 2030, conformément aux protocoles internationaux sur les gaz à effet de serre (*Greenhouse Gas Protocol*) et aux Objectifs de Développement Durable des Nations Unies (ODD 13 – Lutte contre les changements climatiques).

Cet engagement traduit la vision de l'UEMF en tant qu'université durable, inclusive et innovante, moteur de la transition énergétique et écologique au Maroc et dans la région euro-méditerranéenne.

2. Axes stratégiques d'action :

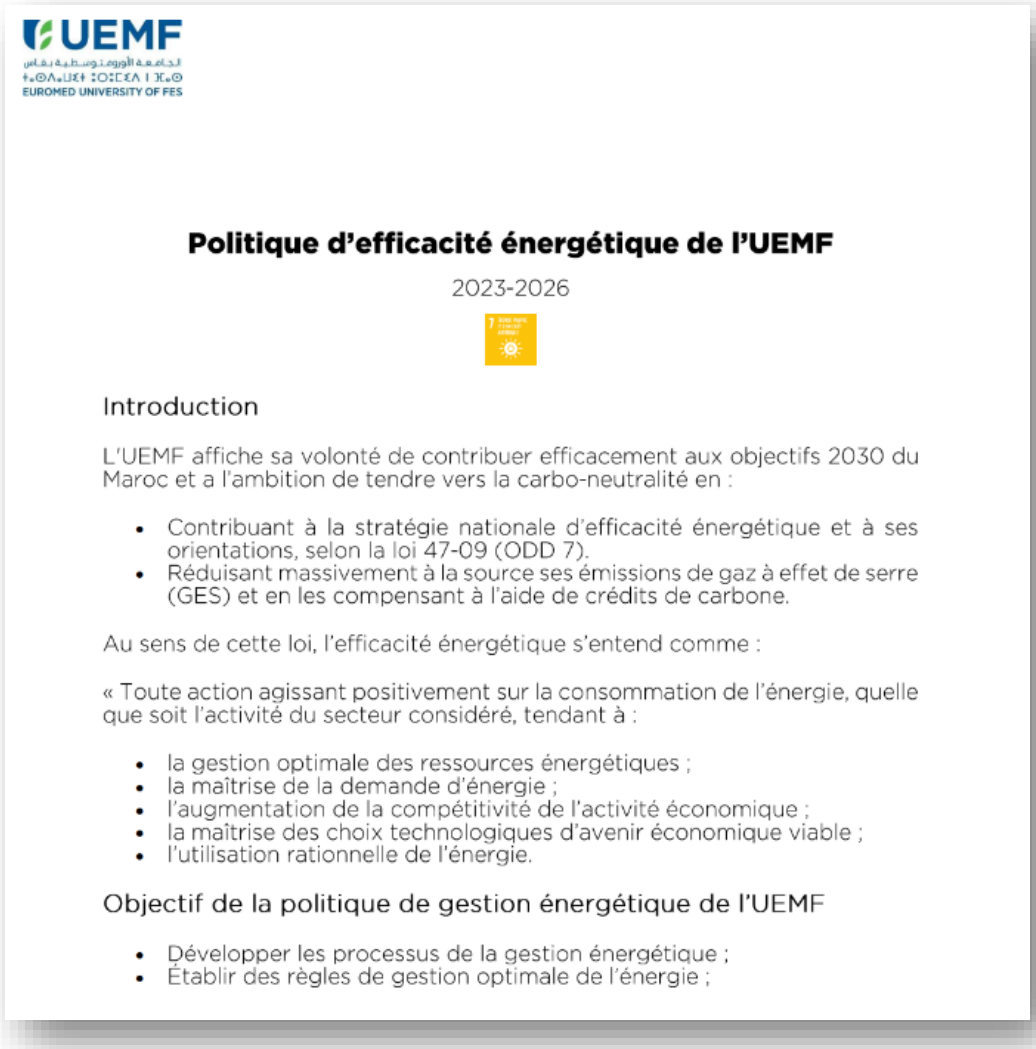

a. Gestion environnementale du campus

- Réduction progressive des émissions de CO_2 liées aux bâtiments, à la mobilité et aux opérations ;
- Production d'énergie renouvelable grâce à des installations photovoltaïques et thermiques solaires ;
- Mobilité électrique gratuite pour les déplacements internes (voitures et navettes électriques, bornes de recharge) ;
- Recyclage et valorisation des déchets plastiques et organiques, verdissement du campus ;
- Captation des eaux pluviales pour l'arrosage des jardins ;
- Traitement et recirculation des eaux grises pour des besoins d'arrosage ;
- Utilisation de matériaux moins énergivore et durable ;
- Conception architecturale prévoyant le maximum de lumière naturel :

1

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

UEMF Energy Efficiency Policy (2023-2026)

UEMF

EUROMED UNIVERSITY OF FES

Politique d'efficacité énergétique de l'UEMF

2023-2026

Introduction

L'UEMF affiche sa volonté de contribuer efficacement aux objectifs 2030 du Maroc et a l'ambition de tendre vers la carbo-neutralité en :

- Contribuant à la stratégie nationale d'efficacité énergétique et à ses orientations, selon la loi 47-09 (ODD 7).
- Réduisant massivement à la source ses émissions de gaz à effet de serre (GES) et en les compensant à l'aide de crédits de carbone.

Au sens de cette loi, l'efficacité énergétique s'entend comme :

« Toute action agissant positivement sur la consommation de l'énergie, quelle que soit l'activité du secteur considéré, tendant à :

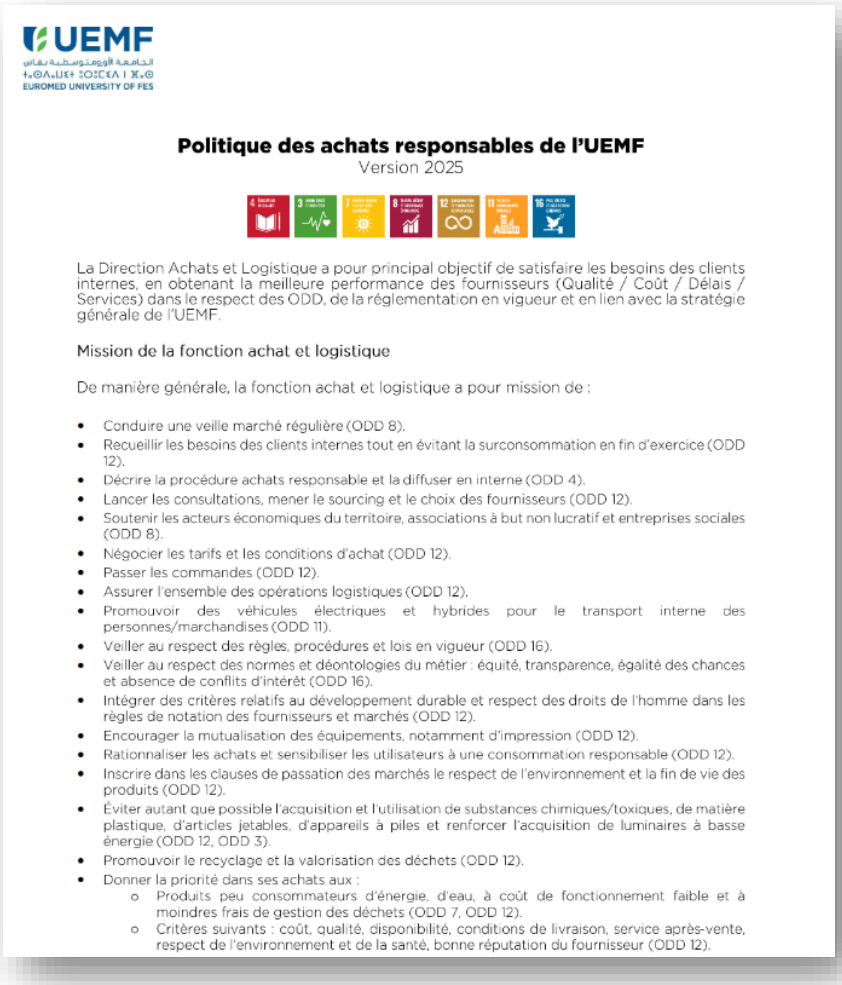

- la gestion optimale des ressources énergétiques ;
- la maîtrise de la demande d'énergie ;
- l'augmentation de la compétitivité de l'activité économique ;
- la maîtrise des choix technologiques d'avenir économique viable ;
- l'utilisation rationnelle de l'énergie.

Objectif de la politique de gestion énergétique de l'UEMF

- Développer les processus de la gestion énergétique ;
- Établir des règles de gestion optimale de l'énergie ;

UEMF is committed to optimizing its energy consumption and promoting the use of renewable energy. This policy aims to reduce the University's carbon footprint while ensuring the efficiency of its infrastructure.

UEMF Responsible Procurement Policy (Version 2025)

UEMF
EUROMED UNIVERSITY OF FES

Politique des achats responsables de l'UEMF
Version 2025

La Direction Achats et Logistique a pour principal objectif de satisfaire les besoins des clients internes, en obtenant la meilleure performance des fournisseurs (Qualité / Coût / Délais / Services) dans le respect des ODD, de la réglementation en vigueur et en lien avec la stratégie générale de l'UEMF.

Mission de la fonction achat et logistique

De manière générale, la fonction achat et logistique a pour mission de :

- Conduire une veille marché régulière (ODD 8).
- Recueillir les besoins des clients internes tout en évitant la surconsommation en fin d'exercice (ODD 12).
- Décrire la procédure achats responsable et la diffuser en interne (ODD 4).
- Lancer les consultations, mener le sourcing et le choix des fournisseurs (ODD 12).
- Soutenir les acteurs économiques du territoire, associations à but non lucratif et entreprises sociales (ODD 8).
- Négocier les tarifs et les conditions d'achat (ODD 12).
- Passer les commandes (ODD 12).
- Assurer l'ensemble des opérations logistiques (ODD 12).
- Promouvoir des véhicules électriques et hybrides pour le transport interne des personnes/marchandises (ODD 11).
- Veiller au respect des règles, procédures et lois en vigueur (ODD 16).
- Veiller au respect des normes et déontologies du métier : équité, transparence, égalité des chances et absence de conflits d'intérêt (ODD 16).
- Intégrer des critères relatifs au développement durable et respect des droits de l'homme dans les règles de notation des fournisseurs et marchés (ODD 12).
- Encourager la mutualisation des équipements, notamment d'impression (ODD 12).
- Rationnaliser les achats et sensibiliser les utilisateurs à une consommation responsable (ODD 12).
- Inscrire dans les clauses de passation des marchés le respect de l'environnement et la fin de vie des produits (ODD 12).
- Éviter autant que possible l'acquisition et l'utilisation de substances chimiques/toxiques, de matière plastique, d'articles jetables, d'appareils à piles et renforcer l'acquisition de luminaires à basse énergie (ODD 12, ODD 3).
- Promouvoir le recyclage et la valorisation des déchets (ODD 12).
- Donner la priorité dans ses achats aux :
  - Produits peu consommateurs d'énergie, d'eau, à coût de fonctionnement faible et à moindres frais de gestion des déchets (ODD 7, ODD 12).
  - Critères suivants : coût, qualité, disponibilité, conditions de livraison, service après-vente, respect de l'environnement et de la santé, bonne réputation du fournisseur (ODD 12).

With this policy, the UEMF is establishing a framework for ethical and sustainable procurement. It encourages the selection of suppliers who share values of transparency, social and environmental responsibility.

UEMF Responsible Digital Charter (Revised Version 2025)

UEMF
EUROMED UNIVERSITY OF FES

Charte Numérique Responsable de l'UEMF

(version révisée 2025)

Engagements :

- **Sensibiliser, former et partager les bonnes pratiques du NR** : Informer et éduquer la communauté universitaire sur l'importance du numérique responsable (ODD 4).
- **Entrer dans une démarche de labellisation NR** : S'inscrire dans des standards reconnus pour garantir une approche responsable du numérique.
- **Déployer un plan de sécurisation des environnements numériques** : Assurer la protection des données et des systèmes d'information contre les cybermenaces (ODD 16).
- **Évaluer la robustesse des infrastructures** : Effectuer des audits réguliers pour garantir la fiabilité des systèmes (ODD 9).
- **Mesurer la durée de vie des équipements** : Analyser et prolonger la vie des dispositifs pour réduire le gaspillage.
- **Prioriser l'achat de matériel durable** : Choisir des équipements conçus pour être durables et réparables (ODD 12).
- **Intégrer des exigences environnementales dans les appels d'offre** : Veiller à ce que les pratiques d'achat soient alignées avec les objectifs de durabilité.
- **S'assurer auprès des fournisseurs du respect des règles de protection des données** : Garantir que tous les partenaires respectent les normes de confidentialité (ODD 16).
- **Mesurer la consommation et l'impact énergétique du SI** : Analyser la performance énergétique des systèmes d'information pour réduire leur empreinte carbone (ODD 7).
- **Éviter les consommations d'énergie non nécessaires** : Mettre en œuvre des stratégies pour optimiser l'utilisation de l'énergie.
- **Planifier l'archivage et le nettoyage des données** : Mettre en place des pratiques de gestion des données pour éviter l'accumulation excessive (ODD 12).

Digital technology plays a central role at UEMF, but its use must be responsible. This charter defines best practices regarding digital tools, data security, and reducing environmental impact.

E-SDG

The training programs offered by the Euromed Polytechnic School (EPS) contribute to SDG 7 – Affordable and Clean Energy – through its Engineering degree in Energy and Environmental Process Engineering and its Master in Sustainable Energy, offered as a dual degree with the University of Surrey (United Kingdom). These programs emphasize renewable energies, energy optimization and efficiency, process control, and the transition to sustainable energy systems, preparing engineers and experts capable of developing innovative solutions to current energy and environmental challenges.

EUROMED POLYTECHNIC SCHOOL

- **Process engineer specializing in energy and the environment:**

This program prepares engineers capable of transforming matter and energy into innovative, sustainable, and intelligent industrial solutions. It covers separation techniques, catalysis, polymers, and chemical process safety, combining mastery of transfers, process optimization, and the use of renewable energies to build the factory of the future. Graduates become Process Engineers, Environmental Experts, or R&D Engineers.

- **Master in Sustainable Energy (double degree with the University of Surrey - UK)**

Research, Innovation & Entrepreneurship

Research Topics - Doctoral Cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 7 has been identified. This work focuses in particular on renewable energies, green hydrogen, energy efficiency, storage, smart grids, energy materials, and low-carbon solutions.

The table below presents the main research topics contributing to this objective.

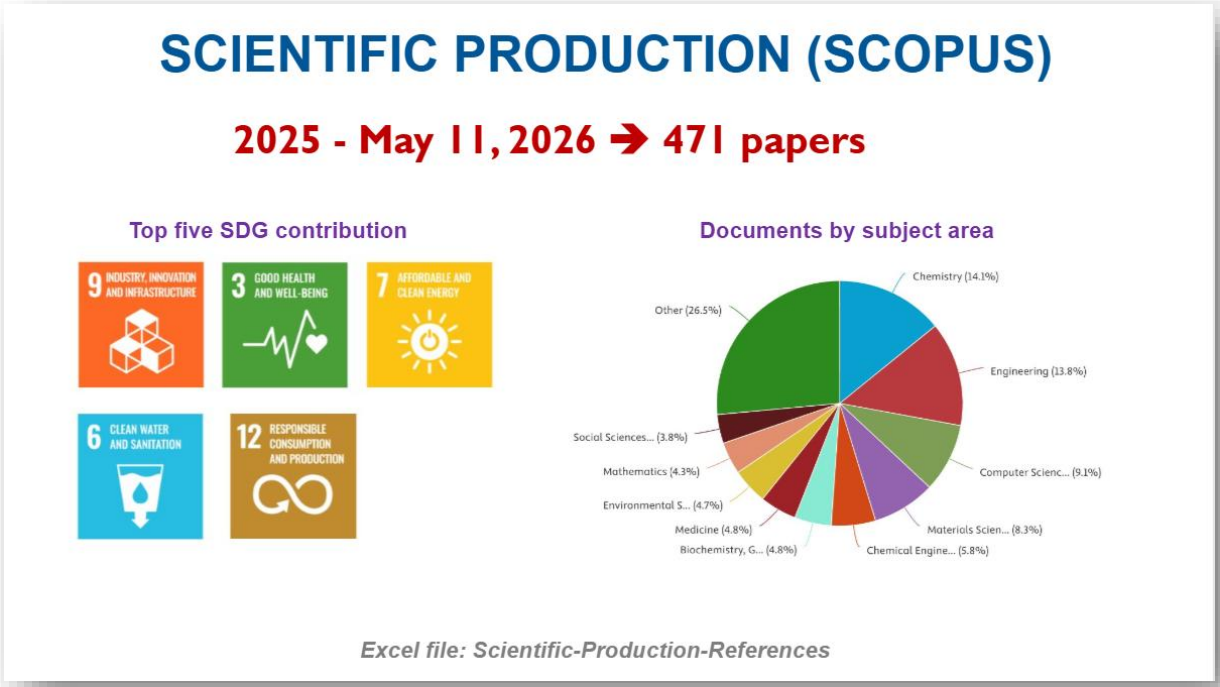

Thesis Subject	related SDGs
The Synthesis of New Nano-Objects (Quantum-Dots, Clusters and Metallic Nanoparticles), Their Confinement in Porous Matrices and/or Mesostructures, Their Stability and Their Application to Fine Chemistry Catalysis	SDG 7
Physico-Chemical Modeling of the Alkaline Water Electrolysis Process	SDG 7
Blockchain-Driven Transformation of the Green Hydrogen Supply Chain	SDG 7
Porous Materials for Catalysis	SDG 7
Smart Batteries	SDG 7
Synthesis & Characterization of New Ionic Conductive Based Phosphate for Li/Na-Ion Batteries	SDG 7
Modeling and Optimizing Building for Energy Efficiency Using the Digital Twin Concept	SDG 7
Modeling and Optimization of Green Hydrogen Production from Sea Water Electrolysis: A Systematic Approach to Maximizing Energy Efficiency and Minimizing Environmental Impact	SDG 7
Cooling the city – microclimatic strategies for thermal comfort and energy efficiency	SDG 7
Aerial robotics applied to energy sustainability: the case of automated solar panel cleaning	SDG 7
Sustainable architecture and energy efficiency: integrated approaches between architecture and geography in the Moroccan context	SDG 7
Recent Trends and Advancements in SOFC Technology: Achieving Low Operating Temperatures Through Material Innovations	SDG 7
From Light to Power: 2D Graphene Oxide (GO) Platforms for Efficient Solar-Thermal Water-Energy Conversion	SDG 7
Smart Integration of Electric and Hybrid Vehicles into the Power Grid	SDG 7
Optimum Design of Biomass Gasification Powered Hybrid RO-MED Desalination Plant	SDG 7
Energetic Valorization of Agricultural Residue Through Thermal Process	SDG 7

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF.Euromed innovation center (EIC)organized, in partnership withTAMWILCOMvia the InnovInvest Fund and BlueSpace (Bank of Africa), on April 16 and 17, the Hack'Days of the Fes-Meknes region, bringing together students, project leaders and young entrepreneurs around an intensive bootcamp dedicated to the creation and development of innovative solutions.

As part of a dynamic of supporting high-potential talent, this program aims to support the emergence of projects in strategic sectors such as digital, health, agritech, cybersecurity, greentech, fintech or edtech, thus contributing to the development of the regional entrepreneurial ecosystem.

Over the course of two days, participants were supported in structuring their ideas, designing concrete solutions and preparing their projects, in an environment conducive to experimentation, collaboration and collective intelligence.

A true space for learning and co-creation, this event allowed each team to develop their project, benefiting from constructive feedback, dedicated mentoring and guidance that fosters the maturation of entrepreneurial initiatives.

The Hack'Days concluded with pitch sessions, offering participants the opportunity to present their projects, compare their ideas and reveal their full potential, in a dynamic focused on innovation and impact.

We extend our sincere congratulations to all participants for their commitment, creativity, and entrepreneurial spirit. This initiative confirms the role of the UEMF, through the Euromed Innovation Center, as a key player in structuring and supporting innovation at the regional and national levels.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

On May 7th and 8th, 2026, theEuromed innovation center (EIC)organized the regional Hack'Days Oriental bootcamp, organized as part of the Hack'Days by Region 2026 program, supported by Tamwilcom via the Innov Invest Fund, in partnership with Blue Space by Bank of Africa.

For two days, project leaders from the Oriental region participated in intensive support designed to transform innovative ideas into structured, viable projects ready to accelerate their development.

Seven projects were selected following the initial rounds to participate in this edition and benefit from mentorship provided by experts and key players in the entrepreneurial ecosystem. Participants worked on key aspects of their projects: strategic vision, business model, market positioning, validation of the value proposition, and growth prospects.

The projects developed covered several high-stakes sectors: • Cleantech & hybrid energy • EdTech & financial education • HealthTech & drug safety • FinTech & algorithmic trading • Applied AI & cybersecurity

Beyond technical support, this bootcamp primarily created a space for meetings, reflection and experimentation where participants could challenge their ideas, share their experiences and develop their projects by interacting with experts and other entrepreneurs.

Events

Academic events

The effects of climate change on water and biodiversity: a conference at the heart of contemporary environmental issues

As part of its commitment to disseminating knowledge and opening up to major contemporary issues, the Euromed University of Fez, in partnership with the Cervantes Institute, organised a conference dedicated to one of the major environmental challenges of our time: the impact of climate change on water resources and biodiversity.

Led by Carmen González Castro, Professor at the University of Vigo, this meeting, entitled "The effects of climate change on water and biodiversity: tools to mitigate it", offered a scientific perspective on the environmental transformations that are currently affecting ecosystems worldwide.

During her presentation, the speaker highlighted the growing consequences of climate change on water resources and natural balances, while also emphasizing the challenges related to preserving biodiversity. She further stressed the need for a better understanding of the interactions between these phenomena in order to anticipate their effects and strengthen adaptive capacities in the face of current environmental changes.

The conference also provided an opportunity to explore various tools and mitigation strategies that could contribute to better management of environmental challenges. Scientific approaches, sustainable strategies, and innovative solutions were presented as essential levers for preserving natural resources and supporting ecological transitions.

Beyond academic exchanges, this meeting provided a space for reflection and dialogue on issues concerning our collective future. It illustrates the shared commitment of the Euromed University of Fez and the Cervantes Institute to promoting cultural and scientific cooperation around major global challenges, while also fostering awareness and the transmission of knowledge to new generations.

Seminars, conferences & congresses

Seminar on Low-Carbon Hydrogen: with Professor Philippe Tanguy and Professor Nadia Yousfi

The Euromed University of Fez (UEMF), in partnership with the Hassan II Academy of Sciences and Techniques, organised a high-level seminar dedicated to emerging processes for the production of low-carbon hydrogen.

Led by Professor Philippe Tanguy, Director of Strategy for the HTEC Group and Associate Professor at Polytechnique Montréal, and Professor Nadia Yousfi, Corresponding Member of the Hassan II Academy of Sciences and Techniques, this seminar allowed for rich exchanges with students, researchers and teachers on the scientific, technological and economic challenges of low-carbon hydrogen.

This meeting highlighted the strategic role of hydrogen in Morocco's energy transition and confirmed the UEMF's commitment to research, innovation and sustainable development.

Partnership

The UEMF hosts the 6th e Meeting of the Board of Directors of the Green H2 Morocco Cluster

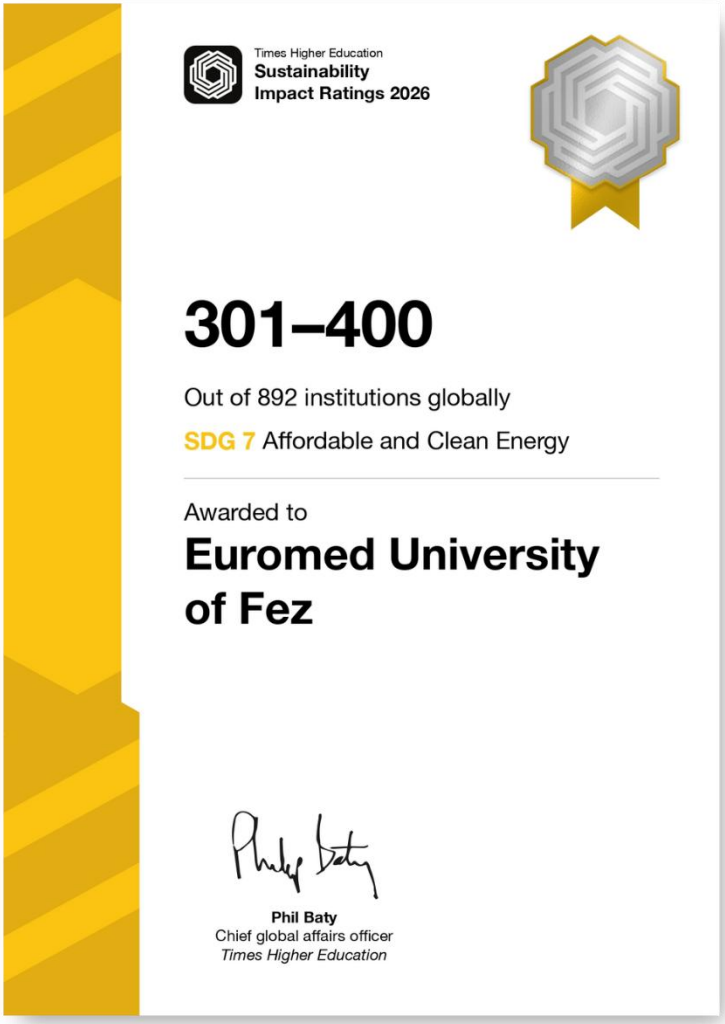

On January 23, 2026, the Euromed University of Fez hosted the sixth meeting of the Board of Directors of the Green H2 Morocco Cluster, highlighting its leading role in research and innovation in strategic sectors related to the energy transition. Prior to the meeting, participants toured the university's facilities, including sports facilities, laboratories in civil engineering, mechanics, biotechnology, and chemistry, as well as the ideation incubator and the Fez Smart Factory, demonstrating UEMF's capabilities in research and technology transfer.

The meeting focused on analyzing the Cluster's financial and organizational situation, reviewing activities, future development, and strengthening governance, within a context favorable to green hydrogen. The event illustrates the UEMF's commitment to supporting innovation, institutional partnerships, and the development of future-oriented sectors in Morocco, particularly in renewable energies.

Awards and Distinctions

UEMF's performance in THE Impact Rankings 2026 – SDG 7

In the THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 301–400 range out of 892 institutions for SDG 7: Affordable and Clean Energy. This recognition highlights its initiatives related to renewable energy, energy efficiency, technological research, and the transition to more sustainable energy models.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

The Euromed University of Fez actively promotes decent work and sustainable economic growth by placing employability, entrepreneurship, and innovation at the heart of its mission. Through training programs aligned with market needs, the strengthening of professional skills, the promotion of student entrepreneurship, support for professional integration, and assistance in creating and developing innovative startups, UEMF prepares talented individuals capable of contributing effectively to economic development. Furthermore, the University fosters a responsible, inclusive, and respectful work environment, thereby contributing to sustainable growth based on human capital and innovation.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez contributes to the promotion of decent work and sustainable economic growth, in line with SDG 8. Through its corporate social responsibility and governance policies, it fosters a professional environment that respects ethical and social standards. The university ensures fair working conditions and promotes inclusion within its organization. It also encourages skills development and student employability, in line with labor market needs. Responsible procurement policies reinforce this dynamic by integrating social and environmental criteria. The Euromed University of Fez is thus committed to sustainable and inclusive growth. It contributes to value creation while respecting the principles of sustainable development.

c. Formation, sensibilisation et engagement académique

- Masters et programmes spécialisés sur l'énergie, le développement durable, la gestion environnementale et l'ingénierie verte ;
- Cours transversaux sur les ODD et la durabilité dans tous les programmes ;
- Conférences et séminaires internationaux sur la transition énergétique, la résilience climatique et l'économie circulaire ;
- Projets étudiants et doctorants sur le bilan carbone, le recyclage, l'éco-design et l'adaptation climatique-résilience.

d. Innovation, incubation et entrepreneuriat vert

- Incubation de start-up dans les domaines de la mobilité électrique, de la technologie propre, de l'agritech, et des énergies renouvelables ;
- Organisation régulière de hackathons sur l'agritech, l'énergie, la gestion durable et la réduction du carbone, mobilisant étudiants, chercheurs et partenaires industriels ;
- Accompagnement des porteurs de projets à impact environnemental au sein de l'Euromed Innovation Center et de l'écosystème Fez Smart Factory, à travers des programmes d'incubation, de mentorat et de valorisation technologique favorisant la mobilité électrique, l'agritech, les énergies renouvelables et l'économie circulaire.e. Partenariats et coopération

  Depuis septembre 2024, l'Euromed Innovation Center accompagne la transformation des idées en projets à fort impact, avec des résultats concrets :

  - 143 projets accompagnés et mentorés,
  - 632 personnes sensibilisées à l'entrepreneuriat,
  - 27 startups incubées et juridiquement établies.

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

III. Politique de non-discrimination et protection des personnes discriminées

L'Université bannit toute discrimination basée sur le rang social, le genre, l'orientation sexuelle, la croyance, l'âge, l'origine ethnique, le statut d'immigrant ou encore le handicap. Toute personne du corps professoral, parmi le personnel administratif et de soutien et parmi les étudiants, stagiaires, visiteurs ou parmi le personnel sous-traitant au sein du campus de l'université a droit au respect et à un traitement équitable respectant les droits et devoirs et la dignité de tout un chacun. Aucune discrimination de quelque nature que ce soit n'est tolérée à l'Université.

Il est passible de sanctions sévères toute personne, quel que soit son rang au sein de l'Université, qui par ses actes, paroles ou attitude, fait une discrimination envers autrui basée sur le genre, l'origine, la croyance, l'âge, le sexe, l'origine ethnique ou le handicap. Toute personne se sentant discriminée peut déposer plainte auprès du Secrétaire Général ou encore l'Ombudsman de l'Université. Les étudiants déposent leurs plaintes auprès des chefs d'Établissement et, s'ils n'obtiennent pas justice concernant leur cas, ils déposent plainte auprès du Vice-Président en charge des Affaires Académiques et Culturelles et aussi après de l'Ombudsman de l'Université. Ces plaintes sont soumises au Comité de Discipline de l'Université qui diligente une enquête officielle au sujet de la plainte. Si les faits sont avérés et documentés, alors des mesures disciplinaires et des sanctions sont prises à l'encontre du contrevenant. Si cette discrimination est volontaire (ou ayant un caractère raciste ou sexiste), alors la sanction conduit automatiquement à l'exclusion définitive de l'Université et, selon la gravité de l'acte de discrimination, une poursuite judiciaire pourrait être portée à l'encontre du contrevenant.

Aucun employé, aucune personne en formation ou en stage ne peut être sanctionné, licencié ou faire l'objet d'une mesure discriminatoire, directe ou indirecte, notamment en matière de rémunération, de formation, de reclassement, d'affectation, de qualification, de classification, de promotion professionnelle, de mutation, d'évaluation ou de renouvellement de contrat pour avoir signalé l'acte de discrimination.

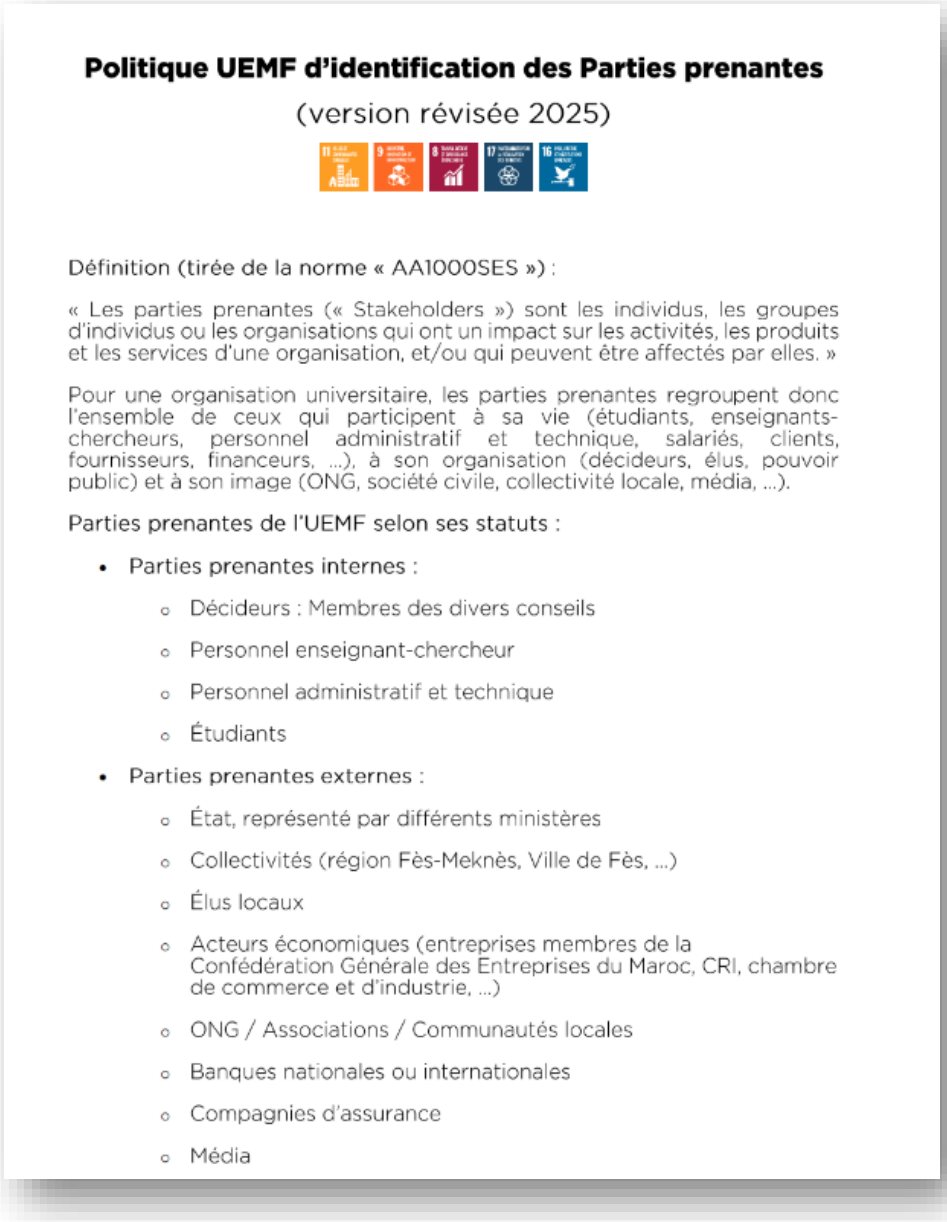

IV. Conditions de travail : engagement contre les discriminations, le travail des enfants, travail forcé et la traite des humains

L'Université œuvre pour l'épanouissement de sa communauté en cultivant le sentiment d'appartenance et en mettant à sa disposition tous les moyens et les conditions de travail permettant d'instaurer un climat stimulant, serein et favorable à l'innovation, à la création et à la créativité. Elle reconnaît les droits des employés (liberté d'association et négociation collective) pour tous, y compris les femmes et le personnel international.

Toute personne travaillant à l'Université a un contrat de travail officiel signé entre le Président de l'Université et l'employé. Ce contrat explicite les normes de travail, les tâches et les prérogatives de l'employé, les heures de travail, les périodes de congés et de jours fériés, la rémunération et les avantages sociaux en termes de couverture médicale et de retraite. Il est strictement interdit :

This policy embodies UEMF's commitment to integrating social responsibility into all of its missions. It highlights the importance of reconciling academic performance, respect for the environment, and a positive societal impact.

Politique UEMF d'identification des Parties prenantes

(version révisée 2025)

Définition (tirée de la norme « AA1000SES ») :

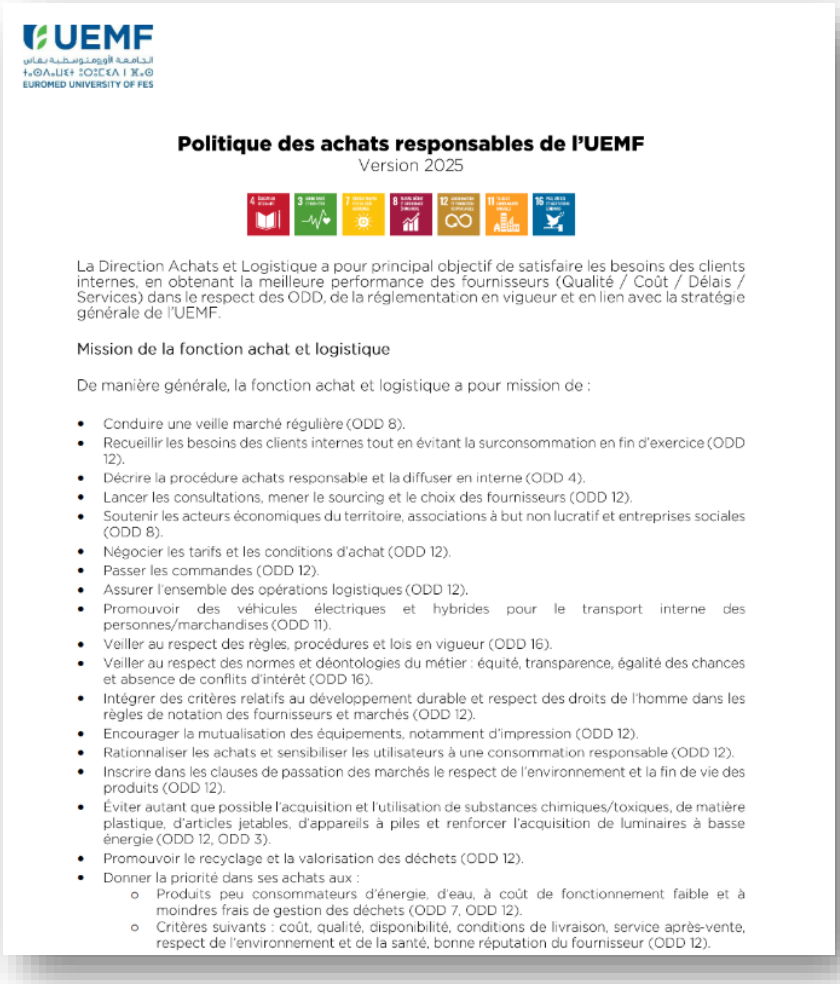

« Les parties prenantes (« Stakeholders ») sont les individus, les groupes d'individus ou les organisations qui ont un impact sur les activités, les produits et les services d'une organisation, et/ou qui peuvent être affectés par elles. »

Pour une organisation universitaire, les parties prenantes regroupent donc l'ensemble de ceux qui participent à sa vie (étudiants, enseignants-chercheurs, personnel administratif et technique, salariés, clients, fournisseurs, financeurs, ...), à son organisation (décideurs, élus, pouvoir public) et à son image (ONG, société civile, collectivité locale, média, ...).

Parties prenantes de l'UEMF selon ses statuts :

- Parties prenantes internes :
  - Décideurs : Membres des divers conseils
  - Personnel enseignant-chercheur
  - Personnel administratif et technique
  - Étudiants
- Parties prenantes externes :
  - État, représenté par différents ministères
  - Collectivités (région Fès-Meknès, Ville de Fès, ...)
  - Élus locaux
  - Acteurs économiques (entreprises membres de la Confédération Générale des Entreprises du Maroc, CRI, chambre de commerce et d'industrie, ...)
  - ONG / Associations / Communautés locales
  - Banques nationales ou internationales
  - Compagnies d'assurance
  - Média

The UEMF recognizes the importance of its stakeholders in the success of its missions. This policy defines the methods of dialogue, listening, and cooperation with students, teachers, institutional partners, and economic actors.

UEMF
EUROMED UNIVERSITY OF FES

Politique des achats responsables de l'UEMF

Version 2025

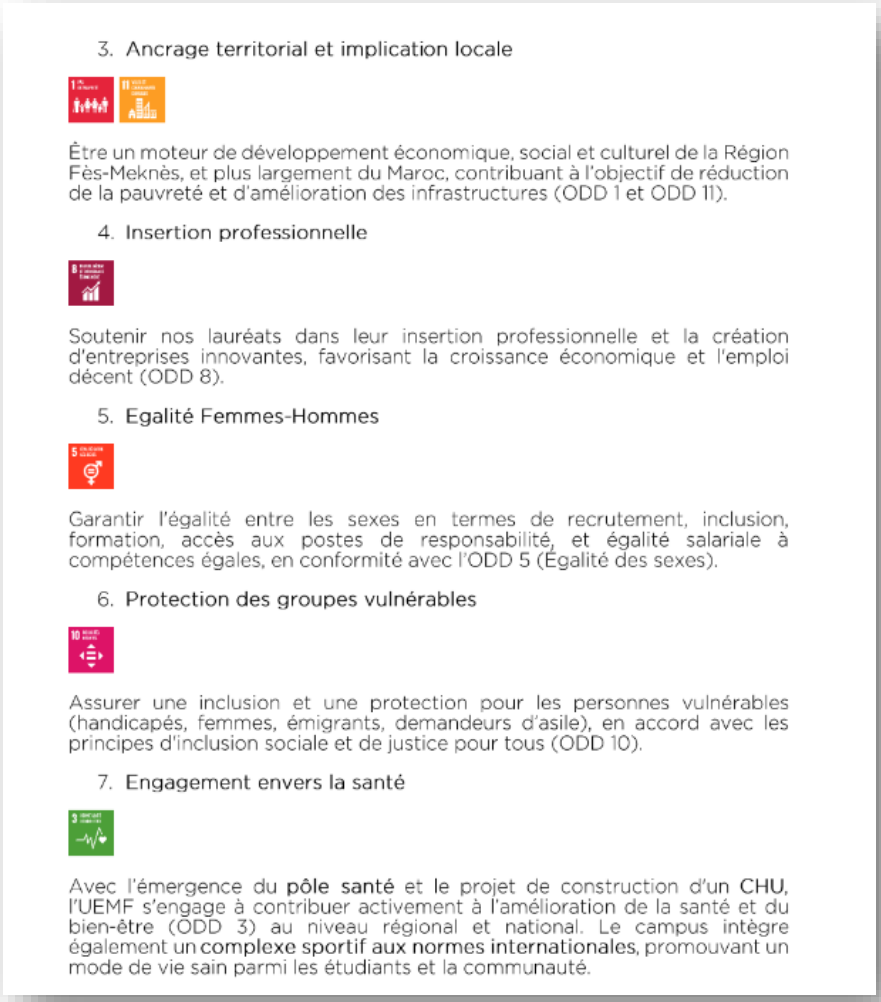

La Direction Achats et Logistique a pour principal objectif de satisfaire les besoins des clients internes, en obtenant la meilleure performance des fournisseurs (Qualité / Coût / Délais / Services) dans le respect des ODD, de la réglementation en vigueur et en lien avec la stratégie générale de l'UEMF.

Mission de la fonction achat et logistique

De manière générale, la fonction achat et logistique a pour mission de :

- Conduire une veille marché régulière (ODD 8).
- Recueillir les besoins des clients internes tout en évitant la surconsommation en fin d'exercice (ODD 12).
- Décrire la procédure achats responsable et la diffuser en interne (ODD 4).
- Lancer les consultations, mener le sourcing et le choix des fournisseurs (ODD 12).
- Soutenir les acteurs économiques du territoire, associations à but non lucratif et entreprises sociales (ODD 8).
- Négocier les tarifs et les conditions d'achat (ODD 12).
- Passer les commandes (ODD 12).
- Assurer l'ensemble des opérations logistiques (ODD 12).
- Promouvoir des véhicules électriques et hybrides pour le transport interne des personnes/marchandises (ODD 11).
- Veiller au respect des règles, procédures et lois en vigueur (ODD 16).
- Veiller au respect des normes et déontologies du métier : équité, transparence, égalité des chances et absence de conflits d'intérêt (ODD 16).
- Intégrer des critères relatifs au développement durable et respect des droits de l'homme dans les règles de notation des fournisseurs et marchés (ODD 12).
- Encourager la mutualisation des équipements, notamment d'impression (ODD 12).
- Rationnaliser les achats et sensibiliser les utilisateurs à une consommation responsable (ODD 12).
- Inscrire dans les clauses de passation des marchés le respect de l'environnement et la fin de vie des produits (ODD 12).
- Éviter autant que possible l'acquisition et l'utilisation de substances chimiques/toxiques, de matière plastique, d'articles jetables, d'appareils à piles et renforcer l'acquisition de luminaires à basse énergie (ODD 12, ODD 3).
- Promouvoir le recyclage et la valorisation des déchets (ODD 12).
- Donner la priorité dans ses achats aux :
  - Produits peu consommateurs d'énergie, d'eau, à coût de fonctionnement faible et à moindres frais de gestion des déchets (ODD 7, ODD 12).
  - Critères suivants : coût, qualité, disponibilité, conditions de livraison, service après-vente, respect de l'environnement et de la santé, bonne réputation du fournisseur (ODD 12).

With this policy, the UEMF is establishing a framework for ethical and sustainable procurement. It encourages the selection of suppliers who share values of transparency, social and environmental responsibility.

3. Ancrage territorial et implication locale

Être un moteur de développement économique, social et culturel de la Région Fès-Meknès, et plus largement du Maroc, contribuant à l'objectif de réduction de la pauvreté et d'amélioration des infrastructures (ODD 1 et ODD 11).

4. Insertion professionnelle

Soutenir nos lauréats dans leur insertion professionnelle et la création d'entreprises innovantes, favorisant la croissance économique et l'emploi décent (ODD 8).

5. Egalité Femmes-Hommes

Garantir l'égalité entre les sexes en termes de recrutement, inclusion, formation, accès aux postes de responsabilité, et égalité salariale à compétences égales, en conformité avec l'ODD 5 (Égalité des sexes).

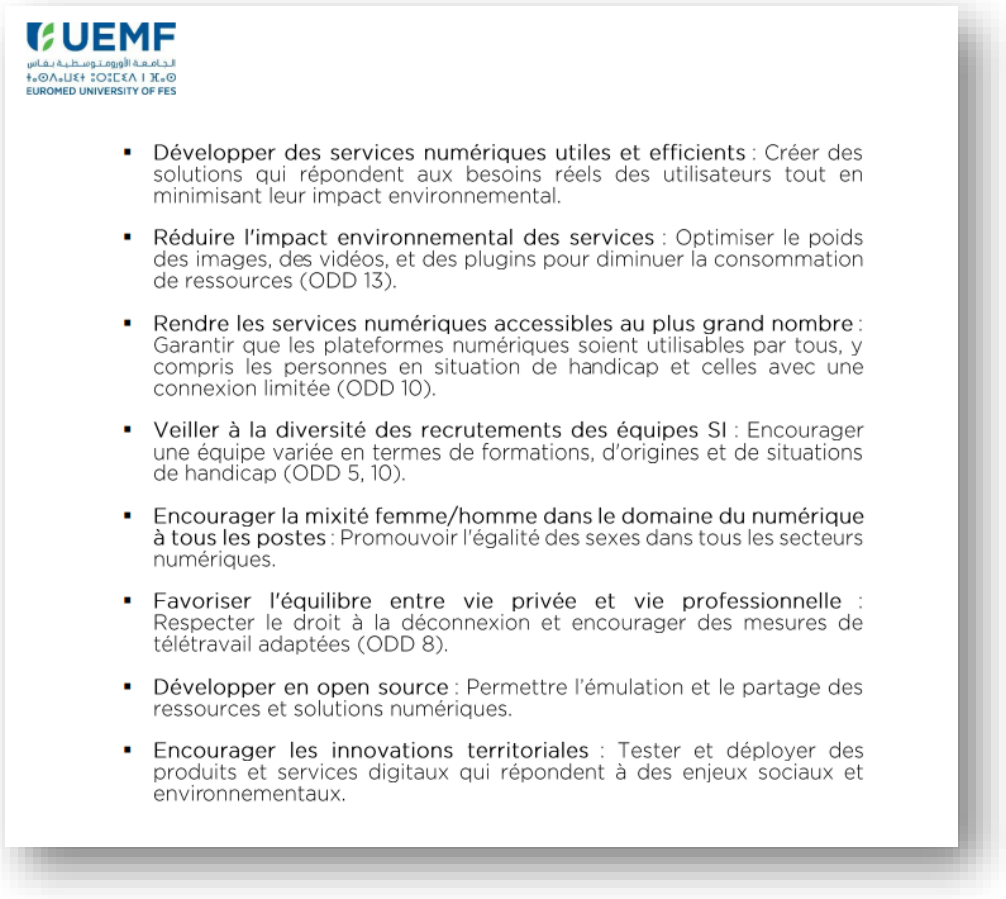

6. Protection des groupes vulnérables

Assurer une inclusion et une protection pour les personnes vulnérables (handicapés, femmes, émigrants, demandeurs d'asile), en accord avec les principes d'inclusion sociale et de justice pour tous (ODD 10).

7. Engagement envers la santé

Avec l'émergence du **pôle santé** et le projet de construction d'un **CHU**, l'UEMF s'engage à contribuer activement à l'amélioration de la santé et du bien-être (ODD 3) au niveau régional et national. Le campus intègre également un **complexe sportif aux normes internationales**, promouvant un mode de vie sain parmi les étudiants et la communauté.

This charter formalizes the integration of social responsibility at the heart of the UEMF's missions. It outlines concrete commitments in the areas of ethics, governance, respect for the environment and contribution to sustainable development.

- **Développer des services numériques utiles et efficients** : Créer des solutions qui répondent aux besoins réels des utilisateurs tout en minimisant leur impact environnemental.
- **Réduire l'impact environnemental des services** : Optimiser le poids des images, des vidéos, et des plugins pour diminuer la consommation de ressources (ODD 13).
- **Rendre les services numériques accessibles au plus grand nombre** : Garantir que les plateformes numériques soient utilisables par tous, y compris les personnes en situation de handicap et celles avec une connexion limitée (ODD 10).
- **Veiller à la diversité des recrutements des équipes SI** : Encourager une équipe variée en termes de formations, d'origines et de situations de handicap (ODD 5, 10).
- **Encourager la mixité femme/homme dans le domaine du numérique à tous les postes** : Promouvoir l'égalité des sexes dans tous les secteurs numériques.
- **Favoriser l'équilibre entre vie privée et vie professionnelle** : Respecter le droit à la déconnexion et encourager des mesures de télétravail adaptées (ODD 8).
- **Développer en open source** : Permettre l'émulation et le partage des ressources et solutions numériques.
- **Encourager les innovations territoriales** : Tester et déployer des produits et services digitaux qui répondent à des enjeux sociaux et environnementaux.

Digital technology plays a central role at UEMF, but its use must be responsible. This charter defines best practices regarding digital tools, data security, and reducing environmental impact.

Decent work at the UEMF: conditions, rights and social benefits

Our HR Policy is based on 5 Principles:

- Equal opportunities
- Gender equality
- Ethics and respect
- Internal promotion
- Staff training

1. Working hours:

The premises of the Euromed University of Fez are open Monday to Friday from 8:30 am to 6:00 pm. Working hours are 8 hours per day, distributed as follows:

Staff are entitled to two 15-minute coffee breaks, one at 10:00 am and the other at 4:00 pm. However, this break could be defined in consultation between the line manager and the employee, depending on service constraints.

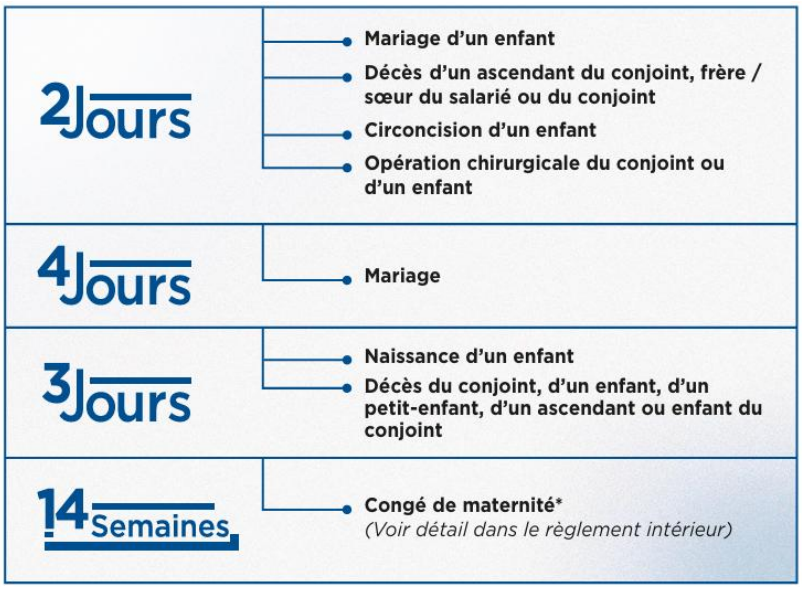

2. Leave :

UEMF staff are entitled to 24 paid working days of leave per year, at a rate of 2 days per month. All leave requests must be submitted via the Konosys HR portal, initiated by the employee, and then approved by their line manager and the Human Resources Department. The leave request must then be printed, signed, and submitted to the HR Department.

Conditions for granting annual leave:

- After 6 months of seniority;
- Leave period of five consecutive days or more;
- To be consumed during the current academic year*;
- No remaining leave balance is permitted in the following academic year;
- Annual leave must be taken in several periods. It cannot be taken all at once.

Various types of leave:

*breastfeeding hoursFollowing her maternity leave, the employee is entitled to one hour of breastfeeding per day for a period of 12 months. She is required to inform her line manager and the Human Resources Department of her chosen schedule.

Calendar of days in Morocco:

The University respects the national calendar of public holidays, which includes both civil and religious holidays.

Here is an indicative list of public holidays:

Civil holidays (fixed dates)

Date	Fête
1er janvier	Nouvel An
11 janvier	Manifeste de l'Indépendance
14 janvier	Nouvel an amazigh
1er mai	Fête du Travail
30 juillet	Fête du Trône
14 août	Récupération d'Oued Ed-Dahab
20 août	Révolution du Roi et du Peuple
21 août	Fête de la Jeunesse
6 novembre	Marche Verte
18 novembre	Fête de l'Indépendance

Religious holidays (dates vary according to the lunar calendar)

Fête
Aïd al-Fitr (fin du Ramadan)
Aïd al-Adha (fête du sacrifice)
1er Moharram (Nouvel An de l'Hégire)
Maoulid (Naissance du Prophète)

3. Absence :

Any lateness or absence must be justified by the employee within 48 hours of the first day of absence, to their line manager, copying the HR department. Failure to provide justification will result in the absence being considered job abandonment.

Furthermore, any absence during working hours must be authorized by a request for leave, duly approved and signed by the line manager. This authorization may not exceed two hours per day and four hours per week.

4. Mission order:

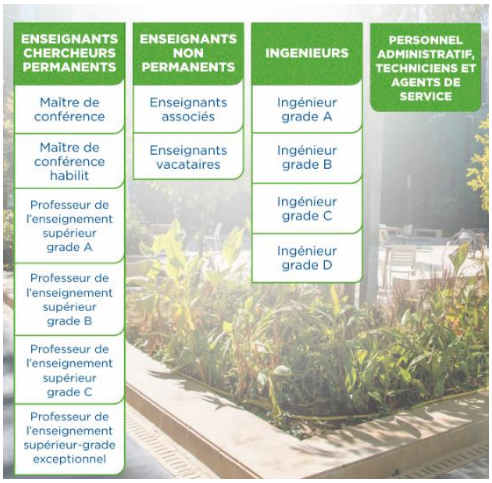

Any University employee undertaking travel, whether national or international, in the course of their duties must be in possession of a mission order prepared and signed in advance by their immediate supervisor and the President of the University. A copy of every mission order, regardless of its type, must be filed with the Human Resources Department.

5. Payroll:

Salary at UEMF includes a base salary, plus taxable and non-taxable allowances. Pay is made monthly by bank transfer at the end of each month.

The remuneration of each employee is determined on the basis of the salary scale in force at UEMF, according to grade, diplomas, nature of employment, training courses attended and professional experience related to the position held.

6. Employee benefits:

- **Retirement**

In addition to the CNSS (National Social Security Fund), UEMF employees benefit, from their first day of employment, from a supplementary pension scheme called RMA (a capitalization-based scheme, meaning that employees can withdraw part of their pension whenever they wish). This scheme involves a 3% contribution from the employee and a 3% contribution from the employer.

Furthermore, employees have the option, upon hiring, to join the CIMR retirement plan, with a contribution of 6% paid by the employee and 7.8% by the employer, of which 1.8% covers administrative costs. This choice is final and cannot be changed later.

Supplementary pension: To benefit from the RMA supplementary pension, employees must complete the membership form and the identification form.

- **Health and insurance**

All employees are covered by mandatory health insurance (AMO). In addition, UEMF has taken out private health insurance for its staff with the company RMA. Here is some useful information to note:

RMA health insurance:

- coverage rate: 90%;
- The treatment forms are available from the Human Resources Department or can be downloaded via the RMA Santé platform;
- the forms must be completed and signed by the appropriate person for all medical acts, and all supporting documents must be provided (prescription, leaflet, barcode, PPV, invoice, results of analyses, etc.);
- Complete applications must be submitted to the Human Resources Department;
- The deadline for submitting medical records is set at three months from the date of the first treatment;
- Each employee can create their client space on the RMA platform in order to follow the processing of their medical claims (see the internal note relating to medical coverage).

- **Mohammed VI Foundation**

All UEMF employees with permanent contracts are automatically registered with the Mohammed VI Foundation for the Promotion of Social Works in Education and Training after one year of service. The monthly contribution is set at 50 DHS for employees whose gross salary exceeds 5,000 DHS, and at 20 DHS for those whose gross salary is equal to or less than this amount.

Membership in the Foundation offers numerous social benefits, such as:

- access to medical services in partner clinics at preferential rates;
- assistance with the purchase or construction of housing;
- scholarships and school grants for the children of members;
- stays in discounted holiday centers;
- social loans at advantageous rates.

Employees must complete the membership forms and submit their complete file to the Human Resources Department.

- **Bonuses**

Wedding bonus: a marriage bonus of a net amount of 15,000 dirhams will be granted to couples made up of UEMF staff members who were tenured on the date of their marriage.

Disability allowanceEmployees with a child with a disability receive a monthly bonus of 1,000 dirhams net, subject to the presentation of a supporting medical file.

Birth bonus:A birth bonus of a net amount of 2,000 dirhams will be granted for each birth of a child.

Publication bonusn: Publication bonus of 8000 DH per article (starting with the 2nd article) to be shared between the co-authors. This bonus increases to 200,000 DH for articles published in the journals "Nature" and "Science".

Patent premium:A bonus of 4000 DH for patents to be shared among the inventors.

Management by researchers of funds obtained from external sources: Researchers can negotiate a share for themselves regarding funds obtained from external sources.

Salary supplement related to maternity leave:The employee on maternity leave receives a salary supplement corresponding to the difference between her usual salary and the daily allowances paid by the CNSS.

E-SDG

Through all its institutions and programs, UEMF contributes to SDG 8 by developing skills directly applicable in the professional world and by supporting the evolution of professions and economic sectors. Its training programs, covering fields such as health, engineering, digital technology, architecture, design, management, finance, law, and the humanities and social sciences, promote employability, entrepreneurship, innovation, and adaptation to the changing job market.

This diversity of backgrounds makes it possible to prepare profiles capable of contributing to sustainable, inclusive economic growth based on skills and innovation.

1. Initial training leading to a diploma

Doctor of Medicine, Specialist Physician and Teacher-Researchers in Medicine.
Students enrolled at FEM have the opportunity to spend two to three semesters studying abroad. FEM offers this opportunity through the following programs:

- Exchange agreements established with our partners;
- Credit mobility agreements within the framework of the ERASMUS+ program.

Opportunities for international and intercultural internships may be offered.

2. CONTINUING EDUCATION

The FEM is progressively developing continuing education programs qualifying or diploma-granting courses, in various forms: full-time or part-time continuing education or work-study training.

3. DOCTORAL (Ph.D.) TRAINING

The doctoral program is a research-based training program culminating in the award of a Doctor of Medicine (Ph.D.) degree in Medical and Biomedical Sciences, following the defense of research work before a jury. This doctoral research training is organized at the Doctoral Studies Center in Medical Sciences at the Euromed University of Fez.

1.INITIAL DIPLOMA TRAINING

- Title of Doctor of Dental Medicine after six years of training.

- Possibility of an exchange semester during the professional immersion internship in partner Euro-Mediterranean establishments or within the framework of the mobility agreements provided for by the ERASMUS+ program.

2. CONTINUING EDUCATION

- A rich and diverse continuing education offer that meets the training needs of dentists;
- Updating their knowledge and strengthening their skills;
- Continuous adaptation to the digital transformation linked to technological progress.

Euromed Faculty of Pharmacy

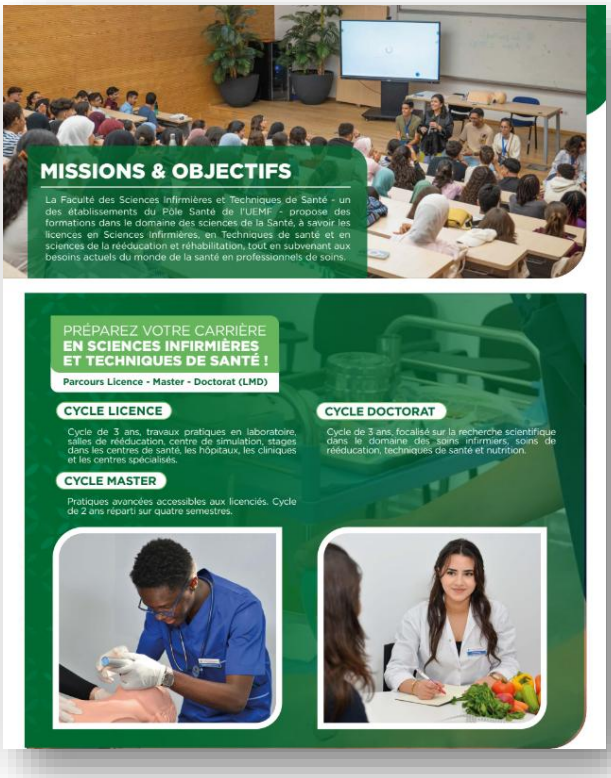

The Euromed Faculty of Pharmacy (FEP), a component of the Euromed University of Fez, offers a six-year program leading to a Doctor of Pharmacy degree. This program is part of a strong international strategy, based on structured academic collaborations with European universities, promoting student and faculty mobility, particularly within the Erasmus+ program, as well as the development of joint programs, double degrees, and collaborative research projects. This degree opens doors to numerous promising careers, particularly in the following sectors:

- The pharmaceutical industry,
- The hospital pharmacy,
- The pharmacy,
- Pharmaceutical R&D.

The Euromed Faculty of Pharmacy (FEP) offers a comprehensive program designed to train dedicated pharmacists capable of addressing current healthcare challenges under optimal safety conditions. The Doctor of Pharmacy degree is recognized by the Moroccan state, and the FEP aims to develop dual degree programs with European universities, fostering a dynamic of international collaboration.
The training program is based on innovative teaching methods that integrate artificial intelligence, data analysis, and biotechnology to improve treatment effectiveness and the quality of care. Furthermore, the FEP offers international mobility opportunities through academic exchanges, the Erasmus+ program, and internships abroad.

FACULTY OF NURSING AND HEALTH TECHNOLOGY

1. Sectors:

- MULTI-SKILLED NURSE
- Anesthesia and Resuscitation Nurse
- SPEECH THERAPIST
- PSYCHOMOTOR TRACKER
- DIETETICS - NUTRITION
- LABORATORY TECHNIQUES
- RADIOLOGY TECHNIQUES

2. LMD pathway:

- BACHELOR'S DEGREE PROGRAM:

3-year cycle, practical work in laboratory, rehabilitation rooms, simulation center, internships in health centers, hospitals, clinics and specialized centers.

- MASTER'S PROGRAM:

Advanced training accessible to licensed students. Two-year program divided into four semesters.

- DOCTORAL PROGRAM:

A 3-year program focused on scientific research in the fields of nursing, rehabilitation care, health techniques and nutrition.

1. INTEGRATED PREPARATORY CYCLE (2 YEARS)

This program prepares students with the essential foundations for success in engineering fields. It enables them to:

- Acquire solid scientific knowledge: mathematics, applied physics, chemistry, cell and molecular biology.
- Mastering digital and computer tools for modeling, simulation and analysis.
- Developing transferable skills: scientific communication, collaborative work, management of project and professional ethics.
- To be introduced to research and innovation through integrative projects and practical internships.

3. ENGINEERING PROGRAM (3 YEARS)

Field of study: Biomedical Engineering

Objective: To train engineers capable of designing and maintaining medical devices, utilizing imaging and robotics technologies, and proposing innovative solutions to improve the patient journey.

Field of study: Biotechnological Engineering

Objective: To prepare students to design, develop and supervise biotechnological processes, develop innovative products and ensure compliance with standards and regulations.

Field of study: Bioinformatics Engineering

Objective: To train engineers capable of analyzing and modeling biological data, developing digital tools for health and integrating artificial intelligence into biomedical practices.

1. PREPARATORY CYCLE

The Integrated Preparatory Cycle at the School of Digital Engineering and Artificial Intelligence is designed to provide students with in-depth scientific and technical training, enabling them to access the various digital engineering tracks. This program combines courses in computer science, electronics, applied mathematics, and humanities and social sciences, in order to lay a solid foundation for the rest of their studies in the engineering cycle.

2. ENGINEERING PROGRAM

Sectors:

- Artificial Intelligence (AI)
- Robotics and Cobotics
- Big Data Analysis
- Information Technology and Cybersecurity
- Full Stack and Multimedia Engineering

3. MASTER'S PROGRAM

ICT Security and Artificial Intelligence (dual degree program with George Washington University)

1. ARCHITECT'S CYCLE: Architect's Degree (Bac +6)

The diploma obtained through this program is an architecture degree with Moroccan recognition and accreditation:

2. BACHELOR'S DEGREE PROGRAM: Bachelor's degree in Design (3 years post-high school)

The EMADU Design degree is designed to train designers capable of creatively managing, beyond the object, decision-making processes, mediation and the integration of multidisciplinary contributions; thus enabling graduates to work across a very wide range of sectors.

3. MASTER'S PROGRAM: Master in Global Design (Bac+5)

EMADU offers an innovative, multidisciplinary and internationally open training program, promoting practical learning, critical thinking, innovation and the development of skills necessary for design professions.

1. ENGINEERING PROGRAM

- Civil engineer
- Industrial Engineer
- Energy and Environmental Process Engineer
- Mechanical, production and thermal engineering engineer
- Engineer in Electronics, Electrotechnics and Automation
- Telecommunications Engineer

2. MASTER'S PROGRAM

- Master's degree in logistics and supply chain engineering
- Master's degree in environmental engineering and water management
- Master's degree in entrepreneurial support and technological management
  - Master in Sustainable Energy (double degree with the University of Surrey - UK)
  - Executive master in logistics and supply chain
  - Executive MBA in Healthcare Supply Chain Management

DOUBLE DEGREES INTERNATIONAL MOBILITY

1. BACHELOR'S DEGREE PROGRAM

The Bachelor's degree in Political and Legal Sciences offers a multidisciplinary education in social sciences, law, and political science. After a common core curriculum in the first two years, students choose a specialization in either political science or legal sciences. It prepares students for Master's level studies as well as careers in public administration, local government, research and consulting, communications, journalism, and the non-profit sector. The third year is dedicated to a selective international exchange program.

2. MASTER'S PROGRAM

At the Master's level, the Institute offers a diverse range of courses in political science and legal science, with several specializations:

- Master's Degree in Mediterranean and African Politics –double degree with the University of Paris 1 Panthéon-Sorbonne
- Master's Degree in Conflict Management and the Alliance of Civilizations
- Master of Economic and Social Administration– relocated from the University of Toulouse Capitole
- Master's Degree in Business Law– Sorbonne Law School
- Master's Degree in Digital Law
- Master's Degree in Sports Law

3. DOCTORAL CYCLE

Graduates of Masters programs in political science and law with a research profile could apply to pursue doctoral studies with the possibility of joint supervision with the University of Paris 1 Panthéon-Sorbonne.

1. BACHELOR'S DEGREE PROGRAM

- Bachelor's Degree in Translation
- Bachelor's Degree in Social Sciences and Health Management

2. MASTER'S PROGRAM

- Master's Degree in Corporate and Institutional Communication
- Master's degree in Translation Studies
- Master's Degree in Clinical Psychology and Psychotherapy
- Master's Degree in Applied Foreign Languages (LEA): Intelligence and Ecosystems
- Innovators in Europe (Double degree program with the University of Strasbourg)

3. DOCTORAL PROGRAM

The top graduates of the Master's program are admitted to the doctoral program at UEMF or a partner university, receiving a monthly stipend. Research in the humanities and social sciences focuses on eight main themes:

- Heritage and heritage-making in Euro-Mediterranean societies;
- Mobility in the Euro-Mediterranean area;
- Euro-Mediterranean cities and societies;
- The Shattered Museum, a new approach to heritage mediation;
- Teaching Spanish as a foreign language;
- Language teaching and interculturality;
- A chair in "Human Rights" in partnership with the CNDH;
- Social sciences applied to environmental management

1. Preparatory Classes in Business and Management

The two preparatory years in Commerce and Management provide a solid foundation in economics, management and organization, while developing analytical, critical thinking and problem-solving skills, before choosing a specialized track at EBS.

2. Grande École Program (3 years after 2 years of higher education)

The Grande École Program (PGE) at Euromed Business School is a five-year postgraduate program designed to train senior executives and entrepreneurs through an approach focused on internationalization, entrepreneurship, digitalization, and responsibility. It leads to the DENCG diploma, with the option of a dual international degree.

Sectors :

- Finance, Audit and Performance Management (FAPP)
- International Business Management (IBM)
- Human Resources and Digital and Societal Transformations (HRTS)
- E-Marketing and Digital Communication (EMCD)

3. MASTER'S PROGRAM

Sectors :

- Accounting, Control and Auditing (CCA)
- Actuarial Science and Financial Engineering (SAIF)

Research, Innovation & Entrepreneurship

Research Topics - Doctoral Cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 8 has been identified. This work focuses in particular on employment, human resource management, entrepreneurship, finance, digital transformation, industrial performance, economic innovation, and sustainable tourism.

The table below presents the main research topics contributing to this objective.

Thesis Subject	related SDGs
Development of High-Surface and Corrosion Resistance of 3D Printed H13 by Additive Manufacturing	SDG 8
NLP-Based Detection of Insider Threats and Prevention of Data Breaches	SDG 8
Human Resources in Healthcare in Morocco: Public Health Challenges and Solution Approaches	SDG 8

[Opinion Piece] From "Made in Morocco" to "Trade via Morocco": how the Kingdom is reshaping global trade routes

The "Made in Morocco" label has long symbolized an emerging industrial pride. Textiles, leather, and later automobiles and aeronautics, were the showcases of this productive Morocco. But by 2025, this label is no longer enough to reflect the Kingdom's ambition.

The country is not just a manufacturing hub: it is becoming a logistical and strategic crossroads, at the heart of the reshaping of global trade flows. This profound transformation signals the shift from "Made in Morocco" to "Trade via Morocco," reflecting a deliberate repositioning.

3e and last Tech4Farmers Bootcamp of the 2e Cohort

From September 23 to 25, 2025, the Euromed University of Fez, via the Euromed Innovation Center, hosted the third and final bootcamp of the Tech4Farmers – Tamkin LiTanmia program, intended for AgriTech project leaders of the second cohort.

Organised as part of the programme funded by the AFD, this bootcamp focused on business maturation, pitching and preparation for fundraising, through workshops, mentoring and exchanges with experts.

It marks the end of the incubation cycle and confirms UEMF's commitment to innovation and impact entrepreneurship in the service of sustainable agriculture in the Fes-Meknes region.

Entrepreneurship Awareness Day – STARTECH 3ᵉedition

On November 13, 2025, the Euromed University of Fez (UEMF) organized an entrepreneurship awareness event as part of the 3rdᵉedition of the STARTECH Call for Projects.

The program includes: presentation of entrepreneurial opportunities in Morocco, exchange with local entrepreneurs, intervention by Bank of Africa on project financing and an introductory workshop on design thinking.

Intended for 3rd grade studentsᵉ4ᵉand 5ᵉOrganized this year by students from EBS, EIDIA and EIB, this activity brought together 200 participants and aimed to promote innovation and initiative.

Tech4Farmers Demo Day: closing of the second cohort

Organised by the Euromed Innovation Centre, the AgriTech Demo Day marked the closing of the second cohort of the Tech4Farmers programme, after 12 months of incubation of innovative startups within the framework of the AgriTech Regional Innovation and Entrepreneurship Hub.
The event allowed project leaders to present their solutions to an ecosystem composed of investors, institutional investors, researchers and agricultural professionals, fostering concrete opportunities for collaboration and deployment.
With the participation of partners such as the French Development Agency and major players in the sector, this initiative illustrates the commitment of the Euromed University of Fez to sustainable agricultural innovation with environmental impact..

The Mentorship Programme – MedYouth Lab 2025, organised at UEMF from October 2025 to January 2026, supported young project leaders in structuring and implementing their initiatives.
Through three phases (strategic clarification, benchmarking and validation of the action plan), the Seeds of the Future, Aispire and The Meridian Initiative projects benefited from a strengthened logical framework, better strategic direction and preparation for pilot deployment and funding.

Source: ACTIVITY REPORT OF THE DIRECTORATE OF SOCIO-ECONOMIC PARTNERSHIPS AND ENTREPRENEURSHIP 2025-2026

From Fes-Meknes to Berlin: our AgriTech startups meet international markets.

From Fes-Meknes to Berlin: our AgriTech startups meet international markets.

From February 4 to 6, as part of the Tech4Farmers incubation program of the Euromed innovation center (EIC), the Euromed University of Fez accompanied six partner startups to the international trade fair FRUIT LOGISTICA 2026 in Berlin, one of the world's largest events dedicated to the fruit and vegetable sector.

A true strategic space for exchanges and opportunities, this event allowed startups to present their innovative solutions, meet international buyers, exchange with manufacturers and better understand the dynamics of a constantly evolving global market.🌎.

Objectives achieved: qualified connections, concrete business opportunities, and enhanced visibility for Moroccan AgriTech on a demanding international stage. The teams were thus able to generate their first international leads, engage in advanced discussions with European distributors, and consolidate their positioning with key players in the sector.

National Hackathon – ActIn Space 6th Edition

On January 30 and 31, 2026, the UEMF hosted the 6th edition of the national ActIn Space Hackathon, an international competition dedicated to the applications of space technologies.

Following preparatory webinars and technical and entrepreneurial workshops, the teams presented their projects in a final pitch. The AtlasSpace team was selected to represent Morocco in the international phase in Bordeaux.

The event brought together 28 participants divided into 8 teams, reinforcing the dynamics of innovation and technological entrepreneurship within the UEMF.

AI Ramadan Hackathon: Innovation and skills at the service of local development

The Euromed University of Fez hosted the Ramadan AI Hackathon, a national initiative aimed at transforming innovative ideas into concrete solutions based on artificial intelligence. For three days, students, young professionals, and project leaders collaborated in a multidisciplinary setting, guided by mentors, to develop prototypes addressing local challenges. The event fostered skills development, responsible innovation, and entrepreneurship, culminating in final presentations before a jury that allowed participants to showcase their solutions and receive feedback for their development.

Hack'Days 2026: Stimulating regional innovation and entrepreneurship

The Euromed Innovation Center (EIC) has launched the Hack'Days 2026 call for projects, in partnership with TAMWILCOM through the InnovInvest fund and Blue Space by Bank of Africa. This initiative targets project leaders, teams, and startups in the Fes-Meknes, Drâa-Tafilalet, and Oriental regions, aiming to structure and accelerate the development of innovative solutions. Ten projects from each region will be selected to participate in the bootcamp, and three projects will receive post-bootcamp support. This initiative strengthens the regional dynamic of innovation and entrepreneurship by supporting the creation of concrete and competitive solutions.

Artificial intelligence and digital transformation: towards a new development paradigm

On the occasion of the signing of the JAZARI Industry X.0 agreement, Ms. Amal El Fallah Seghrouchni, Minister Delegate to the Head of Government in charge of Digital Transition and Administrative Reform, shared a testimony about the major technological changes that are transforming our societies today.

Through this intervention, she notably revisits the rise of artificial intelligence and its role in digital transformation, while highlighting the opportunities it offers to rethink professional practices, encourage innovation and open up new perspectives in many sectors.

An inspiring look at the challenges and potential of a constantly evolving world, where mastering technologies and adapting to new digital environments become essential levers for building the future.

Ramadan AI Hackathon: UEMF projects distinguished at the regional and national level.

As part of the RamadanIA program, supported by theMinistry of Digital Transition and Administrative ReformThe Euromed University of Fez hosted the Fez-Meknes regional final, bringing together students, project leaders and young entrepreneurs around artificial intelligence solutions applied to territorial challenges.

At the end of this stage, two projects from the UEMF community stood out: 🥇 GaiaEye – Grand Prize for Regional Excellence. 💡 Audacity Alwarid – Innovation & Creativity Award.

These projects then represented the region at the national hackathon in Rabat, bringing together the best teams from the Kingdom's 12 regions. At this event, the Audacity Alwarid project distinguished itself once again, winning 2nd prize nationally, as well as the Jazari Jury's Choice Award, confirming the relevance and impact of its solution in the field of digital healthcare transformation.

Congratulations to our students. Lamiae HADI,Nada E.,Ahlam TARK,Chaimae OuarabAndHamel GOUNGOU, for their commitment, their creativity and the quality of the work accomplished through this project.

[Opinion] Fertilizers under pressure: Morocco as a backup route for Asia?

Since the closure of the Strait of Hormuz, the global fertilizer supply has been under strain. After the United States, it is now India's turn, a major agricultural power, to express its interest in Moroccan fertilizers. Thanks to its geographical location and the possibility of bypassing the Red Sea via the Cape of Good Hope in South Africa, Morocco could offer an alternative in this crisis.

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF.Euromed innovation center (EIC)organized, in partnership withTAMWILCOMvia the InnovInvest Fund and BlueSpace (Bank of Africa), on April 16 and 17, the Hack'Days of the Fes-Meknes region, bringing together students, project leaders and young entrepreneurs around an intensive bootcamp dedicated to the creation and development of innovative solutions.

As part of a dynamic of supporting high-potential talent, this program aims to support the emergence of projects in strategic sectors such as digital, health, agritech, cybersecurity, greentech, fintech or edtech, thus contributing to the development of the regional entrepreneurial ecosystem.

Over the course of two days, participants were supported in structuring their ideas, designing concrete solutions and preparing their projects, in an environment conducive to experimentation, collaboration and collective intelligence.

A true space for learning and co-creation, this event allowed each team to develop their project, benefiting from constructive feedback, dedicated mentoring and guidance that fosters the maturation of entrepreneurial initiatives. The Hack'Days concluded with pitch sessions, offering participants the opportunity to present their projects, compare their ideas and reveal their full potential, in a dynamic focused on innovation and impact.

We extend our sincere congratulations to all participants for their commitment, creativity, and entrepreneurial spirit. This initiative confirms the role of the UEMF, through the Euromed Innovation Center, as a key player in structuring and supporting innovation at the regional and national levels.

Participation in SIAM: showcasing innovative initiatives in AgriTech

At the heart of agricultural innovation and AgriTech entrepreneurship in Morocco 🌱,

The Euromed University of Fez, through its Euromed Innovation Center (EIC), is participating in the 18th e SIAM edition with the Tech4Farmers – Tamkin Li Tanmia program, supported by the French Development Agency and deployed within the framework of the PRIE Fès-Meknès.

The program highlights several innovative startups (OBENS, Wasit, BOVICLOUDS, ARWA Solutions, Jodoor, DeepLeaf, Green Innovation, PCS AGRI) illustrating the potential of technology in the service of sustainable and efficient agriculture.

The stand was visited by several personalities, including the President of the Euromed University of Fez and the Director of the AFD, as well as the participation of institutional partners during the closing ceremony of the program, marking a strong moment of highlighting the results and collaborations.

This initiative brings together many key players in the agricultural and digital ecosystem in Morocco and confirms the role of the university as a driver of innovation and entrepreneurship serving the territories.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

On May 7th and 8th, 2026, theEuromed innovation center (EIC)organized the regional Hack'Days Oriental bootcamp, organized as part of the Hack'Days by Region 2026 program, supported by Tamwilcom via the Innov Invest Fund, in partnership with Blue Space by Bank of Africa.

For two days, project leaders from the Oriental region participated in intensive support designed to transform innovative ideas into structured, viable projects ready to accelerate their development.

Seven projects were selected following the initial rounds to participate in this edition and benefit from mentorship provided by experts and key players in the entrepreneurial ecosystem. Participants worked on key aspects of their projects: strategic vision, business model, market positioning, validation of the value proposition, and growth prospects.

The projects developed covered several high-stakes sectors: • Cleantech & hybrid energy • EdTech & financial education • HealthTech & drug safety • FinTech & algorithmic trading • Applied AI & cybersecurity

Beyond technical support, this bootcamp primarily created a space for meetings, reflection and experimentation where participants could challenge their ideas, share their experiences and develop their projects by interacting with experts and other entrepreneurs.

Digi-Hackathon “Mobile Health”: three days of innovation and engagement in service of youth health at UEMF

The Euromed University of Fez hosted the 4thᵉThe "Mobile Health" Digi-Hackathon, a national event dedicated to innovation in digital health and the development of technological solutions addressing public health challenges, was held in partnership with the Ministry of Health and Social Protection, the Euromed Innovation Center (EIC), and with the support of UNFPA. This hackathon placed particular emphasis on youth mental health and the prevention of psychoactive substance use.

For three days, students, experts, healthcare professionals, and project leaders collaborated in an environment that fostered innovation, entrepreneurship, and collective intelligence. The participating teams received technical and strategic support to develop innovative digital solutions tailored to the needs of teenagers and young adults.
The event also featured conferences and discussion forums on current issues in digital health and improving access to healthcare services through mobile technologies. Through this initiative, the UEMF reaffirms its commitment to socially impactful innovation, developing young people's skills, and fostering collaboration between health, technology, and entrepreneurship.

A comparative look at Morocco's development: a presentation by Mr. Mohammed Boutaleb at the UEMF

The Euromed University of Fez hosted Mr. Mohammed Boutaleb, former Minister of Energy and Mines, as part of its Conference Series. Under the theme "The Development of Morocco Seen from Different Angles," he shared his experience and analyzed the main economic, social, and territorial challenges facing the Kingdom.

He highlighted the ongoing structural transformations as well as the importance of sustainable, inclusive development adapted to local realities.

The conference proved to be an enriching experience for the students, fostering learning and dialogue. It concluded with an interactive exchange, and UEMF thanked Mr. Boutaleb for his inspiring presentation, consistent with its mission to educate engaged citizens.

Arbitration Market: Lecture by Professor Walid BEN HAMIDA

The Euro-Mediterranean University of Fez (UEMF) had the honor of hosting Professor Walid BEN HAMIDA, an eminent academic and university professor in France, for a high-level conference on the theme: "The Arbitrage Market".

This meeting is part of the UEMF's ongoing commitment to promoting intellectual openness, academic dialogue and the exchange of ideas on current issues with a strong impact.

During his presentation, Professor Ben Hamida offered a thorough and nuanced analysis of the arbitration market, addressing its legal foundations, economic mechanisms, and strategic challenges within the context of globalization and market transformation. His presentation, rich in concrete examples and comparative perspectives, enabled students to gain a comprehensive and informed understanding of the topic.

This conference also provided an opportunity for students to actively participate in the debate, asking relevant questions and sharing their thoughts. These fruitful exchanges helped strengthen their critical thinking skills and their ability to grasp the complex issues of contemporary law and economics.

The Euromed University of Fez expresses its deepest gratitude to Professor Walid Ben Hamida for the quality of his presentation, the clarity of his remarks, and the generosity with which he shared his experience. His expertise and academic commitment greatly contributed to the success of this meeting, which will remain a highlight of our students' educational journey.

Decade of Excellence: UEMF celebrates its 585 new award winners

The Euromed University of Fez celebrated the graduation of its tenth class, bringing together more than 2,000 people to honor 585 graduates: 267 engineers, 125 architects and designers, and 193 graduates in Business, Law, Political Science, and Humanities and Social Sciences. The ceremony highlighted the students' perseverance, the support of their teachers and families, and the university's commitment to its youth. Academic, diplomatic, and institutional figures were in attendance. In his address, President Professor Mostapha Bousmina encouraged the graduates to transform obstacles into opportunities. The event celebrated not only academic achievement but also the promise of a generation ready to innovate and contribute to progress.

3e Euromed Career Day edition: a success in the service of employability

The 3e eedition of the'Euromed Career Day s'is heldhasL'The Euromed University of Fez, bringing together more than 400 students and over 20 companies from various sectors, facilitated more than 1,100 interviews, fostering direct exchanges and concrete professional opportunities.

A plenary conference on the theme "University-Business: a strategic alliance for the future" highlighted the importance of dialogue between the academic and professional worlds to strengthen the employability of students.

This initiative illustrates UEMF's commitment to supporting its students towards successful professional integration adapted to market requirements.

The unlikely rise of a Moroccan tech multinational: the HPS case in the face of the changing landscape of digital payments

The unlikely rise of a Moroccan tech multinational: a look back at a conference at the heart of the changes in digital payment. As part of our Conference Series, we organized a meeting entitled: "The unlikely rise of a Moroccan tech multinational: the HPS case in the face of the changes in digital payment", moderated by Mr.Mohamed Horani, Chairman and CEO ofHPSand member of the Board of Directors of the Euromed University of Fez.

Through this meeting, the speaker offered an in-depth analysis of the growth trajectories of Moroccan technology companies, putting into perspective the structural transformations of the digital payment sector, marked by an acceleration of innovations and an intensification of competition on a global scale.

Drawing on his experience leading a key player, he shared concrete feedback on development strategies, innovation choices and internationalization dynamics that enabled HPS to establish itself as a global leader, while maintaining a strong Moroccan presence.

The conference also provided an opportunity to explore the changes in the fintech sector, addressing the challenges related to the digitalization of payments, the evolution of uses and the adaptation of business models in a constantly changing environment.

Rich in exchanges and perspectives, this meeting highlighted the essential levers for the success of technology companies, while emphasizing the strategic role of innovation, vision and adaptability in the development of leading companies on an international scale.

Euro-Mediterranean dialogue and youth engagement for a sustainable future

During Kaja Kallas' official visit to the Euromed University of Fez, a conference and interactive exchange were organized for students of various nationalities. This meeting addressed several key themes related to international security, regional stability, Euro-Mediterranean dialogue, and the central role of youth in building a sustainable and inclusive future.

The discussions highlighted the importance of education, international cooperation, and civic engagement in promoting peace and sustainable development. Through this initiative, the UEMF strengthened its role as a space for intercultural dialogue and strategic reflection, while also promoting the active participation of young people in global transformation.

Conference: Training the healthcare professionals of tomorrow for a more resilient Moroccan healthcare system

The UEMF had the honor of welcoming Professor El Houssaine Louardi, a physician specializing in
anesthesia, resuscitation and emergency medicine, former Minister of Health, at a conference dedicated to the challenges of training health professionals and the prospects for the evolution of the Moroccan health system.

This meeting provided an opportunity to discuss current challenges in the health sector, the importance of multidisciplinary training adapted to contemporary medical transformations, and the strategic role of new generations of professionals in building a more efficient, innovative and resilient health system.

Through his intervention, Professor El Houssaine Louardi also shared his expertise and perspective on the changes taking place in the health sector today, while highlighting the challenges related to governance, medical innovation, research, and the development of human skills.

This conference illustrates the commitment of the Euromed University of Fez to promoting academic dialogue, openness to major societal issues and meetings between students, teachers and leading figures from different strategic sectors.

Seminars, conferences & congresses

Fez hosts the 70th e FIJET World Congress: UEMF at the heart of the dialogue between tourism and media

Fez hosted the 70th e The 10th edition of the World Congress of the International Federation of Journalists and Writers of Tourism (FIJET) brought together more than 250 professionals from 70 countries to discuss developments in tourism and the role of the media in its sustainable promotion. The Euromed University of Fez played a central role by hosting the opening ceremony and the International Forum, reaffirming its position as a space for intercultural dialogue, innovation, and scientific cooperation. The congress also highlighted the region's heritage and sustainable development initiatives, while addressing current challenges in the tourism sector, including technological innovation and the ecological transition.

At the UEMF, the 4e The Fes Restructuring Days edition brings together the leading voices of the sector

The Euromed University of Fez organized the 4th e eJournal editionees Restructuring of Fes, aeveinternational meeting dedicatedetoedevelopments in the law of companies in difficulty and modern restructuring mechanisms. Organised in partnership with the Sorbonne Law School, this meeting brought together more than 300 participants from Europe and Africa, including judges, lawyers, experts, researchers, students and professionals from the legal and economic sector.

Over two days, discussions focused on several themes related to cross-border restructuring, mechanisms for preventing business difficulties, governance, and new legal and economic resilience frameworks. The event also fostered dialogue between academic approaches and professional practices on an international scale.

Through this initiative, the UEMF confirms its commitment to academic excellence, international cooperation and the development of spaces for reflection on major contemporary legal and economic transformations.

Diplomatic institutional visit

Round table: Women's career paths: what factors shape women's professional trajectories?

The Euromed University of Fez hosted Ms. Helena Nolan, Ireland's Ambassador to Morocco, for a roundtable discussion on women's career paths entitled "Women'Career Pathways»Speakers from diverse backgrounds sharedeanalyses and expelessons on leadershipemini, the destructural changes and transformations in the world of work were discussed. The event fostered dialogue and reflection on policies and initiatives to support the development of women's talent, and highlighted the importance of sharing experiences to guide new generations. This meeting illustrates UEMF's commitment to intercultural dialogue, knowledge sharing, and the promotion of an academic culture open to the world.

Discovering the UEMF innovation ecosystem during the signing of the Jazari Industry X.0 agreement

On the sidelines of the signing of the Jazari Industrie X.0 agreement, Professor Mostapha Bousmina, President of the Euromed University of Fez, led a tour of the eco-campus in the presence of Ms. Amal El Fallah Seghrouchni and Mr. Ryad Mezzour, accompanied by their delegations.

The guests discovered the university's main scientific and technological platforms, including laboratories in engineering, robotics, artificial intelligence and 3D printing, as well as the Euromed Innovation Center (EIC) where students presented innovative projects from the Project-Based Approach (PBA).

This immersion highlighted the innovation and research ecosystem of UEMF, confirming its role as an academic platform serving the technological and industrial transformations of Morocco.

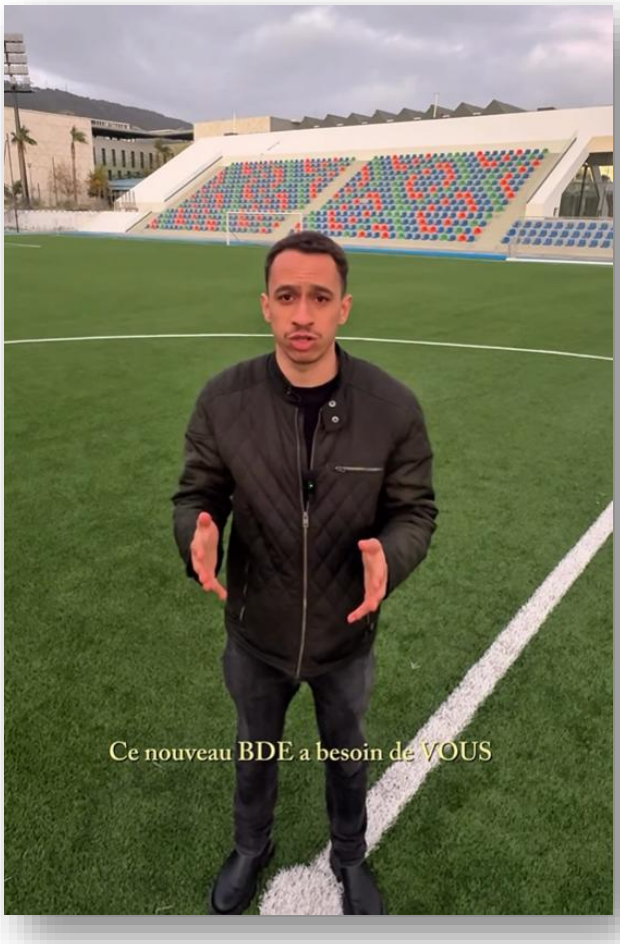

Visit to the infrastructure and innovation hubs of the UEMF

The institutional visit continued with a tour of the main facilities of the Euromed University of Fez, illustrating its integrated model based on innovation, excellence in education, and social engagement. The delegation notably visited the Euromed Sports Center, the Euromed Innovation Center (EIC), and the experimental farm of the Agritech cluster.
This immersive experience highlighted the university's efforts in developing innovative solutions, encouraging student entrepreneurship, and promoting sustainable technologies to address environmental and economic challenges. The visited facilities also demonstrated UEMF's commitment to student well-being, applied research, and the transition to a more sustainable and resilient development model.

Student events

UEMF Welcomes its New Student Union

A new chapter begins at Euromed University of Fez with the creation of the Student Union. Presented in a recent video on the university's Instagram account, this union is founded on the values of unity, solidarity, and commitment. Supported by all the student clubs, its ambition is to restore students' confidence, take concrete action, and revitalize student life, making participation and cohesion the cornerstones of university life.

Design thinking workshop – Enactus

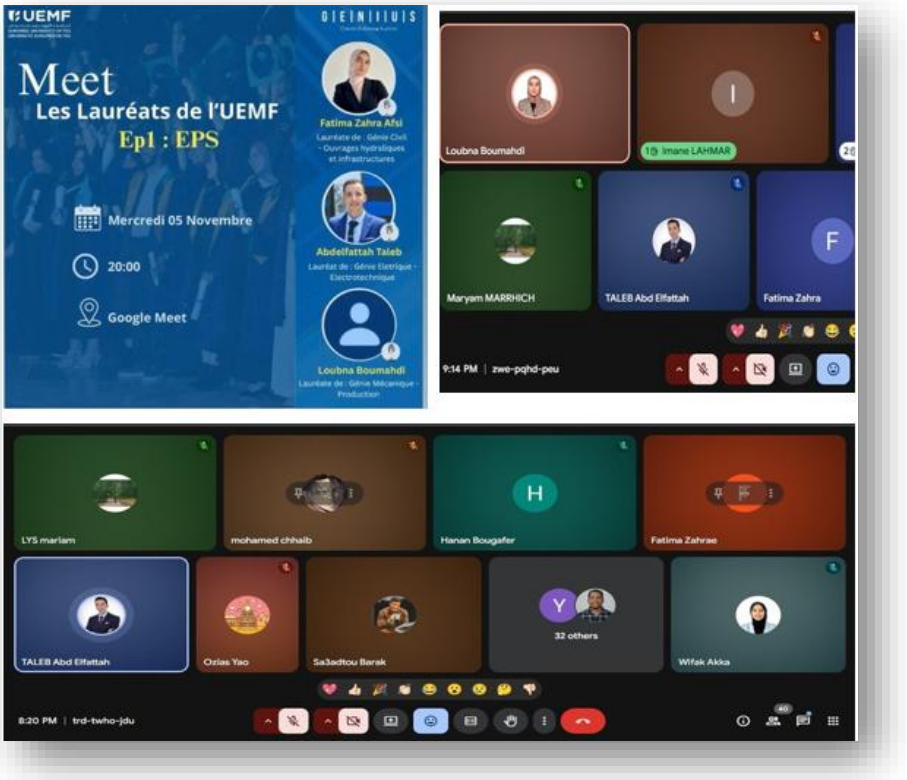

The Enactus Club organised a Design Thinking training session within the incubator, led by Omar Ameur.

This training aimed to introduce participants to the various key stages of the Design Thinking process, including empathy, problem definition, ideation, prototyping, and testing. Through an interactive and dynamic approach, students were able to understand the importance of a user-centered approach in solving complex problems.

The session also included practical workshops allowing participants to concretely experience methods of collaborative thinking, brainstorming and rapid prototyping.

Beyond theoretical learning, this initiative fostered a spirit of innovation, teamwork, and the development of essential skills in entrepreneurship and project management, thereby strengthening the culture of innovation within the student community.

Meet the alumni of EPS – Club GENIUS

The Alumni Meet was a powerful moment of sharing, inspiration, and knowledge transfer within the club. This gathering created a genuine intergenerational bridge between current members and alumni of the Euromed University of Fez (UEMF), who are now fully integrated into the professional world.

In this first episode dedicated to EPS graduates, the speakers shared their academic journeys, professional experiences, and the challenges they faced after graduation. Through authentic and inspiring stories, they offered practical advice on career guidance, preparing for the job market, skills development, and the importance of networking.

Beyond a simple exchange, this event is part of the Create. Enhance. Sustain vision:

Create: to create opportunities for dialogue and mentoring,

Enhance: to strengthen students' ambitions and skills,

Sustain: to maintain a lasting link between the university and its community of alumni.

This initiative has thus strengthened the sense of belonging to UEMF while motivating students to actively build their own professional trajectory.

Meet the Laureates – Episode 2: Spotlight on the EIDIA Laureates

The Alumni Meet – Episode 2 was a powerful moment of sharing, inspiration, and knowledge transfer within the club. This meeting created a genuine intergenerational bridge between current members and alumni of the Euromed University of Fez (UEMF), who are now fully integrated into the professional world.
In this second episode dedicated to EIDIA graduates, the speakers shared their academic journeys, professional experiences, and the challenges they faced after graduation. Through authentic and inspiring stories, they offered practical advice on career guidance, preparing for the job market, skills development, and the importance of networking.
Beyond a simple exchange, this event is part of the Create. Enhance. Sustain vision:

- Create: create opportunities for dialogue and mentorship,
- Enhance: strengthen students' ambitions and skills,
- Sustain: maintaining a lasting link between the university and its community of alumni.

This initiative has thus strengthened the sense of belonging to UEMF while motivating students to actively build their own professional trajectory.

Official launch of the Hult Prize 2025–2026 at the UEMF

The Hult Prize Club UEMF officially launched the 2025–2026 edition of the Hult Prize at the Euromed University of Fez, marking the beginning of a new entrepreneurial adventure focused on social and environmental impact. This launch event provided an opportunity to present the international competition, its objectives, and the opportunities it offers to students wishing to develop innovative, high-impact projects.

Through an interactive and dynamic session, participants discovered the principles of social entrepreneurship, the importance of responsible innovation, and the role of leadership in addressing current challenges. The discussions encouraged students to think about concrete solutions to social and environmental problems, while developing their initiative and creativity.

This initiative is part of a broader effort to promote engaged, ambitious youth who are aware of their role in building a more sustainable future.

Enactus Bootcamp: Strengthening Pitch Skills and Needs Analysis

The Enactus club organised a bootcamp in collaboration with Enactus ENCG Fès and Enactus FMDP Fès, aimed at strengthening the skills of participants in the context of entrepreneurial and social projects.

This event offered interactive sessions on Pitching, allowing students to effectively present their ideas and projects to an audience or juries, and on Needs Assessment, in order to better identify the problems of beneficiaries and design appropriate solutions.

Thanks to this bootcamp, participants were able to develop their confidence, refine their communication skills, and acquire practical tools to maximize the impact of their initiatives. This inter-university collaboration also fostered the exchange of experiences and the creation of a strong network among students engaged in social entrepreneurship.

Third Edition of the UEMF Talks: National Eloquence Competition

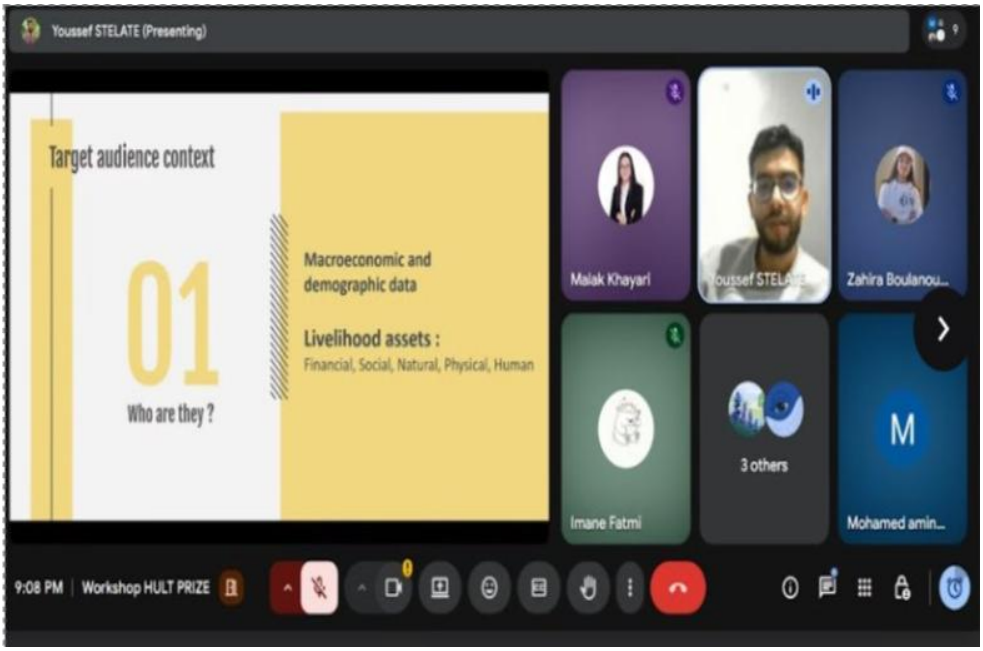

The Master of Speech Club organized the third edition of UEMF Talks, a national public speaking competition bringing together participants who speak in French, English, and Arabic. The event gathered 72 participants from 12 universities across Morocco, providing a prestigious platform to showcase talent and skills in oral communication.
This competition allowed students to demonstrate their oral fluency, creativity, and ability to persuade an audience in several languages. It also highlighted the importance of public speaking, critical thinking, and self-confidence in personal and academic development.
The UEMF Talks are a highlight for the club, reflecting its commitment to promoting excellence in communication and developing leaders capable of speaking with impact at the national level.

Hult Prize Online Workshop: Discovering Design Thinking for High-Impact Ideas

The Hult Prize Club organized its first online workshop dedicated to Design Thinking, offering participants a complete immersion in the key stages of this methodology: empathy, problem definition, ideation, prototyping and testing.
The workshop encouraged students to design innovative and high-impact solutions based on real human needs, while promoting active engagement, collaboration, and the sharing of ideas within the group.
This session enabled participants to develop their creativity, critical thinking and teamwork skills, while strengthening their understanding of user-centered innovation processes.

Second Hult Prize Online Workshop: Transforming Ideas into Viable Projects

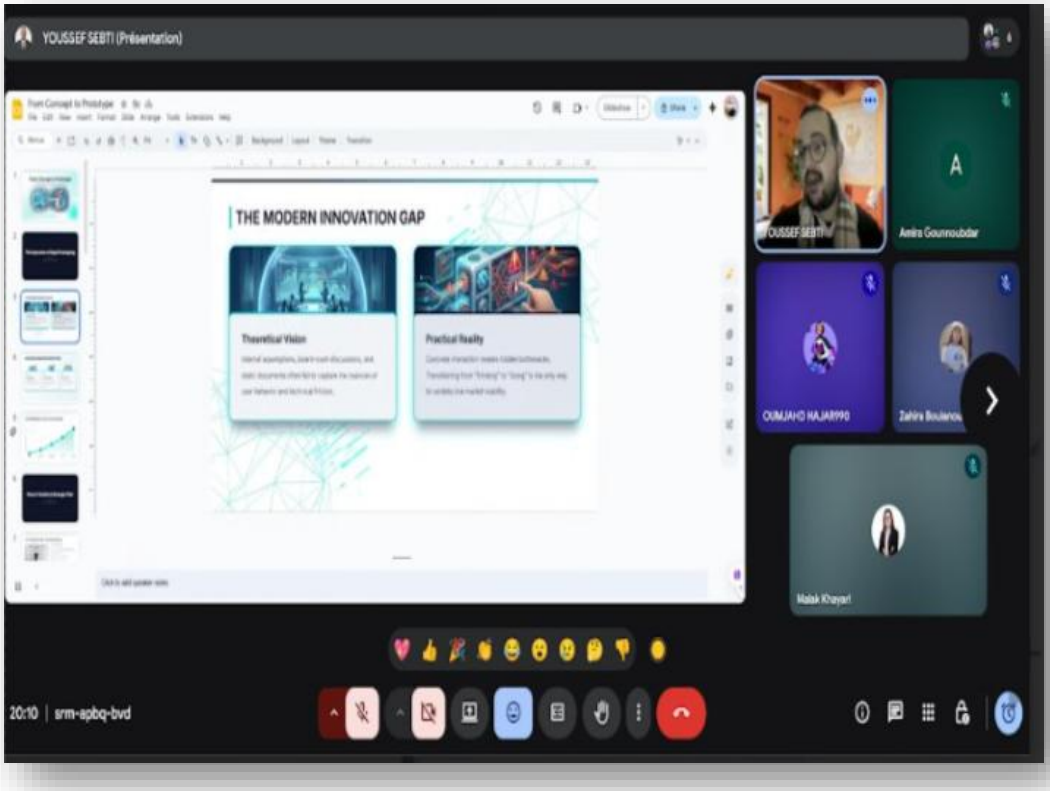

The Hult Prize Club organized its second online workshop, designed to guide participants in transforming their initial ideas into structured and viable projects.

The session combined interactive discussions and practical exercises, covering key stages such as ideation, project development, and concept refinement. Students were thus able to develop their creative thinking, their ability to analyze and structure ideas, and their social entrepreneurship skills.

This workshop provided a collaborative learning space that fostered strategic thinking and innovation, strengthening participants' commitment to creating solutions with a strong social and environmental impact.

Third Hult Prize Online Workshop: From Concept to Prototype

THEHult Prize Club organized its third online workshop, designed to support teams in prototyping their projects, transforming their ideas into concrete and testable solutions.
The participants discoveredpractical tools to structure, refine and validate their concepts, while taking part in interactive exercises, collective reflections and sharing of experience.
This session helped to strengthen thecreativity, rigor and innovative capacity of students, while effectively preparing them to present solid projects during the final Hult Prize competition.

ECG Interpretation Training led by Dr. Mohamed Amine Guessab 02/04

As part of its internal training program, the Elite Club organized, on Thursday, April 2, 2026, a training session in electrocardiogram (ECG) interpretation, led by Dr. Mohamed Amine Guessab.
The aim of this session was to strengthen the clinical skills of club members in reading and analyzing ECG tracings, an essential tool in the diagnosis of cardiovascular diseases. Through a combined theoretical and practical approach, participants acquired the fundamental principles of interpretation, as well as keys to applied clinical reasoning.
This initiative reflects the Elite Club's commitment to promoting excellence, capacity building, and skills development among its members by offering high-quality training led by experienced healthcare professionals. It also demonstrates the club's dedication to effectively preparing its members for the challenges they face in the field, particularly during medical caravans and community health initiatives.

On April 16, 2026, the Elite Club of the Euromed University of Fez organized an inspiring workshop entitled "SDG Challenge: From Idea to Impact," led by Hamid Taghlaoui. The workshop aimed to raise students' awareness of the importance of the Sustainable Development Goals (SDGs) and to encourage them to transform their innovative ideas into projects with concrete impact.

Through interactive discussions, case studies, and practical advice, participants were able to discover the various stages involved in designing, structuring, and developing initiatives with social, environmental, and economic objectives. Mr. Hamid Taghlaoui's presentation also highlighted the role of governance, leadership, and citizen engagement in the success of sustainable projects.

This workshop provided a space for inspiration, reflection and creativity, strengthening the entrepreneurial spirit and commitment of students to more inclusive and sustainable development.

Partnership

Launch ceremony of the Audencia Executive MBA – UEMF

It was in an atmosphere that was both friendly and full of ambition that the Audencia – UEMF Executive MBA was launched, in the presence of Mr. Taoufik OUAZZANI CHAHDI, Director of the EMBA program and Advisor to the President of UEMF, Ms. Khadija Essafi, Vice-President in charge of Academic and Cultural Affairs at UEMF, and Dr. Valérie Claude-Gaudillat, Head of MSc Business Strategy & Consulting and Professor of Strategy at Audencia, on the occasion of welcoming a first cohort with very diverse profiles.

The result of a collaboration between Audencia Business School (ABS) and the Euromed University of Fez (UEMF), this program of excellence is deployed at UEMF and leads to the awarding of a double degree; the Audencia – UEMF Executive MBA, holder of the triple AMBA, EQUIS and AACSB accreditation, as well as a degree awarded by the Euromed University of Fez.

Designed to support decision-makers in a constantly evolving environment, the Audencia-UEMF EMBA aims to train leaders capable of thriving in complex and uncertain contexts. The program develops a comprehensive understanding of management, combining strategic vision, agility, and the ability to transform, in order to support the creation of sustainable performance.

A new step for high-level executive education, serving leadership and academic excellence.

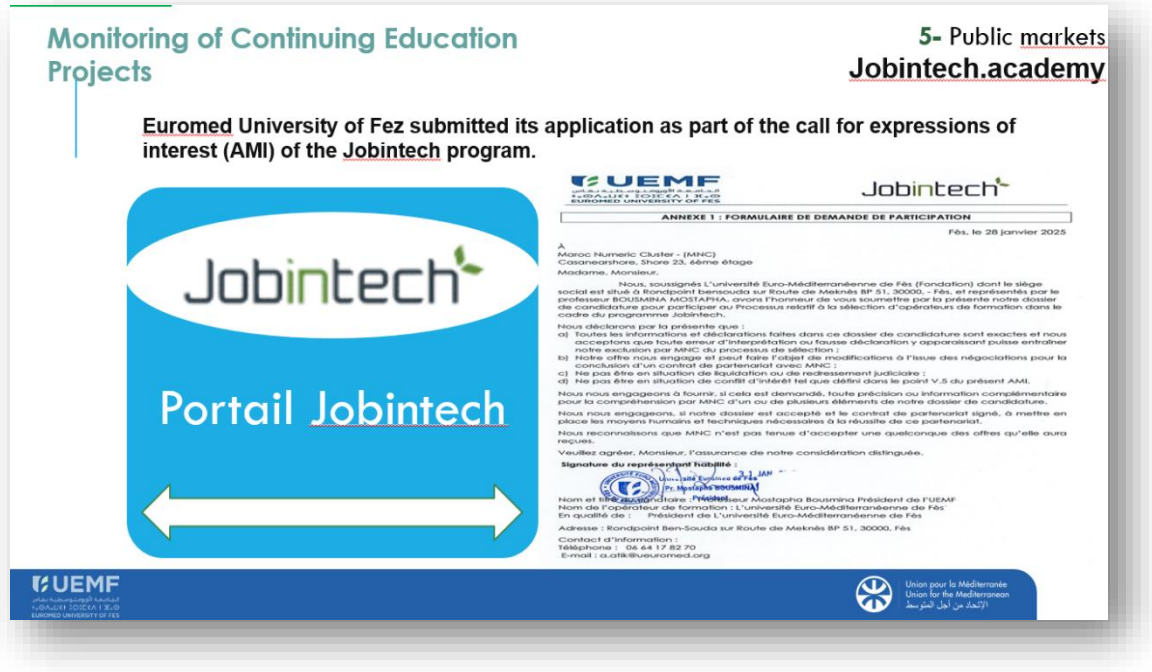

The UEMF hosts the 6th e Meeting of the Board of Directors of the Green H2 Morocco Cluster

On January 23, 2026, the Euromed University of Fez hosted the sixth meeting of the Board of Directors of the Green H2 Morocco Cluster, highlighting its leading role in research and innovation in strategic sectors related to the energy transition. Prior to the meeting, participants toured the university's facilities, including sports facilities, laboratories in civil engineering, mechanics, biotechnology, and chemistry, as well as the ideation incubator and the Fez Smart Factory, demonstrating UEMF's capabilities in research and technology transfer.

The meeting focused on analyzing the Cluster's financial and organizational situation, reviewing activities, future development, and strengthening governance, within a context favorable to green hydrogen. The event illustrates the UEMF's commitment to supporting innovation, institutional partnerships, and the development of future-oriented sectors in Morocco, particularly in renewable energies.

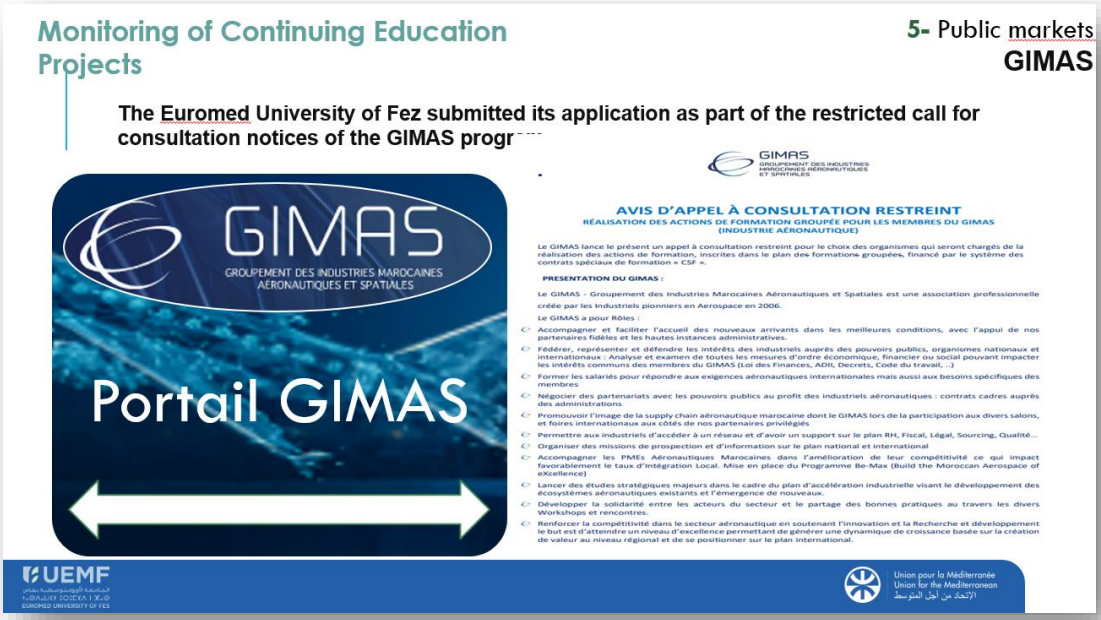

Application to the Call for Expressions of Interest – JobInTech Program (MNC)

On January 28, 2025, the UEMF, represented by its President, Professor Mostapha Bousmina, officially submitted its application to the Call for Expressions of Interest (CEI) launched by Maroc Numeric Cluster (MNC) within the framework of the national JobInTech program. This application, addressed directly to MNC and signed by the President of the UEMF, commits the university to providing the human and technical resources necessary for the success of a potential partnership. The proposal, completed on April 18, 2025, was deemed eligible and selected by the evaluation committee, thus placing the UEMF among the officially listed providers participating in the JobInTech program. This program aims to train qualified digital professionals to meet the regional needs of the digital job market. The actual allocation of training will be determined later in consultation with the JobInTech Monitoring Committee, according to a defined schedule. This selection represents strong institutional recognition of the quality and relevance of UEMF's training offerings in the field of information and digital technologies.

Application for the Restricted Tender – GIMAS Programme (Aerospace Industry)

UEMF submitted its application in response to the Restricted Call for Tenders issued by GIMAS (Groupement des Industries Marocaines Aéronautiques et Spatiales), a professional association founded in 2006 by pioneering aerospace industry leaders in Morocco. This call for tenders concerns the delivery of group training programs for GIMAS members, financed through Special Training Contracts (CSF), which are part of the group training plan. GIMAS's mission is to support industry players, advocate for their interests with public authorities, train employees to meet international aerospace standards, and strengthen the competitiveness of Moroccan aerospace SMEs, particularly through the Be-Max Program (Build the Moroccan Aerospace of Excellence). By responding to this call, UEMF affirms its strategic positioning as an essential player in vocational training in high value-added industrial sectors, and its desire to actively contribute to the development and competitiveness of the Moroccan aeronautical industrial fabric at the national and international level.

CFG Bank's Positive Response – Future Managers Training Program

UEMF developed and proposed to CFG Bank a customized training program designed to develop the managerial and strategic skills of the bank's next generation of executives. CFG Bank responded favorably to this initiative, thus validating the relevance and quality of the pedagogical approach proposed by UEMF. This approval demonstrates the recognition by a major player in the Moroccan financial sector of UEMF's ability to design continuing education programs perfectly tailored to the specific requirements of the banking world. This partnership is part of the university's proactive approach to supporting major Moroccan companies in developing the skills of their human resources and contributes to strengthening human capital within private financial institutions, a key factor in their competitiveness and sustainable development.

Executive Training Programme on Sustainable Social Finance – UNFPA

The UEMF submitted its application to the Executive Training Programme on Sustainable Social Finance and Blended Finance Mechanisms, an initiative fully funded by the United Nations Population Fund (UNFPA). This ambitious program was structured into five cohorts targeting distinct audiences: Civil Society, Government, the Private Sector, the Media, and Academia, for a total of 140 participants. Each cohort followed a modular program covering an introduction to sustainable social finance, blended finance, social bonds and Sukuk, Social Return on Investment (SROI), and tools and methodologies for designing impactful projects. All sessions took place between October and November 2025, culminating in an official closing ceremony on January 16, 2026, at the Bouregreg Palace in Salé, as part of the GIB project aimed at empowering vulnerable girls, particularly NEETs (Not in Education, Employment, or Training). This achievement illustrates UEMF's ability to design and deploy large-scale national certification training programs in partnership with major UN agencies.

Training Plan of the Fes-Meknes Regional Council (CRFM) – Strengthening Administrative and Technical Skills

The UEMF actively participated in the implementation of the 2025 Training Plan of the Fes-Meknes Regional Council (CRFM), aimed at strengthening the administrative and technical skills of the staff of this regional public institution. This process began with an in-depth diagnostic phase conducted in three stages: Phase 1 (May 9, 2025) of meetings with human resources managers, Phase 2 (May 19, 2025) of meetings with directors and department heads, and Phase 3 (May 26-27-30, June 5 and July 22, 2025) of broader interviews with all staff. Based on this diagnosis, a first training module was deployed on Quality Management and the requirements of the ISO 9001:2015 standard, organized on October 9-10 and 16-17, 2025. This intervention demonstrates the UEMF's commitment to strengthening the capacities of regional public institutions for optimized management in accordance with international quality standards.

Source: Continuing Education Report 2025-2026 - Directorate General for Academic and Cultural Affairs

UEMF is actively involved in the implementation of ALTEN's 2025 Training Plan. ALTEN is an international engineering and technology group. This partnership is part of a strategic approach to anticipating future skills needs and supporting innovation within the company. UEMF assists ALTEN in developing the skills of its engineers and employees by offering customized training programs aligned with the technological requirements and innovation challenges of the sector. This collaboration strengthens UEMF's position as a partner of choice for major technology companies seeking to enhance the skills of their human resources, and demonstrates the recognition of its expertise in instructional design within the fields of technology and innovation.

Operational Agreement with Enabel – Belgian Development Agency (Link up Africa Project)

The UEMF signed an Operational Agreement with Enabel, the Belgian Federal Government's Development Agency, in May 2024, within the framework of the Link Up Africa project. This agreement positions the UEMF as an operational partner in an international cooperation initiative for African development. This partnership with a leading international cooperation agency demonstrates the UEMF's growing international influence and credibility on the African continent.

Agreement with Agritech – Training and Professional Integration

The UEMF (Union of Moroccan Farmers) has developed a partnership agreement with Agritech for a training and professional integration project in the agricultural sector. The UEMF provides support through two main areas: firstly, by proposing a structured rationale for the training and professional integration project; and secondly, by designing an organizational framework to ensure the project's effective implementation. This initiative is part of the digital transformation of the Moroccan agricultural sector and aims to train qualified professionals capable of meeting the sector's growing need for technological skills applied to agriculture.

Source: Continuing Education Report 2025-2026 - Directorate General for Academic and Cultural Affairs

In addition to its inclusion in the JobInTech program (documented in Part 5), UEMF has finalized a formal agreement to support the national IT ecosystem by creating a large pool of job-ready talent, continuously adapted to the needs of market players and technological developments. This agreement formalizes UEMF's role as a leading training provider for developing digital skills in Morocco, in response to the needs of companies in the technology sector.

Visit of the Bonbino Confort Delegation to the UEMF

On September 17, 2025, a delegation from Bonbino Confort, a Moroccan company specializing in household appliances and furniture, paid an institutional visit to UEMF. This meeting, which included a tour of the university's facilities and laboratories as well as strategic discussions, is part of UEMF's proactive approach to developing new partnerships with the industrial and commercial private sector, with a view to developing continuing education programs tailored to the needs of businesses.

Source: Continuing Education Report 2025-2026 - Directorate General for Academic and Cultural Affairs

Visit of the UEMF Delegation to SOTHERMA

On September 18, 2025, a delegation from the UEMF (Union of Moroccan Employers) conducted an institutional visit to SOTHERMA, a Moroccan company specializing in the production and distribution of mineral water. This exploratory visit is part of the UEMF's strategy to identify the continuing education needs of companies in the agri-food and industrial sectors, with a view to developing customized training programs adapted to the specific characteristics of this sector.

ThereThe Euromed Faculty of Medicine (FEM) is finalizing a University Diploma in Sports Medicine, a continuing education program for physicians, physiotherapists, and healthcare professionals wishing to specialize in the medical care of athletes. This program covers the medical, physiological, traumatological, and performance aspects related to sports practice, thus meeting the growing needs of the Moroccan sports sector, particularly in the context of Morocco hosting the 2030 World Cup.

Source: Continuing Education Report - Directorate General for Academic and Cultural Affairs

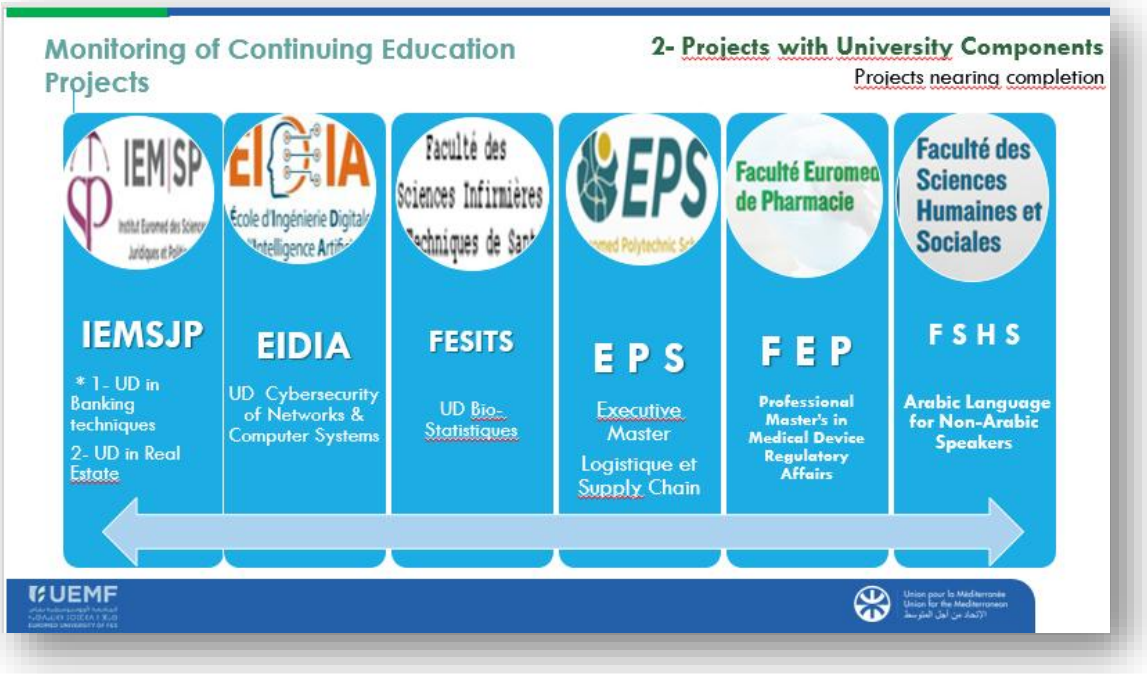

L'The Euromed Institute of Legal and Political Sciences (IEMSJP) is finalizing two University Diplomas in Banking Techniques and Real Estate. These certified continuing education programs are designed for professionals in the financial and real estate sectors who wish to enhance their skills in these constantly evolving regulatory and technological fields. They complement the UEMF's training offerings in legal, economic, and financial matters, addressing the specific needs of the Moroccan job market.

Source: Continuing Education Report - Directorate General for Academic and Cultural Affairs

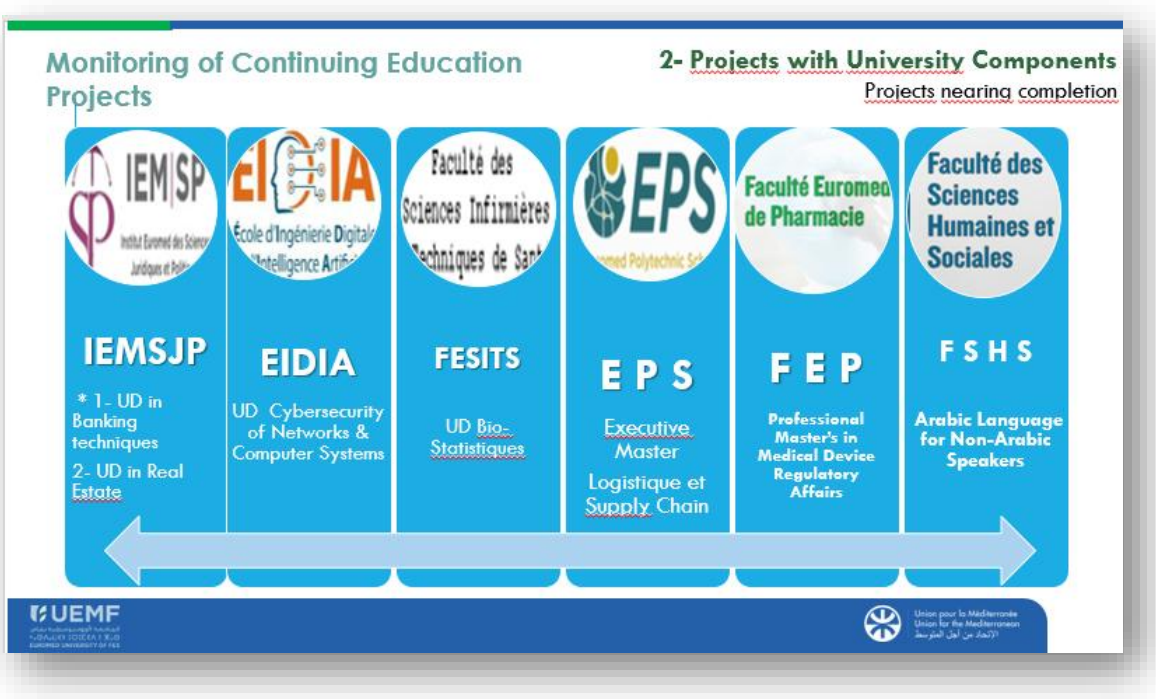

L'The School of Digital Engineering and Artificial Intelligence (EIDIA) is finalizing a University Diploma in Cybersecurity of Networks and Computer Systems. This highly technical continuing education program addresses the growing demand for qualified cybersecurity professionals, in a context of increasing cyber threats and the accelerated digitalization of the Moroccan economy. It aims to train experts capable of designing, deploying, and managing robust IT security systems for public and private organizations.

Source: Continuing Education Report - Directorate General for Academic and Cultural Affairs

L'Euromed Polytechnic School (EPS) is finalizing an Executive Master's degree in Logistics and Supply Chain, a high-level continuing education program designed for executives and managers seeking advanced expertise in logistics and supply chain management. In a context of profound transformation of global supply chains and the development of Moroccan infrastructure (the port of Tangier Med, logistics zones), this program addresses the strategic needs of the Moroccan and African markets for supply chain experts.

The Euromed University of Fez hosts a strategic event on AI and signs a structuring agreement for Industry X.0

On March 10, 2026, the Euromed University of Fez hosted a high-level event dedicated to the role of artificial intelligence in the digital transformation of organizations, with a focus on Industry X.0 and the healthcare sector. Organized in partnership with the Ministry of Digital Transition and Administrative Reform and the Ministry of Industry and Trade, this meeting was marked by the signing of the Jazari Industry X.0 agreement, aimed at strengthening synergies between academic research, industry, and public institutions in order to accelerate technology transfer and the commercialization of scientific research.

As part of the "AI Made in Morocco" program, this initiative aims to structure a national artificial intelligence ecosystem that fosters innovation, industrial competitiveness, and the creation of economic and societal value. The event also brought together public decision-makers, researchers, and industry representatives for two panels dedicated to technology transfer and the impact of AI in the healthcare industry, highlighting the opportunities and challenges associated with the deployment of artificial intelligence technologies.

EMBA Audencia – UEMF: Deployment of the 3rd Self Leadership module

Developing effective leadership begins with a deep understanding of oneself and others!

From March 27 to 29, 2026, as part of the EMBA programAudencia– UEMF, participants took the Self-Leadership module, led by ProfessorAgnes Boissiere Marchand.

Through an interactive teaching approach combining personality tests (MBTI), workshops, simulations and exchanges of experiences, this module made it possible to explore individual preferences, strengthen communication and negotiation skills, and adapt management styles to different contexts.

These three days also provided an opportunity to address key issues in contemporary leadership, such as stress management, team mobilization, and the quality of professional relationships.

A structuring module, at the heart of the training of leaders capable of adapting, inspiring and mobilizing in complex environments.

Applications now open – International Mobility

The Euromed University of Fez is launching a call for applications for academic mobility at the Politecnico di Torino University (Italy), intended for students enrolled in Civil Engineering, Electrical Engineering and Cybersecurity Engineering.

This program offers students the opportunity to gain international academic experience at a renowned partner institution, while developing their skills in strategic engineering fields.

EMBA Audencia – UEMF: Deployment of the Financial Analysis module

EMBA Audencia – UEMF: Deployment of the Financial Analysis module

Understanding a company's performance means knowing how to read beyond the numbers.

From April 17 to 19, 2026, as part of the EMBA programAudencia– UEMF, the participants followed the Financial Analysis module, led by Prof.Karim BENNIS.

Through a rigorous approach rooted in professional practices, this module made it possible to decipher financial statements and to assess the solidity and risk profile of companies.

These three days also provided an opportunity to deepen key skills: performance analysis, identification of risk factors, understanding of growth dynamics and assessment of a company's ability to create value.

An essential module for training decision-makers capable of informing their strategic choices with solid and relevant financial analysis.

Bernspire 2025-2026: Applications open for international student competitions

Bernspire, a Swiss association committed to education, innovation and the development of young talent internationally, announces the official opening of applications for the 2025-2026 edition of its academic competitions.

Organized annually on a supra-regional scale, Bernspire's Graduation Project Challenges are aimed at final-year university students in the fields of engineering and social sciences. This initiative seeks to promote innovative graduation projects that offer concrete solutions to contemporary technological, societal, and environmental challenges.

The competitions bring together participants from several international universities and are evaluated by a jury composed of academic experts and professionals from different countries, thus offering candidates international visibility and a unique opportunity to showcase their research and innovation work.

Applications are open to students preparing their final year project during the 2025-2026 academic year.

Students wishing to participate can consult the application procedures and submit their projects via the official Bernspire website:
www.bernspire.com/the-details

The results of previous editions and the winning projects can be viewed via:
www.bernspire.com/2024-2025-winners

UEMF Hosts Strategic Partnership Event to Advance Industry 4.0 and Digital Innovation

Euromed University of Fes hosted a partnership event bringing together UEMF,ANAPEC,CGEMFez-Meknes, andDigital Development Agency-ADDto support Industry 4.0 transformation.

The program opened with a guided tour of UEMF's technological platforms, including spaces dedicated to civil engineering, 3D printing, CNC machining, robotics, big data, and applied industrial technologies.

Speakers included Khadija Essafi,Tijani Bounahmidi,Abdellah CHOUIKH,Omar Tajmouati,Ghada BOUHLAL, andAsmae ABADI, who moderated discussions on how training, innovation, and business support can help companies adapt to new industrial challenges.

EMBA Audencia - UEMF: Deployment of the module "Principles of CSR and Business Law"

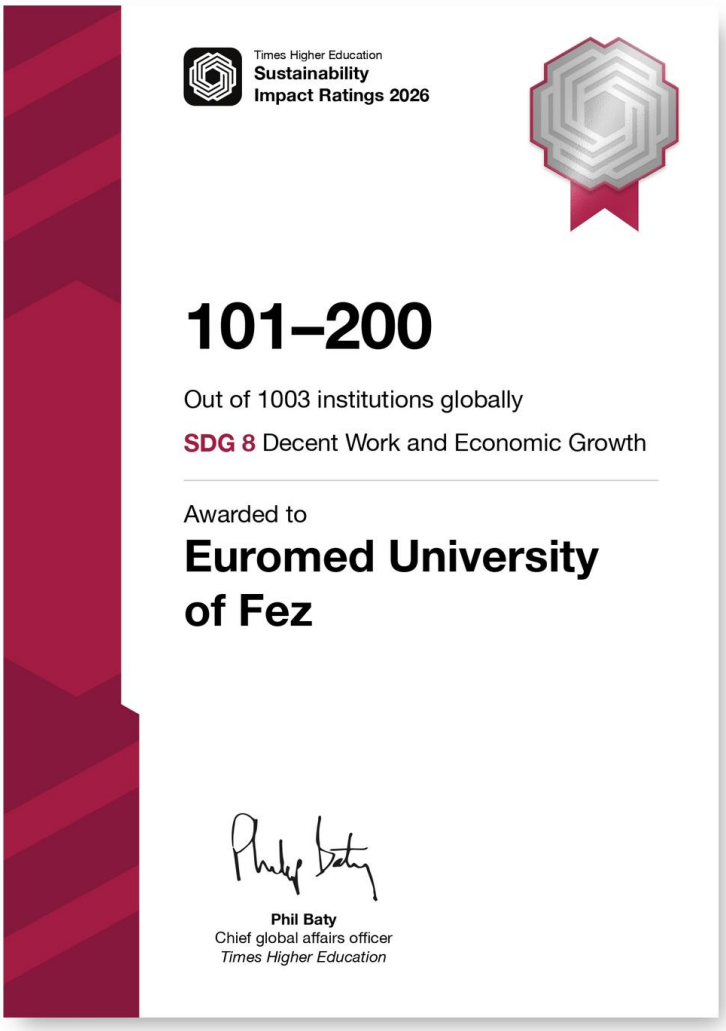

From June 19 to 21, the Audencia-UEMF Executive MBA cohort participated in a module on CSR and business law, led by Professor Thomas Blangis. Participants addressed governance issues, stakeholders, CSR frameworks, and the main regulatory frameworks for sustainability, including the CSRD (Consumer Standards and Regulations), due diligence, the European taxonomy, and ESG criteria.

The module also emphasized the integration of CSR into the governance, strategy and management of organizations, highlighting its role as a lever for creating sustainable value.

Awards and Distinctions

UEMF's performance in THE Impact Rankings 2026 – SDG 8

In the THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 101–200 range out of 1,003 institutions for SDG 8: Decent Work and Economic Growth. This ranking highlights its actions in support of employability, entrepreneurship, innovation, skills development, and inclusive and responsible growth.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

The Euromed University of Fez actively contributes to SDG 9 by placing innovation, applied research, and the development of technological infrastructure at the heart of its academic project. Through cutting-edge scientific and technological platforms, support for research and innovation, and guidance for high-impact projects, UEMF promotes knowledge transfer to industry and strengthens the innovation ecosystem. By developing modern infrastructure and fostering a spirit of engineering and creativity, the University participates in building a sustainable, inclusive, and future-oriented industrial development model.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez plays a key role in promoting innovation and developing sustainable infrastructure, in line with SDG 9. As an academic and scientific institution, it fosters research, innovation, and knowledge transfer. The university implements policies aimed at improving the performance of its infrastructure and integrating sustainable technologies. Responsible digital transformation is also a key driver for supporting innovation. The Euromed University of Fez encourages stakeholder involvement in its development projects. This collaborative approach strengthens the relevance and impact of its initiatives. In this way, it contributes to building a development model based on sustainable innovation.

c. Formation, sensibilisation et engagement académique

- Masters et programmes spécialisés sur l'énergie, le développement durable, la gestion environnementale et l'ingénierie verte ;
- Cours transversaux sur les ODD et la durabilité dans tous les programmes ;
- Conférences et séminaires internationaux sur la transition énergétique, la résilience climatique et l'économie circulaire ;
- Projets étudiants et doctorants sur le bilan carbone, le recyclage, l'éco-design et l'adaptation climatique-résilience.

d. Innovation, incubation et entrepreneuriat vert

- Incubation de start-up dans les domaines de la mobilité électrique, de la technologie propre, de l'agritech, et des énergies renouvelables ;
- Organisation régulière de hackathons sur l'agritech, l'énergie, la gestion durable et la réduction du carbone, mobilisant étudiants, chercheurs et partenaires industriels ;
- Accompagnement des porteurs de projets à impact environnemental au sein de l'Euromed Innovation Center et de l'écosystème Fez Smart Factory, à travers des programmes d'incubation, de mentorat et de valorisation technologique favorisant la mobilité électrique, l'agritech, les énergies renouvelables et l'économie circulaire.e. Partenariats et coopération

  Depuis septembre 2024, l'Euromed Innovation Center accompagne la transformation des idées en projets à fort impact, avec des résultats concrets :

  - 143 projets accompagnés et mentorés,
  - 632 personnes sensibilisées à l'entrepreneuriat,
  - 27 startups incubées et juridiquement établies.

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

UEMF

EUROMED UNIVERSITY OF FES

Actions d'enseignement et de recherche-innovation

L'UEMF a plusieurs programmes de formation et de recherche concernant l'efficacité énergétique :

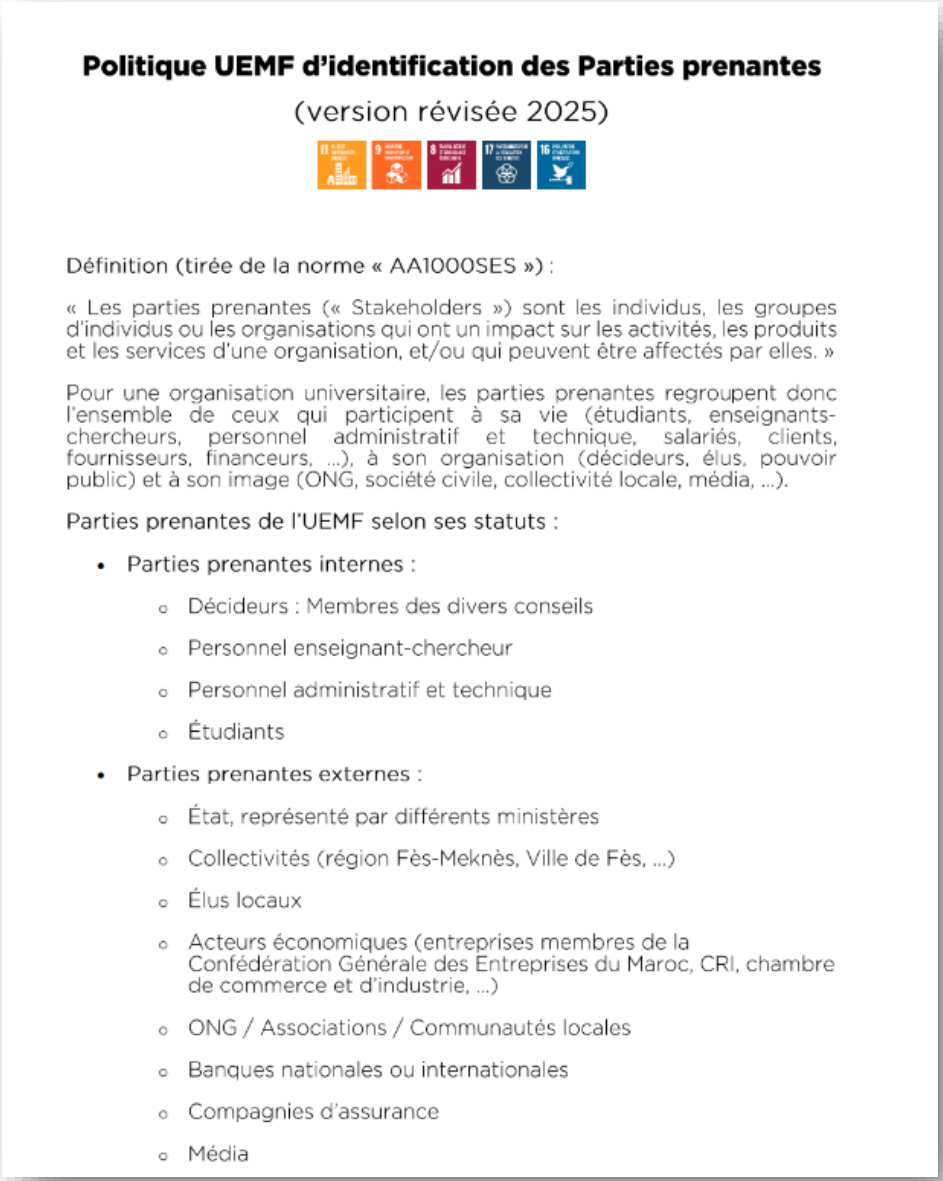

1. Master en Énergies Renouvelables et Efficacité Énergétique (ODD 4).
2. Master en Conception et Ingénierie des Bâtiments Verts (ODD 9, ODD 12).
3. Master en Transport et Mobilité Durable (ODD 11).
4. Équipe de recherche sur les Énergies Renouvelables et Efficacité Énergétique (ODD 7).
5. Équipe de recherche sur les Matériaux Bio-Sourcés (ODD 12).
6. Équipe de recherche sur l'Hydrogène vert (ODD 7).
7. Équipe de recherche sur l'Efficacité Énergétique (ODD 7).
8. Équipe de recherche sur les Matériaux robustes et légers pour l'aéronautique (ODD 9).
9. Projet de Centre pour le Climat en cours d'installation à l'UEMF en collaboration avec l'Union pour la Méditerranée (ODD 13).
10. Installation de Fès-Smart Factory sur l'Éco-campus de l'UEMF avec une grande composante concernant l'innovation en matière d'efficacité énergétique (ODD 9).
11. Plusieurs laboratoires concernant le développement durable, le dessalement d'eau et les énergies renouvelables, incluant une maison sur campus concernant les études et la recherche sur l'efficacité énergétique (ODD 9).
12. Participation à l'élaboration des politiques aux niveaux local, régional et national pour contribuer à la réalisation des engagements internationaux du Maroc pour le développement durable et des technologies des énergies propres (ODD 17).
13. Sensibilisation de la communauté et offre de services aux industries locales visant à améliorer l'efficacité énergétique (ODD 9).
14. Assistance à la communauté locale en soutenant le démarrage d'entreprises durables par le biais de formation et de mentorat (incubateur régional, conférences, ...) (ODD 8).

Application et révision

L'application de la politique énergétique relève de la direction du patrimoine qui doit s'assurer que les programmes concernant la gestion énergétique sont mis en œuvre. La Politique est révisée sur une base triennale.

UEMF is committed to optimizing its energy consumption and promoting the use of renewable energy. This policy aims to reduce the University's carbon footprint while ensuring the efficiency of its infrastructure.

Stakeholder identification policy

Politique UEMF d'identification des Parties prenantes

(version révisée 2025)

Définition (tirée de la norme « AA1000SES ») :

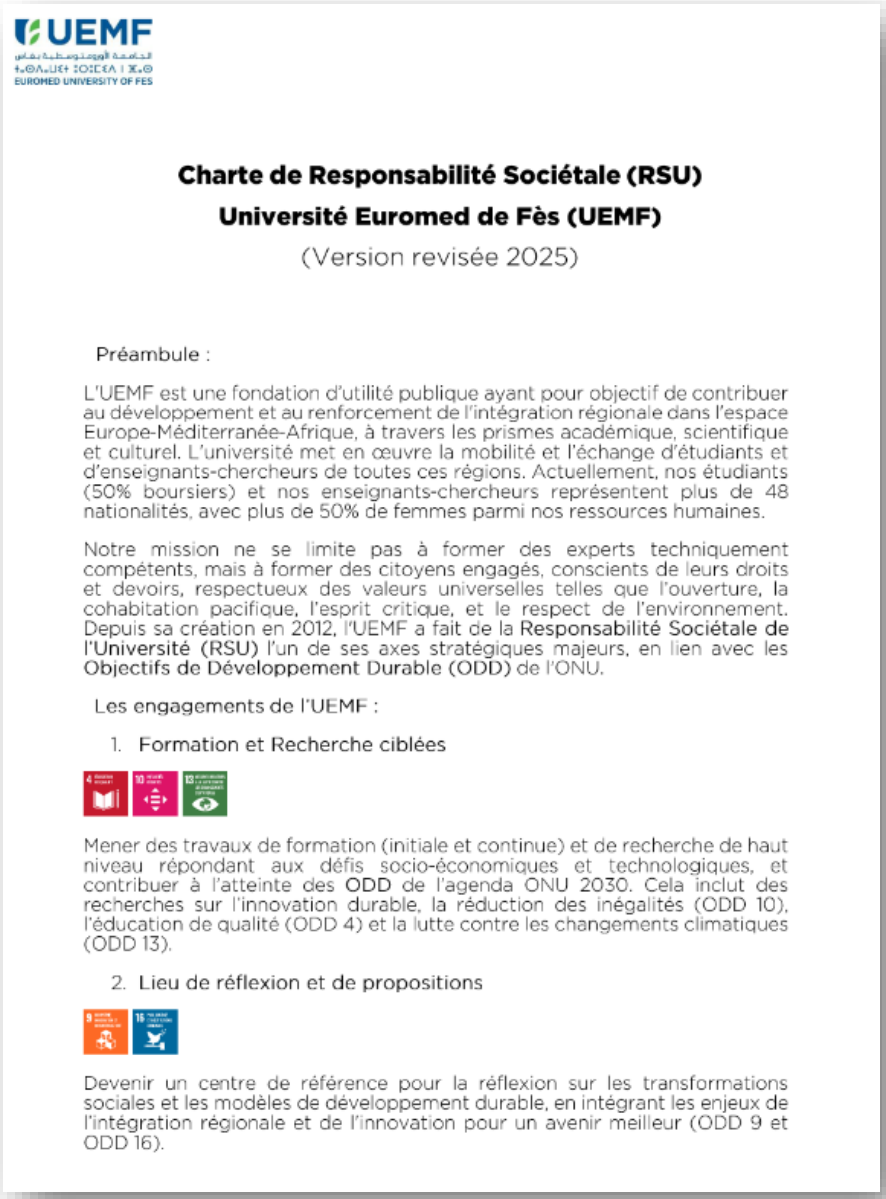

« Les parties prenantes (« Stakeholders ») sont les individus, les groupes d'individus ou les organisations qui ont un impact sur les activités, les produits et les services d'une organisation, et/ou qui peuvent être affectés par elles. »

Pour une organisation universitaire, les parties prenantes regroupent donc l'ensemble de ceux qui participent à sa vie (étudiants, enseignants-chercheurs, personnel administratif et technique, salariés, clients, fournisseurs, financeurs, ...), à son organisation (décideurs, élus, pouvoir public) et à son image (ONG, société civile, collectivité locale, média, ...).

Parties prenantes de l'UEMF selon ses statuts :

- Parties prenantes internes :
  - Décideurs : Membres des divers conseils
  - Personnel enseignant-chercheur
  - Personnel administratif et technique
  - Étudiants
- Parties prenantes externes :
  - État, représenté par différents ministères
  - Collectivités (région Fès-Meknès, Ville de Fès, ...)
  - Élus locaux
  - Acteurs économiques (entreprises membres de la Confédération Générale des Entreprises du Maroc, CRI, chambre de commerce et d'industrie, ...)
  - ONG / Associations / Communautés locales
  - Banques nationales ou internationales
  - Compagnies d'assurance
  - Média

The UEMF recognizes the importance of its stakeholders in the success of its missions. This policy defines the methods of dialogue, listening, and cooperation with students, teachers, institutional partners, and economic actors.

UEMF
EUROMED UNIVERSITY OF FES

Charte de Responsabilité Sociétale (RSU)

Université Euromed de Fès (UEMF)

(Version revisée 2025)

Préambule :

L'UEMF est une fondation d'utilité publique ayant pour objectif de contribuer au développement et au renforcement de l'intégration régionale dans l'espace Europe-Méditerranée-Afrique, à travers les prismes académique, scientifique et culturel. L'université met en œuvre la mobilité et l'échange d'étudiants et d'enseignants-chercheurs de toutes ces régions. Actuellement, nos étudiants (50% boursiers) et nos enseignants-chercheurs représentent plus de 48 nationalités, avec plus de 50% de femmes parmi nos ressources humaines.

Notre mission ne se limite pas à former des experts techniquement compétents, mais à former des citoyens engagés, conscients de leurs droits et devoirs, respectueux des valeurs universelles telles que l'ouverture, la cohabitation pacifique, l'esprit critique, et le respect de l'environnement. Depuis sa création en 2012, l'UEMF a fait de la **Responsabilité Sociétale de l'Université (RSU)** l'un de ses axes stratégiques majeurs, en lien avec les **Objectifs de Développement Durable (ODD)** de l'ONU.

Les engagements de l'UEMF :

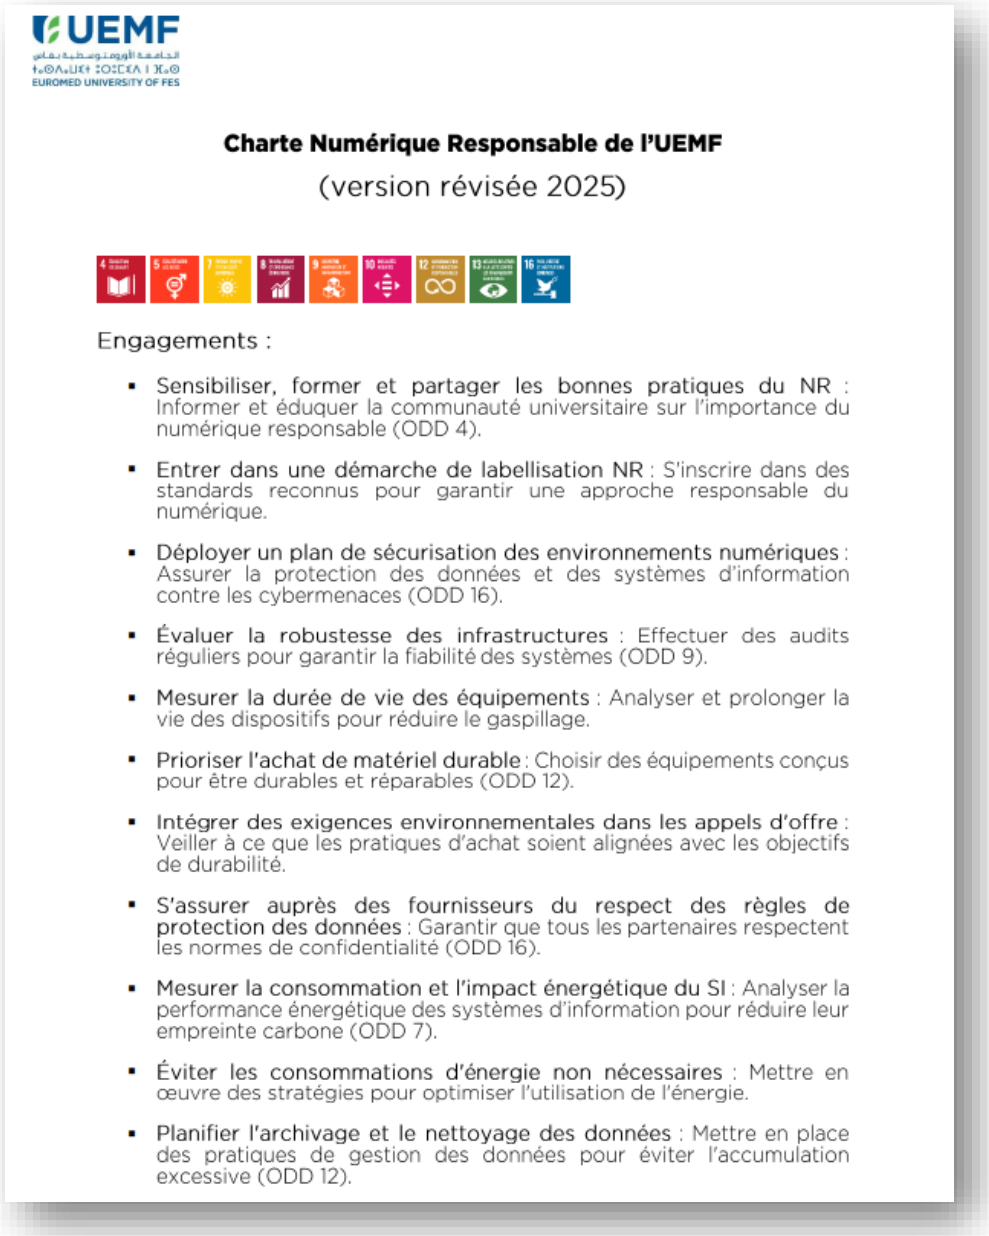

1. Formation et Recherche ciblées

Mener des travaux de formation (initiale et continue) et de recherche de haut niveau répondant aux défis socio-économiques et technologiques, et contribuer à l'atteinte des ODD de l'agenda ONU 2030. Cela inclut des recherches sur l'innovation durable, la réduction des inégalités (ODD 10), l'éducation de qualité (ODD 4) et la lutte contre les changements climatiques (ODD 13).

2. Lieu de réflexion et de propositions

Devenir un centre de référence pour la réflexion sur les transformations sociales et les modèles de développement durable, en intégrant les enjeux de l'intégration régionale et de l'innovation pour un avenir meilleur (ODD 9 et ODD 16).

This charter formalizes the integration of social responsibility at the heart of the UEMF's missions. It outlines concrete commitments in the areas of ethics, governance, respect for the environment and contribution to sustainable development.

UEMF
EUROMED UNIVERSITY OF FES

Charte Numérique Responsable de l'UEMF

(version révisée 2025)

Engagements :

- **Sensibiliser, former et partager les bonnes pratiques du NR** : Informer et éduquer la communauté universitaire sur l'importance du numérique responsable (ODD 4).
- **Entrer dans une démarche de labellisation NR** : S'inscrire dans des standards reconnus pour garantir une approche responsable du numérique.
- **Déployer un plan de sécurisation des environnements numériques** : Assurer la protection des données et des systèmes d'information contre les cybermenaces (ODD 16).
- **Évaluer la robustesse des infrastructures** : Effectuer des audits réguliers pour garantir la fiabilité des systèmes (ODD 9).
- **Mesurer la durée de vie des équipements** : Analyser et prolonger la vie des dispositifs pour réduire le gaspillage.
- **Prioriser l'achat de matériel durable** : Choisir des équipements conçus pour être durables et réparables (ODD 12).
- **Intégrer des exigences environnementales dans les appels d'offre** : Veiller à ce que les pratiques d'achat soient alignées avec les objectifs de durabilité.
- **S'assurer auprès des fournisseurs du respect des règles de protection des données** : Garantir que tous les partenaires respectent les normes de confidentialité (ODD 16).
- **Mesurer la consommation et l'impact énergétique du SI** : Analyser la performance énergétique des systèmes d'information pour réduire leur empreinte carbone (ODD 7).
- **Éviter les consommations d'énergie non nécessaires** : Mettre en œuvre des stratégies pour optimiser l'utilisation de l'énergie.
- **Planifier l'archivage et le nettoyage des données** : Mettre en place des pratiques de gestion des données pour éviter l'accumulation excessive (ODD 12).

Digital technology plays a central role at UEMF, but its use must be responsible. This charter defines best practices regarding digital tools, data security, and reducing environmental impact.

E-SDG

As part of its commitment to SDG 9 – Industry, Innovation and Infrastructure, UEMF offers training geared towards scientific and technological innovation, digital transformation and the development of solutions adapted to contemporary challenges.

Through its training programs in biomedical engineering, biotechnology, bioinformatics, artificial intelligence, robotics, big data analytics, cybersecurity, architecture and design, the University contributes to the development of skills and technologies that promote innovation, research and the design of sustainable technological solutions and infrastructure adapted to the needs of society.

1Initial training leading to a diploma

Doctor of Medicine, Specialist Physician and Teacher-Researchers in Medicine.
Students enrolled at FEM have the opportunity to spend two to three semesters studying abroad. FEM offers this opportunity through the following programs:

- Exchange agreements established with our partners;
- Credit mobility agreements within the framework of the ERASMUS+ program.

Opportunities for international and intercultural internships may be offered.

2. CONTINUING EDUCATION

The FEM is progressively developing continuing education programs qualifying or diploma-granting courses, in various forms: full-time or part-time continuing education or work-study training.

3. DOCTORAL (Ph.D.) TRAINING

The doctoral program is a research-based training program culminating in the award of a Doctor of Medicine (Ph.D.) degree in Medical and Biomedical Sciences, following the defense of research work before a jury. This doctoral research training is organized at the Doctoral Studies Center in Medical Sciences at the Euromed University of Fez.

Euromed Faculty of Dental Medicine

1. INITIAL DIPLOMA TRAINING

- Title of Doctor of Dental Medicine after six years of training.

- Possibility of an exchange semester during the professional immersion internship in partner Euro-Mediterranean establishments or within the framework of the mobility agreements provided for by the ERASMUS+ program.

2. CONTINUING EDUCATION

- A rich and diverse continuing education offer that meets the training needs of dentists;
- Updating their knowledge and strengthening their skills;
- Continuous adaptation to the digital transformation linked to technological progress.

Euromed Faculty of Pharmacy

The Euromed Faculty of Pharmacy (FEP), a component of the Euromed University of Fez, offers a six-year program leading to a Doctor of Pharmacy degree. This program is part of a strong international strategy, based on structured academic collaborations with European universities, promoting student and faculty mobility, particularly within the Erasmus+ program, as well as the development of joint programs, double degrees, and collaborative research projects. This degree opens doors to numerous promising careers, particularly in the following sectors:

- The pharmaceutical industry,
- The hospital pharmacy,
- The pharmacy,
- Pharmaceutical R&D.

The Euromed Faculty of Pharmacy (FEP) offers a comprehensive program designed to train dedicated pharmacists capable of addressing current healthcare challenges under optimal safety conditions. The Doctor of Pharmacy degree is recognized by the Moroccan state, and the FEP aims to develop dual degree programs with European universities, fostering a dynamic of international collaboration.
The training program is based on innovative teaching methods that integrate artificial intelligence, data analysis, and biotechnology to improve treatment effectiveness and the quality of care. Furthermore, the FEP offers international mobility opportunities through academic exchanges, the Erasmus+ program, and internships abroad.

1. Sectors:

- MULTI-SKILLED NURSE
- Anesthesia and Resuscitation Nurse
- SPEECH THERAPIST
- PSYCHOMOTOR TRACKER
- DIETETICS - NUTRITION
- LABORATORY TECHNIQUES
- RADIOLOGY TECHNIQUES

2. LMD pathway:

- BACHELOR'S DEGREE PROGRAM:

3-year cycle, practical work in laboratory, rehabilitation rooms, simulation center, internships in health centers, hospitals, clinics and specialized centers.

- MASTER'S PROGRAM:

Advanced training accessible to licensed students. Two-year program divided into four semesters.

- DOCTORAL PROGRAM:

A 3-year program focused on scientific research in the fields of nursing, rehabilitation care, health techniques and nutrition.

1.INTEGRATED PREPARATORY CYCLE (2 YEARS)

This program prepares students with the essential foundations for success in engineering fields. It enables them to:

- Acquire solid scientific knowledge: mathematics, applied physics, chemistry, cell and molecular biology.
- Mastering digital and computer tools for modeling, simulation and analysis.
- Developing transferable skills: scientific communication, collaborative work, management of project and professional ethics.
- To be introduced to research and innovation through integrative projects and practical internships.

2. ENGINEERING PROGRAM (3 YEARS)

Field of study: Biomedical Engineering

Objective: To train engineers capable of designing and maintaining medical devices, utilizing imaging and robotics technologies, and proposing innovative solutions to improve the patient journey.

Field of study: Biotechnological Engineering

Objective: To prepare students to design, develop and supervise biotechnological processes, develop innovative products and ensure compliance with standards and regulations.

Field of study: Bioinformatics Engineering

Objective: To train engineers capable of analyzing and modeling biological data, developing digital tools for health and integrating artificial intelligence into biomedical practices.

1. PREPARATORY CYCLE

The Integrated Preparatory Cycle at the School of Digital Engineering and Artificial Intelligence is designed to provide students with in-depth scientific and technical training, enabling them to access the various digital engineering tracks. This program combines courses in computer science, electronics, applied mathematics, and humanities and social sciences, in order to lay a solid foundation for the rest of their studies in the engineering cycle.

2. ENGINEERING PROGRAM

Sectors:

- Artificial Intelligence (AI)
- Robotics and Cobotics
- Big Data Analysis
- Information Technology and Cybersecurity
- Full Stack and Multimedia Engineering

3. MASTER'S PROGRAM

ICT Security and Artificial Intelligence (dual degree program with George Washington University)

The courses develop skills in artificial intelligence, robotics, Big Data, cloud computing, cybersecurity, software development and digital technologies, promoting innovation and digital transformation.

1. ARCHITECT'S CYCLE: Architect's Degree (Bac +6)

The diploma obtained through this program is an architecture degree with Moroccan recognition and accreditation:

2. BACHELOR'S DEGREE PROGRAM: Bachelor's degree in Design (3 years post-high school)

The EMADU Design degree is designed to train designers capable of creatively managing, beyond the object, decision-making processes, mediation and the integration of multidisciplinary contributions; thus enabling graduates to work across a very wide range of sectors.

3. MASTER'S PROGRAM: Master in Global Design (Bac+5)

EMADU offers an innovative, multidisciplinary and internationally open training program, promoting practical learning, critical thinking, innovation and the development of skills necessary for design professions.

The courses promote innovation in architecture, design, materials, infrastructure, urban planning and the development of solutions adapted to contemporary challenges.

Introducing the Fez Smart Factory (FSF)

The Fez Smart Factory (FSF)is the first innovation ecosystem dedicated to industry 4.0 in Morocco. Located in the heart of the Euromed University of Fez, its mission is to support the digital and ecological transformation of industrial companies, while promoting the creation of high value-added technology startups.

- **An initiative serving the smart industry:**

Fez Smart Factory brings together companies, startups, researchers and students around a common goal: to reinvent industry through smart technologies (IoT, AI, robotics, automation, etc.). It embodies a modern and sustainable vision of the Moroccan industrial fabric.

- **Objectives of the Fez Smart Factory Ecosystem:**

The "FSF" Ecosystem is a support zone for innovative activities, aiming to develop a competitive industry by improving its productivity through the implementation of Industry 4.0 principles and methods. All activities within the FSF zone will be geared towards this objective, from raising awareness of the benefits of Industry 4.0, to supporting manufacturers in transforming their industrial units into smart factories, and including support for project leaders and startups working to create new Industry 4.0 factories. This is the first project of its kind in Morocco for this emerging industry worldwide since the concept was launched in Germany in 2011.

By creating an Industry 4.0 ecosystem, the project aims to:

- To establish a core of smart factories by supporting project leaders and startups benefiting from FSF's engineering and R&D services, as well as a pilot model factory, to develop their Industry 4.0 factories on a demonstration scale.
- Leveraging the FSF ecosystem, through the company "FSF INDUSTRY", to support existing industrial units in the Fes-Meknes region and Morocco to optimize their industrial, environmental and social performance by leveraging the concepts of Industry 4.0.

- **Components of the FSF Ecosystem:**

The FSF Ecosystem comprises the following components:

- **The 4.0 incubator:**It is a body responsible for carrying out missions related to the incubation of projects for the development of smart industrial units for high value-added and competitive products;

- **The 4.0 startup accelerator:**It is a space for welcoming startups carrying out projects to develop smart industrial units for high value-added and competitive products;

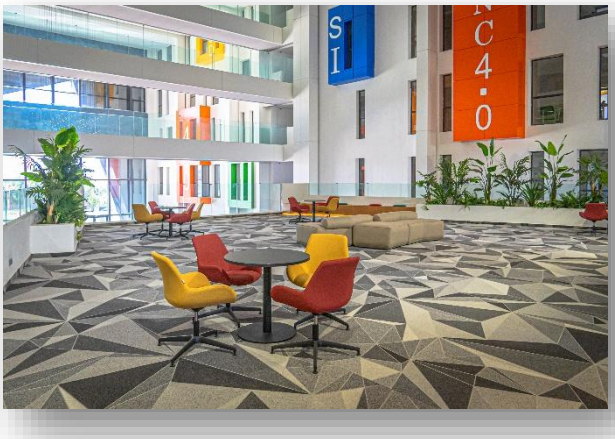

- **Engineering services for Industry 4.0:**Ten engineering companies will be located in the dedicated engineering services areas of the FSF ecosystem. They will be selected based on cross-cutting use cases: predictive maintenance, optimal energy management, supply chain, IoT and sensors, connectivity and cloud, and real-world applications. Virtual and augmented automation (robotics & cobotics), manufacturing processes Mechanical and chemical and/or biological transformation processes, Data Analytics and AI.

- **R&D entities:**Five R&D entities will be established in the dedicated R&D service areas of the FSF ecosystem. An R&D entity is defined as: an R&D company, an R&D unit within a university specializing in Industry 4.0 in the relevant sector, or an independent R&D center. The entity may be based in Morocco or abroad. Only one entity will be selected per industrial sector from among those covered by the FSF ecosystem: the agri-food, chemical, parachemical, and biomedical and pharmaceutical industries; the metal, metallurgical, and electromechanical industries; the renewable energy industry; the digital and artificial intelligence industry; and the textile and leather industry. Each R&D entity will develop innovative solutions for the vertical and horizontal integration of its respective industrial sector. It will develop a comprehensive optimization approach for industrial companies within the sector, as well as digital twins of all links in the value chain and their components. Through her mastery of the value chain, she will identify the main use cases that can contribute to this overall optimization. She will develop a comprehensive architecture that enables optimization and define the specifications of the use cases compatible with this architecture, which should be used by engineering companies for their development.

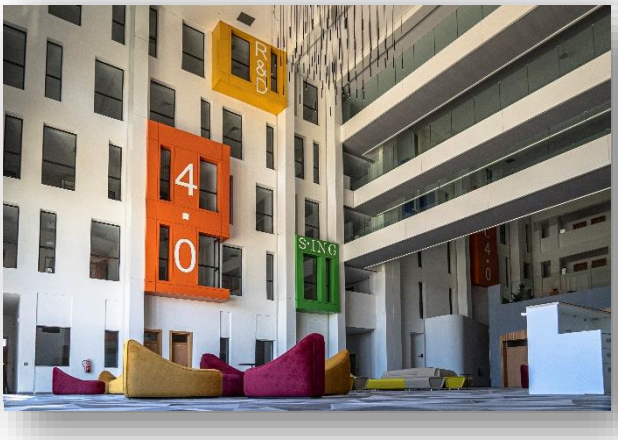

- **The Rapid Prototyping Center (Additive Manufacturing):**including additive manufacturing machines for metallic, plastic, ceramic and concrete materials. This center, owned by UEMF, will provide prototyping services to project

leaders in the Incubator, Startups in the Accelerator, engineering companies, FSF R&D Laboratories and businesses;

- **The Business Center 4.0:**These are spaces dedicated to companies wishing to invest in Morocco in the field of industry 4.0;
- **The 4.0 pilot model factory:**This training factory, supported by the Digital Development Agency in partnership with the Ministry of Industry and Trade, the UEMF and the FSF Consortium, has as its main mission training in the technologies and concepts of industry 4.0 and contributing to supporting FSF beneficiaries in the choice and implementation of technologies for smart factories;
- **Spaces dedicated to the implementation of innovative Industry 4.0 units on a demonstration scale developed by startups.**

Research, Innovation & Entrepreneurship

Research Topics - Doctoral Cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 9 has been identified. This work focuses in particular on advanced materials, artificial intelligence, robotics, the Internet of Things, digital twins, industrial processes, medical technologies, and innovative infrastructures.

The table below presents the main research topics contributing to this objective.

Thesis Subject	related SDGs
Development of High-Surface and Corrosion Resistance of 3D Printed H13 by Additive Manufacturing	SDG 9
NLP-Based Detection of Insider Threats and Prevention of Data Breaches	SDG 9
Local Bio-Sourced Materials and Process Integration in 3D Concrete Printing	SDG 9
Olive Oil By-Product Valorization	SDG 9
Combating Antibiotic Resistance Using Artificial Intelligence and Experiment-Driven Solutions	SDG 9
Process Analysis and Optimization of Support Procedures for Smart Factories of Innovative Products: From Idea to Market	SDG 9
The Synthesis of New Nano-Objects (Quantum-Dots, Clusters and Metallic Nanoparticles), Their Confinement in Porous Matrices and/or Mesostructures, Their Stability and Their Application to Fine Chemistry Catalysis	SDG 9
Formulation of a New Composite Biomaterial for Bone Tissue Engineering	SDG 9
From Traditional Democracy to Digital Governance in Moroccan Public Administration Issue of Transparency and Citizen Participation	SDG 9
Design and Synthesis of New Biocompatible Dendrimers for the Encapsulation of Superparamagnetic Iron Oxide Nanoparticles: Application in MRI	SDG 9
Numerical Simulation of the Extrusion and Layer Deposition Processes in 3D Concrete Printing	SDG 9
Advancements in Computational Finance Using Machine Learning and Deep Learning	SDG 9
Optimization of Freight Mobility in the City: Urban Integration and Intermodal Potential	SDG 9
The Role of Internal Auditing in Strengthening Governance, Transparency, and Academic Performance in Moroccan Universities	SDG 9
Blockchain-Driven Transformation of the Green Hydrogen Supply Chain	SDG 9

Thesis Subject	related SDGs
Structural and mechanistic elucidation and monitoring by NMR spectroscopy of the synthesis of bioactive molecules in eutectic solvents	SDG 9
Development of Optical Biosensors for Breast Cancer Detection	SDG 9
About the Normality of Urgency and Emergency: Climate Change Narratives in Video Games	SDG 9
Contribution to the Phytochemical Valorization of Argania Spinoza Within the Framework of Circular Economy	SDG 9
Porous Materials for Catalysis	SDG 9
Transforming an Unsustainable City into a Sustainable One: The Case of Fez	SDG 9
Morocco's Country Brand: Supporting the Country's Sovereignty and Creating Economic Opportunities Through Digital Content Production, International Digital Influencers and Targeting International Digital Audiences	SDG 9
From Abandonment to Urban Renaissance: Sensitive and Strategic Approaches to Rehabilitating Urban, Agricultural and Industrial Spaces	SDG 9
Design of IoT Platform for Cancer Detection Using High Frequency Ultrasounds	SDG 9
Smart Batteries	SDG 9
Computer Vision for Smart Farming and Agriculture Practices	SDG 9
Design and Synthesis via CH Bond Activation of the Pyrazino-[1a,3a,6a]-Triazapentalene (PyTAP): Application to Other Heterocycles Containing Nitrogen	SDG 9
The Protection of Category Interests Following the Sale of a Company in Difficulty Under Comparative French and OHADA Law	SDG 9
Nanomaterials for the Removal of Phytosanitary Products from Water	SDG 9
Design and Pilot Scale Yeast-Based Production of Bluetongue Virus Capsid Particles as An Alternative to Live Attenuated Virus Vaccine	SDG 9
Synthesis & Characterization of New Ionic Conductive Based Phosphate for Li/Na-Ion Batteries	SDG 9
AI in the Predictive Analysis of Purchasing Behavior: Accuracy, Ethics, and Acceptability	SDG 9
Modeling and Optimizing Building for Energy Efficiency Using the Digital Twin Concept	SDG 9
Modeling and Optimization of Green Hydrogen Production from Sea Water Electrolysis: A Systematic Approach to Maximizing Energy Efficiency and Minimizing Environmental Impact	SDG 9
Human-Robot Interaction in Assisting Individuals with Disabilities Using Deep Learning	SDG 9
Green Production: Leveraging Bio-Based Polymers for Developing Thin-Film Composite Forward Osmosis Membranes for Fertigation	SDG 9

Thesis Subject	related SDGs
Hybrid Experiments-Based Numerical Simulations in 3D Cement Printing for Clay-Based Bio-Sourced Materials Development	SDG 9
Synthesis and Application of Polymers Based on Glyconanomicelles and Glycodendrimers for Transporting and Releasing Substances to Treat Antimalarial Drug Resistance	SDG 9
Synthesis of Bio-Sourced Cementitious Materials for Additive Manufacturing in Construction	SDG 9
Digital, Electronic Acts and Their Impact on Notarial Practice and Authentic Instruments: A Comparative Law Study Between Morocco and France	SDG 9
Artificial Intelligence (AI) to Enhance the Customer Experience in Moroccan Tourism: Challenges and Opportunities	SDG 9
Design, Synthesis and Evaluation of New Bioactive Analogues of Fluoroquinolones/ea	SDG 9
Development of Methods of Expression, Optimization and Characterization of Recombinant THCAS Enzyme in Pichia Pastoris Expression System	SDG 9
Blockchain Technology for Green Manufacturing	SDG 9
A Study and Conception of an Optimized and Secure Routing Protocol for IoT Platforms using Artificial Intelligence Algorithm	SDG 9
Leveraging Large Language Models for Enhanced Intrusion Detection Systems	SDG 9
High-field Nuclear Magnetic Resonance (NMR) Spectroscopy for Quality Control: Development of New Analytical Methods in Agri-Food Using NMR	SDG 9
AI adoption and team performance: success factors and organizational impacts	SDG 9
Self-Supervised and Semi-Supervised AI Framework for Almond Disease Detection Under Limited Annotation and Agriculture Practices	SDG 9
Eco-Resilient Earthen Construction: Integrating Material Innovation, Seismic Safety and Environmental Sustainability	SDG 9
Geo-spatial analysis of urban transformations in the medina of Fez	SDG 9
Mathematical Modeling and Artificial Intelligence for Predicting Glycemic Dynamics and Insulin Response in Biomedical Engineering for Diabetes Management	SDG 9
Development of artificial intelligence algorithms for the early detection of breast cancer	SDG 9
Identification and characterization of new active molecules from a Moroccan variety of Cannabis sativa (C. sativa) against breast tumors	SDG 9
Water management and sustainable logistics: modeling resilient supply chains in the face of water stress in Morocco	SDG 9
AI-Powered Copilot for Personalized English's Core Skills Learning with Real Time Advanced Performance Analytics	SDG 9

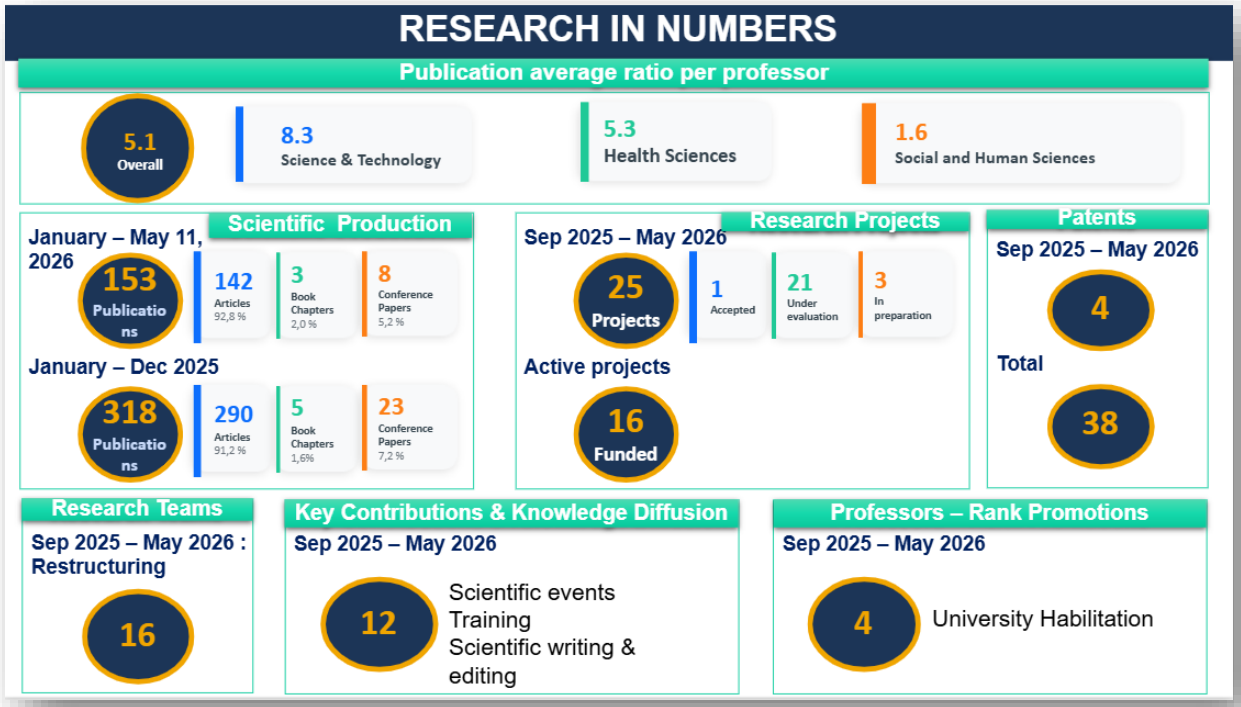

Thesis Subject	related SDGs
Governance and regulatory challenges related to digital technologies in the context of peace and conflict	SDG 9
Impact of new technologies (social networks, artificial intelligence) on conflict management	SDG 9
Towards an integrative artificial intelligence for the prognostic classification of mature B-cell neoplasms	SDG 9
An Explainable Hybrid AI System for Early Detection of Chronic Diseases from Multimodal Medical Data	SDG 9
Microbial Colonization and Biofilm Formation on Dental Biomaterials Under Various Oral Conditions: From Periodontal Disease to Bone Regeneration	SDG 9
Lightweight Self-Supervised and Uncertainty-Aware Framework for Efficient Plant Disease Classification	SDG 9
Robotic-Assisted AI for Rehabilitation: Adaptive Control Based on Patient Feedback Loops	SDG 9
Aerial robotics applied to energy sustainability: the case of automated solar panel cleaning	SDG 9
Plant-Derived Exosomes as Bio-Nanoplatforms for Antiviral therapy and Vaccine Delivery: A Cross-Mediterranean Approach	SDG 9
Sustainable architecture and energy efficiency: integrated approaches between architecture and geography in the Moroccan context	SDG 9
Transformation of consumer behavior in the age of artificial intelligence and algorithmic personalization in societies undergoing digital transition	SDG 9
Design and implementation of a portable optical bio-detection device for real-time analysis of pathological biomarkers	SDG 9
Advancing Radiofrequency Models of Cardiac Tissue Through Optimal Control and Multiscale Modeling	SDG 9
Development and Characterization of Hybrid Polymer-Bioactive Glass Bio-Composites by 3D Extrusion for Personalized Orthopedic Implants: Mechanical Performance and Bio-Integration	SDG 9
A Standardized Modular Architecture for Multiphysics Digital Twins in Industry 4.0	SDG 9
Autonomous and Cognitive Navigation for Mobile Robots via Deep Learning and Large Language Model (LLM) Integration	SDG 9
AI-Driven and Industry 4.0 Enabled Frameworks for the Decarbonization of Automotive Industrial Production Sites in Morocco	SDG 9
Identification of Patient Profiles Through Deep Learning	SDG 9
Recent Trends and Advancements in SOFC Technology: Achieving Low Operating Temperatures Through Material Innovations	SDG 9
AI-Based Modeling Lymphocyte Cell Signaling Networks for Predicting Immunological Dysfunctions	SDG 9

Thesis Subject	related SDGs
Low-Temperature Development of Novel Hybrid Materials Based Calcium Phosphates, Bio-Polymers, and Bio-Active Glasses for Medical Applications	SDG 9
From Light to Power: 2D Graphene Oxide (GO) Platforms for Efficient Solar-Thermal Water-Energy Conversion	SDG 9
Designing a Bioactive Material for Osteochondral Regeneration: Advanced Matrix for Cartilage and Subchondral Bone Repair	SDG 9
Smart Integration of Electric and Hybrid Vehicles into the Power Grid	SDG 9
Optimum Design of Biomass Gasification Powered Hybrid RO-MED Desalination Plant	SDG 9
Cannabinoids Synthase Systems from Cannabis Sativa as Model for Bioengineering and Optimization of the Cannabinoids Production	SDG 9
Next-Generation 2D MXene /LDH Layered Photothermal Systems for High-Efficiency Solar Evaporation and Sustainable Energy Production	SDG 9

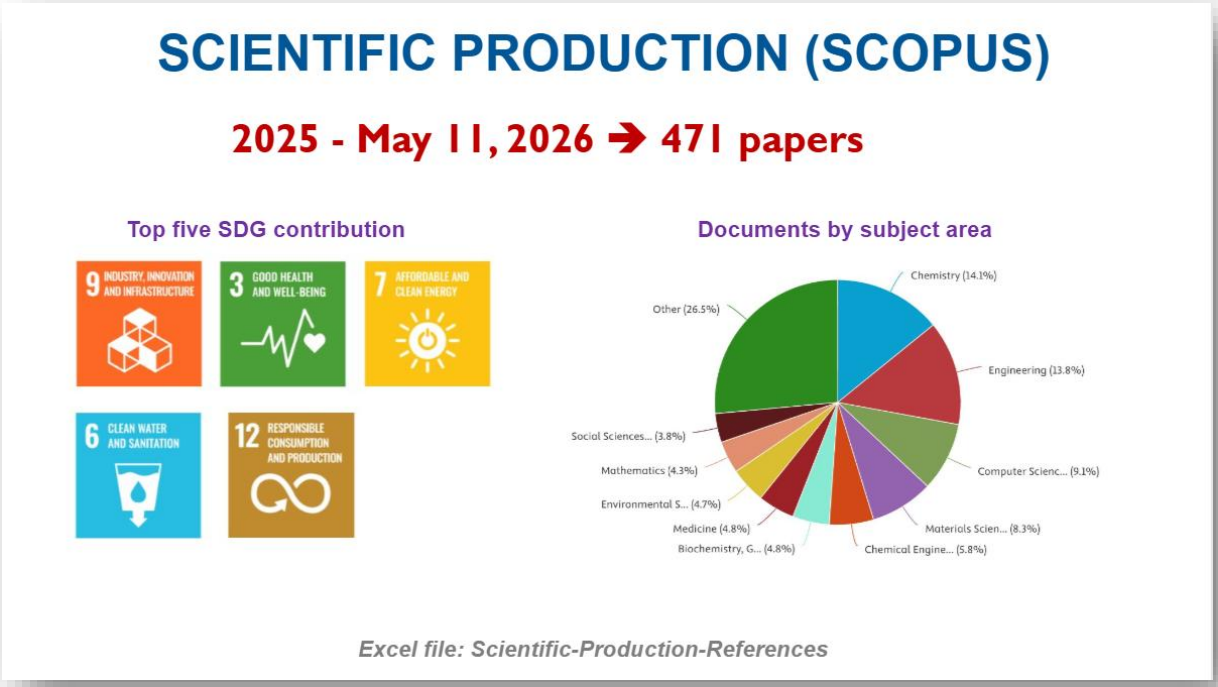

Research projects2025-2026

TITLE	SDG RELATED
HERAHealth Empowerment through Responsive AI – An AI-Chatbot intervention for women's health	SDG 9
SmartDesal-Med Smart Decentralized Brackish Water Desalination with Low-Cost Sensing and AI Optimization for Climate-Resilient Mediterranean Agriculture	SDG 9
OLIVEGUARD A Novel, Remote and Non-Invasive ICT System for Early Detection, Monitoring, Forecasting and Targeted Management of Olive Fruit Fly in Mediterranean Olive Orchards	SDG 9
Designing a Bioactive Material for Osteochondral Regeneration: Advanced Matrix for Cartilage and Subchondral Bone Repair	SDG 9
Structural Regulation of Quantum Dot–Bioactive Glass Smart Nanocomposite Scaffolds and Their Application in Bone Regeneration	SDG 9

Opinion piece: From "Made in Morocco" to "Trade via Morocco": how the Kingdom is reshaping global trade routes

The "Made in Morocco" label has long symbolized an emerging industrial pride. Textiles, leather, and later automobiles and aeronautics, were the showcases of this productive Morocco. But by 2025, this label is no longer enough to reflect the Kingdom's ambition.

The country is not just a manufacturing hub: it is becoming a logistical and strategic crossroads, at the heart of the reshaping of global trade flows. This profound transformation signals the shift from "Made in Morocco" to "Trade via Morocco," reflecting a deliberate repositioning.

3e and last Tech4Farmers Bootcamp of the 2e Cohort

From September 23 to 25, 2025, the Euromed University of Fez, via the Euromed Innovation Center, hosted the third and final bootcamp of the Tech4Farmers – Tamkin LiTanmia program, intended for AgriTech project leaders of the second cohort.

Organised as part of the programme funded by the AFD, this bootcamp focused on business maturation, pitching and preparation for fundraising, through workshops, mentoring and exchanges with experts.

It marks the end of the incubation cycle and confirms UEMF's commitment to innovation and impact entrepreneurship in the service of sustainable agriculture in the Fes-Meknes region.

Tech4Farmers Demo Day: closing of the second cohort

Organised by the Euromed Innovation Centre, the AgriTech Demo Day marked the closing of the second cohort of the Tech4Farmers programme, after 12 months of incubation of innovative startups within the framework of the AgriTech Regional Innovation and Entrepreneurship Hub.

The event allowed project leaders to present their solutions to an ecosystem composed of investors, institutional investors, researchers and agricultural professionals, fostering concrete opportunities for collaboration and deployment.

With the participation of partners such as the French Development Agency and major players in the sector, this initiative illustrates the commitment of the Euromed University of Fez to sustainable agricultural innovation with environmental impact..

Entrepreneurship Awareness Day – STARTECH 3ᵉedition

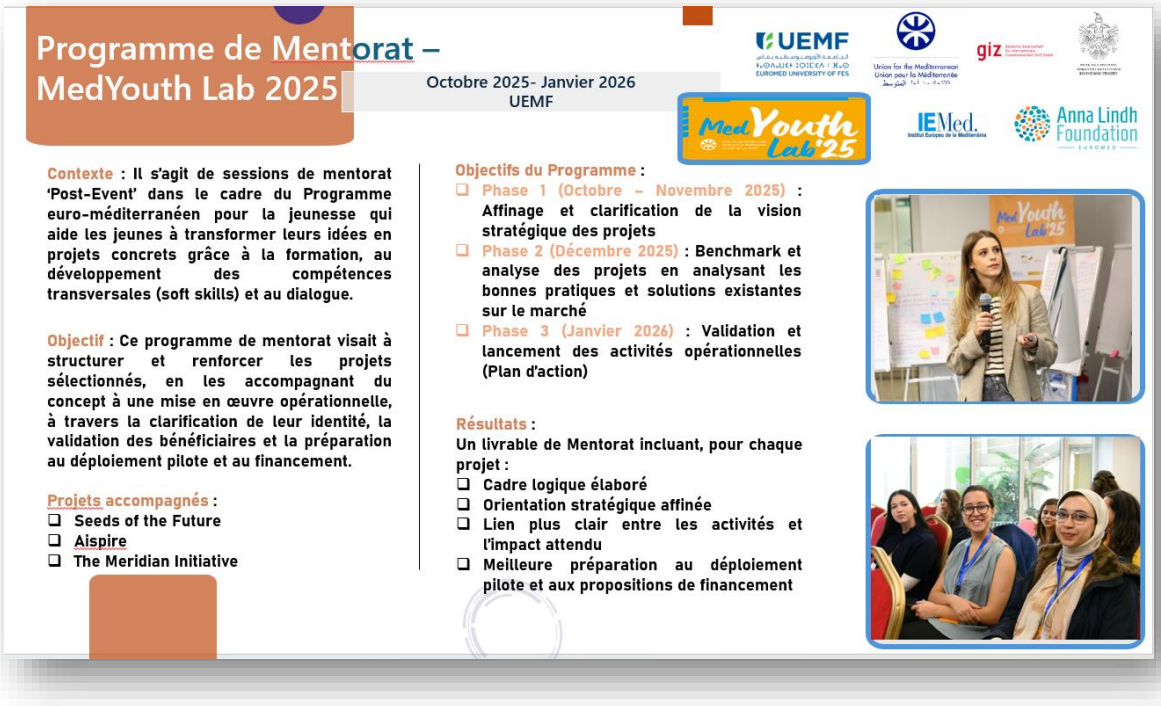

On November 13, 2025, the Euromed University of Fez (UEMF) organized an entrepreneurship awareness event as part of the 3rdᵉedition of the STARTECH Call for Projects.

The program includes: presentation of entrepreneurial opportunities in Morocco, exchange with local entrepreneurs, intervention by Bank of Africa on project financing and an introductory workshop on design thinking.

Intended for 3rd grade studentsᵉ4ᵉand 5ᵉOrganized this year by students from EBS, EIDIA and EIB, this activity brought together 200 participants and aimed to promote innovation and initiative.

Mentoring Program – MedYouth Lab 2025

The Mentorship Programme – MedYouth Lab 2025, organised at UEMF from October 2025 to January 2026, supported young project leaders in structuring and implementing their initiatives.
Through three phases (strategic clarification, benchmarking and validation of the action plan), the Seeds of the Future, Aispire and The Meridian Initiative projects benefited from a strengthened logical framework, better strategic direction and preparation for pilot deployment and funding.

Source: ACTIVITY REPORT OF THE DIRECTORATE OF SOCIO-ECONOMIC PARTNERSHIPS AND ENTREPRENEURSHIP 2025-2026

From Fes-Meknes to Berlin: our AgriTech startups meet international markets.

From Fes-Meknes to Berlin: our AgriTech startups meet international markets.

From February 4 to 6, as part of the Tech4Farmers incubation program of the Euromed innovation center (EIC), the Euromed University of Fez accompanied six partner startups to the international trade fair FRUIT LOGISTICA 2026 in Berlin, one of the world's largest events dedicated to the fruit and vegetable sector.

A true strategic space for exchanges and opportunities, this event allowed startups to present their innovative solutions, meet international buyers, exchange with manufacturers and better understand the dynamics of a constantly evolving global market.🌍.

Objectives achieved: qualified connections, concrete business opportunities, and enhanced visibility for Moroccan AgriTech on a demanding international stage. The teams were thus able to generate their first international leads, engage in advanced discussions with European distributors, and consolidate their positioning with key players in the sector.

National Hackathon – ActIn Space 6th Edition

On January 30 and 31, 2026, the UEMF hosted the 6th edition of the national ActIn Space Hackathon, an international competition dedicated to the applications of space technologies.

Following preparatory webinars and technical and entrepreneurial workshops, the teams presented their projects in a final pitch. The AtlasSpace team was selected to represent Morocco in the international phase in Bordeaux.

The event brought together 28 participants divided into 8 teams, reinforcing the dynamics of innovation and technological entrepreneurship within the UEMF.

AI and electric mobility: towards a new era of urban mobility in Morocco

We are delighted to share that our co-founder,Brahim El Bekkali, recently met with Mr. Ryad Mezzour, Minister of Industry & Trade, and Ms. Amal El Fallah Seghrouchni, Minister of Digital Transition & Administration Reform, at theEuromed innovation center (EIC)- a hub of innovation excellence in Morocco.MA

At POGO, we are merging AI-driven urban data with electric mobility to empower smart, sustainable, and safe urban mobility. From our advanced data analytics to our medium-term vision of a 100% Made in Morocco electric moped by POGO, we are committed to national industrial excellence.

The journey toward digitized and carbon-neutral urban mobility is picking up speed across our Moroccan cities. Stay tuned—we're just getting started!

AI Ramadan Hackathon: Innovation and skills at the service of local development

The Euromed University of Fez hosted the Ramadan AI Hackathon, a national initiative aimed at transforming innovative ideas into concrete solutions based on artificial intelligence. For three days, students, young professionals, and project leaders collaborated in a multidisciplinary setting, guided by mentors, to develop prototypes addressing local challenges. The event fostered skills development, responsible innovation, and entrepreneurship, culminating in final presentations before a jury that allowed participants to showcase their solutions and receive feedback for their development.

Hack'Days 2026: Stimulating regional innovation and entrepreneurship

The Euromed Innovation Center (EIC) has launched the Hack'Days 2026 call for projects, in partnership with TAMWILCOM through the InnovInvest fund and Blue Space by Bank of Africa. This initiative targets project leaders, teams, and startups in the Fes-Meknes, Drâa-Tafilalet, and Oriental regions, aiming to structure and accelerate the development of innovative solutions. Ten projects from each region will be selected to participate in the bootcamp, and three projects will receive post-bootcamp support.

This initiative strengthens the regional dynamic of innovation and entrepreneurship, by supporting the creation of concrete and competitive solutions.

Artificial intelligence and digital transformation: towards a new development paradigm

On the occasion of the signing of the JAZARI Industry X.0 agreement, Ms. Amal El Fallah Seghrouchni, Minister Delegate to the Head of Government in charge of Digital Transition and Administrative Reform, shared a testimony about the major technological changes that are transforming our societies today.

Through this intervention, she notably revisits the rise of artificial intelligence and its role in digital transformation, while highlighting the opportunities it offers to rethink professional practices, encourage innovation and open up new perspectives in many sectors.

An inspiring look at the challenges and potential of a constantly evolving world, where mastering technologies and adapting to new digital environments become essential levers for building the future.

Ramadan AI Hackathon: UEMF projects distinguished at the regional and national level.

As part of the RamadanIA program, supported by theMinistry of Digital Transition and Administrative ReformThe Euromed University of Fez hosted the Fez-Meknes regional final, bringing together students, project leaders and young entrepreneurs around artificial intelligence solutions applied to territorial challenges.

At the end of this stage, two projects from the UEMF community stood out: 🥇 GaiaEye – Grand Prize for Regional Excellence. 💡 Audacity Alwarid – Innovation & Creativity Award.

These projects then represented the region at the national hackathon in Rabat, bringing together the best teams from the Kingdom's 12 regions. At this event, the Audacity Alwarid project distinguished itself once again, winning 2nd prize nationally, as well as the Jazari Jury's Choice Award, confirming the relevance and impact of its solution in the field of digital healthcare transformation.

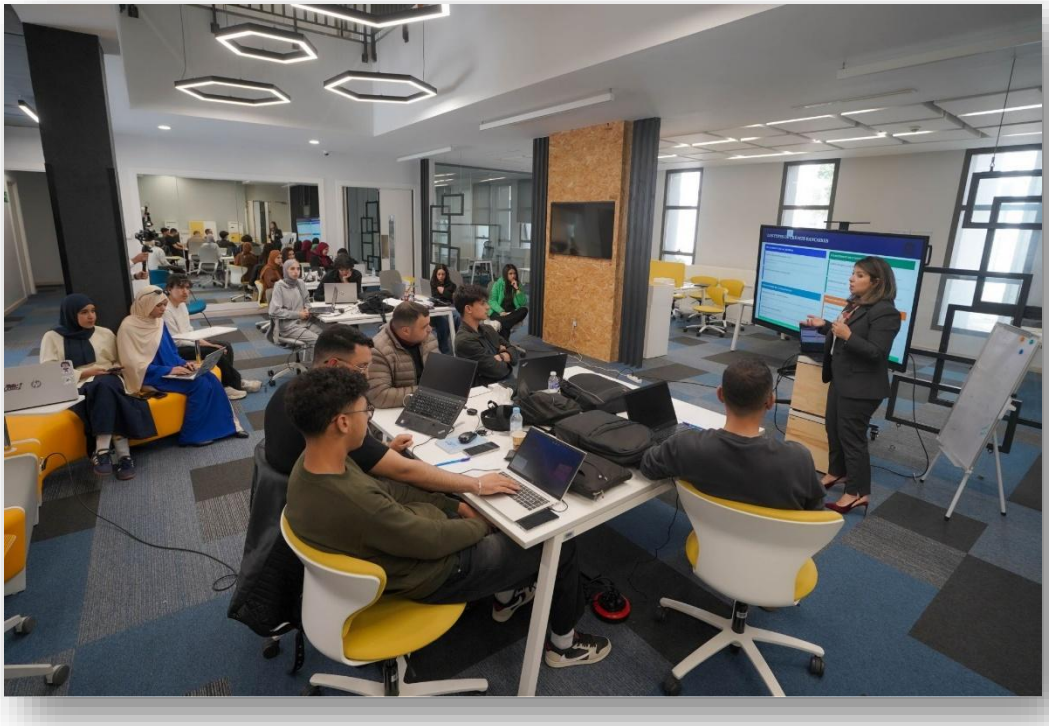

Congratulations to our students.
Lamiae HADI,Nada E.,Ahlam TARK,Chaimae OuarabAndHamel GOUNGOU, for their commitment, their creativity and the quality of the work accomplished through this project.

[Opinion] Fertilizers under pressure: Morocco as a backup route for Asia?

Since the closure of the Strait of Hormuz, the global fertilizer supply has been under strain. After the United States, it is now India's turn, a major agricultural power, to express its interest in Moroccan fertilizers. Thanks to its geographical location and the possibility of bypassing the Red Sea via the Cape of Good Hope in South Africa, Morocco could offer an alternative in this crisis.

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF.Euromed innovation center (EIC)organized, in partnership withTAMWILCOMvia the InnovInvest Fund and BlueSpace (Bank of Africa), on April 16 and 17, the Hack'Days of the Fes-Meknes region, bringing together students, project leaders and young entrepreneurs around an intensive bootcamp dedicated to the creation and development of innovative solutions.

As part of a dynamic of supporting high-potential talent, this program aims to support the emergence of projects in strategic sectors such as digital, health, agritech, cybersecurity, greentech, fintech or edtech, thus contributing to the development of the regional entrepreneurial ecosystem.

Over the course of two days, participants were supported in structuring their ideas, designing concrete solutions and preparing their projects, in an environment conducive to experimentation, collaboration and collective intelligence.

A true space for learning and co-creation, this event allowed each team to develop their project, benefiting from constructive feedback, dedicated mentoring and guidance that fosters the maturation of entrepreneurial initiatives.

The Hack'Days concluded with pitch sessions, offering participants the opportunity to present their projects, compare their ideas and reveal their full potential, in a dynamic focused on innovation and impact.

We extend our sincere congratulations to all participants for their commitment, creativity, and entrepreneurial spirit. This initiative confirms the role of the UEMF, through the Euromed Innovation Center, as a key player in structuring and supporting innovation at the regional and national levels.

Participation in SIAM: showcasing innovative initiatives in AgriTech

At the heart of agricultural innovation and AgriTech entrepreneurship in Morocco 🌱,

The Euromed University of Fez, through its Euromed Innovation Center (EIC), is participating in the 18th e SIAM edition with the Tech4Farmers – Tamkin Li Tanmia program, supported by the French Development Agency and deployed within the framework of the PRIE Fès-Meknès.

The program highlights several innovative startups (OBENS, Wasit, BOVICLOUDS, ARWA Solutions, Jodoor, DeepLeaf, Green Innovation, PCS AGRI) illustrating the potential of technology in the service of sustainable and efficient agriculture.

The stand was visited by several personalities, including the President of the Euromed University of Fez and the Director of the AFD, as well as the participation of institutional partners during the closing ceremony of the program, marking a strong moment of highlighting the results and collaborations.

This initiative brings together many key players in the agricultural and digital ecosystem in Morocco and confirms the role of the university as a driver of innovation and entrepreneurship serving the territories.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

On May 7th and 8th, 2026, theEuromed innovation center (EIC)organized the regional Hack'Days Oriental bootcamp, organized as part of the Hack'Days by Region 2026 program, supported by Tamwilcom via the Innov Invest Fund, in partnership with Blue Space by Bank of Africa.

For two days, project leaders from the Oriental region participated in intensive support designed to transform innovative ideas into structured, viable projects ready to accelerate their development.

Seven projects were selected following the initial rounds to participate in this edition and benefit from mentorship provided by experts and key players in the entrepreneurial ecosystem. Participants worked on key aspects of their projects: strategic vision, business model, market positioning, validation of the value proposition, and growth prospects.

The projects developed covered several high-stakes sectors: • Cleantech & hybrid energy • EdTech & financial education • HealthTech & drug safety • FinTech & algorithmic trading • Applied AI & cybersecurity

Beyond technical support, this bootcamp primarily created a space for meetings, reflection and experimentation where participants could challenge their ideas, share their experiences and develop their projects by interacting with experts and other entrepreneurs.

Digi-Hackathon “Mobile Health”: three days of innovation and engagement in service of youth health at UEMF

The Euromed University of Fez hosted the 4th eThe "Mobile Health" Digi-Hackathon, a national event dedicated to innovation in digital health and the development of technological solutions addressing public health challenges, was held in partnership with the Ministry of Health and Social Protection, the Euromed Innovation Center (EIC), and with the support of UNFPA. This hackathon placed particular emphasis on youth mental health and the prevention of psychoactive substance use.

For three days, students, experts, healthcare professionals, and project leaders collaborated in an environment that fostered innovation, entrepreneurship, and collective intelligence. The participating teams received technical and strategic support to develop innovative digital solutions tailored to the needs of teenagers and young adults.

The event also featured conferences and discussion forums on current issues in digital health and improving access to healthcare services through mobile technologies. Through this initiative, the UEMF reaffirms its commitment to socially impactful innovation, developing young people's skills, and fostering collaboration between health, technology, and entrepreneurship.

Events

Academic events

A comparative look at Morocco's development: a presentation by Mr. Mohammed Boutaleb at the UEMF

The Euromed University of Fez hosted Mr. Mohammed Boutaleb, former Minister of Energy and Mines, for a conference on the development of Morocco, organized as part of its Conference Series.

Under the theme "The development of Morocco seen from different angles", he shared his experience and analyzed the economic, social and territorial challenges of the Kingdom, emphasizing the importance of sustainable and inclusive development.

The meeting, marked by an interactive exchange with the students, concluded with thanks from the UEMF for this inspiring intervention, in line with its educational mission.

Enhancing educational quality through innovation: a focus on flipped classrooms

As part of its lecture series, the Euromed University of Fez hosted a presentation by Professor Amal El Ouazzani Ech-Chahdi, Dean of the Euromed Faculty of Dental Medicine, dedicated to quality and pedagogical innovation in higher education.

This meeting highlighted contemporary developments in teaching practices, in particular the flipped classroom approach, which redefines the role of the teacher, strengthens student autonomy and optimizes face-to-face time for the benefit of interaction, critical analysis and active learning.

Beyond the methodological presentation, Professor El Ouazzani Ech-Chahdi emphasized the strategic importance of educational quality, recalling that innovation is an essential lever for meeting constantly evolving academic and professional requirements.

The conference concluded with a constructive exchange with teacher-researchers, demonstrating a shared desire to adopt more agile, engaging and learner-centered teaching practices.

Cold plasma: a key technology at the heart of scientific and industrial innovations

A scientific conference dedicated to cold plasma was organized at the University's conference center, highlighting an innovative process at the heart of many cutting-edge technologies, from industry to materials science.

Led by Professor Ahmed Rhallabi, University Professor and expert in microelectronics and VLSI technologies, this meeting provided a clear and accessible explanation of the strategic role of cold plasma processes in current technological innovations.

Through his presentation, Professor Rhallabi shared his research background and experience collaborating with industry, highlighting the concrete applications, scientific challenges, and prospects related to these technologies.

The conference resulted in rich and stimulating exchanges within the academic community, highlighting the importance of knowledge sharing and dialogue around scientific and technological advances.

Artificial Intelligence and Divine Understanding: A lecture by Professor Dominique Bourg

As part of its lecture series for the 2025-2026 academic year, the Euromed University of Fez organised a conference dedicated to the links between artificial intelligence, human thought and spiritual questioning, offering a space for reflection on contemporary transformations in the relationship to knowledge in the digital age.

Led by Professor Dominique Bourg, philosopher and honorary professor at the University of Lausanne, this presentation offered a philosophical reading of the issues raised by the development of intelligent technologies, addressing the limits of technological rationality as well as the place of humans in the face of current scientific and societal changes.

Through this conference, participants were invited to question the boundaries between human intelligence and artificial intelligence, through reflections on the notion of understanding, the quest for meaning and new forms of understanding the world in a context marked by technological acceleration.

This meeting is part of the UEMF's desire to promote interdisciplinary dialogue and critical thinking, by fostering academic exchanges around major contemporary philosophical, scientific and societal issues.

Decade of Excellence: UEMF celebrates its 585 new award winners

The Euromed University of Fez celebrated the graduation of its tenth class, bringing together more than 2,000 people to honor 585 graduates: 267 engineers, 125 architects and designers, and 193 graduates in Business, Law, Political Science, and Humanities and Social Sciences. The ceremony highlighted the students' perseverance, the support of their teachers and families, and the university's commitment to its youth. Academic, diplomatic, and institutional figures were in attendance. In his address, President Professor Mostapha Bousmina encouraged the graduates to transform obstacles into opportunities. The event celebrated not only academic achievement but also the promise of a generation ready to innovate and contribute to progress.

3e Euromed Career Day edition: a success in the service of employability

The 3e eedition of the'Euromed Career Day s'is heldhasL'Euromed University of FezThe event, bringing together over 400 students and more than 20 companies from various sectors, facilitated over 1,100 interviews, fostering direct exchanges and concrete career opportunities.

A plenary conference on the theme "University-Business: a strategic alliance for the future" highlighted the importance of dialogue between the academic and professional worlds to strengthen the employability of students.

This initiative illustrates UEMF's commitment to supporting its students towards successful professional integration adapted to market requirements.

Amine Driouchi: A Moroccan journey at the heart of biophysical innovation

Moroccan biophysicist based in California, Dr. Amine Driouchi, offered students of the School of Biomedical and Biotechnology Engineering (EIB) at the Euromed University of Fez (UEMF) a general overview of current advances in cell imaging and the study of protein interactions.

A member of CxT Discovery, a research center integrated with the University of Berkeley, Dr. Driouchi presented the main points of his work, highlighting the mechanisms of interaction between proteins and their potential implications in biomedical research.

The speaker also discussed several experimental approaches and imaging tools used throughout his career, illustrating how these technologies now allow us to better understand cellular dynamics and support therapeutic innovation.

The conference also provided an opportunity for exchanges with the students and researchers in attendance, who were particularly inspired by his interdisciplinary vision and his passion for training young scientists. It was a significant encounter that offered a glimpse into the future of innovation in biophysics.

Innovation & Technology: The Project-Based Approach at the heart of engineering training at EPS.

As part of the implementation of the Project-Based Approach (PBA), the Euromed Polytechnic School (EPS) organised a day to promote student projects, bringing together the different engineering specialties around innovative and interdisciplinary initiatives.

The students presented projects that spanned from the design phase to the creation of prototypes, demonstrating their ability to apply their scientific and technical skills to address real-world problems. This dynamic process highlighted their creativity, analytical thinking, and collaborative work skills.

Organised within the Euromed Conference Centre, this initiative illustrates UEMF's commitment to active and professionalizing pedagogy, aimed at training autonomous, innovative engineers capable of supporting technological and industrial transformations.

Oral health prevention: raising awareness today to better care tomorrow.

As part of the launch of the prevention project within the framework of the Project-Based Approach (PBA), the Faculty of Dental Medicine – UEMF welcomed Dr. Errachidi, President of the Moroccan Association for Oral and Dental Prevention – Fes section, for an exchange and awareness session dedicated to dental medicine students.

This meeting provided an opportunity to discuss the foundations of oral health prevention, the importance of patient awareness, as well as the good practices and professional ethics that should guide the practice of the profession.

Through an enriching dialogue, the students were introduced to the challenges of prevention in public health, the responsibility of the practitioner in educating patients and the essential role of the dentist in promoting a sustainable culture of prevention.

This initiative is fully in line with the UEMF's vision of training competent, committed healthcare professionals who are aware of their societal role, placing prevention and ethics at the heart of medical practice.

Project-Based Approach: Engagement and innovation at the heart of nursing and health technology training.

As part of our active teaching based on the Project-Based Approach (PBA), the Faculty of Nursing Sciences and Health Techniques (FSITS) – UEMF organized a day dedicated to the presentation of projects carried out by its students.

Throughout the day, the students presented work developed around concrete problems observed in the field, illustrating their ability to mobilize their scientific knowledge, technical skills and analytical skills in the service of care and prevention.

The presentations were also enhanced by the screening of short educational films produced by students, highlighting awareness and support messages, as well as a play entitled "Civilization at the Heart of Care", emphasizing the importance of ethics, humanity and values in the practice of health professions.

Through this initiative, the APP confirms its role as an essential educational lever, promoting autonomy, critical thinking and student engagement, in line with the UEMF's vision of training competent, responsible healthcare professionals capable of responding to the current challenges of the sector with rigor and empathy.

Interactive Webinar: Mathematical Reasoning in the Age of AI

As part of its scientific activities, the Euromed University of Fez organized an interactive webinar led by Prof. Salem Lahlou from the Mohammed Bin Zayed University of Artificial Intelligence (MBZUAI), entitled: "GFlowNets: Diverse Generation for LLM Mathematical Reasoning".

Primarily intended for doctoral students in science and technology, as well as 2nd-year engineering students This webinar, part of the School of Digital Engineering and Artificial Intelligence (EIDIA), offered an in-depth immersion into the mechanisms of diversified generation applied to large language models (LLMs) and their mathematical reasoning capabilities.

Through a combined theoretical and applied approach, participants were able to discover how GFlowNets open up new perspectives for improving the performance, diversity and robustness of artificial intelligence models in solving complex problems.

Beyond the scientific content, this meeting fostered a rich exchange between researchers, doctoral students and engineering students, strengthening the academic dialogue around advances in AI and computational research.

Contemporary perspectives on architecture, mobility and urban infrastructure with Mr. Anass Amazirh

As part of its academic activities, the School of Architecture, Design and Urban Planning (EMADU) at the Euromed University of Fez organized a conference dedicated to current challenges in urban mobility and infrastructure. Entitled "Architecture, Mobility and Urban Infrastructure," this event was led by Mr. Anass Amazirh, a DPLG-certified architect, and brought together students and faculty to discuss topics central to contemporary professional practices.

Through the presentation of emblematic projects and feedback from field experience, the speaker explored current approaches to the design of structures such as bridges, parking lots, and urban developments. He also shared valuable insights into technical innovations, conceptual choices, and the realities of the architect's profession in the face of the challenges of urban mobility.

This conference offered architecture students a concrete immersion in the professional world, allowing them to better understand the technical, conceptual and operational requirements related to urban infrastructures, while nurturing their critical thinking.

Beyond its educational contribution, this event illustrates UEMF's commitment to strengthening the links between academic training and professional practices, by promoting direct exchanges between experts and students within its eco-campus.

The Project-Based Approach in the Service of Innovation and Engineering Training

As part of its efforts to promote innovation and experiential learning, the School of Digital Engineering and Artificial Intelligence (EIDIA) at the Euromed University of Fez organized a day dedicated to showcasing student projects developed using the Project-Based Approach (PBA). This event highlighted the students' achievements, with presentations of prototypes and innovative solutions developed throughout their studies.

The projects on display drew upon diverse skills in digital technologies, data science, and artificial intelligence, enabling students to propose concrete solutions to current challenges. This initiative also provided a forum for exchange between students, teachers, and supervisors, fostering the sharing of experiences, collective reflection, and the recognition of student initiatives.

Through this day, EIDIA reaffirmed its commitment to active and innovative teaching, placing students at the heart of the problem-solving and creation process, in order to train engineers capable of meeting the technological challenges of tomorrow.

Student project presentation day in pharmacy

The Faculty of Pharmacy at Euromed University of Fez organized a day dedicated to showcasing projects completed by students within the framework of the Project-Based Approach (PBA). This event allowed future pharmacists to put their knowledge of pharmaceutical sciences, pharmacology, and biomedical research into practice through innovative projects addressing health and pharmaceutical issues.

Throughout the day, students presented their work to teachers and supervisors, illustrating the different stages of their projects, from ideation to scientific analysis. This initiative also fostered academic and scientific exchange, providing a space for dialogue, sharing experiences, and reflecting on current challenges in pharmaceutical research and innovation.

Through this activity, the Euromed University of Fez confirms its commitment to promoting active teaching methods that place the student at the heart of learning, while developing critical thinking, collaboration and the scientific skills needed by the health professionals of tomorrow.

Ibn Khaldun: A foundational thought at the crossroads of disciplines

As part of its lecture series for the 2025–2026 academic year, the Euromed University of Fez organized a conference entitled “Ibn Khaldun, an unclassifiable thinker”, led by Professor Abdessalam Cheddadi, professor and researcher in philosophy at the Institute of Scientific Research of the University of Rabat.

This presentation allowed participants to explore the richness of Ibn Khaldun's work, whose thought lies at the crossroads of history, sociology, and philosophy. Considered one of the forerunners of the social sciences, he offered an innovative analysis of the dynamics of societies, power structures, and the cycles of civilizations.

The conference also highlighted the contemporary relevance of his work, whose concepts continue to inform current social and political changes, attesting to the universal dimension of his intellectual legacy.

Marked by lively exchanges, this meeting provided a space for reflection on the foundations of Khaldunian thought and its lasting influence in the field of human and social sciences.

Through this series of conferences, the UEMF continues its commitment to the dissemination of knowledge, academic dialogue and intellectual openness, by proposing themes situated at the crossroads of disciplines.

The Euromed University of Fez hosted the Moroccan Day of Mathematics, an initiative organized by the Maths&Maroc association dedicated to youth and scientific culture.

On March 28, 2026, the Euromed University of Fez hosted the Moroccan Day of Mathematics (MDM), organized by Maths & Maroc with the support of the Hassan II Academy of Sciences and Technologies and Adria. The event brought together a diverse audience to promote scientific culture and the role of mathematics in contemporary transformations.

Through a rich program (conferences, interactive workshops, Maths Sprint), the initiative made mathematics accessible and attractive, while sparking the interest of young people. The presentations by Mr. Omar Fassi Fihri and Professor Mostapha Bousmina highlighted the central role of mathematics in science, technology, and innovation.

Finally, scholarships of excellence and awards were given to the winners, reinforcing the university's commitment to education and the development of talent.

Aesthetics, domination, and artificial intelligence: rethinking the power of images in the contemporary era

Aesthetics, domination, and artificial intelligence: rethinking the power of images in the contemporary era. As part of our lecture series for the current academic year, we organized a conference entitled "The notion of aesthetics and domination, from the 7th art to AI," led by Professor Fouad Souiba, writer and director.

In this presentation, Professor Fouad Souiba offered an in-depth reflection on the close links between aesthetics, representation, and power relations, tracing their evolution from classical cinematic language to new forms of expression shaped by artificial intelligence. Drawing on references from the world of film and contemporary digital transformations, he demonstrated how images are not limited to an artistic dimension, but constitute genuine tools of influence, capable of structuring collective imaginations, shaping perceptions, and sometimes reproducing or challenging forms of domination.

The conference also explored the profound changes brought about by AI in the processes of image creation, dissemination, and reception, thus opening up a discussion on the ethical, cultural, and societal issues related to these new technologies. Rich in exchanges and perspectives, this meeting examined the evolving ways we see in the digital age, highlighting the structuring role of images in contemporary dynamics.

The unlikely rise of a Moroccan tech multinational: the HPS case in the face of the changing landscape of digital payments

The unlikely rise of a Moroccan tech multinational: a look back at a conference at the heart of the changes in digital payment. As part of our Conference Series, we organized a meeting entitled: "The unlikely rise of a Moroccan tech multinational: the HPS case in the face of the changes in digital payment", moderated by Mr.Mohamed Horani, Chairman and CEO ofHPSand member of the Board of Directors of the Euromed University of Fez.

Through this meeting, the speaker offered an in-depth analysis of the growth trajectories of Moroccan technology companies, putting into perspective the structural transformations of the digital payment sector, marked by an acceleration of innovations and an intensification of competition on a global scale.

Drawing on his experience leading a key player, he shared concrete feedback on development strategies, innovation choices and internationalization dynamics that enabled HPS to establish itself as a global leader, while maintaining a strong Moroccan presence.

The conference also provided an opportunity to explore the changes in the fintech sector, addressing the challenges related to the digitalization of payments, the evolution of uses and the adaptation of business models in a constantly changing environment.

Rich in exchanges and perspectives, this meeting highlighted the essential levers for the success of technology companies, while emphasizing the strategic role of innovation, vision and adaptability in the development of leading companies on an international scale.

Conference: Training the healthcare professionals of tomorrow for a more resilient Moroccan healthcare system

The UEMF had the honor of welcoming Professor El Houssaine Louardi, a physician specializing in
anesthesia, resuscitation and emergency medicine, former Minister of Health, at a conference dedicated to the challenges of training health professionals and the prospects for the evolution of the Moroccan health system.

This meeting provided an opportunity to discuss current challenges in the health sector, the importance of multidisciplinary training adapted to contemporary medical transformations, and the strategic role of new generations of professionals in building a more efficient, innovative and resilient health system.

Through his intervention, Professor El Houssaine Louardi also shared his expertise and perspective on the changes taking place in the health sector today, while highlighting the challenges related to governance, medical innovation, research, and the development of human skills.

This conference illustrates the commitment of the Euromed University of Fez to promoting academic dialogue, openness to major societal issues and meetings between students, teachers and leading figures from different strategic sectors.

Morocco, the challenge of power: Mr. Abdelmalek Alaoui tells us more at the UEMF

As part of its mission to promote academic excellence, intellectual dialogue, and engagement with major contemporary issues, the Euromed University of Fez (UEMF) organized a discussion and debate around the book "Morocco, the Challenge of Power" by Abdelmalek Alaoui, a Moroccan essayist and economist. Moderated by Professor Taoufik Ouazzani Chahdi, Advisor to the University President, this scientific and cultural event brought together students, faculty, administrative staff, and members of the university community for a forum for exchange and reflection on the economic, geopolitical, and strategic transformations of the Kingdom of Morocco.

During this meeting, the author presented the main themes developed in his book, including Morocco's historical evolution since independence, the structural reforms that have shaped its development, the dynamics of economic and diplomatic openness, and the challenges related to competitiveness, sovereignty, innovation, and integration within a rapidly changing international environment. The discussions allowed for an analysis of the factors that have contributed to the country's institutional stability, its resilience in the face of crises, and its growing prominence on the regional and international stage.

The event provided a unique opportunity for students to compare their academic knowledge with the experience of a recognized expert, while simultaneously developing their critical thinking, analytical skills, and understanding of the strategic issues shaping Morocco's future. The discussions also raised awareness of governance, sustainable development, innovation, leadership, and responsible citizenship.

AgreenTech Bootcamp2026: Immersion in the heart of agricultural innovation at UEMF

As part of its commitment to innovation, entrepreneurship, and sustainable development, the Euromed Innovation Center (EIC) at the Euromed University of Fez (UEMF) hosted the AgreenTech 2026 Bootcamp, organized in partnership with Tamwilcom, through the Innov Invest Fund, and Bank of Africa via BlueSpace. This initiative brought together innovative project leaders from different regions of Morocco for an intensive program dedicated to the transformation and modernization of the agricultural sector.

Over two days of collaborative work, participants received support aimed at strengthening the structure of their projects, consolidating their business models, and preparing the deployment of technological solutions addressing the main challenges facing Moroccan agriculture. The work focused on several strategic themes, including smart water management, precision agriculture, the digitalization of farms, adaptation to climate change, the sustainable development of natural resources, and the improvement of supply chains and market access.

The projects presented utilized innovative technologies such as artificial intelligence, the Internet of Things (IoT), smart irrigation systems, LoRa communication technologies, computer vision, and solar-powered solutions. These innovations aim to improve farm efficiency, optimize water resource use, strengthen resilience to climate change, and support more efficient and sustainable agriculture.

Beyond the training phase, the AgreenTech 2026 Bootcamp represents a key step in supporting entrepreneurs towards prototyping, experimenting, and implementing solutions with a strong economic, social, and environmental impact. This initiative illustrates the role of the UEMF as a driver of innovation serving sustainable development and the agricultural transition in Morocco.

UEMF Meeting – Health Professionals of the City of Fez: thinking together about the health challenges of tomorrow.

The Health Hub of the Euromed University of Fez was pleased to welcome health professionals from the city of Fez for a meeting focused on exchange and reflection on the major transformations taking place today in the health sector, and on the responses to the growing needs for expertise, innovation and training.

This meeting was an opportunity to present the UEMF Health Hub, which brings together the Faculty of Medicine, the Faculty of Pharmacy, the Faculty of Dental Medicine, the Faculty of Nursing and Health Sciences, as well as the School of Biomedical Engineering and Biotechnology, illustrating an integrated approach to training, research and innovation in the service of health.

The discussions also highlighted the progress of the future Euromed Hospital Complex, a structuring project intended to strengthen the training, research and care ecosystem developed by the University, while also opening up reflection on the new training and skills required to meet the evolving needs of the sector and the emerging needs of the health system.

Beyond the presentation of its infrastructure and academic offerings, this meeting provided a genuine space for dialogue between the academic world and professionals in the field, reaffirming UEMF's commitment to actively contributing to the development of an innovative, high-performing, and resolutely future-oriented health ecosystem.

Seminars, conferences & congresses

The UEMF is hosting the first day of the NEGIA Summit: Architecture for the Future Generation

The Euromed University of Fez had the honor of hosting, last Wednesday, the first day of the NEGIA Summit (Next Generation Impact Architects), an event organized by the Federation of Francophone Architects of Africa (FAFA), around the theme "Architecture for the future generation".

This inaugural day, held at the University Conference Centre, brought together young architects, urban planners and experts from across the African continent to collectively reflect on the challenges and prospects of African architecture in the face of contemporary technological, environmental and societal issues.

The discussions focused on several major themes, including the impact of new technologies on architectural design, the presentation of the texts and statutes of the G40 (the FAFA Group of Architects Under 40), as well as the role of younger generations in the sustainable transformation of African cities.

For the students of the Euromed School of Architecture, Design and Urbanism (EMADU), this meeting was an enriching learning experience, offering them the opportunity to interact directly with young architects, international experts, and representatives of African professional bodies. It broadened their perspective on the realities of the profession, while highlighting the central role of creativity, technology, and sustainability in contemporary architecture.

This first day of the NEGIA Summit was distinguished by a spirit of inspiration, collaboration and intergenerational transmission, faithful to the values of openness and excellence upheld by the Euromed University of Fez.

Seminar on Low-Carbon Hydrogen: with Professor Philippe Tanguy and Professor Nadia Yousfi

The Euromed University of Fez (UEMF), in partnership with the Hassan II Academy of Sciences and Techniques, organised a high-level seminar dedicated to emerging processes for the production of low-carbon hydrogen.

Led by Professor Philippe Tanguy, Director of Strategy for the HTEC Group and Associate Professor at Polytechnique Montréal, and Professor Nadia Yousfi, Corresponding Member of the Hassan II Academy of Sciences and Techniques, this seminar allowed for rich exchanges with students, researchers and teachers on the scientific, technological and economic challenges of low-carbon hydrogen.

This meeting highlighted the strategic role of hydrogen in Morocco's energy transition and confirmed the UEMF's commitment to research, innovation and sustainable development.

Digital Earth 2026: an international workshop at the crossroads of innovation, civil engineering and sustainability

As part of its international openness and commitment to educational innovation, the Euromed University of Fez, in partnership with the University of Surrey, organised the Digital Earth 2026 workshop, bringing together for four days students from the Euromed Polytechnic School (EPS) and their British counterparts.

This immersive program allowed participants to work in mixed teams on the challenges of digitalization in the construction sector and sustainable development. Through practical and innovative activities such as 3D concrete printing, modular construction, and materials characterization tests, students were able to apply their theoretical knowledge to real-world situations.

Guided by academic and technical experts from both institutions, participants developed essential skills in innovation, intercultural collaboration and solving real-world problems.

This initiative illustrates UEMF's commitment to providing high-level international educational experiences, combining academic excellence, technological innovation and preparation for the challenges of sustainable construction of tomorrow.

At the Euromed University of Fez, the "Mediterranean 2026" Prizes recognize figures committed to peace, dialogue and humanism.

As part of the Euromed University of Fez meetings on the Alliance of Civilizations, the "Mediterranean 2026" Awards ceremony honored individuals and institutions committed to peace, intercultural dialogue, international cooperation, and human development. Organized around the theme of artificial intelligence and the future of human civilization, the ceremony highlighted the importance of technological progress grounded in ethical, humanist, and solidarity-based values.

The awards recognized initiatives that contribute to bringing people closer together, promoting moderation, sharing knowledge, and developing an inclusive and sustainable vision of international relations. Through this event, the UEMF reaffirms its role as an academic and cultural space that fosters dialogue between civilizations, reflection on major contemporary challenges, and the building of a future based on peace, cooperation, and responsible innovation.

Introductory seminar on Nudge: an exploration of the mechanisms at the heart of decision-making

Yesterday, we organised a seminar dedicated to the introduction of Nudge, bringing together students, teachers and participants around the contributions of behavioural sciences in understanding and guiding individual and collective decisions.

Hosted by Adil GazaliAhmed DahhoukiYacoub Diftar, ProfessorMohcine ZouakImane Elhadart, this seminar allowed us to explore the cognitive foundations, behavioral biases and mechanisms that influence our choices, putting their applications into perspective in various contexts.

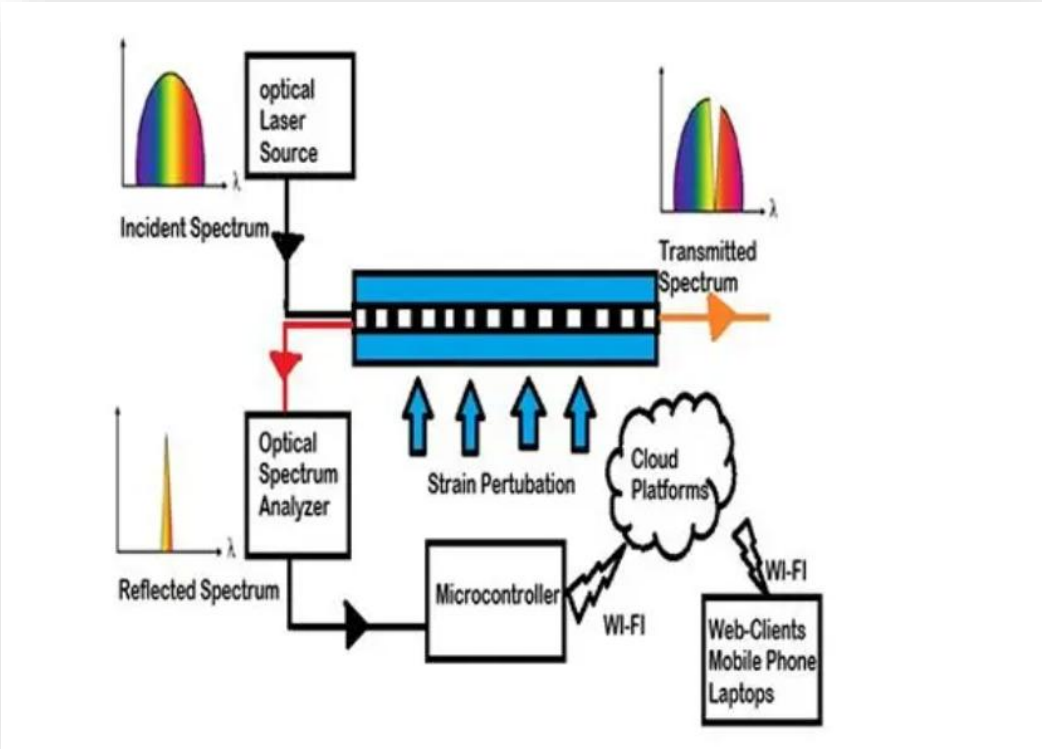

Discussions focused in particular on the integration of Nudge into public services, the training of engineers and the challenges of sustainable mobility, illustrating the potential of these approaches to design more effective policies and solutions, in line with the real behaviors of individuals.

A true space for reflection and dialogue, this seminar gave rise to enriching discussions, promoting the cross-fertilization of expertise and a better understanding of the interactions between science, engineering and public action.

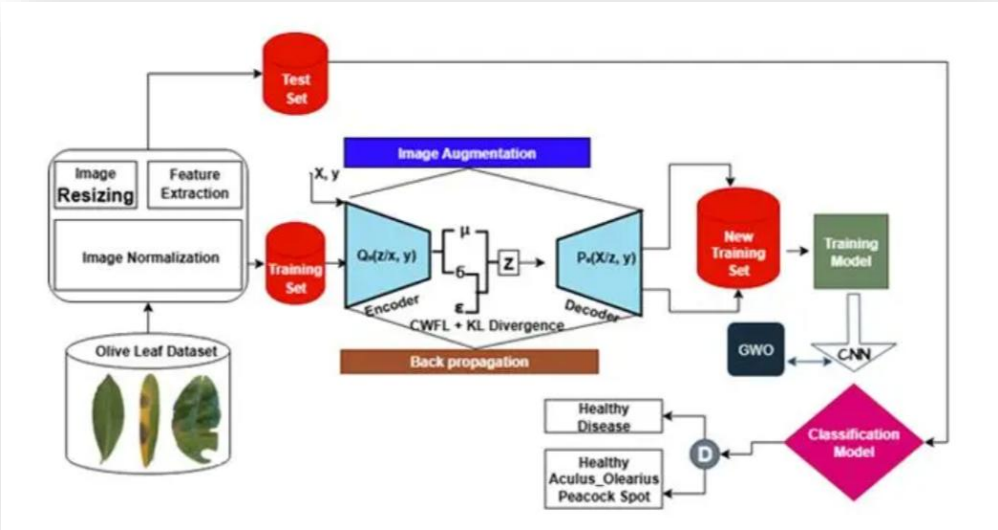

An academic event that is fully in line with the UEMF's dynamic, aiming to promote innovative and interdisciplinary approaches to contemporary challenges.

Doctoral activities

Defense of Doctoral Thesis in "Optics and Photonics" by Mr. Paul Stone MACHESO

This study explores the development and optimization of Fiber Bragg Grating (FBG) sensors for measuring key physical parameters such as temperature, strain, and pressure in harsh and dynamic environments. By using Finite Difference Time Domain (FDTD) simulations, the research enhances sensor performance and investigates applications in Industry 4.0, smart factories, and the Internet of Things. The work also compares single-mode and multimode FBG sensors and proposes an innovative phase-shifted and tilted grating design to improve temperature-sensing sensitivity.

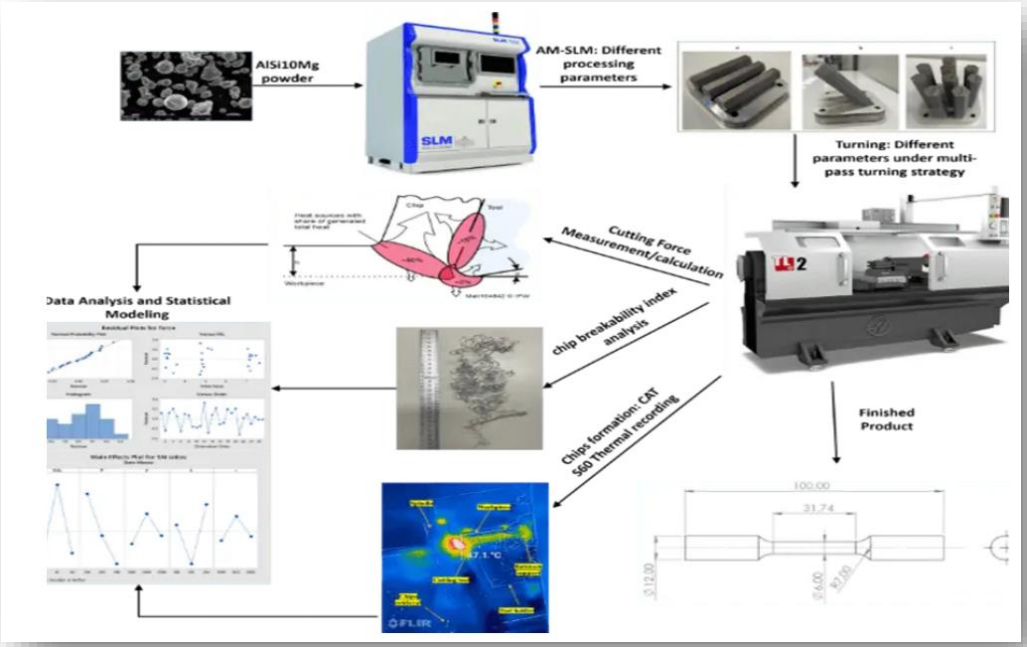

This research investigates the impact of climate change, particularly drought stress, on olive tree cultivation in the Mediterranean region. It integrates artificial intelligence, satellite remote sensing, deep learning, and field experimentation to enhance plant survival and disease management.

Sentinel-2 satellite imagery (2018–2023) combined with machine learning techniques revealed significant changes in olive cultivation areas closely linked to rainfall variability. A novel deep learning model (FLVAEGWO-CNN) achieves high accuracy in olive disease detection, including minority classes, offering an effective tool for precision agriculture.

Field experiments demonstrated that the Languedoc variety showed the highest drought resilience, and optimized deficit irrigation strategies significantly improved yield performance. Overall, the study provides practical and scalable solutions for sustainable olive cultivation and climate risk mitigation in drought-prone regions

Doctoral Thesis Defense in “Mechanical Engineering” by Mr. Nnamdi Chukwunenye IGWE

The Euromed University of Fez announces the thesis defense in mechanical engineering of Nnamdi Chukwunenye IGWE, scheduled for December 20, 2025 at 10 a.m., at the Incubator's Main Hall.

His research focuses on the additive manufacturing of the AlSi10Mg aluminum alloy using the Laser Powder Bed Fusion (LPBF) technique. The study analyzes the impact of several manufacturing parameters (build orientation, laser power, scanning speed, energy density, etc.) on the mechanical, microstructural, and functional properties of the material.

Through a rigorous experimental methodology (Taguchi L9 Design of Experiments), the thesis evaluates criteria such as porosity, density, hardness, corrosion resistance and machining performance.

The results show that certain key parameters strongly influence the quality and performance of the parts produced, thus providing valuable recommendations for optimizing the LPBF process and improving the integrity and performance of industrial components.

Cultural activities

Art & Design Driven Strategies

As part of its cultural activities, the School of Architecture, Design and Urbanism (EMADU) of the Euromed University of Fez organized a conference entitled "Art & Design Driven Strategies", bringing together students, teachers and enthusiasts around the contemporary challenges of artistic creation and design.

Hosted by Dr. Monika Klein, creator and researcher specializing in creative industries, and René Holm, multimedia artist, this meeting offered a space for reflection and dialogue around current artistic dynamics, creative innovation and new approaches to design in contemporary practices.

Through their presentations and discussions with the public, the speakers shared inspiring perspectives, illustrating the richness of the intersections between art, research and creation.

Beyond a conference, this event reflects UEMF's commitment to promoting cultural openness, interdisciplinary thinking and international dialogue within its eco-campus.

Diplomatic institutional visit

UEMF–EMUNI Conference at the European Parliament: Higher education at the heart of Euro-Mediterranean cooperation

On December 11, 2025, the Euromed University of Fez and EMUNI organised the "Bridging Continents" conference at the European Parliament in Brussels, highlighting the strategic role of universities in Euro-Mediterranean cooperation.

The event highlighted the co-creation of programs, joint degree programs and two-way mobility of students and teacher-researchers, as well as the importance of strengthening existing institutions (UEMF, EMUNI, UNIMED, TETHYS) to support applied research, innovation, technology transfer and scientific valorization.

The conference brought together academics, representatives of the European Commission, the Union for the Mediterranean, ambassadors and political decision-makers, confirming that the challenges of the Euro-Mediterranean area require joint and partnership action between the North and the South to promote innovation, scientific cooperation and sustainable development.

Courtesy and friendship visit of the Ambassador of Benin to the UEMF

The Euromed University of Fez (UEMF) welcomed His Excellency Mr. Joseph Ahanhanzo, Ambassador of the Republic of Benin to the Kingdom of Morocco, for a courtesy visit aimed at strengthening academic cooperation between Morocco and African countries. Received by the President of UEMF, Professor Mostapha Bousmina, the Ambassador praised the quality of the university's academic model, infrastructure, and equipment, as well as its role in training African talent.

This meeting resulted in the agreement of a concrete action plan for developing academic partnerships with Beninese universities, including joint training programs, capacity building in health and emerging technologies, and support for research, innovation, and entrepreneurship. Within this framework, the UEMF also donated two 3D printers to Beninese universities.

Placed under the banner of South-South cooperation, this visit illustrates the UEMF's commitment to African higher education geared towards sustainable development and the sharing of expertise.

Discovering the UEMF innovation ecosystem during the signing of the Jazari Industry X.0 agreement

On the sidelines of the signing of the Jazari Industrie X.0 agreement, Professor Mostapha Bousmina, President of the Euromed University of Fez, led a tour of the eco-campus in the presence of Ms. Amal El Fallah Seghrouchni and Mr. Ryad Mezzour, accompanied by their delegations.

The guests discovered the university's main scientific and technological platforms, including laboratories in engineering, robotics, artificial intelligence and 3D printing, as well as the Euromed Innovation Center (EIC) where students presented innovative projects from the Project-Based Approach (PBA).

This immersion highlighted the innovation and research ecosystem of UEMF, confirming its role as an academic platform serving the technological and industrial transformations of Morocco.

Visit to the infrastructure and innovation hubs of the UEMF

The institutional visit continued with a tour of the main facilities of the Euromed University of Fez, illustrating its integrated model based on innovation, excellence in education, and social engagement. The delegation notably visited the Euromed Sports Center, the Euromed Innovation Center (EIC), and the experimental farm of the Agritech cluster.

This immersive experience highlighted the university's efforts in developing innovative solutions, encouraging student entrepreneurship, and promoting sustainable technologies to address environmental and economic challenges. The visited facilities also demonstrated UEMF's commitment to student well-being, applied research, and the transition to a more sustainable and resilient development model.

Student events

Official launch of the Hult Prize 2025–2026 at the UEMF

The Hult Prize Club UEMF officially launched the 2025–2026 edition of the Hult Prize at the Euromed University of Fez, marking the beginning of a new entrepreneurial adventure focused on social and environmental impact. This launch event provided an opportunity to present the international competition, its objectives, and the opportunities it offers to students wishing to develop innovative, high-impact projects.

Through an interactive and dynamic session, participants discovered the principles of social entrepreneurship, the importance of responsible innovation, and the role of leadership in addressing current challenges. The discussions encouraged students to think about concrete solutions to social and environmental problems, while developing their initiative and creativity.

This initiative is part of a broader effort to promote engaged, ambitious youth who are aware of their role in building a more sustainable future.

Hult Prize Online Workshop: Discovering Design Thinking for High-Impact Ideas

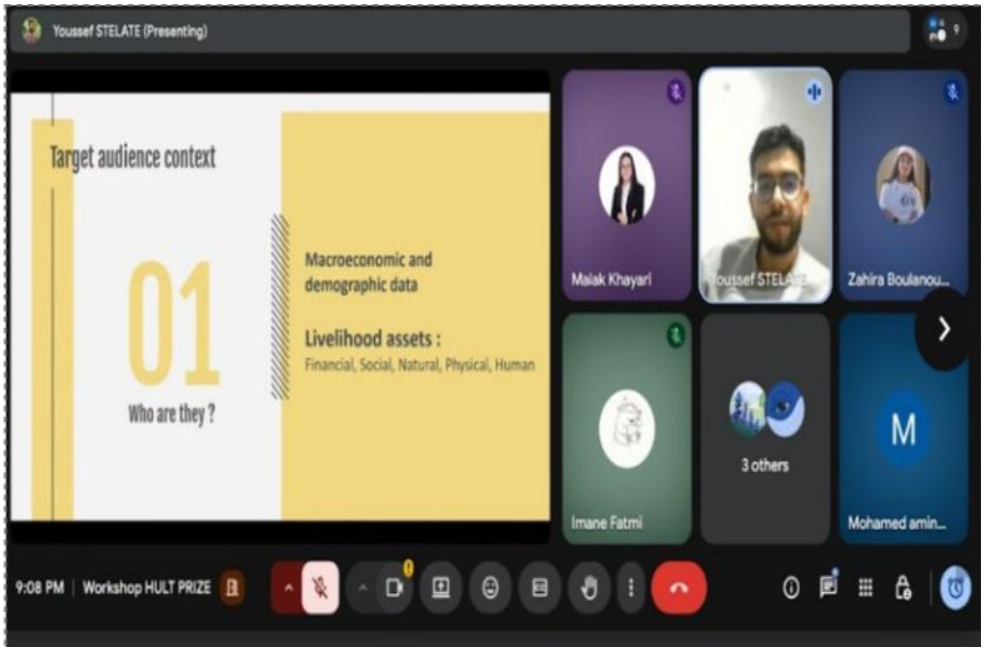

The Hult Prize Club organized its first online workshop dedicated to Design Thinking, offering participants a complete immersion in the key stages of this methodology: empathy, problem definition, ideation, prototyping and testing.

The workshop encouraged students to design innovative and high-impact solutions based on real human needs, while promoting active engagement, collaboration, and the sharing of ideas within the group.

This session enabled participants to develop their creativity, critical thinking and teamwork skills, while strengthening their understanding of user-centered innovation processes.

Second Hult Prize Online Workshop: Transforming Ideas into Viable Projects

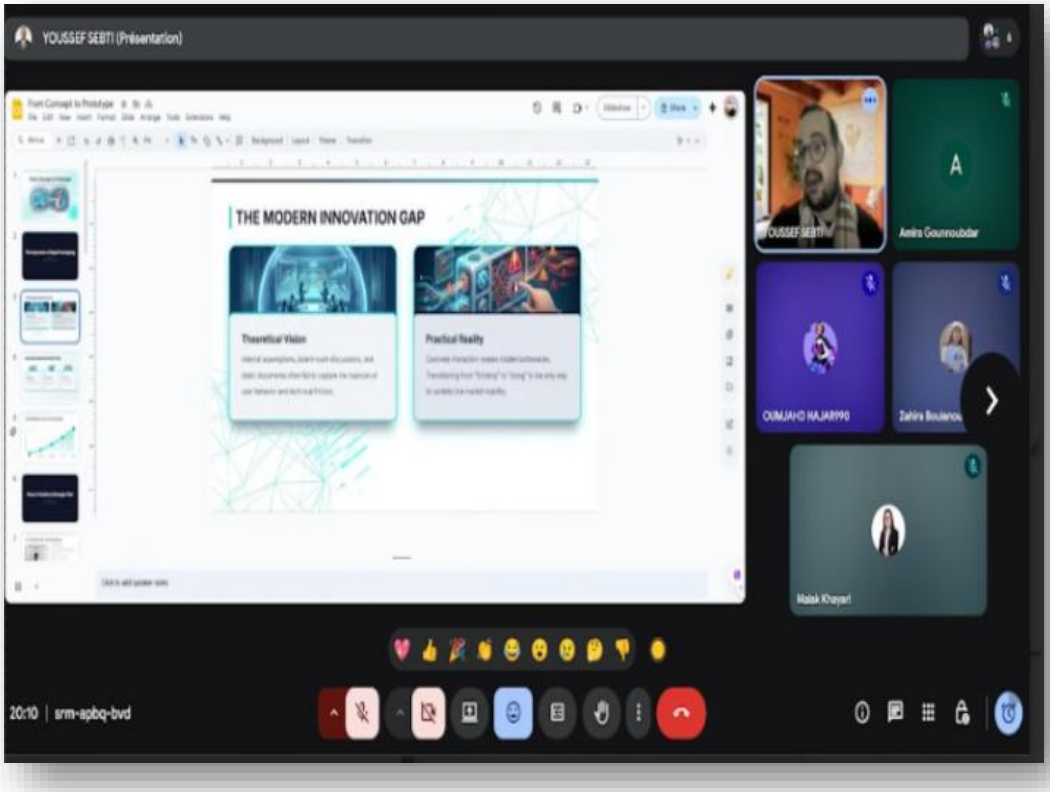

The Hult Prize Club organized its second online workshop, designed to guide participants in transforming their initial ideas into structured and viable projects.

The session combined interactive discussions and practical exercises, covering key stages such as ideation, project development, and concept refinement. Students were thus able to develop their creative thinking, their ability to analyze and structure ideas, and their social entrepreneurship skills.

This workshop provided a collaborative learning space that fostered strategic thinking and innovation, strengthening participants' commitment to creating solutions with a strong social and environmental impact.

Third Hult Prize Online Workshop: From Concept to Prototype

The Hult Prize Club organized its third online workshop, designed to support teams in prototyping their projects, transforming their ideas into concrete and testable solutions.

Participants discovered practical tools to structure, refine and validate their concepts, while taking part in interactive exercises, group discussions and sharing experiences.

This session helped to strengthen the students' creativity, rigor and capacity for innovation, while effectively preparing them to present solid projects during the final competition of the Hult Prize.

ECG Interpretation Training led by Dr. Mohamed Amine Guessab 02/04

As part of its internal training program, the Elite Club organized, on Thursday, April 2, 2026, a training session in electrocardiogram (ECG) interpretation, led by Dr. Mohamed Amine Guessab.

The aim of this session was to strengthen the clinical skills of club members in reading and analyzing ECG tracings, an essential tool in the diagnosis of cardiovascular diseases. Through a combined theoretical and practical approach, participants acquired the fundamental principles of interpretation, as well as keys to applied clinical reasoning.

This initiative reflects the Elite Club's commitment to promoting excellence, capacity building, and skills development among its members by offering high-quality training led by experienced healthcare professionals. It also demonstrates the club's dedication to effectively preparing its members for the challenges they face in the field, particularly during medical caravans and community health initiatives.

Partnership

Visit of the EPF Engineering School delegation to the Euromed University of Fez

The Euromed University of Fez (UEMF) was pleased to welcome a delegation from EPF Engineering School, one of the leading French engineering schools, led by Mr. Emmanuel Duflos, Director General of the institution.

This visit is part of strengthening academic cooperation between the two institutions, aimed at developing synergies around engineering programs and encouraging student and faculty mobility through internships, seminars and integrated training.

This meeting marks the continued development of the UEMF's international network of academic partners, and reaffirms its commitment to training engineers who are open to the world.

Launch ceremony of the Audencia Executive MBA – UEMF

It was in an atmosphere that was both friendly and full of ambition that the Audencia – UEMF Executive MBA was launched, in the presence of Mr. Taoufik OUAZZANI CHAHDI, Director of the EMBA program and Advisor to the President of UEMF, Ms. Khadija Essafi, Vice-President in charge of Academic and Cultural Affairs at UEMF, and Dr. Valérie Claude-Gaudillat, Head of MSc Business Strategy & Consulting and Professor of Strategy at Audencia, on the occasion of welcoming a first cohort with very diverse profiles.

The result of a collaboration between Audencia Business School (ABS) and the Euromed University of Fez (UEMF), this program of excellence is deployed at UEMF and leads to the awarding of a double degree; the Audencia – UEMF Executive MBA, holder of the triple AMBA, EQUIS and AACSB accreditation, as well as a degree awarded by the Euromed University of Fez.

Designed to support decision-makers in a constantly evolving environment, the Audencia-UEMF EMBA aims to train leaders capable of thriving in complex and uncertain contexts. The program develops a comprehensive understanding of management, combining strategic vision, agility, and the ability to transform, in order to support the creation of sustainable performance.

A new step for high-level executive education, serving leadership and academic excellence.

Strengthening bridges between academic and economic ecosystems

The Euromed University of Fez hosted a Chinese delegation of economic decision-makers to explore cooperation opportunities with Morocco. Discussions focused on several strategic sectors: smart agriculture, green economy, energy and batteries, clean technologies, environmental equipment, industrial digitalization, drones, biotechnology, and creative industries.

This visit provided an opportunity to showcase the university's technological platforms and innovation ecosystem, paving the way for academic, technological, and industrial partnerships. It reinforces UEMF's position as a regional hub for innovation and international cooperation in service of sustainable development.

The UEMF hosts the 6th e Meeting of the Board of Directors of the Green H2 Morocco Cluster

On January 23, 2026, the Euromed hosted the sixth meeting of the Board of Directors of the Green H2 Morocco Cluster, highlighting its leading role in research and innovation in strategic sectors related to the energy transition. Prior to the meeting, participants toured the university's facilities, including sports facilities, laboratories in civil engineering, mechanics, biotechnology, and chemistry, as well as the ideation incubator and the Fez Smart Factory, demonstrating UEMF's capabilities in research and technology transfer.

The meeting focused on analyzing the Cluster's financial and organizational situation, reviewing activities, future development, and strengthening governance, within a context favorable to green hydrogen. The event illustrates the UEMF's commitment to supporting innovation, institutional partnerships, and the development of future-oriented sectors in Morocco, particularly in renewable energies.

Towards a new chapter of cooperation between the University of Paris 1 Panthéon-Sorbonne and the Euromed University of Fez

The
Euromed University of Fez welcomed Professor Christine Neau-Leduc, President of Paris 1 Panthéon-Sorbonne University, to strengthen a robust academic partnership. This collaboration, already exemplary through the off-campus Master's program in Business Law, will be expanded to include scientific research, social innovation, the University of Fez recruitment of postdoctoral researchers, and the creation of new dual-degree programs. The initiative aims to enhance talent development, foster innovation, and cultivate a high-impact international partnership.

[Call for applications] Mobility at the University of Liège

As part of its efforts to strengthen the international dimension of its programs, the Euromed University of Fez has launched a call for applications for academic mobility at the University of Liège, aimed at 2nd-year students.ᵉand 3ᵉyear of the engineering cycle in mechanical engineering at the Euromed Polytechnic School (EPS). This opportunity allows selected students to pursue a period of study in an international academic environment, promoting the development of scientific, linguistic and intercultural skills.

Candidate selection is based on academic criteria, language proficiency, and student motivation and commitment. The process includes several stages, including application submission, internal pre-selection, file evaluation, and interviews before final appointment by the university.

This initiative is part of UEMF's commitment to promoting international mobility, strengthening university partnerships and preparing future engineers to thrive in a globalized scientific and professional environment.

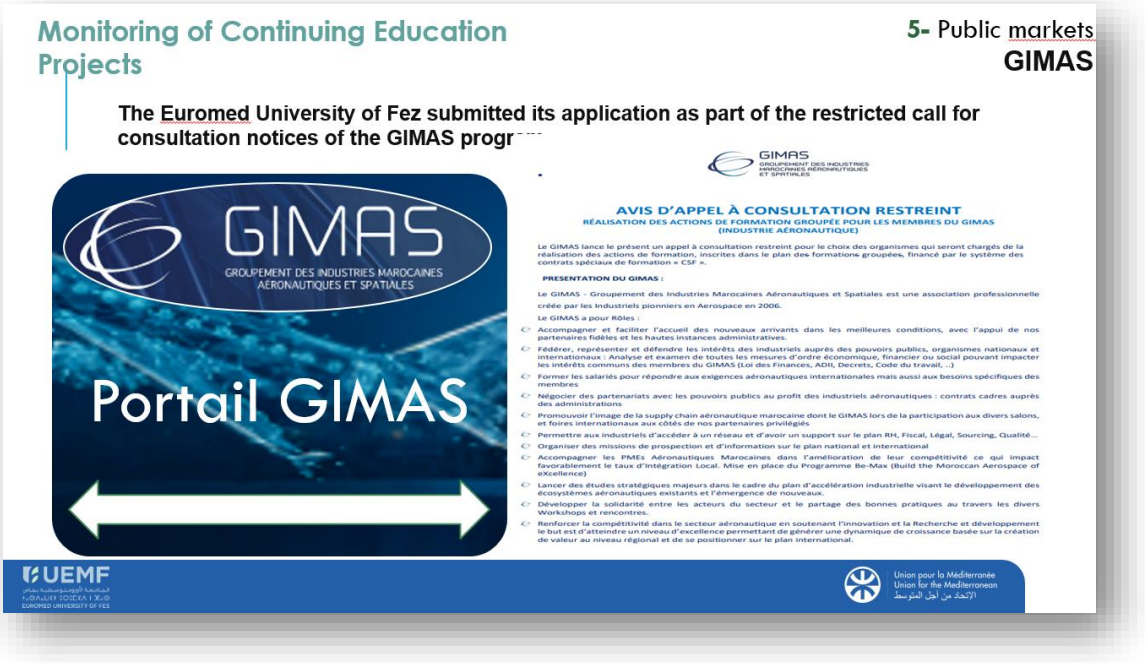

Application to the Call for Expressions of Interest – JobInTech Program (MNC)

On January 28, 2025, the UEMF, represented by its President, Professor Mostapha Bousmina, officially submitted its application to the Call for Expressions of Interest (CEI) launched by Maroc Numeric Cluster (MNC) within the framework of the national JobInTech program. This application, addressed directly to MNC and signed by the President of the UEMF, commits the university to providing the human and technical resources necessary for the success of a potential partnership. The proposal, completed on April 18, 2025, was deemed eligible and selected by the evaluation committee, thus placing the UEMF among the officially listed providers participating in the JobInTech program. This program aims to train qualified digital professionals to meet the regional needs of the digital job market. The actual allocation of training will be determined later in consultation with the JobInTech Monitoring Committee, according to a defined schedule. This selection represents strong institutional recognition of the quality and relevance of UEMF's training offerings in the field of information and digital technologies.

Application for the Restricted Tender – GIMAS Programme (Aerospace Industry)

UEMF submitted its application in response to the Restricted Call for Tenders issued by GIMAS (Groupement des Industries Marocaines Aéronautiques et Spatiales), a professional association founded in 2006 by pioneering aerospace industry leaders in Morocco. This call for tenders concerns the delivery of group training programs for GIMAS members, financed through Special Training Contracts (CSF), which are part of the group training plan. GIMAS's mission is to support industry players, advocate for their interests with public authorities, train employees to meet international aerospace standards, and strengthen the competitiveness of Moroccan aerospace SMEs, particularly through the Be-Max Program (Build the Moroccan Aerospace of Excellence). By responding to this call, UEMF affirms its strategic positioning as an essential player in vocational training in high value-added industrial sectors, and its desire to actively contribute to the development and competitiveness of the Moroccan aeronautical industrial fabric at the national and international level.

ALTEN 2025 Training Plan – Developing Innovation Skills

UEMF is actively involved in the implementation of ALTEN's 2025 Training Plan. ALTEN is an international engineering and technology group. This partnership is part of a strategic approach to anticipating future skills needs and supporting innovation within the company. UEMF assists ALTEN in developing the skills of its engineers and employees by offering customized training programs aligned with the technological requirements and innovation challenges of the sector. This collaboration strengthens UEMF's position as a partner of choice for major technology companies seeking to enhance the skills of their human resources, and demonstrates the recognition of its expertise in instructional design within the fields of technology and innovation.

Contract with the National Agency for Public Equipment (ANEP)

The University of Evangelical Mali (UEMF) has signed a training contract with the National Agency for Public Equipment (ANEP). This partnership commits the university to strengthening the skills of the agency's managers and staff in the areas of infrastructure project management, public engineering, and the management of public facilities. It demonstrates the UEMF's ability to meet the continuing professional development needs of major national public agencies.

MORHEL Project – Strand 3 (Leadership in Moroccan Universities)

The UEMF (Moroccan University of Fez) is participating in the MORHEL – Strand 3 project, a structural project dedicated to leadership development in Moroccan universities. Within this framework, the UEMF has established a New Leadership Development Centre and developed a dedicated training program in collaboration with European university partners, including Emuni University. This project is coordinated by the UEMF's Vice-Presidency for Research, Innovation, and Entrepreneurship. It aims to transform governance and leadership practices within Moroccan higher education institutions, drawing inspiration from international best practices.

Agreement with Agritech – Training and Professional Integration

The UEMF (Union of Moroccan Farmers) has developed a partnership agreement with Agritech for a training and professional integration project in the agricultural sector. The UEMF provides support through two main areas: firstly, by proposing a structured rationale for the training and professional integration project; and secondly, by designing an organizational framework to ensure the project's effective implementation. This initiative is part of the digital transformation of the Moroccan agricultural sector and aims to train qualified professionals capable of meeting the sector's growing need for technological skills applied to agriculture.

Agreement with JobInTech – Support for the National IT Ecosystem

In addition to its inclusion in the JobInTech program (documented in Part 5), UEMF has finalized a formal agreement to support the national IT ecosystem by creating a large pool of job-ready talent, continuously adapted to the needs of market players and technological developments. This agreement formalizes UEMF's role as a leading training provider for developing digital skills in Morocco, in response to the needs of companies in the technology sector.

Thematic Training Program – Hassan II University Hospital

The UEMF conducts a thematic training program for the staff of the Hassan II University Hospital, covering a wide range of hospital and biomedical topics: practical guide to medical devices, regulations in civil engineering and hospital architecture, quality assurance in biomedical maintenance, digitalization of the logistics and supply chain, pharmaceutical stock management, management control applied to the pharmaceutical supply chain, stockout management, and inventory of medical equipment. This multi-thematic program demonstrates the UEMF's expertise in training healthcare professionals on highly specialized and strategic subjects for hospital performance.

Visit of the LafargeHolcim Delegation to the UEMF

On September 23, 2025, a delegation from LafargeHolcim, a leading global building materials company, paid an institutional visit to the UEMF (University of Engineering and Management of Morocco). This high-level meeting highlights the UEMF's attractiveness as a continuing education partner for major international industrial groups operating in Morocco. It opens up opportunities for collaboration in the fields of civil engineering, sustainable construction, industrial management, and technical training for the group's engineers and managers.

University Diploma in Architectural Programming and Urban Planning – EMADU (1st edition)

L'The Euromed School of Architecture, Design, and Urban Planning (EMADU) successfully launched and concluded the first edition of its University Diploma in Architectural Programming and Urban Planning, held in Rabat with 30 participants. This high-level continuing education program is designed for professionals in the architecture and urban planning sectors who wish to deepen their skills in architectural programming, urban planning, and development project management. The holding of this training in Rabat demonstrates UEMF's ability to extend its continuing education programs beyond its campus, meeting the needs of professionals in major Moroccan cities.

University Diploma in Health Technology Assessment – FEP (1st edition, Class of 2024)

ThereThe Euromed Faculty of Pharmacy (FEP) successfully completed the first edition of its University Diploma in Health Technology Assessment (HTA), with 29 participants from the Class of 2024, in Rabat. The closing ceremony, organized in partnership with several institutions including the CCHO, the ASS, and the MEPS, brought together all stakeholders in the healthcare sector. This pioneering program in Morocco aims to train experts capable of assessing the efficacy, safety, efficiency, and impact of medical technologies, thus addressing a crucial need within the Moroccan healthcare system for informed decision-making in the pharmaceutical and medical fields.

Source: Continuing Education Report 2025-2026 - Directorate General for Academic and Cultural Affairs

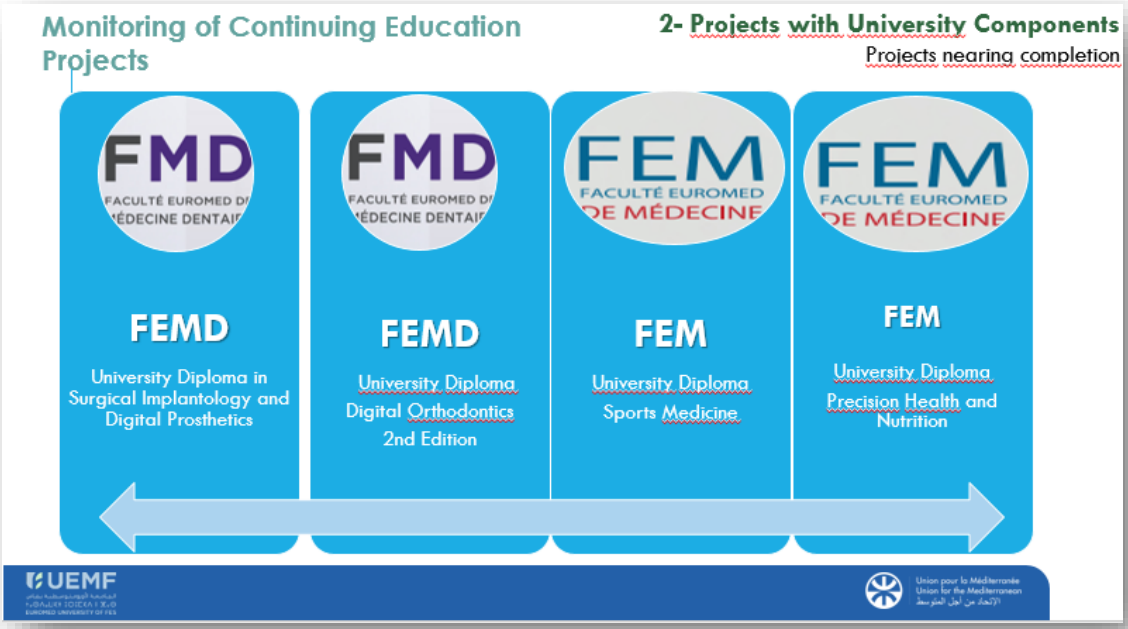

University Diploma in Digital Orthodontics – FEMD (1st edition, Class of 2024)

ThereThe Euromed Faculty of Dental Medicine (FEMD) successfully completed the first edition of its University Diploma in Digital Orthodontics, with 25 participants from the Class of 2024. This innovative program, which integrates the latest digital technologies applied to orthodontics, enabled participants to master cutting-edge tools and techniques in digital orthodontics. The graduation ceremony celebrated the completion of this first cohort of digital orthodontics specialists trained by FEMD, positioning the university as a pioneer in training for next-generation dental technologies in Morocco.

Source: Continuing Education Report 2025-2026 - Directorate General for Academic and Cultural Affairs

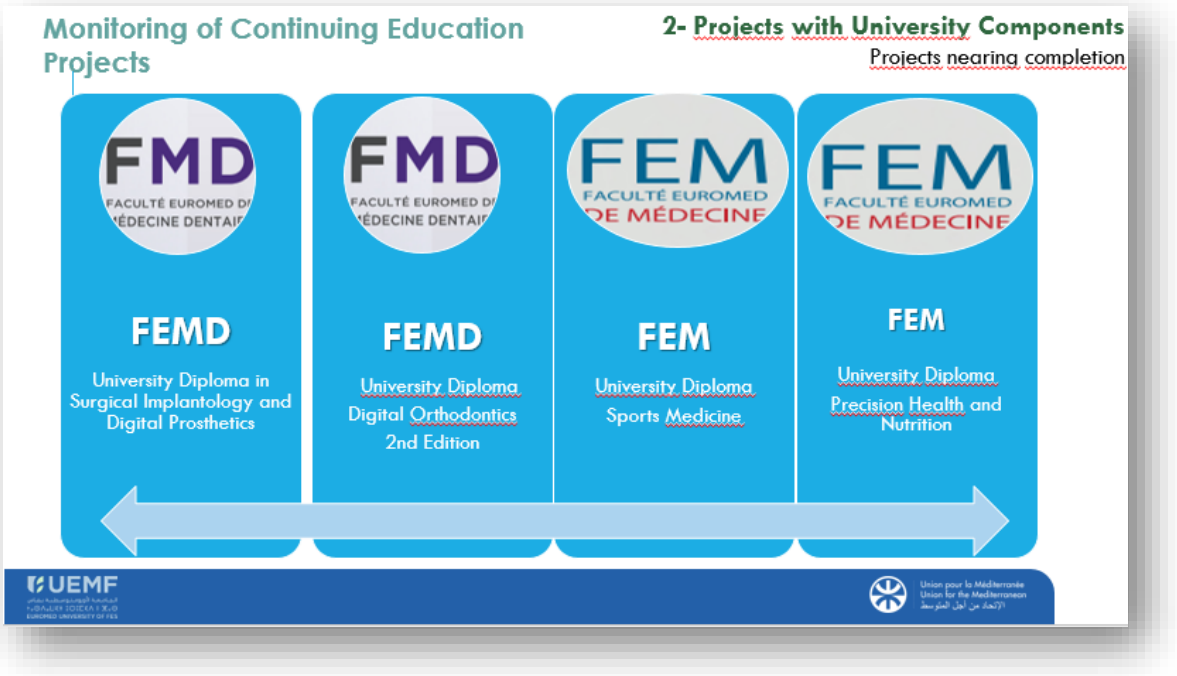

University Diploma in Digital Orthodontics – FEMD (2nd edition, Class of 2025)

Building on the success of its first edition, theThe Euromed Faculty of Dental Medicine (FEMD) has launched the second edition of its University Diploma in Digital Orthodontics for the Class of 2025. This new cohort, already in training, benefits from the experience gained from the first edition and an enriched and refined curriculum. The launch ceremony and the training sessions already completed demonstrate the appeal and sustainability of this flagship UEMF program in the field of digital dentistry, thus confirming FEMD's position as a national leader in continuing education for dental surgeons in digital technologies.

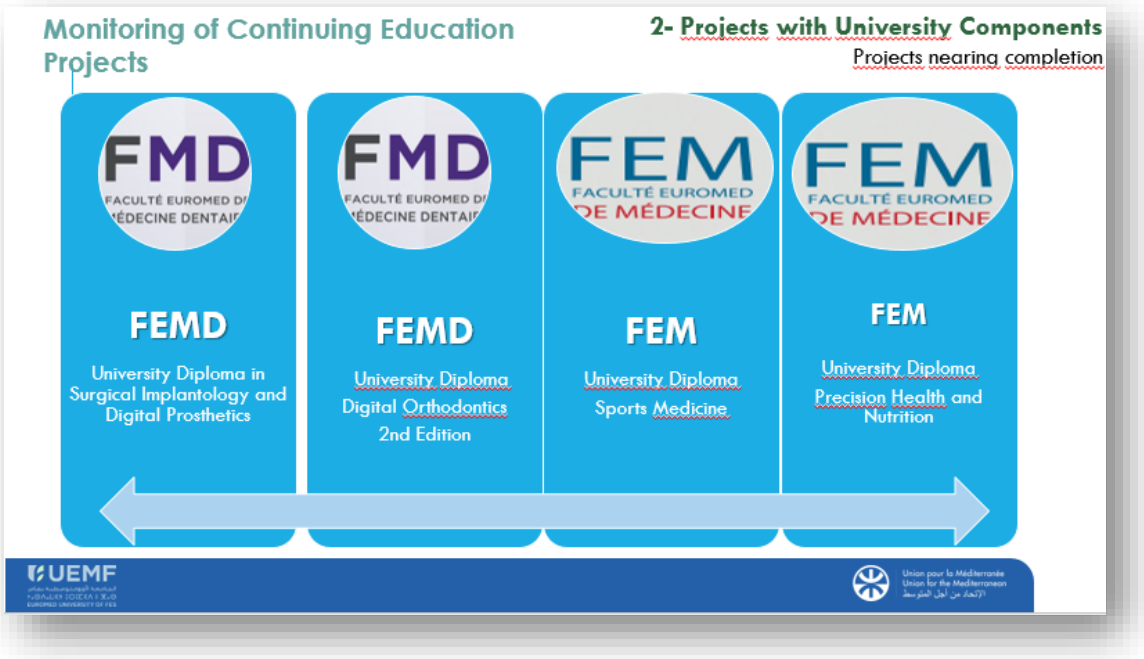

Source: Continuing Education Report 2025-2026 - Directorate General for Academic and Cultural Affairs

University Diploma in Surgical Implantology and Digital Prosthetics – FEMD

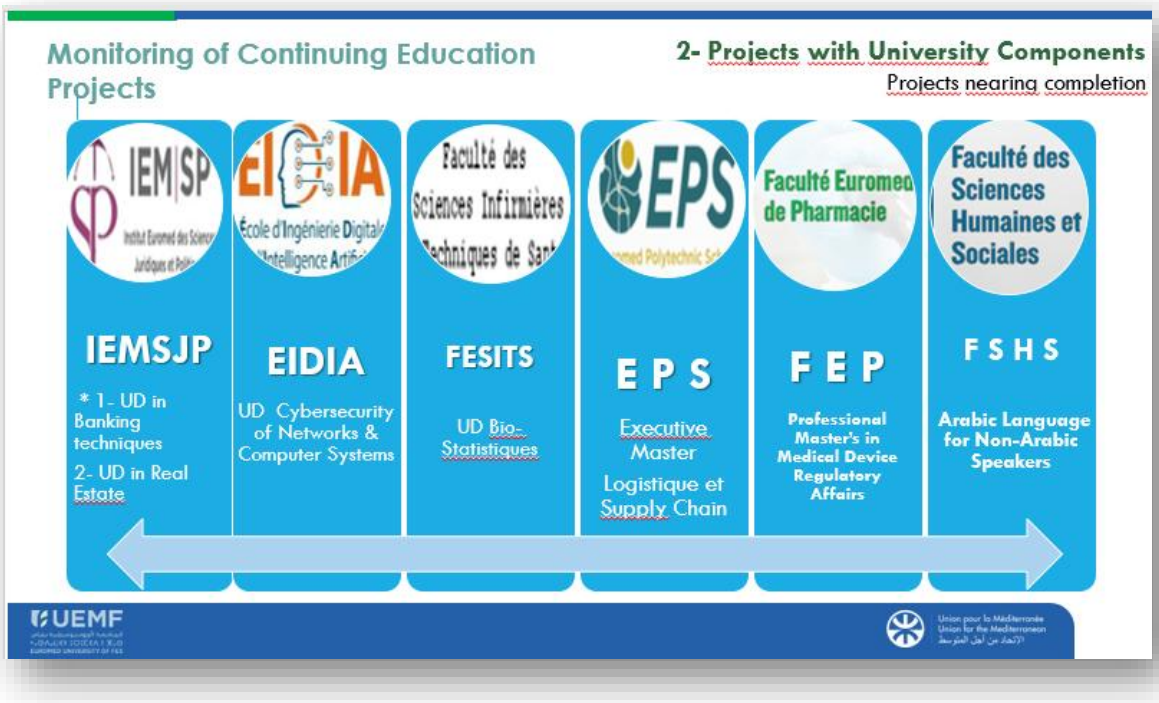

ThereThe Euromed Faculty of Dental Medicine (FEMD) is finalizing a new University Diploma in Surgical Implantology and Digital Prosthetics. This specialized continuing education program aims to train dental and maxillofacial surgeons in advanced surgical implantology techniques combined with digital prosthetic design tools. It builds upon FEMD's expertise in training for cutting-edge dental technologies and responds to a growing demand for specialization in this rapidly expanding field in Morocco.

Source: Continuing Education Report 2025-2026 - Directorate General for Academic and Cultural Affairs

ThereThe Euromed Faculty of Medicine (FEM) is finalizing a University Diploma in Precision Health and Nutrition, an innovative program at the intersection of precision medicine, genomics, and nutritional science. This cutting-edge continuing education program aims to train healthcare professionals capable of integrating personalized precision medicine approaches into clinical and nutritional practice, thus addressing recent advances in personalized medicine and the growing importance of prevention through diet.

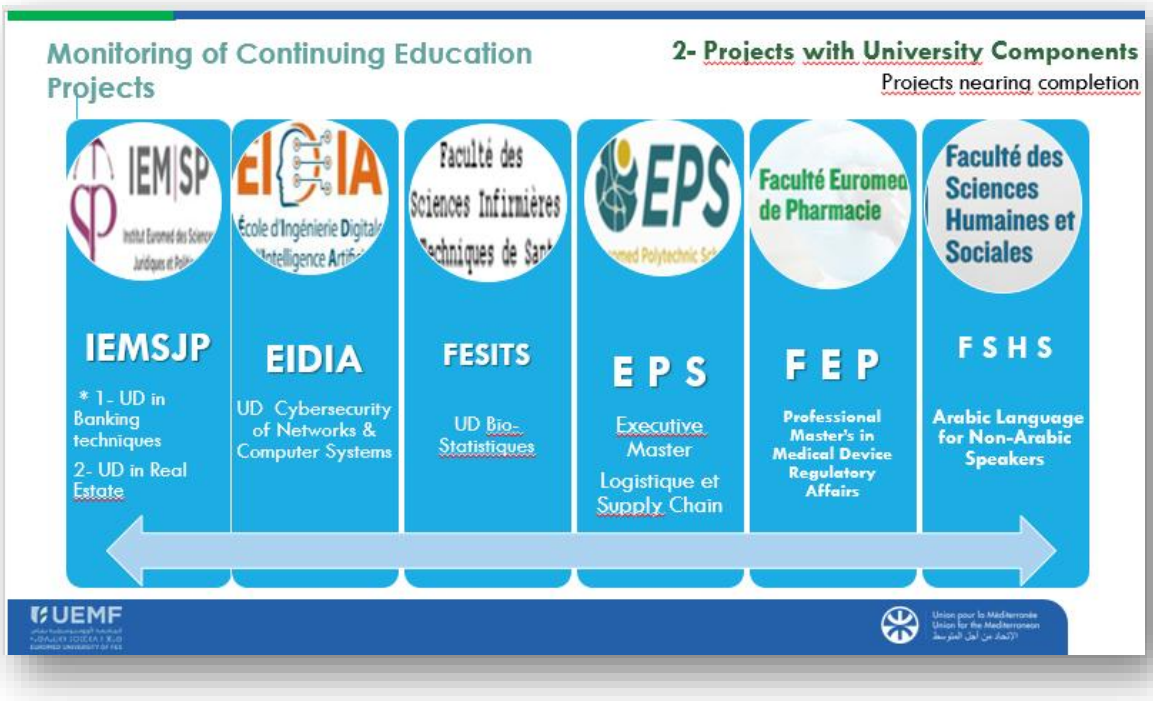

Source: Continuing Education Report 2025-2026 - Directorate General for Academic and Cultural Affairs

L'The School of Digital Engineering and Artificial Intelligence (EIDIA) is finalizing a University Diploma in Cybersecurity of Networks and Computer Systems. This highly technical continuing education program addresses the growing demand for qualified cybersecurity professionals, in a context of increasing cyber threats and the accelerated digitalization of the Moroccan economy. It aims to train experts capable of designing, deploying, and managing robust IT security systems for public and private organizations.

Source: Continuing Education Report 2025-2026 - Directorate General for Academic and Cultural Affairs

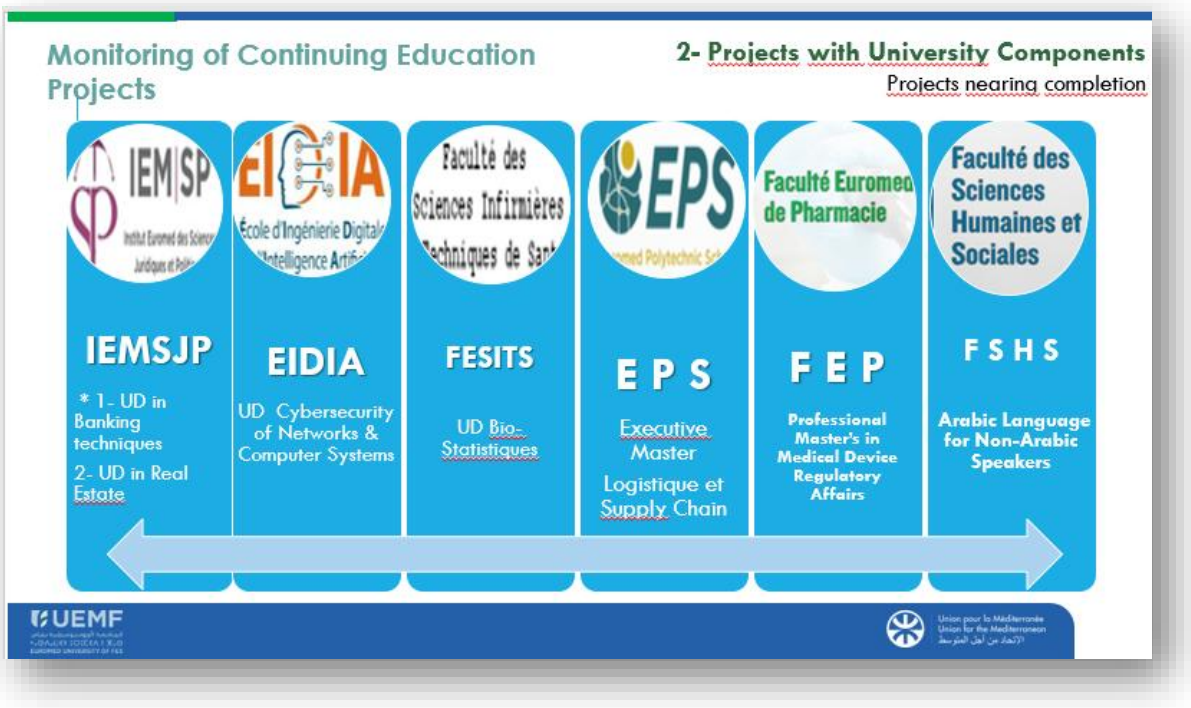

University Diploma in Biostatistics – FESITS

ThereThe Faculty of Nursing and Health Sciences (FESITS) is finalizing a University Diploma in Biostatistics, a continuing education program designed for healthcare professionals, researchers, and decision-makers in the medical sector who wish to master statistical methods applied to the life and health sciences. This program addresses a growing need for data analysis skills in the medical and clinical research fields, thereby contributing to improving the quality of health research in Morocco.

Source: Continuing Education Report 2025-2026 - Directorate General for Academic and Cultural Affairs

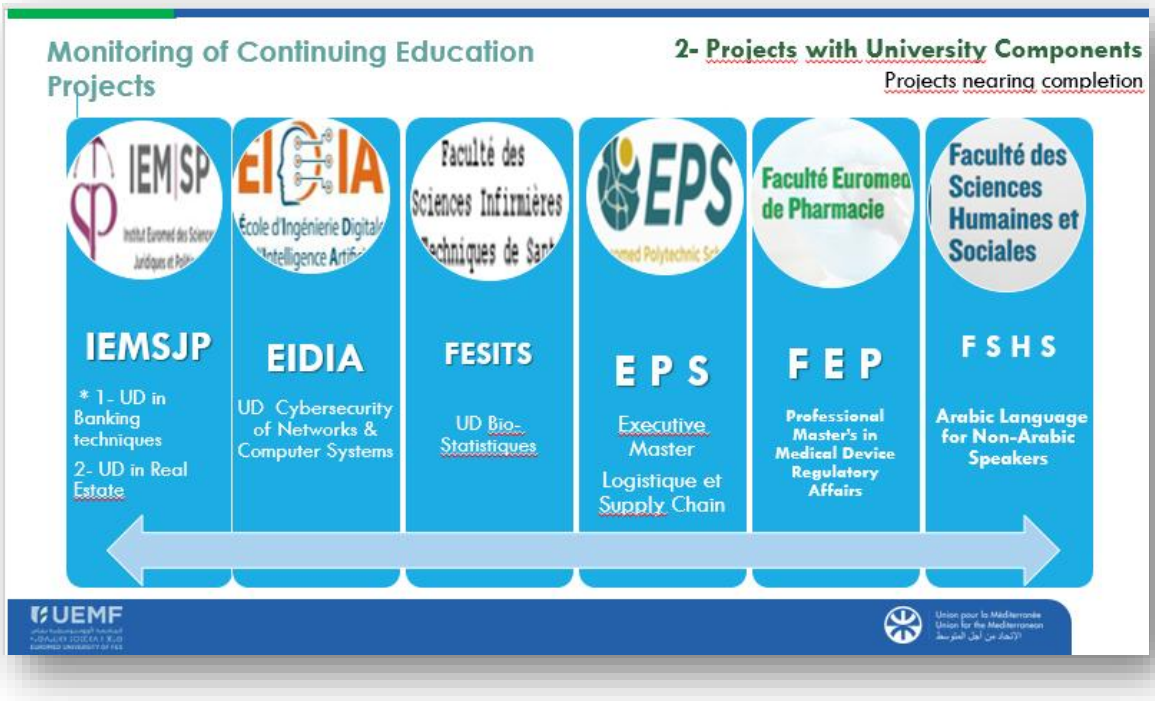

Executive Master in Logistics and Supply Chain – EPS

L'Euromed Polytechnic School (EPS) is finalizing an Executive Master's degree in Logistics and Supply Chain, a high-level continuing education program designed for executives and managers seeking advanced expertise in logistics and supply chain management. In a context of profound transformation of global supply chains and the development of Moroccan infrastructure (the port of Tangier Med, logistics zones), this program addresses the strategic needs of the Moroccan and African markets for supply chain experts.

[Call for applications] Dual degree program at the EPF School of Engineering

As part of its efforts to strengthen international engagement, the Euromed University of Fez offers a dual degree program with EPF Engineering School for Big Data and Artificial Intelligence students at EIDIA. This program allows selected students to complete part of their studies abroad, fostering the development of technical, linguistic, and intercultural skills.

Selection is based on academic performance, language level and motivation, through a structured process including application, pre-selection, interviews and final nomination.

This initiative is part of UEMF's commitment to training highly qualified engineers, capable of operating in an international environment and meeting current technological challenges.

[Call for applications] Mobility at the EPF Engineering School

The Euromed University of Fez offers a mobility and dual degree opportunity with EPF Engineering School, designed for students in Big Data and Artificial Intelligence. This program allows selected students to complete part of their studies abroad, strengthening their technical, linguistic, and intercultural skills.

Selection is based on academic results, language level and motivation, through a structured process including application, pre-selection and interviews.

This initiative aims to train engineers capable of thriving in an international environment and meeting current technological challenges.

Applications now open – International Mobility

The Euromed University of Fez is launching a call for applications for academic mobility at the Politecnico di Torino University (Italy), intended for students enrolled in Civil Engineering, Electrical Engineering and Cybersecurity Engineering.

This program offers students the opportunity to gain international academic experience at a renowned partner institution, while developing their skills in strategic engineering fields.

EMBA Audencia – UEMF: Deployment of the Financial Analysis module

EMBA Audencia – UEMF: Deployment of the Financial Analysis module

Understanding a company's performance means knowing how to read beyond the numbers.

From April 17 to 19, 2026, as part of the EMBA programAudencia– UEMF, the participants followed the Financial Analysis module, led by Prof.Karim BENNIS.

Through a rigorous approach rooted in professional practices, this module made it possible to decipher financial statements and to assess the solidity and risk profile of companies.

These three days also provided an opportunity to deepen key skills: performance analysis, identification of risk factors, understanding of growth dynamics and assessment of a company's ability to create value.

An essential module for training capable decision-makers to inform their strategic choices through solid and relevant financial analysis.

Bernspire 2025-2026: Applications open for international student competitions

Bernspire, a Swiss association committed to education, innovation and the development of young talent internationally, announces the official opening of applications for the 2025-2026 edition of its academic competitions.

Organized annually on a supra-regional scale, Bernspire's Graduation Project Challenges are aimed at final-year university students in the fields of engineering and social sciences. This initiative seeks to promote innovative graduation projects that offer concrete solutions to contemporary technological, societal, and environmental challenges.

The competitions bring together participants from several international universities and are evaluated by a jury composed of academic experts and professionals from different countries, thus offering candidates international visibility and a unique opportunity to showcase their research and innovation work.

Applications are open to students preparing their final year project during the 2025-2026 academic year.

Students wishing to participate can consult the application procedures and submit their projects via the official Bernspire website:
www.bernspire.com/the-details

The results of previous editions and the winning projects can be viewed via:
www.bernspire.com/2024-2025-winners

The Euromed University of Fez hosts a strategic event on AI and signs a structuring agreement for Industry X.0

On March 10, 2026, the Euromed University of Fez hosted a high-level event dedicated to the role of artificial intelligence in the digital transformation of organizations, with a focus on Industry X.0 and the healthcare sector. Organized in partnership with the Ministry of Digital Transition and Administrative Reform and the Ministry of Industry and Trade, this meeting was marked by the signing of the Jazari Industry X.0 agreement, aimed at strengthening synergies between academic research, industry, and public institutions in order to accelerate technology transfer and the commercialization of scientific research.

As part of the "AI Made in Morocco" program, this initiative aims to structure a national artificial intelligence ecosystem that fosters innovation, industrial competitiveness, and the creation of economic and societal value. The event also brought together public decision-makers, researchers, and industry representatives for two panels dedicated to technology transfer and the impact of AI in the healthcare industry, highlighting the opportunities and challenges associated with the deployment of artificial intelligence technologies.

UEMF Hosts Strategic Partnership Event to Advance Industry 4.0 and Digital Innovation

Euromed University of Fes hosted a partnership event bringing together UEMF,ANAPEC,CGEMFez-Meknes, andDigital Development Agency-ADDto support Industry 4.0 transformation.

The program opened with a guided tour of UEMF's technological platforms, including spaces dedicated to civil engineering, 3D printing, CNC machining, robotics, big data, and applied industrial technologies.

Speakers included Khadija Essafi,Tijani Bounahmidi,Abdellah CHOUIKH,Omar Tajmouati,Ghada BOUHLAL, andAsmae ABADI, who moderated discussions on how training, innovation, and business support can help companies adapt to new industrial challenges.

Awards and Distinctions

Round University Ranking 2026: Euromed University of Fez confirms its position as the undisputed leader in Moroccan higher education

For the second consecutive year, the Euromed University of Fez (UEMF) is ranked first university in Morocco in the prestigious international Round University Ranking (RUR) 2026, one of the most recognized university rankings in the world.

Based on international databases Clarivate / Thomson Reuters, the RUR ranking evaluates universities according to rigorous criteria related to the quality of teaching, scientific research and internationalization.
This distinction confirms the excellence of UEMF's academic model, based on scientific rigor, innovation, entrepreneurship, multilingualism, international mobility, and cooperation with the world's best universities. It also testifies to the relevance of its development strategy and its growing influence at the national and international levels.

This performance is part of a continuous dynamic of international recognition, illustrated by several major distinctions obtained in recent years in the fields of research, innovation, sustainable development and student mobility.
At the crossroads of Europe, the Mediterranean and Africa, UEMF pursues its ambition to build a world-class university capable of meeting the major challenges of our time, in accordance with the vision of its creator and Honorary President, His Majesty King Mohammed VI.

Eight UEMF researchers distinguished among the 2% most influential scientists in the world

The Euromed University of Fez (UEMF) was distinguished in 2025 on the international scientific scene, with eight teacher-researchers ranked among the 2% of the most influential scientists in the world, according to the Stanford University ranking (Elsevier–Scopus).

The researchers honored are: Prof. Mostapha Bousmina, Prof. Chakib Nejjari, Prof. Abdelkarim Elkadib, Prof. Chakib Alaoui, Prof. Belkheir Hammouti, Prof. Taibi Ben Hadda, Prof. Rajae Salim and Prof. Elhachmia Ech-Chihbi.

This distinction, based on rigorous bibliometric indicators, illustrates the progress of Moroccan research and the growing international influence of the UEMF, whose number of distinguished researchers has doubled compared to 2024.

ATX Design of the Year 2025: Three groups of EMADU students recognized at the international competition

The Euromed University of Fez (UEMF) is proud to announce that six students (3 pairs) from the School of Architecture, Design and Urbanism (EMADU) have obtained three honorable mentions in the prestigious international competition ATX Design of the Year 2025, organized by Architerrax, an international learning platform dedicated to the dissemination of knowledge in architecture and design.

Under the guidance of Professor Jassim Benlemlih, the students competed in the "Design for Change" category, which highlights innovation and social impact through visionary architectural solutions.

The competition challenged participants to develop architectural projects for war refugees, focusing on concrete needs such as housing, community spaces, education, and healthcare. Beyond emergency interventions, the aim was to imagine sustainable, dignified, and resilient solutions to improve the living conditions of displaced populations.

The projects presented by the EMADU students impressed the jury with their creativity, their humanistic approach, and their ability to propose innovative solutions to global challenges. This international recognition testifies to the quality of the education provided at EMADU and the commitment of its students to making a positive contribution to current societal challenges.

UI GreenMetric International Ranking 2025

The Euromed University of Fez has been ranked the number one university in Morocco in the UI GreenMetric 2025 international ranking and is among the top 400 universities worldwide, representing 105 countries. It notably surpasses Ibn Tofail University, Mohammed VI Polytechnic University, and Mohammed V University of Rabat.

This ranking, based on 51 indicators related to sustainable development, innovation, teaching and research, confirms the national and international leadership of the UEMF.

In 2025, the university was also ranked 1st in Morocco and 2nd in Africa (behind the University of Cape Town) by the Round University Ranking, received the International Alliance University of the Year 2025 award, and had eight of its researchers ranked among the top 2% most impactful in the world according to Stanford's ranking.

These results are the outcome of a strategy focused on:

- Academic excellence,
- Research and innovation,
- International openness,
- Collaboration with the socio-economic world,

and the well-being of the university community.

The Euromed University of Fez ranked first in Morocco by the international ScholarGPS ranking

The Euromed University of Fez (UEMF) has confirmed its position as a leading academic and scientific institution in France, thanks to consistent recognition from several leading international rankings. These distinctions, which recognize both institutional performance and the scientific excellence of its researchers, attest to the university's academic rigor, the quality of its programs, its scientific output, and its ongoing commitment to innovation and societal impact.

ScholarGPS® ranking: UEMF in first place nationally

The results published by ScholarGPS, an international platform for analyzing scientific performance using artificial intelligence, place the Euromed University of Fez and its President, Professor Mostapha Bousmina, at the forefront of Moroccan universities and researchers across all disciplines. This ranking of UEMF reflects the scientific contribution of its faculty and researchers and the University's growing visibility in the international academic landscape.

Tribute to Professor Tijani Bounahmidi: a career of excellence in the service of science, higher education and innovation.

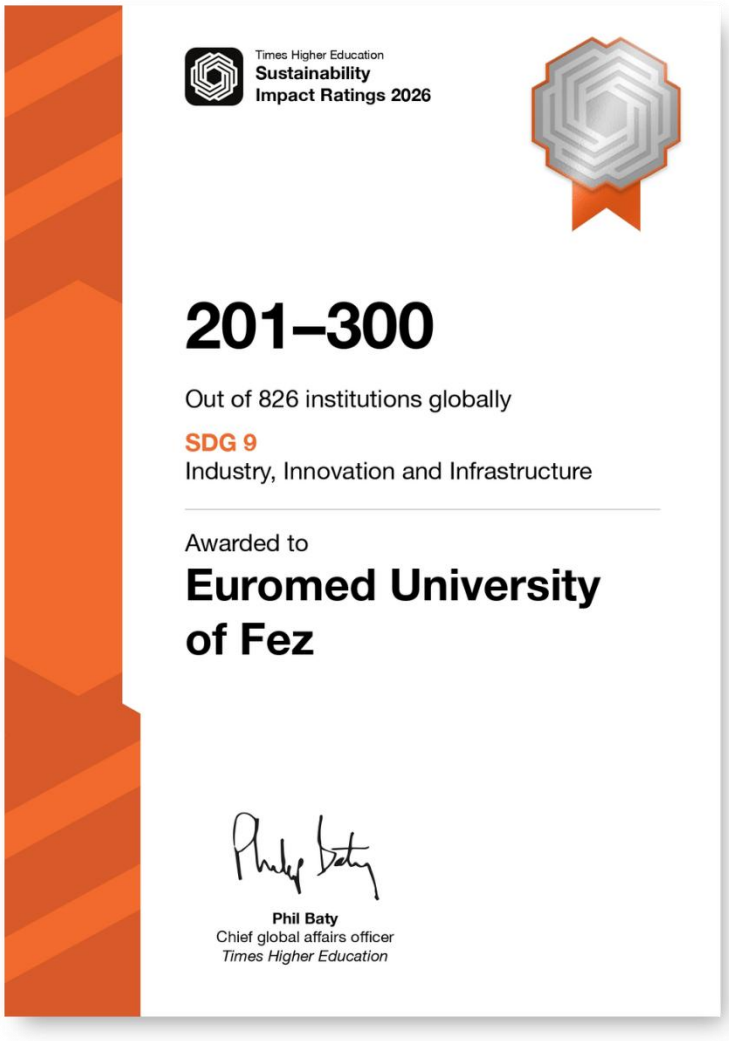

The Euromed University of Fez paid tribute to Professor Tijani Bounahmidi, Vice-President in charge of the University Technology Center, in recognition of his exceptional career in the service of science, higher education and innovation.

This ceremony brought together the university community, academic figures, colleagues, alumni, and relatives of Professor Bounahmidi for a moment of gratitude and recognition. The various tributes highlighted his commitment to research, teaching, and the transmission of knowledge, as well as his lasting impact on several generations of students and researchers.

The ceremony concluded with the presentation of an honorary trophy, a symbol of UEMF's recognition of its remarkable contribution to the development and influence of the institution.

UEMF's performance in THE Impact Rankings 2026 – SDG 9

In the THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 201–300 range out of 826 institutions for SDG 9: Industry, Innovation and Infrastructure. This performance reflects the dynamism of its research, its technological platforms, its partnerships with the socio-economic world, and its support for applied innovation.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

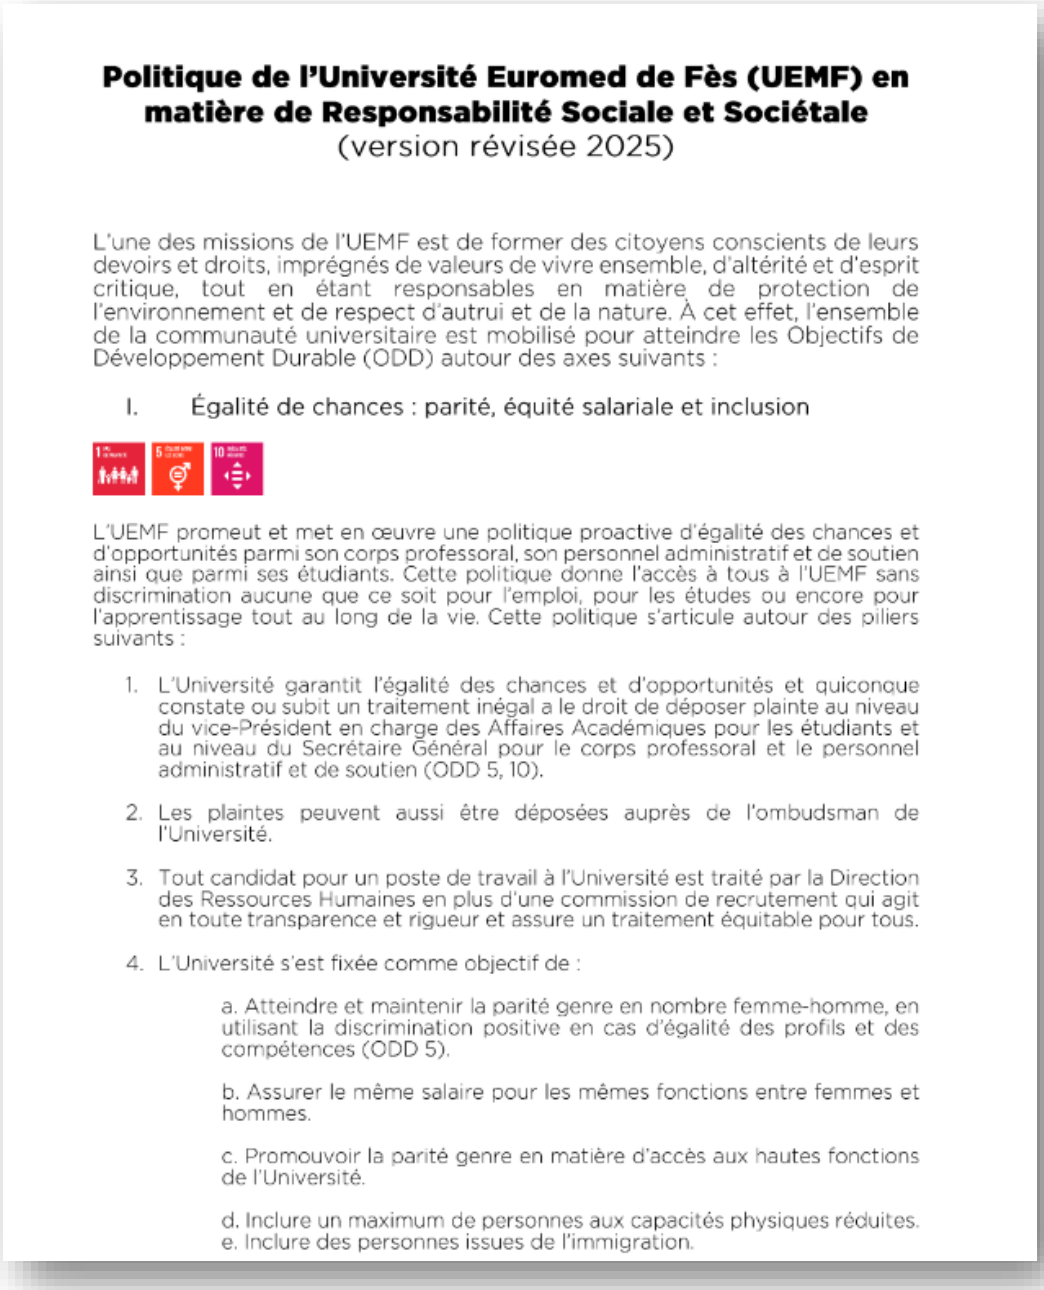

Introduction :

The Euromed University of Fez is actively committed to reducing inequalities by promoting equitable access to education and fostering social inclusion. Through its educational projects, support programs, and solidarity initiatives led by its student clubs, UEMF helps provide opportunities for all, while strengthening social cohesion and promoting justice and equality within its community and beyond.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez is committed to reducing inequalities by promoting inclusion and equity within its academic environment. Aware of social and economic disparities, it implements policies aimed at guaranteeing equal opportunities for all. The university adopts charters and mechanisms that promote diversity and non-discrimination. It ensures equitable access to educational resources and training opportunities. The Euromed University of Fez also encourages the participation of all stakeholders in university life. This approach contributes to strengthening social cohesion and reducing inequalities. In this way, it actively participates in achieving SDG 10.

Politique de l'Université Euromed de Fès (UEMF) en matière de Responsabilité Sociale et Sociétale
(version révisée 2025)

L'une des missions de l'UEMF est de former des citoyens conscients de leurs devoirs et droits, imprégnés de valeurs de vivre ensemble, d'altérité et d'esprit critique, tout en étant responsables en matière de protection de l'environnement et de respect d'autrui et de la nature. À cet effet, l'ensemble de la communauté universitaire est mobilisé pour atteindre les Objectifs de Développement Durable (ODD) autour des axes suivants :

I. Égalité de chances : parité, équité salariale et inclusion

L'UEMF promeut et met en œuvre une politique proactive d'égalité des chances et d'opportunités parmi son corps professoral, son personnel administratif et de soutien ainsi que parmi ses étudiants. Cette politique donne l'accès à tous à l'UEMF sans discrimination aucune que ce soit pour l'emploi, pour les études ou encore pour l'apprentissage tout au long de la vie. Cette politique s'articule autour des piliers suivants :

1. L'Université garantit l'égalité des chances et d'opportunités et quiconque constate ou subit un traitement inégal a le droit de déposer plainte au niveau du vice-Président en charge des Affaires Académiques pour les étudiants et au niveau du Secrétaire Général pour le corps professoral et le personnel administratif et de soutien (ODD 5, 10).
2. Les plaintes peuvent aussi être déposées auprès de l'ombudsman de l'Université.
3. Tout candidat pour un poste de travail à l'Université est traité par la Direction des Ressources Humaines en plus d'une commission de recrutement qui agit en toute transparence et rigueur et assure un traitement équitable pour tous.
4. L'Université s'est fixée comme objectif de :

   a. Atteindre et maintenir la parité genre en nombre femme-homme, en utilisant la discrimination positive en cas d'égalité des profils et des compétences (ODD 5).

   b. Assurer le même salaire pour les mêmes fonctions entre femmes et hommes.

   c. Promouvoir la parité genre en matière d'accès aux hautes fonctions de l'Université.

   d. Inclure un maximum de personnes aux capacités physiques réduites.
   e. Inclure des personnes issues de l'immigration.

This policy embodies UEMF's commitment to integrating social responsibility into all of its missions. It highlights the importance of reconciling academic performance, respect for the environment, and a positive societal impact.

UEMF
EUROMED UNIVERSITY OF FES

Charte de Responsabilité Sociétale (RSU)

Université Euromed de Fès (UEMF)

(Version revisée 2025)

Préambule :

L'UEMF est une fondation d'utilité publique ayant pour objectif de contribuer au développement et au renforcement de l'intégration régionale dans l'espace Europe-Méditerranée-Afrique, à travers les prismes académique, scientifique et culturel. L'université met en œuvre la mobilité et l'échange d'étudiants et d'enseignants-chercheurs de toutes ces régions. Actuellement, nos étudiants (50% boursiers) et nos enseignants-chercheurs représentent plus de 48 nationalités, avec plus de 50% de femmes parmi nos ressources humaines.

Notre mission ne se limite pas à former des experts techniquement compétents, mais à former des citoyens engagés, conscients de leurs droits et devoirs, respectueux des valeurs universelles telles que l'ouverture, la cohabitation pacifique, l'esprit critique, et le respect de l'environnement. Depuis sa création en 2012, l'UEMF a fait de la **Responsabilité Sociétale de l'Université (RSU)** l'un de ses axes stratégiques majeurs, en lien avec les **Objectifs de Développement Durable (ODD)** de l'ONU.

Les engagements de l'UEMF :

1. Formation et Recherche ciblées

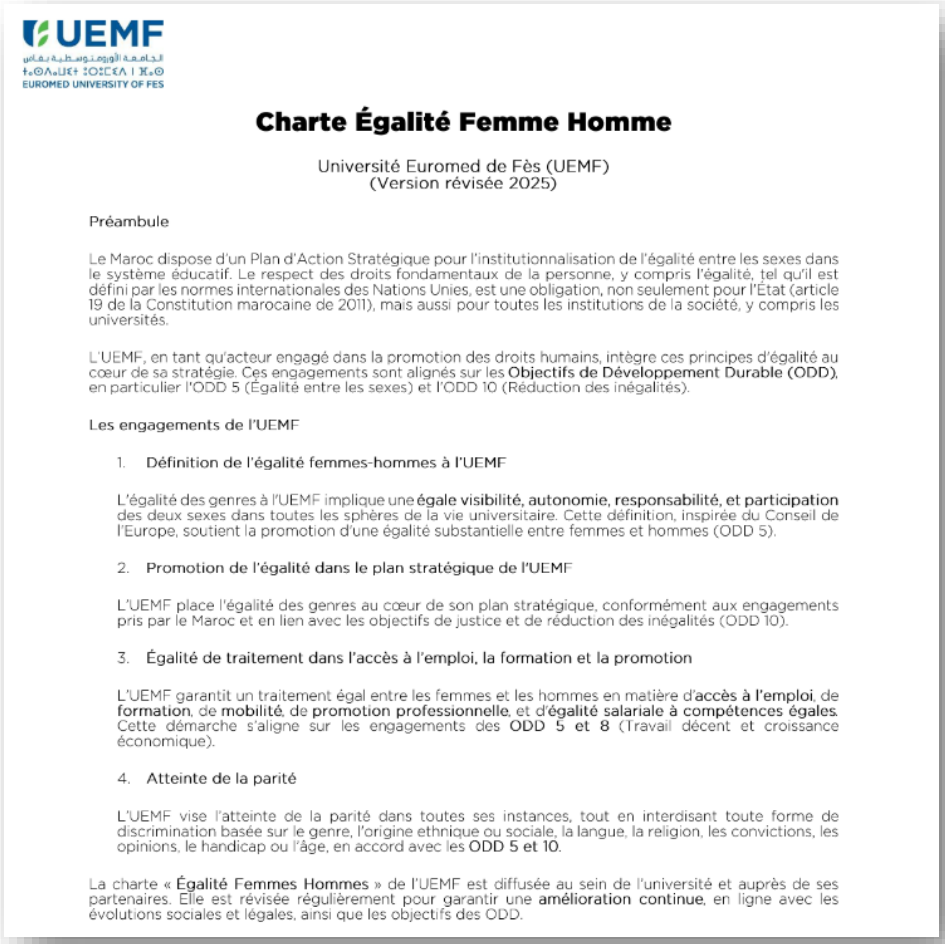

Mener des travaux de formation (initiale et continue) et de recherche de haut niveau répondant aux défis socio-économiques et technologiques, et contribuer à l'atteinte des ODD de l'agenda ONU 2030. Cela inclut des recherches sur l'innovation durable, la réduction des inégalités (ODD 10), l'éducation de qualité (ODD 4) et la lutte contre les changements climatiques (ODD 13).

2. Lieu de réflexion et de propositions

Devenir un centre de référence pour la réflexion sur les transformations sociales et les modèles de développement durable, en intégrant les enjeux de l'intégration régionale et de l'innovation pour un avenir meilleur (ODD 9 et ODD 16).

This charter formalizes the integration of social responsibility at the heart of the UEMF's missions. It outlines concrete commitments in the areas of ethics, governance, respect for the environment and contribution to sustainable development.

Gender Equality Charter (Revised version 2025)

UEMF
EUROMED UNIVERSITY OF FES

Charte Égalité Femme Homme

Université Euromed de Fès (UEMF)
(Version révisée 2025)

Préambule

Le Maroc dispose d'un Plan d'Action Stratégique pour l'institutionnalisation de l'égalité entre les sexes dans le système éducatif. Le respect des droits fondamentaux de la personne, y compris l'égalité, tel qu'il est défini par les normes internationales des Nations Unies, est une obligation, non seulement pour l'État (article 19 de la Constitution marocaine de 2011), mais aussi pour toutes les institutions de la société, y compris les universités.

L'UEMF, en tant qu'acteur engagé dans la promotion des droits humains, intègre ces principes d'égalité au cœur de sa stratégie. Ces engagements sont alignés sur les **Objectifs de Développement Durable (ODD)**, en particulier l'ODD 5 (Égalité entre les sexes) et l'ODD 10 (Réduction des inégalités).

Les engagements de l'UEMF

1. Définition de l'égalité femmes-hommes à l'UEMF

L'égalité des genres à l'UEMF implique une **égale visibilité, autonomie, responsabilité, et participation** des deux sexes dans toutes les sphères de la vie universitaire. Cette définition, inspirée du Conseil de l'Europe, soutient la promotion d'une égalité substantielle entre femmes et hommes (ODD 5).

2. Promotion de l'égalité dans le plan stratégique de l'UEMF

L'UEMF place l'égalité des genres au cœur de son plan stratégique, conformément aux engagements pris par le Maroc et en lien avec les objectifs de justice et de réduction des inégalités (ODD 10).

3. Égalité de traitement dans l'accès à l'emploi, la formation et la promotion

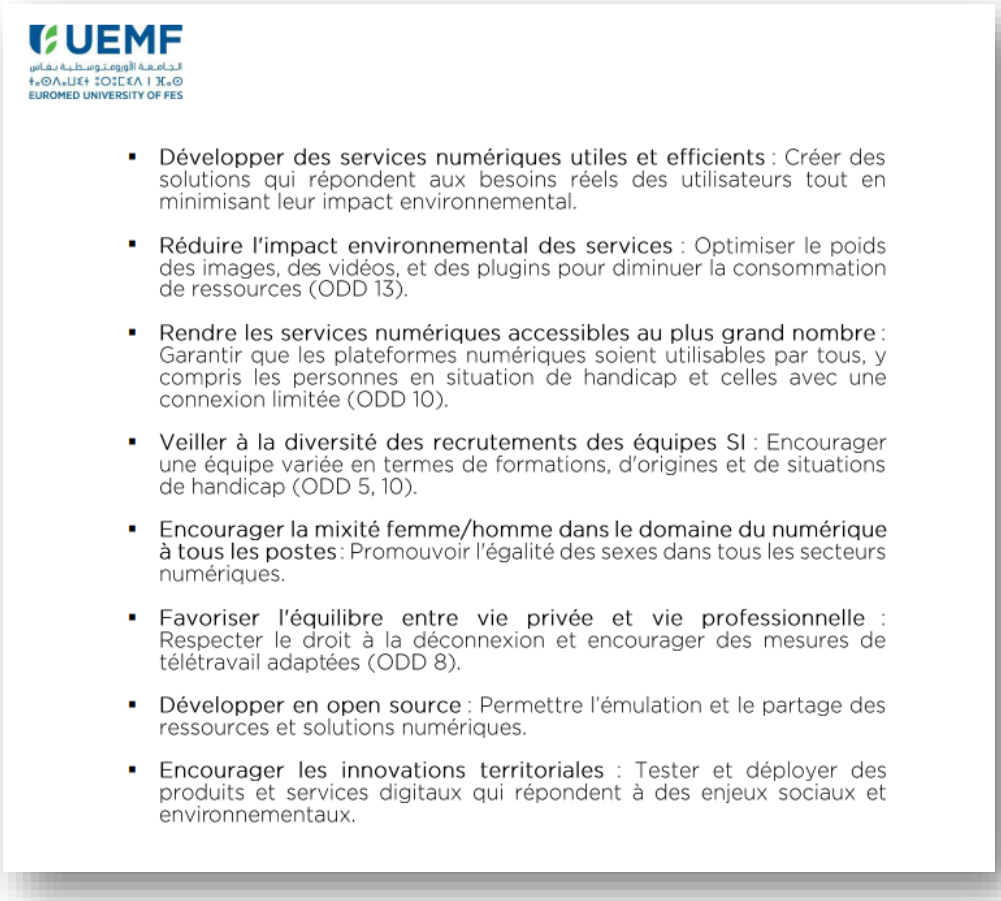

L'UEMF garantit un traitement égal entre les femmes et les hommes en matière d'**accès à l'emploi**, de **formation**, de **mobilité**, de **promotion professionnelle**, et d'**égalité salariale à compétences égales**. Cette démarche s'aligne sur les engagements des **ODD 5 et 8** (Travail décent et croissance économique).

4. Atteinte de la parité

L'UEMF vise l'atteinte de la parité dans toutes ses instances, tout en interdisant toute forme de discrimination basée sur le genre, l'origine ethnique ou sociale, la langue, la religion, les convictions, les opinions, le handicap ou l'âge, en accord avec les **ODD 5 et 10**.

La charte « **Égalité Femmes Hommes** » de l'UEMF est diffusée au sein de l'université et auprès de ses partenaires. Elle est révisée régulièrement pour garantir une **amélioration continue**, en ligne avec les évolutions sociales et légales, ainsi que les objectifs des ODD.

The UEMF places equality between women and men at the heart of its values. This charter commits the University to promoting diversity, combating all forms of discrimination, and fostering inclusion at all levels.

- **Développer des services numériques utiles et efficients** : Créer des solutions qui répondent aux besoins réels des utilisateurs tout en minimisant leur impact environnemental.
- **Réduire l'impact environnemental des services** : Optimiser le poids des images, des vidéos, et des plugins pour diminuer la consommation de ressources (ODD 13).
- **Rendre les services numériques accessibles au plus grand nombre** : Garantir que les plateformes numériques soient utilisables par tous, y compris les personnes en situation de handicap et celles avec une connexion limitée (ODD 10).
- **Veiller à la diversité des recrutements des équipes SI** : Encourager une équipe variée en termes de formations, d'origines et de situations de handicap (ODD 5, 10).
- **Encourager la mixité femme/homme dans le domaine du numérique à tous les postes**: Promouvoir l'égalité des sexes dans tous les secteurs numériques.
- **Favoriser l'équilibre entre vie privée et vie professionnelle** : Respecter le droit à la déconnexion et encourager des mesures de télétravail adaptées (ODD 8).
- **Développer en open source** : Permettre l'émulation et le partage des ressources et solutions numériques.
- **Encourager les innovations territoriales** : Tester et déployer des produits et services digitaux qui répondent à des enjeux sociaux et environnementaux.

Digital technology plays a central role at UEMF, but its use must be responsible. This charter defines best practices regarding digital tools, data security, and reducing environmental impact.

E-SDG

The training programs offered by the Faculty of Nursing and Health Sciences, through its various specializations—General Nurse, Anesthesia and Intensive Care Nurse, Speech Therapist, Psychomotor Therapist, Dietetics and Nutrition, Laboratory Technician, and Radiology Technician—contribute to SDG 10 – Reduced Inequalities – by promoting access to skills and diverse, inclusive healthcare adapted to the needs of different populations. These programs prepare professionals capable of contributing to equitable patient care, particularly for vulnerable individuals or those with specific needs.

1. Sectors:

- MULTI-SKILLED NURSE
- Anesthesia and Resuscitation Nurse
- SPEECH THERAPIST
- PSYCHOMOTOR TRACKER
- DIETETICS - NUTRITION
- LABORATORY TECHNIQUES
- RADIOLOGY TECHNIQUES

2. LMD pathway:

- BACHELOR'S DEGREE PROGRAM:

3-year cycle, practical work in laboratory, rehabilitation rooms, simulation center, internships in health centers, hospitals, clinics and specialized centers.

- MASTER'S PROGRAM:

Advanced training accessible to licensed students. Two-year program divided into four semesters.

- DOCTORAL PROGRAM:

A 3-year program focused on scientific research in the fields of nursing, rehabilitation care, health techniques and nutrition.

Research, Innovation & Entrepreneurship

Research Topics - Doctoral Cycle

As part of the University's contribution to the Sustainable Development Goals (SDGs), a selection of doctoral research topics related to SDG 10 has been identified. This research focuses on social inclusion, equal opportunities, equitable access to healthcare and education, supporting vulnerable individuals through new technologies, and migration, intercultural, and geopolitical dynamics. The research also addresses issues related to conflict, territorial disparities, the impacts of climate change, and the promotion of more inclusive, equitable, and resilient societies.

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF.Euromed innovation center (EIC)organized, in partnership withTAMWILCOMvia the InnovInvest Fund and BlueSpace (Bank of Africa), on April 16 and 17, the Hack'Days of the Fes-Meknes region, bringing together students, project leaders and young entrepreneurs around an intensive bootcamp dedicated to the creation and development of innovative solutions. As part of a dynamic of supporting high-potential talent, this program aims to support the emergence of projects in strategic sectors such as digital, health, agritech, cybersecurity, greentech, fintech or edtech, thus contributing to the development of the regional entrepreneurial ecosystem.

Over the course of two days, participants were supported in structuring their ideas, designing concrete solutions and preparing their projects, in an environment conducive to experimentation, collaboration and collective intelligence. A true space for learning and co-creation, this event allowed each team to develop their project, benefiting from constructive feedback, dedicated mentoring and guidance that fosters the maturation of entrepreneurial initiatives.

The Hack'Days concluded with pitch sessions, offering participants the opportunity to present their projects, compare their ideas and reveal their full potential, in a dynamic focused on innovation and impact.

We extend our sincere congratulations to all participants for their commitment, creativity, and entrepreneurial spirit. This initiative confirms the role of the UEMF, through the Euromed Innovation Center, as a key player in structuring and supporting innovation at the regional and national levels.

Events

Academic events

A comparative look at Morocco's development: a presentation by Mr. Mohammed Boutaleb at the UEMF

The Euromed University of Fez hosted Mohammed Boutaleb, former Minister of Energy and Mines, for a conference dedicated to the development of Morocco, organized as part of its Conference Series.

Under the theme "The development of Morocco seen from different angles", the speaker analyzed the economic, social and territorial challenges of the Kingdom, emphasizing the ongoing transformations and the need for sustainable and inclusive development.

The meeting, marked by an interactive exchange with the students, was fully in line with the UEMF's mission to train engaged citizens and actors in sustainable development.

A new culture to rethink the world: a lecture by Professor Mohamed Zinelabidine

As part of our Conference Series, we had the honor of welcoming Professor Mohamed Zinelabidine, Director of Culture and Communication at ICESCO, for a conference entitled: "A new culture to rethink the world".

Through a dense and inspiring intervention, Mr. Zinelabidine offered an in-depth reading of contemporary cultural changes and the fundamental role of culture in building more conscious, inclusive societies open to dialogue.

The conference highlighted the role of the artist in our societies, the structural, economic, and symbolic challenges they face, and the reasons why it remains difficult today to make a living fully from culture and art. It offered a clear-eyed reflection on the social, institutional, and economic recognition of artistic professions.

In front of an audience of students, researchers and teachers, this meeting opened a space for rich dialogue around culture as a force for thought, engagement and social transformation, reaffirming its central role in the dynamics of human development and intercultural cooperation.

The Philosophy Encounters: the university at the heart of intellectual debate in Fez

From February 9 to 11, 2026, the Euromed University of Fez hosted the 11thᵉ eedition of the Philosophy Rendez-vous, on the theme "Ambivalence of passions. OùWhere is the world going?». Thisevenement, in partnership with the'French Instituteitais of Morocco, a transformedediffererenterents spaces of the city in places of rebending and debat, reuniting philosophers, researchers, artists and intellectuals.

Through conferences, workshops, public debates, and readings, the event fostered dialogue between academia and society, promoting critical thinking, understanding of social and cultural transformations, and the development of informed citizens. The Euromed University of Fez reaffirmed its role as an intellectual hub, open to exchange, the dissemination of knowledge, and cultural engagement.

Round table: Women's career paths: what factors shape women's professional trajectories?

The Euromed University of Fez hosted Ms. Helena Nolan, Ireland's Ambassador to Morocco, for a roundtable discussion on women's career paths entitled "Women'Career Pathways»Speakers from diverse backgrounds sharedeanalyses and expelessons on leadershipemini, the destructural changes and transformations in the world of work were discussed. The event fostered dialogue and reflection on policies and initiatives to support the development of women's talent, and highlighted the importance of sharing experiences to guide new generations. This meeting illustrates UEMF's commitment to intercultural dialogue, knowledge sharing, and the promotion of an academic culture open to the world.

New class graduates in Political Science – Sorbonne-UEMF track

The graduation ceremony for the Bachelor of Political Science, Sorbonne-UEMF track, marked the culmination of a demanding international curriculum, based on academic rigor, commitment and intellectual openness.

The graduates received their diplomas in the presence of their teachers, who had guided them throughout their studies. The ceremony was held in the presence of the Director of the Institute of Legal and Political Sciences at the Euromed University of Fez, Professor Kamal Kajja, as well as Professors Julien Fretel, Bertrand Simon, Philippe Marchesin, Asmae Kasimi, Mounia S., and Marie-Pierre W., who commended the students' dedication, commitment, and perseverance since the beginning of the program.

Welcoming students of different nationalities, this program fully embodies the spirit of the Sorbonne-UEMF partnership, offering a multicultural and demanding education designed to train individuals capable of analyzing and understanding contemporary political issues.

The Euromed University of Fez extends its congratulations to all the award winners and wishes them every success in the continuation of their academic and professional careers.

Third Summit of Young Africans and Euro-Mediterraneans of the Euromed University of Fez: Headquarters of the Academy of the Kingdom, Rabat, January 19, 2026

The Euromed University of Fez organised, under the supervision of the United Nations Chair for the Alliance of Civilisations and in partnership with the Academy of the Kingdom of Morocco and the Hassan II Academy of Sciences and Techniques, the third Summit of African and Euro-Mediterranean Youth on January 19, 2026 in Rabat.

Dedicated to civic engagement and the pluralism of values, the event brought together young people from over 40 nationalities, experts, and Moroccan and international institutional leaders. Discussions focused on citizenship, living together, solidarity, diversity, values education, and contemporary challenges, particularly in the age of hyperconnectivity.

Organised in the form of plenary sessions, the summit concluded with recommendations formulated by the students, giving rise to the UEMF's "Call for the Future", in favour of strengthened civic engagement and a more harmonious society.

Women's creativity is in the spotlight at the UEMF Conference Series

As part of its 2025–2026 Conference Series, the Euromed University of Fez hosted a conference entitled “Women and Creativity”, led by Zohra Lhioui, Professor of Comparative Literature at Moulay Ismail University.

During her presentation, the speaker highlighted the essential role of women's creativity in shaping cultures and collective imaginations. She emphasized that women's artistic, literary, and intellectual expression is a major driver of reflection on society, identity, and the human experience.

The conference also featured a reading of works by Moroccan artists, allowing for an exploration of the diverse forms that female creativity can take. These works reveal unique sensitivities and perspectives on the social, cultural, and personal realities that shape the female experience.

Rich in exchanges, the meeting offered participants a space for reflection on the links between artistic creation, critical thinking and the place of women in contemporary cultural production.

Through this series of conferences, the Euromed University of Fez reaffirms its commitment to promoting intellectual dialogue, the dissemination of knowledge and the opening of its university community to themes at the intersection of the humanities, culture and society.

The Euromed University of Fez hosted the Moroccan Day of Mathematics, an initiative organized by the Maths&Maroc association dedicated to youth and scientific culture.

On March 28, 2026, the Euromed University of Fez hosted the Moroccan Day of Mathematics (MDM), organized by Maths & Maroc with the support of the Hassan II Academy of Sciences and Technologies and Adria. The event brought together a diverse audience to promote scientific culture and the role of mathematics in contemporary transformations.
Through a rich program (conferences, interactive workshops, Maths Sprint), the initiative made mathematics accessible and attractive, while sparking the interest of young people. The presentations by Mr. Omar Fassi Fihri and Professor Mostapha Bousmina highlighted the central role of mathematics in science, technology, and innovation.
Finally, scholarships of excellence and awards were given to the winners, reinforcing the university's commitment to education and the development of talent.

Aesthetics, domination, and artificial intelligence: rethinking the power of images in the contemporary era

Aesthetics, domination, and artificial intelligence: rethinking the power of images in the contemporary era. As part of our lecture series for the current academic year, we organized a conference entitled "The notion of aesthetics and domination, from the 7th art to AI," led by Professor Fouad Souiba, writer and director.

In this presentation, Professor Fouad Souiba offered an in-depth reflection on the close links between aesthetics, representation, and power relations, tracing their evolution from classical cinematic language to new forms of expression shaped by artificial intelligence. Drawing on references from the world of film and contemporary digital transformations, he demonstrated how images are not limited to an artistic dimension, but constitute genuine tools of influence, capable of structuring collective imaginations, shaping perceptions, and sometimes reproducing or challenging forms of domination.

The conference also explored the profound changes brought about by AI in the processes of image creation, dissemination, and reception, thus opening up a discussion on the ethical, cultural, and societal issues related to these new technologies. Rich in exchanges and perspectives, this meeting examined the evolving ways we see in the digital age, highlighting the structuring role of images in contemporary dynamics.

Euro-Mediterranean dialogue and youth engagement for a sustainable future

During Kaja Kallas' official visit to the Euromed University of Fez, a conference and interactive exchange were organized for students of various nationalities. This meeting addressed several key themes related to international security, regional stability, Euro-Mediterranean dialogue, and the central role of youth in building a sustainable and inclusive future.

The discussions highlighted the importance of education, international cooperation, and civic engagement in promoting peace and sustainable development. Through this initiative, the UEMF strengthened its role as a space for intercultural dialogue and strategic reflection, while also promoting the active participation of young people in global transformation.

Changing our perspective on disability: towards an inclusive and equitable university.

As part of our Conference Series, the Euromed University of Fez organized a conference entitled: "Changing perspectives on disability: the inclusive university, a lever for equity and excellence", led by Dr. Khalid Benhassan and Professor Hajjoui Abderrazak.

Through this meeting, the speakers offered an in-depth reflection on the challenges of inclusion in higher education, highlighting the central role of the university in promoting equal opportunities and valuing all talents.

Drawing on their expertise in public health, rehabilitation and support for people with disabilities, they emphasized the need to move beyond traditional approaches to build more accessible, inclusive and tailored academic environments that reflect the realities of each individual.

The conference also provided an opportunity to examine perceptions of disability, inviting a renewed perspective based on inclusion, dignity and recognition of abilities, rather than limitations.

Rich in exchanges and perspectives, this meeting highlighted the importance of placing inclusion at the heart of university policies, as a lever for equity, but also as a factor of excellence and social transformation.

Scientific seminars & conferences

At the Euromed University of Fez, the “Mediterranean 2026” Prizes recognize figures committed to peace, dialogue and humanism.

As part of the Euromed University of Fez meetings on the Alliance of Civilizations, the “Mediterranean 2026” Awards ceremony honored individuals and institutions committed to peace, intercultural dialogue, international cooperation, and human development. Organized around the theme of artificial intelligence and the future of human civilization, the ceremony highlighted the importance of technological progress grounded in ethical, humanist, and solidarity-based values.

The awards recognized initiatives that contribute to bringing people closer together, promoting moderation, sharing knowledge, and developing an inclusive and sustainable vision of international relations. Through this event, the UEMF reaffirms its role as an academic and cultural space that fosters dialogue between civilizations, reflection on major contemporary challenges, and the building of a future based on peace, cooperation, and responsible innovation.

Cultural activities

Yennayer at the UEMF: a vibrant celebration of traditions and community

On the occasion of Yennayer, the campus of the Euromed University of Fez came alive to the rhythm of Amazigh traditions, celebrating a living culture deeply rooted in sharing and diversity.
Throughout the day, art, food, and music filled the university spaces, offering the university community a vibrant and emotionally rich experience. Artistic performances, cultural expressions, and convivial moments fostered a dialogue between heritage and modernity in a festive and inclusive atmosphere.
More than just an event, Yennayer at UEMF was a true time of gathering, highlighting the values of community, transmission and openness that enrich life on campus.
A memorable day, marked by culture, creativity and community spirit.

End-of-year celebration: a dinner of sharing and conviviality

As part of its commitment to fostering community and intercultural dialogue, the Euromed University of Fez organized an end-of-year dinner for its international staff. This gathering celebrated the values of diversity, respect, and cohesion that underpin the University's identity, while also providing a special setting for conversation, laughter, and convivial moments.

The academic and administrative staff, accompanied by their families, shared a unique moment around a communal table. The evening was enlivened by enriching discussions, moments of dancing and lightheartedness, perfectly illustrating the spirit of community and cultural richness that characterize the UEMF campus.

Through this initiative, the Euromed University of Fez reaffirms its commitment to an inclusive and supportive community, where sharing and exchanges contribute to strengthening human ties and the sense of belonging.

Let's celebrate the women who inspire and transform the UEMF

On the occasion of International Women's Day, we celebrate those who inspire, innovate and shape the future every day.

Students, teachers, researchers, staff, security guards, maintenance workers... each in her own way contributes to the life and progress of our community within UEMF. Through their experiences, their commitment, and their daily presence, they all contribute to the richness and strength of our university.

Today and every day, we salute their strength, their talent and their determination.

UEMF's Got Talent: a 6ᵉan edition dedicated to talent, creativity and emotion

The Euromed University of Fez vibrated to the rhythm of the 6thᵉedition of UEMF's Got Talent, an event that has become an essential part of student life and celebrates creativity, the diversity of artistic expressions and the talents of its university community.
Bringing together numerous participants and an enthusiastic audience, this latest edition offered an evening rich in emotion and captivating performances. Singing, dancing, stage performances, artistic displays, and creative demonstrations followed one another on stage, revealing the breadth of talent within the University. Each participant shared their unique world, their passion, and their energy, contributing to making this event a true moment of celebration and conviviality. Through this initiative, UEMF reaffirms its commitment to encouraging the personal development of its students and promoting a university environment where artistic expression plays a vital role. Far more than a competition, UEMF's Got Talent provides a special space for students to express their creativity, develop their self-confidence, and showcase their passions.
This 6ᵉThis edition was also marked by the quality and diversity of the services offered, illustrating the cultural and human richness that characterizes the community of the Euromed University of Fez.
Following the performances, three participants particularly distinguished themselves and were rewarded for their contributions:

🥇Gabrielle EBABU 🥈Benjamin CHIZUE 🥉Sara ALAMI
The Euromed University of Fez extends its congratulations to the winners and all participants for their commitment, creativity, and contribution to the success of this evening. This latest edition confirms, once again, that talent flourishes in all its forms at UEMF.

Sports activities

1re UEMF Open Taekwondo edition: sport, discipline and commitment

The Euromed University of Fez organised the first edition of the UEMF Taekwondo Open, in partnership with the Royal Moroccan Taekwondo Federation and the Fez-Meknes Regional Taekwondo League.

Conceived as a highlight of meeting and sharing, this event brought together athletes around fights and sporting demonstrations, in a structured framework where rigor, discipline and commitment were expressed in respect of the rules and values of taekwondo.

The day concluded with medal ceremonies, celebrating the investment, determination and quality of performance of the participants, and recalling the essential role of sport in building pathways based on excellence, respect and civic engagement.

Through the organization of this first edition, the UEMF reaffirms its commitment to the development of university sports activities, while consolidating its position as an actor involved in the sporting dynamic at the national level.

The Mini Africa Cup of Nations in Fez: three days dedicated to sport and community spirit

The Euromed University of Fez hosted a football tournament bringing together sixteen teams from several African countries, in collaboration with the Fez-Meknes Regional Football League and CESAM Fez. Organized over several days, the competition took place in a spirit of commitment, respect, and fair play, fostering exchange and closer ties among the participants.

The matches, supported by an enthusiastic crowd, highlighted collective discipline, the quality of play, and the players' commitment. Equatorial Guinea won the final against Chad, while the Moroccan team secured third place.

Through this initiative, the UEMF confirms its commitment to sport as a lever for cohesion, cultural openness and dynamism within university life.

National spirit, sport and youth: our campus proudly celebrated the 50th anniversary of the Green March

On November 6th, the Euromed Sports Center hosted a sports day combining mixed water polo and a men's basketball tournament, bringing together our students and junior teams from FAS, MAS, and USF. A competitive and dynamic atmosphere that reflects the commitment of our youth.

On the court, our students shone: a semi-final victory against FAS (47–30) and an intense final win against MAS (45–40). With over 80 participants, the event highlighted the commitment of our young athletes, the quality of play, and the excellent synergy between the teams.

Beyond the results, this day was a true moment of unity and patriotism, bringing together students, coaches, and officials around the values of solidarity and national pride. A memorable event that will remain etched in the sporting history of our campus.

Sporting and civic engagement: UEMF at the heart of the Fes Spiritual Marathon

As part of its commitment to well-being and active citizenship, the Euromed University of Fez participated in the Fez Spiritual Marathon as an official partner. On this occasion, the campus served as a checkpoint along the route, welcoming runners in a vibrant and friendly atmosphere.

University students also participated in this sporting event, demonstrating the values of pushing personal limits, teamwork, and collective commitment. Their participation reflects the university community's involvement in initiatives that promote a healthy and active lifestyle.

Beyond its sporting dimension, this participation reflects UEMF's desire to strengthen its connection with its local community by fully engaging in local social, cultural, and civic initiatives. It thus contributes to promoting an engaged university, connected to its city and an active participant in community development.

Heading towards the 4th edition of the Open Para-Karate Kata Fes at the UEMF.

The UEMF was pleased to host the fourth edition of the Open Para-Karate Kata Fes, organised by the Mohammed VI Foundation for Persons with Disabilities, in a dynamic of promoting inclusive sport and the values of self-improvement.

In an atmosphere marked by respect, discipline, and determination, theEuromed Sports CenterThe atmosphere came alive with demonstrations from these young athletes who came from all corners of the Kingdom. Through their performances, they powerfully embodied the values of karate, combining mastery, perseverance, and commitment.

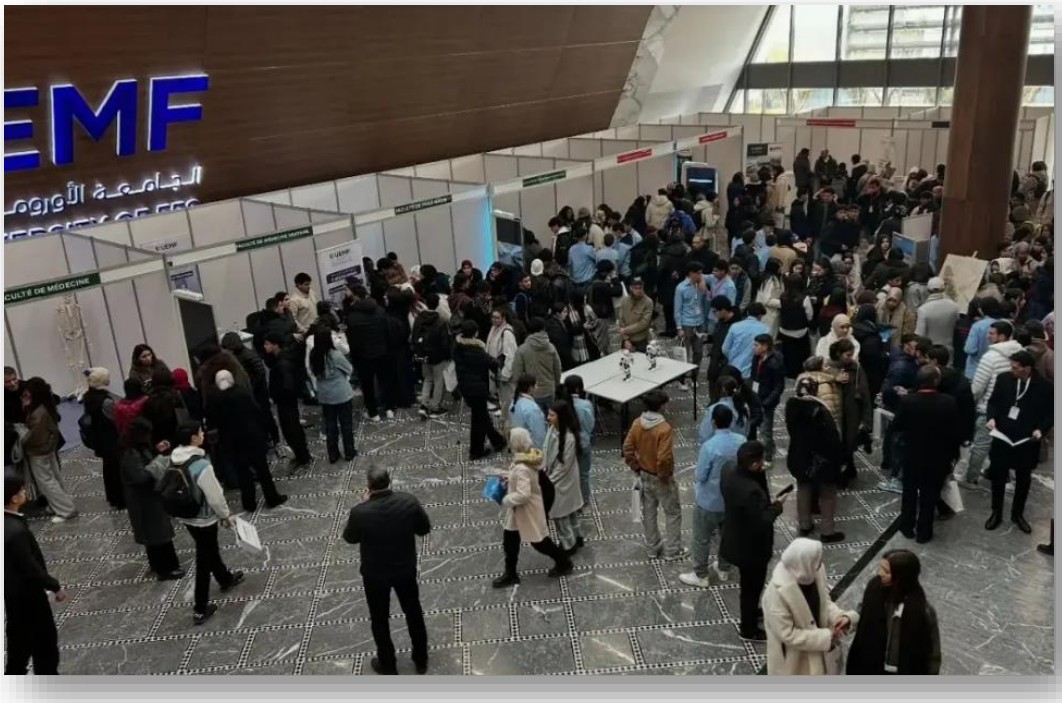

Beyond the competition, this event was a powerful moment for raising awareness, highlighting the role of sport as a lever for inclusion, personal development and social cohesion.

We extend our sincere thanks to all the supervisors, chaperones, referees, volunteers, and participating delegations for their commitment and contribution to the success of this edition.

Through this initiative, the UEMF reaffirms its commitment to inclusion, diversity and sport for all, by offering an environment conducive to the expression of talents and the promotion of inspiring journeys.

Admissions activities and open house

Open Day: More than 2,900 high school students discover UEMF

More than 2,900 high school students passed through the doors of the Euromed University of Fez on the occasion of the Open Day, organized to support future students in their reflection on university orientation.

Upon arrival on campus, participants were welcomed and had the opportunity to speak with representatives from the university's schools and faculties to gain a better understanding of the courses offered, academic pathways, and study and career prospects.

The day continued with a tour of the facilities, offering a concrete glimpse into the learning and university life environment: classrooms, laboratories, living spaces and sports facilities.

For one day, the university was transformed into a true space for dialogue and discovery, fully mobilizing its academic and administrative teams to listen to, guide and support high school students in building their future university path.

The UEMF Caravan: Going to meet the talents of tomorrow

True to its international focus and its African roots, the Euromed University of Fez continues its annual tour of meetings and exchanges across the continent, in order to support students in their study projects. For the 2026/2027 academic year, the university teams visited Tunis and Sousse, Dakar, Cotonou and Abidjan in particular.

The program for these meetings includes: participation in information and guidance fairs, exchanges with the parents of current and future students, training and coordination with local partner offices, as well as the signing of agreements and partnerships with universities and companies.

This approach not only allows us to present the training offer, but also to listen to, advise and support students in building their academic path.

Through these meetings, the University reaffirms its commitment: to support students in their study projects and to strengthen ties with families and academic partners across the continent.

Open Day at UEMF, an immersion into the heart of our eco-campus

This Saturday, the UEMF welcomed more than 800 high school students, who came to discover a unique academic environment, combining innovation, sustainability and international openness.

Throughout the day, visitors were able to explore our latest generation eco-campus, designed as a true place for living, learning and experimentation and equipped with state-of-the-art educational and technological infrastructure.

It is also an opportunity to discover a rich and diverse range of training programs, covering a wide range of disciplines, and to interact directly with teaching staff, students and various university services, in order to better build their academic project.

Between immersive visits, inspiring encounters and personalized exchanges, this day allowed each participant to concretely envision their future university journey, within a stimulating and multicultural environment.

Through this initiative, UEMF reaffirms its commitment to supporting the talents of tomorrow, by offering them an environment of excellence conducive to personal development and academic success.

Diplomatic institutional visit

Courtesy visit of H.E. Tomasz Orłowski, Ambassador of Poland, to the UEMF

The Euromed University of Fez was pleased to welcome His Excellency Mr. Tomasz Orłowski, Ambassador of Poland to Morocco, for a courtesy visit.

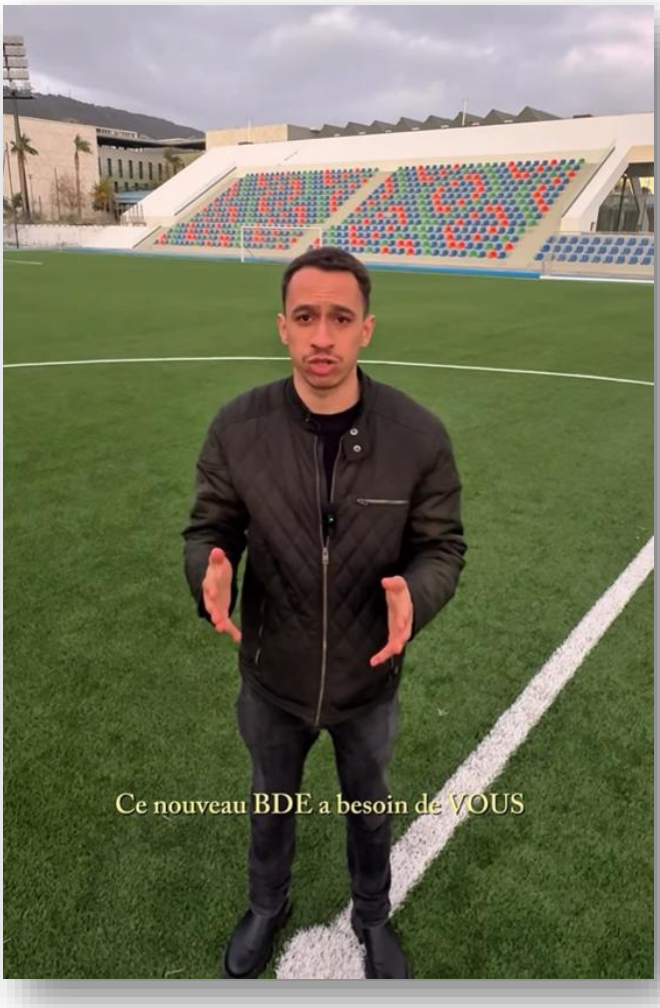

Received by the President of the UEMF, Prof. Mostapha Bousmina, the Ambassador expressed his joy at being received at a university of international stature, whose multiculturalism constitutes one of the seven fundamental pillars.

During his speech, His Excellency also highlighted the pleasure of visiting Fez, an emblematic city of Moroccan heritage twinned since 1986 with the city of Krakow in Poland, a symbolic twinning between two former university capitals that share a long tradition of openness and intellectual exchange.

During this meeting, several avenues for academic and cultural cooperation were discussed, including student and teacher mobility between the two countries, the development of joint projects in the educational and cultural fields, as well as the possibility of collaborating on themes related to the alliance of civilizations, a strong focus at UEMF, supported by the Chair in Alliance of Civilizations and the RIEMAS Think Tank, dedicated to Euro-Mediterranean and African studies.

Student events

UEMF Welcomes its New Student Union

A new chapter begins at Euromed University of Fez with the creation of the Student Union. Presented in a recent video on the university's Instagram account, this union is founded on the values of unity, solidarity, and commitment. Supported by all the student clubs, its ambition is to restore students' confidence, take concrete action, and revitalize student life, making participation and cohesion the cornerstones of university life.

Distribution of flowers and messages to the teachers

On October 5, 2025, for World Teachers' Day, the University's Hands Club organized a wonderful initiative to celebrate and honor the role of teachers. Students had the opportunity to express their appreciation and gratitude by offering flowers accompanied by positive messages to their professors. This symbolic action aimed to highlight the importance of teachers' roles, not only in the transmission of academic knowledge but also in the human and personal development of students. Through this initiative, the Hands Club helped strengthen the bonds between teachers and students while emphasizing the essential impact of education in building a supportive and respectful university community.

Hygiene awareness in a primary school

On October 14, 2025, the Hands Club organized a hygiene awareness event at a primary school in Bensouda. The initiative aimed to educate students about the importance of personal and collective hygiene in preventing illness and promoting good health practices. Through age-appropriate explanations and interactive discussions, the children learned essential daily hygiene practices, contributing to a healthier and more responsible school environment.

Crochet Workshop

This introductory crochet session was organized with the aim of introducing participants to the fundamental basics of this craft practice, in an educational, friendly and accessible setting for all.

During the workshop, participants learned how to handle the necessary materials, including crochet hooks and yarn, while familiarizing themselves with essential basic techniques. Particular attention was paid to learning fundamental stitches, demonstrated step by step to ensure a gradual understanding adapted to the beginners' level.

Led by an experienced instructor, the session fostered hands-on, interactive, and personalized learning, allowing each participant to progress at their own pace. This initiative not only enabled the acquisition of basic technical skills but also encouraged creativity, concentration, and a spirit of collaboration among the participants.

Through this initiative, the objective was also to promote manual activities as a means of artistic expression and relaxation, while strengthening ties within the group.

Tribute to the Doctors and Committed Members – Elite Club

The Elite Club held a thank-you ceremony to express its deep gratitude to the doctors and club members for their commitment and efforts during the caravans and humanitarian missions of the previous term. This event provided an opportunity to highlight their contributions, present them with certificates of recognition, and celebrate together the successes and positive impact of their actions on the communities they helped.

ELITE Club Report 25-26

Blood Donation Campaign – Rotaract Club

The Rotaract Club organized a two-day blood donation campaign on the university campus, with the aim of raising awareness within the academic community about the importance of blood donation and making a concrete contribution to saving lives.

This act of solidarity mobilized a large number of students, teachers, and administrative staff, all united around a vital humanitarian cause. In collaboration with qualified medical teams, a dedicated space was set up to ensure a warm welcome for donors and strict adherence to hygiene and safety standards.

Beyond the blood drive, this initiative promoted the values of solidarity, social responsibility, and civic engagement within the university community. It also strengthened the spirit of cohesion and cooperation among the various stakeholders on campus, demonstrating the positive impact that collective action can have in service of society.

Creative Outing - Crafty Fall Themed Picnic

Organised in Ifrane, more precisely at the natural site of Aïn Vittel, this outdoor activity was part of a dynamic of strengthening the links between the members of the club, while promoting creativity in the open air.

Taking advantage of the autumn season and its inspiring natural setting, the club organized a creative, autumn-themed picnic, combining relaxation, art, and conviviality. The main objective was to foster group cohesion through an immersive experience, far removed from the usual academic environment.

In a warm and peaceful atmosphere, participants took part in various craft and artistic activities such as drawing, crocheting, and other hands-on crafts, directly in contact with nature. This time allowed everyone to freely express their creativity, while sharing moments of exchange and connection.

Beyond the artistic aspect, this initiative contributed to the well-being of the members, strengthening team spirit and consolidating human relationships within the club in a natural environment conducive to inspiration and rejuvenation.

Design thinking workshop – Enactus

The Enactus Club organised a Design Thinking training session within the incubator, led by Omar Ameur.

This training aimed to introduce participants to the various key stages of the Design Thinking process, including empathy, problem definition, ideation, prototyping, and testing. Through an interactive and dynamic approach, students were able to understand the importance of a user-centered approach in solving complex problems.

The session also included practical workshops allowing participants to concretely experience methods of collaborative thinking, brainstorming and rapid prototyping.

Beyond theoretical learning, this initiative fostered a spirit of innovation, teamwork, and the development of essential skills in entrepreneurship and project management, thereby strengthening the culture of innovation within the student community.

Speed debating – ORATIO

The ORATIO Club organised a Speed Debating session at Euromed University, offering members a dynamic and stimulating experience based on the Oxford style debate format.

During this activity, participants took part in rapid-fire debates, alternating between defending and opposing the same topic. This demanding format encouraged responsiveness, argumentation skills, and the ability to adapt to differing viewpoints, while fostering constant interaction among the participants.

Beyond the oral presentation skills, this session aimed to develop critical thinking, open-mindedness, and self-confidence. It allowed members to improve their communication skills, structure their ideas effectively, and learn to defend a position rigorously and respectfully within an enriching and collaborative academic environment.

Meet the alumni of EPS – Club GENIUS

The Alumni Meet was a powerful moment of sharing, inspiration, and knowledge transfer within the club. This gathering created a genuine intergenerational bridge between current members and alumni of the Euromed University of Fez (UEMF), who are now fully integrated into the professional world.

In this first episode dedicated to EPS graduates, the speakers shared their academic journeys, professional experiences, and the challenges they faced after graduation. Through authentic and inspiring stories, they offered practical advice on career guidance, preparing for the job market, skills development, and the importance of networking.

Beyond a simple exchange, this event is part of the Create. Enhance. Sustain vision:

- Create: create opportunities for dialogue and mentorship,
- Enhance: strengthen students' ambitions and skills,
- Sustain: maintaining a lasting link between the university and its community of alumni.

This initiative has thus strengthened the sense of belonging to UEMF while motivating students to actively build their own professional trajectory.

Health & Solidarity Caravan in Tigrigra – October 2025 - Elite Club

The Elite club organized a multidisciplinary medical caravan in Tigrigra, in the Ifrane-Azrou region, in order to bring healthcare closer to local populations and meet their medical needs.

This initiative mobilized 20 doctors from various specialties, including cardiology, gynecology, urology, ENT, ophthalmology, and dentistry. The beneficiaries were able to access:

A variety of consultations tailored to each specialty.

Comprehensive dental care, including extractions, restorative treatments, scaling and the fabrication of dentures,

Free distribution of medication, for comprehensive and effective care.

This action embodied a true moment of solidarity and humanitarian commitment, strengthening the link between the Elite club and local communities while contributing to the well-being and health of the inhabitants of Tigrigra.

ELITE Club Report 25-26

School Health Caravan in Ain Chkef – November 2025 - Elite Club

A school health caravan was organized to improve access to healthcare and raise students' awareness of the importance of health. In the area of dental care, beneficiaries received consultations and treatments, including extractions and cleanings, as well as the distribution of oral hygiene kits containing toothpaste and toothbrushes, to encourage good habits from a young age. The medical component offered general consultations for basic screenings, as well as ophthalmological consultations to assess students' visual health. This caravan was a vital preventive and educational initiative, contributing to children's well-being and promoting a culture of health in schools.

ELITE Club Report 25-26

Meet the Laureates – Episode 2: Spotlight on the EIDIA Laureates

The Alumni Meet – Episode 2 was a powerful moment of sharing, inspiration, and knowledge transfer within the club. This meeting created a genuine intergenerational bridge between current members and alumni of the Euromed University of Fez (UEMF), who are now fully integrated into the professional world.

In this second episode dedicated to EIDIA graduates, the speakers shared their academic journeys, professional experiences, and the challenges they faced after graduation. Through authentic and inspiring stories, they offered practical advice on career guidance, preparing for the job market, skills development, and the importance of networking.

Beyond a simple exchange, this event is part of the Create. Enhance. Sustain vision:

- Create: create opportunities for dialogue and mentorship,
- Enhance: strengthen students' ambitions and skills,
- Sustain: maintaining a lasting link between the university and its community of alumni.

This initiative has thus strengthened the sense of belonging to UEMF while motivating students to actively build their own professional trajectory.

Health & Solidarity Caravan – Initiative of the Elite Club in Sais

Club Elite organized a multidisciplinary medical caravan, bringing together several specialties to offer comprehensive and free care to local communities. This initiative took place on November 16th and mobilized 20 dedicated volunteers. Medical services offered: We set up several specialized booths including general medicine for basic consultations, pediatrics for children's checkups, gynecology for women's health, dermatology, ophthalmology, and dental care. Paramedical examinations (blood pressure, blood sugar, wound dressings) were also provided by our teams of medical and nursing students. Awareness and prevention: Beyond providing care, we conducted awareness workshops on hygiene, disease prevention, and good health practices, reaching the entire community. Impact: This caravan allowed us to treat several beneficiaries in a single day, identify several cases requiring medical follow-up, and, most importantly, establish a close connection with a population often far removed from healthcare facilities.

ELITE Club Report 25-26

Medical and Humanitarian Caravan for the Benefit of the Residents of the El Haj El Hadi Tajmouti Retirement Home

On November 20, 2025, a medical and humanitarian caravan was organized at the El Haj El Hadi Tajmouti retirement home in the city of Fez. The aim of this initiative was to provide medical, psychological, and human support to the elderly residents of the facility.

The program included medical consultations to assess the residents' health and address their specific needs. Simultaneously, activities to provide emotional support and entertainment were organized to encourage interaction, combat isolation, and offer moments of conviviality and well-being.

The caravan also featured the distribution of donations aimed at improving the daily lives of those receiving assistance. This act of solidarity reflects a strong commitment to the respect, dignity, and well-being of the elderly, while reinforcing the values of solidarity and social responsibility among the participating volunteers.

HIV Screening Day at the Euromed University of Fez: Awareness, Prevention, Action – Elite Club

On November 20, 2025, an HIV screening was organized within the Euromed University of Fez, in collaboration with ALCS, as part of health awareness and prevention actions.

This initiative aimed to inform students about the importance of early detection, to dispel misconceptions about HIV, and to encourage a responsible attitude towards sexual health. Through educational support and open discussions, participants received reliable and relevant information.

The screening took place in a strictly confidential, secure environment, supervised by qualified professionals. Students benefited from personalized advice and supportive guidance. This initiative helped strengthen the culture of prevention, responsibility, and solidarity within the university community.

ELITE Club Report 25-26

Mobile Medical and Dental Clinic in Tamedit: A Commitment to Solidarity in Service of Rural Communities

A multidisciplinary medical caravan was organized in Tamedit, in the Taounate region, to strengthen access to care for local populations and to meet the health needs of rural communities.

This initiative mobilized several medical specialties, allowing beneficiaries to access tailored consultations in various healthcare fields. Dental care played a central role, with consultations, extractions, restorative treatments, scaling, and the fitting of dental prostheses provided, ensuring comprehensive and high-quality treatment.

Furthermore, the pharmacy service provided free dispensing of prescribed medications, contributing to appropriate therapeutic monitoring and the improvement of patients' health.

Through this high-impact social action, the club reaffirms its commitment to health equity, the well-being of rural populations and the promotion of sustainable solidarity.

ELITE Club Report 25-26

Master of Speech Club Finalist at Doc's Mic – FMP Fes (English Section)

The Master of Speech Club participated brilliantly in Doc's Mic – FMP Fès (English Section), an event dedicated to oral expression and the art of speech in English, organized within FMP Fès.

Thanks to their commitment and the quality of their performances, the club members proudly reached the final stage of the competition. This experience allowed them to showcase their public speaking skills, their fluency in English, as well as their creativity and ability to captivate an audience.

Beyond performance, this participation illustrates the club's ongoing commitment to promoting excellence in communication, strengthening self-confidence and developing leadership among its members, thus helping to train students capable of expressing themselves with impact and conviction.

ELITE Club Report 25-26

Themed Drawing Workshop: Immersing yourself in the world of Harry Potter

The Crafted Knots club organized a Harry Potter-inspired drawing workshop at the university. Designed with an immersive winter theme, this session offered participants the opportunity to delve into a rich narrative world while developing their artistic skills.

Through the exploration of different techniques and materials—gouache, acrylic, watercolor, and other media—students were able to experiment with composition, color work, and narrative illustration. The workshop encouraged each student to express their creativity, tell a story through images, and refine their personal style.

This activity provided an opportunity for artistic exchange and discovery, strengthening the creative spirit and individual expression within the university community..

Enactus Bootcamp: Strengthening Pitch Skills and Needs Analysis

The Enactus club organised a bootcamp in collaboration with Enactus ENCG Fès and Enactus FMDP Fès, aimed at strengthening the skills of participants in the context of entrepreneurial and social projects.

This event offered interactive sessions on Pitching, allowing students to effectively present their ideas and projects to an audience or juries, and on Needs Assessment, in order to better identify the problems of beneficiaries and design appropriate solutions.

Thanks to this bootcamp, participants were able to develop their confidence, refine their communication skills, and acquire practical tools to maximize the impact of their initiatives. This inter-university collaboration also fostered the exchange of experiences and the creation of a strong network among students engaged in social entrepreneurship.

Third Edition of the UEMF Talks: National Eloquence Competition

The Master of Speech Club organized the third edition of UEMF Talks, a national public speaking competition bringing together participants who speak in French, English, and Arabic. The event gathered 72 participants from 12 universities across Morocco, providing a prestigious platform to showcase talent and skills in oral communication.

This competition allowed students to demonstrate their oral fluency, creativity, and ability to persuade an audience in several languages. It also highlighted the importance of public speaking, critical thinking, and self-confidence in personal and academic development.

The UEMF Talks are a highlight for the club, reflecting its commitment to promoting excellence in communication and developing leaders capable of speaking with impact at the national level.

School Health Caravan in Aïn Chkef: Prevention and Well-being of Students by the Elite Club

On December 20, 2025, the Elite Club organized a school health caravan in Aïn Chkef, in the Moulay Yaacoub region, aimed at promoting prevention and the well-being of students.

The dental component offered consultations, preventive care and awareness campaigns, in order to instill good oral hygiene habits and prevent dental diseases from a young age.

In parallel, general medical consultations were conducted to assess the overall health of the students, while the ophthalmology department ensured the screening of visual disorders, guaranteeing comprehensive and preventive care.

This initiative by the Elite Club constitutes an essential educational and preventive action, strengthening the culture of health in schools and contributing significantly to the well-being and protection of students.

ELITE Club Report 25-26

Traditional Music Workshop: Discovering Moroccan Musical Heritage

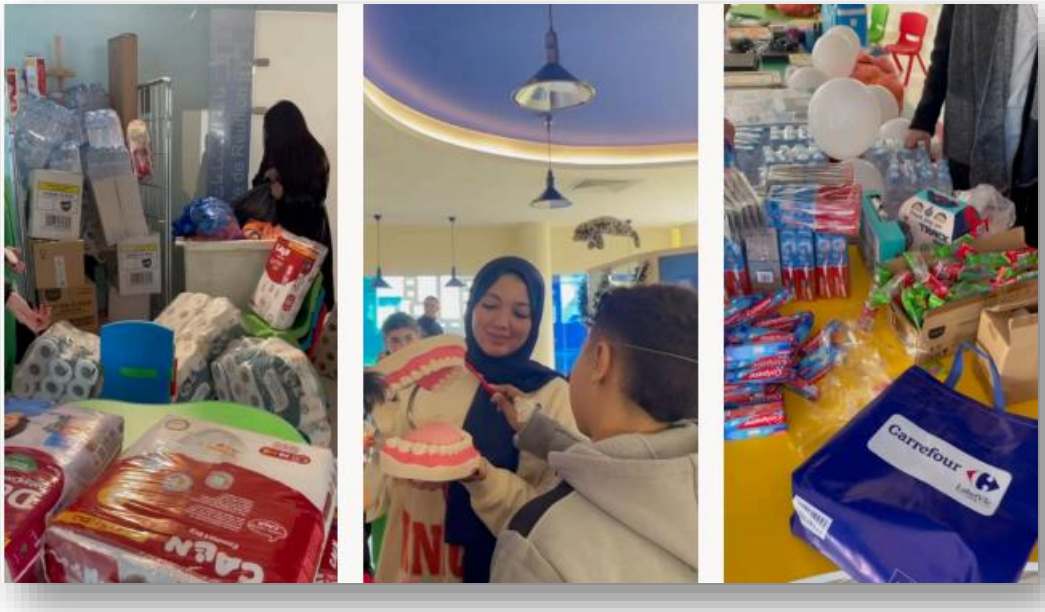

The Mémoire en Scène Club organised a traditional music workshop for students, offering them the opportunity to explore and practice Moroccan musical styles.

During this session, participants learned to play traditional instruments, while discovering the authentic rhythms and sounds that characterize the richness of Morocco's musical heritage.

This workshop aims to preserve and promote Moroccan musical culture, while allowing students to develop their artistic sense, listening skills, and creativity. It also provides an opportunity for cultural exchange and the celebration of local traditions within the university community.

Solidarity visit to the Pediatric Hematology-Oncology Department of the University Hospital by the Elite Club

On January 8, 2026, the Elite Club, in collaboration with the PISE project and the Prosthetists Association, organized a solidarity visit to the pediatric hematology-oncology department of the University Hospital, with the aim of bringing comfort, entertainment and awareness to hospitalized children.

A specially designed space allowed the children to enjoy games and fun activities, two PlayStation consoles, and a library to encourage reading. Desserts and bottles of water were distributed to make their day more pleasant and enjoyable.

In parallel, the club carried out an oral health prevention campaign, distributing hygiene kits (toothbrushes and toothpaste), as well as essential products such as diapers, toilet paper and wipes.

This initiative made it possible to combine fun, education and care, strengthening the well-being of children and illustrating the solidarity and human commitment of the Elite Club towards young hospitalized patients.

ELITE Club Report 25-26

Theatre Workshops: Developing Student Creativity and Expression

The Mémoire en Scène Club organized theatre courses for students, aimed at stimulating their artistic expression, self-confidence and public speaking skills.

Through interpretive exercises and stage performances, participants explore their creativity, develop their sense of rhythm and body expression, while strengthening communication and teamwork.

These workshops offer a fun and educational setting where students can express themselves freely, experience different roles and improve their interpersonal and public speaking skills, thus contributing to their personal and academic development.

Solidarity Caravan of the Mémoire en Scène Club: Support for Families in Need

The Mémoire en Scène Club organised a solidarity caravan aimed at providing concrete support to families in vulnerable situations.

Through this initiative, 26 families received essential assistance, including food, basic necessities and social support.

This initiative reflects the club's commitment to social responsibility and community support, while raising awareness among its members of the values of solidarity, mutual aid, and active citizenship. It contributes to strengthening the local social fabric and improving the daily lives of those it serves.

Solidarity Iftar: Student solidarity and engagement during Ramadan - Rotaract Club

As part of their social and community service activities, the Rotaract Club UEMF organized a humanitarian effort to distribute Ramadan iftar meals to the most vulnerable members of the community. Driven by the students' commitment and spirit of solidarity, this initiative resulted in the distribution of over 250 meals, providing moments of sharing, generosity, and fellowship during the holy month. Beyond simply distributing food, the action exemplifies the values of social responsibility, mutual support, and cohesion that motivate the student community, while also raising awareness among young people about social issues and the importance of taking action for the well-being of those living in precarious situations.

Blood Donation Campaign – April 2 & 3, 2026

As part of its civic and solidarity actions, the Elite Club organized the "Blood Donation Campaign - April 2 & 3, 2026", an initiative aimed at raising awareness of the importance of blood donation and actively contributing to strengthening national reserves.

Over these two days, club members mobilized to encourage student and staff participation, while also ensuring logistical organization and providing optimal support to donors. This campaign resulted in a significant number of donations, contributing to saving lives and meeting the urgent needs of healthcare facilities.

Beyond its health impact, this initiative also provided a powerful moment for raising awareness and fostering solidarity, strengthening the spirit of commitment and social responsibility within the university community. It fully reflects the values of the Elite Club, founded on mutual support, volunteerism, and positive impact in service to society.

Solidarity Iftar – Ramadan 2026

As part of its Ramadan activities, Club Élite organized the "Solidarity Iftar – Ramadan 2026" initiative, aimed at promoting the values of solidarity, sharing, and civic engagement. This initiative involved preparing and distributing 150 iftar meals to people in need.

Made possible through the active mobilization of club members and the involvement of its partners, this initiative provided concrete support to beneficiaries, while strengthening the spirit of mutual aid and social cohesion, particularly significant during the holy month of Ramadan.

Beyond its humanitarian aspect, this action fully illustrates the Elite Club's identity as a committed actor, working towards a positive and lasting social impact. It also demonstrates the club's ability to initiate and lead solidarity projects with strong human value, responding to the needs of communities.

ELITE Club Report 25-26

Tazouta Medical-Humanitarian Caravan – Sefrou Province

On March 8, 2026, the Elite Club of the Euromed University of Fez organized a mobile medical and dental outreach program in Tazouta, in the province of Sefrou, to benefit the local population. This humanitarian and healthcare initiative involved 15 doctors and 5 dentists, all working together towards a common goal: bringing healthcare closer to the inhabitants of rural areas and improving access to specialist consultations.

The mobile clinic provided medical consultations in several specialties, including gynecology (with ultrasound examinations), cardiology, gastroenterology, rheumatology, and dental care and consultations. Thanks to the commitment of healthcare professionals, student volunteers, and mobilized partners, this initiative helped meet the medical needs of many beneficiaries in a spirit of solidarity, prevention, and social support.

ELITE Club Report 25-26

ECG Interpretation Training led by Dr. Mohamed Amine Guessab 02/04

As part of its internal training program, the Elite Club organized, on Thursday, April 2, 2026, a training session in electrocardiogram (ECG) interpretation, led by Dr. Mohamed Amine Guessab.

The aim of this session was to strengthen the clinical skills of club members in reading and analyzing ECG tracings, an essential tool in the diagnosis of cardiovascular diseases. Through a combined theoretical and practical approach, participants acquired the fundamental principles of interpretation, as well as keys to applied clinical reasoning.

This initiative reflects the Elite Club's commitment to promoting excellence, capacity building, and skills development among its members by offering high-quality training led by experienced healthcare professionals. It also demonstrates the club's dedication to effectively preparing its members for the challenges they face in the field, particularly during medical caravans and community health initiatives.

School Health Caravan – Ben Khlif School Group, Ouled Mimoun 11/04

On April 11, 2026, Club Élite organized the "School Health Caravan – Ben Khlif School Group, Ouled Mimoun," as part of its community health and school-based prevention initiatives. This initiative aimed to promote the health and well-being of students while reinforcing preventative practices from a young age.

During the day, students received general medical consultations, dental care and procedures, as well as visual acuity tests. Oral health prevention workshops were also held, along with the distribution of toothbrushes and toothpaste, to raise children's awareness of good dental hygiene practices.

This initiative fully illustrates the Elite Club's commitment to youth health and prevention, while demonstrating its ability to organize comprehensive and structured interventions to serve school communities. It also reflects the club's spirit of solidarity and social responsibility towards children and their educational environment.

ELITE Club Report 25-26

SDG challenge: from idea to impact

On April 16, 2026, the Elite Club of the Euromed University of Fez organized an inspiring workshop entitled "SDG Challenge: From Idea to Impact," led by Hamid Taghlaoui. The workshop aimed to raise students' awareness of the importance of the Sustainable Development Goals (SDGs) and to encourage them to transform their innovative ideas into projects with concrete impact.

Through interactive discussions, case studies, and practical advice, participants were able to discover the various stages involved in designing, structuring, and developing initiatives with social, environmental, and economic objectives. Mr. Hamid Taghlaoui's presentation also highlighted the role of governance, leadership, and citizen engagement in the success of sustainable projects.

This workshop provided a space for inspiration, reflection and creativity, strengthening the entrepreneurial spirit and commitment of students to more inclusive and sustainable development.

School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi 18/04

On April 18, 2026, the Elite Club organized the "School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi," as part of its health and prevention initiatives for students. This action aimed to promote well-being and health prevention within the school environment.

During the day, students were able to receive general medical consultations, dental care and procedures, as well as visual acuity tests. In addition, oral hygiene workshops were held, along with the distribution of toothbrushes and toothpaste, to raise awareness among young people about the importance of hygiene and preventative care.

This intervention illustrates the Elite Club's commitment to improving student health and strengthening prevention from a young age, while demonstrating its ability to deploy comprehensive and structured health caravans, meeting the needs of local school communities.

ELITE Club Report 25-26

Sexual and reproductive health: raising awareness for better prevention

On April 23, 2026, the Elite Club of the Euromed University of Fez organized a conference on sexual and reproductive health in partnership with ALCS and the Espace Santé Jeunes Ville Nouvelle Fez. The aim of this event was to raise student awareness of issues related to sexual and reproductive health through an educational, preventative, and participatory approach.

The conference focused primarily on three major themes: sexually transmitted infections (STIs), sex education, and contraception. Speakers emphasized the importance of access to reliable information, prevention, and adopting responsible behaviors to promote the health and well-being of young people.

Through interactive exchanges and enriching discussions, this initiative has created a space for open and constructive dialogue, helping to break taboos around sexual health and raising student awareness of these essential public health issues.

ELITE Club Report 25-26

Mobile Medical and Dental Clinic in Ksar Jdid 26/04

On April 26, 2026, the Elite Club of the Euromed University of Fez organized a medical-dental caravan in Ksar Jdid, in the province of Rissani, as part of its humanitarian and social actions aimed at strengthening access to care in rural and remote areas.

This initiative mobilized a team of healthcare professionals and volunteers to provide multidisciplinary medical consultations to local residents. The services offered covered several specialties, including cardiology, gastroenterology, gynecology, dermatology, and ophthalmology, in addition to dental consultations and care, as well as general medicine.

The caravan aimed to bring health services closer to local populations, promote early detection, and raise awareness of the importance of prevention and medical follow-up. It thus enabled comprehensive and accessible healthcare for beneficiaries.

Through this action, the Elite Club reaffirms its commitment to solidarity, health promotion and social development in service of vulnerable communities.

ELITE Club Report 25-26

Humanitarian caravan in Ksar Jdid: 150 blankets to support rural families

On May 3, 2026, the Elite Club of the Euromed University of Fez organized a humanitarian caravan to Ksar Jdid, in the province of Rissani, as part of its solidarity actions aimed at supporting rural populations and improving their living conditions.

This initiative is part of a local humanitarian approach, driven by values of mutual aid, solidarity, and social commitment. It enabled the distribution of 150 blankets to beneficiary families, helping them cope with the weather and meet their basic daily needs, particularly during cold periods.

Beyond the material aid, this caravan provided a powerful moment of sharing and connection with the residents, strengthening the bonds between the volunteers and the local population. This initiative reflects the Elite Club's commitment to providing concrete solutions to the needs of vulnerable communities and contributing to the improvement of their living conditions.

Through this type of initiative, the Elite Club confirms its long-term commitment to humanitarian action, social development and territorial solidarity.

A social and educational day for the benefit of the children of the Lalla Amina Center

On Thursday, May 7, 2026, the Elite Club of the Euromed University of Fez, in collaboration with the Directorate of Student Affairs, participated in the organization of a cultural and sporting day for the benefit of the children of the Lalla Amina Center for the Protection of Children.

This solidarity initiative was marked by the distribution of Elite bags containing school supplies, including pencil cases, pens, notebooks and coloring books, in order to support and encourage children in their educational journey.

During the day, the Elite Club also ran an oral hygiene awareness workshop, along with the distribution of toothbrushes and toothpaste. The workshop aimed to educate children about the importance of brushing their teeth and good hygiene practices to maintain their oral health.

Through this social and educational action, the Elite Club reaffirms its commitment to children, education and the promotion of health.

Mobile dental clinic in Izlafene: strengthening access to care and prevention

On May 9, 2026, the Elite Club of the Euromed University of Fez, in partnership with the IAA Club of the Faculty of Sciences and Techniques of Fez, organized a medical and dental caravan in Izlafene, in the province of Taza, as part of its community health and prevention initiatives. This initiative provided medical consultations in general medicine, cardiology, and gynecology, along with the dispensing of medication to diagnosed patients. A significant oral health prevention component was also implemented through awareness campaigns and the distribution of 400 toothbrushes and toothpaste to beneficiaries. Through this initiative, the two clubs helped bring healthcare services closer to rural populations while reinforcing awareness of the importance of prevention and medical follow-up.

ELITE Club Report 25-26

Humanitarian action in Izlafene: solidarity and support for rural families

As part of the medical and humanitarian caravan organized on May 9, 2026, in Izlafene, the Elite Club of the Euromed University of Fez and the IAA Club of the Faculty of Sciences and Techniques of Fez also carried out a significant humanitarian effort to benefit families in the region. This act of solidarity enabled the distribution of 150 food baskets to beneficiary families, supporting vulnerable populations and contributing to the improvement of their living conditions. In addition, recreational and entertainment activities were organized for children, creating a moment of sharing, joy, and connection with the local community. This initiative reflects the values of mutual aid, solidarity, and civic engagement upheld by both clubs in support of social and human development.

UEMF's Got Talent: a 6ème an edition dedicated to talent, creativity and emotion

As part of its policy to promote student well-being and the development of artistic and creative skills, the Euromed University of Fez (UEMF) organized the 6thème The UEMF's Got Talent edition, a cultural event that has become a key part of university life, brought together students, teachers, and members of the university community to celebrate creativity, cultural diversity, and artistic expression.

Throughout the evening, participants presented a variety of performances showcasing their talents in different areas such as singing, dancing, stage performance, and other forms of artistic expression. This event provided students with a platform to share their passions, develop their self-confidence, improve their communication skills, and strengthen their ability to speak in front of an audience.

Beyond its artistic dimension, UEMF's Got Talent provides a space that fosters inclusion, diversity, and cohesion within the university community. By showcasing individual talents and the cultural richness of students, this event helps strengthen the sense of belonging to the University and promotes an environment that respects the diversity of backgrounds, cultures, and forms of expression.

This initiative illustrates UEMF's commitment to a holistic educational approach that goes beyond the acquisition of academic knowledge to also foster students' personal development, creativity, initiative, and social skills. It thus contributes to creating a stimulating university environment conducive to individual growth and the development of talents.

Partnership

The UEMF hosts the 6th e Meeting of the Board of Directors of the Green H2 Morocco Cluster

On January 23, 2026, the Euromed University of Fez hosted the sixth meeting of the Board of Directors of the Green H2 Morocco Cluster, highlighting its leading role in research and innovation in strategic sectors related to the energy transition. Prior to the meeting, participants toured the university's facilities, including sports facilities, laboratories in civil engineering, mechanics, biotechnology, and chemistry, as well as the ideation incubator and the Fez Smart Factory, demonstrating UEMF's capabilities in research and technology transfer.

The meeting focused on analyzing the Cluster's financial and organizational situation, reviewing activities, future development, and strengthening governance, within a context favorable to green hydrogen. The event illustrates the UEMF's commitment to supporting innovation, institutional partnerships, and the development of future-oriented sectors in Morocco, particularly in renewable energies.

Call for applications – Two scholarships in Canada | UQTR 2026–2027

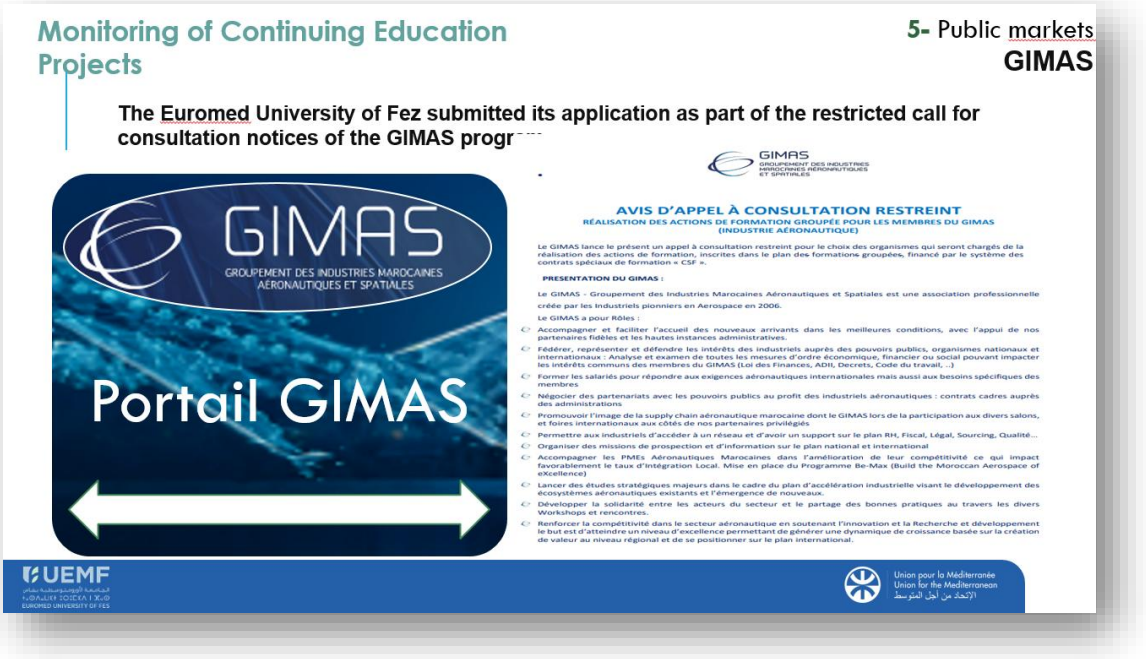

CALL FOR APPLICATIONS

Canada Scholarship Program (CSB) – UQTR 2026–2027 Open only to doctoral students and/or students preferably registered from their 3rd year onwards[e]Post-baccalaureate year. Deadline: Before January 20, 2026

Study in Canada (SCS) scholarships at the University of Quebec at Trois-Rivières (UQTR) – Canada

- Number of scholarships: 2
- Application deadline: January 20, 2026
- Academic year: 2026–2027

Application for the Restricted Tender – GIMAS Programme (Aerospace Industry)

UEMF submitted its application in response to the Restricted Call for Tenders issued by GIMAS (Groupement des Industries Marocaines Aéronautiques et Spatiales), a professional association founded in 2006 by pioneering aerospace industry leaders in Morocco. This call for tenders concerns the delivery of group training programs for GIMAS members, financed through Special Training Contracts (CSF), which are part of the group training plan. GIMAS's mission is to support industry players, advocate for their interests with public authorities, train employees to meet international aerospace standards, and strengthen the competitiveness of Moroccan aerospace SMEs, particularly through the Be-Max Program (Build the Moroccan Aerospace of Excellence). By responding to this call, UEMF affirms its strategic positioning as an essential player in vocational training in high value-added industrial sectors, and its desire to actively contribute to the development and competitiveness of the Moroccan aeronautical industrial fabric at the national and international level.

Executive Training Programme on Sustainable Social Finance – UNFPA

The UEMF submitted its application to the Executive Training Programme on Sustainable Social Finance and Blended Finance Mechanisms, an initiative fully funded by the United Nations Population Fund (UNFPA). This ambitious program was structured into five cohorts targeting distinct audiences: Civil Society, Government, the Private Sector, the Media, and Academia, for a total of 140 participants. Each cohort followed a modular program covering an introduction to sustainable social finance, blended finance, social bonds and Sukuk, Social Return on Investment (SROI), and tools and methodologies for designing impactful projects. All sessions took place between October and November 2025, culminating in an official closing ceremony on January 16, 2026, at the Bouregreg Palace in Salé, as part of the GIB project aimed at empowering vulnerable girls, particularly NEETs (Not in Education, Employment, or Training). This achievement illustrates UEMF's ability to design and deploy large-scale national certification training programs in partnership with major UN agencies.

Bernspire 2025-2026: Applications open for international student competitions

Bernspire, a Swiss association committed to education, innovation and the development of young talent internationally, announces the official opening of applications for the 2025-2026 edition of its academic competitions.
Organized annually on a supra-regional scale, Bernspire's Graduation Project Challenges are aimed at final-year university students in the fields of engineering and social sciences. This initiative seeks to promote innovative graduation projects that offer concrete solutions to contemporary technological, societal, and environmental challenges.

The competitions bring together participants from several international universities and are evaluated by a jury composed of academic experts and professionals from different countries, thus offering candidates international visibility and a unique opportunity to showcase their research and innovation work.
Applications are open to students preparing their final year project during the 2025-2026 academic year.

Students wishing to participate can consult the application procedures and submit their projects via the official Bernspire website:
www.bernspire.com/the-details
The results of previous editions and the winning projects can be viewed via:

The Euromed University of Fez and the Cervantes Institute of Fez seal a strategic partnership in service of Euro-Mediterranean intercultural dialogue

In a dynamic of strengthening academic and cultural exchanges between the two shores of the Mediterranean, Euromed University of Fez and Cervantes Institute of Fez have formalized a cooperation agreement marking a new stage in their joint commitment to intercultural dialogue and bringing people closer together.

The signing ceremony took place on Wednesday, May 13th, in the presence of Professor Mostapha Bousmina, President of the Euromed University of Fez, and Mr. Òscar Pujol Riembau, Director of the Cervantes Institute of Fez. The event was also graced by the presence of His Excellency Enrique Ojeda Vila, Ambassador of Spain to Morocco, demonstrating the importance attached to this cultural and academic cooperation initiative.

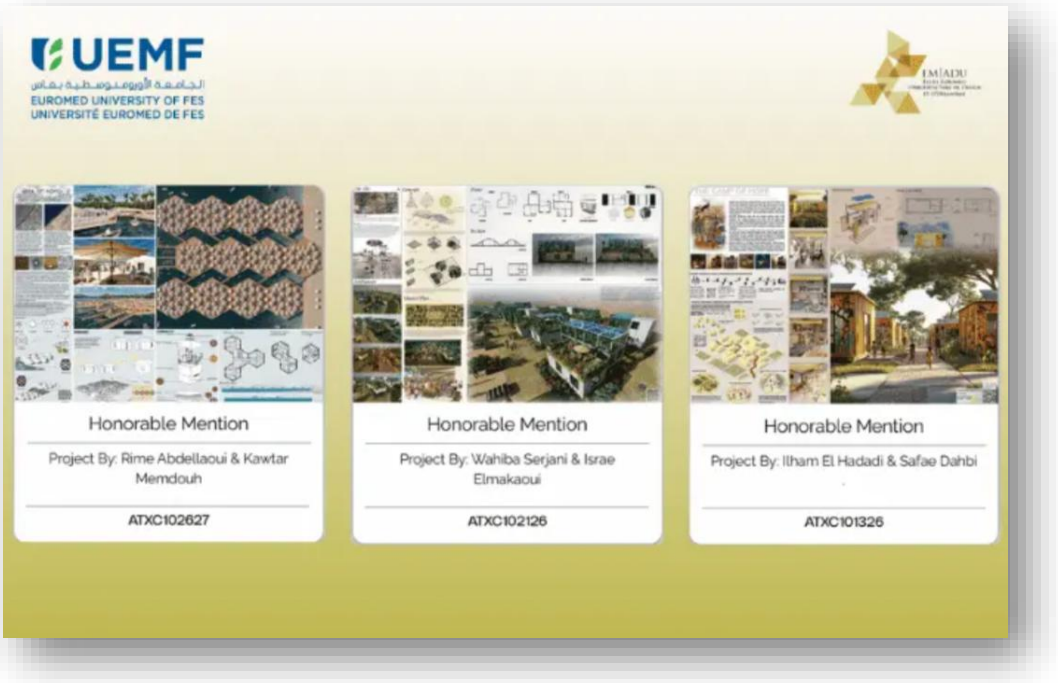

This agreement reflects a shared ambition: to make language and culture essential drivers of rapprochement, mutual understanding, and openness between Mediterranean societies. Through this alliance, the two institutions reaffirm their commitment to promoting intellectual exchange, intercultural dialogue, and academic synergies around Hispanic culture and language.

This partnership will pave the way for the implementation of a rich and diverse program of joint initiatives, including conferences, workshops, training programs and cultural events designed to foster interactions between students, teachers and cultural actors.

Beyond the institutional scope of this cooperation, this initiative illustrates a common vision based on openness, the transmission of knowledge and the development of a Euro-Mediterranean space where culture constitutes a strategic lever for sustainable rapprochement between academic communities and future generations.

Awards and Distinctions

ATX Design of the Year 2025: Three groups of EMADU students recognized at the international competition

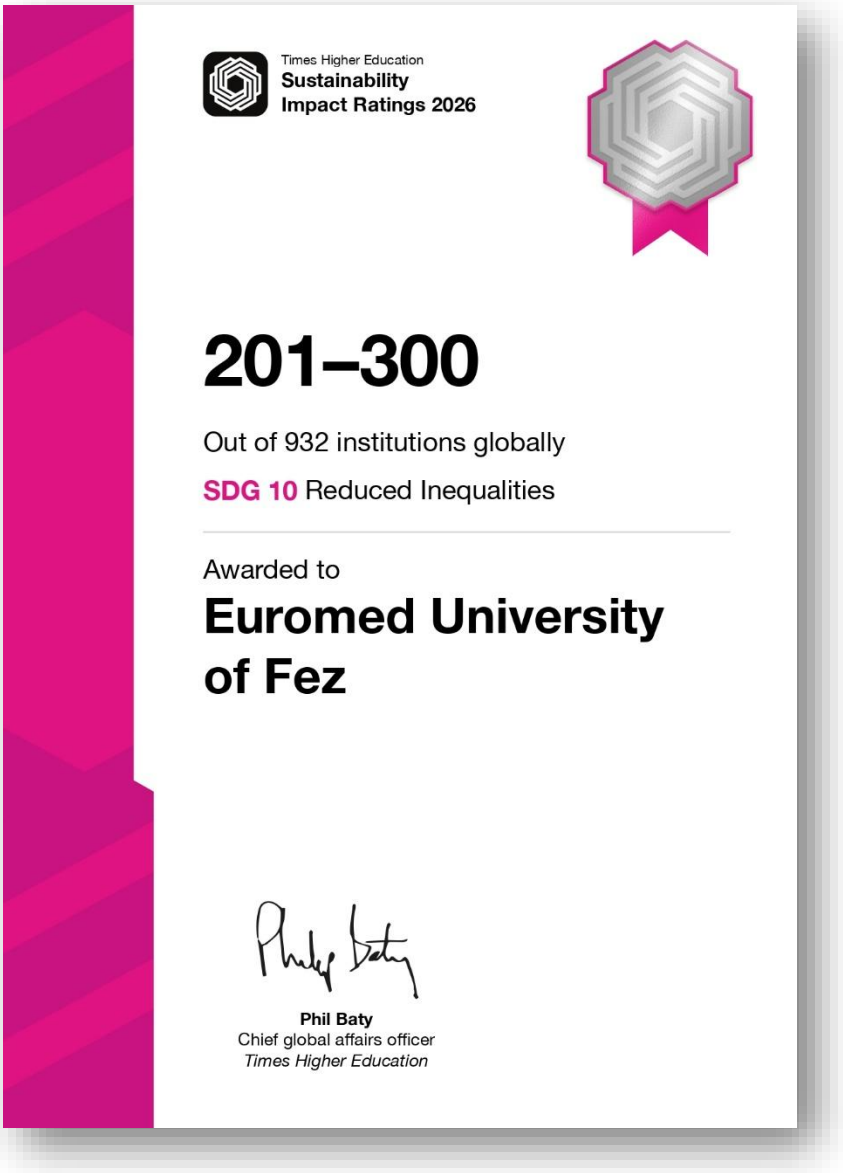

The Euromed University of Fez (UEMF) is proud to announce that six students (3 pairs) from the School of Architecture, Design and Urbanism (EMADU) have obtained three honorable mentions in the prestigious international competition ATX Design of the Year 2025, organized by Architerrax, an international learning platform dedicated to the dissemination of knowledge in architecture and design.

Sous l'encadrement de l'enseignant Pr. Jassim Benlemlih, les étudiantes ont concouru dans la catégorie "Design for Change", qui met à l'honneur l'innovation et l'impact social à travers des solutions architecturales visionnaires.

Le concours proposait aux participants de développer des projets architecturaux destinés aux réfugiés de guerre, en se concentrant sur des besoins concrets tels que le logement, les espaces communautaires, l'éducation ou encore la santé. Au-delà des interventions d'urgence, il s'agissait d'imaginer des dispositifs durables, dignes et résilients pour améliorer les conditions de vie des populations déplacées.

Les projets présentés par les étudiantes de l'EMADU ont séduit le jury par leur créativité, leur approche humaniste et leur capacité à proposer des réponses innovantes à des enjeux globaux. Cette reconnaissance internationale témoigne de la qualité de la formation dispensée à l'EMADU et de l'engagement de ses étudiants à contribuer positivement aux défis sociétaux actuels.

Performance de l'UEMF dans le THE Impact Ratings 2026 – ODD 10

Dans le cadre du THE Impact Rankings 2026, l'Université Euromed de Fès (UEMF) s'est classée dans la tranche 201–300 parmi 932 institutions à l'échelle mondiale pour l'ODD 10 : Réduction des inégalités. Cette performance met en valeur ses contributions en faveur de l'inclusion, de l'égalité des chances, de l'accessibilité de l'enseignement et de la réduction des inégalités, à travers ses actions de

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

The Euromed University of Fez actively contributes to the promotion of sustainable cities and communities through its educational projects, training programs, and academic activities related to architecture, urban planning, engineering, and the environment. By organizing workshops, conferences, and awareness campaigns, the University fosters innovation, collective reflection, and the development of solutions tailored to urban and environmental challenges. Through these initiatives, UEMF participates in the training of citizens and professionals committed to building more sustainable, inclusive, and resilient territories.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez contributes to the promotion of sustainable communities by developing an environmentally friendly campus. It implements policies aimed at improving quality of life and reducing its ecological impact. The management of mobility, energy, and infrastructure is a central pillar of its strategy. The university encourages sustainable modes of transport and limits the environmental footprint of its activities. It also fosters a healthy and inclusive living environment for its community. The Euromed University of Fez is thus committed to territorial sustainability. It contributes to building a model of a sustainable and resilient campus.

Carbon neutrality and climate action policy of the Euromed University of Fez (Version 2025)

1. Engagement institutionnel :

L'Université Euromed de Fès (UEMF) s'engage à atteindre la neutralité carbone à l'horizon 2030, conformément aux protocoles internationaux sur les gaz à effet de serre (*Greenhouse Gas Protocol*) et aux Objectifs de Développement Durable des Nations Unies (ODD 13 – Lutte contre les changements climatiques).

Cet engagement traduit la vision de l'UEMF en tant qu'université durable, inclusive et innovante, moteur de la transition énergétique et écologique au Maroc et dans la région euro-méditerranéenne.

2. Axes stratégiques d'action :

a. Gestion environnementale du campus

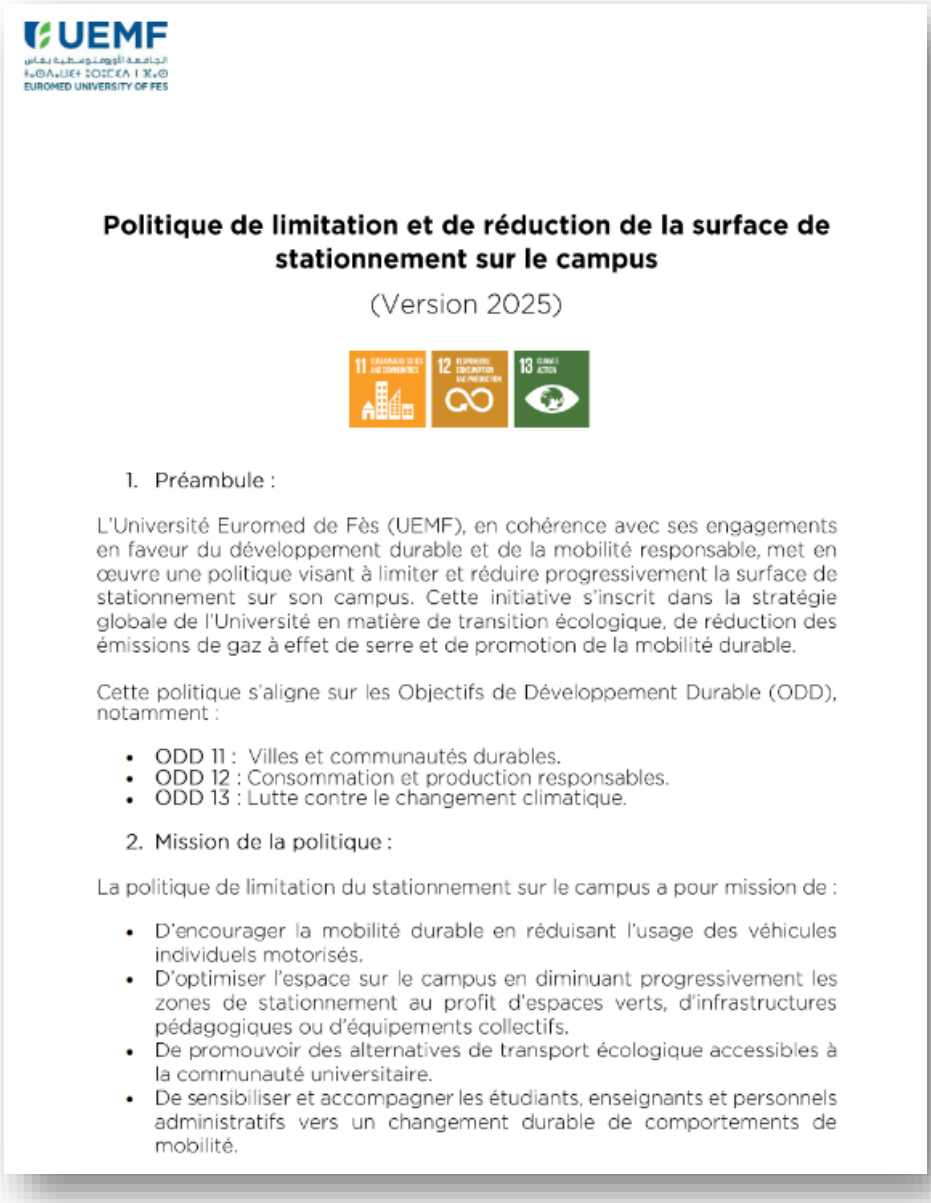

- Réduction progressive des émissions de CO_2 liées aux bâtiments, à la mobilité et aux opérations ;
- Production d'énergie renouvelable grâce à des installations photovoltaïques et thermiques solaires ;
- Mobilité électrique gratuite pour les déplacements internes (voitures et navettes électriques, bornes de recharge) ;
- Recyclage et valorisation des déchets plastiques et organiques, verdissement du campus ;
- Captation des eaux pluviales pour l'arrosage des jardins ;
- Traitement et recirculation des eaux grises pour des besoins d'arrosage ;
- Utilisation de matériaux moins énergivore et durable ;
- Conception architecturale prévoyant le maximum de lumière naturel :

1

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

Policy for limiting and reducing the parking area on campus (version 2025)

UEMF
EUROMED UNIVERSITY OF FES

Politique de limitation et de réduction de la surface de stationnement sur le campus

(Version 2025)

1. Préambule :

L'Université Euromed de Fès (UEMF), en cohérence avec ses engagements en faveur du développement durable et de la mobilité responsable, met en œuvre une politique visant à limiter et réduire progressivement la surface de stationnement sur son campus. Cette initiative s'inscrit dans la stratégie globale de l'Université en matière de transition écologique, de réduction des émissions de gaz à effet de serre et de promotion de la mobilité durable.

Cette politique s'aligne sur les Objectifs de Développement Durable (ODD), notamment :

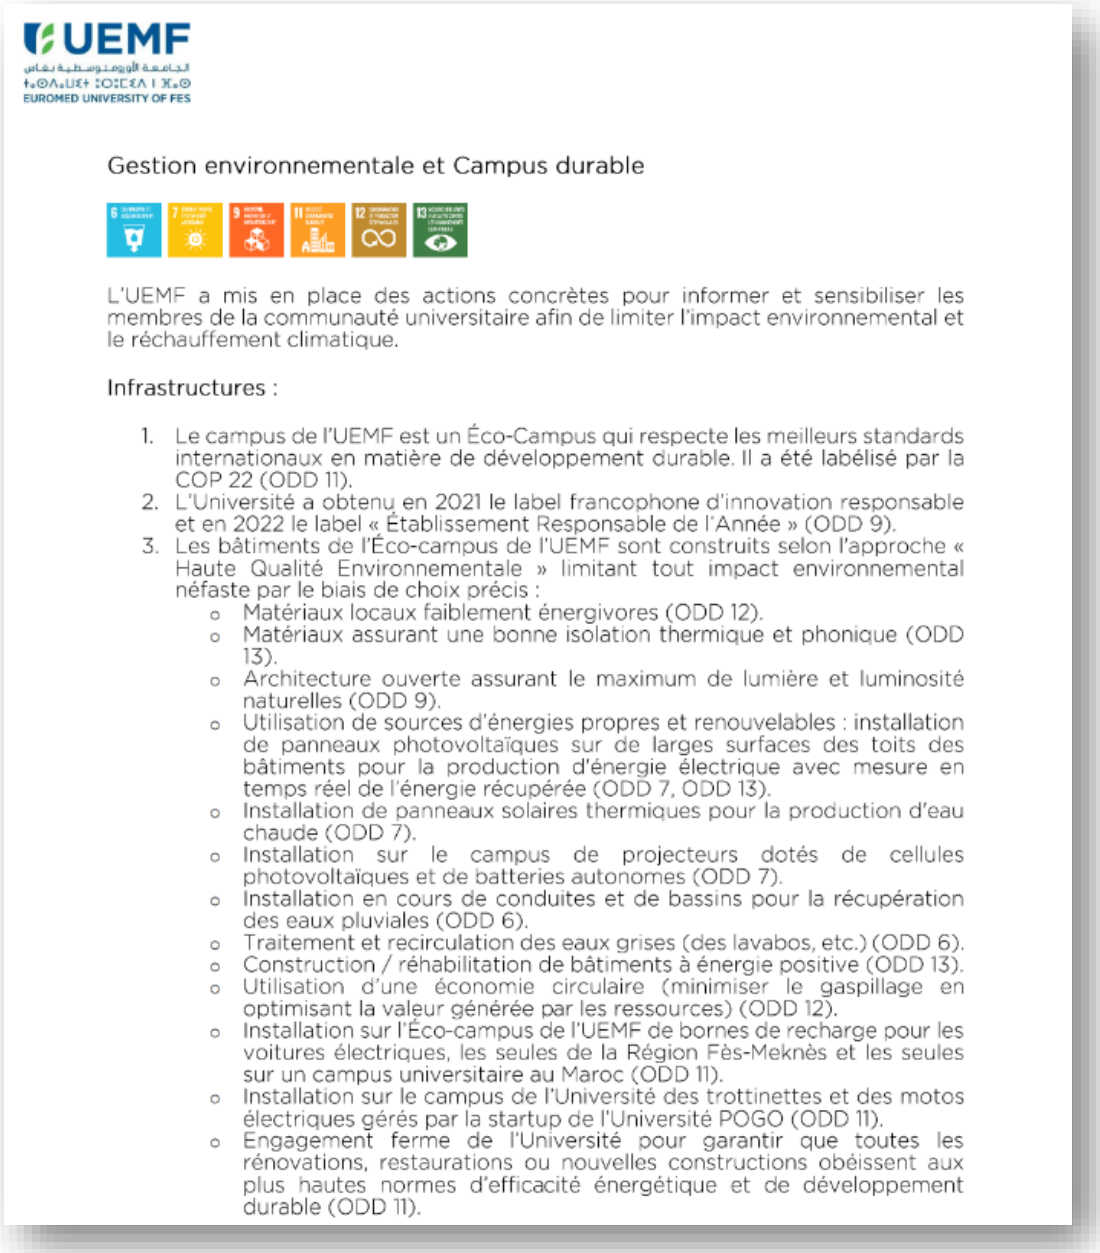

- ODD 11 : Villes et communautés durables.
- ODD 12 : Consommation et production responsables.
- ODD 13 : Lutte contre le changement climatique.

2. Mission de la politique :

La politique de limitation du stationnement sur le campus a pour mission de :

- D'encourager la mobilité durable en réduisant l'usage des véhicules individuels motorisés.
- D'optimiser l'espace sur le campus en diminuant progressivement les zones de stationnement au profit d'espaces verts, d'infrastructures pédagogiques ou d'équipements collectifs.
- De promouvoir des alternatives de transport écologique accessibles à la communauté universitaire.
- De sensibiliser et accompagner les étudiants, enseignants et personnels administratifs vers un changement durable de comportements de mobilité.

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

UEMF
EUROMED UNIVERSITY OF FES

Gestion environnementale et Campus durable

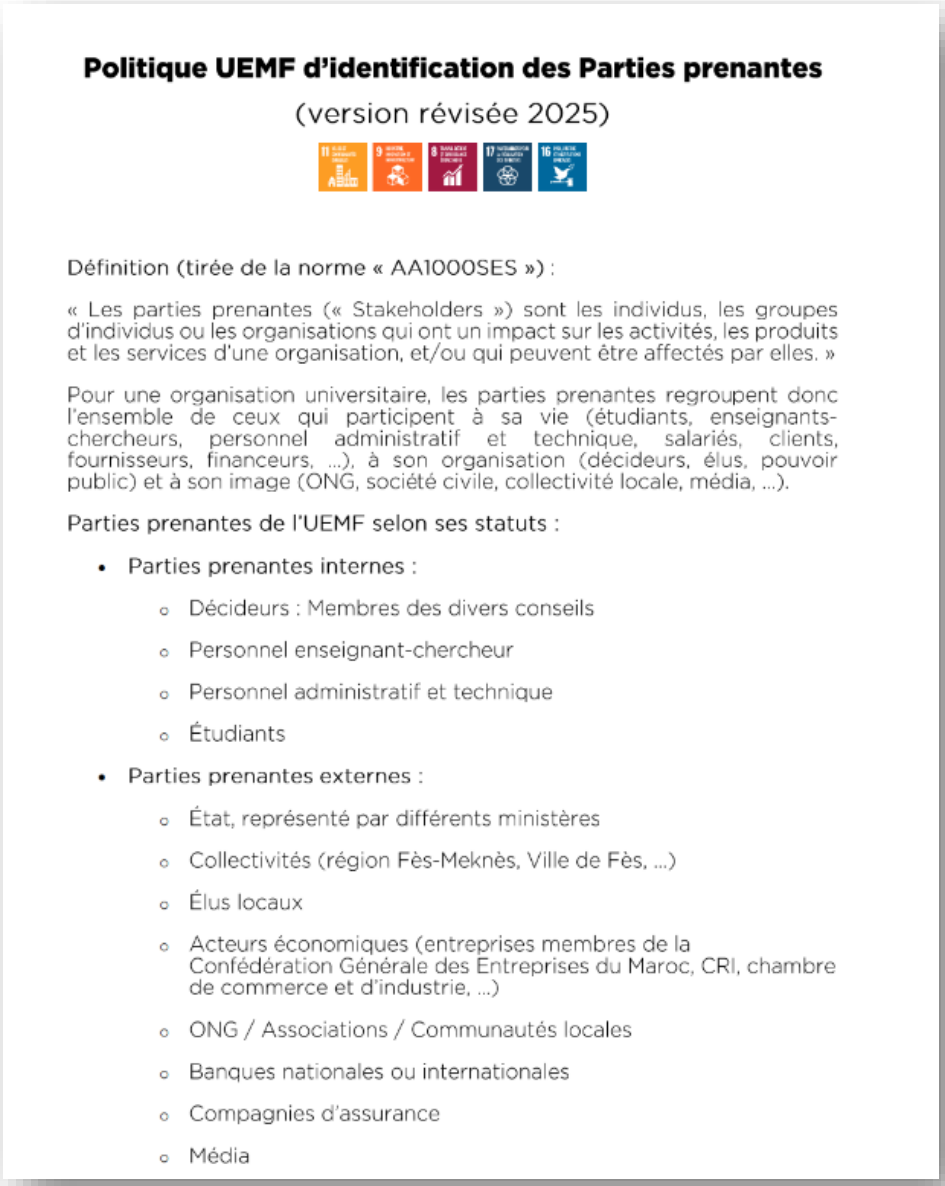

L'UEMF a mis en place des actions concrètes pour informer et sensibiliser les membres de la communauté universitaire afin de limiter l'impact environnemental et le réchauffement climatique.

Infrastructures :

1. Le campus de l'UEMF est un Éco-Campus qui respecte les meilleurs standards internationaux en matière de développement durable. Il a été labélisé par la COP 22 (ODD 11).
2. L'Université a obtenu en 2021 le label francophone d'innovation responsable et en 2022 le label « Établissement Responsable de l'Année » (ODD 9).
3. Les bâtiments de l'Éco-campus de l'UEMF sont construits selon l'approche « Haute Qualité Environnementale » limitant tout impact environnemental néfaste par le biais de choix précis :
   - Matériaux locaux faiblement énergivores (ODD 12).
   - Matériaux assurant une bonne isolation thermique et phonique (ODD 13).
   - Architecture ouverte assurant le maximum de lumière et luminosité naturelles (ODD 9).
   - Utilisation de sources d'énergies propres et renouvelables : installation de panneaux photovoltaïques sur de larges surfaces des toits des bâtiments pour la production d'énergie électrique avec mesure en temps réel de l'énergie récupérée (ODD 7, ODD 13).
   - Installation de panneaux solaires thermiques pour la production d'eau chaude (ODD 7).
   - Installation sur le campus de projecteurs dotés de cellules photovoltaïques et de batteries autonomes (ODD 7).
   - Installation en cours de conduites et de bassins pour la récupération des eaux pluviales (ODD 6).
   - Traitement et recirculation des eaux grises (des lavabos, etc.) (ODD 6).
   - Construction / réhabilitation de bâtiments à énergie positive (ODD 13).
   - Utilisation d'une économie circulaire (minimiser le gaspillage en optimisant la valeur générée par les ressources) (ODD 12).
   - Installation sur l'Éco-campus de l'UEMF de bornes de recharge pour les voitures électriques, les seules de la Région Fès-Meknès et les seules sur un campus universitaire au Maroc (ODD 11).
   - Installation sur le campus de l'Université des trottinettes et des motos électriques gérés par la startup de l'Université POGO (ODD 11).
   - Engagement ferme de l'Université pour garantir que toutes les rénovations, restaurations ou nouvelles constructions obéissent aux plus hautes normes d'efficacité énergétique et de développement durable (ODD 11).

UEMF is committed to optimizing its energy consumption and promoting the use of renewable energy. This policy aims to reduce the University's carbon footprint while ensuring the efficiency of its infrastructure.

Stakeholder identification policy

Politique UEMF d'identification des Parties prenantes

(version révisée 2025)

Définition (tirée de la norme « AA1000SES ») :

« Les parties prenantes (« Stakeholders ») sont les individus, les groupes d'individus ou les organisations qui ont un impact sur les activités, les produits et les services d'une organisation, et/ou qui peuvent être affectés par elles. »

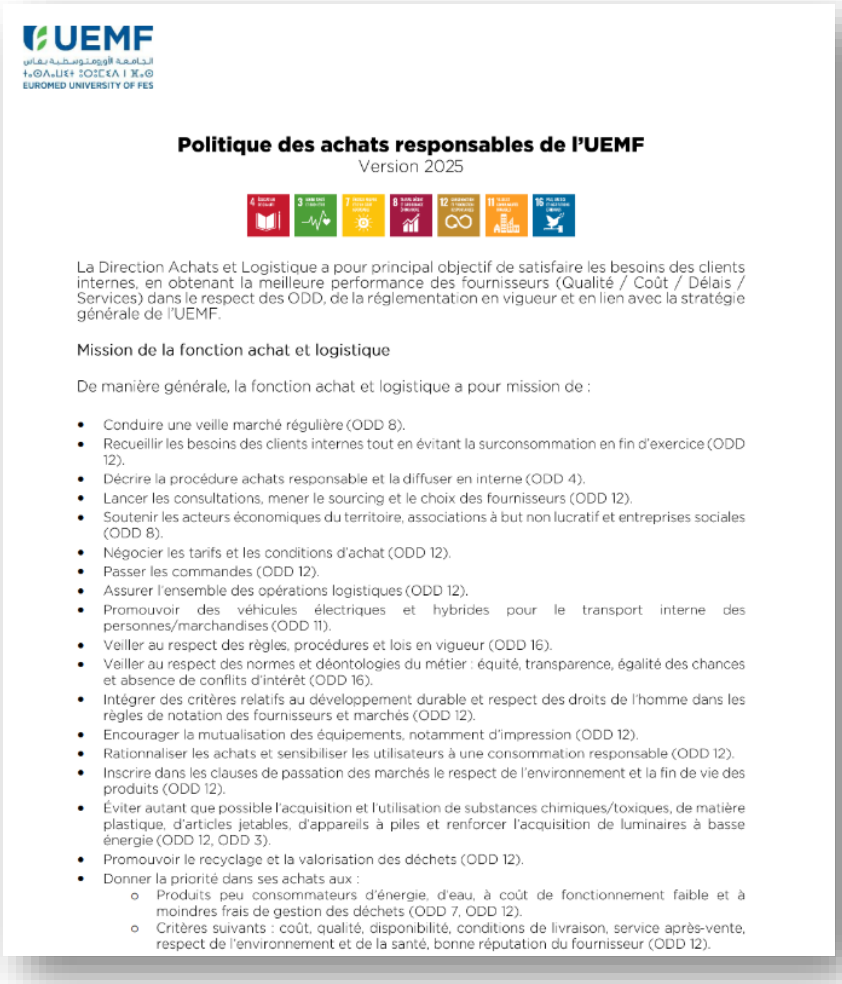

Pour une organisation universitaire, les parties prenantes regroupent donc l'ensemble de ceux qui participent à sa vie (étudiants, enseignants-chercheurs, personnel administratif et technique, salariés, clients, fournisseurs, financeurs, ...), à son organisation (décideurs, élus, pouvoir public) et à son image (ONG, société civile, collectivité locale, média, ...).

Parties prenantes de l'UEMF selon ses statuts :

- Parties prenantes internes :
  - Décideurs : Membres des divers conseils
  - Personnel enseignant-chercheur
  - Personnel administratif et technique
  - Étudiants
- Parties prenantes externes :
  - État, représenté par différents ministères
  - Collectivités (région Fès-Meknès, Ville de Fès, ...)
  - Élus locaux
  - Acteurs économiques (entreprises membres de la Confédération Générale des Entreprises du Maroc, CRI, chambre de commerce et d'industrie, ...)
  - ONG / Associations / Communautés locales
  - Banques nationales ou internationales
  - Compagnies d'assurance
  - Média

The UEMF recognizes the importance of its stakeholders in the success of its missions. This policy defines the methods of dialogue, listening, and cooperation with students, teachers, institutional partners, and economic actors.

UEMF Responsible Procurement Policy (Version 2025)

UEMF
EUROMED UNIVERSITY OF FES

Politique des achats responsables de l'UEMF
Version 2025

La Direction Achats et Logistique a pour principal objectif de satisfaire les besoins des clients internes, en obtenant la meilleure performance des fournisseurs (Qualité / Coût / Délais / Services) dans le respect des ODD, de la réglementation en vigueur et en lien avec la stratégie générale de l'UEMF.

Mission de la fonction achat et logistique

De manière générale, la fonction achat et logistique a pour mission de :

- Conduire une veille marché régulière (ODD 8).
- Recueillir les besoins des clients internes tout en évitant la surconsommation en fin d'exercice (ODD 12).
- Décrire la procédure achats responsable et la diffuser en interne (ODD 4).
- Lancer les consultations, mener le sourcing et le choix des fournisseurs (ODD 12).
- Soutenir les acteurs économiques du territoire, associations à but non lucratif et entreprises sociales (ODD 8).
- Négocier les tarifs et les conditions d'achat (ODD 12).
- Passer les commandes (ODD 12).
- Assurer l'ensemble des opérations logistiques (ODD 12).
- Promouvoir des véhicules électriques et hybrides pour le transport interne des personnes/marchandises (ODD 11).
- Veiller au respect des règles, procédures et lois en vigueur (ODD 16).
- Veiller au respect des normes et déontologies du métier : équité, transparence, égalité des chances et absence de conflits d'intérêt (ODD 16).
- Intégrer des critères relatifs au développement durable et respect des droits de l'homme dans les règles de notation des fournisseurs et marchés (ODD 12).
- Encourager la mutualisation des équipements, notamment d'impression (ODD 12).
- Rationnaliser les achats et sensibiliser les utilisateurs à une consommation responsable (ODD 12).
- Inscrire dans les clauses de passation des marchés le respect de l'environnement et la fin de vie des produits (ODD 12).
- Éviter autant que possible l'acquisition et l'utilisation de substances chimiques/toxiques, de matière plastique, d'articles jetables, d'appareils à piles et renforcer l'acquisition de luminaires à basse énergie (ODD 12, ODD 3).
- Promouvoir le recyclage et la valorisation des déchets (ODD 12).
- Donner la priorité dans ses achats aux :
  - Produits peu consommateurs d'énergie, d'eau, à coût de fonctionnement faible et à moindres frais de gestion des déchets (ODD 7, ODD 12).
  - Critères suivants : coût, qualité, disponibilité, conditions de livraison, service après-vente, respect de l'environnement et de la santé, bonne réputation du fournisseur (ODD 12).

With this policy, the UEMF is establishing a framework for ethical and sustainable procurement. It encourages the selection of suppliers who share values of transparency, social and environmental responsibility.

Smoke-free policy (Revised version 2025)

UEMF

الجامعة الأورومتوسطية بفاس

EUROMED UNIVERSITY OF FES

Politique Sans Fumée à l'UEMF :

Une Démarche Vers le Développement Durable

(version révisée 2025)

À l'Université Euromed de Fès (UEMF), la mise en place d'une politique sans fumée contribue directement à plusieurs Objectifs de Développement Durable (ODD) en favorisant un environnement plus sain et plus durable sur le campus. Cette initiative ne se limite pas à la promotion du bien-être, mais témoigne également de l'engagement de l'université envers des pratiques durables.

1. ODD 3 : Bonne Santé et Bien-être

En interdisant de fumer sur le campus, l'UEMF fait un pas important vers l'amélioration de la santé publique. Le tabagisme étant une des principales causes de maladies évitables, la création d'un environnement sans fumée permet de réduire l'exposition à la fumée secondaire, protégeant ainsi les fumeurs et les non-fumeurs de ses effets nocifs. Cela s'aligne sur l'ODD 3, qui vise à garantir une vie en bonne santé et à promouvoir le bien-être de tous, à tous les âges.

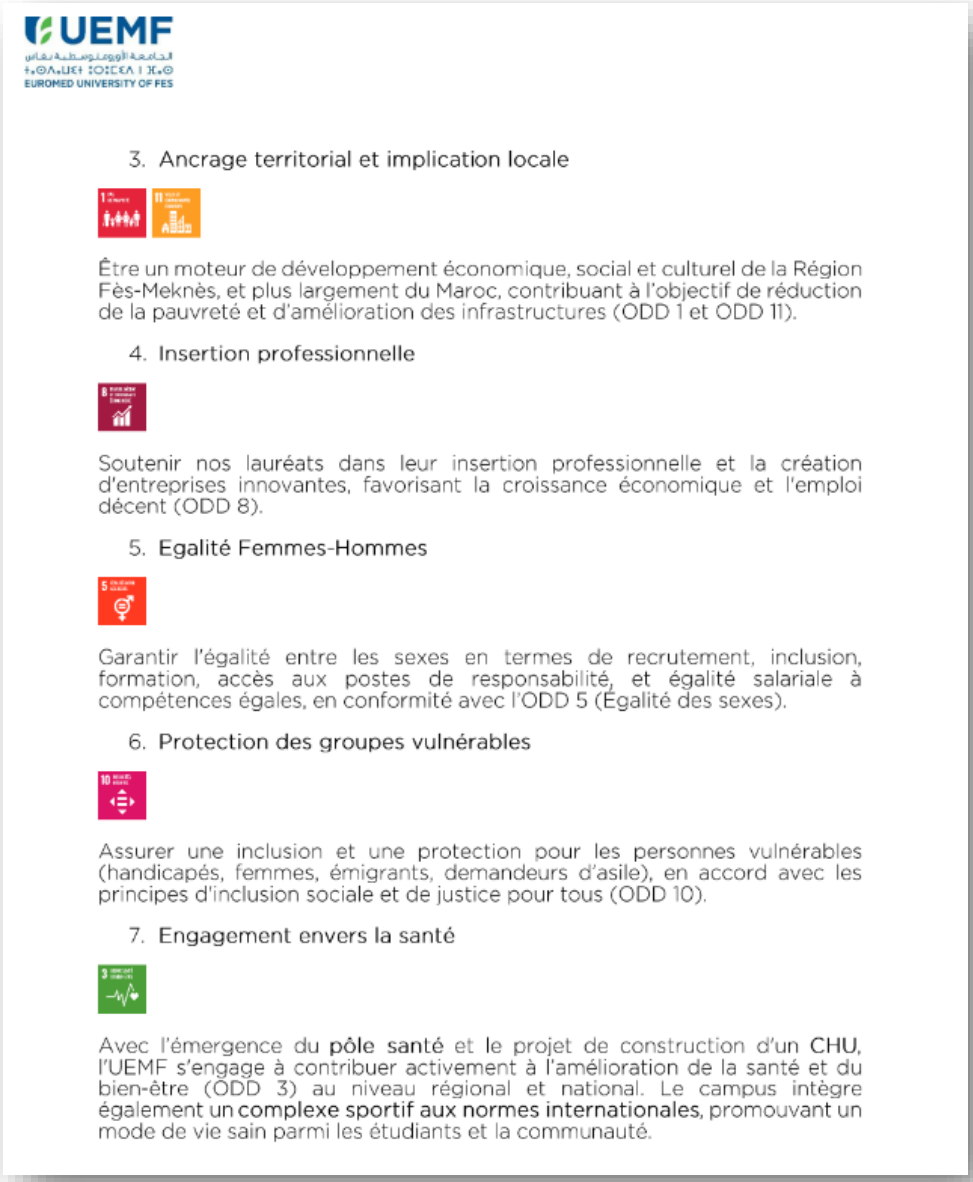

2. ODD 4 : Éducation de Qualité

Un campus sans fumée favorise un meilleur environnement d'apprentissage, ce qui soutient l'objectif de l'ODD 4 visant à assurer une éducation de qualité, inclusive et équitable. La réduction des distractions et la promotion de comportements sains permettent aux étudiants de mieux se concentrer sur leurs études et améliorent l'expérience éducative globale.

3. ODD 11 : Villes et Communautés Durables

En contribuant à un environnement plus propre et plus sain, la politique sans fumée est en adéquation avec l'ODD 11, qui appelle à rendre les villes et les établissements humains inclusifs, sûrs, résilients et durables. La limitation du

UEMF is committed to preserving the health and well-being of its community by implementing a smoke-free policy on its campus. This initiative promotes a healthy environment conducive to learning and community life.

UEMF
EUROMED UNIVERSITY OF FES

3. Ancrage territorial et implication locale

Être un moteur de développement économique, social et culturel de la Région Fès-Meknès, et plus largement du Maroc, contribuant à l'objectif de réduction de la pauvreté et d'amélioration des infrastructures (ODD 1 et ODD 11).

4. Insertion professionnelle

Soutenir nos lauréats dans leur insertion professionnelle et la création d'entreprises innovantes, favorisant la croissance économique et l'emploi décent (ODD 8).

5. Egalité Femmes-Hommes

Garantir l'égalité entre les sexes en termes de recrutement, inclusion, formation, accès aux postes de responsabilité, et égalité salariale à compétences égales, en conformité avec l'ODD 5 (Égalité des sexes).

6. Protection des groupes vulnérables

Assurer une inclusion et une protection pour les personnes vulnérables (handicapés, femmes, émigrants, demandeurs d'asile), en accord avec les principes d'inclusion sociale et de justice pour tous (ODD 10).

7. Engagement envers la santé

Avec l'émergence du **pôle santé** et le projet de construction d'un **CHU**, l'UEMF s'engage à contribuer activement à l'amélioration de la santé et du bien-être (ODD 3) au niveau régional et national. Le campus intègre également un **complexe sportif aux normes internationales**, promouvant un mode de vie sain parmi les étudiants et la communauté.

This charter formalizes the integration of social responsibility at the heart of the UEMF's missions. It outlines concrete commitments in the areas of ethics, governance, respect for the environment and contribution to sustainable development.

E-SDG

The training programs offered by EMADU and EIDIA contribute to SDG 11 – Sustainable Cities and Communities – by developing skills in architecture, urban planning, design, and digital technologies. EMADU trains architects, urban planners, designers, and landscape architects capable of designing sustainable living spaces, developing territories, planning cities, preserving heritage, and improving the quality of life. In addition, EIDIA develops skills in artificial intelligence, robotics, cybersecurity, and digital technologies, applicable to smart cities, digital infrastructure, and innovative urban services.

1. PREPARATORY CYCLE

The Integrated Preparatory Cycle at the School of Digital Engineering and Artificial Intelligence is designed to provide students with in-depth scientific and technical training, enabling them to access the various digital engineering tracks. This program combines courses in computer science, electronics, applied mathematics, and humanities and social sciences, in order to lay a solid foundation for the rest of their studies in the engineering cycle.

2.ENGINEERING PROGRAM

Sectors:

- Artificial Intelligence (AI)
- Robotics and Cobotics
- Big Data Analysis
- Information Technology and Cybersecurity
- Full Stack and Multimedia Engineering

3. MASTER'S PROGRAM

ICT Security and Artificial Intelligence (dual degree program with George Washington University)

Skills in artificial intelligence, robotics, cybersecurity and digital technologies can be mobilized to develop solutions for smart cities, digital infrastructure and innovative public services.

SCHOOL OF ARCHITECTURE, DESIGN AND URBAN PLANNING

1. ARCHITECT'S CYCLE: Architect's Degree (Bac +6)

The diploma obtained through this program is an architecture degree with Moroccan recognition and accreditation:

2. BACHELOR'S DEGREE PROGRAM: Bachelor's degree in Design (3 years post-high school)

The EMADU Design degree is designed to train designers capable of creatively managing, beyond the object, decision-making processes, mediation and the integration of multidisciplinary contributions; thus enabling graduates to work across a very wide range of sectors.

3. MASTER'S PROGRAM: Master in Global Design (Bac+5)

EMADU offers an innovative, multidisciplinary, and internationally focused program that promotes practical learning, critical thinking, innovation, and the development of skills necessary for design professions.

EMADU trains architects, urban planners, designers and landscape architects capable of designing sustainable living spaces, developing territories, planning cities, preserving heritage and improving the living environment of citizens.

Research, Innovation & Entrepreneurship
Research Topics - Doctoral Cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 11 has been identified. This work focuses in particular on sustainable architecture, urban transformation, mobility, smart cities, resilience, heritage enhancement, landscape, and thermal comfort.

The table below presents the main research topics contributing to this objective.

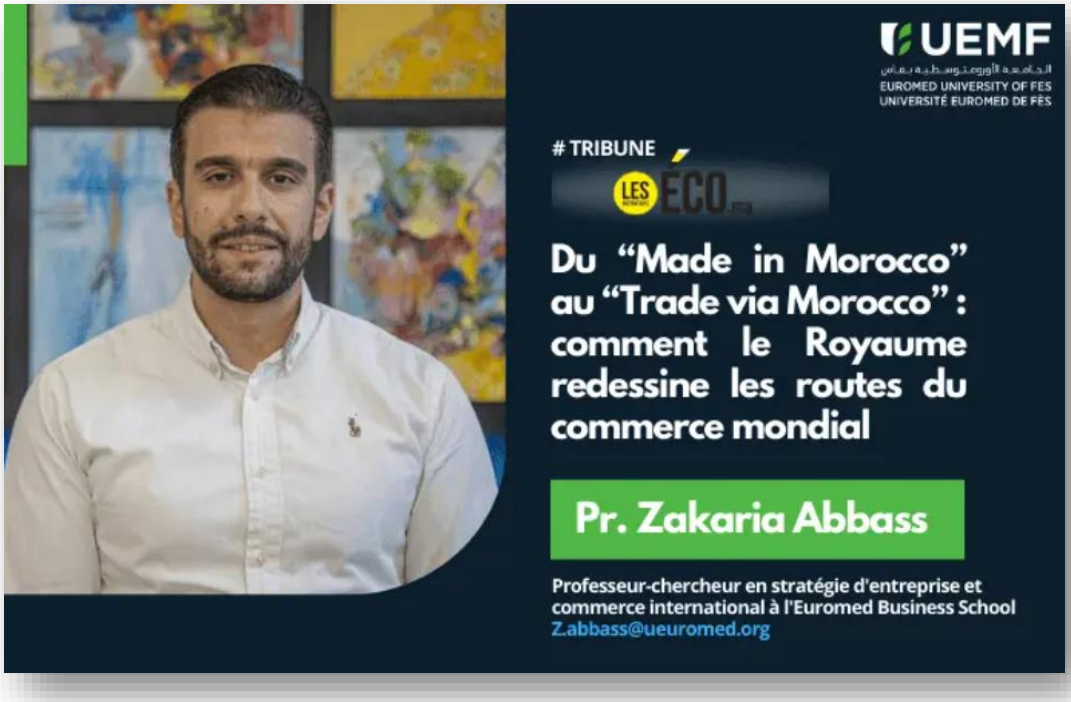

Thesis Subject	related SDGs
Local Bio-Sourced Materials and Process Integration in 3D Concrete Printing	SDG 11
Numerical Simulation of the Extrusion and Layer Deposition Processes in 3D Concrete Printing	SDG 11
Optimization of Freight Mobility in the City: Urban Integration and Intermodal Potential	SDG 11
Transforming an Unsustainable City into a Sustainable One: The Case of Fez	SDG 11
How to Think the Landscape Future in Africa? Towards an African Convention of Landscape	SDG 11
From Abandonment to Urban Renaissance: Sensitive and Strategic Approaches to Rehabilitating Urban, Agricultural and Industrial Spaces	SDG 11
Modeling and Optimizing Building for Energy Efficiency Using the Digital Twin Concept	SDG 11
Hybrid Experiments-Based Numerical Simulations in 3D Cement Printing for Clay-Based Bio-Sourced Materials Development	SDG 11
Synthesis of Bio-Sourced Cementitious Materials for Additive Manufacturing in Construction	SDG 11
Interdisciplinary Spaces in Educational Architecture: Influencing Behavior, Perceptions, and Emotions in the Learning Experience	SDG 11
A Study and Conception of an Optimized and Secure Routing Protocol for IoT Platforms using Artificial Intelligence Algorithm	SDG 11
Eco-Resilient Earthen Construction: Integrating Material Innovation, Seismic Safety and Environmental Sustainability	SDG 11
Geo-spatial analysis of urban transformations in the medina of Fez	SDG 11
Cooling the city – microclimatic strategies for thermal comfort and energy efficiency	SDG 11
Sustainable architecture and the identity of places in sub-Saharan African countries	SDG 11
Sustainable architecture and energy efficiency: integrated approaches between architecture and geography in the Moroccan context	SDG 11

Thesis Subject	related SDGs
Autonomous and Cognitive Navigation for Mobile Robots via Deep Learning and Large Language Model (LLM) Integration	SDG 11
Sustainable Landscape Strategies and Experiential Agro-Tourism in Moroccan Rural Villages	SDG 11
Smart Integration of Electric and Hybrid Vehicles into the Power Grid	SDG 11

Research projects2025-2026

Title	SDG RELATED
Adaptive Reuse and Industrial Tourism for Sustainable Urban Regeneration: A Korea–Morocco Comparative Framework for Riads, Hanoks, and Urban Voids	SDG 11
AgroMaBio (Agroecological Market Gardens for Biodiversity and Socio-Climate Resilience: Cross-City Studies)	SDG 11

[Opinion] From "Made in Morocco" to "Trade via Morocco": how the Kingdom is reshaping global trade routes

The "Made in Morocco" label has long symbolized an emerging industrial pride. Textiles, leather, and later automobiles and aeronautics, were the showcases of this productive Morocco. But by 2025, this label is no longer enough to reflect the Kingdom's ambition.

The country is not just a manufacturing hub: it is becoming a logistical and strategic crossroads, at the heart of the reshaping of global trade flows. This profound transformation signals the shift from "Made in Morocco" to "Trade via Morocco," reflecting a deliberate repositioning.

Events

Academic events

A comparative look at Morocco's development: a presentation by Mr. Mohammed Boutaleb at the UEMF

The Euromed University of Fez hosted Mr. Mohammed Boutaleb, former Minister of Energy and Mines, as part of its Conference Series. Under the theme "The Development of Morocco Seen from Different Angles," he shared his experience and analyzed the main economic, social, and territorial challenges facing the Kingdom.

He highlighted the ongoing structural transformations as well as the importance of sustainable, inclusive development adapted to local realities.

The conference proved to be an enriching experience for the students, fostering learning and dialogue. It concluded with an interactive exchange, and UEMF thanked Mr. Boutaleb for his inspiring presentation, consistent with its mission to educate engaged citizens.

A new culture to rethink the world: a lecture by Professor Mohamed Zinelabidine

As part of our Conference Series, we had the honor of welcoming Professor Mohamed Zinelabidine, Director of Culture and Communication at ICESCO, for a conference entitled: "A new culture to rethink the world".

Through a dense and inspiring intervention, Mr. Zinelabidine offered an in-depth reading of contemporary cultural changes and the fundamental role of culture in building more conscious, inclusive societies open to dialogue.

The conference highlighted the role of the artist in our societies, the structural, economic, and symbolic challenges they face, and the reasons why it remains difficult today to make a living fully from culture and art. It offered a clear-eyed reflection on the social, institutional, and economic recognition of artistic professions.

In front of an audience of students, researchers and teachers, this meeting opened a space for rich dialogue around culture as a force for thought, engagement and social transformation, reaffirming its central role in the dynamics of human development and intercultural cooperation.

AI and electric mobility: towards a new era of urban mobility in Morocco

We are delighted to share that our co-founder,Brahim El Bekkali, recently met with Mr. Ryad Mezzour, Minister of Industry & Trade, and Ms. Amal El Fallah Seghrouchni, Minister of Digital Transition & Administration Reform, at theEuromed innovation center (EIC)- a hub of innovation excellence in Morocco.MA

At POGO, we are merging AI-driven urban data with electric mobility to empower smart, sustainable, and safe urban mobility. From our advanced data analytics to our medium-term vision of a 100% Made in Morocco electric moped by POGO, we are committed to national industrial excellence.

The journey toward digitized and carbon-neutral urban mobility is picking up speed across our Moroccan cities. Stay tuned—we're just getting started!

Changing our perspective on disability: towards an inclusive and equitable university.

As
part of our Conference Series, the Euromed University of Fez organized a conference entitled: "Changing perspectives on disability: the inclusive university, a lever for equity and excellence", led by Dr. Khalid Benhassan and Professor Hajjoui Abderrazak.

Through this meeting, the speakers offered an in-depth reflection on the challenges of inclusion in higher education, highlighting the central role of the university in promoting equal opportunities and valuing all talents.

Drawing on their expertise in public health, rehabilitation and support for people with disabilities, they emphasized the need to move beyond traditional approaches to build more accessible, inclusive and tailored academic environments that reflect the realities of each individual.

The conference also provided an opportunity to examine perceptions of disability, inviting a renewed perspective based on inclusion, dignity and recognition of abilities, rather than limitations.

Rich in exchanges and perspectives, this meeting highlighted the importance of placing inclusion at the heart of university policies, as a lever for equity, but also as a factor of excellence and social transformation.

UEMF Youth Debate: Reflecting on the link between the individual and collective ethics in Moroccan society

As part of its mission to promote academic dialogue, citizenship, and youth engagement on major societal issues, the Euromed University of Fez (UEMF) organized the EUROMED Youth Debate on the theme: "Individual and Collective Ethics in Morocco: What Correlation for What Societal Project?" This event brought together students from the Faculty of Humanities and Social Sciences (FSHS), the Euromed Business School (EBS), and the Institute of Legal and Political Sciences (ISJP) to foster critical reflection and discussion on the challenges of living together, citizenship, and collective responsibility.

Through a series of thematic panels, participants analyzed the relationship between individual behaviors and collective values in contemporary Moroccan society. The discussions explored notions of citizenship, freedom, social cohesion, public order, and individual responsibility, while also considering the social, economic, and cultural transformations that influence behaviors within the community.

The discussions also focused on factors that could strengthen collective ethics, civic engagement, and mechanisms that promote greater social cohesion. Students were invited to suggest avenues for reflection and solutions aimed at promoting respect for shared values, civic participation, and the development of a more inclusive and equitable society.

Seminars, conferences and congresses

The UEMF is hosting the first day of the NEGIA Summit: Architecture for the Future Generation

The Euromed University of Fez had the honor of hosting, last Wednesday, the first day of the NEGIA Summit (Next Generation Impact Architects), an event organized by the Federation of Francophone Architects of Africa (FAFA), around the theme "Architecture for the future generation".

This inaugural day, held at the University Conference Centre, brought together young architects, urban planners and experts from across the African continent to collectively reflect on the challenges and prospects of African architecture in the face of contemporary technological, environmental and societal issues.

The discussions focused on several major themes, including the impact of new technologies on architectural design, the presentation of the texts and statutes of the G40 (the FAFA Group of Architects Under 40), as well as the role of younger generations in the sustainable transformation of African cities.

For the students of the Euromed School of Architecture, Design and Urbanism (EMADU), this meeting was an enriching learning experience, offering them the opportunity to interact directly with young architects, international experts, and representatives of African professional bodies. It broadened their perspective on the realities of the profession, while highlighting the central role of creativity, technology, and sustainability in contemporary architecture.

This first day of the NEGIA Summit was distinguished by a spirit of inspiration, collaboration and intergenerational transmission, faithful to the values of openness and excellence upheld by the Euromed University of Fez.

Fez hosts the 70th e FIJET World Congress: UEMF at the heart of the dialogue between tourism and media

Fez hosted the 70th eThe 10th edition of the World Congress of the International Federation of Journalists and Writers of Tourism (FIJET) brought together more than 250 professionals from 70 countries to discuss developments in tourism and the role of the media in its sustainable promotion. The Euromed University of Fez played a central role by hosting the opening ceremony and the International Forum, reaffirming its position as a space for intercultural dialogue, innovation, and scientific cooperation. The congress also highlighted the region's heritage and sustainable development initiatives, while addressing current challenges in the tourism sector, including technological innovation and the ecological transition.

Rihab Forum: Rethinking the City at UEMF

The Euromed University of Fez welcomed Professor Pascal Le Brun-Cordier, associate professor at the Sorbonne School of Arts and co-founder of the Cultural Urbanism Movement, for a conference entitled "The Gold of Links: How to Breathe More Life into Our Cities".

Organized as part of the first Rihab Forum, this meeting provided a space for reflection on the role of human connections in the vitality of contemporary cities. The Professor emphasized the importance of designing urban spaces as places of conviviality, creativity, and solidarity, capable of strengthening community life and encouraging civic participation.

For students of the School of Architecture, Design and Urbanism (EMADU), this conference was a privileged opportunity to explore new approaches to urbanism, integrating culture and emotion as essential levers of a more humane and vibrant city.

The discussions allowed for the exploration of concepts such as the relational city and cultural urbanism, highlighting the role of the social and artistic dimension in shaping the territories of tomorrow.

Digital Earth 2026: an international workshop at the crossroads of innovation, civil engineering and sustainability

As part of its international openness and commitment to educational innovation, the Euromed University of Fez, in partnership with the University of Surrey, organised the Digital Earth 2026 workshop, bringing together for four days students from the Euromed Polytechnic School (EPS) and their British counterparts.

This immersive program allowed participants to work in mixed teams on the challenges of digitalization in the construction sector and sustainable development. Through practical and innovative activities such as 3D concrete printing, modular construction, and materials characterization tests, students were able to apply their theoretical knowledge to real-world situations.

Guided by academic and technical experts from both institutions, participants developed essential skills in innovation, intercultural collaboration and solving real-world problems.

This initiative illustrates UEMF's commitment to providing high-level international educational experiences, combining academic excellence, technological innovation and preparation for the challenges of sustainable construction of tomorrow.

Introductory seminar on Nudge: an exploration of the mechanisms at the heart of decision-making

Yesterday, we organised a seminar dedicated to the introduction of Nudge, bringing together students, teachers and participants around the contributions of behavioural sciences in understanding and guiding individual and collective decisions.

Hosted by Adil GazaliAhmed DahhoukiYacoub Diftar, ProfessorMohcine ZouakImane Elhadart, this seminar allowed us to explore the cognitive foundations, behavioral biases and mechanisms that influence our choices, putting their applications into perspective in various contexts.

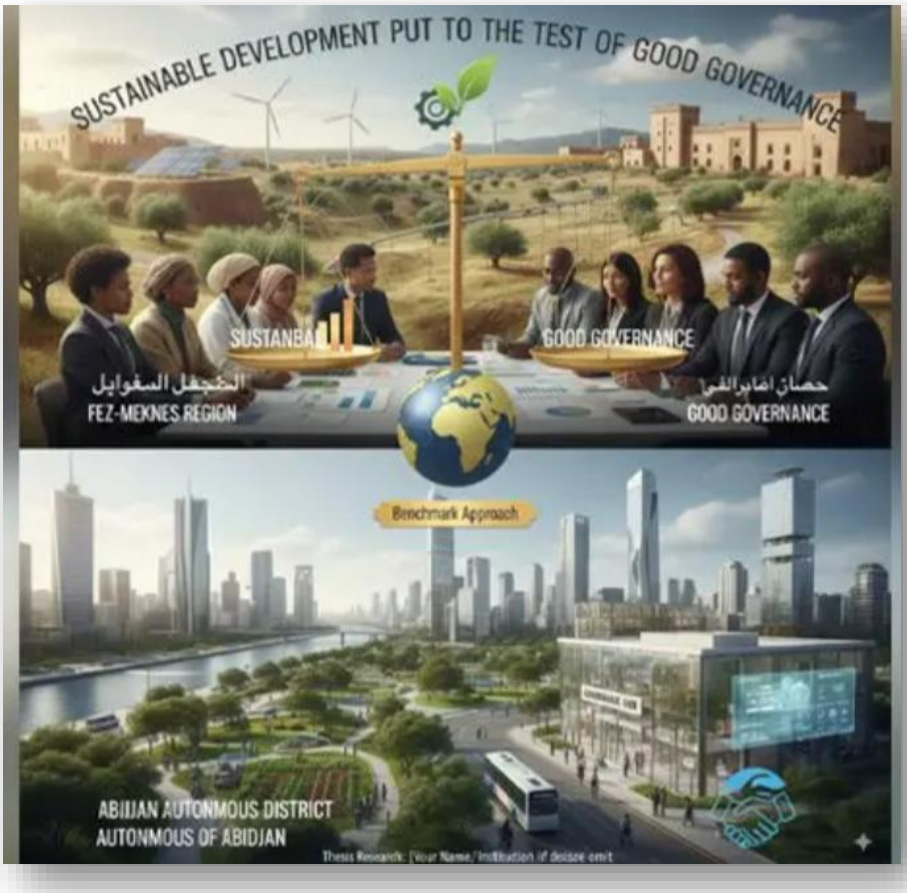

Discussions focused in particular on the integration of Nudge into public services, the training of engineers and the challenges of sustainable mobility, illustrating the potential of these approaches to design more effective policies and solutions, in line with the real behaviors of individuals.

A true space for reflection and dialogue, this seminar gave rise to enriching discussions, promoting the cross-fertilization of expertise and a better understanding of the interactions between science, engineering and public action.

An academic event that is fully in line with the UEMF's dynamic, aiming to promote innovative and interdisciplinary approaches to contemporary challenges.

Doctoral activities

Doctoral Thesis Defense in "Governance and Development" by Ms. Adjoba Audrey Paule N'ZE

This thesis examines institutional factors that explain differences in implementing the SDGs across territories, especially in Africa. It argues that sustainable development effectiveness depends more on local governance frameworks than on adopting universal standards.

After a literature review and bibliometric study, three key factors are identified: national institutional architecture, multi-stakeholder governance mechanisms, and the need for a multi-scalar approach. A theoretical framework based on regulation theory explains how institutional complementarity creates historical dependencies shaping governance.

Two case studies (Fez-Meknes region in Morocco and the Autonomous District of Abidjan in Côte d'Ivoire) reveal very different governance, financing, and intervention models. A qualitative analysis grid compares practices and shows that institutional logic and local power relations determine territorial trajectories

Cultural activities

Yennayer at the UEMF: a vibrant celebration of traditions and community

On the occasion of Yennayer, the campus of the Euromed University of Fez came alive to the rhythm of Amazigh traditions, celebrating a living culture deeply rooted in sharing and diversity.

Throughout the day, art, food, and music filled the university spaces, offering the university community a vibrant and emotionally rich experience. Artistic performances, cultural expressions, and convivial moments fostered a dialogue between heritage and modernity in a festive and inclusive atmosphere.

More than just an event, Yennayer at UEMF was a true time of gathering, highlighting the values of community, transmission and openness that enrich life on campus.
A memorable day, marked by culture, creativity and community spirit.

Sports activities

Sporting and civic engagement: UEMF at the heart of the Fes Spiritual Marathon

As part of its commitment to well-being and active citizenship, the Euromed University of Fez participated in the Fez Spiritual Marathon as an official partner. On this occasion, the campus served as a checkpoint along the route, welcoming runners in a vibrant and friendly atmosphere.

University students also participated in this sporting event, demonstrating the values of pushing personal limits, teamwork, and collective commitment. Their participation reflects the university community's involvement in initiatives that promote a healthy and active lifestyle.

Beyond its sporting dimension, this participation reflects UEMF's desire to strengthen its connection with its local community by fully engaging in local social, cultural, and civic initiatives. It thus contributes to promoting an engaged university, connected to its city and an active participant in community development.

Diplomatic institutional visit

Visit to the infrastructure and innovation hubs of the UEMF

The institutional visit continued with a tour of the main facilities of the Euromed University of Fez, illustrating its integrated model based on innovation, excellence in education, and social engagement. The delegation notably visited the Euromed Sports Center, the Euromed Innovation Center (EIC), and the experimental farm of the Agritech cluster.

This immersive experience highlighted the university's efforts in developing innovative solutions, encouraging student entrepreneurship, and promoting sustainable technologies to address environmental and economic challenges. The visited facilities also demonstrated UEMF's commitment to student well-being, applied research, and the transition to a more sustainable and resilient development model.

Student events

Hygiene awareness in a primary school

On October 14, 2025, the Hands Club organized a hygiene awareness event at a primary school in Bensouda. The initiative aimed to educate students about the importance of personal and collective hygiene in preventing illness and promoting good health practices. Through age-appropriate explanations and interactive discussions, the children learned essential daily hygiene practices, contributing to a healthier and more responsible school environment.

Blood Donation Campaign – April 2 & 3, 2026

As part of its civic and solidarity actions, the Elite Club organized the "Blood Donation Campaign - April 2 & 3, 2026", an initiative aimed at raising awareness of the importance of blood donation and actively contributing to strengthening national reserves.

Over these two days, club members mobilized to encourage student and staff participation, while also ensuring logistical organization and providing optimal support to donors. This campaign resulted in a significant number of donations, contributing to saving lives and meeting the urgent needs of healthcare facilities.

Beyond its health impact, this initiative also provided a powerful moment for raising awareness and fostering solidarity, strengthening the spirit of commitment and social responsibility within the university community. It fully reflects the values of the Elite Club, founded on mutual support, volunteerism, and positive impact in service to society.

Solidarity Iftar – Ramadan 2026

As part of its Ramadan activities, Club Élite organized the "Solidarity Iftar – Ramadan 2026" initiative, aimed at promoting the values of solidarity, sharing, and civic engagement. This initiative involved preparing and distributing 150 iftar meals to people in need.

Made possible through the active mobilization of club members and the involvement of its partners, this initiative provided concrete support to beneficiaries, while strengthening the spirit of mutual aid and social cohesion, particularly significant during the holy month of Ramadan.

Beyond its humanitarian aspect, this action fully illustrates the Elite Club's identity as a committed actor, working towards a positive and lasting social impact. It also demonstrates the club's ability to initiate and lead solidarity projects with strong human value, responding to the needs of communities.

ELITE Club Report 25-26

Tazouta Medical-Humanitarian Caravan – Sefrou Province

On March 8, 2026, the Elite Club of the Euromed University of Fez organized a mobile medical and dental outreach program in Tazouta, in the province of Sefrou, to benefit the local population. This humanitarian and healthcare initiative involved 15 doctors and 5 dentists, all working together towards a common goal: bringing healthcare closer to the inhabitants of rural areas and improving access to specialist consultations.

The mobile clinic provided medical consultations in several specialties, including gynecology (with ultrasound examinations), cardiology, gastroenterology, rheumatology, and dental care and consultations. Thanks to the commitment of healthcare professionals, student volunteers, and mobilized partners, this initiative helped meet the medical needs of many beneficiaries in a spirit of solidarity, prevention, and social support.

ELITE Club Report 25-26

School Health Caravan – Ben Khlif School Group, Ouled Mimoun 11/04

On April 11, 2026, Club Élite organized the "School Health Caravan – Ben Khlif School Group, Ouled Mimoun," as part of its community health and school-based prevention initiatives. This initiative aimed to promote the health and well-being of students while reinforcing preventative practices from a young age.

During the day, students received general medical consultations, dental care and procedures, as well as visual acuity tests. Oral health prevention workshops were also held, along with the distribution of toothbrushes and toothpaste, to raise children's awareness of good dental hygiene practices.

This initiative fully illustrates the Elite Club's commitment to youth health and prevention, while demonstrating its ability to organize comprehensive and structured interventions to serve school communities. It also reflects the club's spirit of solidarity and social responsibility towards children and their educational environment.

ELITE Club Report 25-26

SDG challenge: from idea to impact

On April 16, 2026, the Elite Club of the Euromed University of Fez organized an inspiring workshop entitled "SDG Challenge: From Idea to Impact," led by Hamid Taghlaoui. The workshop aimed to raise students' awareness of the importance of the Sustainable Development Goals (SDGs) and to encourage them to transform their innovative ideas into projects with concrete impact.

Through interactive discussions, case studies, and practical advice, participants were able to discover the various stages involved in designing, structuring, and developing initiatives with social, environmental, and economic objectives. Mr. Hamid Taghlaoui's presentation also highlighted the role of governance, leadership, and citizen engagement in the success of sustainable projects.

This workshop provided a space for inspiration, reflection and creativity, strengthening the entrepreneurial spirit and commitment of students to more inclusive and sustainable development.

ELITE Club Report 25-26

School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi 18/04

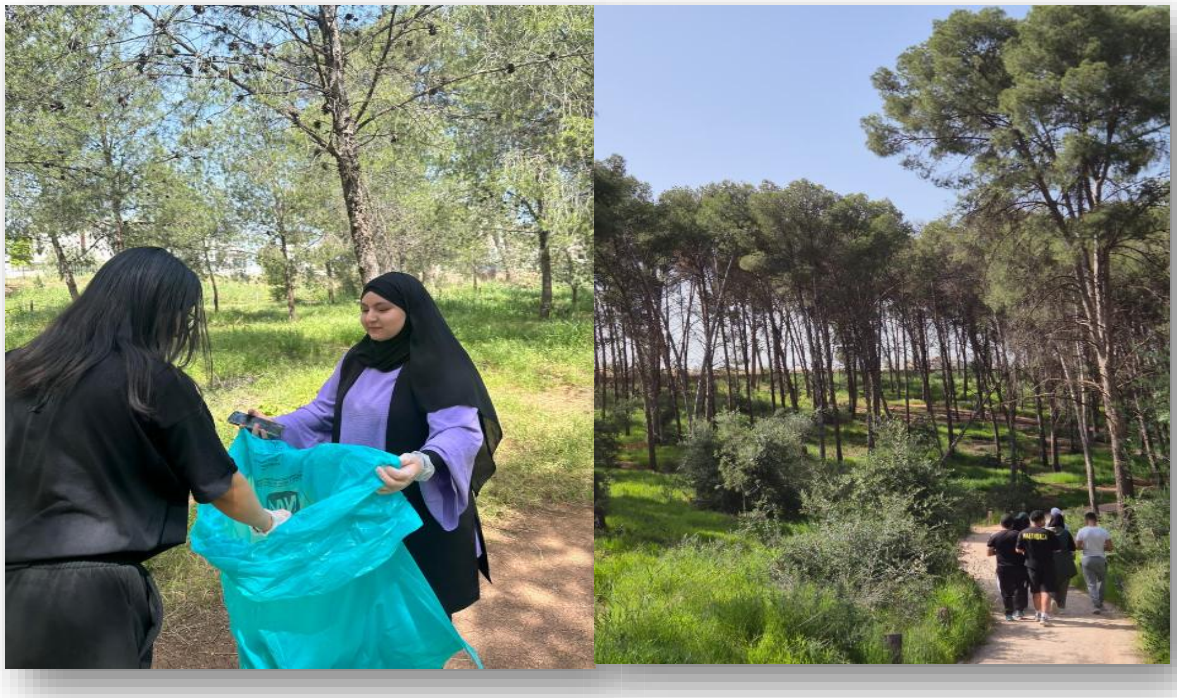

On April 18, 2026, the Elite Club organized the "School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi," as part of its health and prevention initiatives for students. This action aimed to promote well-being and health prevention within the school environment.

During the day, students were able to receive general medical consultations, dental care and procedures, as well as visual acuity tests. In addition, oral hygiene workshops were held, along with the distribution of toothbrushes and toothpaste, to raise awareness among young people about the importance of hygiene and preventative care.

This intervention illustrates the Elite Club's commitment to improving student health and strengthening prevention from a young age, while demonstrating its ability to deploy comprehensive and structured health caravans, meeting the needs of local school communities.

ELITE Club Report 25-26

Aïn Chkef clean: ecological commitment for a sustainable future

On April 18, 2026, the Elite Club of the Euromed University of Fez organized an ecological clean-up action in the Ain Chkef forest, located around Fez, as part of its commitment to the Sustainable Development Goals (SDGs), in particular SDG 13 (Climate Action) and SDG 15 (Life on Land).

This environmental initiative is part of a civic effort to raise awareness among students and participants about the importance of preserving natural ecosystems and biodiversity. Through concrete actions such as collecting and cleaning up waste, volunteers contributed to the restoration of this forest area, which is often damaged by human behavior and a lack of environmental responsibility.

Beyond its operational aspects, this activity provided a genuine moment of collective awareness regarding the urgent need to protect our environment. It reinforced the values of responsibility, commitment, and ecological solidarity among the participants, while also illustrating the essential role of youth in the transition to sustainable development.

Through this action, the Elite Club confirms its commitment to actively participating in the SDG movement, translating ideas into concrete actions with a positive impact on society and the environment.

ELITE Club Report 25-26

Mobile Medical and Dental Clinic in Ksar Jdid 26/04

On April 26, 2026, the Elite Club of the Euromed University of Fez organized a medical-dental caravan in Ksar Jdid, in the province of Rissani, as part of its humanitarian and social actions aimed at strengthening access to care in rural and remote areas.

This initiative mobilized a team of healthcare professionals and volunteers to provide multidisciplinary medical consultations to local residents. The services offered covered several specialties, including cardiology, gastroenterology, gynecology, dermatology, and ophthalmology, in addition to dental consultations and care, as well as general medicine.

The caravan aimed to bring health services closer to local populations, promote early detection, and raise awareness of the importance of prevention and medical follow-up. It thus enabled comprehensive and accessible healthcare for beneficiaries.

Through this action, the Elite Club reaffirms its commitment to solidarity, health promotion and social development in service of vulnerable communities.

ELITE Club Report 25-26

Humanitarian caravan in Ksar Jdid: 150 blankets to support rural families

On May 3, 2026, the Elite Club of the Euromed University of Fez organized a humanitarian caravan to Ksar Jdid, in the province of Rissani, as part of its solidarity actions aimed at supporting rural populations and improving their living conditions.

This initiative is part of a local humanitarian approach, driven by values of mutual aid, solidarity, and social commitment. It enabled the distribution of 150 blankets to beneficiary families, helping them cope with the weather and meet their basic daily needs, particularly during cold periods.

Beyond the material aid, this caravan provided a powerful moment of sharing and connection with the residents, strengthening the bonds between the volunteers and the local population. This initiative reflects the Elite Club's commitment to providing concrete solutions to the needs of vulnerable communities and contributing to the improvement of their living conditions.

Through this type of initiative, the Elite Club confirms its long-term commitment to humanitarian action, social development and territorial solidarity.

Mobile dental clinic in Izlafene: strengthening access to care and prevention

On May 9, 2026, the Elite Club of the Euromed University of Fez, in partnership with the IAA Club of the Faculty of Sciences and Techniques of Fez, organized a medical and dental caravan in Izlafene, in the province of Taza, as part of its community health and prevention initiatives. This initiative provided medical consultations in general medicine, cardiology, and gynecology, along with the dispensing of medication to diagnosed patients. A significant oral health prevention component was also implemented through awareness campaigns and the distribution of 400 toothbrushes and toothpaste to beneficiaries. Through this initiative, the two clubs helped bring healthcare services closer to rural populations while reinforcing awareness of the importance of prevention and medical follow-up.

ELITE Club Report 25-26

Humanitarian action in Izlafene: solidarity and support for rural families

As part of the medical and humanitarian caravan organized on May 9, 2026, in Izlafene, the Elite Club of the Euromed University of Fez and the IAA Club of the Faculty of Sciences and Techniques of Fez also carried out a significant humanitarian effort to benefit families in the region. This act of solidarity enabled the distribution of 150 food baskets to beneficiary families, supporting vulnerable populations and contributing to the improvement of their living conditions. In addition, recreational and entertainment activities were organized for children, creating a moment of sharing, joy, and connection with the local community. This initiative reflects the values of mutual aid, solidarity, and civic engagement upheld by both clubs in support of social and human development.

ELITE Club Report 25-26

UEMF's Got Talent: a 6ᵉan edition dedicated to talent, creativity andemotion

As part of its policy to promote student well-being and the development of artistic and creative skills, the Euromed University of Fez (UEMF) organized the 6thᵉThe UEMF's Got Talent edition, a cultural event that has become a key part of university life, brought together students, teachers, and members of the university community to celebrate creativity, cultural diversity, and artistic expression.

Throughout the evening, participants presented a variety of performances showcasing their talents in different areas such as singing, dancing, stage performance, and other forms of artistic expression. This event provided students with a platform to share their passions, develop their self-confidence, improve their communication skills, and strengthen their ability to speak in front of an audience.

Beyond its artistic dimension, UEMF's Got Talent provides a space that fosters inclusion, diversity, and cohesion within the university community. By showcasing individual talents and the cultural richness of students, this event helps strengthen the sense of belonging to the University and promotes an environment that respects the diversity of backgrounds, cultures, and forms of expression.
This initiative illustrates UEMF's commitment to a holistic educational approach that goes beyond the acquisition of academic knowledge to also foster students' personal development, creativity, initiative, and social skills. It thus contributes to creating a stimulating university environment conducive to individual growth and the development of talents.

Partnership

GIZ Training Programme – Dorscht Impact (Circular Water Economy)

The UEMF was selected to implement a specialized training program within the framework of the GIZ – Dorscht Impact partnership, focusing on the strategic theme of the circular economy of water in urban areas. This program, deployed in several Moroccan cities (Rabat, Marrakech and Tangier), is structured into 4 thematic cohorts: Cohort M1 intended for institutional actors (agencies and ministries) on the regulation, governance and management of water-related projects (sessions held in Rabat on February 4-5 and 11-12, 2026);
Cohort M4 focuses on strategic urban planning and the integration of the EccEau concept (sessions in Marrakech and Tangier in February 2026); Cohort M2 targets teachers and academic staff on the transition from theory to practice (sessions planned in Tangier and Marrakech in March-April 2026); and Cohort M3, designed for water sector professionals, focuses on the 5Rs of Water concept (sessions planned in Tangier and Marrakech in April 2026). This program positions UEMF as a leading player in training on environmental issues and the sustainable management of water resources in Morocco.

Framework Cooperation Agreement with the National Council of the Order of Architects (CNOA)

CONVENTION-CADRE DE COOPERATION

Entre les soussignées :

L'Université Euromed de Fès, sise à Route de Meknès – Rond-point Benseouda – 30070 Fès, Maroc représentée par son président, **le Professeur Mostapha BOUSMINA**,
Ci-après dénommée « **UEMF** »,
D'une part,

ET

Le Conseil National de l'Ordre des Architectes du Maroc représenté par son président **Monsieur Chakib BENABDELLAH**,
Ci-après dénommé « **CNOA** »,
D'autre part,

L'UEMF et le CNOA seront ci-après désignés conjointement « Parties » et individuellement « Partie ».

CONSIDERANT :

- Les missions du Conseil National de l'Ordre des Architectes et son rôle dans l'encadrement de la profession d'architecte au Maroc, dans le pourtour méditerranéen et en Afrique ;
- Les missions de l'Université et son établissement « Ecole Euromed d'architecture, de Design et d'Urbanisme » représentée par sa Directrice, la Professeure Wafae BENLARBI, dans la formation, l'enseignement et la recherche dans les domaines de l'architecture, de l'urbanisme et du Design ;
- La volonté commune des deux Parties de mettre en commun un cadre de partenariat axé sur le développement des compétences professionnelles des Architectes Marocains, dans les domaines technique, programmatique, juridique et procédural.

The UEMF has concluded a Framework Cooperation Agreement with the National Council of the Order of Architects of Morocco (CNOA). This agreement commits both parties to a structured collaboration focused on the professional development of Moroccan architects, particularly in the areas of continuing education, research, and strengthening the technical, regulatory, legal, and practical skills of the architectural profession in Morocco.

Continuing Education Program for Elected Officials – Municipal Councils of the Province of Taounate (2024-2025)

The UEMF has implemented an ambitious Continuing Education Master Plan for members of the Municipal Councils of Taounate Province, with 208 participants per session, all held in Taounate. This multi-thematic program covers 8 essential modules for good local governance, delivered according to the following schedule:

- Local development (funding and partner search techniques) – April 29 to May 3, 2025
- Administrative policing (practice of administrative policing) – May 14-15, 2025
- Land development and urban planning – May 28-29, 2025
- Public Asset Management – June 11-12, 2025
- Local Finance and Accounting – June 25-26, 2025
- Public lighting – July 9-10, 2025
- Participatory Democracy – October 29-30, 2025
- Internal Control System – November 26-27, 2025

This large-scale program directly affects 208 local elected officials per session, representing a major investment by the UEMF in strengthening local governance in the Province of Taounate, by supporting elected officials in the effective exercise of their mandates in service to their fellow citizens.

Bernspire 2025-2026: Applications open for international student competitions

Bernspire, a Swiss association committed to education, innovation and the development of young talent internationally, announces the official opening of applications for the 2025-2026 edition of its academic competitions.

Organized annually on a supra-regional scale, Bernspire's Graduation Project Challenges are aimed at final-year university students in the fields of engineering and social sciences. This initiative seeks to promote innovative graduation projects that offer concrete solutions to contemporary technological, societal, and environmental challenges.
The competitions bring together participants from several international universities and are evaluated by a jury composed of academic experts and professionals from different countries, thus offering candidates international visibility and a unique opportunity to showcase their research and innovation work.

Applications are open to students preparing their final year project during the 2025-2026 academic year.
Students wishing to participate can consult the application procedures and submit their projects via the official Bernspire website:
www.bernspire.com/the-details

The results of previous editions and the winning projects can be viewed via:
www.bernspire.com/2024-2025-winners

The Euromed University of Fez and the Cervantes Institute of Fez seal a strategic partnership in service of Euro-Mediterranean intercultural dialogue

In a dynamic of strengthening academic and cultural exchanges between the two shores of the Mediterranean, Euromed University of Fez and Cervantes Institute of Fez have formalized a cooperation agreement marking a new stage in their joint commitment to intercultural dialogue and bringing people closer together.

The signing ceremony took place on Wednesday, May 13th, in the presence of Professor Mostapha Bousmina, President of the Euromed University of Fez, and Mr. Òscar Pujol Riembau, Director of the Cervantes Institute of Fez. The event was also graced by the presence of His Excellency Enrique Ojeda Vila, Ambassador of Spain to Morocco, demonstrating the importance attached to this cultural and academic cooperation initiative.

This agreement reflects a shared ambition: to make language and culture essential drivers of rapprochement, mutual understanding, and openness between Mediterranean societies. Through this alliance, the two institutions reaffirm their commitment to promoting intellectual exchange, intercultural dialogue, and academic synergies around Hispanic culture and language.

This partnership will pave the way for the implementation of a rich and diverse program of joint initiatives, including conferences, workshops, training programs and cultural events designed to foster interactions between students, teachers and cultural actors.

Beyond the institutional scope of this cooperation, this initiative illustrates a common vision based on openness, the transmission of knowledge and the development of a Euro-Mediterranean space where culture constitutes a strategic lever for sustainable rapprochement between academic communities and future generations.

Awards and Distinctions

ATX Design of the Year 2025: Three groups of EMADU students recognized at the international competition

The Euromed University of Fez (UEMF) is proud to announce that six students (3 pairs) from the School of Architecture, Design and Urbanism (EMADU) have obtained three honorable mentions in the prestigious international competition ATX Design of the Year 2025, organized by Architerrax, an international learning platform dedicated to the dissemination of knowledge in architecture and design.

Under the guidance of Professor Jassim Benlemlih, the students competed in the "Design for Change" category, which highlights innovation and social impact through visionary architectural solutions.

The competition challenged participants to develop architectural projects for war refugees, focusing on concrete needs such as housing, community spaces, education, and healthcare. Beyond emergency interventions, the aim was to imagine sustainable, dignified, and resilient solutions to improve the living conditions of displaced populations.

The projects presented by the EMADU students impressed the jury with their creativity, their humanistic approach, and their ability to propose innovative solutions to global challenges. This international recognition testifies to the quality of the education provided at EMADU and the commitment of its students to making a positive contribution to current societal challenges.

UI GreenMetric International Ranking 2025

The Euromed University of Fez has been ranked the number one university in Morocco in the UI GreenMetric 2025 international ranking and is among the top 400 universities worldwide, representing 105 countries. It notably surpasses Ibn Tofail University, Mohammed VI Polytechnic University, and Mohammed V University of Rabat.

This ranking, based on 51 indicators related to sustainable development, innovation, teaching and research, confirms the national and international leadership of the UEMF.

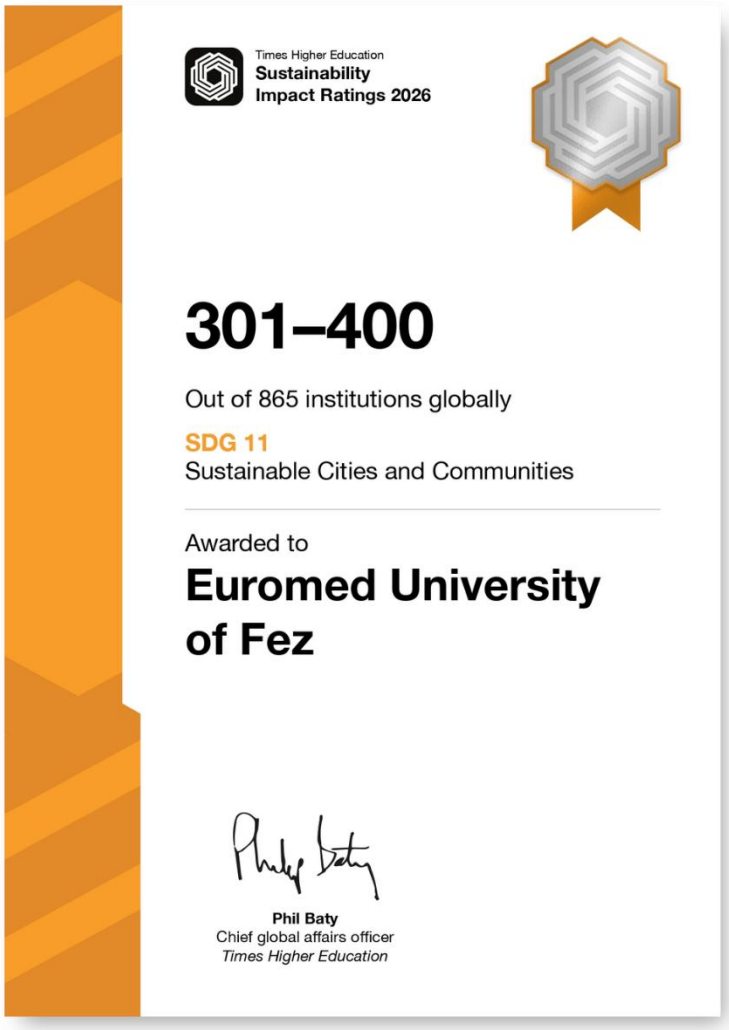

In 2025, the university was also ranked 1st in Morocco and 2nd in Africa (behind the University of Cape Town) by the Round University Ranking, received the International Alliance University of the Year 2025 award, and had eight of its researchers ranked among the top 2% most impactful in the world according to Stanford's ranking.

These results are the outcome of a strategy focused on:

- Academic excellence,
- Research and innovation,
- International openness,
- Collaboration with the socio-economic world,

and the well-being of the university community.

UEMF's performance in THE Impact Rankings 2026 – SDG 11

In the THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 301–400 range out of 865 institutions for SDG 11: Sustainable Cities and Communities. This recognition highlights its contributions to sustainable development, mobility, territorial resilience, heritage preservation, and the development of a responsible campus.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

The Euromed University of Fez is committed to responsible consumption and production by integrating the principles of sustainable development into its academic activities, educational projects, and the management of its eco-campus. Through awareness campaigns, innovative projects, student initiatives, and the promotion of responsible practices, the University encourages the rational use of resources, waste reduction, and the adoption of sustainable behaviors. Through these efforts, UEMF contributes to training citizens and professionals who are aware of environmental issues and committed to the transition towards more responsible production and consumption models.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez adopts a responsible approach to consumption and production, in line with SDG 12. It implements policies aimed at optimizing resource use and reducing waste production. Waste management and responsible procurement are key drivers in this approach. The university encourages eco-responsible practices within its community and integrates environmental criteria into its decision-making processes. The Euromed University of Fez thus aims to limit its ecological impact and contributes to the transition towards sustainable consumption patterns.

- Utilisation des patios et des ouvertures des loggias et des bâtiments ouverts
- Mise en place de jardins et de zone pédestres dotés d'équipement sportif

- Utilisation des savoirs faires inspirés du patrimoine de la Médina de Fès pour la climatisation naturelle ;
- Suivi environnemental et énergétique piloté par la Direction du Patrimoine, en coordination avec la Direction Audit et Assurance Qualité pour le suivi des indicateurs de durabilité.

b. Recherche scientifique et innovation verte

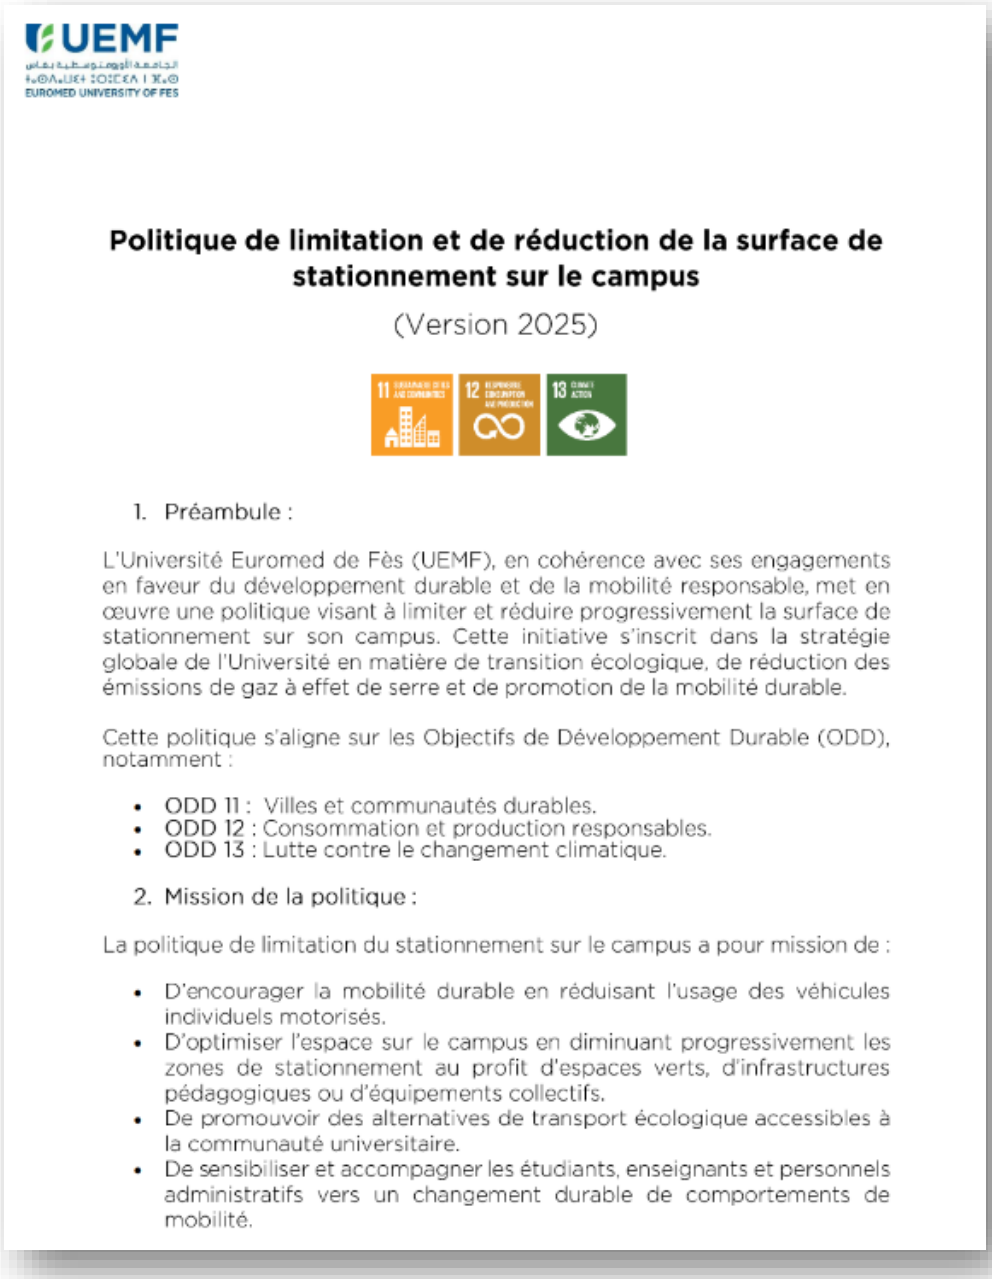

L'UEMF développe une recherche appliquée autour de :

- Énergies renouvelables : photovoltaïque, thermique et batteries ;
- Changement climatique : résilience et adaptation ;
- Production et valorisation de l'hydrogène vert ;
- Recyclage et valorisation des matériaux plastiques et biosourcés ;
- Aménagement durable du territoire et gestion intégrée des ressources naturelles ;
- Traitement, valorisation et gestion de l'eau ;
- Dessalement d'eau, production d'hydrogène et décarbonations de l'industrie du ciment ;
- Développement des biofertilisants ;
- Combinaison IA et agriculture pour minimiser la consommation d'eau et fertilisant

Ces thématiques sont portées par des structures telles que l'Usine École Pilote 4.0, le Pôle Ingénierie et Sciences de l'Environnement, et plusieurs laboratoires de recherche interdisciplinaires.

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

Policy for limiting and reducing the parking area on campus (Version 2025)

UEMF
EUROMED UNIVERSITY OF FES

Politique de limitation et de réduction de la surface de stationnement sur le campus

(Version 2025)

1. Préambule :

L'Université Euromed de Fès (UEMF), en cohérence avec ses engagements en faveur du développement durable et de la mobilité responsable, met en œuvre une politique visant à limiter et réduire progressivement la surface de stationnement sur son campus. Cette initiative s'inscrit dans la stratégie globale de l'Université en matière de transition écologique, de réduction des émissions de gaz à effet de serre et de promotion de la mobilité durable.

Cette politique s'aligne sur les Objectifs de Développement Durable (ODD), notamment :

- ODD 11 : Villes et communautés durables.
- ODD 12 : Consommation et production responsables.
- ODD 13 : Lutte contre le changement climatique.

2. Mission de la politique :

La politique de limitation du stationnement sur le campus a pour mission de :

- D'encourager la mobilité durable en réduisant l'usage des véhicules individuels motorisés.
- D'optimiser l'espace sur le campus en diminuant progressivement les zones de stationnement au profit d'espaces verts, d'infrastructures pédagogiques ou d'équipements collectifs.
- De promouvoir des alternatives de transport écologique accessibles à la communauté universitaire.
- De sensibiliser et accompagner les étudiants, enseignants et personnels administratifs vers un changement durable de comportements de mobilité.

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

Actions de gestion responsable selon la norme ISO 50002

La direction du Patrimoine suit mensuellement la consommation électrique et met en place des procédures techniques et comportementales pour réduire cette consommation, tout en assurant le confort au travail pour la communauté universitaire :

1. Fermeture des portes et des fenêtres pendant le fonctionnement réglementé de la climatisation (ODD 12).
2. Installation des détecteurs de mouvement qui permettent l'enclenchement automatique de la lumière dans les couloirs uniquement au besoin (ODD 12).
3. Coupure d'électricité la nuit dans les zones non utilisées (ODD 12).
4. Sensibilisation de la communauté universitaire concernant la réduction de la consommation d'eau et d'électricité et tournées périodiques de la Direction du Patrimoine pour faire le suivi de l'application des mesures mises en place (ODD 4).
5. Sensibilisation des étudiants à travers des cours et des séminaires concernant le développement durable (l'un des sept piliers des enseignements transversaux au sein de l'UEMF) et la responsabilité environnementale (ODD 4).

Actions programmées de diagnostic (selon la norme 50002)

Éclairage :

- Mesures au luxmètre (ODD 12).
- Analyse des ratios de puissance d'éclairage utile par m² (ODD 12).
- Analyse des éclairages inutiles (ODD 12).

Tarification :

- Utilisation de logique d'optimisation tarifaire (ODD 12).
- Puissance électrique et thermique (ODD 12).
- Puissance réactive (cos phi) (ODD 12).

Bâtiments :

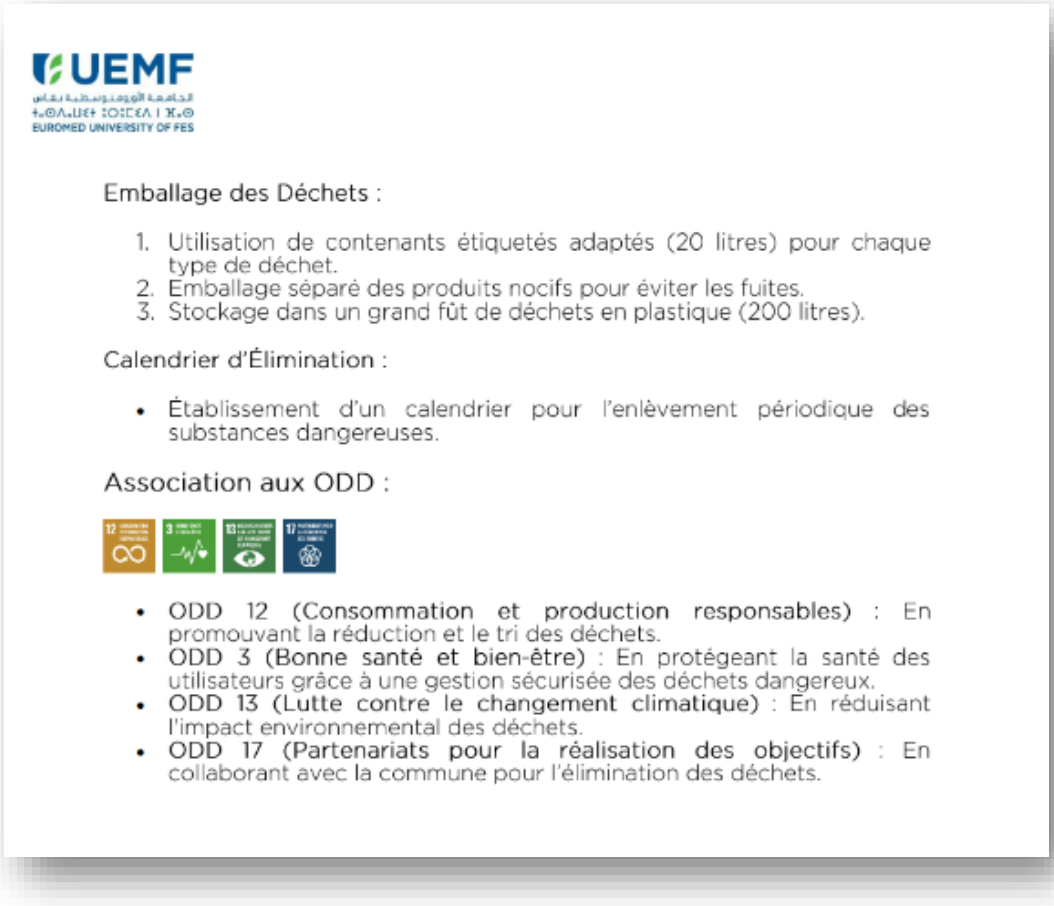

- Étanchéité, zones d'ouverture et d'ensoleillement (ODD 11, ODD 13).
- Ponts thermiques (ODD 13).
- Inertie thermique (ODD 13).

Bilan énergétique

La consommation globale et les émissions de GES (gaz à effet de serre) sont mesurées et quantifiées annuellement et les cibles de réduction sont définies (ODD 13).

UEMF is committed to optimizing its energy consumption and promoting the use of renewable energy. This policy aims to reduce the University's carbon footprint while ensuring the efficiency of its infrastructure.

Waste management policy

UEMF
EUROMED UNIVERSITY OF FES

Emballage des Déchets :

1. Utilisation de contenants étiquetés adaptés (20 litres) pour chaque type de déchet.
2. Emballage séparé des produits nocifs pour éviter les fuites.
3. Stockage dans un grand fût de déchets en plastique (200 litres).

Calendrier d'Élimination :

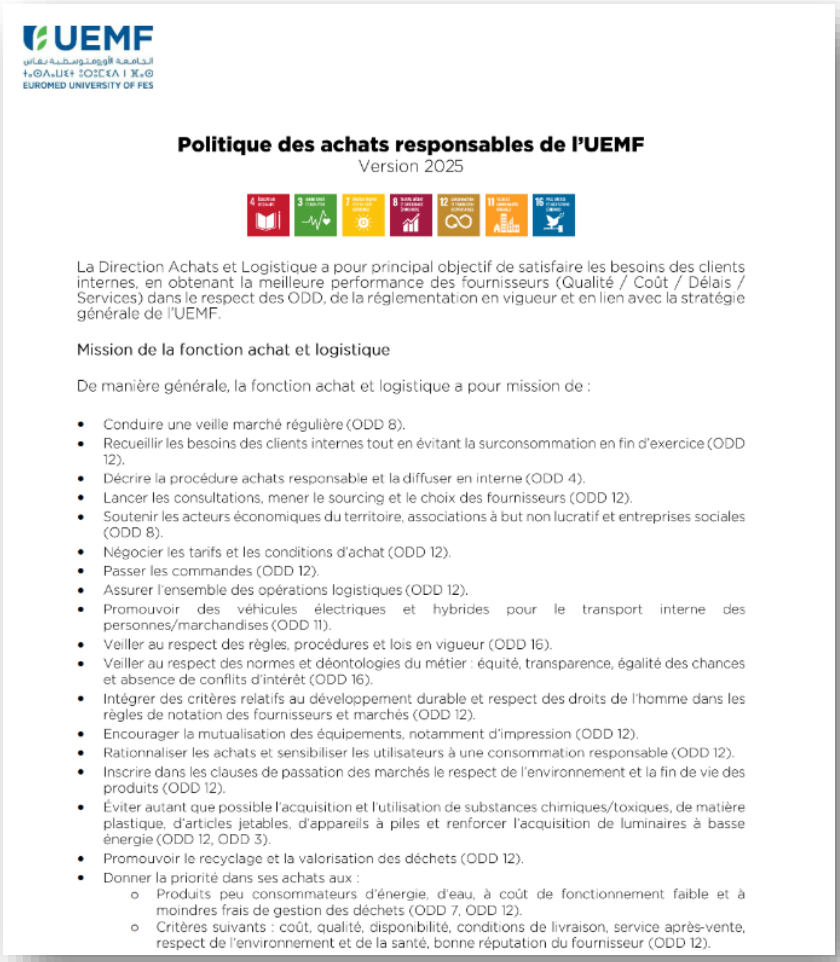

- Établissement d'un calendrier pour l'enlèvement périodique des substances dangereuses.

Association aux ODD :

- ODD 12 (Consommation et production responsables) : En promouvant la réduction et le tri des déchets.
- ODD 3 (Bonne santé et bien-être) : En protégeant la santé des utilisateurs grâce à une gestion sécurisée des déchets dangereux.
- ODD 13 (Lutte contre le changement climatique) : En réduisant l'impact environnemental des déchets.
- ODD 17 (Partenariats pour la réalisation des objectifs) : En collaborant avec la commune pour l'élimination des déchets.

This policy sets out the UEMF's guidelines for sustainable and responsible waste management. It is based on source reduction, selective sorting, recycling and recovery.

UEMF Responsible Procurement Policy (Version 2025)

UEMF
EUROMED UNIVERSITY OF FES

Politique des achats responsables de l'UEMF
Version 2025

La Direction Achats et Logistique a pour principal objectif de satisfaire les besoins des clients internes, en obtenant la meilleure performance des fournisseurs (Qualité / Coût / Délais / Services) dans le respect des ODD, de la réglementation en vigueur et en lien avec la stratégie générale de l'UEMF.

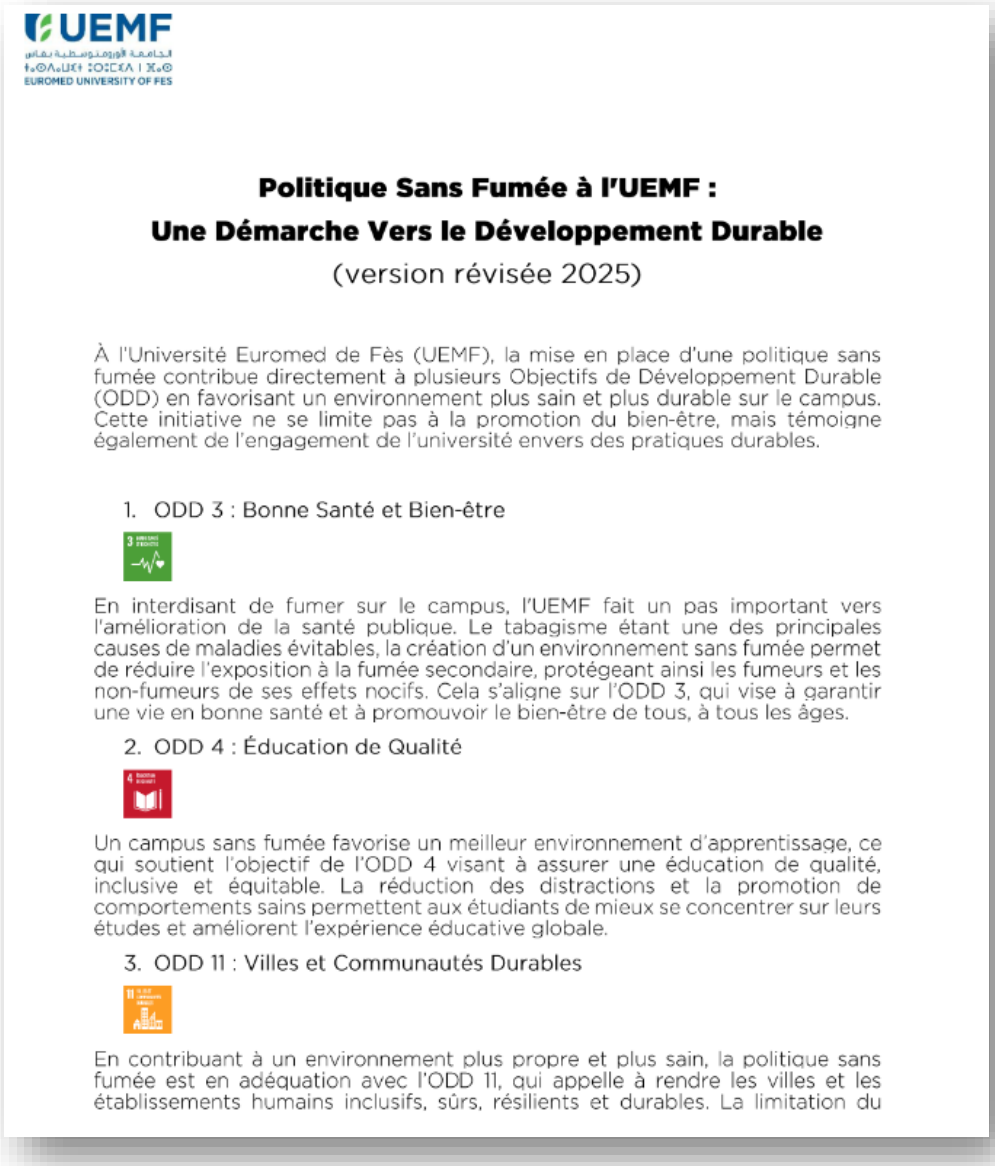

Mission de la fonction achat et logistique

De manière générale, la fonction achat et logistique a pour mission de :

- Conduire une veille marché régulière (ODD 8).
- Recueillir les besoins des clients internes tout en évitant la surconsommation en fin d'exercice (ODD 12).
- Décrire la procédure achats responsable et la diffuser en interne (ODD 4).
- Lancer les consultations, mener le sourcing et le choix des fournisseurs (ODD 12).
- Soutenir les acteurs économiques du territoire, associations à but non lucratif et entreprises sociales (ODD 8).
- Négocier les tarifs et les conditions d'achat (ODD 12).
- Passer les commandes (ODD 12).
- Assurer l'ensemble des opérations logistiques (ODD 12).
- Promouvoir des véhicules électriques et hybrides pour le transport interne des personnes/marchandises (ODD 11).
- Veiller au respect des règles, procédures et lois en vigueur (ODD 16).
- Veiller au respect des normes et déontologies du métier : équité, transparence, égalité des chances et absence de conflits d'intérêt (ODD 16).
- Intégrer des critères relatifs au développement durable et respect des droits de l'homme dans les règles de notation des fournisseurs et marchés (ODD 12).
- Encourager la mutualisation des équipements, notamment d'impression (ODD 12).
- Rationnaliser les achats et sensibiliser les utilisateurs à une consommation responsable (ODD 12).
- Inscrire dans les clauses de passation des marchés le respect de l'environnement et la fin de vie des produits (ODD 12).
- Éviter autant que possible l'acquisition et l'utilisation de substances chimiques/toxiques, de matière plastique, d'articles jetables, d'appareils à piles et renforcer l'acquisition de luminaires à basse énergie (ODD 12, ODD 3).
- Promouvoir le recyclage et la valorisation des déchets (ODD 12).
- Donner la priorité dans ses achats aux :
  - Produits peu consommateurs d'énergie, d'eau, à coût de fonctionnement faible et à moindres frais de gestion des déchets (ODD 7, ODD 12).
  - Critères suivants : coût, qualité, disponibilité, conditions de livraison, service après-vente, respect de l'environnement et de la santé, bonne réputation du fournisseur (ODD 12).

With this policy, the UEMF is establishing a framework for ethical and sustainable procurement. It encourages the selection of suppliers who share values of transparency, social and environmental responsibility.

Smoke-free policy (Revised version 2025)

UEMF

EUROMED UNIVERSITY OF FES

Politique Sans Fumée à l'UEMF :

Une Démarche Vers le Développement Durable

(version révisée 2025)

À l'Université Euromed de Fès (UEMF), la mise en place d'une politique sans fumée contribue directement à plusieurs Objectifs de Développement Durable (ODD) en favorisant un environnement plus sain et plus durable sur le campus. Cette initiative ne se limite pas à la promotion du bien-être, mais témoigne également de l'engagement de l'université envers des pratiques durables.

1. ODD 3 : Bonne Santé et Bien-être

En interdisant de fumer sur le campus, l'UEMF fait un pas important vers l'amélioration de la santé publique. Le tabagisme étant une des principales causes de maladies évitables, la création d'un environnement sans fumée permet de réduire l'exposition à la fumée secondaire, protégeant ainsi les fumeurs et les non-fumeurs de ses effets nocifs. Cela s'aligne sur l'ODD 3, qui vise à garantir une vie en bonne santé et à promouvoir le bien-être de tous, à tous les âges.

2. ODD 4 : Éducation de Qualité

Un campus sans fumée favorise un meilleur environnement d'apprentissage, ce qui soutient l'objectif de l'ODD 4 visant à assurer une éducation de qualité, inclusive et équitable. La réduction des distractions et la promotion de comportements sains permettent aux étudiants de mieux se concentrer sur leurs études et améliorent l'expérience éducative globale.

3. ODD 11 : Villes et Communautés Durables

En contribuant à un environnement plus propre et plus sain, la politique sans fumée est en adéquation avec l'ODD 11, qui appelle à rendre les villes et les établissements humains inclusifs, sûrs, résilients et durables. La limitation du

UEMF is committed to preserving the health and well-being of its community by implementing a smoke-free policy on its campus. This initiative promotes a healthy environment conducive to learning and community life.

UEMF
EUROMED UNIVERSITY OF FES

8. Bonne gouvernance

Adopter une gouvernance basée sur la transparence, l'intégrité, l'évaluation continue, et la reddition des comptes, en ligne avec les ODD 16 (Paix, justice et institutions efficaces).

9. Politique d'aide aux étudiants

Offrir un soutien financier, social et académique aux étudiants via des bourses, hébergement, et restauration, notamment pour les étudiants en situation de handicap ou en difficulté (ODD 4 et ODD 10).

10. Clauses environnementales

Promouvoir un campus éco-responsable, en réduisant l'impact environnemental à travers des pratiques telles que la gestion des déchets, l'utilisation d'énergies renouvelables et la lutte contre les gaz à effet de serre (ODD 12 et ODD 13).

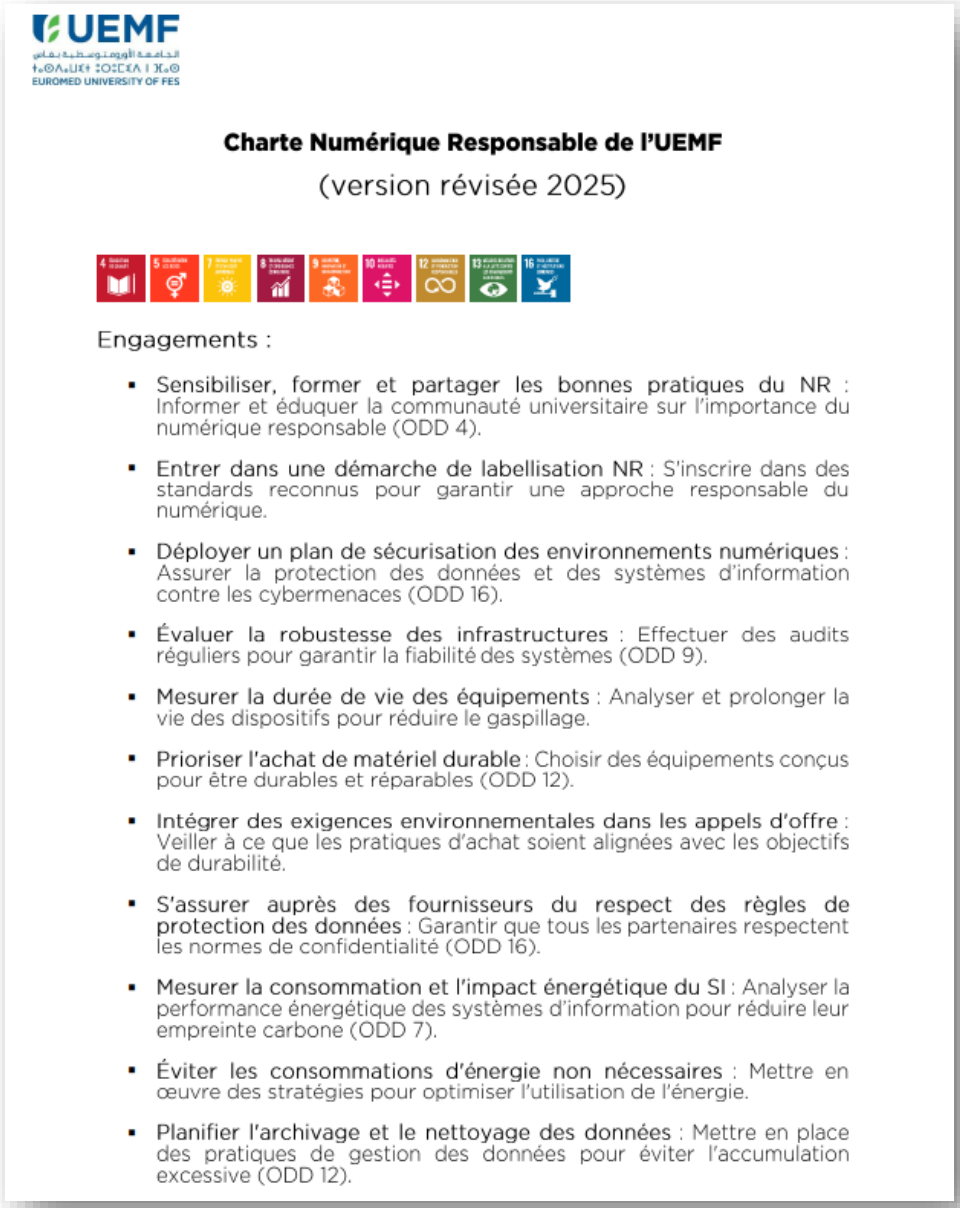

11. Clauses sociales

Se conformer aux législations marocaines en matière sociale et de travail, tout en sensibilisant notre personnel à la santé, la sécurité, et la lutte contre toute forme de discrimination ou de violence (ODD 8 et ODD 10).

La charte de Responsabilité Sociétale de l'UEMF est diffusée au sein de l'université et auprès de ses partenaires. Elle est régulièrement évaluée et mise à jour dans une démarche d'amélioration continue.

This charter formalizes the integration of social responsibility at the heart of the UEMF's missions. It outlines concrete commitments in the areas of ethics, governance, respect for the environment and contribution to sustainable development.

UEMF Responsible Digital Charter (Revised Version 2025)

UEMF
EUROMED UNIVERSITY OF FES

Charte Numérique Responsable de l'UEMF

(version révisée 2025)

Engagements :

- **Sensibiliser, former et partager les bonnes pratiques du NR** : Informer et éduquer la communauté universitaire sur l'importance du numérique responsable (ODD 4).
- **Entrer dans une démarche de labellisation NR** : S'inscrire dans des standards reconnus pour garantir une approche responsable du numérique.
- **Déployer un plan de sécurisation des environnements numériques** : Assurer la protection des données et des systèmes d'information contre les cybermenaces (ODD 16).
- **Évaluer la robustesse des infrastructures** : Effectuer des audits réguliers pour garantir la fiabilité des systèmes (ODD 9).
- **Mesurer la durée de vie des équipements** : Analyser et prolonger la vie des dispositifs pour réduire le gaspillage.
- **Prioriser l'achat de matériel durable** : Choisir des équipements conçus pour être durables et réparables (ODD 12).
- **Intégrer des exigences environnementales dans les appels d'offre** : Veiller à ce que les pratiques d'achat soient alignées avec les objectifs de durabilité.
- **S'assurer auprès des fournisseurs du respect des règles de protection des données** : Garantir que tous les partenaires respectent les normes de confidentialité (ODD 16).
- **Mesurer la consommation et l'impact énergétique du SI** : Analyser la performance énergétique des systèmes d'information pour réduire leur empreinte carbone (ODD 7).
- **Éviter les consommations d'énergie non nécessaires** : Mettre en œuvre des stratégies pour optimiser l'utilisation de l'énergie.
- **Planifier l'archivage et le nettoyage des données** : Mettre en place des pratiques de gestion des données pour éviter l'accumulation excessive (ODD 12).

Digital technology plays a central role at UEMF, but its use must be responsible. This charter defines best practices regarding digital tools, data security, and reducing environmental impact.

E-SDG

The Faculty of Nursing and Health Sciences' training programs contribute to SDG 12 – Responsible Consumption and Production – particularly through the Dietetics and Nutrition track, which develops skills in balanced diets, sustainable nutrition, and raising awareness of responsible eating practices. The Bachelor's, Master's, and Doctoral programs also strengthen skills and research in the field of nutrition and health, thus contributing to the promotion of more responsible and sustainable practices.

FACULTY OF NURSING AND HEALTH TECHNOLOGY

1. Sectors:

- MULTI-SKILLED NURSE
- Anesthesia and Resuscitation Nurse
- SPEECH THERAPIST
- PSYCHOMOTOR TRACKER
- DIETETICS - NUTRITION
- LABORATORY TECHNIQUES
- RADIOLOGY TECHNIQUES

2. LMD pathway:

- BACHELOR'S DEGREE PROGRAM:

3-year cycle, practical work in laboratory, rehabilitation rooms, simulation center, internships in health centers, hospitals, clinics and specialized centers.

- MASTER'S PROGRAM:

Advanced training accessible to licensed students. Two-year program divided into four semesters.

- DOCTORAL PROGRAM:

A 3-year program focused on scientific research in the fields of nursing, rehabilitation care, health techniques and nutrition.

Research, Innovation & Entrepreneurship

Research Topics - Doctoral Cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 12 has been identified. This work focuses in particular on the circular economy, the recovery of waste and by-products, eco-design, resource efficiency, sustainable materials, and responsible production and consumption patterns.

The table below presents the main research topics contributing to this objective.

Thesis Subject	related SDGs
Development of High-Surface and Corrosion Resistance of 3D Printed H13 by Additive Manufacturing	SDG 12
Local Bio-Sourced Materials and Process Integration in 3D Concrete Printing	SDG 12
Olive Oil By-Product Valorization	SDG 12
Process Analysis and Optimization of Support Procedures for Smart Factories of Innovative Products: From Idea to Market	SDG 12
The Synthesis of New Nano-Objects (Quantum-Dots, Clusters and Metallic Nanoparticles), Their Confinement in Porous Matrices and/or Mesostructures, Their Stability and Their Application to Fine Chemistry Catalysis	SDG 12
Blockchain-Driven Transformation of the Green Hydrogen Supply Chain	SDG 12
Development of Optical Biosensors for Breast Cancer Detection	SDG 12
About the Normality of Urgency and Emergency: Climate Change Narratives in Video Games	SDG 12
Contribution to the Phytochemical Valorization of Argania Spinoza Within the Framework of Circular Economy	SDG 12
Porous Materials for Catalysis	SDG 12
Smart Batteries	SDG 12
Computer Vision for Smart Farming and Agriculture Practices	SDG 12
Design and Synthesis via CH Bond Activation of the Pyrazino-[1a,3a,6a]-Triazapentalene (PyTAP): Application to Other Heterocycles Containing Nitrogen	SDG 12
Nanomaterials for the Removal of Phytosanitary Products from Water	SDG 12
Design and Pilot Scale Yeast-Based Production of Bluetongue Virus Capsid Particles as An Alternative to Live Attenuated Virus Vaccine	SDG 12
Synthesis & Characterization of New Ionic Conductive Based Phosphate for Li/Na-Ion Batteries	SDG 12

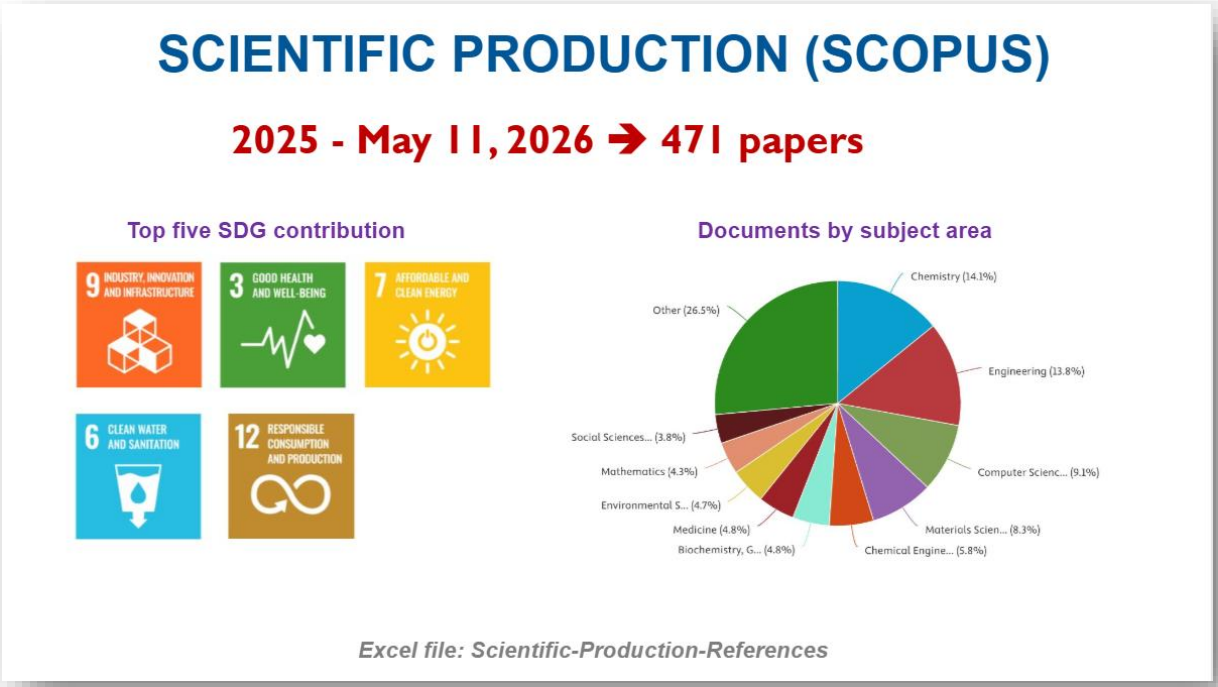

Thesis Subject	related SDGs
AI in the Predictive Analysis of Purchasing Behavior: Accuracy, Ethics, and Acceptability	SDG 12
Green Production: Leveraging Bio-Based Polymers for Developing Thin-Film Composite Forward Osmosis Membranes for Fertigation	SDG 12
Hybrid Experiments-Based Numerical Simulations in 3D Cement Printing for Clay-Based Bio-Sourced Materials Development	SDG 12
Synthesis of Bio-Sourced Cementitious Materials for Additive Manufacturing in Construction	SDG 12
Artificial Intelligence (AI) to Enhance the Customer Experience in Moroccan Tourism: Challenges and Opportunities	SDG 12
Development of Methods of Expression, Optimization and Characterization of Recombinant THCAS Enzyme in Pichia Pastoris Expression System	SDG 12
Blockchain Technology for Green Manufacturing	SDG 12
High-field Nuclear Magnetic Resonance (NMR) Spectroscopy for Quality Control: Development of New Analytical Methods in Agri-Food Using NMR	SDG 12
Self-Supervised and Semi-Supervised AI Framework for Almond Disease Detection Under Limited Annotation and Agriculture Practices	SDG 12
Eco-Resilient Earthen Construction: Integrating Material Innovation, Seismic Safety and Environmental Sustainability	SDG 12
Water management and sustainable logistics: modeling resilient supply chains in the face of water stress in Morocco	SDG 12
Lightweight Self-Supervised and Uncertainty-Aware Framework for Efficient Plant Disease Classification	SDG 12
Transformation of consumer behavior in the age of artificial intelligence and algorithmic personalization in societies undergoing digital transition	SDG 12
Development and Characterization of Hybrid Polymer-Bioactive Glass Bio-Composites by 3D Extrusion for Personalized Orthopedic Implants: Mechanical Performance and Bio-Integration	SDG 12
A Standardized Modular Architecture for Multiphysics Digital Twins in Industry 4.0	SDG 12
AI-Driven and Industry 4.0 Enabled Frameworks for the Decarbonization of Automotive Industrial Production Sites in Morocco	SDG 12
Sustainable Landscape Strategies and Experiential Agro-Tourism in Moroccan Rural Villages	SDG 12
Development of New Generations of Bio-Fertilizers	SDG 12
Low-Temperature Development of Novel Hybrid Materials Based Calcium Phosphates, Bio-Polymers, and Bio-Active Glasses for Medical Applications	SDG 12

Thesis Subject	related SDGs
Cannabinoids Synthase Systems from Cannabis Sativa as Model for Bioengineering and Optimization of the Cannabinoids Production	SDG 12
Energetic Valorization of Agricultural Residue Through Thermal Process	SDG 12

Research projects2025-2026

Title	SDG RELATED
OLIVEGUARD A Novel, Remote and Non-Invasive ICT System for Early Detection, Monitoring, Forecasting and Targeted Management of Olive Fruit Fly in Mediterranean Olive Orchards	SDG 12
Structural Regulation of Quantum Dot–Bioactive Glass Smart Nanocomposite Scaffolds and Their Application in Bone Regeneration	SDG 12
Design and Optimization of the Management of Decarbonized Industrial Zones in Morocco	SDG 12
Adaptive Reuse and Industrial Tourism for Sustainable Urban Regeneration: A Korea–Morocco Comparative Framework for Riads, Hanoks, and Urban Voids	SDG 12
AgroMaBio (Agroecological Market Gardens for Biodiversity and Socio-Climate Resilience: Cross-City Studies)	SDG 12
Valorization of Biopolymers from Marine Plants and Agro-Industrial and Agricultural Co-Products: Development of New Nano-Composites for Food Packaging	SDG 12

[Opinion] Fertilizers under pressure: Morocco as a backup route for Asia?

Since the closure of the Strait of Hormuz, the global fertilizer supply has been under strain. After the United States, it is now India's turn, a major agricultural power, to express its interest in Moroccan fertilizers. Thanks to its geographical location and the possibility of bypassing the Red Sea via the Cape of Good Hope in South Africa, Morocco could offer an alternative in this crisis.

Participation in SIAM: showcasing innovative initiatives in AgriTech

At the heart of agricultural innovation and AgriTech entrepreneurship in Morocco 🌱,

The Euromed University of Fez, through its Euromed Innovation Center (EIC), is participating in the 18th edition of SIAM with the Tech4Farmers – Tamkin Li Tanmia program, supported by the French Development Agency and deployed within the framework of the PRIE Fès-Meknès.

The program highlights several innovative startups (OBENS, Wasit, BOVICLOUDS, ARWA Solutions, Jodoor, DeepLeaf, Green Innovation, PCS AGRI) illustrating the potential of technology in the service of sustainable and efficient agriculture.

The stand was visited by several personalities, including the President of the Euromed University of Fez and the Director of the AFD, as well as the participation of institutional partners during the closing ceremony of the program, marking a strong moment of highlighting the results and collaborations.

This initiative brings together many key players in the agricultural and digital ecosystem in Morocco and confirms the role of the university as a driver of innovation and entrepreneurship serving the territories.

Events

Seminars, conferences and congresses

Fez hosts the 70th FIJET World Congress: UEMF at the heart of the dialogue between tourism and media

Fez hosted the 70th The 10th edition of the World Congress of the International Federation of Journalists and Writers of Tourism (FIJET) brought together more than 250 professionals from 70 countries to discuss developments in tourism and the role of the media in its sustainable promotion. The Euromed University of Fez played a central role by hosting the opening ceremony and the International Forum, reaffirming its position as a space for intercultural dialogue, innovation, and scientific cooperation. The congress also highlighted the region's heritage and sustainable development initiatives, while addressing current challenges in the tourism sector, including technological innovation and the ecological transition.

Digital Earth 2026: an international workshop at the crossroads of innovation, civil engineering and sustainability

As part of its international openness and commitment to educational innovation, the Euromed University of Fez, in partnership with the University of Surrey, organised the Digital Earth 2026 workshop, bringing together for four days students from the Euromed Polytechnic School (EPS) and their British counterparts.

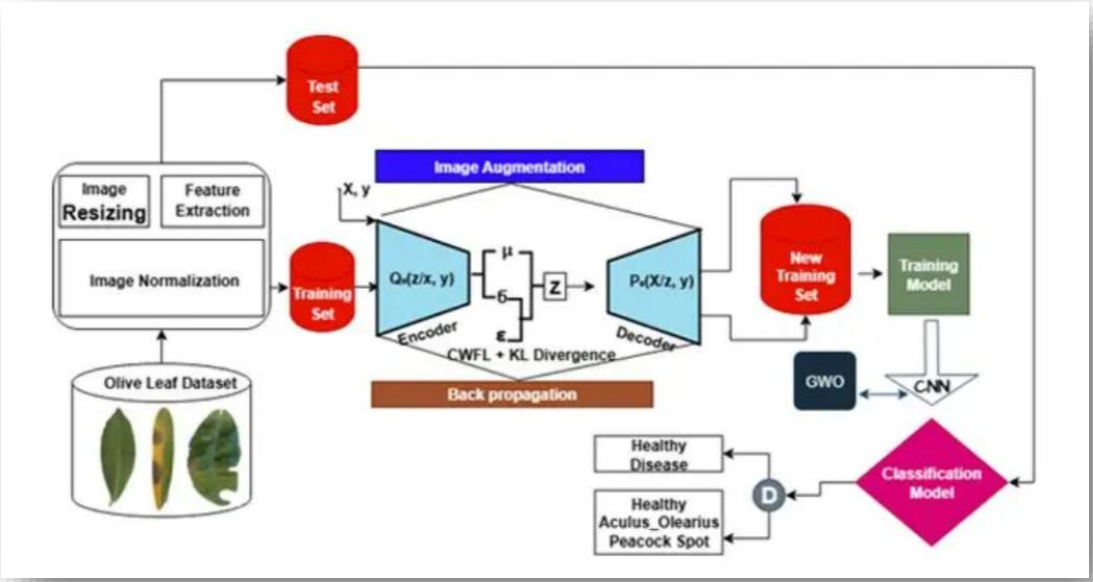

This immersive program allowed participants to work in mixed teams on the challenges of digitalization in the construction sector and sustainable development. Through practical and innovative activities such as 3D concrete printing, modular construction, and materials characterization tests, students were able to apply their theoretical knowledge to real-world situations.

Guided by academic and technical experts from both institutions, participants developed essential skills in innovation, intercultural collaboration and solving real-world problems.

This initiative illustrates UEMF's commitment to providing high-level international educational experiences, combining academic excellence, technological innovation and preparation for the challenges of sustainable construction of tomorrow.

Doctoral activities

Doctoral Thesis Defense in Artificial Intelligence by Mr. Kaloma Usman MAJIKUMNA

This research investigates the impact of climate change, particularly drought stress, on olive tree cultivation in the Mediterranean region. It integrates artificial intelligence, satellite remote sensing, deep learning, and field experimentation to enhance plant survival and disease management.

Sentinel-2 satellite imagery (2018–2023) combined with machine learning techniques revealed significant changes in olive cultivation areas closely linked to rainfall variability. A novel deep learning model (FLVAEGWO-CNN) achieves high accuracy in olive disease detection, including minority classes, offering an effective tool for precision agriculture.

Field experiments demonstrated that the Languedoc variety showed the highest drought resilience, and optimized deficit irrigation strategies significantly improved yield performance. Overall, the study provides practical and scalable solutions for sustainable olive cultivation and climate risk mitigation in drought-prone regions

Student events

Conference-Debate “End Plastic Soup”: Reflection and Commitment for a Sustainable Future

The Oratio Club, in partnership with the Rotaract Euromed Club, organised a conference-debate as part of the international “End Plastic Soup” week, an initiative aimed at raising awareness of the issues related to plastic pollution.

This event brought together students and members of both clubs for an enriching exchange on the role of plastic in our society today, its environmental and social impacts, and the long-term challenges it poses. The discussions also highlighted innovative solutions and sustainable alternatives for reducing our plastic footprint and promoting more responsible consumption patterns.

Through this interactive meeting, participants were encouraged to adopt a proactive stance and become agents of change, thus contributing to building a more environmentally friendly future.

ROTARACT Club Report 25-26

Aïn Chkef clean: ecological commitment for a sustainable future

On April 18, 2026, the Elite Club of the Euromed University of Fez organized an ecological clean-up action in the Ain Chkef forest, located around Fez, as part of its commitment to the Sustainable Development Goals (SDGs), in particular SDG 13 (Climate Action) and SDG 15 (Life on Land).

This environmental initiative is part of a civic effort to raise awareness among students and participants about the importance of preserving natural ecosystems and biodiversity. Through concrete actions such as collecting and cleaning up waste, volunteers contributed to the restoration of this forest area, which is often damaged by human behavior and a lack of environmental responsibility.

Beyond its operational aspects, this activity provided a genuine moment of collective awareness regarding the urgent need to protect our environment. It reinforced the values of responsibility, commitment, and ecological solidarity among the participants, while also illustrating the essential role of youth in the transition to sustainable development.

Through this action, the Elite Club confirms its commitment to actively participate in the SDG dynamic, translating ideas into concrete actions with a positive impact on society and the environment.

ELITE Club Report 25-26

Awards and Distinctions

UI GreenMetric International Ranking 2025

The Euromed University of Fez has been ranked the number one university in Morocco in the UI GreenMetric 2025 international ranking and is among the top 400 universities worldwide, representing 105 countries. It notably surpasses Ibn Tofail University, Mohammed VI Polytechnic University, and Mohammed V University of Rabat.

This ranking, based on 51 indicators related to sustainable development, innovation, teaching and research, confirms the national and international leadership of the UEMF.

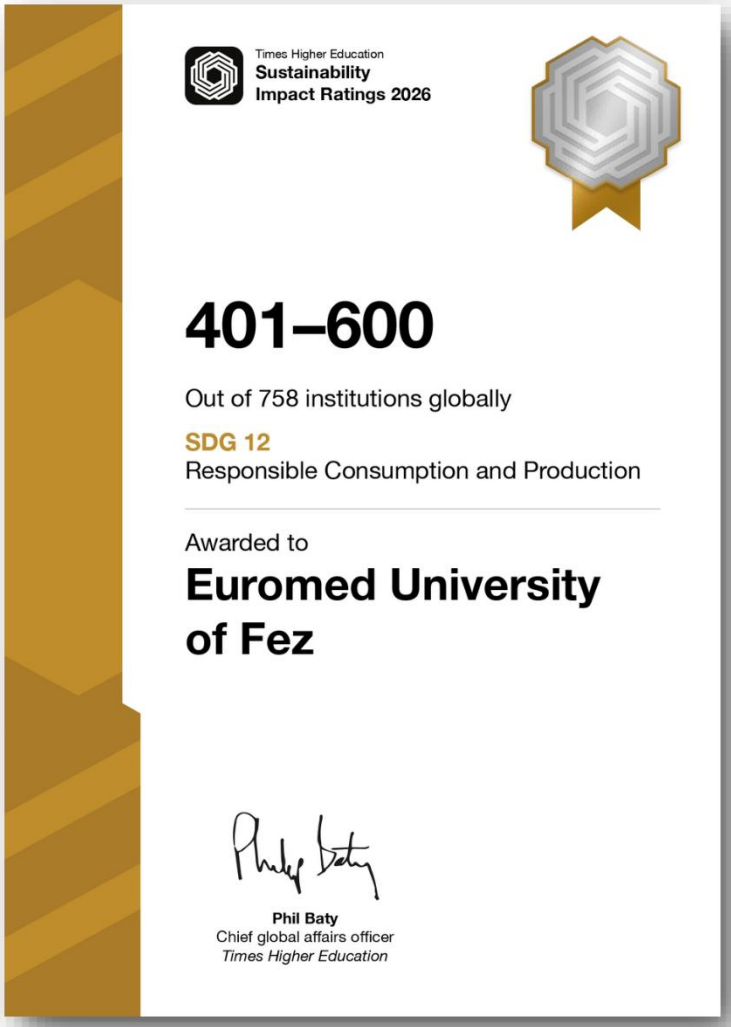

In 2025, the university was also ranked 1st in Morocco and 2nd in Africa (behind the University of Cape Town) by the Round University Ranking, received the International Alliance University of the Year 2025 award, and had eight of its researchers ranked among the top 2% most impactful in the world according to Stanford's ranking.

These results are the outcome of a strategy focused on:

- Academic excellence,
- Research and innovation,
- International openness,
- Collaboration with the socio-economic world,

and the well-being of the university community.

UEMF's performance in THE Impact Rankings 2026 – SDG 12

According to THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 401–600 range out of 758 institutions for SDG 12:

Responsible consumption and production. This performance highlights its practices in waste management, responsible resource use, circular economy, and raising awareness of more sustainable consumption patterns..

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

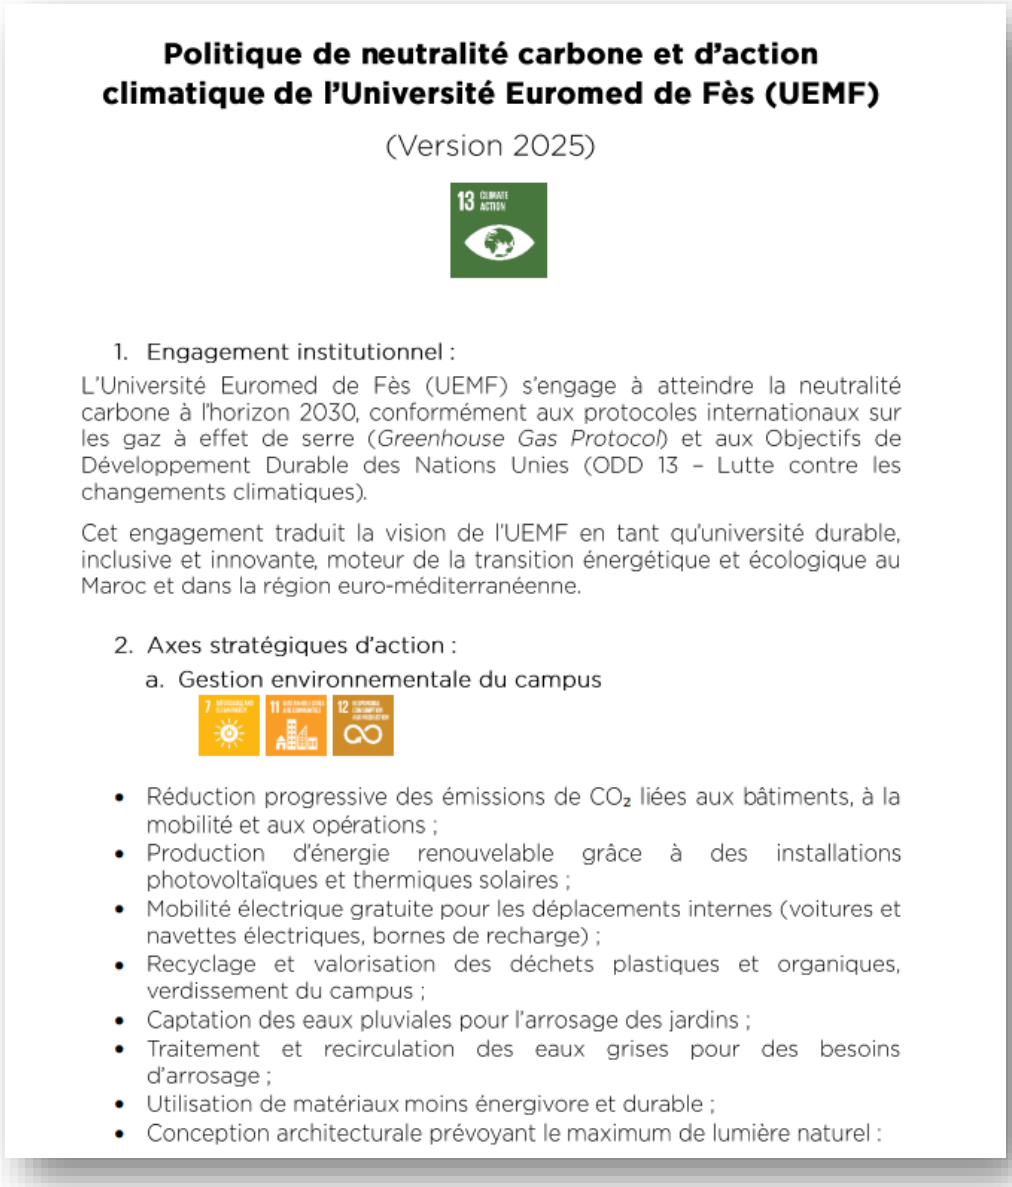

The Euromed University of Fez is actively committed to combating climate change by integrating environmental issues into the heart of its academic activities, research projects, and the management of its eco-campus. Through training programs, awareness campaigns, student initiatives, and innovative projects, the University contributes to promoting a culture of environmental responsibility and adaptation to climate challenges. Through these actions, UEMF participates in the training of citizens and professionals capable of taking concrete action for climate action and sustainable development.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez places the fight against climate change at the heart of its strategic priorities. It implements policies aimed at reducing its greenhouse gas emissions and strengthening its climate resilience. A carbon neutrality policy is a central pillar of its commitment. The university also adopts measures related to energy efficiency and waste management. It raises awareness among its community about climate issues. The Euromed University of Fez thus contributes to the ecological transition and actively participates in achieving Sustainable Development Goal 13.

Carbon neutrality and climate action policy of the Euromed University of Fez (Version 2025)

Politique de neutralité carbone et d'action climatique de l'Université Euromed de Fès (UEMF)

(Version 2025)

1. Engagement institutionnel :

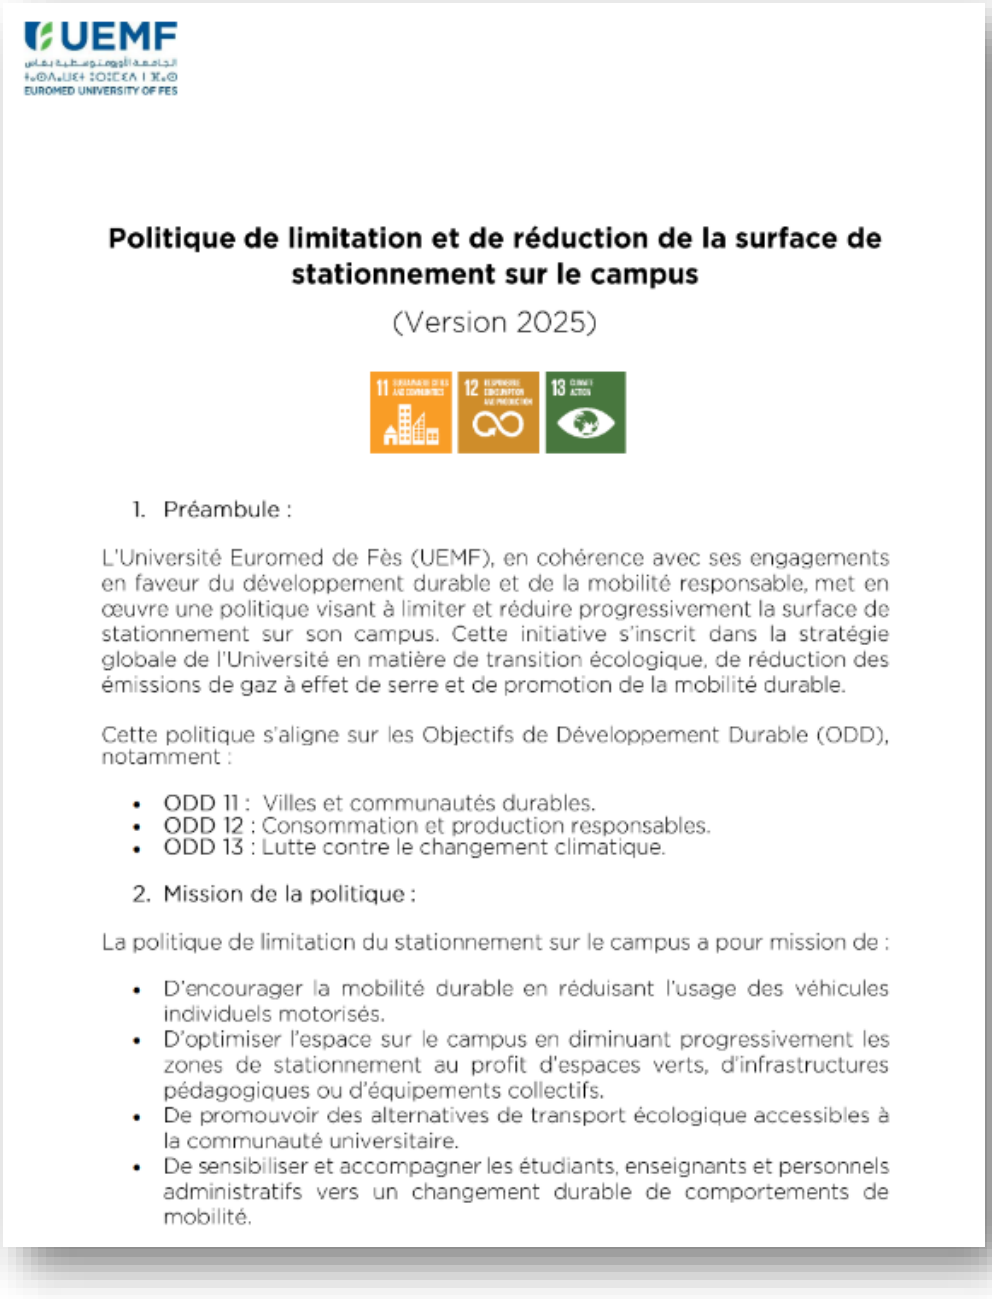

L'Université Euromed de Fès (UEMF) s'engage à atteindre la neutralité carbone à l'horizon 2030, conformément aux protocoles internationaux sur les gaz à effet de serre (*Greenhouse Gas Protocol*) et aux Objectifs de Développement Durable des Nations Unies (ODD 13 – Lutte contre les changements climatiques).

Cet engagement traduit la vision de l'UEMF en tant qu'université durable, inclusive et innovante, moteur de la transition énergétique et écologique au Maroc et dans la région euro-méditerranéenne.

2. Axes stratégiques d'action :
   a. Gestion environnementale du campus

- Réduction progressive des émissions de CO_2 liées aux bâtiments, à la mobilité et aux opérations ;
- Production d'énergie renouvelable grâce à des installations photovoltaïques et thermiques solaires ;
- Mobilité électrique gratuite pour les déplacements internes (voitures et navettes électriques, bornes de recharge) ;
- Recyclage et valorisation des déchets plastiques et organiques, verdissement du campus ;
- Captation des eaux pluviales pour l'arrosage des jardins ;
- Traitement et recirculation des eaux grises pour des besoins d'arrosage ;
- Utilisation de matériaux moins énergivore et durable ;
- Conception architecturale prévoyant le maximum de lumière naturel :

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility..

UEMF
EUROMED UNIVERSITY OF FES

Politique de limitation et de réduction de la surface de stationnement sur le campus

(Version 2025)

1. Préambule :

L'Université Euromed de Fès (UEMF), en cohérence avec ses engagements en faveur du développement durable et de la mobilité responsable, met en œuvre une politique visant à limiter et réduire progressivement la surface de stationnement sur son campus. Cette initiative s'inscrit dans la stratégie globale de l'Université en matière de transition écologique, de réduction des émissions de gaz à effet de serre et de promotion de la mobilité durable.

Cette politique s'aligne sur les Objectifs de Développement Durable (ODD), notamment :

- ODD 11 : Villes et communautés durables.
- ODD 12 : Consommation et production responsables.
- ODD 13 : Lutte contre le changement climatique.

2. Mission de la politique :

La politique de limitation du stationnement sur le campus a pour mission de :

- D'encourager la mobilité durable en réduisant l'usage des véhicules individuels motorisés.
- D'optimiser l'espace sur le campus en diminuant progressivement les zones de stationnement au profit d'espaces verts, d'infrastructures pédagogiques ou d'équipements collectifs.
- De promouvoir des alternatives de transport écologique accessibles à la communauté universitaire.
- De sensibiliser et accompagner les étudiants, enseignants et personnels administratifs vers un changement durable de comportements de mobilité.

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

Actions de gestion responsable selon la norme ISO 50002

La direction du Patrimoine suit mensuellement la consommation électrique et met en place des procédures techniques et comportementales pour réduire cette consommation, tout en assurant le confort au travail pour la communauté universitaire :

1. Fermeture des portes et des fenêtres pendant le fonctionnement réglementé de la climatisation (ODD 12).
2. Installation des détecteurs de mouvement qui permettent l'enclenchement automatique de la lumière dans les couloirs uniquement au besoin (ODD 12).
3. Coupure d'électricité la nuit dans les zones non utilisées (ODD 12).
4. Sensibilisation de la communauté universitaire concernant la réduction de la consommation d'eau et d'électricité et tournées périodiques de la Direction du Patrimoine pour faire le suivi de l'application des mesures mises en place (ODD 4).
5. Sensibilisation des étudiants à travers des cours et des séminaires concernant le développement durable (l'un des sept piliers des enseignements transversaux au sein de l'UEMF) et la responsabilité environnementale (ODD 4).

Éclairage :

- Mesures au luxmètre (ODD 12).
- Analyse des ratios de puissance d'éclairage utile par m² (ODD 12).
- Analyse des éclairages inutiles (ODD 12).

Tarification :

- Utilisation de logique d'optimisation tarifaire (ODD 12).
- Puissance électrique et thermique (ODD 12).
- Puissance réactive (cos phi) (ODD 12).

Bâtiments :

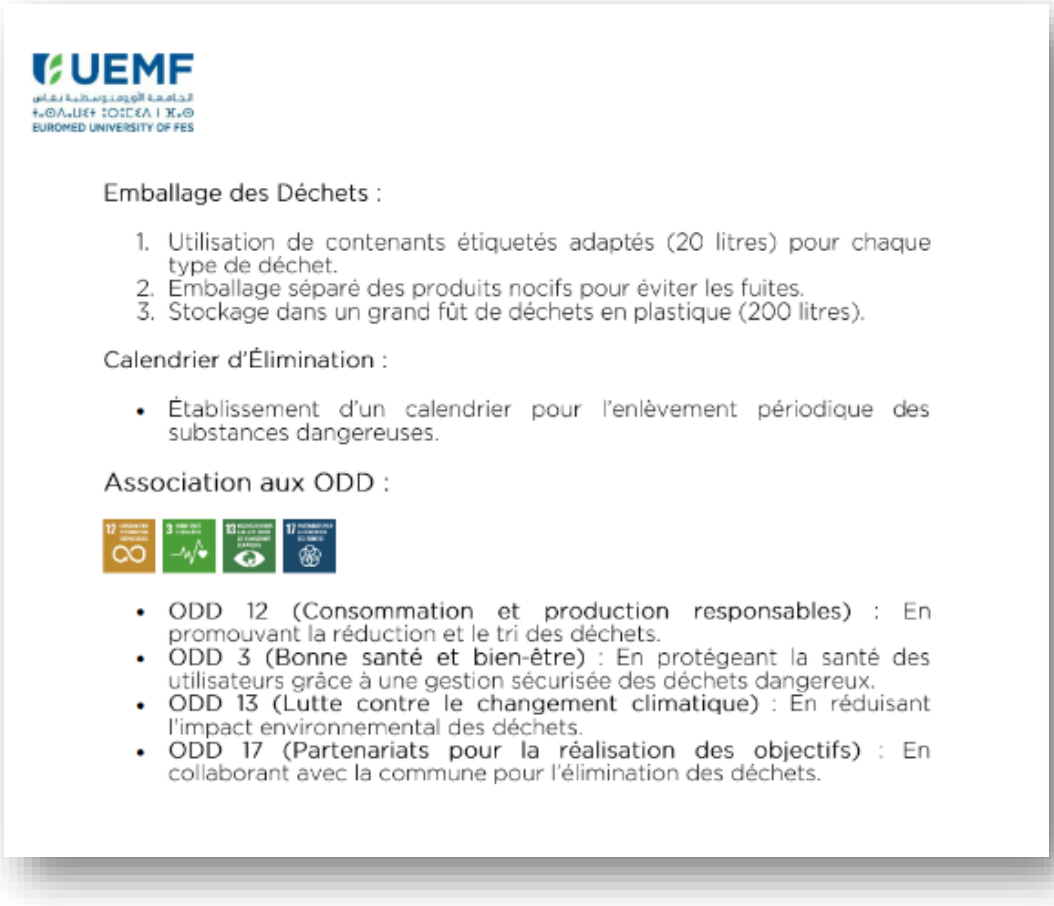

- Étanchéité, zones d'ouverture et d'ensoleillement (ODD 11, ODD 13).
- Ponts thermiques (ODD 13).
- Inertie thermique (ODD 13).

Bilan énergétique

La consommation globale et les émissions de GES (gaz à effet de serre) sont mesurées et quantifiées annuellement et les cibles de réduction sont définies (ODD 13).

UEMF is committed to optimizing its energy consumption and promoting the use of renewable energy. This policy aims to reduce the University's carbon footprint while ensuring the efficiency of its infrastructure.

Waste management policy

UEMF
EUROMED UNIVERSITY OF FES

Emballage des Déchets :

1. Utilisation de contenants étiquetés adaptés (20 litres) pour chaque type de déchet.
2. Emballage séparé des produits nocifs pour éviter les fuites.
3. Stockage dans un grand fût de déchets en plastique (200 litres).

Calendrier d'Élimination :

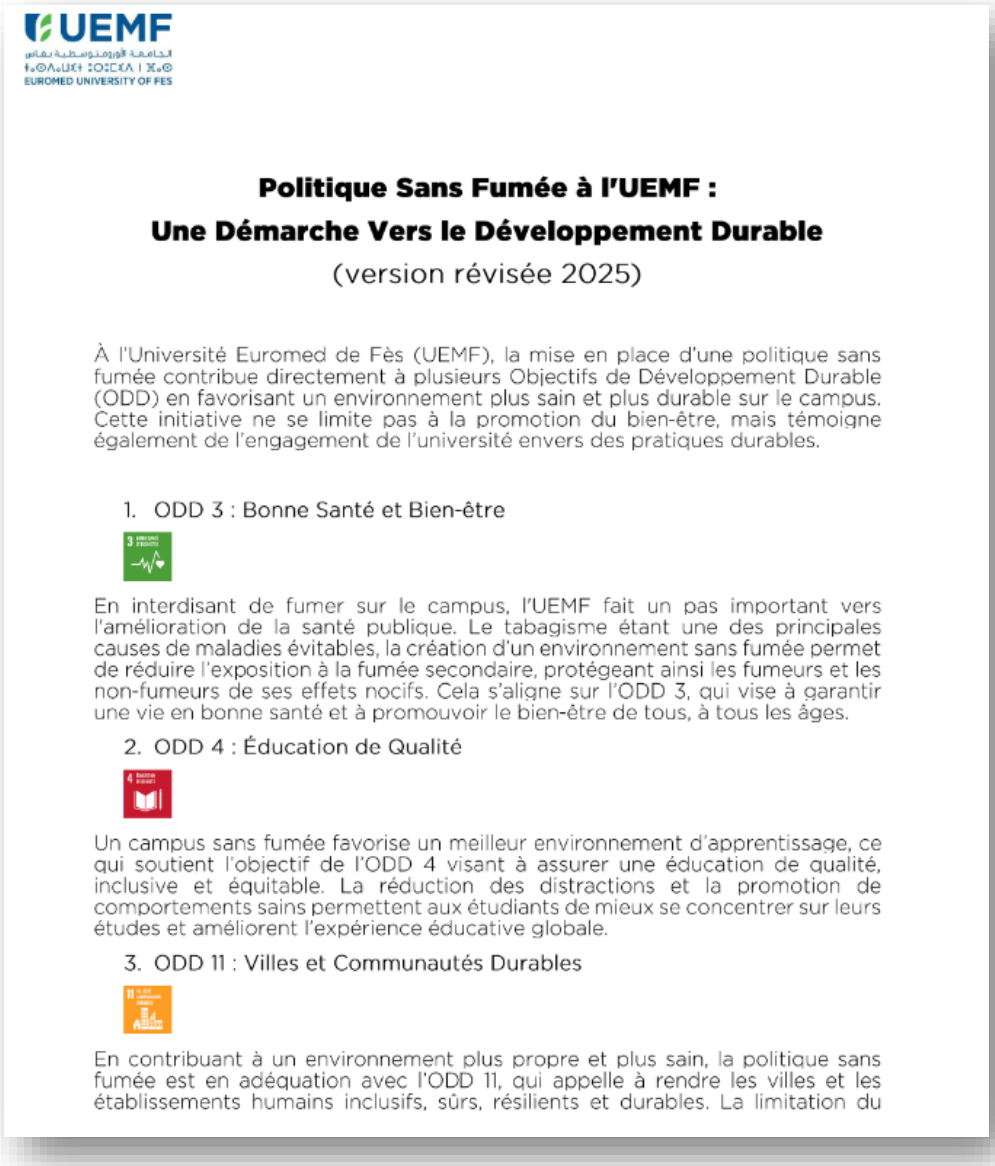

- Établissement d'un calendrier pour l'enlèvement périodique des substances dangereuses.

Association aux ODD :

- ODD 12 (Consommation et production responsables) : En promouvant la réduction et le tri des déchets.
- ODD 3 (Bonne santé et bien-être) : En protégeant la santé des utilisateurs grâce à une gestion sécurisée des déchets dangereux.
- ODD 13 (Lutte contre le changement climatique) : En réduisant l'impact environnemental des déchets.
- ODD 17 (Partenariats pour la réalisation des objectifs) : En collaborant avec la commune pour l'élimination des déchets.

This policy sets out the UEMF's guidelines for sustainable and responsible waste management. It is based on source reduction, selective sorting, recycling and recovery.

Smoke-free policy (Revised version 2025)

UEMF

EUROMED UNIVERSITY OF FES

Politique Sans Fumée à l'UEMF :

Une Démarche Vers le Développement Durable

(version révisée 2025)

À l'Université Euromed de Fès (UEMF), la mise en place d'une politique sans fumée contribue directement à plusieurs Objectifs de Développement Durable (ODD) en favorisant un environnement plus sain et plus durable sur le campus. Cette initiative ne se limite pas à la promotion du bien-être, mais témoigne également de l'engagement de l'université envers des pratiques durables.

1. ODD 3 : Bonne Santé et Bien-être

En interdisant de fumer sur le campus, l'UEMF fait un pas important vers l'amélioration de la santé publique. Le tabagisme étant une des principales causes de maladies évitables, la création d'un environnement sans fumée permet de réduire l'exposition à la fumée secondaire, protégeant ainsi les fumeurs et les non-fumeurs de ses effets nocifs. Cela s'aligne sur l'ODD 3, qui vise à garantir une vie en bonne santé et à promouvoir le bien-être de tous, à tous les âges.

2. ODD 4 : Éducation de Qualité

Un campus sans fumée favorise un meilleur environnement d'apprentissage, ce qui soutient l'objectif de l'ODD 4 visant à assurer une éducation de qualité, inclusive et équitable. La réduction des distractions et la promotion de comportements sains permettent aux étudiants de mieux se concentrer sur leurs études et améliorent l'expérience éducative globale.

3. ODD 11 : Villes et Communautés Durables

En contribuant à un environnement plus propre et plus sain, la politique sans fumée est en adéquation avec l'ODD 11, qui appelle à rendre les villes et les établissements humains inclusifs, sûrs, résilients et durables. La limitation du

UEMF is committed to preserving the health and well-being of its community by implementing a smoke-free policy on its campus. This initiative promotes a healthy environment conducive to learning and community life.

UEMF
EUROMED UNIVERSITY OF FES

8. Bonne gouvernance

Adopter une gouvernance basée sur la transparence, l'intégrité, l'évaluation continue, et la reddition des comptes, en ligne avec les ODD 16 (Paix, justice et institutions efficaces).

9. Politique d'aide aux étudiants

Offrir un soutien financier, social et académique aux étudiants via des bourses, hébergement, et restauration, notamment pour les étudiants en situation de handicap ou en difficulté (ODD 4 et ODD 10).

10. Clauses environnementales

Promouvoir un campus éco-responsable, en réduisant l'impact environnemental à travers des pratiques telles que la gestion des déchets, l'utilisation d'énergies renouvelables et la lutte contre les gaz à effet de serre (ODD 12 et ODD 13).

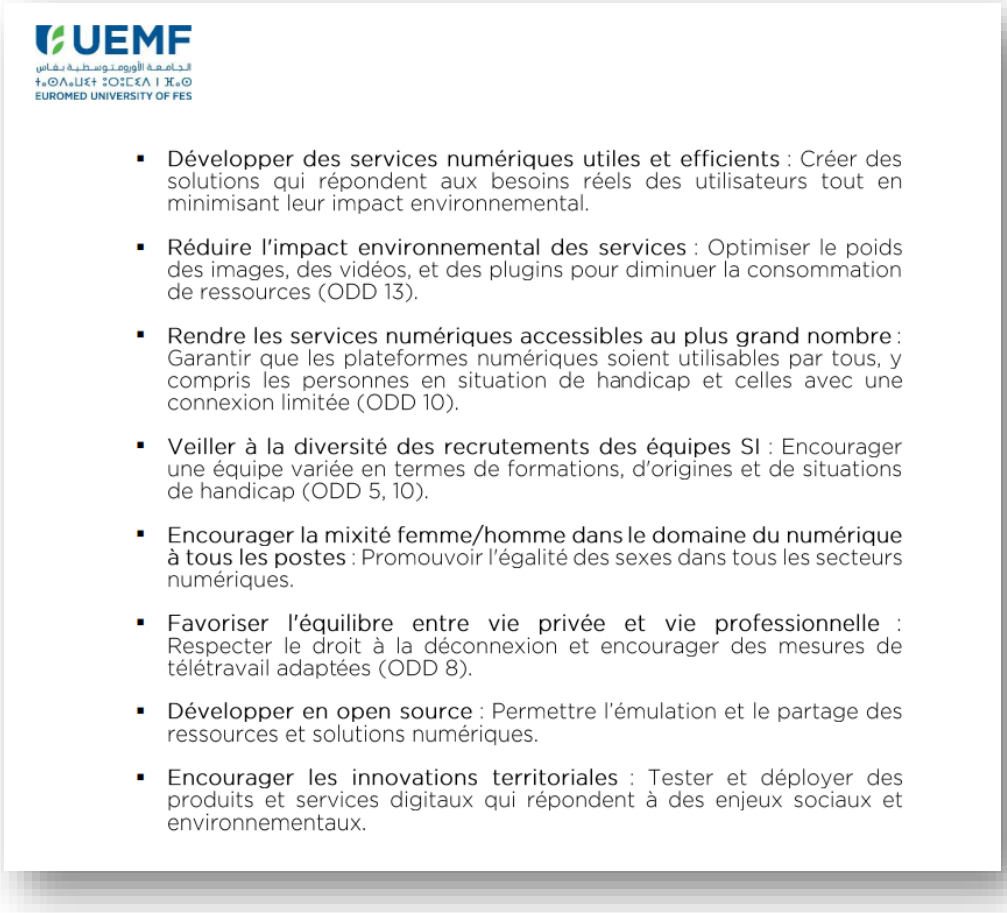

11. Clauses sociales

Se conformer aux législations marocaines en matière sociale et de travail, tout en sensibilisant notre personnel à la santé, la sécurité, et la lutte contre toute forme de discrimination ou de violence (ODD 8 et ODD 10).

La charte de Responsabilité Sociétale de l'UEMF est diffusée au sein de l'université et auprès de ses partenaires. Elle est régulièrement évaluée et mise à jour dans une démarche d'amélioration continue.

This charter formalizes the integration of social responsibility at the heart of the UEMF's missions. It outlines concrete commitments in the areas of ethics, governance, respect for the environment and contribution to sustainable development.

UEMF Responsible Digital Charter (Revised Version 2025)

UEMF
الجامعة الأورومتوسطية بفاس
EUROMED UNIVERSITY OF FES

- **Développer des services numériques utiles et efficients** : Créer des solutions qui répondent aux besoins réels des utilisateurs tout en minimisant leur impact environnemental.
- **Réduire l'impact environnemental des services** : Optimiser le poids des images, des vidéos, et des plugins pour diminuer la consommation de ressources (ODD 13).
- **Rendre les services numériques accessibles au plus grand nombre** : Garantir que les plateformes numériques soient utilisables par tous, y compris les personnes en situation de handicap et celles avec une connexion limitée (ODD 10).
- **Veiller à la diversité des recrutements des équipes SI** : Encourager une équipe variée en termes de formations, d'origines et de situations de handicap (ODD 5, 10).
- **Encourager la mixité femme/homme dans le domaine du numérique à tous les postes** : Promouvoir l'égalité des sexes dans tous les secteurs numériques.
- **Favoriser l'équilibre entre vie privée et vie professionnelle** : Respecter le droit à la déconnexion et encourager des mesures de télétravail adaptées (ODD 8).
- **Développer en open source** : Permettre l'émulation et le partage des ressources et solutions numériques.
- **Encourager les innovations territoriales** : Tester et déployer des produits et services digitaux qui répondent à des enjeux sociaux et environnementaux.

Digital technology plays a central role at UEMF, but its use must be responsible. This charter defines best practices regarding digital tools, data security, and reducing environmental impact.

Research, Innovation & Entrepreneurship

Research Topics - Doctoral Cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 13 has been identified. This work focuses in particular on climate mitigation and adaptation, decarbonization, renewable energies, urban and territorial resilience, water management, sustainable construction, and climate-related mobility.

The table below presents the main research topics contributing to this objective.

Thesis Subject	relatedSDGs
Water Governance for Development in Morocco. The Implementation of IWRM (Integrated Water Resources Management) as a Public Action Modality	SDG 13
AI-Optimized Native Vegetation and Traditional Biofiltration Systems for Waste Water Treatment	SDG 13
Olive Oil By-Product Valorization	SDG 13
Blockchain-Driven Transformation of the Green Hydrogen Supply Chain	SDG 13
About the Normality of Urgency and Emergency: Climate Change Narratives in Video Games	SDG 13
Contribution to the Phytochemical Valorization of Argania Spinoza Within the Framework of Circular Economy	SDG 13
Porous Materials for Catalysis	SDG 13
Transforming an Unsustainable City into a Sustainable One: The Case of Fez	SDG 13
How to Think the Landscape Future in Africa? Towards an African Convention of Landscape	SDG 13
From Abandonment to Urban Renaissance: Sensitive and Strategic Approaches to Rehabilitating Urban, Agricultural and Industrial Spaces	SDG 13
Smart Batteries	SDG 13
Computer Vision for Smart Farming and Agriculture Practices	SDG 13
Synthesis & Characterization of New Ionic Conductive Based Phosphate for Li/Na-Ion Batteries	SDG 13
Modeling and Optimizing Building for Energy Efficiency Using the Digital Twin Concept	SDG 13
Modeling and Optimization of Green Hydrogen Production from Sea Water Electrolysis: A Systematic Approach to Maximizing Energy Efficiency and Minimizing Environmental Impact	SDG 13
Green Production: Leveraging Bio-Based Polymers for Developing Thin-Film Composite Forward Osmosis Membranes for Fertigation	SDG 13

Thesis Subject	relatedSDGs
Hybrid Experiments-Based Numerical Simulations in 3D Cement Printing for Clay-Based Bio-Sourced Materials Development	SDG 13
Synthesis of Bio-Sourced Cementitious Materials for Additive Manufacturing in Construction	SDG 13
Blockchain Technology for Green Manufacturing	SDG 13
Eco-Resilient Earthen Construction: Integrating Material Innovation, Seismic Safety and Environmental Sustainability	SDG 13
Cooling the city – microclimatic strategies for thermal comfort and energy efficiency	SDG 13
Water management and sustainable logistics: modeling resilient supply chains in the face of water stress in Morocco	SDG 13
Sustainable architecture and the identity of places in sub-Saharan African countries	SDG 13
Aerial robotics applied to energy sustainability: the case of automated solar panel cleaning	SDG 13
Sustainable architecture and energy efficiency: integrated approaches between architecture and geography in the Moroccan context	SDG 13
AI-Driven and Industry 4.0 Enabled Frameworks for the Decarbonization of Automotive Industrial Production Sites in Morocco	SDG 13
The Impact of Climate Change on Migration and Regional Conflicts	SDG 13
Recent Trends and Advancements in SOFC Technology: Achieving Low Operating Temperatures Through Material Innovations	SDG 13
Development of New Generations of Bio-Fertilizers	SDG 13
From Light to Power: 2D Graphene Oxide (GO) Platforms for Efficient Solar-Thermal Water-Energy Conversion	SDG 13
Smart Integration of Electric and Hybrid Vehicles into the Power Grid	SDG 13
Optimum Design of Biomass Gasification Powered Hybrid RO-MED Desalination Plant	SDG 13
Energetic Valorization of Agricultural Residue Through Thermal Process	SDG 13
Next-Generation 2D MXene /LDH Layered Photothermal Systems for High-Efficiency Solar Evaporation and Sustainable Energy Production	SDG 13

Research projects2025-2026

Title	SDG RELATED
SmartDesal-Med Smart Decentralized Brackish Water Desalination with Low-Cost Sensing and AI Optimization for Climate-Resilient Mediterranean Agriculture	SDG 13
OLIVEGUARD A Novel, Remote and Non-Invasive ICT System for Early Detection, Monitoring, Forecasting and Targeted Management of Olive Fruit Fly in Mediterranean Olive Orchards	SDG 13
Design and Optimization of the Management of Decarbonized Industrial Zones in Morocco	SDG 13
Adaptive Reuse and Industrial Tourism for Sustainable Urban Regeneration: A Korea–Morocco Comparative Framework for Riads, Hanoks, and Urban Voids	SDG 13
AgroMaBio (Agroecological Market Gardens for Biodiversity and Socio-Climate Resilience: Cross-City Studies)	SDG 13
Valorization of Biopolymers from Marine Plants and Agro-Industrial and Agricultural Co-Products: Development of New Nano-Composites for Food Packaging	SDG 13

AI and electric mobility: towards a new era of urban mobility in Morocco

We are delighted to share that our co-founder,Brahim El Bekkali, recently met with Mr. Ryad Mezzour, Minister of Industry & Trade, and Ms. Amal El Fallah Seghrouchni, Minister of Digital Transition & Administration Reform, at theEuromed innovation center (EIC)- a hub of innovation excellence in Morocco.MA

At POGO, we are merging AI-driven urban data with electric mobility to empower smart, sustainable, and safe urban mobility. From our advanced data analytics to our medium-term vision of a 100% Made in Morocco electric moped by POGO, we are committed to national industrial excellence.

The journey toward digitized and carbon-neutral urban mobility is picking up speed across our Moroccan cities. Stay tuned—we're just getting started!

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF.Euromed innovation center (EIC)organized, in partnership withTAMWILCOMvia the InnovInvest Fund and BlueSpace (Bank of Africa), on April 16 and 17, the Hack'Days of the Fes-Meknes region, bringing together students, project leaders and young entrepreneurs around an intensive bootcamp dedicated to the creation and development of innovative solutions.

As part of a dynamic of supporting high-potential talent, this program aims to support the emergence of projects in strategic sectors such as digital, health, agritech, cybersecurity, greentech, fintech or edtech, thus contributing to the development of the regional entrepreneurial ecosystem.

Over the course of two days, participants were supported in structuring their ideas, designing concrete solutions and preparing their projects, in an environment conducive to experimentation, collaboration and collective intelligence.

A true space for learning and co-creation, this event allowed each team to develop their project, benefiting from constructive feedback, dedicated mentoring and guidance that fosters the maturation of entrepreneurial initiatives.

The Hack'Days concluded with pitch sessions, offering participants the opportunity to present their projects, compare their ideas and reveal their full potential, in a dynamic focused on innovation and impact.

We extend our sincere congratulations to all participants for their commitment, creativity, and entrepreneurial spirit. This initiative confirms the role of the UEMF, through the Euromed Innovation Center, as a key player in structuring and supporting innovation at the regional and national levels.

Participation in SIAM: showcasing innovative initiatives in AgriTech

At the heart of agricultural innovation and AgriTech entrepreneurship in Morocco 🌱,

The Euromed University of Fez, through its Euromed Innovation Center (EIC), is participating in the 18th edition of SIAM with the Tech4Farmers – Tamkin Li Tanmia program, supported by the French Development Agency and deployed within the framework of the PRIE Fès-Meknès.

The program highlights several innovative startups (OBENS, Wasit, BOVICLOUDS, ARWA Solutions, Jodoor, DeepLeaf, Green Innovation, PCS AGRI) illustrating the potential of technology in the service of sustainable and efficient agriculture.

The stand was visited by several personalities, including the President of the Euromed University of Fez and the Director of the AFD, as well as the participation of institutional partners during the closing ceremony of the program, marking a strong moment of highlighting the results and collaborations.

This initiative brings together many key players in the agricultural and digital ecosystem in Morocco and confirms the role of the university as a driver of innovation and entrepreneurship serving the territories.

Events

Academic events

The effects of climate change on water and biodiversity: a conference at the heart of contemporary environmental issues

As part of its commitment to disseminating knowledge and opening up to major contemporary issues, the Euromed University of Fez, in partnership with the Cervantes Institute, organised a conference dedicated to one of the major environmental challenges of our time: the impact of climate change on water resources and biodiversity.

Led by Carmen González Castro, Professor at the University of Vigo, this meeting, entitled "The effects of climate change on water and biodiversity: tools to mitigate it", offered a scientific perspective on the environmental transformations that are currently affecting ecosystems worldwide.

During her presentation, the speaker highlighted the growing consequences of climate change on water resources and natural balances, while also emphasizing the challenges related to preserving biodiversity. She further stressed the need for a better understanding of the interactions between these phenomena in order to anticipate their effects and strengthen adaptive capacities in the face of current environmental changes.

The conference also provided an opportunity to explore various tools and mitigation strategies that could contribute to better management of environmental challenges. Scientific approaches, sustainable strategies, and innovative solutions were presented as essential levers for preserving natural resources and supporting ecological transitions.

Beyond academic exchanges, this meeting provided a space for reflection and dialogue on issues concerning our collective future. It illustrates the shared commitment of the Euromed University of Fez and the Cervantes Institute to promoting cultural and scientific cooperation around major global challenges, while also fostering awareness and the transmission of knowledge to new generations.

BootcampAgreenTech2026: Immersion in the heart of agricultural innovation at UEMF

As part of its commitment to innovation, entrepreneurship, and sustainable development, the Euromed Innovation Center (EIC) at the Euromed University of Fez (UEMF) hosted the AgreenTech 2026 Bootcamp, organized in partnership with Tamwilcom, through the Innov Invest Fund, and Bank of Africa via BlueSpace. This initiative brought together innovative project leaders from different regions of Morocco for an intensive program dedicated to the transformation and modernization of the agricultural sector.

Over two days of collaborative work, participants received support aimed at strengthening the structure of their projects, consolidating their business models, and preparing the deployment of technological solutions addressing the main challenges facing Moroccan agriculture. The work focused on several strategic themes, including smart water management, precision agriculture, the digitalization of farms, adaptation to climate change, the sustainable development of natural resources, and the improvement of supply chains and market access.

The projects presented utilized innovative technologies such as artificial intelligence, the Internet of Things (IoT), smart irrigation systems, LoRa communication technologies, computer vision, and solar-powered solutions. These innovations aim to improve farm efficiency, optimize water resource use, strengthen resilience to climate change, and support more efficient and sustainable agriculture.

Beyond the training phase, the AgreenTech 2026 Bootcamp represents a key step in supporting entrepreneurs towards prototyping, experimenting, and implementing solutions with a strong economic, social, and environmental impact. This initiative illustrates the role of the UEMF as a driver of innovation serving sustainable development and the agricultural transition in Morocco.

Scientific seminars & conferences

Seminar on Low-Carbon Hydrogen: with Professor Philippe Tanguy and Professor Nadia Yousfi

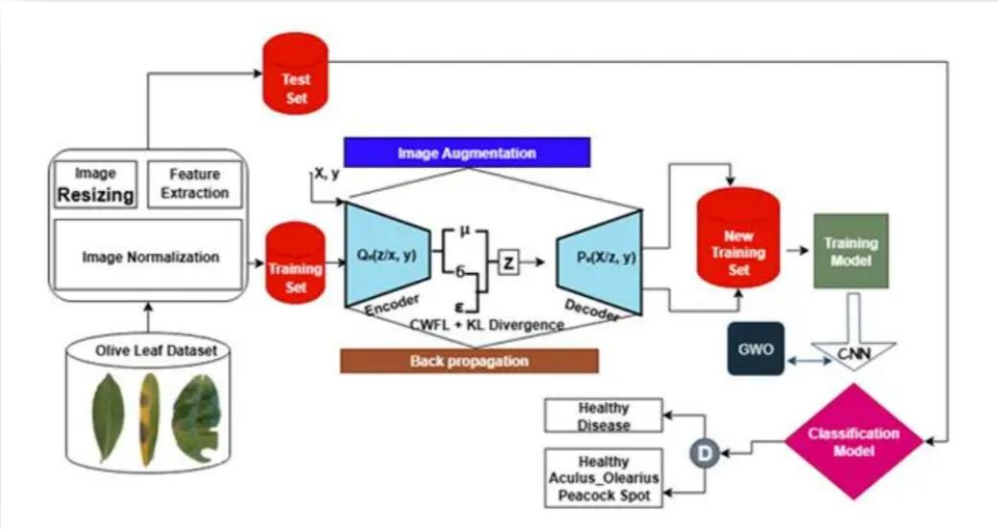

The Euromed University of Fez (UEMF), in partnership with the Hassan II Academy of emerging processes for the production of low-carbon hydrogen.

Led by Professor Philippe Tanguy, Director of Strategy for the HTEC Group and Associate Professor at Polytechnique Montréal, and Professor Nadia Yousfi, Corresponding Member of the Hassan II Academy of Sciences and Techniques, this seminar allowed for rich exchanges with students, researchers and teachers on the scientific, technological and economic challenges of low-carbon hydrogen.

This meeting highlighted the strategic role of hydrogen in Morocco's energy transition and confirmed the UEMF's commitment to research, innovation and sustainable development.

Doctoral activities

Doctoral Thesis Defense in Artificial Intelligence by Mr. Kaloma Usman MAJIKUMNA

This research investigates the impact of climate change, particularly drought stress, on olive tree cultivation in the Mediterranean region. It integrates artificial intelligence, satellite remote sensing, deep learning, and field experimentation to enhance plant survival and disease management.

Sentinel-2 satellite imagery (2018–2023) combined with machine learning techniques revealed significant changes in olive cultivation areas closely linked to rainfall variability. A novel deep learning model (FLVAEGWO-CNN) achieves high accuracy in olive disease detection, including minority classes, offering an effective tool for precision agriculture.

Field experiments demonstrated that the Languedoc variety showed the highest drought resilience, and optimized deficit irrigation strategies significantly improved yield performance. Overall, the study provides practical and scalable solutions for sustainable olive cultivation and climate risk mitigation in drought-prone regions

Diplomatic institutional visit

Visit to the infrastructure and innovation hubs of the UEMF

The institutional visit continued with a tour of the main facilities of the Euromed University of Fez, illustrating its integrated model based on innovation, excellence in education, and social engagement. The delegation notably visited the Euromed Sports Center, the Euromed Innovation Center (EIC), and the experimental farm of the Agritech cluster.

This immersive experience highlighted the university's efforts in developing innovative solutions, encouraging student entrepreneurship, and promoting sustainable technologies to address environmental and economic challenges. The visited facilities also demonstrated UEMF's commitment to student well-being, applied research, and the transition to a more sustainable and resilient development model.

Student events

Conference-Debate “End Plastic Soup”: Reflection and Commitment for a Sustainable Future

The Oratio Club, in partnership with the Rotaract Euromed Club, organised a conference-debate as part of the international “End Plastic Soup” week, an initiative aimed at raising awareness of the issues related to plastic pollution.

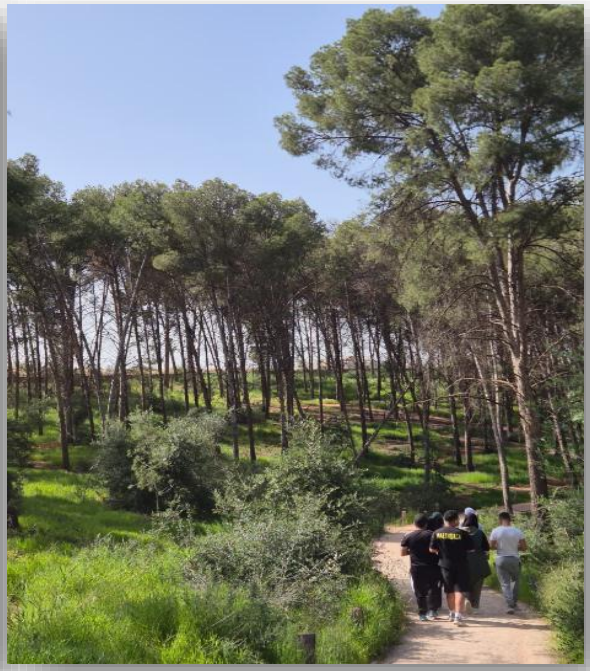

This event brought together students and members of both clubs for an enriching exchange on the role of plastic in our society today, its environmental and social impacts, and the long-term challenges it poses. The discussions also highlighted innovative solutions and sustainable alternatives for reducing our plastic footprint and promoting more responsible consumption patterns.

Through this interactive meeting, participants were encouraged to adopt a proactive stance and become agents of change, thus contributing to building a more environmentally friendly future.

Source: Club ELITE Report 25-26

Aïn Chkef clean: ecological commitment for a sustainable future

On April 18, 2026, the Elite Club of the Euromed University of Fez organized an ecological clean-up action in the Ain Chkef forest, located around Fez, as part of its commitment to the Sustainable Development Goals (SDGs), in particular SDG 13 (Climate Action) and SDG 15 (Life on Land).

This environmental initiative is part of a civic effort to raise awareness among students and participants about the importance of preserving natural ecosystems and biodiversity. Through concrete actions such as collecting and cleaning up waste, volunteers contributed to the restoration of this forest area, which is often damaged by human behavior and a lack of environmental responsibility.

Beyond its operational aspects, this activity provided a genuine moment of collective awareness regarding the urgent need to protect our environment. It reinforced the values of responsibility, commitment, and ecological solidarity among the participants, while also illustrating the essential role of youth in the transition to sustainable development.

Through this action, the Elite Club confirms its commitment to actively participate in the SDG dynamic, translating ideas into concrete actions with a positive impact on society and the environment.

Partnership

The UEMF hosts the 6th Meeting of the Board of Directors of the Green H2 Morocco Cluster

On January 23, 2026, the Euromed University of Fez hosted the sixth meeting of the Board of Directors of the Green H2 Morocco Cluster, highlighting its leading role in research and innovation in strategic sectors related to the energy transition. Prior to the meeting, participants toured the university's facilities, including sports facilities, laboratories in civil engineering, mechanics, biotechnology, and chemistry, as well as the ideation incubator and the Fez Smart Factory, demonstrating UEMF's capabilities in research and technology transfer.

The meeting focused on analyzing the Cluster's financial and organizational situation, reviewing activities, future development, and strengthening governance, within a context favorable to green hydrogen. The event illustrates the UEMF's commitment to supporting innovation, institutional partnerships, and the development of future-oriented sectors in Morocco, particularly in renewable energies.

GIZ Training Programme – Dorscht Impact (Circular Water Economy)

The UEMF was selected to implement a specialized training program within the framework of the GIZ – Dorscht Impact partnership, focusing on the strategic theme of the circular economy of water in urban areas. This program, deployed in several Moroccan cities (Rabat, Marrakech, and Tangier), is structured into four thematic cohorts: Cohort M1, intended for institutional actors (agencies and ministries) on regulations,

The program includes: governance and management of water-related projects (sessions held in Rabat on February 4-5 and 11-12, 2026); Cohort M4, focused on strategic urban planning and the integration of the EccEau concept (sessions in Marrakech and Tangier in February 2026); Cohort M2, targeting teachers and academic staff on the transition from theory to practice (sessions planned in Tangier and Marrakech in March-April 2026); and Cohort M3, designed for water sector professionals and focusing on the 5Rs of Water concept (sessions planned in Tangier and Marrakech in April 2026). This program positions UEMF as a leading institution in training on environmental issues and the sustainable management of water resources in Morocco.

Bernspire 2025-2026: Applications open for international student competitions

Bernspire, a Swiss association committed to education, innovation and the development of young talent internationally, announces the official opening of applications for the 2025-2026 edition of its academic competitions.
Organized annually on a supra-regional scale, Bernspire's Graduation Project Challenges are aimed at final-year university students in the fields of engineering and social sciences. This initiative seeks to promote innovative graduation projects that offer concrete solutions to contemporary technological, societal, and environmental challenges.

The competitions bring together participants from several international universities and are evaluated by a jury composed of academic experts and professionals from different countries, thus offering candidates international visibility and a unique opportunity to showcase their research and innovation work.
Applications are open to students preparing their final year project during the 2025-2026 academic year.
Students wishing to participate can consult the application procedures and submit their projects via the official Bernspire website:
www.bernspire.com/the-details
The results of previous editions and the winning projects can be viewed via:
www.bernspire.com/2024-2025-winners

Awards and Distinctions

UI GreenMetric International Ranking 2025

The Euromed University of Fez has been ranked the number one university in Morocco in the UI GreenMetric 2025 international ranking and is among the top 400 universities worldwide, representing 105 countries. It notably surpasses Ibn Tofail University, Mohammed VI Polytechnic University, and Mohammed V University of Rabat.

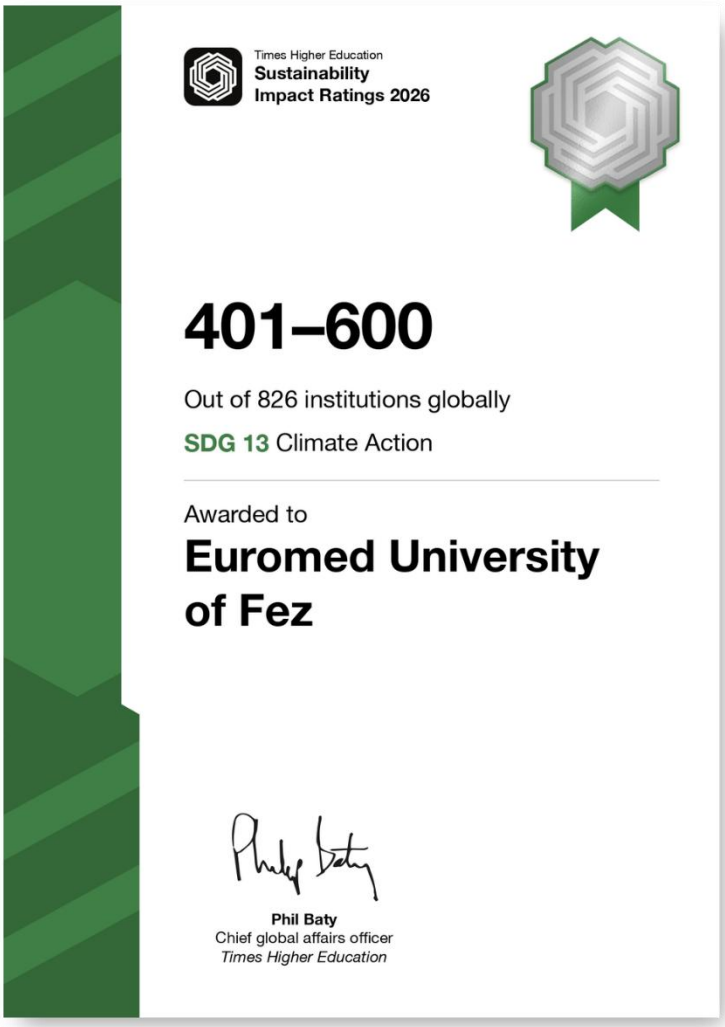

This ranking, based on 51 indicators related to sustainable development, innovation, teaching and research, confirms the national and international leadership of the UEMF.

In 2025, the university was also ranked 1st in Morocco and 2nd in Africa (behind the University of Cape Town) by the Round University Ranking, received the International Alliance University of the Year 2025 award, and had eight of its researchers ranked among the top 2% most impactful in the world according to Stanford's ranking.

These results are the outcome of a strategy focused on:

- Academic excellence,
- Research and innovation,
- International openness,
- Collaboration with the socio-economic world,
- and the well-being of the university community.

UEMF's performance in THE Impact Rankings 2026 – SDG 13

In the THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 401–600 range out of 826 institutions for SDG 13: Climate Action. This distinction highlights its research, awareness-raising, environmental footprint reduction, and support activities for local communities facing climate change mitigation and adaptation challenges.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

The Euromed University of Fez is committed to promoting the preservation of natural resources and the protection of ecosystems through its training, research, and awareness-raising activities. Through educational projects, scientific initiatives, and awareness campaigns conducted within the university community, UEMF contributes to raising awareness of the challenges related to sustainable water management and the protection of aquatic environments. The University thus encourages the development of knowledge and innovative solutions for environmental sustainability.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

Research, Innovation & Entrepreneurship

Research topics - Doctoral cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 14 has been identified. This work focuses in particular on the protection of marine and aquatic environments, the sustainable use of ocean resources, the reduction of environmental pressures, and the interactions between water, energy, and ecosystems.

The table below presents the main research topics contributing to this objective.

Monitoring priority: measure outcomes for habitats, species, soils and the use of natural areas.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

The Euromed University of Fez (UEMF) is committed to environmental protection and biodiversity conservation by integrating the principles of sustainable development into its educational programs, research projects, and awareness-raising activities. Through educational initiatives, student activities, and projects related to the responsible management of natural resources, UEMF contributes to fostering a culture of respect for terrestrial ecosystems and combating environmental degradation. Through these commitments, the University participates in the training of citizens and professionals who are aware of ecological challenges and capable of taking action for a sustainable future.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez is committed to protecting terrestrial ecosystems and biodiversity. It integrates sustainable practices aimed at limiting the impact of its activities on the natural environment. Its carbon neutrality policy contributes to this approach by reducing environmental pressures. The university also raises awareness within its community about the preservation of natural resources and promotes responsible management of spaces and infrastructure. The Euromed University of Fez thus participates in the protection of biodiversity and contributes to the achievement of Sustainable Development Goal 15.

- Utilisation des patios et des ouvertures des loggias et des bâtiments ouverts
- Mise en place de jardins et de zone pédestres dotés d'équipement sportif

- Utilisation des savoirs faires inspirés du patrimoine de la Médina de Fès pour la climatisation naturelle ;
- Suivi environnemental et énergétique piloté par la Direction du Patrimoine, en coordination avec la Direction Audit et Assurance Qualité pour le suivi des indicateurs de durabilité.

b. Recherche scientifique et innovation verte

L'UEMF développe une recherche appliquée autour de :

- Énergies renouvelables : photovoltaïque, thermique et batteries ;
- Changement climatique : résilience et adaptation ;
- Production et valorisation de l'hydrogène vert ;
- Recyclage et valorisation des matériaux plastiques et biosourcés ;
- Aménagement durable du territoire et gestion intégrée des ressources naturelles ;
- Traitement, valorisation et gestion de l'eau ;
- Dessalement d'eau, production d'hydrogène et décarbonations de l'industrie du ciment ;
- Développement des biofertilisants ;
- Combinaison IA et agriculture pour minimiser la consommation d'eau et fertilisant

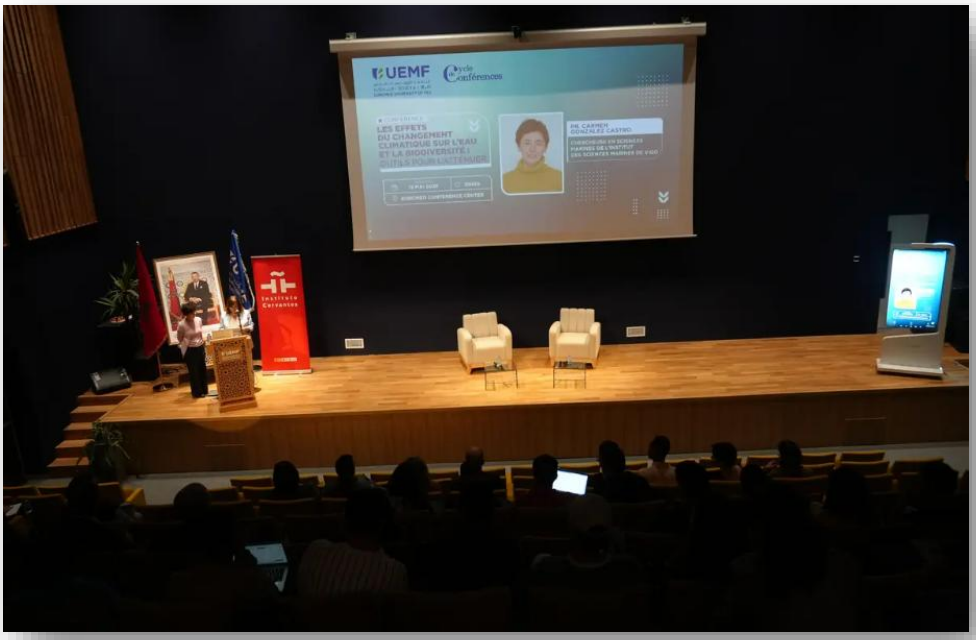

Ces thématiques sont portées par des structures telles que l'Usine École Pilote 4.0, le Pôle Ingénierie et Sciences de l'Environnement, et plusieurs laboratoires de recherche interdisciplinaires.

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

Academic events

The effects of climate change on water and biodiversity: a conference at the heart of contemporary environmental issues

As part of its commitment to disseminating knowledge and opening up to major contemporary issues, the Euromed University of Fez, in partnership with the Cervantes Institute, organised a conference dedicated to one of the major environmental challenges of our time: the impact of climate change on water resources and biodiversity.

Led by Carmen González Castro, Professor at the University of Vigo, this meeting, entitled "The effects of climate change on water and biodiversity: tools to mitigate it", offered a scientific perspective on the environmental transformations that are currently affecting ecosystems worldwide.

During her presentation, the speaker highlighted the growing consequences of climate change on water resources and natural balances, while also emphasizing the challenges related to preserving biodiversity. She further stressed the need for a better understanding of the interactions between these phenomena in order to anticipate their effects and strengthen adaptive capacities in the face of current environmental changes.

The conference also provided an opportunity to explore various tools and mitigation strategies that could contribute to better management of environmental challenges. Scientific approaches, sustainable strategies, and innovative solutions were presented as essential levers for preserving natural resources and supporting ecological transitions.

Beyond academic exchanges, this meeting provided a space for reflection and dialogue on issues concerning our collective future. It illustrates the shared commitment of the Euromed University of Fez and the Cervantes Institute to promoting cultural and scientific cooperation around major global challenges, while also fostering awareness and the transmission of knowledge to new generations.

Student events

Creative Outing - Crafty Fall Themed Picnic

Organized atIn Ifrane, more precisely at the natural site of Aïn Vittel, this outdoor activity was part of a dynamic of strengthening the links between the members of the club, while promoting creativity in the open air.

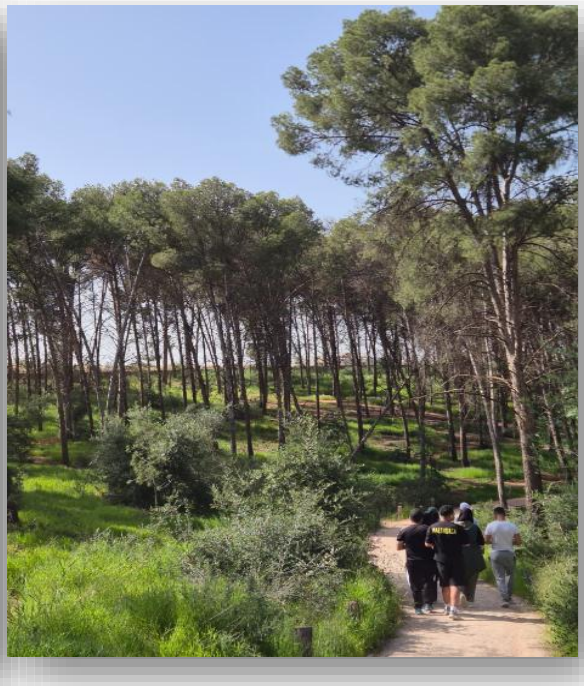

Taking advantage of the autumn season and its inspiring natural setting, the club organized a creative, autumn-themed picnic, combining relaxation, art, and conviviality. The main objective was to foster group cohesion through an immersive experience, far removed from the usual academic environment.

In a warm and peaceful atmosphere, participants took part in various craft and artistic activities such as drawing, crocheting, and other hands-on crafts, directly in contact with nature. This time allowed everyone to freely express their creativity, while sharing moments of exchange and connection.

Beyond the artistic aspect, this initiative contributed to the well-being of the members, strengthening team spirit and consolidating human relationships within the club in a natural environment conducive to inspiration and rejuvenation.

Aïn Chkef clean: ecological commitment for a sustainable future

On April 18, 2026, the Elite Club of the Euromed University of Fez organized an ecological clean-up action in the Ain Chkef forest, located around Fez, as part of its commitment to the Sustainable Development Goals (SDGs), in particular SDG 13 (Climate Action) and SDG 15 (Life on Land).

This environmental initiative is part of a civic effort to raise awareness among students and participants about the importance of preserving natural ecosystems and biodiversity. Through concrete actions such as collecting and cleaning up waste, volunteers contributed to the restoration of this forest area, which is often damaged by human behavior and a lack of environmental responsibility.

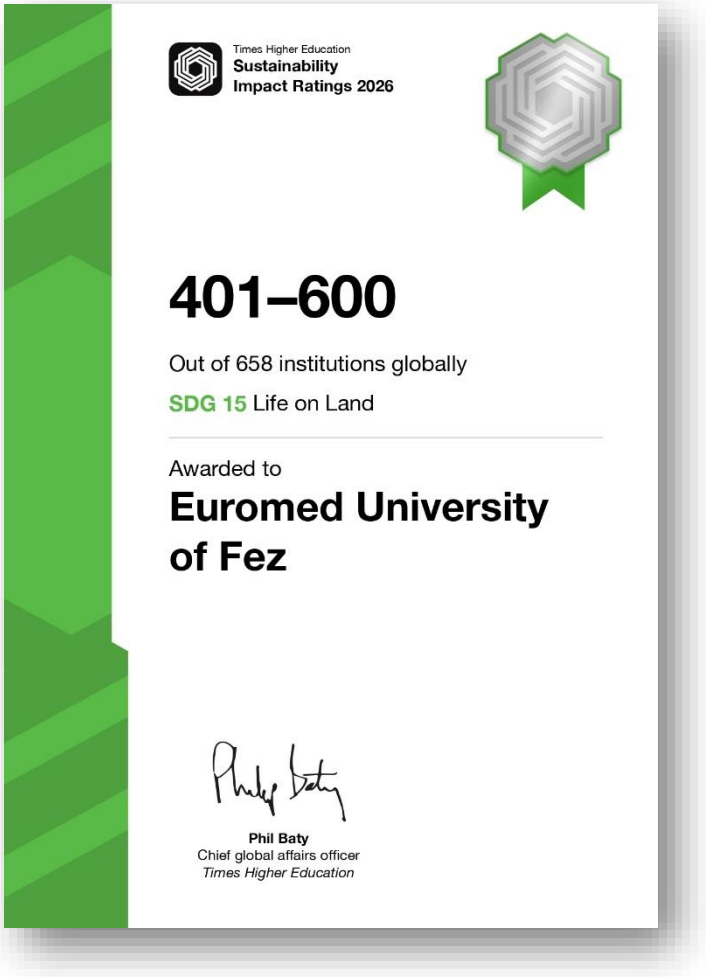

Beyond its operational aspects, this activity provided a genuine moment of collective awareness regarding the urgent need to protect our environment. It reinforced the values of responsibility, commitment, and ecological solidarity among the participants, while also illustrating the essential role of youth in the transition to sustainable development.

Through this action, the Elite Club confirms its commitment to actively participating in the SDG movement, translating ideas into concrete actions with a positive impact on society and the environment.

Awards and Distinctions

UEMF's performance in THE Impact Rankings 2026 – SDG 15

Following its participation in the Times Higher Education (THE) Impact Rankings 2026, the Euromed University of Fez (UEMF) ranked in the 401–600 range out of 658 institutions for SDG 15: Life on Land. This performance highlights its commitment to protecting terrestrial ecosystems, preserving biodiversity, sustainably managing natural resources, and raising awareness of environmental issues.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

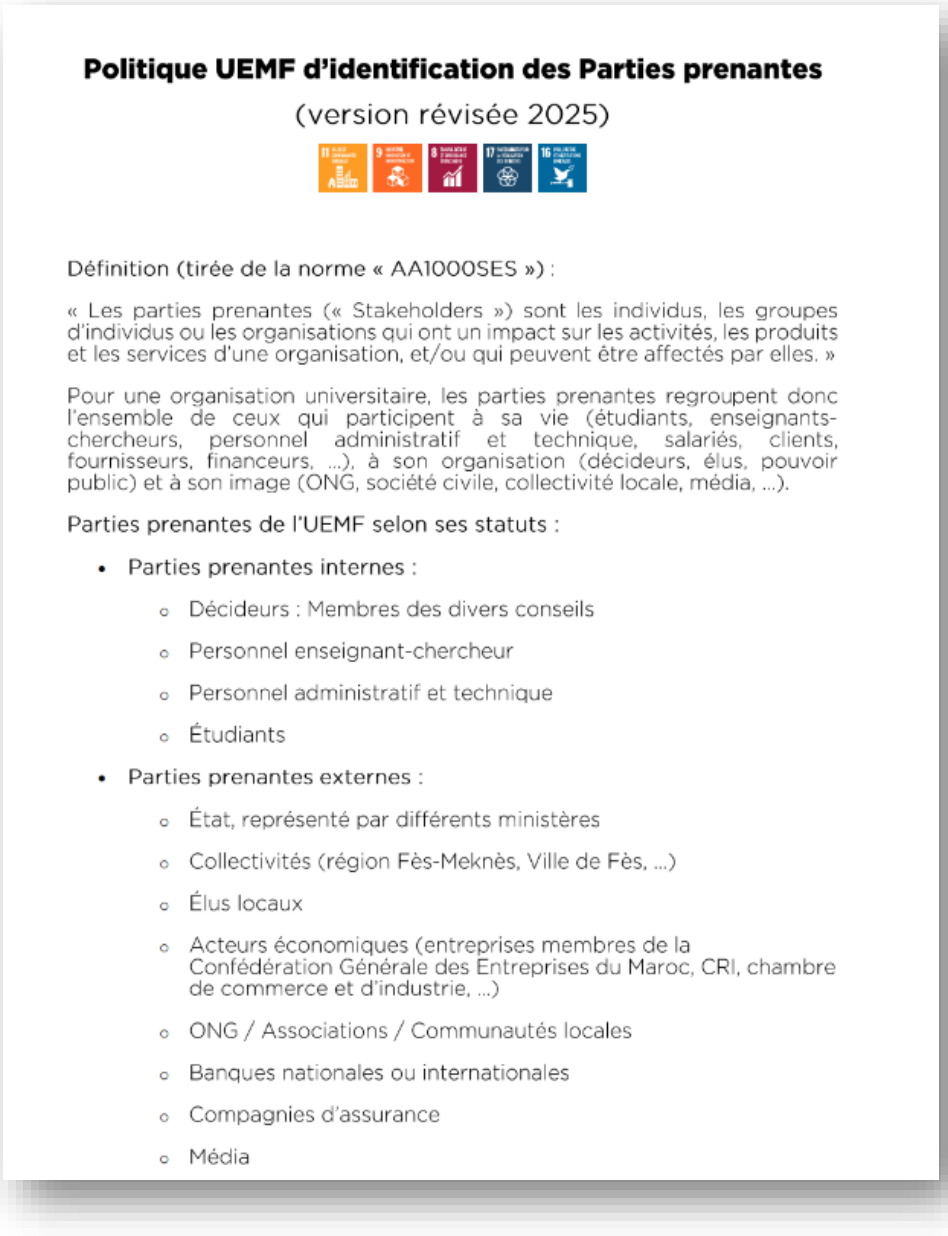

Introduction :

The Euromed University of Fez contributes to the promotion of peaceful and inclusive societies founded on respect for ethical values and dialogue. Through its training programs, conferences, research activities, and academic initiatives, the UEMF fosters critical thinking, responsible governance, and a culture of constructive debate. The actions undertaken within the University thus contribute to the development of engaged citizens who respect the principles of justice, transparency, and accountability, and who are capable of contributing to the strengthening of institutions and social cohesion.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez is strengthening its governance through policies that promote transparency, ethics, and participation. It is committed to ensuring responsible and inclusive decision-making processes. Stakeholder engagement is a key element of this approach. The university adopts practices aimed at strengthening institutional trust. It also promotes values of justice and integrity. The Euromed University of Fez thus contributes to building effective institutions and participates in achieving Sustainable Development Goal 16.

Politique UEMF d'identification des Parties prenantes

(version révisée 2025)

Définition (tirée de la norme « AA1000SES ») :

« Les parties prenantes (« Stakeholders ») sont les individus, les groupes d'individus ou les organisations qui ont un impact sur les activités, les produits et les services d'une organisation, et/ou qui peuvent être affectés par elles. »

Pour une organisation universitaire, les parties prenantes regroupent donc l'ensemble de ceux qui participent à sa vie (étudiants, enseignants-chercheurs, personnel administratif et technique, salariés, clients, fournisseurs, financeurs, ...), à son organisation (décideurs, élus, pouvoir public) et à son image (ONG, société civile, collectivité locale, média, ...).

Parties prenantes de l'UEMF selon ses statuts :

- Parties prenantes internes :
  - Décideurs : Membres des divers conseils
  - Personnel enseignant-chercheur
  - Personnel administratif et technique
  - Étudiants
- Parties prenantes externes :
  - État, représenté par différents ministères
  - Collectivités (région Fès-Meknès, Ville de Fès, ...)
  - Élus locaux
  - Acteurs économiques (entreprises membres de la Confédération Générale des Entreprises du Maroc, CRI, chambre de commerce et d'industrie, ...)
  - ONG / Associations / Communautés locales
  - Banques nationales ou internationales
  - Compagnies d'assurance
  - Média

The UEMF recognizes the importance of its stakeholders in the success of its missions. This policy defines the methods of dialogue, listening, and cooperation with students, teachers, institutional partners, and economic actors.

UEMF
EUROMED UNIVERSITY OF FES

Politique des achats responsables de l'UEMF
Version 2025

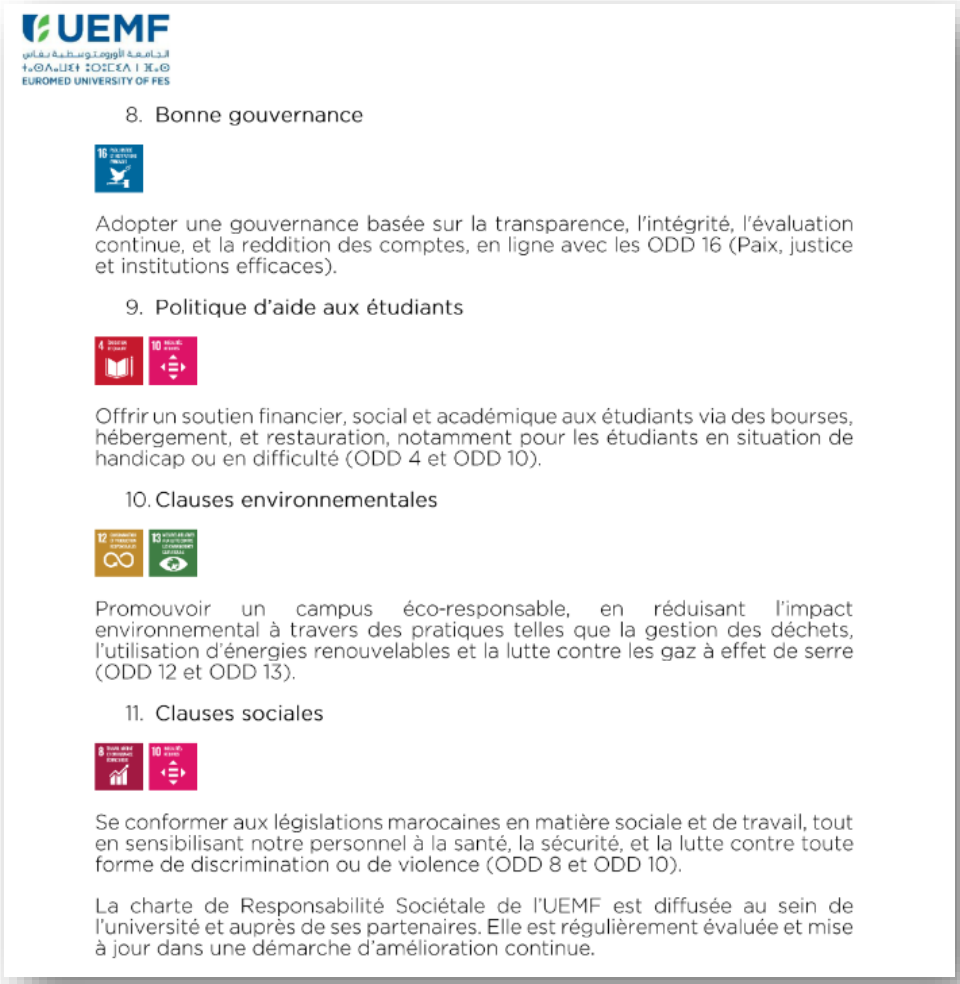

La Direction Achats et Logistique a pour principal objectif de satisfaire les besoins des clients internes, en obtenant la meilleure performance des fournisseurs (Qualité / Coût / Délais / Services) dans le respect des ODD, de la réglementation en vigueur et en lien avec la stratégie générale de l'UEMF.

Mission de la fonction achat et logistique

De manière générale, la fonction achat et logistique a pour mission de :

- Conduire une veille marché régulière (ODD 8).
- Recueillir les besoins des clients internes tout en évitant la surconsommation en fin d'exercice (ODD 12).
- Décrire la procédure achats responsable et la diffuser en interne (ODD 4).
- Lancer les consultations, mener le sourcing et le choix des fournisseurs (ODD 12).
- Soutenir les acteurs économiques du territoire, associations à but non lucratif et entreprises sociales (ODD 8).
- Négocier les tarifs et les conditions d'achat (ODD 12).
- Passer les commandes (ODD 12).
- Assurer l'ensemble des opérations logistiques (ODD 12).
- Promouvoir des véhicules électriques et hybrides pour le transport interne des personnes/marchandises (ODD 11).
- Veiller au respect des règles, procédures et lois en vigueur (ODD 16).
- Veiller au respect des normes et déontologies du métier : équité, transparence, égalité des chances et absence de conflits d'intérêt (ODD 16).
- Intégrer des critères relatifs au développement durable et respect des droits de l'homme dans les règles de notation des fournisseurs et marchés (ODD 12).
- Encourager la mutualisation des équipements, notamment d'impression (ODD 12).
- Rationnaliser les achats et sensibiliser les utilisateurs à une consommation responsable (ODD 12).
- Inscrire dans les clauses de passation des marchés le respect de l'environnement et la fin de vie des produits (ODD 12).
- Éviter autant que possible l'acquisition et l'utilisation de substances chimiques/toxiques, de matière plastique, d'articles jetables, d'appareils à piles et renforcer l'acquisition de luminaires à basse énergie (ODD 12, ODD 3).
- Promouvoir le recyclage et la valorisation des déchets (ODD 12).
- Donner la priorité dans ses achats aux :
  - Produits peu consommateurs d'énergie, d'eau, à coût de fonctionnement faible et à moindres frais de gestion des déchets (ODD 7, ODD 12).
  - Critères suivants : coût, qualité, disponibilité, conditions de livraison, service après-vente, respect de l'environnement et de la santé, bonne réputation du fournisseur (ODD 12).

With this policy, the UEMF is establishing a framework for ethical and sustainable procurement. It encourages the selection of suppliers who share values of transparency, social and environmental responsibility.

UEMF
EUROMED UNIVERSITY OF FES

8. Bonne gouvernance

Adopter une gouvernance basée sur la transparence, l'intégrité, l'évaluation continue, et la reddition des comptes, en ligne avec les ODD 16 (Paix, justice et institutions efficaces).

9. Politique d'aide aux étudiants

Offrir un soutien financier, social et académique aux étudiants via des bourses, hébergement, et restauration, notamment pour les étudiants en situation de handicap ou en difficulté (ODD 4 et ODD 10).

10. Clauses environnementales

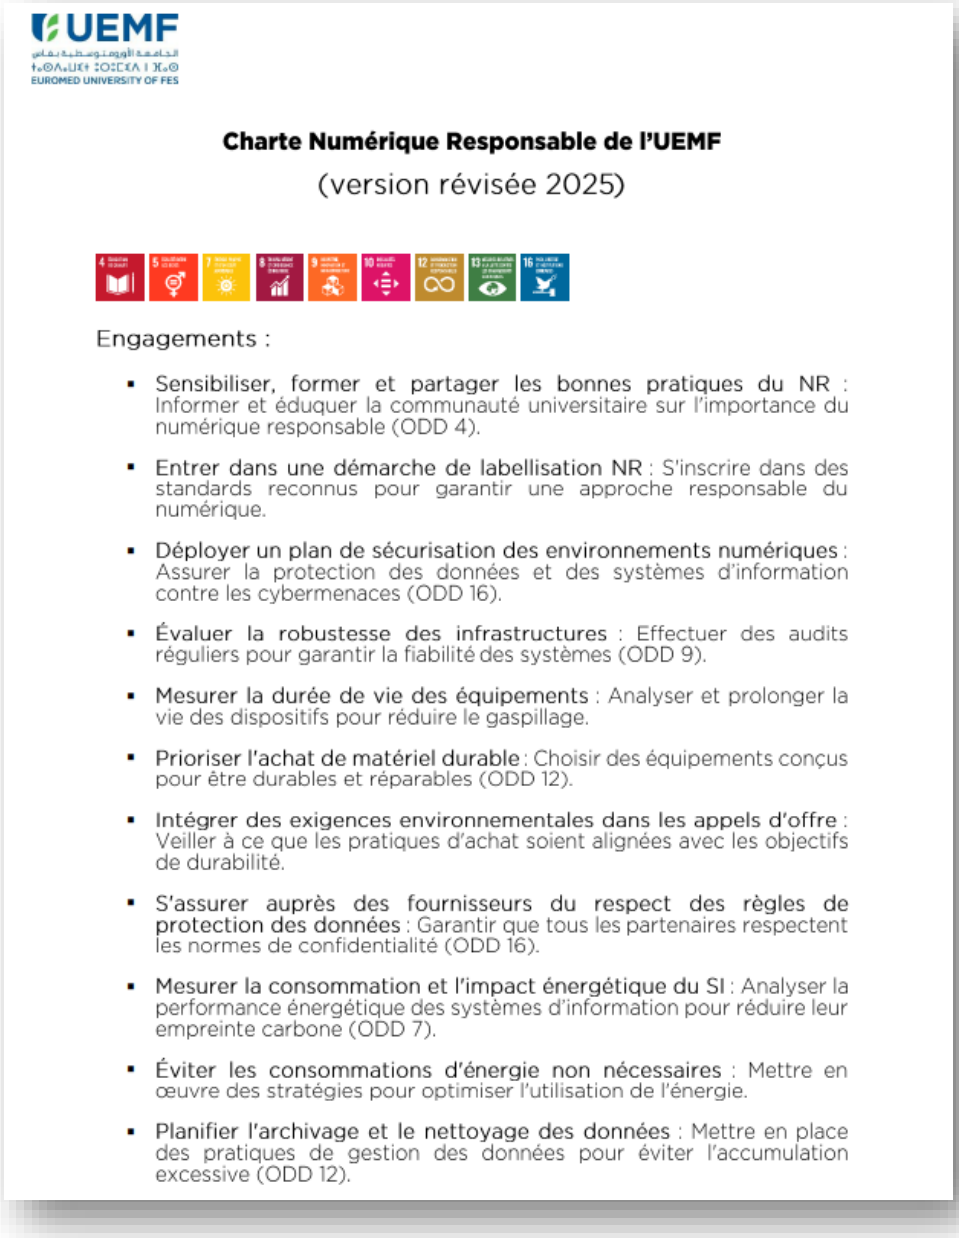

Promouvoir un campus éco-responsable, en réduisant l'impact environnemental à travers des pratiques telles que la gestion des déchets, l'utilisation d'énergies renouvelables et la lutte contre les gaz à effet de serre (ODD 12 et ODD 13).

11. Clauses sociales

Se conformer aux législations marocaines en matière sociale et de travail, tout en sensibilisant notre personnel à la santé, la sécurité, et la lutte contre toute forme de discrimination ou de violence (ODD 8 et ODD 10).

La charte de Responsabilité Sociétale de l'UEMF est diffusée au sein de l'université et auprès de ses partenaires. Elle est régulièrement évaluée et mise à jour dans une démarche d'amélioration continue.

This charter formalizes the integration of social responsibility at the heart of the UEMF's missions. It outlines concrete commitments in the areas of ethics, governance, respect for the environment and contribution to sustainable development.

UEMF
EUROMED UNIVERSITY OF FES

Charte Numérique Responsable de l'UEMF

(version révisée 2025)

Engagements :

- **Sensibiliser, former et partager les bonnes pratiques du NR** : Informer et éduquer la communauté universitaire sur l'importance du numérique responsable (ODD 4).
- **Entrer dans une démarche de labellisation NR** : S'inscrire dans des standards reconnus pour garantir une approche responsable du numérique.
- **Déployer un plan de sécurisation des environnements numériques** : Assurer la protection des données et des systèmes d'information contre les cybermenaces (ODD 16).
- **Évaluer la robustesse des infrastructures** : Effectuer des audits réguliers pour garantir la fiabilité des systèmes (ODD 9).
- **Mesurer la durée de vie des équipements** : Analyser et prolonger la vie des dispositifs pour réduire le gaspillage.
- **Prioriser l'achat de matériel durable** : Choisir des équipements conçus pour être durables et réparables (ODD 12).
- **Intégrer des exigences environnementales dans les appels d'offre** : Veiller à ce que les pratiques d'achat soient alignées avec les objectifs de durabilité.
- **S'assurer auprès des fournisseurs du respect des règles de protection des données** : Garantir que tous les partenaires respectent les normes de confidentialité (ODD 16).
- **Mesurer la consommation et l'impact énergétique du SI** : Analyser la performance énergétique des systèmes d'information pour réduire leur empreinte carbone (ODD 7).
- **Éviter les consommations d'énergie non nécessaires** : Mettre en œuvre des stratégies pour optimiser l'utilisation de l'énergie.
- **Planifier l'archivage et le nettoyage des données** : Mettre en place des pratiques de gestion des données pour éviter l'accumulation excessive (ODD 12).

Digital technology plays a central role at UEMF, but its use must be responsible. This charter defines best practices regarding digital tools, data security, and reducing environmental impact.

E-SDG

As part of its commitment to SDG 16 – Peace, Justice and Strong Institutions – UEMF is developing a range of training programs that contribute to skills development in the fields of law, political science, governance, cybersecurity, and the humanities and social sciences. Through its various institutions and programs, the University prepares students for the challenges related to justice, governance, data protection, digital security, human rights, conflict management, and the development of inclusive and resilient societies.

1. PREPARATORY CYCLE

The Integrated Preparatory Cycle at the School of Digital Engineering and Artificial Intelligence is designed to provide students with in-depth scientific and technical training, enabling them to access the various digital engineering tracks. This program combines courses in computer science, electronics, applied mathematics, and humanities and social sciences, in order to lay a solid foundation for the rest of their studies in the engineering cycle.

2. ENGINEERING PROGRAM

Sectors:

- Artificial Intelligence (AI)
- Robotics and Cobotics
- Big Data Analysis
- Information Technology and Cybersecurity
- Full Stack and Multimedia Engineering

3. MASTER'S PROGRAM

ICT Security and Artificial Intelligence (dual degree program with George Washington University) *

The Information Technology & Cybersecurity sector contributes to the security of information systems, data protection, digital risk management and organizational resilience.

1. BACHELOR'S DEGREE PROGRAM

The Bachelor's degree in Political and Legal Sciences offers a multidisciplinary education in social sciences, law, and political science. After a common core curriculum in the first two years, students choose a specialization in either political science or legal sciences. It prepares students for Master's level studies as well as careers in public administration, local government, research and consulting, communications, journalism, and the non-profit sector. The third year is dedicated to a selective international exchange program.

2. MASTER'S PROGRAM

At the Master's level, the Institute offers a diverse range of courses in political science and legal science, with several specializations:

- Master's Degree in Mediterranean and African Politics –double degree with the University of Paris 1 Panthéon-Sorbonne
- Master's Degree in Conflict Management and the Alliance of Civilizations
- Master of Economic and Social Administration– relocated from the University of Toulouse Capitole
- Master's Degree in Business Law– Sorbonne Law School
- Master's Degree in Digital Law
- Master's Degree in Sports Law

3. DOCTORAL CYCLE

Graduates of Masters programs in political science and law with a research profile could apply to pursue doctoral studies with the possibility of joint supervision with the University of Paris 1 Panthéon-Sorbonne.

1. BACHELOR'S DEGREE PROGRAM

- Bachelor's Degree in Translation
- Bachelor's Degree in Social Sciences and Health Management

2. MASTER'S PROGRAM

- Master's Degree in Corporate and Institutional Communication
- Master's degree in Translation Studies
- Master's Degree in Clinical Psychology and Psychotherapy
- Master's Degree in Applied Foreign Languages (LEA): Intelligence and Ecosystems
- Innovators in Europe (Double degree program with the University of Strasbourg)

3. DOCTORAL PROGRAM

The top graduates of the Master's program are admitted to the doctoral program at UEMF or a partner university, receiving a monthly stipend. Research in the humanities and social sciences focuses on eight main themes:

- Heritage and heritage-making in Euro-Mediterranean societies;
- Mobility in the Euro-Mediterranean area;
- Euro-Mediterranean cities and societies;
- The Shattered Museum, a new approach to heritage mediation;
- Teaching Spanish as a foreign language;
- Language teaching and interculturality;
- A chair in "Human Rights" in partnership with the CNDH;
- Social sciences applied to environmental management

Research, Innovation & Entrepreneurship

Research topics - Doctoral cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 16 has been identified. This work focuses in particular on governance, transparency, law, justice, peace, security, public institutions, citizen participation, and conflict management.

The table below presents the main research topics contributing to this objective.

Thesis Subject	related SDGs
Water Governance for Development in Morocco. The Implementation of IWRM (Integrated Water Resources Management) as a Public Action Modality	SDG 16
NLP-Based Detection of Insider Threats and Prevention of Data Breaches	SDG 16
The Transfer of a Company in Difficulty Under Comparative French and Tunisian Law	SDG 16
The Dynamics of Mediterranean Relations in the Face of the Strategic Challenges of Our Time: Co-Development, Interculturality and Security	SDG 16
Debt Restructuring Under Moroccan Law in the Light of French Law	SDG 16
From Traditional Democracy to Digital Governance in Moroccan Public Administration Issue of Transparency and Citizen Participation	SDG 16
The Role of Internal Auditing in Strengthening Governance, Transparency, and Academic Performance in Moroccan Universities	SDG 16
Morocco's Country Brand: Supporting the Country's Sovereignty and Creating Economic Opportunities Through Digital Content Production, International Digital Influencers and Targeting International Digital Audiences	SDG 16
The Protection of Category Interests Following the Sale of a Company in Difficulty Under Comparative French and OHADA Law	SDG 16
The Impact of Collective Proceedings on Debt Collection Litigation Under OHADA Law	SDG 16
Civilization, Culture, and Religion in Perceptions Between East and West: Analysis of Identity Constructions in the Digital Age	SDG 16
Migration Governance in Africa in the Light of the Partnership with the European Union: Towards a North-South Co-Development Dynamic	SDG 16
Digital, Electronic Acts and Their Impact on Notarial Practice and Authentic Instruments: A Comparative Law Study Between Morocco and France	SDG 16
Secured Debts in Collective Proceedings: A Comparative Analysis of French and OHADA Law	SDG 16
Morocco's Accession to the Organization for the Harmonization of Business Law in Africa (OHADA): Realities, Challenges, and Prospects	SDG 16

Thesis Subject	related SDGs
A Study and Conception of an Optimized and Secure Routing Protocol for IoT Platforms using Artificial Intelligence Algorithm	SDG 16
Leveraging Large Language Models for Enhanced Intrusion Detection Systems	SDG 16
Plurality, Migration, and Intercultural Policy in the Euro-Mediterranean and African Space	SDG 16
Equity financing in the OHADA area: a comparative analysis of French, Luxembourg and Mauritian law	SDG 16
Governance and regulatory challenges related to digital technologies in the context of peace and conflict	SDG 16
Impact of new technologies (social networks, artificial intelligence) on conflict management	SDG 16
World order and international organizations facing conflicts and humanitarian crises: an analysis of their effectiveness and limitations in the current international context	SDG 16
Universal transfer of assets in company mergers under Moroccan law	SDG 16
The challenges of peace and security in the Sahel and their geopolitical and economic impacts	SDG 16
The Impact of Climate Change on Migration and Regional Conflicts	SDG 16
Media and Societies: What Impact on Governance Systems in Africa and the Mediterranean	SDG 16
Media and University in Africa: What governance for What Results?	SDG 16

Events

Academic events

Arbitration Market: Lecture by Professor Walid BEN HAMIDA

The Euro-Mediterranean University of Fez (UEMF) was honored to host Professor Walid Ben Hamida for a high-level lecture on "The Arbitration Market," reflecting its commitment to promoting intellectual openness and academic dialogue. During his presentation, he offered an in-depth analysis of the legal foundations, economic mechanisms, and strategic challenges of arbitration in a globalized context. Rich in examples and comparative perspectives, his presentation enabled students to gain a comprehensive understanding of the subject. The interactive discussions further strengthened their critical thinking skills. The UEMF expressed its sincere gratitude for the quality and scope of this presentation.

Roundtable: Rethinking the question of the State

Thinking about the State means questioning one of the oldest and most complex human constructs. It was to this exercise that Professor Mohamed El Maazouz, a political anthropologist, devoted himself during a round table bearing the title of his latest work, "On the State," organized jointly by the United Nations Chair – Alliance of Civilizations and the ICESCO Chair "Arts, Societies and Civilizations."

Through a historical, philosophical and anthropological approach, Professor El Maazouz revisited the genesis and metamorphoses of the modern state, questioning its relevance in the era of contemporary upheavals: globalization of flows, recomposition of politics and transformations of living together.

This exchange, rich in perspectives and nuances, offered a space for fruitful dialogue between researchers and students around a central question: how to rethink the State in light of the changes in our societies and the challenges of the globalized world, and consider its resilience in the face of contemporary upheavals?

A moment of high intellectual caliber, illustrating the commitment of the two organizing chairs to dialogue between civilizations, critical thinking and the promotion of knowledge as a vector of unity and mutual understanding.

Plato and Civic Ethics: A lecture by Dr. Rachid Achachi

Continuing its series of lectures, the University organised a meeting led by Professor Rachid Achachi, dedicated to the contribution of Platonic thought to reflection on civic ethics.

Based on a reinterpretation of Plato's writings, the presentation addressed essential themes such as justice, shared responsibility, and the role of the citizen in the structuring of the city-state. The analysis transcended the historical framework of this philosophy to demonstrate its relevance to contemporary social and civic challenges.

Professor Rachid Achachi emphasized that civic ethics, far from being an imposed norm, is forged through education, intellectual inquiry, and the active involvement of citizens. This perspective paves the way for a dynamic understanding of philosophy, viewed as a catalyst for reflection and engagement.

The meeting concluded with an interactive exchange with the public, marked by the diversity of contributions and the quality of discussions, demonstrating the interest shown in this topic by the academic community.

Artificial Intelligence and Divine Understanding: A lecture by Professor Dominique Bourg

As part of its lecture series for the 2025-2026 academic year, the Euromed University of Fez organised a conference dedicated to the links between artificial intelligence, human thought and spiritual questioning, offering a space for reflection on contemporary transformations in the relationship to knowledge in the digital age.

Led by Professor Dominique Bourg, philosopher and honorary professor at the University of Lausanne, this presentation offered a philosophical reading of the issues raised by the development of intelligent technologies, addressing the limits of technological rationality as well as the place of humans in the face of current scientific and societal changes.

Through this conference, participants were invited to question the boundaries between human intelligence and artificial intelligence, through reflections on the notion of understanding, the quest for meaning and new forms of understanding the world in a context marked by technological acceleration.

This meeting is part of the UEMF's desire to promote interdisciplinary dialogue and critical thinking, by fostering academic exchanges around major contemporary philosophical, scientific and societal issues.

A new culture to rethink the world: a lecture by Professor Mohamed Zinelabidine

As part of our Conference Series, we had the honor of welcoming Professor Mohamed Zinelabidine, Director of Culture and Communication at ICESCO, for a conference entitled: "A new culture to rethink the world".

Through a dense and inspiring intervention, Mr. Zinelabidine offered an in-depth reading of contemporary cultural changes and the fundamental role of culture in building more conscious, inclusive societies open to dialogue.

The conference highlighted the role of the artist in our societies, the structural, economic, and symbolic challenges they face, and the reasons why it remains difficult today to make a living fully from culture and art. It offered a clear-eyed reflection on the social, institutional, and economic recognition of artistic professions.

In front of an audience of students, researchers and teachers, this meeting opened a space for rich dialogue around culture as a force for thought, engagement and social transformation, reaffirming its central role in the dynamics of human development and intercultural cooperation.

The Philosophy Encounters: the university at the heart of intellectual debate in Fez

From February 9 to 11, 2026, the Euromed University of Fez hosted the 11th edition of the Philosophy Rendez-vous, on the theme "Ambivalence of passions. Where is the world headed?This event, in partnership with the French Institute of Morocco, transformed different spaces in the city into places for reflection and debate, bringing together philosophers, researchers, artists and intellectuals.

Through conferences, workshops, public debates, and readings, the event fostered dialogue between academia and society, promoting critical thinking, understanding of social and cultural transformations, and the development of informed citizens. The Euromed University of Fez reaffirmed its role as an intellectual hub, open to exchange, the dissemination of knowledge, and cultural engagement.

Decade of Excellence: UEMF celebrates its 585 new award winners

The Euromed University of Fez celebrated the graduation of its tenth class, bringing together more than 2,000 people to honor 585 graduates: 267 engineers, 125 architects and designers, and 193 graduates in Business, Law, Political Science, and Humanities and Social Sciences. The ceremony highlighted the students' perseverance, the support of their teachers and families, and the university's commitment to its youth. Academic, diplomatic, and institutional figures were in attendance. In his address, President Professor Mostapha Bousmina encouraged the graduates to transform obstacles into opportunities. The event celebrated not only academic achievement but also the promise of a generation ready to innovate and contribute to progress.

New class graduates in Political Science – Sorbonne-UEMF track

The graduation ceremony for the Bachelor of Political Science, Sorbonne-UEMF track, marked the culmination of a demanding international curriculum, based on academic rigor, commitment and intellectual openness.

The graduates received their diplomas in the presence of their teachers, who had guided them throughout their studies. The ceremony was held in the presence of the Director of the Institute of Legal and Political Sciences at the Euromed University of Fez, Professor Kamal Kajja, as well as Professors Julien Fretel, Bertrand Simon, Philippe Marchesin, Asmae Kasimi, Mounia S., and Marie-Pierre W., who commended the students' dedication, commitment, and perseverance since the beginning of the program.

Welcoming students of different nationalities, this program fully embodies the spirit of the Sorbonne-UEMF partnership, offering a multicultural and demanding education designed to train individuals capable of analyzing and understanding contemporary political issues.

The Euromed University of Fez extends its congratulations to all the award winners and wishes them every success in the continuation of their academic and professional careers.

2025 AFCON: The Euromed University of Fez at the heart of the debate on soft power, identity and governance of African football

On January 5, 2026, the Euromed University of Fez, in partnership with the AFCON Organising Committee, organised a conference-debate entitled "CAN 25: soft power, identity and governance of African football".

Before nearly 600 participants, experts, academics, and institutional leaders discussed the role of the 2025 Africa Cup of Nations (AFCON) as a catalyst for international influence, African cooperation, and the sustainable development of sports infrastructure. Discussions also addressed the ethical and governance challenges facing African football.

Through this initiative, the UEMF confirms its role as an academic platform for strategic reflection on major contemporary sporting issues and on the future of African football.

Ibn Khaldun: A foundational thought at the crossroads of disciplines

As part of its lecture series for the 2025–2026 academic year, the Euromed University of Fez organized a conference entitled “Ibn Khaldun, an unclassifiable thinker”, led by Professor Abdessalam Cheddadi, professor and researcher in philosophy at the Institute of Scientific Research of the University of Rabat.

This presentation allowed participants to explore the richness of Ibn Khaldun's work, whose thought lies at the crossroads of history, sociology, and philosophy. Considered one of the forerunners of the social sciences, he offered an innovative analysis of the dynamics of societies, power structures, and the cycles of civilizations.

The conference also highlighted the contemporary relevance of his work, whose concepts continue to inform current social and political changes, attesting to the universal dimension of his intellectual legacy.

Marked by lively exchanges, this meeting provided a space for reflection on the foundations of Khaldunian thought and its lasting influence in the field of human and social sciences.

Through this series of conferences, the UEMF continues its commitment to the dissemination of knowledge, academic dialogue and intellectual openness, by proposing themes situated at the crossroads of disciplines.

Aesthetics, domination, and artificial intelligence: rethinking the power of images in the contemporary era

Aesthetics, domination, and artificial intelligence: rethinking the power of images in the contemporary era. As part of our lecture series for the current academic year, we organized a conference entitled "The notion of aesthetics and domination, from the 7th art to AI," led by Professor Fouad Souiba, writer and director.

In this presentation, Professor Fouad Souiba offered an in-depth reflection on the close links between aesthetics, representation, and power relations, tracing their evolution from classical cinematic language to new forms of expression shaped by artificial intelligence. Drawing on references from the world of film and contemporary digital transformations, he demonstrated how images are not limited to an artistic dimension, but constitute genuine tools of influence, capable of structuring collective imaginations, shaping perceptions, and sometimes reproducing or challenging forms of domination.

The conference also explored the profound changes brought about by AI in the processes of image creation, dissemination, and reception, thus opening up a discussion on the ethical, cultural, and societal issues related to these new technologies. Rich in exchanges and perspectives, this meeting examined the evolving ways we see in the digital age, highlighting the structuring role of images in contemporary dynamics.

Euro-Mediterranean dialogue and youth engagement for a sustainable future

During Kaja Kallas' official visit to the Euromed University of Fez, a conference and interactive exchange were organized for students of various nationalities. This meeting addressed several key themes related to international security, regional stability, Euro-Mediterranean dialogue, and the central role of youth in building a sustainable and inclusive future.

The discussions highlighted the importance of education, international cooperation, and civic engagement in promoting peace and sustainable development. Through this initiative, the UEMF strengthened its role as a space for intercultural dialogue and strategic reflection, while also promoting the active participation of young people in global transformation.

Changing our perspective on disability: towards an inclusive and equitable university.

As part of our Conference Series, the Euromed University of Fez organized a conference entitled: "Changing perspectives on disability: the inclusive university, a lever for equity and excellence", led by Dr. Khalid Benhassan and Professor Hajjoui Abderrazak.

Through this meeting, the speakers offered an in-depth reflection on the challenges of inclusion in higher education, highlighting the central role of the university in promoting equal opportunities and valuing all talents.

Drawing on their expertise in public health, rehabilitation and support for people with disabilities, they emphasized the need to move beyond traditional approaches to build more accessible, inclusive and tailored academic environments that reflect the realities of each individual.

The conference also provided an opportunity to examine perceptions of disability, inviting a renewed perspective based on inclusion, dignity and recognition of abilities, rather than limitations.

Rich in exchanges and perspectives, this meeting highlighted the importance of placing inclusion at the heart of university policies, as a lever for equity, but also as a factor of excellence and social transformation.

Morocco, the challenge of power: Mr. Abdelmalek Alaoui tells us more at the UEMF

As part of its mission to promote academic excellence, intellectual dialogue, and engagement with major contemporary issues, the Euromed University of Fez (UEMF) organized a discussion and debate around the book "Morocco, the Challenge of Power" by Abdelmalek Alaoui, a Moroccan essayist and economist. Moderated by Professor Taoufik Ouazzani Chahdi, Advisor to the University President, this scientific and cultural event brought together students, faculty, administrative staff, and members of the university community for a forum for exchange and reflection on the economic, geopolitical, and strategic transformations of the Kingdom of Morocco.

During this meeting, the author presented the main themes developed in his book, including Morocco's historical evolution since independence, the structural reforms that have shaped its development, the dynamics of economic and diplomatic openness, and the challenges related to competitiveness, sovereignty, innovation, and integration within a rapidly changing international environment. The discussions allowed for an analysis of the factors that have contributed to the country's institutional stability, its resilience in the face of crises, and its growing prominence on the regional and international stage.

The event provided a unique opportunity for students to compare their academic knowledge with the experience of a recognized expert, while simultaneously developing their critical thinking, analytical skills, and understanding of the strategic issues shaping Morocco's future. The discussions also raised awareness of governance, sustainable development, innovation, leadership, and responsible citizenship.

Youth Debatethe UEMF: to consider the link between the individual and collective ethics in Moroccan society

As part of its mission to promote academic dialogue, citizenship, and youth engagement on major societal issues, the Euromed University of Fez (UEMF) organized the EUROMED Youth Debate on the theme: "Individual and Collective Ethics in Morocco: What Correlation for What Societal Project?" This event brought together students from the Faculty of Humanities and Social Sciences (FSHS), the Euromed Business School (EBS), and the Institute of Legal and Political Sciences (ISJP) to foster critical reflection and discussion on the challenges of living together, citizenship, and collective responsibility.

Through a series of thematic panels, participants analyzed the relationship between individual behaviors and collective values in contemporary Moroccan society. The discussions explored notions of citizenship, freedom, social cohesion, public order, and individual responsibility, while also considering the social, economic, and cultural transformations that influence behaviors within the community.

The discussions also focused on factors that could strengthen collective ethics, civic engagement, and mechanisms that promote greater social cohesion. Students were invited to suggest avenues for reflection and solutions aimed at promoting respect for shared values, civic participation, and the development of a more inclusive and equitable society.

Final Year Project (FYP) defenses of the 2nd cohort of the Master's program "Conflict Management and Alliance of Civilizations"

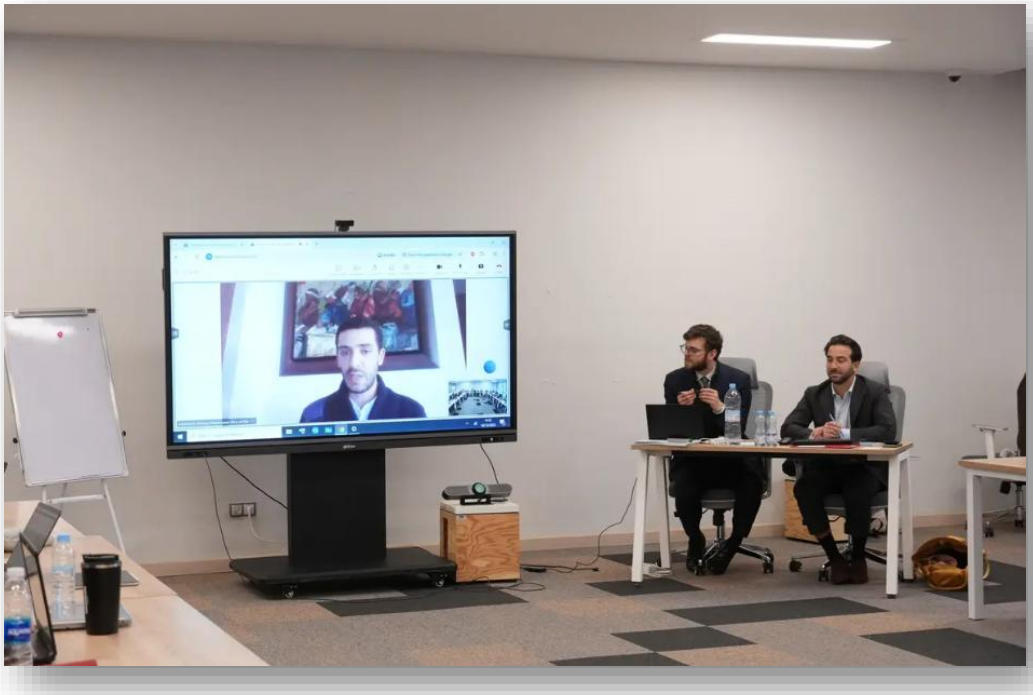

Final Year Project (FYP) defenses of the 2nd cohort of the Master's program "Conflict Management and Alliance of Civilizations", at the Euromed University of Fez. A decisive step for our students, future experts in intercultural dialogue and diplomacy, who present the fruit of two years of academic and professional commitment.

This master's program is:

- Supervised by the United Nations Chair for the Alliance of Civilizations
- Awarded by UNAoCF! Congratulations to the students for the quality of their work and their exemplary commitment!

Scientific seminars & conferences

Practical seminar on CSR and Compliance at the Euromed University of Fez

On December 17 and 18, 2025, the Euromed University of Fez organized a practical seminar dedicated to Corporate Social Responsibility (CSR) and Compliance, in partnership with the University of Paris 1 Panthéon-Sorbonne and the international firm Hughes Hubbard & Reed LLP.

For two days, students, teachers, and professionals exchanged ideas on governance issues, the fight against fraud and corruption, and the practical implementation of CSR in business. The sessions combined expert presentations, feedback from experience, and practical case studies, while also raising students' awareness of the principles of the United Nations Global Compact.

This seminar illustrates UEMF's commitment to providing training aligned with international standards and professional realities in ethics and governance.

Rihab Forum: Rethinking the City at UEMF

The Euromed University of Fez welcomed Professor Pascal Le Brun-Cordier, associate professor at the Sorbonne School of Arts and co-founder of the Cultural Urbanism Movement, for a conference entitled "The Gold of Links: How to Breathe More Life into Our Cities".

Organized as part of the first Rihab Forum, this meeting provided a space for reflection on the role of human connections in the vitality of contemporary cities. The Professor emphasized the importance of designing urban spaces as places of conviviality, creativity, and solidarity, capable of strengthening community life and encouraging civic participation.

For students of the School of Architecture, Design and Urbanism (EMADU), this conference was a privileged opportunity to explore new approaches to urbanism, integrating culture and emotion as essential levers of a more humane and vibrant city.

The discussions allowed for the exploration of concepts such as the relational city and cultural urbanism, highlighting the role of the social and artistic dimension in shaping the territories of tomorrow.

Third Summit of Young Africans and Euro-Mediterraneans of the Euromed University of Fez: Headquarters of the Academy of the Kingdom, Rabat, January 19, 2026

The Euromed University of Fez organised, under the supervision of the United Nations Chair for the Alliance of Civilisations and in partnership with the Academy of the Kingdom of Morocco and the Hassan II Academy of Sciences and Techniques, the third Summit of African and Euro-Mediterranean Youth on January 19, 2026 in Rabat.

Dedicated to civic engagement and the pluralism of values, the event brought together young people from over 40 nationalities, experts, and Moroccan and international institutional leaders. Discussions focused on citizenship, living together, solidarity, diversity, values education, and contemporary challenges, particularly in the age of hyperconnectivity.

Organised in the form of plenary sessions, the summit concluded with recommendations formulated by the students, giving rise to the UEMF's "Call for the Future", in favour of strengthened civic engagement and a more harmonious society.

Trade secrets at the heart of the Franco-Moroccan dialogue

The Euromed University of Fez organized a study day dedicated to trade secrets, in partnership with the Henri Capitant Association and the Sorbonne Law School's Moroccan branch. Led by Professor Valérie Malabat (University of Bordeaux) and Professor François-Xavier Lucas, the event brought together academic and professional experts to discuss the legal and economic challenges related to the protection of strategic information.

Structured around three roundtables focusing on the legal foundations, practical challenges for businesses, and litigation aspects, this meeting provided a deeper understanding of the trade secret protection framework. Students in the Sorbonne-UEMF Master's program in Business Law benefited from enriching discussions based on comparative and international perspectives.

This initiative is part of Franco-Moroccan academic cooperation and illustrates the UEMF's commitment to providing excellent legal training that is open to international issues and economic realities.

Franco-Brazilian Restructuring Days: Expertise and International Cooperation at the UEMF

Three days of expertise, dialogue and international cooperation within the UEMF.

The University hosted the Franco-Brazilian Restructuring Days this week, a major event organized by the Sorbonne Law School at UEMF. This meeting brought together professors, judges, researchers and practitioners to discuss contemporary issues of restructuring and insolvency from a comparative perspective.

Throughout the sessions and roundtables, participants analyzed the outcomes of insolvency proceedings in France and Brazil, the safeguard and recovery plan mechanisms, and the role and rights of shareholders in difficulty. These fruitful discussions highlighted the diversity of legal approaches and the challenges common to both systems.

This edition was also marked by a highlight: the visit to the Al-Qaraouiyine Library, considered the oldest in the world. A powerful symbol of the link between history, knowledge, and innovation, perfectly aligned with the Euro-Mediterranean and African mission of the UEMF.

The Restructuring Days concluded with a summary roundtable discussion, allowing for the identification of common perspectives and the strengthening of academic collaborations between France, Brazil, and Morocco. This was followed by the presentation of certificates to participants and the graduation ceremony for students of the Sorbonne-UEMF Master's program in Business Law.

Arbitration Colloquium Arab Countries & OHADA: launch of the first day at the UEMF.

This morning, we launched the 1st edition of the Arbitration Colloquium between Arab Countries and OHADA, organized by the Sorbonne Law School – UEMF, in partnership with theHenri Capitant Association.

This first day marks the beginning of two days of discussions bringing together practitioners, academics and renowned experts, around the major issues of international arbitration in Arab countries and the OHADA zone.

This symposium stands out as a true space for dialogue and sharing, promoting the confrontation of expertise and the strengthening of bridges between Arab and African legal cultures.

We thank all the speakers, participants and partners for their commitment and contribution to the success of this first day.

At the Euromed University of Fez, the "Mediterranean 2026" Prizes recognize figures committed to peace, dialogue and humanism.

As part of the Euromed University of Fez meetings on the Alliance of Civilizations, the "Mediterranean 2026" Awards ceremony honored individuals and institutions committed to peace, intercultural dialogue, international cooperation, and human development. Organized around the theme of artificial intelligence and the future of human civilization, the ceremony highlighted the importance of technological progress grounded in ethical, humanist, and solidarity-based values.

The awards recognized initiatives that contribute to bringing people closer together, promoting moderation, sharing knowledge, and developing an inclusive and sustainable vision of international relations. Through this event, the UEMF reaffirms its role as an academic and cultural space that fosters dialogue between civilizations, reflection on major contemporary challenges, and the building of a future based on peace, cooperation, and responsible innovation.

Introductory seminar on Nudge: an exploration of the mechanisms at the heart of decision-making

Yesterday, we organised a seminar dedicated to the introduction of Nudge, bringing together students, teachers and participants around the contributions of behavioural sciences in understanding and guiding individual and collective decisions.

Hosted by Adil GazaliAhmed DahhoukiYacoub Diftar, ProfessorMohcine ZouakImane Elhadart, this seminar allowed us to explore the cognitive foundations, behavioral biases and mechanisms that influence our choices, putting their applications into perspective in various contexts.

Discussions focused in particular on the integration of Nudge into public services, the training of engineers and the challenges of sustainable mobility, illustrating the potential of these approaches to design more effective policies and solutions, in line with the real behaviors of individuals.

A true space for reflection and dialogue, this seminar gave rise to enriching discussions, promoting the cross-fertilization of expertise and a better understanding of the interactions between science, engineering and public action.

An academic event that is fully in line with the UEMF's dynamic, aiming to promote innovative and interdisciplinary approaches to contemporary challenges.

At the UEMF, the 4e The Fes Restructuring Days edition brings together the leading voices of the sector

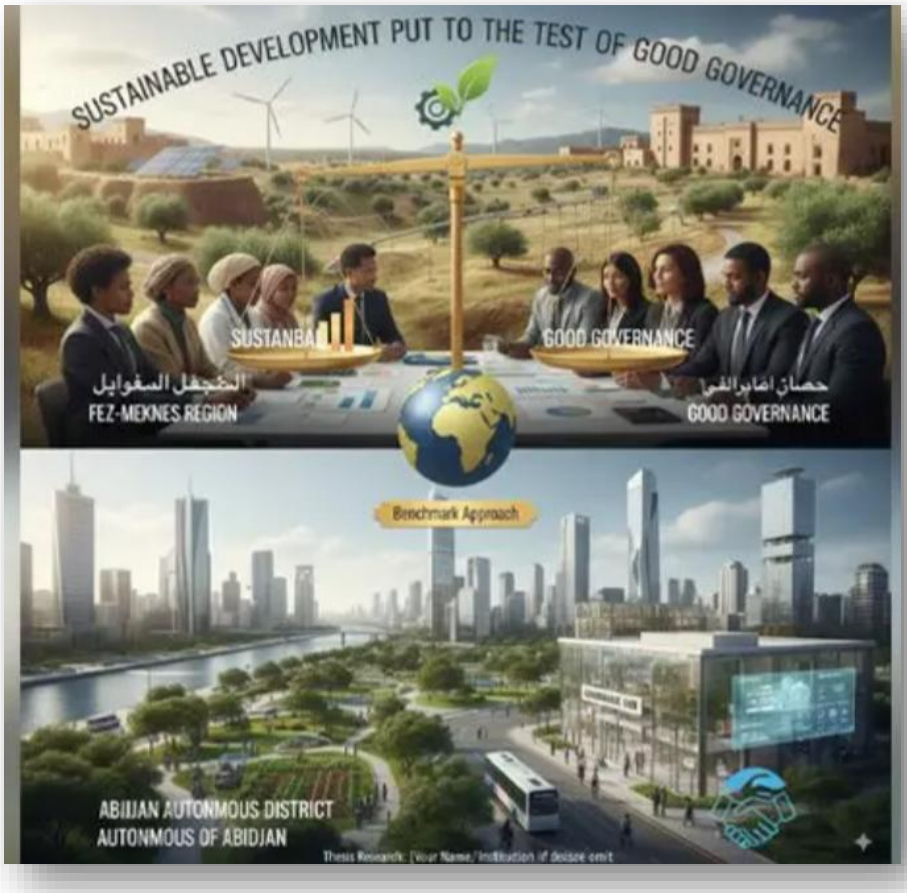

The Euromed University of Fez organized the 4th e eJournal editionees Restructuring of Fes, aeveinternational meeting dedicatedetoedevelopments in the law of companies in difficulty and modern restructuring mechanisms. Organised in partnership with the Sorbonne Law School, this meeting brought together more than 300 participants from Europe and Africa, including judges, lawyers, experts, researchers, students and professionals from the legal and economic sector.

Over two days, discussions focused on several themes related to cross-border restructuring, mechanisms for preventing business difficulties, governance, and new legal and economic resilience frameworks. The event also fostered dialogue between academic approaches and professional practices on an international scale.

Through this initiative, the UEMF confirms its commitment to academic excellence, international cooperation and the development of spaces for reflection on major contemporary legal and economic transformations.

Doctoral activities

Doctoral Thesis Defense in "Governance and Development" by Ms. Adjoba Audrey Paule N'ZE

This thesis examines institutional factors that explain differences in implementing the SDGs across territories, especially in Africa. It argues that sustainable development effectiveness depends more on local governance frameworks than on adopting universal standards.

After a literature review and bibliometric study, three key factors are identified: national institutional architecture, multi-stakeholder governance mechanisms, and the need for a multi-scalar approach. A theoretical framework based on regulation theory explains how institutional complementarity creates historical dependencies shaping governance.

Two case studies (Fez-Meknes region in Morocco and the Autonomous District of Abidjan in Côte d'Ivoire) reveal very different governance, financing, and intervention models. A qualitative analysis grid compares practices and shows that institutional logic and local power relations determine territorial trajectories more than compliance with master plans.

Cultural activities

Yennayer at the UEMF: a vibrant celebration of traditions and community

On the occasion of Yennayer, the campus of the Euromed University of Fez came alive to the rhythm of Amazigh traditions, celebrating a living culture deeply rooted in sharing and diversity.
Throughout the day, art, food, and music filled the university spaces, offering the university community a vibrant and emotionally rich experience. Artistic performances, cultural expressions, and convivial moments fostered a dialogue between heritage and modernity in a festive and inclusive atmosphere.
More than just an event, Yennayer at UEMF was a true time of gathering, highlighting the values of community, transmission and openness that enrich life on campus.
A memorable day, marked by culture, creativity and community spirit.

A memorable final experienced collectively on our Eco-campus

During the Arab Cup 2025 final between Morocco and Jordan, the university's eco-campus was the setting for a powerful moment of gathering and sharing. Students, faculty, and administrative staff came together to watch this decisive match in an atmosphere filled with enthusiasm and conviviality.

Throughout the match, the emotion was palpable: every action, every goal sparked passionate reactions, reflecting the deep attachment of the university community to the Moroccan national team. This collective mobilization made the final a true highlight of campus life, strengthening the bonds between the different components of the university.

Morocco's victory, following an intense and thrilling final, sparked a spontaneous and unifying celebration. This moment of shared joy exemplified the values of cohesion, solidarity, and collective pride that drive our institution. Beyond the sporting result, this event underscored the campus's role as a space for living, exchanging ideas, and building an engaged and united community around meaningful experiences.

End-of-year celebration: a dinner of sharing and conviviality

As part of its commitment to fostering community and intercultural dialogue, the Euromed University of Fez organized an end-of-year dinner for its international staff. This gathering celebrated the values of diversity, respect, and cohesion that underpin the University's identity, while also providing a special setting for conversation, laughter, and convivial moments.

The academic and administrative staff, accompanied by their families, shared a unique moment around a communal table. The evening was enlivened by enriching discussions, moments of dancing and lightheartedness, perfectly illustrating the spirit of community and cultural richness that characterize the UEMF campus.

Through this initiative, the Euromed University of Fez reaffirms its commitment to an inclusive and supportive community, where sharing and exchanges contribute to strengthening human ties and the sense of belonging.

A moment of sharing, celebration and conviviality at the heart of the UEMF

To mark the holy month of Ramadan, the Euromed University of Fez organized a convivial iftar, bringing together members of its university community in a warm and unifying atmosphere. This event also coincided with International Women's Day, providing a wonderful opportunity to celebrate the women of UEMF, recognizing their commitment, contributions, and essential role within our academic ecosystem.

In an atmosphere of sharing, kindness and conviviality, the academic and administrative staff came together for a special moment, illustrating the spirit of solidarity and human values that drive the UEMF family.

Beyond a simple iftar, this meeting reflects the UEMF's commitment to strengthening ties within its community and to celebrating meaningful moments at the crossroads of our cultural, social and human values.

UEMF's Got Talent: a 6ᵉan edition dedicated to talent, creativity and emotion

The Euromed University of Fez vibrated to the rhythm of the 6thᵉedition of UEMF's Got Talent, an event that has become an essential part of student life and celebrates creativity, the diversity of artistic expressions and the talents of its university community.
Bringing together numerous participants and an enthusiastic audience, this latest edition offered an evening rich in emotion and captivating performances. Singing, dancing, stage performances, artistic displays, and creative demonstrations followed one another on stage, revealing the breadth of talent within the University. Each participant shared their unique world, their passion, and their energy, contributing to making this event a true moment of celebration and conviviality. Through this initiative, UEMF reaffirms its commitment to encouraging the personal development of its students and promoting a university environment where artistic expression plays a vital role. Far more than a competition, UEMF's Got Talent provides a special space for students to express their creativity, develop their self-confidence, and showcase their passions.
This 6ᵉThis edition was also marked by the quality and diversity of the services offered, illustrating the cultural and human richness that characterizes the community of the Euromed University of Fez.
Following the performances, three participants particularly distinguished themselves and were rewarded for their contributions:

🥇Gabrielle EBABU 🥈Benjamin CHIZUE 🥉Sara ALAMI
The Euromed University of Fez extends its congratulations to the winners and all participants for their commitment, creativity, and contribution to the success of this evening. This latest edition confirms, once again, that talent flourishes in all its forms at UEMF.

Sports activities

The Mini Africa Cup of Nations in Fez: three days dedicated to sport and community spirit

The Euromed University of Fez hosted a football tournament bringing together sixteen teams from several African countries, in collaboration with the Fez-Meknes Regional Football League and CESAM Fez. Organized over several days, the competition took place in a spirit of commitment, respect, and fair play, fostering exchange and closer ties among the participants.

The matches, supported by an enthusiastic crowd, highlighted collective discipline, the quality of play, and the players' commitment. Equatorial Guinea won the final against Chad, while the Moroccan team secured third place.

Through this initiative, the UEMF confirms its commitment to sport as a lever for cohesion, cultural openness and dynamism within university life.

1re UEMF Open Taekwondo edition: sport, discipline and commitment

The Euromed University of Fez organised the first edition of the UEMF Taekwondo Open, in partnership with the Royal Moroccan Taekwondo Federation and the Fez-Meknes Regional Taekwondo League.

Conceived as a highlight of meeting and sharing, this event brought together athletes around fights and sporting demonstrations, in a structured framework where rigor, discipline and commitment were expressed in respect of the rules and values of taekwondo.

The day concluded with medal ceremonies, celebrating the investment, determination and quality of performance of the participants, and recalling the essential role of sport in building pathways based on excellence, respect and civic engagement.

Through the organization of this first edition, the UEMF reaffirms its commitment to the development of university sports activities, while consolidating its position as an actor involved in the sporting dynamic at the national level.

National spirit, sport and youth: our campus proudly celebrated the 50th anniversary of the Green March

On November 6th, the Euromed Sports Center hosted a sports day combining mixed water polo and a men's basketball tournament, bringing together our students and junior teams from FAS, MAS, and USF. A competitive and dynamic atmosphere that reflects the commitment of our youth.

On the court, our students shone: a semi-final victory against FAS (47–30) and an intense final win against MAS (45–40). With over 80 participants, the event highlighted the commitment of our young athletes, the quality of play, and the excellent synergy between the teams.

Beyond the results, this day was a true moment of unity and patriotism, bringing together students, coaches, and officials around the values of solidarity and national pride. A memorable event that will remain etched in the sporting history of our campus.

Heading towards the 4th edition of the Open Para-Karate Kata Fes at the UEMF.

The UEMF was pleased to host the fourth edition of the Open Para-Karate Kata Fes, organised by the Mohammed VI Foundation for Persons with Disabilities, in a dynamic of promoting inclusive sport and the values of self-improvement.

In an atmosphere marked by respect, discipline, and determination, theEuromed Sports CenterThe atmosphere came alive with demonstrations from these young athletes who came from all corners of the Kingdom. Through their performances, they powerfully embodied the values of karate, combining mastery, perseverance, and commitment.

Beyond the competition, this event was a powerful moment for raising awareness, highlighting the role of sport as a lever for inclusion, personal development and social cohesion.

We extend our sincere thanks to all the supervisors, chaperones, referees, volunteers, and participating delegations for their commitment and contribution to the success of this edition.

Through this initiative, the UEMF reaffirms its commitment to inclusion, diversity and sport for all, by offering an environment conducive to the expression of talents and the promotion of inspiring journeys.

Diplomatic institutional visit

UEMF–EMUNI Conference at the European Parliament: Higher education at the heart of Euro-Mediterranean cooperation

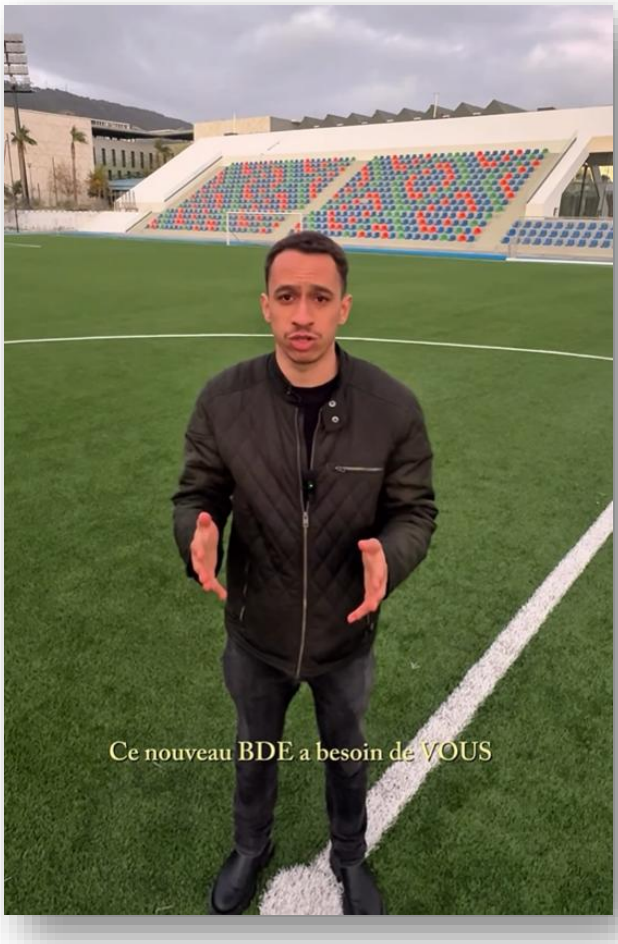

On December 11, 2025, the Euromed University of Fez and EMUNI organised the "Bridging Continents" conference at the European Parliament in Brussels, highlighting the strategic role of universities in Euro-Mediterranean cooperation.

The event highlighted the co-creation of programs, joint degree programs and two-way mobility of students and teacher-researchers, as well as the importance of strengthening existing institutions (UEMF, EMUNI, UNIMED, TETHYS) to support applied research, innovation, technology transfer and scientific valorization.

The conference brought together academics, representatives of the European Commission, the Union for the Mediterranean, ambassadors and political decision-makers, confirming that the challenges of the Euro-Mediterranean area require joint and partnership action between the North and the South to promote innovation, scientific cooperation and sustainable development.

Student events

UEMF Welcomes its New Student Union

A new chapter begins at Euromed University of Fez with the creation of the Student Union. Presented in a recent video on the university's Instagram account, this union is founded on the values of unity, solidarity, and commitment. Supported by all the student clubs, its ambition is to restore students' confidence, take concrete action, and revitalize student life, making participation and cohesion the cornerstones of university life.

Distribution of flowers and messages to the teachers

On October 5, 2025, for World Teachers' Day, the University's Hands Club organized a wonderful initiative to celebrate and honor the role of teachers. Students had the opportunity to express their appreciation and gratitude by offering flowers accompanied by positive messages to their professors. This symbolic action aimed to highlight the importance of teachers' roles, not only in the transmission of academic knowledge but also in the human and personal development of students. Through this initiative, the Hands Club helped strengthen the bonds between teachers and students while emphasizing the essential impact of education in building a supportive and respectful university community.

Blood Donation Campaign – Rotaract Club

The Rotaract Club organized a two-day blood donation campaign on the university campus, with the aim of raising awareness within the academic community about the importance of blood donation and making a concrete contribution to saving lives.

This act of solidarity mobilized a large number of students, teachers, and administrative staff, all united around a vital humanitarian cause. In collaboration with qualified medical teams, a dedicated space was set up to ensure a warm welcome for donors and strict adherence to hygiene and safety standards.

Beyond the blood drive, this initiative promoted the values of solidarity, social responsibility, and civic engagement within the university community. It also strengthened the spirit of cohesion and cooperation among the various stakeholders on campus, demonstrating the positive impact that collective action can have in service of society.

Creative Outing - Crafty Fall Themed Picnic

Organised in Ifrane, more precisely at the natural site of Aïn Vittel, this outdoor activity was part of a dynamic of strengthening the links between the members of the club, while promoting creativity in the open air.

Taking advantage of the autumn season and its inspiring natural setting, the club organized a creative, autumn-themed picnic, combining relaxation, art, and conviviality. The main objective was to foster group cohesion through an immersive experience, far removed from the usual academic environment.

In a warm and peaceful atmosphere, participants took part in various craft and artistic activities such as drawing, crocheting, and other hands-on crafts, directly in contact with nature. This time allowed everyone to freely express their creativity, while sharing moments of exchange and connection.

Beyond the artistic aspect, this initiative contributed to the well-being of the members, strengthening team spirit and consolidating human relationships within the club in a natural environment conducive to inspiration and rejuvenation.

Speed debating – ORATIO

The ORATIO Club organised a Speed Debating session at Euromed University, offering members a dynamic and stimulating experience based on the Oxford style debate format.

During this activity, participants took part in rapid-fire debates, alternating between defending and opposing the same topic. This demanding format encouraged responsiveness, argumentation skills, and the ability to adapt to differing viewpoints, while fostering constant interaction among the participants.

Beyond the oral presentation skills, this session aimed to develop critical thinking, open-mindedness, and self-confidence. It allowed members to improve their communication skills, structure their ideas effectively, and learn to defend a position rigorously and respectfully within an enriching and collaborative academic environment.

Meet the alumni of EPS – Club GENIUS

The Alumni Meet was a powerful moment of sharing, inspiration, and knowledge transfer within the club. This gathering created a genuine intergenerational bridge between current members and alumni of the Euromed University of Fez (UEMF), who are now fully integrated into the professional world.

In this first episode dedicated to EPS graduates, the speakers shared their academic journeys, professional experiences, and the challenges they faced after graduation. Through authentic and inspiring stories, they offered practical advice on career guidance, preparing for the job market, skills development, and the importance of networking.

Beyond a simple exchange, this event is part of the Create. Enhance. Sustain vision:

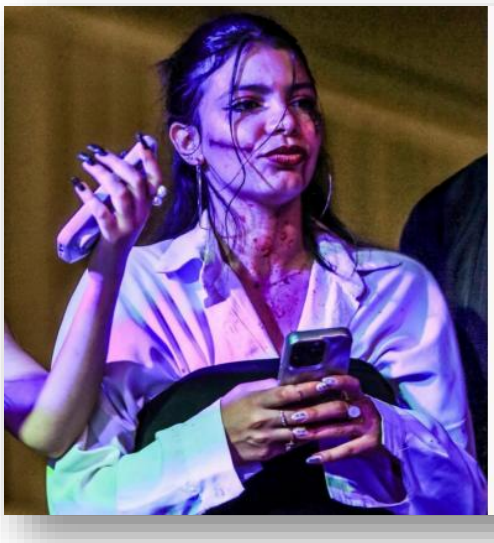

Create: to create opportunities for dialogue and mentoring,

Enhance: to strengthen students' ambitions and skills,

Sustain: to maintain a lasting link between the university and its community of alumni.

This initiative has thus strengthened the sense of belonging to UEMF while motivating students to actively build their own professional trajectory.

Halloween Party – Elite Club

On November 7, 2025, the Elite Club, in partnership with Neverland Events, organized a Halloween party at the Euromed University of Fez. This festive event offered students a fun-filled break filled with creativity, music, and community spirit. The evening was a great success, drawing over a hundred students who came to enjoy a lively and friendly atmosphere. Performances by DJs MZ and Samado kept the crowd entertained, while Halloween costumes added a fun and original touch. The lighting and sound system contributed to creating an immersive and welcoming ambiance. Through this initiative, the Elite Club aimed to foster cohesion among students, promote well-being on campus, and enrich university life through unifying events. The party was a resounding success, strengthening the sense of community and reaffirming the club's commitment to enriching student life.

ELITE Club Report 25-26

Meet the Laureates – Episode 2: Spotlight on the EIDIA Laureates

The Alumni Meet – Episode 2 was a powerful moment of sharing, inspiration, and knowledge transfer within the club. This meeting created a genuine intergenerational bridge between current members and alumni of the Euromed University of Fez (UEMF), who are now fully integrated into the professional world.

In this second episode dedicated to EIDIA graduates, the speakers shared their academic journeys, professional experiences, and the challenges they faced after graduation. Through authentic and inspiring stories, they offered practical advice on career guidance, preparing for the job market, skills development, and the importance of networking.

Beyond a simple exchange, this event is part of the Create. Enhance. Sustain vision:

- Create: create opportunities for dialogue and mentorship,
- Enhance: strengthen students' ambitions and skills,
- Sustain: maintaining a lasting link between the university and its community of alumni.

This initiative has thus strengthened the sense of belonging to UEMF while motivating students to actively build their own professional trajectory.

Master of Speech Club Finalist at Doc's Mic – FMP Fes (English Section)

The Master of Speech Club participated brilliantly in Doc's Mic – FMP Fès (English Section), an event dedicated to oral expression and the art of speech in English, organized within FMP Fès.

Thanks to their commitment and the quality of their performances, the club members proudly reached the final stage of the competition. This experience allowed them to showcase their public speaking skills, their fluency in English, as well as their creativity and ability to captivate an audience.

Beyond performance, this participation illustrates the club's ongoing commitment to promoting excellence in communication, strengthening self-confidence and developing leadership among its members, thus helping to train students capable of expressing themselves with impact and conviction.

Club Master of Speech Report 25-26

Themed Drawing Workshop: Immersing yourself in the world of Harry Potter

The Crafted Knots club organized a Harry Potter-inspired drawing workshop at the university. Designed with an immersive winter theme, this session offered participants the opportunity to delve into a rich narrative world while developing their artistic skills.

Through the exploration of different techniques and materials—gouache, acrylic, watercolor, and other media—students were able to experiment with composition, color work, and narrative illustration. The workshop encouraged each student to express their creativity, tell a story through images, and refine their personal style.

This activity provided a moment of artistic exchange and discovery, strengthening the creative spirit and individual expression within the university community.

Third Edition of the UEMF Talks: National Eloquence Competition

The Master of Speech Club organized the third edition of UEMF Talks, a national public speaking competition bringing together participants who speak in French, English, and Arabic. The event gathered 72 participants from 12 universities across Morocco, providing a prestigious platform to showcase talent and skills in oral communication.

This competition allowed students to demonstrate their oral fluency, creativity, and ability to persuade an audience in several languages. It also highlighted the importance of public speaking, critical thinking, and self-confidence in personal and academic development.

The UEMF Talks are a highlight for the club, reflecting its commitment to promoting excellence in communication and developing leaders capable of speaking with impact at the national level.

Theatre Workshops: Developing Student Creativity and Expression

The Mémoire en Scène Club organized theatre courses for students, aimed at stimulating their artistic expression, self-confidence and public speaking skills.

Through interpretive exercises and stage performances, participants explore their creativity, develop their sense of rhythm and body expression, while strengthening communication and teamwork.

These workshops offer a fun and educational setting where students can express themselves freely, experience different roles and improve their interpersonal and public speaking skills, thus contributing to their personal and academic development.

Solidarity Iftar – Ramadan 2026

As part of its Ramadan activities, Club Élite organized the "Solidarity Iftar – Ramadan 2026" initiative, aimed at promoting the values of solidarity, sharing, and civic engagement. This initiative involved preparing and distributing 150 iftar meals to people in need.

Made possible through the active mobilization of club members and the involvement of its partners, this initiative provided concrete support to beneficiaries, while strengthening the spirit of mutual aid and social cohesion, particularly significant during the holy month of Ramadan.

Beyond its humanitarian aspect, this action fully illustrates the Elite Club's identity as a committed actor, working towards a positive and lasting social impact. It also demonstrates the club's ability to initiate and lead solidarity projects with strong human value, responding to the needs of communities.

ELITE Club Report 25-26

SDG challenge: from idea to impact

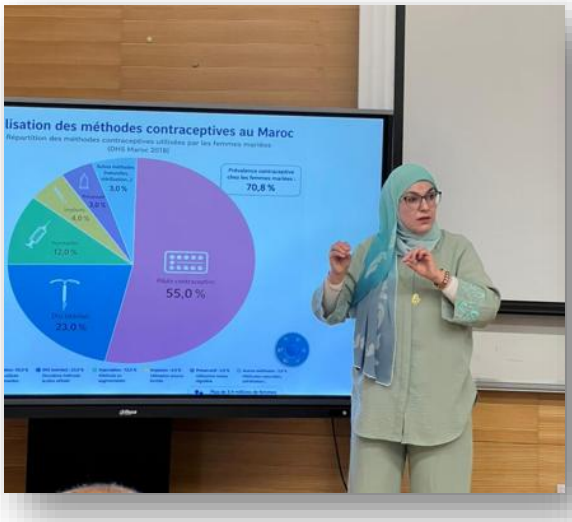

On April 16, 2026, the Elite Club of the Euromed University of Fez organized an inspiring workshop entitled "SDG Challenge: From Idea to Impact," led by Hamid Taghlaoui. The workshop aimed to raise students' awareness of the importance of the Sustainable Development Goals (SDGs) and to encourage them to transform their innovative ideas into projects with concrete impact.

Through interactive discussions, case studies, and practical advice, participants were able to discover the various stages involved in designing, structuring, and developing initiatives with social, environmental, and economic objectives. Mr. Hamid Taghlaoui's presentation also highlighted the role of governance, leadership, and citizen engagement in the success of sustainable projects.

This workshop provided a space for inspiration, reflection and creativity, strengthening the entrepreneurial spirit and commitment of students to more inclusive and sustainable development.

ELITE Club Report 25-26

Sexual and reproductive health: raising awareness for better prevention

On April 23, 2026, the Elite Club of the Euromed University of Fez organized a conference on sexual and reproductive health in partnership with ALCS and the Espace Santé Jeunes Ville Nouvelle Fez. The aim of this event was to raise student awareness of issues related to sexual and reproductive health through an educational, preventative, and participatory approach.

The conference focused primarily on three major themes: sexually transmitted infections (STIs), sex education, and contraception. Speakers emphasized the importance of access to reliable information, prevention, and adopting responsible behaviors to promote the health and well-being of young people.

Through interactive exchanges and enriching discussions, this initiative has created a space for open and constructive dialogue, helping to break taboos around sexual health and raising student awareness of these essential public health issues.

Humanitarian aid in Ksar Jdid: 150 blankets to support rural families

On May 3, 2026, the Elite Club of the Euromed University of Fez organized a humanitarian caravan to Ksar Jdid, in the province of Rissani, as part of its solidarity actions aimed at supporting rural populations and improving their living conditions.

This initiative is part of a local humanitarian approach, driven by values of mutual aid, solidarity, and social commitment. It enabled the distribution of 150 blankets to beneficiary families, helping them cope with the weather and meet their basic daily needs, particularly during cold periods.

Beyond the material aid, this caravan provided a powerful moment of sharing and connection with the residents, strengthening the bonds between the volunteers and the local population. This initiative reflects the Elite Club's commitment to providing concrete solutions to the needs of vulnerable communities and contributing to the improvement of their living conditions.

Through this type of initiative, the Elite Club confirms its long-term commitment to humanitarian action, social development and territorial solidarity.

ELITE Club Report 25-26

A social and educational day for the benefit of the children of the Lalla Amina Center

On Thursday, May 7, 2026, the Elite Club of the Euromed University of Fez, in collaboration with the Directorate of Student Affairs, participated in the organization of a cultural and sporting day for the benefit of the children of the Lalla Amina Center for the Protection of Children.

This solidarity initiative was marked by the distribution of Elite bags containing school supplies, including pencil cases, pens, notebooks and coloring books, in order to support and encourage children in their educational journey.

During the day, the Elite Club also ran an oral hygiene awareness workshop, along with the distribution of toothbrushes and toothpaste. The workshop aimed to educate children about the importance of brushing their teeth and good hygiene practices to maintain their oral health.

Through this social and educational action, the Elite Club reaffirms its commitment to children, education and the promotion of health.

ELITE Club Report 25-26

Humanitarian action in Izlafene: solidarity and support for rural families

As part of the medical and humanitarian caravan organized on May 9, 2026, in Izlafene, the Elite Club of the Euromed University of Fez and the IAA Club of the Faculty of Sciences and Techniques of Fez also carried out a significant humanitarian effort to benefit families in the region. This act of solidarity enabled the distribution of 150 food baskets to beneficiary families, supporting vulnerable populations and contributing to the improvement of their living conditions. In addition, recreational and entertainment activities were organized for children, creating a moment of sharing, joy, and connection with the local community. This initiative reflects the values of mutual aid, solidarity, and civic engagement upheld by both clubs in support of social and human development.

ELITE Club Report 25-26

UEMF's Got Talent: a 6ᵉan edition dedicated to talent, creativity and emotion

As part of its policy to promote student well-being and the development of artistic and creative skills, the Euromed University of Fez (UEMF) organized the 6thᵉThe UEMF's Got Talent edition, a cultural event that has become a key part of university life, brought together students, teachers, and members of the university community to celebrate creativity, cultural diversity, and artistic expression.

Throughout the evening, participants presented a variety of performances showcasing their talents in different areas such as singing, dancing, stage performance, and other forms of artistic expression. This event provided students with a platform to share their passions, develop their self-confidence, improve their communication skills, and strengthen their ability to speak in front of an audience.

Beyond its artistic dimension, UEMF's Got Talent provides a space that fosters inclusion, diversity, and cohesion within the university community. By showcasing individual talents and the cultural richness of students, this event helps strengthen the sense of belonging to the University and promotes an environment that respects the diversity of backgrounds, cultures, and forms of expression.
This initiative illustrates UEMF's commitment to a holistic educational approach that goes beyond the acquisition of academic knowledge to also foster students' personal development, creativity, initiative, and social skills. It thus contributes to creating a stimulating university environment conducive to individual growth and the development of talents.

Partnership

Courtesy visit of H.E. Tomasz Orłowski, Ambassador of Poland, to the UEMF

The Euromed University of Fez was pleased to welcome His Excellency Mr. Tomasz Orłowski, Ambassador of Poland to Morocco, for a courtesy visit.

Received by the President of the UEMF, Prof. Mostapha Bousmina, the Ambassador expressed his joy at being received at a university of international stature, whose multiculturalism constitutes one of the seven fundamental pillars.

During his speech, His Excellency also highlighted the pleasure of visiting Fez, an emblematic city of Moroccan heritage twinned since 1986 with the city of Krakow in Poland, a symbolic twinning between two former university capitals that share a long tradition of openness and intellectual exchange.

During this meeting, several avenues for academic and cultural cooperation were discussed, including student and teacher mobility between the two countries, the development of joint projects in the educational and cultural fields, as well as the possibility of collaborating on themes related to the alliance of civilizations, a strong focus at UEMF, supported by the Chair in Alliance of Civilizations and the RIEMAS Think Tank, dedicated to Euro-Mediterranean and African studies.

Training Plan of the Fes-Meknes Regional Council (CRFM) – Strengthening Administrative and Technical Skills

The UEMF actively participated in the implementation of the 2025 Training Plan of the Fes-Meknes Regional Council (CRFM), aimed at strengthening the administrative and technical skills of the staff of this regional public institution. This process began with an in-depth diagnostic phase conducted in three stages: Phase 1 (May 9, 2025) of meetings with human resources managers, Phase 2 (May 19, 2025) of meetings with directors and department heads, and Phase 3 (May 26-27-30, June 5 and July 22, 2025) of broader interviews with all staff. Based on this diagnosis, a first training module was deployed on Quality Management and the requirements of the ISO 9001:2015 standard, organized on October 9-10 and 16-17, 2025. This intervention demonstrates the UEMF's commitment to strengthening the capacities of regional public institutions for optimized management in accordance with international quality standards.

The Euromed University of Fez and the Cervantes Institute of Fez seal a strategic partnership in service of Euro-Mediterranean intercultural dialogue

In a dynamic of strengthening academic and cultural exchanges between the two shores of the Mediterranean, Euromed University of Fez and Cervantes Institute of Fez have formalized a cooperation agreement marking a new stage in their joint commitment to intercultural dialogue and bringing people closer together.

The signing ceremony took place on Wednesday, May 13th, in the presence of Professor Mostapha Bousmina, President of the Euromed University of Fez, and Mr. Òscar Pujol Riembau, Director of the Cervantes Institute of Fez. The event was also graced by the presence of His Excellency Enrique Ojeda Vila, Ambassador of Spain to Morocco, demonstrating the importance attached to this cultural and academic cooperation initiative.

This agreement reflects a shared ambition: to make language and culture essential drivers of rapprochement, mutual understanding, and openness between Mediterranean societies. Through this alliance, the two institutions reaffirm their commitment to promoting intellectual exchange, intercultural dialogue, and academic synergies around Hispanic culture and language.

This partnership will pave the way for the implementation of a rich and diverse program of joint initiatives, including conferences, workshops, training programs and cultural events designed to foster interactions between students, teachers and cultural actors.

Beyond the institutional scope of this cooperation, this initiative illustrates a common vision based on openness, the transmission of knowledge and the development of a Euro-Mediterranean space where culture constitutes a strategic lever for sustainable rapprochement between academic communities and future generations.

EMBA Audencia - UEMF: Deployment of the module "Principles of CSR and Business Law"

From June 19 to 21, the Audencia-UEMF Executive MBA cohort participated in a module on CSR and business law, led by Professor Thomas Blangis. Participants addressed governance issues, stakeholders, CSR frameworks, and the main regulatory frameworks for sustainability, including the CSRD (Consumer Standards and Regulations), due diligence, the European taxonomy, and ESG criteria.

The module also emphasized the integration of CSR into the governance, strategy and management of organizations, highlighting its role as a lever for creating sustainable value.

Awards and Distinctions

Triple E Awards 2025: The United Nations Chair for the Alliance of Civilizations at the Euromed University of Fez receives an award in Prague

The United Nations Chair for the Alliance of Civilizations at the Euromed University of Fez won the Alliance University of the Year award at the Triple E Awards 2025 on September 11, 2025, in Prague, among hundreds of international candidates. This major distinction recognizes the Chair's unique role as an academic institution committed to intercultural dialogue, peace, and development, extending beyond teaching and research. Offering accredited Master's and Doctoral programs, the Chair provides a space for scientific production and open exchange, bringing together students and international figures to discuss Euro-Mediterranean and African issues. This recognition is fully aligned with Morocco's vision of peace and the strategy of the United Nations Alliance of Civilizations, confirming the international influence and diplomatic role of the Euromed University of Fez.

Admission to the Paris Bar for students of Sorbonne–Euromed Morocco

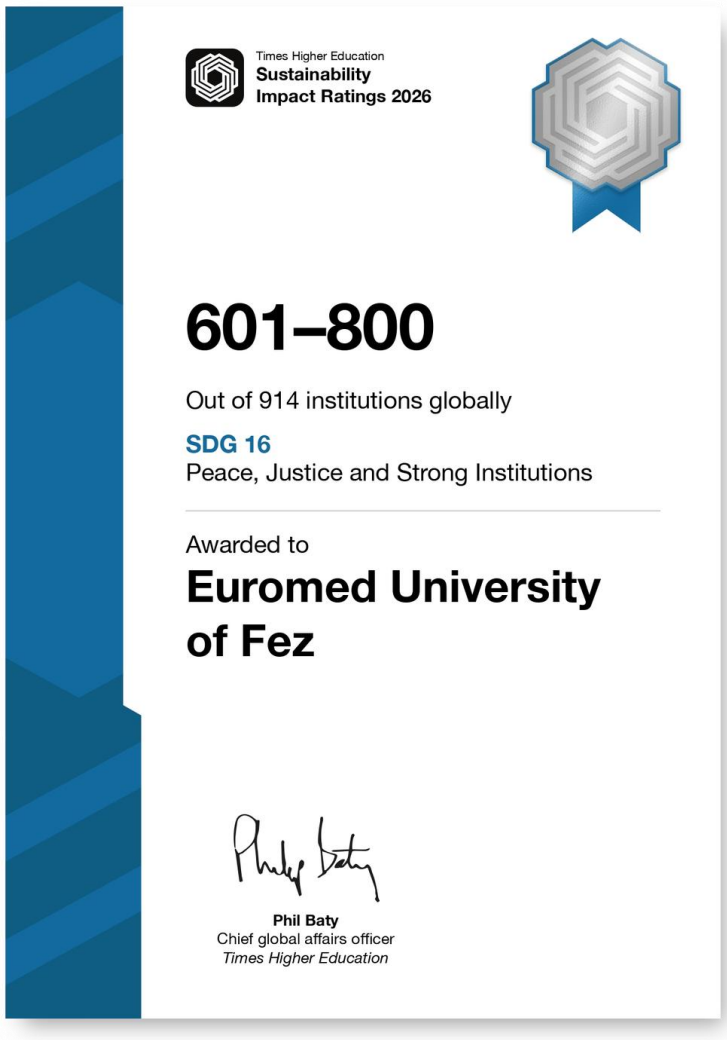

The Sorbonne Law School program relocated to the Euromed University of Fez, in partnership with Paris 1 Panthéon-Sorbonne University, achieved exceptional success in the French bar exam in December 2025: five students were admitted, a result higher than that of many prestigious French institutions.

Led by Professor François-Xavier Lucas, this program is highly selective, recruiting from thousands of applicants, with a balanced distribution between Moroccan, European, and sub-Saharan students. Students follow an intensive program combining academic excellence and professional practice, and earn a dual French-Moroccan degree in business law, enabling them to be admitted to the bar in both France and Morocco.

The program's unique feature lies in its strong professional immersion through international events such as the Fes Restructuring Days, which bring together experts, judges, and executives from Europe and Africa each year. The training is also becoming increasingly international, having recently welcomed Brazilian professionals.

Supported by prominent figures in the Moroccan legal profession such as Azzedine Kettani, Hicham Naciri, and Laila Slassi, this program offers students strong professional visibility..

UEMF's performance in THE Impact Rankings 2026 – SDG 16

In the THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 601–800 range out of 914 institutions for SDG 16: Peace, Justice and Strong Institutions. This distinction reflects its commitment to ethics, transparency, good governance, citizenship, and the strengthening of accountable and inclusive institutions.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

The Euromed University of Fez places cooperation and partnerships at the heart of its development strategy. Through its academic, scientific, and institutional collaborations, both nationally and internationally, UEMF fosters knowledge sharing, mobility, joint research, and innovation. These partnerships, developed with universities, international organizations, socio-economic stakeholders, and public institutions, contribute to strengthening the impact of the University's initiatives and promoting sustainable development based on cooperation and collective intelligence.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez recognizes the importance of partnerships in achieving the Sustainable Development Goals. It relies on a collaborative approach involving its internal and external stakeholders. The policies implemented promote cooperation and the sharing of best practices. The university encourages the pooling of resources and skills. It develops joint initiatives for sustainable development. In this way, the Euromed University of Fez strengthens its institutional impact and actively contributes to the achievement of SDG 17.

c. Formation, sensibilisation et engagement académique

- Masters et programmes spécialisés sur l'énergie, le développement durable, la gestion environnementale et l'ingénierie verte ;
- Cours transversaux sur les ODD et la durabilité dans tous les programmes ;
- Conférences et séminaires internationaux sur la transition énergétique, la résilience climatique et l'économie circulaire ;
- Projets étudiants et doctorants sur le bilan carbone, le recyclage, l'éco-design et l'adaptation climatique-résilience.

d. Innovation, incubation et entrepreneuriat vert

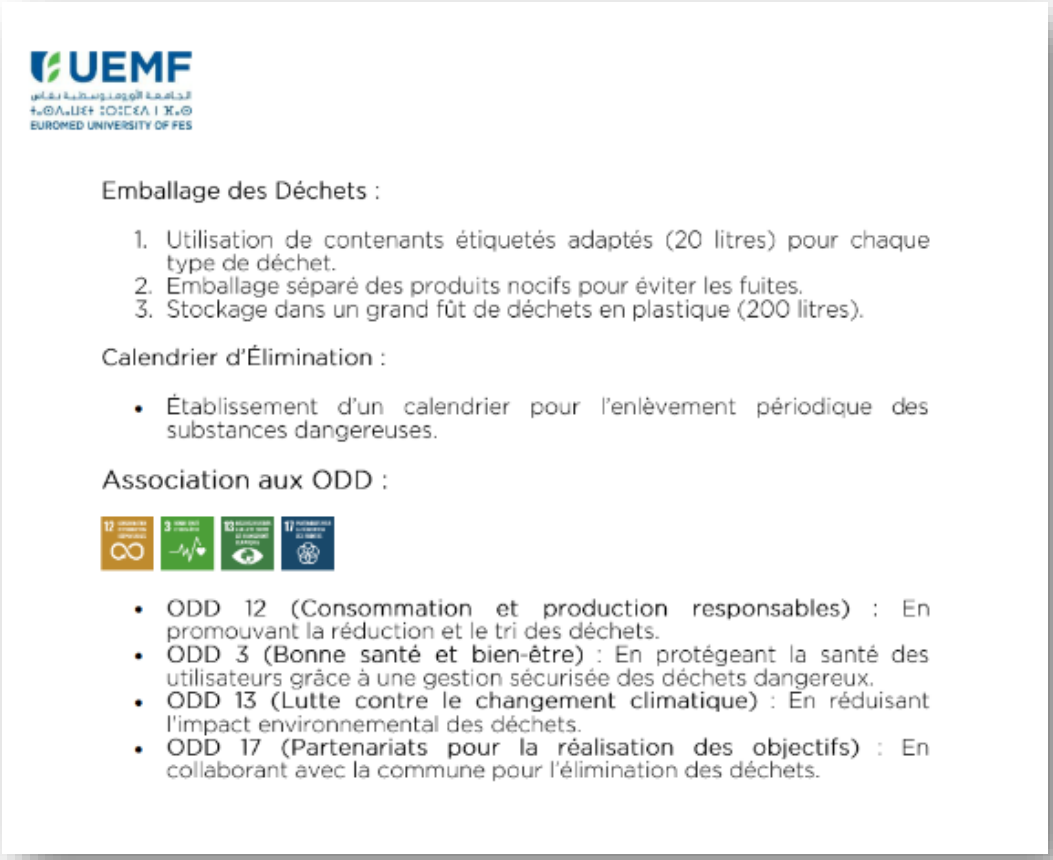

- Incubation de start-up dans les domaines de la mobilité électrique, de la technologie propre, de l'agritech, et des énergies renouvelables ;
- Organisation régulière de hackathons sur l'agritech, l'énergie, la gestion durable et la réduction du carbone, mobilisant étudiants, chercheurs et partenaires industriels ;
- Accompagnement des porteurs de projets à impact environnemental au sein de l'Euromed Innovation Center et de l'écosystème Fez Smart Factory, à travers des programmes d'incubation, de mentorat et de valorisation technologique favorisant la mobilité électrique, l'agritech, les énergies renouvelables et l'économie circulaire.e. Partenariats et coopération

  Depuis septembre 2024, l'Euromed Innovation Center accompagne la transformation des idées en projets à fort impact, avec des résultats concrets :

  - 143 projets accompagnés et mentorés,
  - 632 personnes sensibilisées à l'entrepreneuriat,
  - 27 startups incubées et juridiquement établies.

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

Waste management policy

UEMF
EUROMED UNIVERSITY OF FES

Emballage des Déchets :

1. Utilisation de contenants étiquetés adaptés (20 litres) pour chaque type de déchet.
2. Emballage séparé des produits nocifs pour éviter les fuites.
3. Stockage dans un grand fût de déchets en plastique (200 litres).

Calendrier d'Élimination :

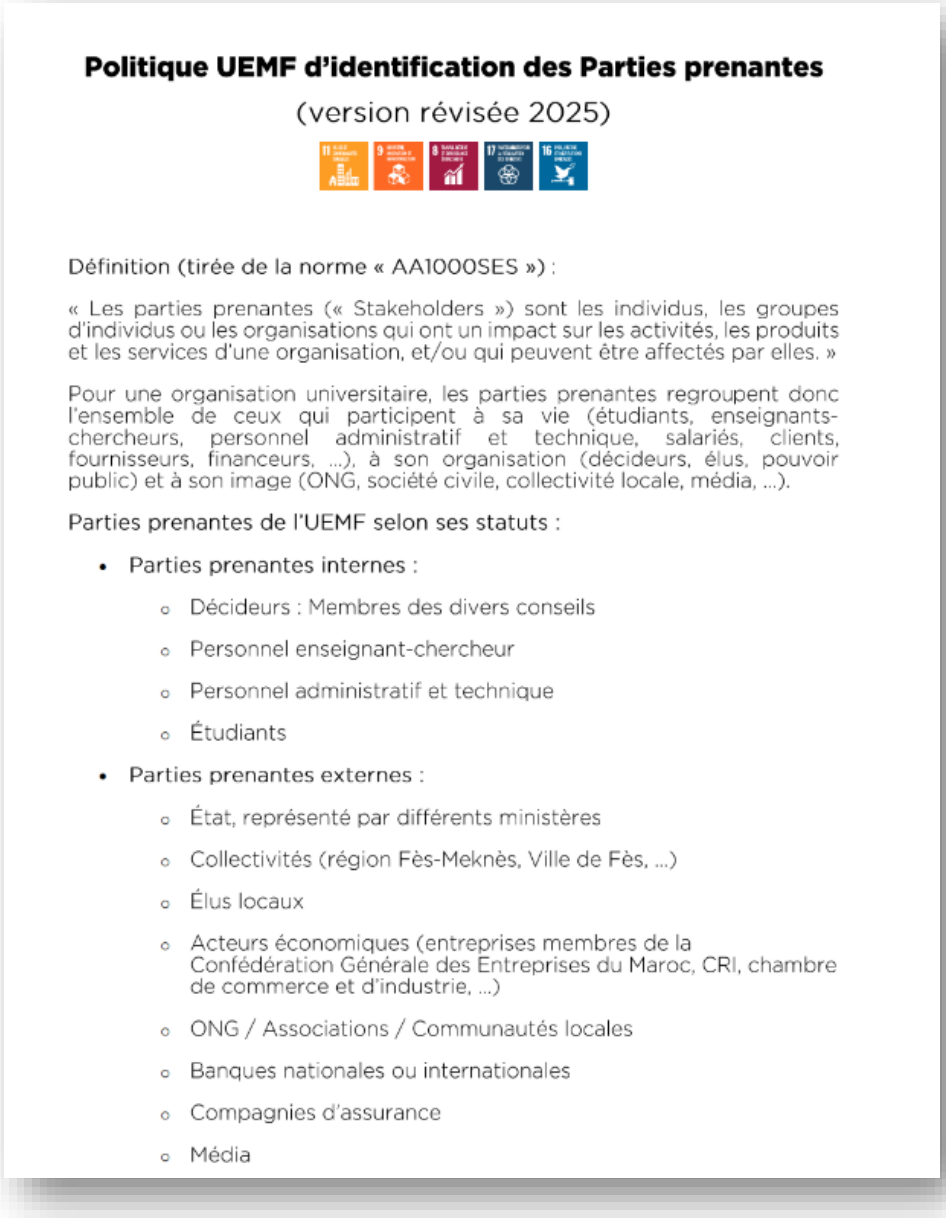

- Établissement d'un calendrier pour l'enlèvement périodique des substances dangereuses.

Association aux ODD :

- ODD 12 (Consommation et production responsables) : En promouvant la réduction et le tri des déchets.
- ODD 3 (Bonne santé et bien-être) : En protégeant la santé des utilisateurs grâce à une gestion sécurisée des déchets dangereux.
- ODD 13 (Lutte contre le changement climatique) : En réduisant l'impact environnemental des déchets.
- ODD 17 (Partenariats pour la réalisation des objectifs) : En collaborant avec la commune pour l'élimination des déchets.

This policy sets out the UEMF's guidelines for sustainable and responsible waste management. It is based on source reduction, selective sorting, recycling and recovery.

Stakeholder identification policy

Politique UEMF d'identification des Parties prenantes

(version révisée 2025)

Définition (tirée de la norme « AA1000SES ») :

« Les parties prenantes (« Stakeholders ») sont les individus, les groupes d'individus ou les organisations qui ont un impact sur les activités, les produits et les services d'une organisation, et/ou qui peuvent être affectés par elles. »

Pour une organisation universitaire, les parties prenantes regroupent donc l'ensemble de ceux qui participent à sa vie (étudiants, enseignants-chercheurs, personnel administratif et technique, salariés, clients, fournisseurs, financeurs, ...), à son organisation (décideurs, élus, pouvoir public) et à son image (ONG, société civile, collectivité locale, média, ...).

Parties prenantes de l'UEMF selon ses statuts :

- Parties prenantes internes :
  - Décideurs : Membres des divers conseils
  - Personnel enseignant-chercheur
  - Personnel administratif et technique
  - Étudiants
- Parties prenantes externes :
  - État, représenté par différents ministères
  - Collectivités (région Fès-Meknès, Ville de Fès, ...)
  - Élus locaux
  - Acteurs économiques (entreprises membres de la Confédération Générale des Entreprises du Maroc, CRI, chambre de commerce et d'industrie, ...)
  - ONG / Associations / Communautés locales
  - Banques nationales ou internationales
  - Compagnies d'assurance
  - Média

The UEMF recognizes the importance of its stakeholders in the success of its missions. This policy defines the methods of dialogue, listening, and cooperation with students, teachers, institutional partners, and economic actors.

E-SDG

The UEMF (University of Evangelical Monetary of Fez) considers international cooperation and partnership a key driver of its contribution to SDG 17. Through collaborations developed by its various institutions with foreign universities and institutions, the University promotes student and faculty mobility, knowledge exchange, dual degree programs, joint research projects, and collaborative training. This dynamic strengthens capacities, pools expertise, and creates lasting synergies among academic stakeholders, thus contributing to the collective achievement of the Sustainable Development Goals.

1Initial training leading to a diploma

Doctor of Medicine, Specialist Physician and Teacher-Researchers in Medicine.
Students enrolled at FEM have the opportunity to spend two to three semesters studying abroad. FEM offers this opportunity through the following programs:

- Exchange agreements established with our partners;
- Credit mobility agreements within the framework of the ERASMUS+ program.

Opportunities for international and intercultural internships may be offered.

2. CONTINUING EDUCATION

The FEM is progressively developing continuing education programs qualifying or diploma-granting courses, in various forms: full-time or part-time continuing education or work-study training.

3. DOCTORAL (Ph.D.) TRAINING

The doctoral program is a research-based training program culminating in the award of a Doctor of Medicine (Ph.D.) degree in Medical and Biomedical Sciences, following the defense of research work before a jury. This doctoral research training is organized at the Doctoral Studies Center in Medical Sciences at the Euromed University of Fez.

Euromed Faculty of Pharmacy

The Euromed Faculty of Pharmacy (FEP), a component of the Euromed University of Fez, offers a six-year program leading to a Doctor of Pharmacy degree. This program is part of a strong international strategy, based on structured academic collaborations with European universities, promoting student and faculty mobility, particularly within the Erasmus+ program, as well as the development of joint programs, double degrees, and collaborative research projects. This degree opens doors to numerous promising careers, particularly in the following sectors:

- The pharmaceutical industry,
- The hospital pharmacy,
- The pharmacy,
- Pharmaceutical R&D.

The Euromed Faculty of Pharmacy (FEP) offers a comprehensive program designed to train dedicated pharmacists capable of addressing current healthcare challenges under optimal safety conditions. The Doctor of Pharmacy degree is recognized by the Moroccan state, and the FEP aims to develop dual degree programs with European universities, fostering a dynamic of international collaboration.

The training program is based on innovative teaching methods that integrate artificial intelligence, data analysis, and biotechnology to improve treatment effectiveness and the quality of care. Furthermore, the FEP offers international mobility opportunities through academic exchanges, the Erasmus+ program, and internships abroad.

1. INITIAL DIPLOMA TRAINING

- Title of Doctor of Dental Medicine after six years of training.

- Possibility of an exchange semester during the professional immersion internship in partner Euro-Mediterranean establishments or within the framework of the mobility agreements provided for by the ERASMUS+ program.

2. CONTINUING EDUCATION

- A rich and diverse continuing education offer that meets the training needs of dentists;
- Updating their knowledge and strengthening their skills;
- Continuous adaptation to the digital transformation linked to technological progress.

1. PREPARATORY CYCLE

The Integrated Preparatory Cycle at the School of Digital Engineering and Artificial Intelligence is designed to provide students with in-depth scientific and technical training, enabling them to access the various digital engineering tracks. This program combines courses in computer science, electronics, applied mathematics, and humanities and social sciences, in order to lay a solid foundation for the rest of their studies in the engineering cycle.

2. ENGINEERING PROGRAM

Sectors:

- Artificial Intelligence (AI)
- Robotics and Cobotics
- Big Data Analysis
- Information Technology and Cybersecurity
- Full Stack and Multimedia Engineering

3. MASTER'S PROGRAM

ICT Security and Artificial Intelligence (dual degree program with George Washington University)

1. ARCHITECT'S CYCLE
Architect's Degree (Bac +6)

The diploma obtained through this program is an architecture degree with Moroccan recognition and accreditation:

2. BACHELOR'S DEGREE PROGRAM:
Bachelor's degree in Design (3 years post-high school)

The EMADU Design degree is designed to train designers capable of creatively managing, beyond the object, decision-making processes, mediation and the integration of multidisciplinary contributions; thus enabling graduates to work across a very wide range of sectors.

3. MASTER'S PROGRAM:
Master in Global Design (Bac+5)

EMADU offers an innovative, multidisciplinary and internationally open training program, promoting practical learning, critical thinking, innovation and the development of skills necessary for design professions.

1. ENGINEERING PROGRAM

- Civil engineer
- Industrial Engineer
- Energy and Environmental Process Engineer
- Mechanical, production and thermal engineering engineer
- Engineer in Electronics, Electrotechnics and Automation
- Telecommunications Engineer

2. MASTER'S PROGRAM

- Master's degree in logistics and supply chain engineering
- Master's degree in environmental engineering and water management
- Master's degree in entrepreneurial support and technological management
  - Master in Sustainable Energy (double degree with the University of Surrey - UK)
  - Executive master in logistics and supply chain
  - Executive MBA in Healthcare Supply Chain Management

DOUBLE DEGREES INTERNATIONAL MOBILITY

1. BACHELOR'S DEGREE PROGRAM

The Bachelor's degree in Political and Legal Sciences offers a multidisciplinary education in social sciences, law, and political science. After a common core curriculum in the first two years, students choose a specialization in either political science or legal sciences. It prepares students for Master's level studies as well as careers in public administration, local government, research and consulting, communications, journalism, and the non-profit sector. The third year is dedicated to a selective international exchange program.

2. MASTER'S PROGRAM

At the Master's level, the Institute offers a diverse range of courses in political science and legal science, with several specializations:

- Master's Degree in Mediterranean and African Politics –double degree with the University of Paris 1 Panthéon-Sorbonne
- Master's Degree in Conflict Management and the Alliance of Civilizations
- Master of Economic and Social Administration– relocated from the University of Toulouse Capitole
- Master's Degree in Business Law– Sorbonne Law School
- Master's Degree in Digital Law
- Master's Degree in Sports Law

3. DOCTORAL CYCLE

Graduates of Masters programs in political science and law with a research profile could apply to pursue doctoral studies with the possibility of joint supervision with the University of Paris 1 Panthéon-Sorbonne.

1. BACHELOR'S DEGREE PROGRAM

- Bachelor's Degree in Translation
- Bachelor's Degree in Social Sciences and Health Management

2. MASTER'S PROGRAM

- Master's Degree in Corporate and Institutional Communication
- Master's degree in Translation Studies
- Master's Degree in Clinical Psychology and Psychotherapy
- Master's Degree in Applied Foreign Languages (LEA): Intelligence and Ecosystems
- Innovators in Europe (Double degree program with the University of Strasbourg)

3. DOCTORAL PROGRAM

The top graduates of the Master's program are admitted to the doctoral program at UEMF or a partner university, receiving a monthly stipend. Research in the humanities and social sciences focuses on eight main themes:

- Heritage and heritage-making in Euro-Mediterranean societies;
- Mobility in the Euro-Mediterranean area;
- Euro-Mediterranean cities and societies;
- The Shattered Museum, a new approach to heritage mediation;
- Teaching Spanish as a foreign language;
- Language teaching and interculturality;
- A chair in "Human Rights" in partnership with the CNDH;
- Social sciences applied to environmental management

1. Preparatory Classes in Business and Management

The two preparatory years in Commerce and Management provide a solid foundation in economics, management and organization, while developing analytical, critical thinking and problem-solving skills, before choosing a specialized track at EBS.

2. Grande École Program (3 years after 2 years of higher education)

The Grande École Program (PGE) at Euromed Business School is a five-year postgraduate program designed to train senior executives and entrepreneurs through an approach focused on internationalization, entrepreneurship, digitalization, and responsibility. It leads to the DENCG diploma, with the option of a dual international degree.

Sectors:

- Finance, Audit and Performance Management (FAPP)
- International Business Management (IBM)
- Human Resources and Digital and Societal Transformations (HRTS)
- E-Marketing and Digital Communication (EMCD)

3. MASTER'S PROGRAM

Sectors:

- Accounting, Control and Auditing (CCA)
- Actuarial Science and Financial Engineering (SAIF)

Research, Innovation & Entrepreneurship

Research topics - Doctoral cycle

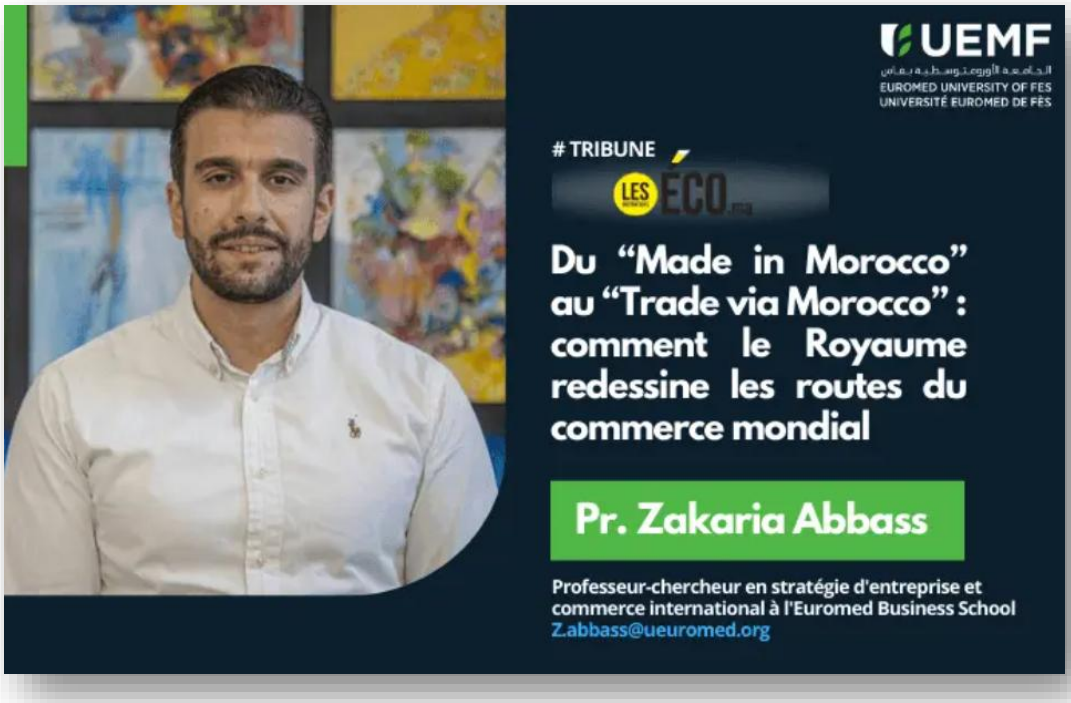

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 17 has been identified. This work focuses in particular on international cooperation, academic and institutional partnerships, global governance, technology transfer, research networks, and Euro-Mediterranean and African dynamics.

The table below presents the main research topics contributing to this objective.

Thesis Subject	related SDGs
The Dynamics of Mediterranean Relations in the Face of the Strategic Challenges of Our Time: Co-Development, Interculturality and Security	SDG 17
From Traditional Democracy to Digital Governance in Moroccan Public Administration Issue of Transparency and Citizen Participation	SDG 17
Morocco's Country Brand: Supporting the Country's Sovereignty and Creating Economic Opportunities Through Digital Content Production, International Digital Influencers and Targeting International Digital Audiences	SDG 17
How to Think the Landscape Future in Africa? Towards an African Convention of Landscape	SDG 17
The Impact of Collective Proceedings on Debt Collection Litigation Under OHADA Law	SDG 17
Migration Governance in Africa in the Light of the Partnership with the European Union: Towards a North-South Co-Development Dynamic	SDG 17
Digital, Electronic Acts and Their Impact on Notarial Practice and Authentic Instruments: A Comparative Law Study Between Morocco and France	SDG 17
Secured Debts in Collective Proceedings: A Comparative Analysis of French and OHADA Law	SDG 17
Morocco's Accession to the Organization for the Harmonization of Business Law in Africa (OHADA): Realities, Challenges, and Prospects	SDG 17
Plurality, Migration, and Intercultural Policy in the Euro-Mediterranean and African Space	SDG 17
Equity financing in the OHADA area: a comparative analysis of French, Luxembourg and Mauritian law	SDG 17
Governance and regulatory challenges related to digital technologies in the context of peace and conflict	SDG 17
Impact of new technologies (social networks, artificial intelligence) on conflict management	SDG 17
World order and international organizations facing conflicts and humanitarian crises: an analysis of their effectiveness and limitations in the current international context	SDG 17
Plant-Derived Exosomes as Bio-Nanoplatforms for Antiviral therapy and Vaccine Delivery: A Cross-Mediterranean Approach	SDG 17

Thesis Subject	related SDGs
Assessment of Brain Drain Factors among African Students in Science, Technology, Engineering, Arts, and Medicine (STEAM) Fields	SDG 17
The challenges of peace and security in the Sahel and their geopolitical and economic impacts	SDG 17
Media and Societies: What Impact on Governance Systems in Africa and the Mediterranean	SDG 17
Media and University in Africa: What governance for What Results?	SDG 17

[Opinion] From "Made in Morocco" to "Trade via Morocco": how the Kingdom is reshaping global trade routes

The "Made in Morocco" label has long symbolized an emerging industrial pride. Textiles, leather, and later automobiles and aeronautics, were the showcases of this productive Morocco. But by 2025, this label is no longer enough to reflect the Kingdom's ambition.

The country is not just a manufacturing hub: it is becoming a logistical and strategic crossroads, at the heart of the reshaping of global trade flows. This profound transformation signals the shift from "Made in Morocco" to "Trade via Morocco," reflecting a deliberate repositioning.

3e and last Tech4Farmers Bootcamp of the 2e Cohort

From September 23 to 25, 2025, the Euromed University of Fez, via the Euromed Innovation Center, hosted the third and final bootcamp of the Tech4Farmers – Tamkin LiTanmia program, intended for AgriTech project leaders of the second cohort.

Organised as part of the programme funded by the AFD, this bootcamp focused on business maturation, pitching and preparation for fundraising, through workshops, mentoring and exchanges with experts.

It marks the end of the incubation cycle and confirms UEMF's commitment to innovation and impact entrepreneurship in the service of sustainable agriculture in the Fes-Meknes region.

Tech4Farmers Demo Day: closing of the second cohort

Organised by the Euromed Innovation Centre, the AgriTech Demo Day marked the closing of the second cohort of the Tech4Farmers programme, after 12 months of incubation of innovative startups within the framework of the AgriTech Regional Innovation and Entrepreneurship Hub.

The event allowed project leaders to present their solutions to an ecosystem composed of investors, institutional investors, researchers and agricultural professionals, fostering concrete opportunities for collaboration and deployment.

With the participation of partners such as the French Development Agency and major players in the sector, this initiative illustrates the commitment of the Euromed University of Fez to sustainable agricultural innovation with environmental impact..

Entrepreneurship Awareness Day – STARTECH 3ᵉedition

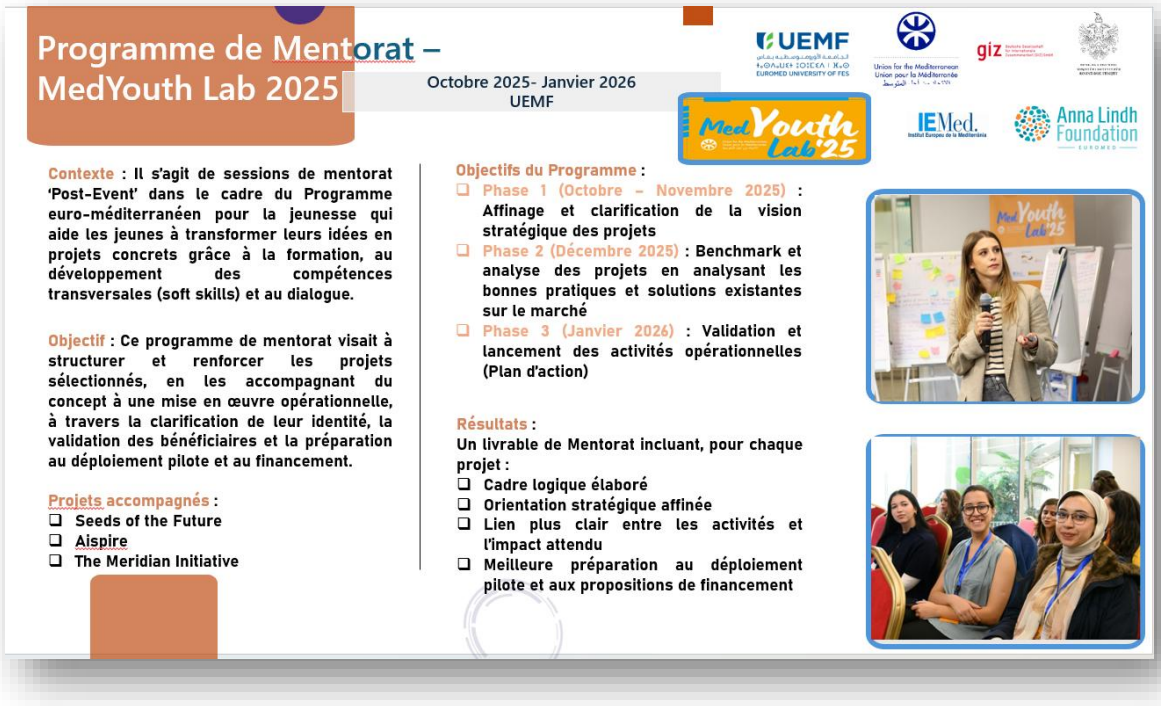

On November 13, 2025, the Euromed University of Fez (UEMF) organized an entrepreneurship awareness event as part of the 3rdᵉedition of the STARTECH Call for Projects.

The program includes: presentation of entrepreneurial opportunities in Morocco, exchange with local entrepreneurs, intervention by Bank of Africa on project financing and an introductory workshop on design thinking.

Intended for 3rd grade studentsᵉ4ᵉand 5ᵉOrganized this year by students from EBS, EIDIA and EIB, this activity brought together 200 participants and aimed to promote innovation and initiative.

Mentoring Program – MedYouth Lab 2025

The Mentorship Programme – MedYouth Lab 2025, organised at UEMF from October 2025 to January 2026, supported young project leaders in structuring and implementing their initiatives.
Through three phases (strategic clarification, benchmarking and validation of the action plan), the Seeds of the Future, Aispire and The Meridian Initiative projects benefited from a strengthened logical framework, better strategic direction and preparation for pilot deployment and funding.

Source: ACTIVITY REPORT OF THE DIRECTORATE OF SOCIO-ECONOMIC AND PARTNERSHIPS

From Fes-Meknes to Berlin: our AgriTech startups meet international markets.

From Fes-Meknes to Berlin: our AgriTech startups meet international markets.

From February 4 to 6, as part of the Tech4Farmers incubation program of the Euromed innovation center (EIC), the Euromed University of Fez accompanied six partner startups to the international trade fair FRUIT LOGISTICA 2026 in Berlin, one of the world's largest events dedicated to the fruit and vegetable sector.

A true strategic space for exchanges and opportunities, this event allowed startups to present their innovative solutions, meet international buyers, exchange with manufacturers and better understand the dynamics of a constantly evolving global market.🌍.

Objectives achieved: qualified connections, concrete business opportunities, and enhanced visibility for Moroccan AgriTech on a demanding international stage. The teams were thus able to generate their first international leads, engage in advanced discussions with European distributors, and consolidate their positioning with key players in the sector.

Hack'Days 2026: Stimulating regional innovation and entrepreneurship

The Euromed Innovation Center (EIC) has launched the Hack'Days 2026 call for projects, in partnership with TAMWILCOM through the InnovInvest fund and Blue Space by Bank of Africa. This initiative targets project leaders, teams, and startups in the Fes-Meknes, Drâa-Tafilalet, and Oriental regions, aiming to structure and accelerate the development of innovative solutions. Ten projects from each region will be selected to participate in the bootcamp, and three projects will receive post-bootcamp support. This initiative strengthens the regional dynamic of innovation and entrepreneurship by supporting the creation of concrete and competitive solutions.

Artificial intelligence and digital transformation: towards a new development paradigm

On the occasion of the signing of the JAZARI Industry X.0 agreement, Ms. Amal El Fallah Seghrouchni, Minister Delegate to the Head of Government in charge of Digital Transition and Administrative Reform, shared a testimony about the major technological changes that are transforming our societies today.

Through this intervention, she notably revisits the rise of artificial intelligence and its role in digital transformation, while highlighting the opportunities it offers to rethink professional practices, encourage innovation and open up new perspectives in many sectors.

An inspiring look at the challenges and potential of a constantly evolving world, where mastering technologies and adapting to new digital environments become essential levers for building the future.

RamadanIA Hackathon: UEMF projects distinguished at the regional and national level.

As part of the RamadanIA program, supported by theMinistry of Digital Transition and Administrative ReformThe Euromed University of Fez hosted the Fez-Meknes regional final, bringing together students, project leaders and young entrepreneurs around artificial intelligence solutions applied to territorial challenges.

At the end of this stage, two projects from the UEMF community stood out: 🥇 GaiaEye – Grand Prize for Regional Excellence. 💡 Audacity Alwarid – Innovation & Creativity Award.

These projects then represented the region at the national hackathon in Rabat, bringing together the best teams from the Kingdom's 12 regions. At this event, the Audacity Alwarid project distinguished itself once again, winning 2nd prize nationally, as well as the Jazari Jury's Choice Award, confirming the relevance and impact of its solution in the field of digital healthcare transformation.

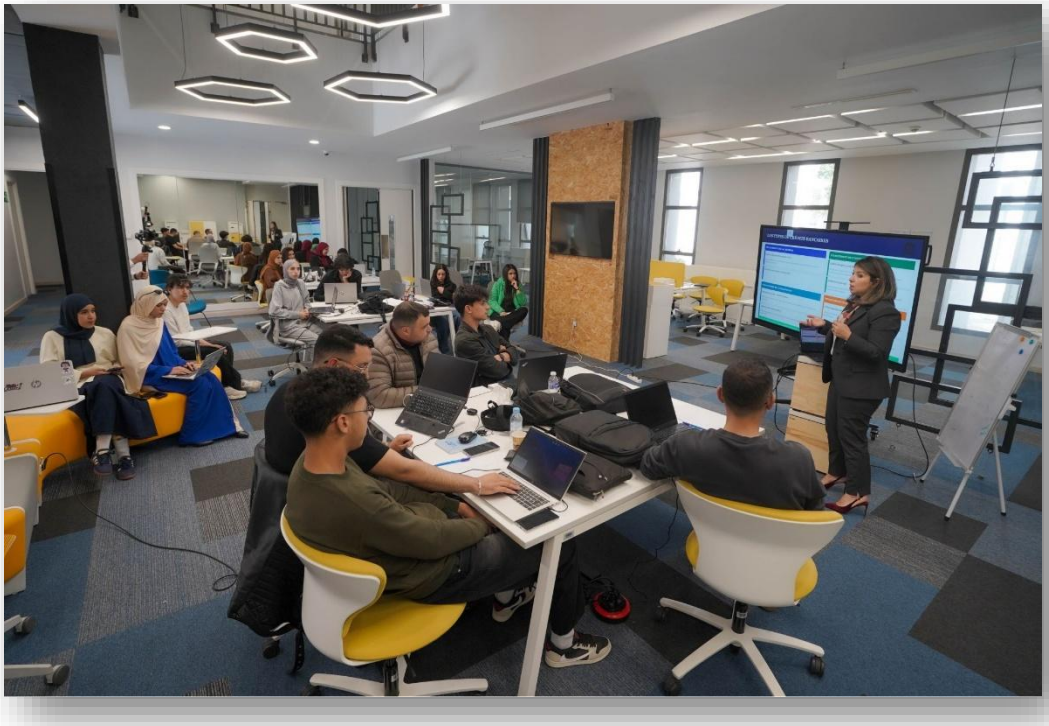

Congratulations to our students.
Lamiae HADI,Nada E.,Ahlam TARK,Chaimae OuarabAndHamel GOUNGOU, for their commitment, their creativity and the quality of the work accomplished through this project.

[Opinion] Fertilizers under pressure: Morocco as a backup route for Asia?

Since the closure of the Strait of Hormuz, the global fertilizer supply has been under strain. After the United States, it is now India's turn, a major agricultural power, to express its interest in Moroccan fertilizers. Thanks to its geographical location and the possibility of bypassing the Red Sea via the Cape of Good Hope in South Africa, Morocco could offer an alternative in this crisis....

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF

Hack'Days: two days of immersion in the heart of innovation and entrepreneurship at UEMF.Euromed innovation center (EIC)organized, in partnership withTAMWILCOMvia the InnovInvest Fund and BlueSpace (Bank of Africa), on April 16 and 17, the Hack'Days of the Fes-Meknes region, bringing together students, project leaders and young entrepreneurs around an intensive bootcamp dedicated to the creation and development of innovative solutions.

As part of a dynamic of supporting high-potential talent, this program aims to support the emergence of projects in strategic sectors such as digital, health, agritech, cybersecurity, greentech, fintech or edtech, thus contributing to the development of the regional entrepreneurial ecosystem.

Over the course of two days, participants were supported in structuring their ideas, designing concrete solutions and preparing their projects, in an environment conducive to experimentation, collaboration and collective intelligence.

A true space for learning and co-creation, this event allowed each team to develop their project, benefiting from constructive feedback, dedicated mentoring and guidance that fosters the maturation of entrepreneurial initiatives.

The Hack'Days concluded with pitch sessions, offering participants the opportunity to present their projects, compare their ideas and reveal their full potential, in a dynamic focused on innovation and impact.

We extend our sincere congratulations to all participants for their commitment, creativity, and entrepreneurial spirit. This initiative confirms the role of the UEMF, through the Euromed Innovation Center, as a key player in structuring and supporting innovation at the regional and national levels.

Participation in SIAM: showcasing innovative initiatives in AgriTech

At the heart of agricultural innovation and AgriTech entrepreneurship in Morocco 🌱,

The Euromed University of Fez, through its Euromed Innovation Center (EIC), is participating in the 18th e SIAM edition with the Tech4Farmers – Tamkin Li Tanmia program, supported by the French Development Agency and deployed within the framework of the PRIE Fès-Meknès.

The program highlights several innovative startups (OBENS, Wasit, BOVICLOUDS, ARWA Solutions, Jodoor, DeepLeaf, Green Innovation, PCS AGRI) illustrating the potential of technology in the service of sustainable and efficient agriculture.

The stand was visited by several personalities, including the President of the Euromed University of Fez and the Director of the AFD, as well as the participation of institutional partners during the closing ceremony of the program, marking a strong moment of highlighting the results and collaborations.

This initiative brings together many key players in the agricultural and digital ecosystem in Morocco and confirms the role of the university as a driver of innovation and entrepreneurship serving the territories.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

Hack'Days Oriental 2026: Entrepreneurial innovation at the service of regional dynamics.

On May 7th and 8th, 2026, theEuromed innovation center (EIC)organized the regional Hack'Days Oriental bootcamp, organized as part of the Hack'Days by Region 2026 program, supported by Tamwilcom via the Innov Invest Fund, in partnership with Blue Space by Bank of Africa.

For two days, project leaders from the Oriental region participated in intensive support designed to transform innovative ideas into structured, viable projects ready to accelerate their development.

Seven projects were selected following the initial rounds to participate in this edition and benefit from mentorship provided by experts and key players in the entrepreneurial ecosystem. Participants worked on key aspects of their projects: strategic vision, business model, market positioning, validation of the value proposition, and growth prospects.

The projects developed covered several high-stakes sectors: • Cleantech & hybrid energy • EdTech & financial education • HealthTech & drug safety • FinTech & algorithmic trading • Applied AI & cybersecurity

Beyond technical support, this bootcamp primarily created a space for meetings, reflection and experimentation where participants could challenge their ideas, share their experiences and develop their projects by interacting with experts and other entrepreneurs.

Digi-Hackathon “Mobile Health”: three days of innovation and engagement in service of youth health at UEMF

The Euromed University of Fez hosted the 4th eThe "Mobile Health" Digi-Hackathon, a national event dedicated to innovation in digital health and the development of technological solutions addressing public health challenges, was held in partnership with the Ministry of Health and Social Protection, the Euromed Innovation Center (EIC), and with the support of UNFPA. This hackathon placed particular emphasis on youth mental health and the prevention of psychoactive substance use.

For three days, students, experts, healthcare professionals, and project leaders collaborated in an environment that fostered innovation, entrepreneurship, and collective intelligence. The participating teams received technical and strategic support to develop innovative digital solutions tailored to the needs of teenagers and young adults.

The event also featured conferences and discussion forums on current issues in digital health and improving access to healthcare services through mobile technologies. Through this initiative, the UEMF reaffirms its commitment to socially impactful innovation, developing young people's skills, and fostering collaboration between health, technology, and entrepreneurship.

Events

Academic events

Trade secrets at the heart of the Franco-Moroccan dialogue

The Euromed University of Fez organized a study day dedicated to trade secrets, in partnership with the Henri Capitant Association and the Sorbonne Law School's Moroccan branch. Led by Professor Valérie Malabat (University of Bordeaux) and Professor François-Xavier Lucas, the event brought together academic and professional experts to discuss the legal and economic challenges related to the protection of strategic information.

Structured around three roundtables focusing on the legal foundations, practical challenges for businesses, and litigation aspects, this meeting provided a deeper understanding of the trade secret protection framework. Students in the Sorbonne-UEMF Master's program in Business Law benefited from enriching discussions based on comparative and international perspectives.

This initiative is part of Franco-Moroccan academic cooperation and illustrates the UEMF's commitment to excellent legal training, open to international issues and contemporary economic realities.

Plato and Civic Ethics: A lecture by Dr. Rachid Achachi

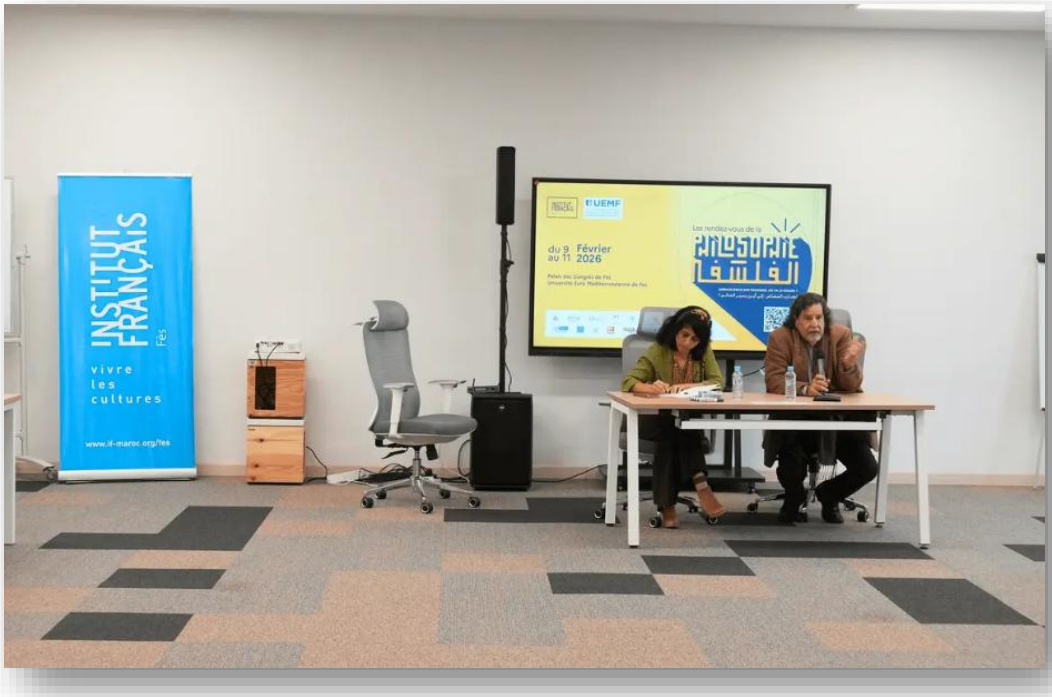

Continuing its series of lectures, the University organised a meeting led by Professor Rachid Achachi, dedicated to the contribution of Platonic thought to reflection on civic ethics.

Based on a reinterpretation of Plato's writings, the presentation addressed essential themes such as justice, shared responsibility, and the role of the citizen in the structuring of the city-state. The analysis transcended the historical framework of this philosophy to demonstrate its relevance to contemporary social and civic challenges.

Professor Rachid Achachi emphasized that civic ethics, far from being an imposed norm, is forged through education, intellectual inquiry, and the active involvement of citizens. This perspective paves the way for a dynamic understanding of philosophy, viewed as a catalyst for reflection and engagement.

The meeting concluded with an interactive exchange with the public, marked by the diversity of contributions and the quality of discussions, demonstrating the interest shown in this topic by the academic community.

The Philosophy Encounters: the university at the heart of intellectual debate in Fez

From February 9 to 11, 2026, the Euromed University of Fez hosted the 11thᵉ eedition of the Philosophy Rendez-vous, on the theme "Ambivalence of passions. OùWhere is the world going?». Thisevenement, in partnership with the'French Instituteitais of Morocco, a transformedediffererenterents spaces of the city in places of rebending and debat, reuniting philosophers, researchers, artists and intellectuals.

Through conferences, workshops, public debates, and readings, the event fostered dialogue between academia and society, promoting critical thinking, understanding of social and cultural transformations, and the development of informed citizens. The Euromed University of Fez reaffirmed its role as an intellectual hub, open to exchange, the dissemination of knowledge, and cultural engagement.

Cognitive Development and the Humanities: A lecture by Professor Majda Nniya in collaboration with the Cervantes Institute

In collaboration with the Cervantes Institute, this session of the lecture series was devoted to the theme: “From Symbolic Peace to Transformative Science: Women, Childhood, and the Architecture of Knowledge.” The meeting was moderated by Professor Majda Nniya, Assistant Professor at the Faculty of Humanities and Social Sciences of UEMF.

The intervention offered a detailed analysis of cognitive development throughout life, from early childhood to adulthood, highlighting the importance of the educational framework, emotional regulation, and stress management in learning.

The discussions also highlighted the role of the family environment, and more specifically that of the mother, in supporting the child's intellectual and emotional development. They reiterated that cognitive abilities are built gradually through experiences, social interactions, and the surrounding environment.

Bringing together students, teachers and members of the university community, as well as representatives from the Cervantes Institute, this conference offered an enriching space for dialogue on contemporary issues in education, human development and cognitive science.

This initiative is part of the UEMF's commitment to promoting interdisciplinary approaches and encouraging reflection on current educational and societal challenges.

New class graduates in Political Science – Sorbonne-UEMF track

The graduation ceremony for the Bachelor of Political Science, Sorbonne-UEMF track, marked the culmination of a demanding international curriculum, based on academic rigor, commitment and intellectual openness.

The graduates received their diplomas in the presence of their teachers, who had guided them throughout their studies. The ceremony was held in the presence of the Director of the Institute of Legal and Political Sciences at the Euromed University of Fez, Professor Kamal Kajja, as well as Professors Julien Fretel, Bertrand Simon, Philippe Marchesin, Asmae Kasimi, Mounia S., and Marie-Pierre W., who commended the students' dedication, commitment, and perseverance since the beginning of the program.

Welcoming students of different nationalities, this program fully embodies the spirit of the Sorbonne-UEMF partnership, offering a multicultural and demanding education designed to train individuals capable of analyzing and understanding contemporary political issues.

The Euromed University of Fez extends its congratulations to all the award winners and wishes them every success in the continuation of their academic and professional careers.

3e Euromed Career Day edition: a success in the service of employability

The 3e eedition of the'Euromed Career Day s'is heldhasL'The Euromed University of Fez, bringing together more than 400 students and over 20 companies from various sectors, facilitated more than 1,100 interviews, fostering direct exchanges and concrete professional opportunities.

A plenary conference on the theme "University-Business: a strategic alliance for the future" highlighted the importance of dialogue between the academic and professional worlds to strengthen the employability of students.

This initiative illustrates UEMF's commitment to supporting its students towards successful professional integration adapted to market requirements.

Round table: Women's career paths: what factors shape women's professional trajectories?

The Euromed University of Fez hosted Ms. Helena Nolan, Ireland's Ambassador to Morocco, for a roundtable discussion on women's career paths entitled "Women'Career Pathways»Speakers from diverse backgrounds sharedeanalyses and expelessons on leadershipemini, the destructural changes and transformations in the world of work were discussed. The event fostered dialogue and reflection on policies and initiatives to support the development of women's talent, and highlighted the importance of sharing experiences to guide new generations. This meeting illustrates UEMF's commitment to intercultural dialogue, knowledge sharing, and the promotion of an academic culture open to the world.

Oral health prevention: raising awareness today to better care tomorrow.

As part of the launch of the prevention project within the framework of the Project-Based Approach (PBA), the Faculty of Dental Medicine – UEMF welcomed Dr. Errachidi, President of the Moroccan Association for Oral and Dental Prevention – Fes section, for an exchange and awareness session dedicated to dental medicine students.

This meeting provided an opportunity to discuss the foundations of oral health prevention, the importance of patient awareness, as well as the good practices and professional ethics that should guide the practice of the profession.

Through an enriching dialogue, the students were introduced to the challenges of prevention in public health, the responsibility of the practitioner in educating patients and the essential role of the dentist in promoting a sustainable culture of prevention.

This initiative is fully in line with the UEMF's vision of training competent, committed healthcare professionals who are aware of their societal role, placing prevention and ethics at the heart of medical practice.

Women's creativity is in the spotlight at the UEMF Conference Series

As part of its 2025–2026 Conference Series, the Euromed University of Fez hosted a conference entitled “Women and Creativity”, led by Zohra Lhioui, Professor of Comparative Literature at Moulay Ismail University.

During her presentation, the speaker highlighted the essential role of women's creativity in shaping cultures and collective imaginations. She emphasized that women's artistic, literary, and intellectual expression is a major driver of reflection on society, identity, and the human experience.

The conference also featured a reading of works by Moroccan artists, allowing for an exploration of the diverse forms that female creativity can take. These works reveal unique sensitivities and perspectives on the social, cultural, and personal realities that shape the female experience.

Rich in exchanges, the meeting offered participants a space for reflection on the links between artistic creation, critical thinking and the place of women in contemporary cultural production.

Through this series of conferences, the Euromed University of Fez reaffirms its commitment to promoting intellectual dialogue, the dissemination of knowledge and the opening of its university community to themes at the intersection of the humanities, culture and society.

Ibn Khaldun: A foundational thought at the crossroads of disciplines

As part of its lecture series for the 2025–2026 academic year, the Euromed University of Fez organized a conference entitled “Ibn Khaldun, an unclassifiable thinker”, led by Professor Abdessalam Cheddadi, professor and researcher in philosophy at the Institute of Scientific Research of the University of Rabat.

This presentation allowed participants to explore the richness of Ibn Khaldun's work, whose thought lies at the crossroads of history, sociology, and philosophy. Considered one of the forerunners of the social sciences, he offered an innovative analysis of the dynamics of societies, power structures, and the cycles of civilizations.

The conference also highlighted the contemporary relevance of his work, whose concepts continue to inform current social and political changes, attesting to the universal dimension of his intellectual legacy.

Marked by lively exchanges, this meeting provided a space for reflection on the foundations of Khaldunian thought and its lasting influence in the field of human and social sciences.

Through this series of conferences, the UEMF continues its commitment to the dissemination of knowledge, academic dialogue and intellectual openness, by proposing themes situated at the crossroads of disciplines.

The Euromed University of Fez hosted the Moroccan Day of Mathematics, an initiative organized by the Maths&Maroc association dedicated to youth and scientific culture.

On March 28, 2026, the Euromed University of Fez hosted the Moroccan Day of Mathematics (MDM), organized by Maths & Maroc with the support of the Hassan II Academy of Sciences and Technologies and Adria. The event brought together a diverse audience to promote scientific culture and the role of mathematics in contemporary transformations.

Through a rich program (conferences, interactive workshops, Maths Sprint), the initiative made mathematics accessible and attractive, while sparking the interest of young people. The presentations by Mr. Omar Fassi Fihri and Professor Mostapha Bousmina highlighted the central role of mathematics in science, technology, and innovation.
Finally, scholarships of excellence and awards were given to the winners, reinforcing the university's commitment to education and the development of talent.

The unlikely rise of a Moroccan tech multinational: the HPS case in the face of the changing landscape of digital payments

The unlikely rise of a Moroccan tech multinational: a look back at a conference at the heart of the changes in digital payment. As part of our Conference Series, we organized a meeting entitled: "The unlikely rise of a Moroccan tech multinational: the HPS case in the face of the changes in digital payment", moderated by Mr.Mohamed Horani, Chairman and CEO ofHPSand member of the Board of Directors of the Euromed University of Fez.

Through this meeting, the speaker offered an in-depth analysis of the growth trajectories of Moroccan technology companies, putting into perspective the structural transformations of the digital payment sector, marked by an acceleration of innovations and an intensification of competition on a global scale.

Drawing on his experience leading a key player, he shared concrete feedback on development strategies, innovation choices and internationalization dynamics that enabled HPS to establish itself as a global leader, while maintaining a strong Moroccan presence.

The conference also provided an opportunity to explore the changes in the fintech sector, addressing the challenges related to the digitalization of payments, the evolution of uses and the adaptation of business models in a constantly changing environment.

Rich in exchanges and perspectives, this meeting highlighted the essential levers for the success of technology companies, while emphasizing the strategic role of innovation, vision and adaptability in the development of leading companies on an international scale.

Euro-Mediterranean dialogue and youth engagement for a sustainable future

During Kaja Kallas' official visit to the Euromed University of Fez, a conference and interactive exchange were organized for students of various nationalities. This meeting addressed several key themes related to international security, regional stability, Euro-Mediterranean dialogue, and the central role of youth in building a sustainable and inclusive future.

The discussions highlighted the importance of education, international cooperation, and civic engagement in promoting peace and sustainable development. Through this initiative, the UEMF strengthened its role as a space for intercultural dialogue and strategic reflection, while also promoting the active participation of young people in global transformation.

The effects of climate change on water and biodiversity: a conference at the heart of contemporary environmental issues

As part of its commitment to disseminating knowledge and opening up to major contemporary issues, the Euromed University of Fez, in partnership with the Cervantes Institute, organised a conference dedicated to one of the major environmental challenges of our time: the impact of climate change on water resources and biodiversity.

Led by Carmen González Castro, Professor at the University of Vigo, this meeting, entitled "The effects of climate change on water and biodiversity: tools to mitigate it", offered a scientific perspective on the environmental transformations that are currently affecting ecosystems worldwide.

During her presentation, the speaker highlighted the growing consequences of climate change on water resources and natural balances, while also emphasizing the challenges related to preserving biodiversity. She further stressed the need for a better understanding of the interactions between these phenomena in order to anticipate their effects and strengthen adaptive capacities in the face of current environmental changes.

The conference also provided an opportunity to explore various tools and mitigation strategies that could contribute to better management of environmental challenges. Scientific approaches, sustainable strategies, and innovative solutions were presented as essential levers for preserving natural resources and supporting ecological transitions.

Beyond academic exchanges, this meeting provided a space for reflection and dialogue on issues concerning our collective future. It illustrates the shared commitment of the Euromed University of Fez and the Cervantes Institute to promoting cultural and scientific cooperation around major global challenges, while also fostering awareness and the transmission of knowledge to new generations.

Morocco, the challenge of power: Mr. AbdelmalekAlaouiUEMF tells us more

As part of its mission to promote academic excellence, intellectual dialogue, and engagement with major contemporary issues, the Euromed University of Fez (UEMF) organized a discussion and debate around the book "Morocco, the Challenge of Power" by Abdelmalek Alaoui, a Moroccan essayist and economist. Moderated by Professor Taoufik Ouazzani Chahdi, Advisor to the University President, this scientific and cultural event brought together students, faculty, administrative staff, and members of the university community for a forum for exchange and reflection on the economic, geopolitical, and strategic transformations of the Kingdom of Morocco.

During this meeting, the author presented the main themes developed in his book, including Morocco's historical evolution since independence, the structural reforms that have shaped its development, the dynamics of economic and diplomatic openness, and the challenges related to competitiveness, sovereignty, innovation, and integration within a rapidly changing international environment. The discussions allowed for an analysis of the factors that have contributed to the country's institutional stability, its resilience in the face of crises, and its growing prominence on the regional and international stage.

The event provided a unique opportunity for students to compare their academic knowledge with the experience of a recognized expert, while simultaneously developing their critical thinking, analytical skills, and understanding of the strategic issues shaping Morocco's future. The discussions also raised awareness of governance, sustainable development, innovation, leadership, and responsible citizenship.

Final Year Project (FYP) defenses of the 2nd cohort of the Master's program "Conflict Management and Alliance of Civilizations"

Final Year Project (FYP) defenses of the 2nd cohort of the Master's program "Conflict Management and Alliance of Civilizations", at the Euromed University of Fez. A decisive step for our students, future experts in intercultural dialogue and diplomacy, who present the fruit of two years of academic and professional commitment.

This master's program is:

- Supervised by the United Nations Chair for the Alliance of Civilizations
- Awarded by UNAoCF! Congratulations to the students for the quality of their work and their exemplary commitment!

UEMF Meeting – Health Professionals of the City of Fez: thinking together about the health challenges of tomorrow.

The Health Hub of the Euromed University of Fez was pleased to welcome health professionals from the city of Fez for a meeting focused on exchange and reflection on the major transformations taking place today in the health sector, and on the responses to the growing needs for expertise, innovation and training.

This meeting was an opportunity to present the UEMF Health Hub, which brings together the Faculty of Medicine, the Faculty of Pharmacy, the Faculty of Dental Medicine, the Faculty of Nursing and Health Sciences, as well as the School of Biomedical Engineering and Biotechnology, illustrating an integrated approach to training, research and innovation in the service of health.

The discussions also highlighted the progress of the future Euromed Hospital Complex, a structuring project intended to strengthen the training, research and care ecosystem developed by the University, while also opening up reflection on the new training and skills required to meet the evolving needs of the sector and the emerging needs of the health system.

Beyond the presentation of its infrastructure and academic offerings, this meeting provided a genuine space for dialogue between the academic world and professionals in the field, reaffirming UEMF's commitment to actively contributing to the development of an innovative, high-performing, and resolutely future-oriented health ecosystem.

Seminars, conferences & congresses

The UEMF is hosting the first day of the NEGIA Summit: Architecture for the Future Generation

The Euromed University of Fez had the honor of hosting, last Wednesday, the first day of the NEGIA Summit (Next Generation Impact Architects), an event organized by the Federation of Francophone Architects of Africa (FAFA), around the theme "Architecture for the future generation".

This inaugural day, held at the University Conference Centre, brought together young architects, urban planners and experts from across the African continent to collectively reflect on the challenges and prospects of African architecture in the face of contemporary technological, environmental and societal issues.

The discussions focused on several major themes, including the impact of new technologies on architectural design, the presentation of the texts and statutes of the G40 (the FAFA Group of Architects Under 40), as well as the role of younger generations in the sustainable transformation of African cities.

For the students of the Euromed School of Architecture, Design and Urbanism (EMADU), this meeting was an enriching learning experience, offering them the opportunity to interact directly with young architects, international experts, and representatives of African professional bodies. It broadened their perspective on the realities of the profession, while highlighting the central role of creativity, technology, and sustainability in contemporary architecture.

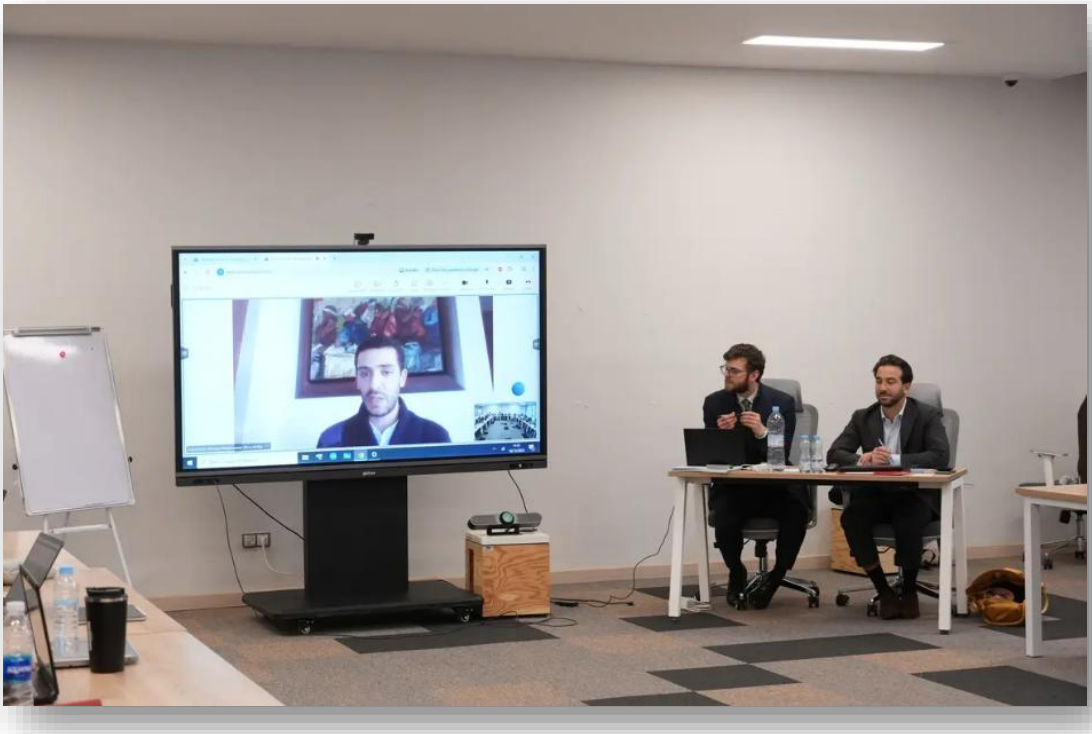

This first day of the NEGIA Summit was distinguished by a spirit of inspiration, collaboration and intergenerational transmission, faithful to the values of openness and excellence upheld by the Euromed University of Fez.

Fez hosts the 70th e FIJET World Congress: UEMF at the heart of the dialogue between tourism and media

Fez hosted the 70th e The 10th edition of the World Congress of the International Federation of Journalists and Writers of Tourism (FIJET) brought together more than 250 professionals from 70 countries to discuss developments in tourism and the role of the media in its sustainable promotion. The Euromed University of Fez played a central role by hosting the opening ceremony and the International Forum, reaffirming its position as a space for intercultural dialogue, innovation, and scientific cooperation. The congress also highlighted the region's heritage and sustainable development initiatives, while addressing current challenges in the tourism sector, including technological innovation and the ecological transition.

Practical seminar on CSR and Compliance at the Euromed University of Fez

On December 17 and 18, 2025, the Euromed University of Fez organized a practical seminar dedicated to Corporate Social Responsibility (CSR) and Compliance, in partnership with the University of Paris 1 Panthéon-Sorbonne and the international firm Hughes Hubbard & Reed LLP.

For two days, students, teachers, and professionals exchanged ideas on governance issues, the fight against fraud and corruption, and the practical implementation of CSR in business. The sessions combined expert presentations, feedback from experience, and practical case studies, while also raising students' awareness of the principles of the United Nations Global Compact.

This seminar illustrates UEMF's commitment to providing training aligned with international standards and professional realities in ethics and governance.

2025 AFCON: The Euromed University of Fez at the heart of the debate on soft power, identity and governance of African football

On January 5, 2026, the Euromed University of Fez, in partnership with the AFCON Organising Committee, organised a conference-debate entitled "CAN 25: soft power, identity and governance of African football".

Before nearly 600 participants, experts, academics, and institutional leaders discussed the role of the 2025 Africa Cup of Nations (AFCON) as a catalyst for international influence, African cooperation, and the sustainable development of sports infrastructure. Discussions also addressed the ethical and governance challenges facing African football.

Through this initiative, the UEMF confirms its role as an academic platform for strategic reflection on major contemporary sporting issues and on the future of African football.

Cold plasma: a key technology at the heart of scientific and industrial innovations

A scientific conference dedicated to cold plasma was organized at the University's conference center, highlighting an innovative process at the heart of many cutting-edge technologies, from industry to materials science.

Led by Professor Ahmed Rhallabi, University Professor and expert in microelectronics and VLSI technologies, this meeting provided a clear and accessible explanation of the strategic role of cold plasma processes in current technological innovations.

Through his presentation, Professor Rhallabi shared his research background and experience collaborating with industry, highlighting the concrete applications, scientific challenges, and prospects related to these technologies.

The conference resulted in rich and stimulating exchanges within the academic community, highlighting the importance of knowledge sharing and dialogue around scientific and technological advances.

Third Summit of Young Africans and Euro-Mediterraneans of the Euromed University of Fez: Headquarters of the Academy of the Kingdom, Rabat, January 19, 2026

The Euromed University of Fez organised, under the supervision of the United Nations Chair for the Alliance of Civilisations and in partnership with the Academy of the Kingdom of Morocco and the Hassan II Academy of Sciences and Techniques, the third Summit of African and Euro-Mediterranean Youth on January 19, 2026 in Rabat.

Dedicated to civic engagement and the pluralism of values, the event brought together young people from over 40 nationalities, experts, and Moroccan and international institutional leaders. Discussions focused on citizenship, living together, solidarity, diversity, values education, and contemporary challenges, particularly in the age of hyperconnectivity.

Organised in the form of plenary sessions, the summit concluded with recommendations formulated by the students, giving rise to the UEMF's "Call for the Future", in favour of strengthened civic engagement and a more harmonious society.

Franco-Brazilian Restructuring Days: Expertise and International Cooperation at the UEMF

Three days of expertise, dialogue and international cooperation within the UEMF.

The University hosted the Franco-Brazilian Restructuring Days this week, a major event organized by the Sorbonne Law School at UEMF. This meeting brought together professors, judges, researchers and practitioners to discuss contemporary issues of restructuring and insolvency from a comparative perspective.

Throughout the sessions and roundtables, participants analyzed the outcomes of insolvency proceedings in France and Brazil, the safeguard and recovery plan mechanisms, and the role and rights of shareholders in difficulty. These fruitful discussions highlighted the diversity of legal approaches and the challenges common to both systems.

This edition was also marked by a highlight: the visit to the Al-Qaraouiyine Library, considered the oldest in the world. A powerful symbol of the link between history, knowledge, and innovation, perfectly aligned with the Euro-Mediterranean and African mission of the UEMF.

The Restructuring Days concluded with a summary roundtable discussion, allowing for the identification of common perspectives and the strengthening of academic collaborations between France, Brazil, and Morocco. This was followed by the presentation of certificates to participants and the graduation ceremony for students of the Sorbonne-UEMF Master's program in Business Law.

Arbitration Colloquium Arab Countries & OHADA: launch of the first day at the UEMF.

This morning, we launched the 1st edition of the Arbitration Colloquium between Arab Countries and OHADA, organized by the Sorbonne Law School – UEMF, in partnership with theHenri Capitant Association.

This first day marks the beginning of two days of discussions bringing together practitioners, academics and renowned experts, around the major issues of international arbitration in Arab countries and the OHADA zone.

This symposium stands out as a true space for dialogue and sharing, promoting the confrontation of expertise and the strengthening of bridges between Arab and African legal cultures.

We thank all the speakers, participants and partners for their commitment and contribution to the success of this first day.

Digital Earth 2026: an international workshop at the crossroads of innovation, civil engineering and sustainability

As part of its international openness and commitment to educational innovation, the Euromed University of Fez, in partnership with the University of Surrey, organised the Digital Earth 2026 workshop, bringing together for four days students from the Euromed Polytechnic School (EPS) and their British counterparts.

This immersive program allowed participants to work in mixed teams on the challenges of digitalization in the construction sector and sustainable development. Through practical and innovative activities such as 3D concrete printing, modular construction, and materials characterization tests, students were able to apply their theoretical knowledge to real-world situations.

Guided by academic and technical experts from both institutions, participants developed essential skills in innovation, intercultural collaboration and solving real-world problems.

This initiative illustrates UEMF's commitment to providing high-level international educational experiences, combining academic excellence, technological innovation and preparation for the challenges of sustainable construction of tomorrow.

At the Euromed University of Fez, the "Mediterranean 2026" Prizes recognize figures committed to peace, dialogue and humanism.

As part of the Euromed University of Fez meetings on the Alliance of Civilizations, the "Mediterranean 2026" Awards ceremony honored individuals and institutions committed to peace, intercultural dialogue, international cooperation, and human development. Organized around the theme of artificial intelligence and the future of human civilization, the ceremony highlighted the importance of technological progress grounded in ethical, humanist, and solidarity-based values.

The awards recognized initiatives that contribute to bringing people closer together, promoting moderation, sharing knowledge, and developing an inclusive and sustainable vision of international relations. Through this event, the UEMF reaffirms its role as an academic and cultural space that fosters dialogue between civilizations, reflection on major contemporary challenges, and the building of a future based on peace, cooperation, and responsible innovation.

Introductory seminar on Nudge: an exploration of the mechanisms at the heart of decision-making

Yesterday, we organised a seminar dedicated to the introduction of Nudge, bringing together students, teachers and participants around the contributions of behavioural sciences in understanding and guiding individual and collective decisions.

Hosted by Adil GazaliAhmed DahhoukiYacoub Diftar, ProfessorMohcine ZouakImane Elhadart, this seminar allowed us to explore the cognitive foundations, behavioral biases and mechanisms that influence our choices, putting their applications into perspective in various contexts.

Discussions focused in particular on the integration of Nudge into public services, the training of engineers and the challenges of sustainable mobility, illustrating the potential of these approaches to design more effective policies and solutions, in line with the real behaviors of individuals.

A true space for reflection and dialogue, this seminar gave rise to enriching discussions, promoting the cross-fertilization of expertise and a better understanding of the interactions between science, engineering and public action.

An academic event that is fully in line with the UEMF's dynamic, aiming to promote innovative and interdisciplinary approaches to contemporary challenges.

At the UEMF, the 4e The Fes Restructuring Days edition brings together the leading voices of the sector

The Euromed University of Fez organized the 4th e eJournal editionees Restructuring of Fes, aeveinternational meeting dedicatedetoedevelopments in the law of companies in difficulty and modern restructuring mechanisms. Organised in partnership with the Sorbonne Law School, this meeting brought together more than 300 participants from Europe and Africa, including judges, lawyers, experts, researchers, students and professionals from the legal and economic sector.

Over two days, discussions focused on several themes related to cross-border restructuring, mechanisms for preventing business difficulties, governance, and new legal and economic resilience frameworks. The event also fostered dialogue between academic approaches and professional practices on an international scale.

Through this initiative, the UEMF confirms its commitment to academic excellence, international cooperation and the development of spaces for reflection on major contemporary legal and economic transformations.

Doctoral activities

Doctoral Thesis Defense in "Governance and Development" by Ms. Adjoba Audrey Paule N'ZE

This thesis examines institutional factors that explain differences in implementing the SDGs across territories, especially in Africa. It argues that sustainable development effectiveness depends more on local governance frameworks than on adopting universal standards.

After a literature review and bibliometric study, three key factors are identified: national institutional architecture, multi-stakeholder governance mechanisms, and the need for a multi-scalar approach. A theoretical framework based on regulation theory explains how institutional complementarity creates historical dependencies shaping governance.

Two case studies (Fez-Meknes region in Morocco and the Autonomous District of Abidjan in Côte d'Ivoire) reveal very different governance, financing, and intervention models. A qualitative analysis grid compares practices and shows that institutional logic and local power relations determine territorial trajectories more than

Sports activities

The Mini Africa Cup of Nations in Fez: three days dedicated to sport and community spirit

The Euromed University of Fez hosted a football tournament bringing together sixteen teams from several African countries, in collaboration with the Fez-Meknes Regional Football League and CESAM Fez. Organized over several days, the competition took place in a spirit of commitment, respect, and fair play, fostering exchange and closer ties among the participants.

The matches, supported by an enthusiastic crowd, highlighted collective discipline, the quality of play, and the players' commitment. Equatorial Guinea won the final against Chad, while the Moroccan team secured third place.

Through this initiative, the UEMF confirms its commitment to sport as a lever for cohesion, cultural openness and dynamism within university life.

1re UEMF Open Taekwondo edition: sport, discipline and commitment

The Euromed University of Fez organised the first edition of the UEMF Taekwondo Open, in partnership with the Royal Moroccan Taekwondo Federation and the Fez-Meknes Regional Taekwondo League.

Conceived as a highlight of meeting and sharing, this event brought together athletes around fights and sporting demonstrations, in a structured framework where rigor, discipline and commitment were expressed in respect of the rules and values of taekwondo.

The day concluded with medal ceremonies, celebrating the investment, determination and quality of performance of the participants, and recalling the essential role of sport in building pathways based on excellence, respect and civic engagement.

Through the organization of this first edition, the UEMF reaffirms its commitment to the development of university sports activities, while consolidating its position as an actor involved in the sporting dynamic at the national level.

National spirit, sport and youth: our campus proudly celebrated the 50th anniversary of the Green March

On November 6th, the Euromed Sports Center hosted a sports day combining mixed water polo and a men's basketball tournament, bringing together our students and junior teams from FAS, MAS, and USF. A competitive and dynamic atmosphere that reflects the commitment of our youth.

On the court, our students shone: a semi-final victory against FAS (47–30) and an intense final win against MAS (45–40). With over 80 participants, the event highlighted the commitment of our young athletes, the quality of play, and the excellent synergy between the teams.

Beyond the results, this day was a true moment of unity and patriotism, bringing together students, coaches, and officials around the values of solidarity and national pride. A memorable event that will remain etched in the sporting history of our campus.

UEMF Inter-University Tournament: two days dedicated to sport, sharing and collective commitment

To mark International Day of Sport, the Euromed University of Fez organised an inter-university tournament on April 4 and 5, bringing together students from several institutions around a rich and multidisciplinary sports programme.

Over two intense days, participants competed in various disciplines, including basketball, volleyball, table tennis, and water polo, in a spirit that combined performance, commitment, and fair play. Beyond the results, each match was marked by the quality of play, collective energy, and mutual respect. Much more than a competition, this event established itself as a true space for encounters and exchanges between university communities, fostering diverse interactions, the sharing of experiences, and the building of connections between students from different academic backgrounds.

🏅Tournament results:
🏓Boys' Table Tennis: 1re place – AUI (Al Akhawayn University of Ifrane) 2e Place – USMBA (Sidi Mohamed Ben Abdellah University) Girls: 1re and 2e places – AUI
🏐Boys' Volleyball: 1re place – USMBA | 2e Place – UEMF Girls: 1re place – USMBA | 2e place – UEMF
🏀Boys' Basketball: 1re place – USMBA | 2e Place – UEMF Girls: 1re place – USMBA | 2e Place – UIT (Ibn Tofail University)

Sporting and civic engagement: UEMF at the heart of the Fes Spiritual Marathon

As part of its commitment to well-being and active citizenship, the Euromed University of Fez participated in the Fez Spiritual Marathon as an official partner. On this occasion, the campus served as a checkpoint along the route, welcoming runners in a vibrant and friendly atmosphere.

University students also participated in this sporting event, demonstrating the values of pushing personal limits, teamwork, and collective commitment. Their participation reflects the university community's involvement in initiatives that promote a healthy and active lifestyle.

Beyond its sporting dimension, this participation reflects UEMF's desire to strengthen its connection with its local community by fully engaging in local social, cultural, and civic initiatives. It thus contributes to promoting an engaged university, connected to its city and an active participant in community development.

Heading towards the 4th edition of the Open Para-Karate Kata Fes at the UEMF.

The UEMF was pleased to host the fourth edition of the Open Para-Karate Kata Fes, organised by the Mohammed VI Foundation for Persons with Disabilities, in a dynamic of promoting inclusive sport and the values of self-improvement.

In an atmosphere marked by respect, discipline, and determination, theEuromed Sports CenterThe atmosphere came alive with demonstrations from these young athletes who came from all corners of the Kingdom. Through their performances, they powerfully embodied the values of karate, combining mastery, perseverance, and commitment.

Beyond the competition, this event was a powerful moment for raising awareness, highlighting the role of sport as a lever for inclusion, personal development and social cohesion.

We extend our sincere thanks to all the supervisors, chaperones, referees, volunteers, and participating delegations for their commitment and contribution to the success of this edition.

Through this initiative, the UEMF reaffirms its commitment to inclusion, diversity and sport for all, by offering an environment conducive to the expression of talents and the promotion of inspiring journeys.

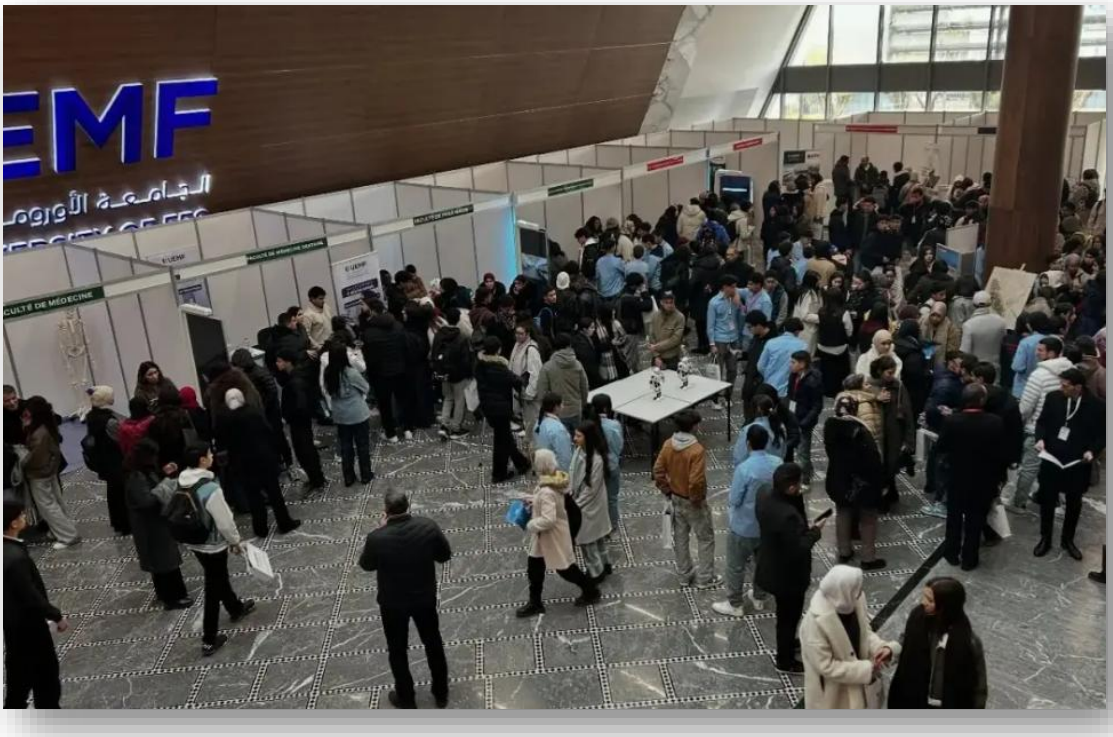

The Euromed University of Fez hosts the Moroccan Swimming Championships

The Euromed University of Fez hosted the Moroccan Swimming Championships from July 30 to August 1, 2026, organized by the Royal Moroccan Swimming Federation at the Euromed Sports Center. This national competition brought together swimmers from several clubs for various events, ranging from 50 to 1,500 meters, as well as relays.
The event showcased the UEMF's sports facilities and promoted the values of discipline, perseverance, respect, and excellence, while bringing together clubs, coaches, families, and sports enthusiasts. The University thus reaffirmed its commitment to promoting sport and hosting high-level national competitions.

Admissions activities and open house

Open Day: More than 2,900 high school students discover UEMF

More than 2,900 high school students passed through the doors of the Euromed University of Fez on the occasion of the Open Day, organized to support future students in their reflection on university orientation.

Upon arrival on campus, participants were welcomed and had the opportunity to speak with representatives from the university's schools and faculties to gain a better understanding of the courses offered, academic pathways, and study and career prospects.

The day continued with a tour of the facilities, offering a concrete glimpse into the learning and university life environment: classrooms, laboratories, living spaces and sports facilities. For one day, the university was transformed into a true space for dialogue and discovery, fully mobilizing its academic and administrative teams to listen to, guide and support high school students in building their future university path.

The UEMF Caravan: Going to meet the talents of tomorrow

True to its international focus and its African roots, the Euromed University of Fez continues its annual tour of meetings and exchanges across the continent, in order to support students in their study projects. For the 2026/2027 academic year, the university teams visited Tunis and Sousse, Dakar, Cotonou and Abidjan in particular.

The program for these meetings includes: participation in information and guidance fairs, exchanges with the parents of current and future students, training and coordination with local partner offices, as well as the signing of agreements and partnerships with universities and companies.

This approach not only allows us to present the training offer, but also to listen to, advise and support students in building their academic path.

Through these meetings, the University reaffirms its commitment: to support students in their study projects and strengthen ties with families and academic partners through the [context missing].

Open Day at UEMF, an immersion into the heart of our eco-campus

This Saturday, the UEMF welcomed more than 800 high school students, who came to discover a unique academic environment, combining innovation, sustainability and international openness.

Throughout the day, visitors were able to explore our latest generation eco-campus, designed as a true place for living, learning and experimentation and equipped with state-of-the-art educational and technological infrastructure.

It is also an opportunity to discover a rich and diverse range of training programs, covering a wide range of disciplines, and to interact directly with teaching staff, students and various university services, in order to better build their academic project.

Between immersive visits, inspiring encounters and personalized exchanges, this day allowed each participant to concretely envision their future university journey, within a stimulating and multicultural environment.

Through this initiative, UEMF reaffirms its commitment to supporting the talents of tomorrow, by offering them an environment of excellence conducive to personal development and academic success.

Diplomatic institutional visit

UEMF–EMUNI Conference at the European Parliament: Higher education at the heart of Euro-Mediterranean cooperation

On December 11, 2025, the Euromed University of Fez and EMUNI organised the “Bridging Continents” conference at the European Parliament in Brussels, highlighting the strategic role of universities in Euro-Mediterranean cooperation.

The event highlighted the co-creation of programs, joint degree programs and two-way mobility of students and teacher-researchers, as well as the importance of strengthening existing institutions (UEMF, EMUNI, UNIMED, TETHYS) to support applied research, innovation, technology transfer and scientific valorization.

The conference brought together academics, representatives of the European Commission, the Union for the Mediterranean, ambassadors and political decision-makers, confirming that the challenges of the Euro-Mediterranean area require joint and partnership action between the North and the South to promote innovation, scientific cooperation and sustainable development.

Visit of members of the Hassan II Academy of Sciences and Technologies to the Euromed University of Fez

The Euromed University of Fez (UEMF) hosted a delegation from the Hassan II Academy of Sciences and Technologies for a visit to its eco-campus and cutting-edge scientific and technological infrastructure. The delegation explored the Euromed Sports Complex, as well as several major technological platforms, including Morocco's largest additive manufacturing and 3D prototyping platform, partly resulting from innovation developed within the University itself.

The visit continued at Fez Smart Factory, a model 4.0 factory, and in various specialized laboratories in civil engineering, biotechnology, biomedicine, virtual reality, robotics and cobotics, as well as at the Euromed Innovation Center, an incubator dedicated to supporting young project leaders.

On this occasion, the President of the UEMF, Professor Mostapha Bousmina, highlighted the University's contribution to academic diplomacy through its international chairs and the strategic role of RIEMAS. This meeting underscored the UEMF's integrated vision and its commitment to the scientific development and international reach of higher education and research in Morocco.

Visit of the EPF Engineering School delegation to the Euromed University of Fez

The Euromed University of Fez (UEMF) was pleased to welcome a delegation from EPF Engineering School, one of the leading French engineering schools, led by Mr. Emmanuel Duflos, Director General of the institution.

This visit is part of strengthening academic cooperation between the two institutions, aimed at developing synergies around engineering programs and encouraging student and faculty mobility through internships, seminars and integrated training.

This meeting marks the continued development of the UEMF's international network of academic partners, and reaffirms its commitment to training engineers who are open to the world.

Courtesy visit of H.E. Tomasz Orłowski, Ambassador of Poland, to the UEMF

The Euromed University of Fez was pleased to welcome His Excellency Mr. Tomasz Orłowski, Ambassador of Poland to Morocco, for a courtesy visit.

Received by the President of the UEMF, Prof. Mostapha Bousmina, the Ambassador expressed his joy at being received at a university of international stature, whose multiculturalism constitutes one of the seven fundamental pillars.

During his speech, His Excellency also highlighted the pleasure of visiting Fez, an emblematic city of Moroccan heritage twinned since 1986 with the city of Krakow in Poland, a symbolic twinning between two former university capitals that share a long tradition of openness and intellectual exchange.

During this meeting, several avenues for academic and cultural cooperation were discussed, including student and teacher mobility between the two countries, the development of joint projects in the educational and cultural fields, as well as the possibility of collaborating on themes related to the alliance of civilizations, a strong focus at UEMF, supported by the Chair in Alliance of Civilizations and the RIEMAS Think Tank, dedicated to Euro-Mediterranean and African studies.

Courtesy and friendship visit of the Ambassador of Benin to the UEMF

The Euromed University of Fez (UEMF) welcomed His Excellency Mr. Joseph Ahanhanzo, Ambassador of the Republic of Benin to the Kingdom of Morocco, for a courtesy visit aimed at strengthening academic cooperation between Morocco and African countries. Received by the President of UEMF, Professor Mostapha Bousmina, the Ambassador praised the quality of the university's academic model, infrastructure, and equipment, as well as its role in training African talent.

This meeting resulted in the agreement of a concrete action plan for developing academic partnerships with Beninese universities, including joint training programs, capacity building in health and emerging technologies, and support for research, innovation, and entrepreneurship. Within this framework, the UEMF also donated two 3D printers to Beninese universities.

Placed under the banner of South-South cooperation, this visit illustrates the UEMF's commitment to African higher education geared towards sustainable development and the sharing of expertise.

The Euromed University of Fez welcomes Her Excellency Ms. Helena Nolan, Ambassador of Ireland to Rabat

The Euromed University of Fez had the honor of welcoming Her Excellency Mrs. Helena Nolan, Ambassador of Ireland to Rabat, accompanied by a delegation composed of Melanie Lynch, Founder, CEO & Creative Director of HerStory and Our Story, Dr. Antonia Hart, historian of women's entrepreneurship, Dr. Salomé Mbugua, CEO of AkiDwA and Commissioner at the Irish Human Rights and Equality Commission, as well as Nour-Elhouda Loqmane, Public Diplomacy and Consular Officer, for a courtesy visit within a dynamic of academic and cultural rapprochement.

This visit allowed the delegation to discover the University's eco-friendly campus, its academic, research, and wellness facilities, as well as the breadth of its multidisciplinary educational offerings. Discussions focused in particular on prospects for cooperation between UEMF and Irish institutions, especially regarding student mobility, academic partnerships, and cultural collaborations, all within a spirit of international openness and intercultural dialogue.

The holding of the conference "Women's Career Pathways: what shapes women's professional lives?", organized as part of the celebrations of St Brigid's Day, an emblematic day in Ireland honoring the creativity, resilience and contribution of women to society, provided a space for exchange between international speakers, students and teacher-researchers, but above all supported the University's commitment to equality, female leadership and the production of knowledge.

Discovering the UEMF innovation ecosystem during the signing of the Jazari Industry X.0 agreement

On the sidelines of the signing of the Jazari Industrie X.0 agreement, Professor Mostapha Bousmina, President of the Euromed University of Fez, led a tour of the eco-campus in the presence of Ms. Amal El Fallah Seghrouchni and Mr. Ryad Mezzour, accompanied by their delegations.

The guests discovered the university's main scientific and technological platforms, including laboratories in engineering, robotics, artificial intelligence and 3D printing, as well as the Euromed Innovation Center (EIC) where students presented innovative projects from the Project-Based Approach (PBA).

This immersion highlighted the innovation and research ecosystem of UEMF, confirming its role as an academic platform serving the technological and industrial transformations of Morocco.

Student events

Kidney transplantation: everything you need to know

As part of the national campaign to raise awareness about organ and tissue donation, the Rotaract UEMF club is committed with conviction to a profoundly human cause: saving lives through donation.

Because a gesture can offer a second chance, this initiative aims to inform, raise awareness and encourage everyone to reflect on the impact of this act of solidarity.

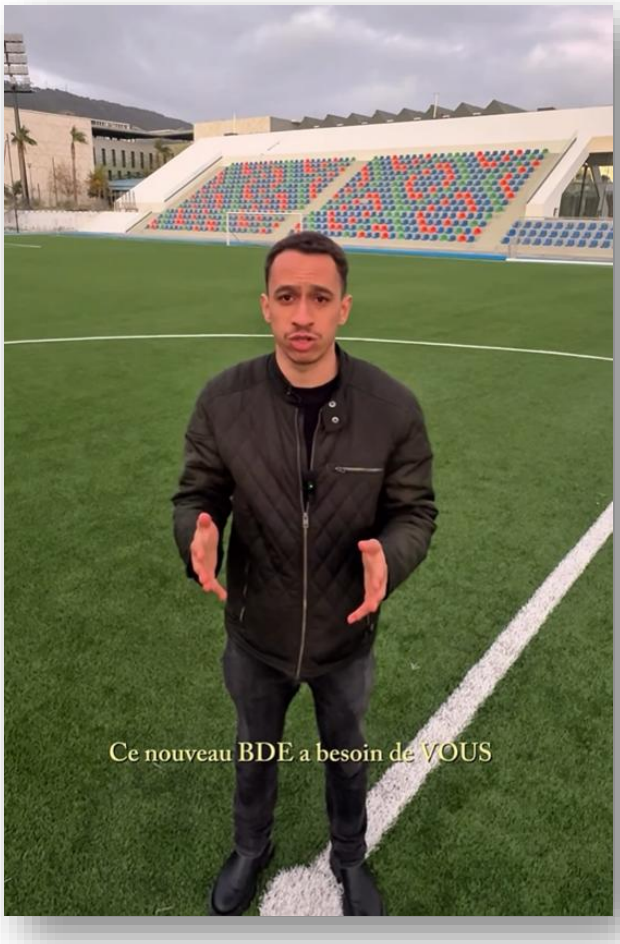

Under the banner of life, sharing and hope, this action is in line with the values upheld by the UEMF and the Rotaract movement: civic engagement, social responsibility and the promotion of health for all.

A scientific and human conference on the theme "Kidney transplantation: everything you need to know" marked this great momentum, with moving testimonies from transplant recipients.

Led by experts from the Faculty of Medicine of Fez, including Professor Tarik Sqalli Houssaini, Dean of the Faculty and Head of the Nephrology, Dialysis and Transplantation Department at Hassan II University Hospital, and Professor Basmat-Amal Chouhani, Associate Professor in Nephrology, Dialysis and Kidney Transplantation, this meeting provided a rich and hopeful space for exchange.

In partnership with the Errahma Association, the Health and Development Aid Initiative (ISAAD), the Hassan II University Hospital and the Faculty of Medicine of Fez, this meeting aims to be a space for exchange, awareness and hope, intended to change perspectives and encourage a culture of giving.

UEMF Welcomes its New Student Union

A new chapter begins at Euromed University of Fez with the creation of the Student Union. Presented in a recent video on the university's Instagram account, this union is founded on the values of unity, solidarity, and commitment. Supported by all the student clubs, its ambition is to restore students' confidence, take concrete action, and revitalize student life, making participation and cohesion the cornerstones of university life.

Tribute to the Doctors and Committed Members – Elite Club

The Elite Club held a thank-you ceremony to express its deep gratitude to the doctors and club members for their commitment and efforts during the caravans and humanitarian missions of the previous term. This event provided an opportunity to highlight their contributions, present them with certificates of recognition, and celebrate together the successes and positive impact of their actions on the communities they helped.

Breast Cancer Awareness and Prevention Workshop: Date: October 29, 2025 Location: Avicenne Clinic

As part of the Pink October campaign, the Elite Club organized a breast cancer awareness workshop at the Avicenne Clinic in Fez, led by Dr. Ahmed Guennoun, a specialist in gynecology, obstetrics, and infertility. The workshop brought together 20 female students from Euromed University to discuss this crucial public health issue.

The presentation focused on the importance of breast self-examination for the early detection of breast cancer and on best practices for regular screening. Through clear explanations and interactive demonstrations, participants were able to gain practical knowledge, ask questions, and exchange ideas in a friendly and participatory atmosphere.

This workshop was particularly enriching, combining medical expertise with dynamic discussions. It allowed the students to better understand the issues surrounding screening and encouraged them to disseminate this essential information within their communities, thus strengthening the impact of the awareness campaign.

Blood Donation Campaign – Rotaract Club

The Rotaract Club organized a two-day blood donation campaign on the university campus, with the aim of raising awareness within the academic community about the importance of blood donation and making a concrete contribution to saving lives.

This act of solidarity mobilized a large number of students, teachers, and administrative staff, all united around a vital humanitarian cause. In collaboration with qualified medical teams, a dedicated space was set up to ensure a warm welcome for donors and strict adherence to hygiene and safety standards.

Beyond the blood drive, this initiative promoted the values of solidarity, social responsibility, and civic engagement within the university community. It also strengthened the spirit of cohesion and cooperation among the various stakeholders on campus, demonstrating the positive impact that collective action can have in service of society.

Design thinking workshop – Enactus

The Enactus Club organised a Design Thinking training session within the incubator, led by Omar Ameur.

This training aimed to introduce participants to the various key stages of the Design Thinking process, including empathy, problem definition, ideation, prototyping, and testing. Through an interactive and dynamic approach, students were able to understand the importance of a user-centered approach in solving complex problems.

The session also included practical workshops allowing participants to concretely experience methods of collaborative thinking, brainstorming and rapid prototyping.

Beyond theoretical learning, this initiative fostered a spirit of innovation, teamwork, and the development of essential skills in entrepreneurship and project management, thereby strengthening the culture of innovation within the student community.

Meet the alumni of EPS – Club GENIUS

The Alumni Meet was a powerful moment of sharing, inspiration, and knowledge transfer within the club. This gathering created a genuine intergenerational bridge between current members and alumni of the Euromed University of Fez (UEMF), who are now fully integrated into the professional world.

In this first episode dedicated to EPS graduates, the speakers shared their academic journeys, professional experiences, and the challenges they faced after graduation. Through authentic and inspiring stories, they offered practical advice on career guidance, preparing for the job market, skills development, and the importance of networking.

Beyond a simple exchange, this event is part of the Create. Enhance. Sustain vision:

- Create: to create opportunities for dialogue and mentoring,
- Enhance: to strengthen students' ambitions and skills,
- Sustain: to maintain a lasting link between the university and its community of alumni.

This initiative has thus strengthened the sense of belonging to UEMF while motivating students to actively build their own professional trajectory.

Halloween Party – Elite Club

On November 7, 2025, the Elite Club, in partnership with Neverland Events, organized a Halloween party at the Euromed University of Fez. This festive event offered students a fun-filled break filled with creativity, music, and community spirit. The evening was a great success, drawing over a hundred students who came to enjoy a lively and friendly atmosphere. Performances by DJs MZ and Samado kept the crowd entertained, while Halloween costumes added a fun and original touch. The lighting and sound system contributed to creating an immersive and welcoming ambiance. Through this initiative, the Elite Club aimed to foster cohesion among students, promote well-being on campus, and enrich university life through unifying events. The party was a resounding success, strengthening the sense of community and reaffirming the club's commitment to enriching student life.

Health & Solidarity Caravan in Tigrigra – October 2025 - Elite Club

The Elite club organized a multidisciplinary medical caravan in Tigrigra, in the Ifrane-Azrou region, in order to bring healthcare closer to local populations and meet their medical needs.

This initiative mobilized 20 doctors from various specialties, including cardiology, gynecology, urology, ENT, ophthalmology, and dentistry. The beneficiaries were able to access:

A variety of consultations tailored to each specialty.

Comprehensive dental care, including extractions, restorative treatments, scaling and the fabrication of dentures,

Free distribution of medication, for comprehensive and effective care.

This action embodied a true moment of solidarity and humanitarian commitment, strengthening the link between the Elite club and local communities while contributing to the well-being and health of the inhabitants of Tigrigra.

Source: Club ELITE Report 25-26

School Health Caravan in Ain Chkef – November 2025 - Elite Club

A school health caravan was organized to improve access to healthcare and raise students' awareness of the importance of health. In the area of dental care, beneficiaries received consultations and treatments, including extractions and cleanings, as well as the distribution of oral hygiene kits containing toothpaste and toothbrushes, to encourage good habits from a young age. The medical component offered general consultations for basic screenings, as well as ophthalmological consultations to assess students' visual health. This caravan was a vital preventive and educational initiative, contributing to children's well-being and promoting a culture of health in schools.

Meet the Laureates – Episode 2: Spotlight on the EIDIA Laureates

The Alumni Meet – Episode 2 was a powerful moment of sharing, inspiration, and knowledge transfer within the club. This meeting created a genuine intergenerational bridge between current members and alumni of the Euromed University of Fez (UEMF), who are now fully integrated into the professional world.

In this second episode dedicated to EIDIA graduates, the speakers shared their academic journeys, professional experiences, and the challenges they faced after graduation. Through authentic and inspiring stories, they offered practical advice on career guidance, preparing for the job market, skills development, and the importance of networking.

Beyond a simple exchange, this event is part of the Create. Enhance. Sustain vision:

- Create: create opportunities for dialogue and mentorship,
- Enhance: strengthen students' ambitions and skills,
- Sustain: maintaining a lasting link between the university and its community of alumni.

This initiative has thus strengthened the sense of belonging to UEMF while motivating students to actively build their own professional trajectory.

Health & Solidarity Caravan – Initiative of the Elite Club in Sais

Club Elite organized a multidisciplinary medical caravan, bringing together several specialties to offer comprehensive and free care to local communities. This initiative took place on November 16th and mobilized 20 dedicated volunteers. Medical services offered: We set up several specialized booths including general medicine for basic consultations, pediatrics for children's checkups, gynecology for women's health, dermatology, ophthalmology, and dental care. Paramedical examinations (blood pressure, blood sugar, wound dressings) were also provided by our teams of medical and nursing students. Awareness and prevention: Beyond providing care, we conducted awareness workshops on hygiene, disease prevention, and good health practices, reaching the entire community. Impact: This caravan allowed us to treat several beneficiaries in a single day, identify several cases requiring medical follow-up, and, most importantly, establish a close connection with a population often far removed from healthcare facilities.

Official launch of the Hult Prize 2025–2026 at the UEMF

The Hult Prize Club UEMF officially launched the 2025–2026 edition of the Hult Prize at the Euromed University of Fez, marking the beginning of a new entrepreneurial adventure focused on social and environmental impact. This launch event provided an opportunity to present the international competition, its objectives, and the opportunities it offers to students wishing to develop innovative, high-impact projects.

Through an interactive and dynamic session, participants discovered the principles of social entrepreneurship, the importance of responsible innovation, and the role of leadership in addressing current challenges. The discussions encouraged students to think about concrete solutions to social and environmental problems, while developing their initiative and creativity.

This initiative is part of a broader effort to promote engaged, ambitious youth who are aware of their role in building a more sustainable future.

Medical and Humanitarian Caravan for the Benefit of the Residents of the El Haj El Hadi Tajmouti Retirement Home

On November 20, 2025, a medical and humanitarian caravan was organized at the El Haj El Hadi Tajmouti retirement home in the city of Fez. The aim of this initiative was to provide medical, psychological, and human support to the elderly residents of the facility.

The program included medical consultations to assess the residents' health and address their specific needs. Simultaneously, activities to provide emotional support and entertainment were organized to encourage interaction, combat isolation, and offer moments of conviviality and well-being.

The caravan also featured the distribution of donations aimed at improving the daily lives of those receiving assistance. This act of solidarity reflects a strong commitment to the respect, dignity, and well-being of the elderly, while reinforcing the values of solidarity and social responsibility among the participating volunteers.

Conference-Debate “End Plastic Soup”: Reflection and Commitment for a Sustainable Future

The Oratio Club, in partnership with the Rotaract Euromed Club, organised a conference-debate as part of the international “End Plastic Soup” week, an initiative aimed at raising awareness of the issues related to plastic pollution.

This event brought together students and members of both clubs for an enriching exchange on the role of plastic in our society today, its environmental and social impacts, and the long-term challenges it poses. The discussions also highlighted innovative solutions and sustainable alternatives for reducing our plastic footprint and promoting more responsible consumption patterns.

Through this interactive meeting, participants were encouraged to adopt a proactive stance and become agents of change, thus contributing to building a more environmentally friendly future.

HIV Screening Day at the Euromed University of Fez: Awareness, Prevention, Action – Elite Club

On November 20, 2025, an HIV screening was organized within the Euromed University of Fez, in collaboration with ALCS, as part of health awareness and prevention actions.

This initiative aimed to inform students about the importance of early detection, to dispel misconceptions about HIV, and to encourage a responsible attitude towards sexual health. Through educational support and open discussions, participants received reliable and relevant information.

The screening took place in a strictly confidential, secure environment, supervised by qualified professionals. Students benefited from personalized advice and supportive guidance. This initiative helped strengthen the culture of prevention, responsibility, and solidarity within the university community.

Mobile Medical and Dental Clinic in Tamedit: A Commitment to Solidarity in Service of Rural Communities

A multidisciplinary medical caravan was organized in Tamedit, in the Taounate region, to strengthen access to care for local populations and to meet the health needs of rural communities.

This initiative mobilized several medical specialties, allowing beneficiaries to access tailored consultations in various healthcare fields. Dental care played a central role, with consultations, extractions, restorative treatments, scaling, and the fitting of dental prostheses provided, ensuring comprehensive and high-quality treatment.

Furthermore, the pharmacy service provided free dispensing of prescribed medications, contributing to appropriate therapeutic monitoring and the improvement of patients' health.

Through this high-impact social action, the club reaffirms its commitment to health equity, the well-being of rural populations and the promotion of sustainable solidarity.

Master of Speech Club Finalist at Doc's Mic – FMP Fes (English Section)

The Master of Speech Club participated brilliantly in Doc's Mic – FMP Fès (English Section), an event dedicated to oral expression and the art of speech in English, organized within FMP Fès.

Thanks to their commitment and the quality of their performances, the club members proudly reached the final stage of the competition. This experience allowed them to showcase their public speaking skills, their fluency in English, as well as their creativity and ability to captivate an audience.

Beyond performance, this participation illustrates the club's ongoing commitment to promoting excellence in communication, strengthening self-confidence and developing leadership among its members, thus helping to train students capable of expressing themselves with impact and conviction.

Source: Club ELITE Report 25-26

Enactus Bootcamp: Strengthening Pitch Skills and Needs Analysis

The Enactus club organised a bootcamp in collaboration with Enactus ENCG Fès and Enactus FMDP Fès, aimed at strengthening the skills of participants in the context of entrepreneurial and social projects.

This event offered interactive sessions on Pitching, allowing students to effectively present their ideas and projects to an audience or juries, and on Needs Assessment, in order to better identify the problems of beneficiaries and design appropriate solutions.

Thanks to this bootcamp, participants were able to develop their confidence, refine their communication skills, and acquire practical tools to maximize the impact of their initiatives. This inter-university collaboration also fostered the exchange of experiences and the creation of a strong network among students engaged in social entrepreneurship.

Third Edition of the UEMF Talks: National Eloquence Competition

The Master of Speech Club organized the third edition of UEMF Talks, a national public speaking competition bringing together participants who speak in French, English, and Arabic. The event gathered 72 participants from 12 universities across Morocco, providing a prestigious platform to showcase talent and skills in oral communication.

This competition allowed students to demonstrate their oral fluency, creativity, and ability to persuade an audience in several languages. It also highlighted the importance of public speaking, critical thinking, and self-confidence in personal and academic development.

The UEMF Talks are a highlight for the club, reflecting its commitment to promoting excellence in communication and developing leaders capable of speaking with impact at the national level.

School Health Caravan in Aïn Chkef: Prevention and Well-being of Students by the Elite Club

On December 20, 2025, Club Élite organized a school health caravan in Aïn Chkef, in the Moulay Yaacoub region, aimed at promoting prevention and well-being among students. The dental component offered consultations, preventative care, and awareness campaigns to instill good oral hygiene habits and prevent dental disease from a young age.

In parallel, general medical consultations were conducted to assess the overall health of the students, while the ophthalmology department ensured the screening of visual disorders, guaranteeing comprehensive and preventive care.

This initiative by the Elite Club constitutes an essential educational and preventive action, strengthening the culture of health in schools and contributing significantly to the well-being and protection of students.

Source: Club ELITE Report 25-26

Hult Prize Online Workshop: Discovering Design Thinking for High-Impact Ideas

The Hult Prize Club organized its first online workshop dedicated to Design Thinking, offering participants a complete immersion in the key stages of this methodology: empathy, problem definition, ideation, prototyping and testing.

The workshop encouraged students to design innovative and high-impact solutions based on real human needs, while promoting active engagement, collaboration, and the sharing of ideas within the group.

This session enabled participants to develop their creativity, critical thinking and teamwork skills, while strengthening their understanding of user-centered innovation processes.

Solidarity visit to the Pediatric Hematology-Oncology Department of the University Hospital by the Elite Club

On January 8, 2026, the Elite Club, in collaboration with the PISE project and the Prosthetists Association, organized a solidarity visit to the pediatric hematology-oncology department of the University Hospital, with the aim of bringing comfort, entertainment and awareness to hospitalized children.

A specially designed space allowed the children to enjoy games and fun activities, two PlayStation consoles, and a library to encourage reading. Desserts and bottles of water were distributed to make their day more pleasant and enjoyable.

In parallel, the club carried out an oral health prevention campaign, distributing hygiene kits (toothbrushes and toothpaste), as well as essential products such as diapers, toilet paper and wipes.

This initiative made it possible to combine fun, education and care, strengthening the well-being of children and illustrating the solidarity and human commitment of the Elite Club towards young hospitalized patients.

Source: Club ELITE Report 25-26

Second Hult Prize Online Workshop: Transforming Ideas into Viable Projects

The Hult Prize Club organized its second online workshop, designed to guide participants in transforming their initial ideas into structured and viable projects.

The session combined interactive discussions and practical exercises, covering key stages such as ideation, project development, and concept refinement. Students were thus able to develop their creative thinking, their ability to analyze and structure ideas, and their social entrepreneurship skills.

This workshop provided a collaborative learning space that fostered strategic thinking and innovation, strengthening participants' commitment to creating solutions with a strong social and environmental impact.

Solidarity Caravan of the Mémoire en Scène Club: Support for Families in Need

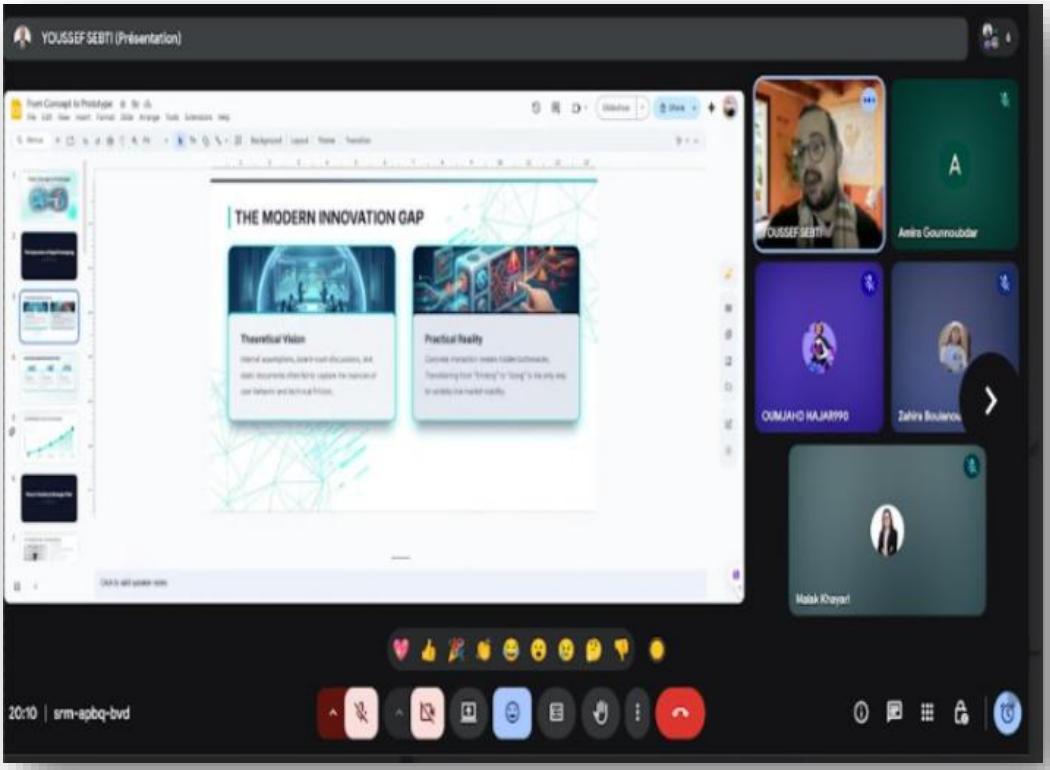

The Mémoire en Scène Club organised a solidarity caravan aimed at providing concrete support to families in vulnerable situations.

Through this initiative, 26 families received essential assistance, including food, basic necessities and social support.

This initiative reflects the club's commitment to social responsibility and community support, while raising awareness among its members of the values of solidarity, mutual aid, and active citizenship. It contributes to strengthening the local social fabric and improving the daily lives of those it serves.

Third Hult Prize Online Workshop: From Concept to Prototype

THEHult Prize Club organized its third online workshop, designed to support teams in prototyping their projects, transforming their ideas into concrete and testable solutions.

The participants discoveredpractical tools to structure, refine and validate their concepts, while taking part in interactive exercises, collective reflections and sharing of experience.

This session helped to strengthen thecreativity, rigor and innovative capacity of students, while effectively preparing them to present solid projects during the final Hult Prize competition.

ECG Interpretation Training led by Dr. Mohamed Amine Guessab 02/04

As part of its internal training program, the Elite Club organized, on Thursday, April 2, 2026, a training session in electrocardiogram (ECG) interpretation, led by Dr. Mohamed Amine Guessab.

The aim of this session was to strengthen the clinical skills of club members in reading and analyzing ECG tracings, an essential tool in the diagnosis of cardiovascular diseases. Through a combined theoretical and practical approach, participants acquired the fundamental principles of interpretation, as well as keys to applied clinical reasoning.

This initiative reflects the Elite Club's commitment to promoting excellence, capacity building, and skills development among its members by offering high-quality training led by experienced healthcare professionals. It also demonstrates the club's dedication to effectively preparing its members for the challenges they face in the field, particularly during medical caravans and community health initiatives.

Blood Donation Campaign – April 2 & 3, 2026

As part of its civic and solidarity actions, the Elite Club organized the "Blood Donation Campaign - April 2 & 3, 2026", an initiative aimed at raising awareness of the importance of blood donation and actively contributing to strengthening national reserves.

Over these two days, club members mobilized to encourage student and staff participation, while also ensuring logistical organization and providing optimal support to donors. This campaign resulted in a significant number of donations, contributing to saving lives and meeting the urgent needs of healthcare facilities.

Beyond its health impact, this initiative also provided a powerful moment for raising awareness and fostering solidarity, strengthening the spirit of commitment and social responsibility within the university community. It fully reflects the values of the Elite Club, founded on mutual support, volunteerism, and positive impact in service to society.

Solidarity Iftar – Ramadan 2026

As part of its Ramadan activities, Club Élite organized the "Solidarity Iftar – Ramadan 2026" initiative, aimed at promoting the values of solidarity, sharing, and civic engagement. This initiative involved preparing and distributing 150 iftar meals to people in need.

Made possible through the active mobilization of club members and the involvement of its partners, this initiative provided concrete support to beneficiaries, while strengthening the spirit of mutual aid and social cohesion, particularly significant during the holy month of Ramadan.

Beyond its humanitarian aspect, this action fully illustrates the Elite Club's identity as a committed actor, working towards a positive and lasting social impact. It also demonstrates the club's ability to initiate and lead solidarity projects with strong human value, responding to the needs of communities.

Source: Club ELITE Report 25-26

Tazouta Medical-Humanitarian Caravan – Sefrou Province

On March 8, 2026, the Elite Club of the Euromed University of Fez organized a mobile medical and dental outreach program in Tazouta, in the province of Sefrou, to benefit the local population. This humanitarian and healthcare initiative involved 15 doctors and 5 dentists, all working together towards a common goal: bringing healthcare closer to the inhabitants of rural areas and improving access to specialist consultations.

The mobile clinic provided medical consultations in several specialties, including gynecology (with ultrasound examinations), cardiology, gastroenterology, rheumatology, and dental care and consultations. Thanks to the commitment of healthcare professionals, student volunteers, and mobilized partners, this initiative helped meet the medical needs of many beneficiaries in a spirit of solidarity, prevention, and social support.

Source: Club ELITE Report 25-26

ECG Interpretation Training led by Dr. Mohamed Amine Guessab 02/04

As part of its internal training program, the Elite Club organized, on Thursday, April 2, 2026, a training session in electrocardiogram (ECG) interpretation, led by Dr. Mohamed Amine Guessab.

The aim of this session was to strengthen the clinical skills of club members in reading and analyzing ECG tracings, an essential tool in the diagnosis of cardiovascular diseases. Through a combined theoretical and practical approach, participants acquired the fundamental principles of interpretation, as well as keys to applied clinical reasoning.

This initiative reflects the Elite Club's commitment to promoting excellence, capacity building, and skills development among its members by offering high-quality training led by experienced healthcare professionals. It also demonstrates the club's dedication to effectively preparing its members for the challenges they face in the field, particularly during medical caravans and community health initiatives.

School Health Caravan – Ben Khlif School Group, Ouled Mimoun 11/04

On April 11, 2026, Club Élite organized the "School Health Caravan – Ben Khlif School Group, Ouled Mimoun," as part of its community health and school-based prevention initiatives. This initiative aimed to promote the health and well-being of students while reinforcing preventative practices from a young age.

During the day, students received general medical consultations, dental care and procedures, as well as visual acuity tests. Oral health prevention workshops were also held, along with the distribution of toothbrushes and toothpaste, to raise children's awareness of good dental hygiene practices.

This initiative fully illustrates the Elite Club's commitment to youth health and prevention, while demonstrating its ability to organize comprehensive and structured interventions to serve school communities. It also reflects the club's spirit of solidarity and social responsibility towards children and their educational environment.

Source: Club ELITE Report 25-26

School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi 18/04

On April 18, 2026, the Elite Club organized the "School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi," as part of its health and prevention initiatives for students. This action aimed to promote well-being and health prevention within the school environment.

During the day, students were able to receive general medical consultations, dental care and procedures, as well as visual acuity tests. In addition, oral hygiene workshops were held, along with the distribution of toothbrushes and toothpaste, to raise awareness among young people about the importance of hygiene and preventative care.

This intervention illustrates the Elite Club's commitment to improving student health and strengthening prevention from a young age, while demonstrating its ability to deploy comprehensive and structured health caravans, meeting the needs of local school communities.

Source: Club ELITE Report 25-26

Aïn Chkef clean: ecological commitment for a sustainable future

On April 18, 2026, the Elite Club of the Euromed University of Fez organized an ecological clean-up action in the Ain Chkef forest, located around Fez, as part of its commitment to the Sustainable Development Goals (SDGs), in particular SDG 13 (Climate Action) and SDG 15 (Life on Land).

This environmental initiative is part of a civic effort to raise awareness among students and participants about the importance of preserving natural ecosystems and biodiversity. Through concrete actions such as collecting and cleaning up waste, volunteers contributed to the restoration of this forest area, which is often damaged by human behavior and a lack of environmental responsibility.

Beyond its operational aspects, this activity provided a genuine moment of collective awareness regarding the urgent need to protect our environment. It reinforced the values of responsibility, commitment, and ecological solidarity among the participants, while also illustrating the essential role of youth in the transition to sustainable development.

Through this action, the Elite Club confirms its commitment to actively participating in the SDG movement, translating ideas into concrete actions with a positive impact on society and the environment.

Source: Club ELITE Report 25-26

Sexual and reproductive health: raising awareness for better prevention

On April 23, 2026, the Elite Club of the Euromed University of Fez organized a conference on sexual and reproductive health in partnership with ALCS and the Espace Santé Jeunes Ville Nouvelle Fez. The aim of this event was to raise student awareness of issues related to sexual and reproductive health through an educational, preventative, and participatory approach.

The conference focused primarily on three major themes: sexually transmitted infections (STIs), sex education, and contraception. Speakers emphasized the importance of access to reliable information, prevention, and adopting responsible behaviors to promote the health and well-being of young people.

Through interactive exchanges and enriching discussions, this initiative has created a space for open and constructive dialogue, helping to break taboos around sexual health and raising student awareness of these essential public health issues.

Mobile Medical and Dental Clinic in Ksar Jdid 26/04

On April 26, 2026, the Elite Club of the Euromed University of Fez organized a medical-dental caravan in Ksar Jdid, in the province of Rissani, as part of its humanitarian and social actions aimed at strengthening access to care in rural and remote areas.

This initiative mobilized a team of healthcare professionals and volunteers to provide multidisciplinary medical consultations to local residents. The services offered covered several specialties, including cardiology, gastroenterology, gynecology, dermatology, and ophthalmology, in addition to dental consultations and care, as well as general medicine.

The caravan aimed to bring health services closer to local populations, promote early detection, and raise awareness of the importance of prevention and medical follow-up. It thus enabled comprehensive and accessible healthcare for beneficiaries.

Through this action, the Elite Club reaffirms its commitment to solidarity, health promotion and social development in service of vulnerable communities.

Source: Club ELITE Report 25-26

Humanitarian caravan in Ksar Jdid: 150 blankets to support rural families

On May 3, 2026, the Elite Club of the Euromed University of Fez organized a humanitarian caravan to Ksar Jdid, in the province of Rissani, as part of its solidarity actions aimed at supporting rural populations and improving their living conditions.

This initiative is part of a local humanitarian approach, driven by values of mutual aid, solidarity, and social commitment. It enabled the distribution of 150 blankets to beneficiary families, helping them cope with the weather and meet their basic daily needs, particularly during cold periods.

Beyond the material aid, this caravan provided a powerful moment of sharing and connection with the residents, strengthening the bonds between the volunteers and the local population. This initiative reflects the Elite Club's commitment to providing concrete solutions to the needs of vulnerable communities and contributing to the improvement of their living conditions.

Through this type of initiative, the Elite Club confirms its long-term commitment to humanitarian action, social development and territorial solidarity.

Source: Club ELITE Report 25-26

A social and educational day for the benefit of the children of the Lalla Amina Center

On Thursday, May 7, 2026, the Elite Club of the Euromed University of Fez, in collaboration with the Directorate of Student Affairs, participated in the organization of a cultural and sporting day for the benefit of the children of the Lalla Amina Center for the Protection of Children.

This solidarity initiative was marked by the distribution of Elite bags containing school supplies, including pencil cases, pens, notebooks and coloring books, in order to support and encourage children in their educational journey.

During the day, the Elite Club also ran an oral hygiene awareness workshop, along with the distribution of toothbrushes and toothpaste. The workshop aimed to educate children about the importance of brushing their teeth and good hygiene practices to maintain their oral health.

Through this social and educational action, the Elite Club reaffirms its commitment to children, education and the promotion of health.

Mobile dental clinic in Izlafene: strengthening access to care and prevention

*

On May 9, 2026, the Elite Club of the Euromed University of Fez, in partnership with the IAA Club of the Faculty of Sciences and Techniques of Fez, organized a medical and dental caravan in Izlafene, in the province of Taza, as part of its community health and prevention initiatives. This initiative provided medical consultations in general medicine, cardiology, and gynecology, along with the dispensing of medication to diagnosed patients. A significant oral health prevention component was also implemented through awareness campaigns and the distribution of 400 toothbrushes and toothpaste to beneficiaries. Through this initiative, the two clubs helped bring healthcare services closer to rural populations while reinforcing awareness of the importance of prevention and medical follow-up.

Source: Club ELITE Report 25-26

Humanitarian action in Izlafene: solidarity and support for rural families

As part of the medical and humanitarian caravan organized on May 9, 2026, in Izlafene, the Elite Club of the Euromed University of Fez and the IAA Club of the Faculty of Sciences and Techniques of Fez also carried out a significant humanitarian effort to benefit families in the region. This act of solidarity enabled the distribution of 150 food baskets to beneficiary families, supporting vulnerable populations and contributing to the improvement of their living conditions. In addition, recreational and entertainment activities were organized for children, creating a moment of sharing, joy, and connection with the local community. This initiative reflects the values of mutual aid, solidarity, and civic engagement upheld by both clubs in support of social and human development.

Source: Club ELITE Report 25-26

Partnership

Strengthening bridges between academic and economic ecosystems

The Euromed University of Fez hosted a Chinese delegation of economic decision-makers to explore cooperation opportunities with Morocco. Discussions focused on several strategic sectors: smart agriculture, green economy, energy and batteries, clean technologies, environmental equipment, industrial digitalization, drones, biotechnology, and creative industries.

This visit provided an opportunity to showcase the university's technological platforms and innovation ecosystem, paving the way for academic, technological, and industrial partnerships. It reinforces UEMF's position as a regional hub for innovation and international cooperation in service of sustainable development.

Launch ceremony of theExecutive MBA Audencia – UEMF

It was in an atmosphere that was both friendly and full of ambition that the Audencia – UEMF Executive MBA was launched, in the presence of Mr. Taoufik OUAZZANI CHAHDI, Director of the EMBA program and Advisor to the President of UEMF, Ms. Khadija Essafi, Vice-President in charge of Academic and Cultural Affairs at UEMF, and Dr. Valérie Claude-Gaudillat, Head of MSc Business Strategy & Consulting and Professor of Strategy at Audencia, on the occasion of welcoming a first cohort with very diverse profiles.

The result of a collaboration between Audencia Business School (ABS) and the Euromed University of Fez (UEMF), this program of excellence is deployed at UEMF and leads to the awarding of a double degree; the Audencia – UEMF Executive MBA, holder of the triple AMBA, EQUIS and AACSB accreditation, as well as a degree awarded by the Euromed University of Fez.

Designed to support decision-makers in a constantly evolving environment, the Audencia-UEMF EMBA aims to train leaders capable of thriving in complex and uncertain contexts. The program develops a comprehensive understanding of management, combining strategic vision, agility, and the ability to transform, in order to support the creation of sustainable performance.

A new step for high-level executive education, serving leadership and academic excellence.

Signing of a cooperation agreement between the UEMF and the Union of French Citizens Abroad (UFE)

The Euromed University of Fez (UEMF) and the Union of French People Abroad (UFE) have signed a strategic partnership agreement aimed at strengthening international mobility, academic exchanges and solidarity between university communities and French people abroad.

This agreement is part of a dynamic of academic, scientific and cultural cooperation, promoting the sharing of expertise, the international influence of UEMF and the networking of talents and laureates on an international scale.

Alongside the signing, the UFE delegation visited several key infrastructures of the University, including the research-innovation platform and the incubator, illustrating UEMF's commitment to innovation and entrepreneurship.

Towards a new chapter of cooperation between the University of Paris 1 Panthéon-Sorbonne and the Euromed University of Fez

The Euromed University of Fez welcomed Professor Christine Neau-Leduc, President of Paris 1 Panthéon-Sorbonne University, to strengthen a robust academic partnership. This collaboration, already exemplary through the off-campus Master's program in Business Law, will be expanded to include scientific research, social innovation, the recruitment of postdoctoral researchers, and the creation of new dual-degree programs. The initiative aims to enhance talent development, foster innovation, and cultivate a high-impact international partnership.

[Call for applications] Erasmus+ mobility grants at Mykolo Romerio University of Rokiškis in Lithuania

The Euromed University of Fez is launching a call for applications for an Erasmus+ mobility grant, intended for academic staff in the fields of law, psychology, management, English, philology, education, commerce and economics who wish to undertake a mobility at the Mykolo Romerio University of Rokiškis in Lithuania.

[Call for applications] Erasmus+ mobility grants at Parthenope University of Naples in Italy

The Euromed University of Fez is launching a call for applications for three (3) Erasmus+ mobility grants, intended for doctoral students in the field of translation and interpreting wishing to undertake a mobility period at the Parthenope University of Naples in Italy.

Application deadline: November 14, 2025

Call for applications – Two scholarships in Canada | UQTR 2026–2027

CALL FOR APPLICATIONS

Canada Scholarship Program (CSB) – UQTR 2026–2027 Open only to doctoral students and/or students preferably registered from their 3rd year onwardsᵉPost-baccalaureate year. Deadline: Before January 20, 2026

Study in Canada (SCS) scholarships at the University of Quebec at Trois-Rivières (UQTR) – Canada

- Number of scholarships: 2
- Application deadline: January 20, 2026
- Academic year: 2026–2027

New international mobility opportunities: University of Sherbrooke, Canada

The UEMF hosted the University of Sherbrooke for a meeting dedicated to strengthening international academic cooperation and presenting opportunities available to our students.

Represented by Ms. Carine Huillier, project manager at the University of Sherbrooke office in France, this meeting highlighted a wide range of opportunities for academic exchanges and training pathways with an international dimension.

Our students were thus able to discover the mobility programs, university partnerships and double degree opportunities offered within the two campuses of the University of Sherbrooke, opening the way to pathways of excellence in strategic fields such as engineering, applied sciences, computer science or software engineering.

Through these initiatives, UEMF confirms its commitment to education that is open to the world, promoting the circulation of knowledge, the sharing of expertise and the employability of its students in an international academic and professional environment.

A meeting offering concrete perspectives for those who wish to build an academic career at the crossroads of continents.

Strengthening the partnership between the Euromed University of Fez and theFrench Institute of Morocco

As part of the strategic partnership between the UEMF and the French Institute of Morocco, a coordination meeting was held on October 29 at the UEMF, jointly chaired by Ms. Khadija Essafi and Ms. Carine Viallon. This meeting provided an opportunity to review the progress of the partnership and identify new areas of cooperation.

The discussions focused on strengthening French for specific purposes and certifications (DELF, DALF, TCF, TEF), the establishment of a joint cultural program, the promotion of Francophone research and cross-mobilities, as well as the development of innovative projects such as the Franco-Digital Lab and Mediterranean hackathons.

The meeting reaffirmed the shared commitment to strengthening the influence of the French-speaking world and consolidating a Euro-Mediterranean space for dialogue, knowledge and shared innovation.

[Call for applications] Mobility at the University of Liège

As part of its efforts to strengthen the international dimension of its programs, the Euromed University of Fez has launched a call for applications for academic mobility at the University of Liège, aimed at 2nd-year students.ᵉand 3ᵉannee of the cycle d'ingenieur en gedenie mecannichasL'Euromed Polytechnic School (EPS). This opportunityeallowseselected students to pursue a period of study in an international academic environment, fostering the development of scientific, linguistic and intercultural skills.

Candidate selection is based on academic criteria, language proficiency, and student motivation and commitment. The process includes several stages, including application submission, internal pre-selection, file evaluation, and interviews before final appointment by the university.

This initiative is part of UEMF's commitment to promoting international mobility, strengthening university partnerships and preparing future engineers to thrive in a globalized scientific and professional environment.

[Call for applications] Mobility at the University of Angers

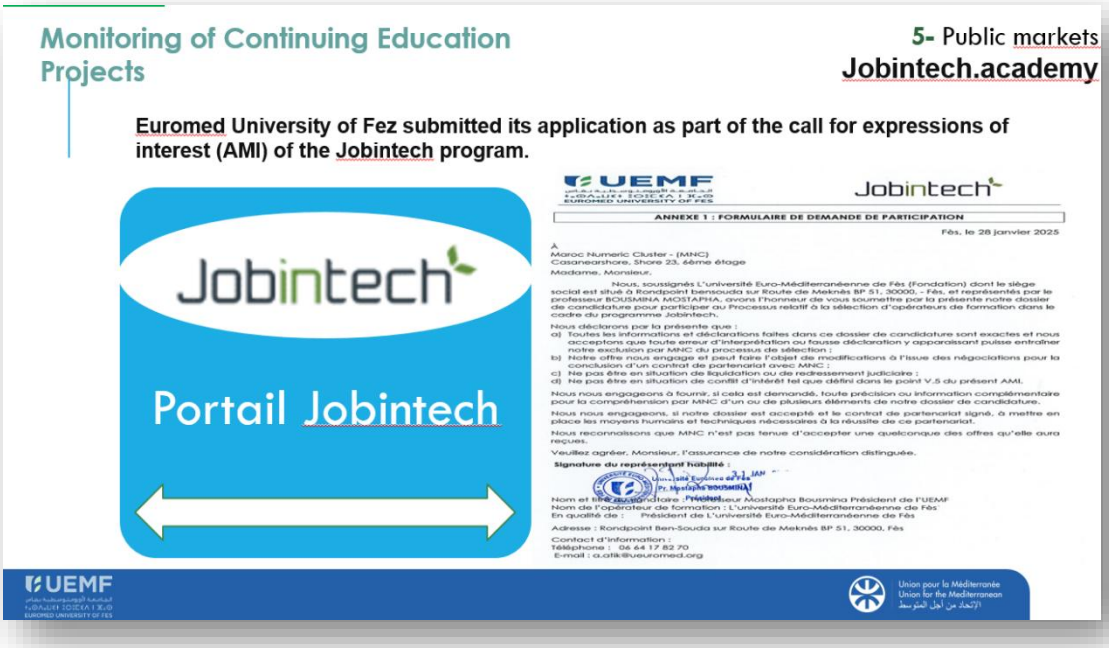

As
part of its efforts to develop international student mobility, the Euromed University of Fez has launched a call for applications for an academic exchange at the University of Angers, aimed at second-year students in the biomedical engineering program at the BiomedTech Engineering School (EIB). This opportunity allows selected students to pursue a period of study in an international academic environment, fostering the acquisition of scientific, linguistic, and intercultural skills.

Candidate selection is based on academic excellence, language proficiency, and student motivation. The process includes several stages, including application submission, internal pre-selection, file evaluation, and interviews before final appointment by the university.

This initiative reflects UEMF's commitment to promoting international openness, strengthening university partnerships and training engineers capable of evolving in a global scientific and professional context.

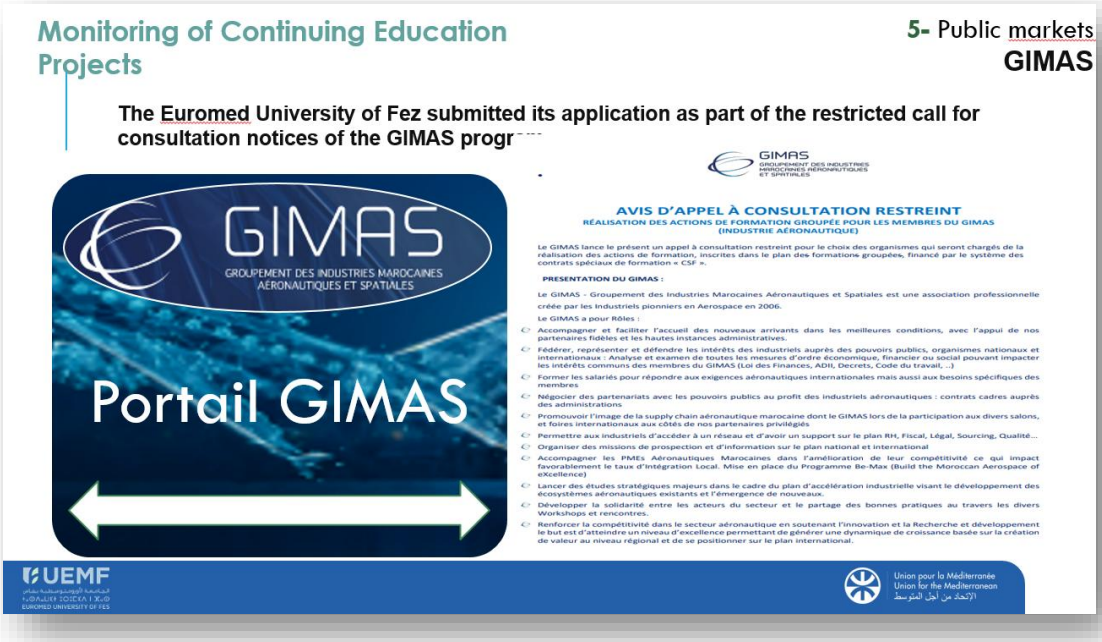

Application to the Call for Expressions of Interest – JobInTech Program (MNC)

On January 28, 2025, the UEMF, represented by its President, Professor Mostapha Bousmina, officially submitted its application to the Call for Expressions of Interest (CEI) launched by Maroc Numeric Cluster (MNC) within the framework of the national JobInTech program. This application, addressed directly to MNC and signed by the President of the UEMF, commits the university to providing the human and technical resources necessary for the success of a potential partnership. The proposal, completed on April 18, 2025, was deemed eligible and selected by the evaluation committee, thus placing the UEMF among the officially listed providers participating in the JobInTech program. This program aims to train qualified digital professionals to meet the regional needs of the digital job market. The actual allocation of training will be determined later in consultation with the JobInTech Monitoring Committee, according to a defined schedule. This selection represents strong institutional recognition of the quality and relevance of UEMF's training offerings in the field of information and digital technologies.

Application for the Restricted Tender – GIMAS Programme (Aerospace Industry)

UEMF submitted its application in response to the Restricted Call for Tenders issued by GIMAS (Groupement des Industries Marocaines Aéronautiques et Spatiales), a professional association founded in 2006 by pioneering aerospace industry leaders in Morocco. This call for tenders concerns the delivery of group training programs for GIMAS members, financed through Special Training Contracts (CSF), which are part of the group training plan. GIMAS's mission is to support industry players, advocate for their interests with public authorities, train employees to meet international aerospace standards, and strengthen the competitiveness of Moroccan aerospace SMEs, particularly through the Be-Max Program (Build the Moroccan Aerospace of Excellence). By responding to this call, UEMF affirms its strategic positioning as an essential player in vocational training in high value-added industrial sectors, and its desire to actively contribute to the development and competitiveness of the Moroccan aeronautical industrial fabric at the national and international level.

CFG Bank's Positive Response – Future Managers Training Program

UEMF developed and proposed to CFG Bank a customized training program designed to develop the managerial and strategic skills of the bank's next generation of executives. CFG Bank responded favorably to this initiative, thus validating the relevance and quality of the pedagogical approach proposed by UEMF. This approval demonstrates the recognition by a major player in the Moroccan financial sector of UEMF's ability to design continuing education programs perfectly tailored to the specific requirements of the banking world. This partnership is part of the university's proactive approach to supporting major Moroccan companies in developing the skills of their human resources and contributes to strengthening human capital within private financial institutions, a key factor in their competitiveness and sustainable development.

Executive Training Programme on Sustainable Social Finance – UNFPA

The UEMF submitted its application to the Executive Training Programme on Sustainable Social Finance and Blended Finance Mechanisms, an initiative fully funded by the United Nations Population Fund (UNFPA). This ambitious program was structured into five cohorts targeting distinct audiences: Civil Society, Government, the Private Sector, the Media, and Academia, for a total of 140 participants. Each cohort followed a modular program covering an introduction to sustainable social finance, blended finance, social bonds and Sukuk, Social Return on Investment (SROI), and tools and methodologies for designing impactful projects. All sessions took place between October and November 2025, culminating in an official closing ceremony on January 16, 2026, at the Bouregreg Palace in Salé, as part of the GIB project aimed at empowering vulnerable girls, particularly NEETs (Not in Education, Employment, or Training). This achievement illustrates UEMF's ability to design and deploy large-scale national certification training programs in partnership with major UN agencies.

Training Plan of the Fes-Meknes Regional Council (CRFM) – Strengthening Administrative and Technical Skills

The UEMF actively participated in the implementation of the 2025 Training Plan of the Fes-Meknes Regional Council (CRFM), aimed at strengthening the administrative and technical skills of the staff of this regional public institution. This process began with an in-depth diagnostic phase conducted in three stages: Phase 1 (May 9, 2025) of meetings with human resources managers, Phase 2 (May 19, 2025) of meetings with directors and department heads, and Phase 3 (May 26-27-30, June 5 and July 22, 2025) of broader interviews with all staff. Based on this diagnosis, a first training module was deployed on Quality Management and the requirements of the ISO 9001:2015 standard, organized on October 9-10 and 16-17, 2025. This intervention demonstrates the UEMF's commitment to strengthening the capacities of regional public institutions for optimized management in accordance with international quality standards.

GIZ Training Programme – Dorscht Impact (Circular Water Economy)

The UEMF has been selected to implement a specialized training program within the framework of the GIZ – Dorscht Impact partnership, focusing on the strategic theme of the circular economy of water in urban areas. This program, deployed in several Moroccan cities (Rabat, Marrakech, and Tangier), is structured into four thematic cohorts: Cohort M1, intended for institutional actors (agencies and ministries) on regulations, governance, and project management related to water (sessions held in Rabat on February 4-5 and 11-12, 2026); Cohort M4, focused on strategic urban planning and the integration of the EccEau concept (sessions in Marrakech and Tangier in February 2026); Cohort M2, targeting teachers and academic staff on the transition from theory to practice (sessions planned in Tangier and Marrakech in March-April 2026); and the M3 Cohort, designed for water sector professionals, focusing on the 5Rs of Water concept (sessions planned in Tangier and Marrakech in April 2026). This program positions UEMF as a leading player in training on environmental issues and the sustainable management of water resources in Morocco.

ALTEN 2025 Training Plan – Developing Innovation Skills

UEMF is actively involved in the implementation of ALTEN's 2025 Training Plan. ALTEN is an international engineering and technology group. This partnership is part of a strategic approach to anticipating future skills needs and supporting innovation within the company. UEMF assists ALTEN in developing the skills of its engineers and employees by offering customized training programs aligned with the technological requirements and innovation challenges of the sector. This collaboration strengthens UEMF's position as a partner of choice for major technology companies seeking to enhance the skills of their human resources, and demonstrates the recognition of its expertise in instructional design within the fields of technology and innovation.

Continuing Education Program for Elected Officials – Municipal Councils of the Province of Moulay Yaacoub (2024-2025)

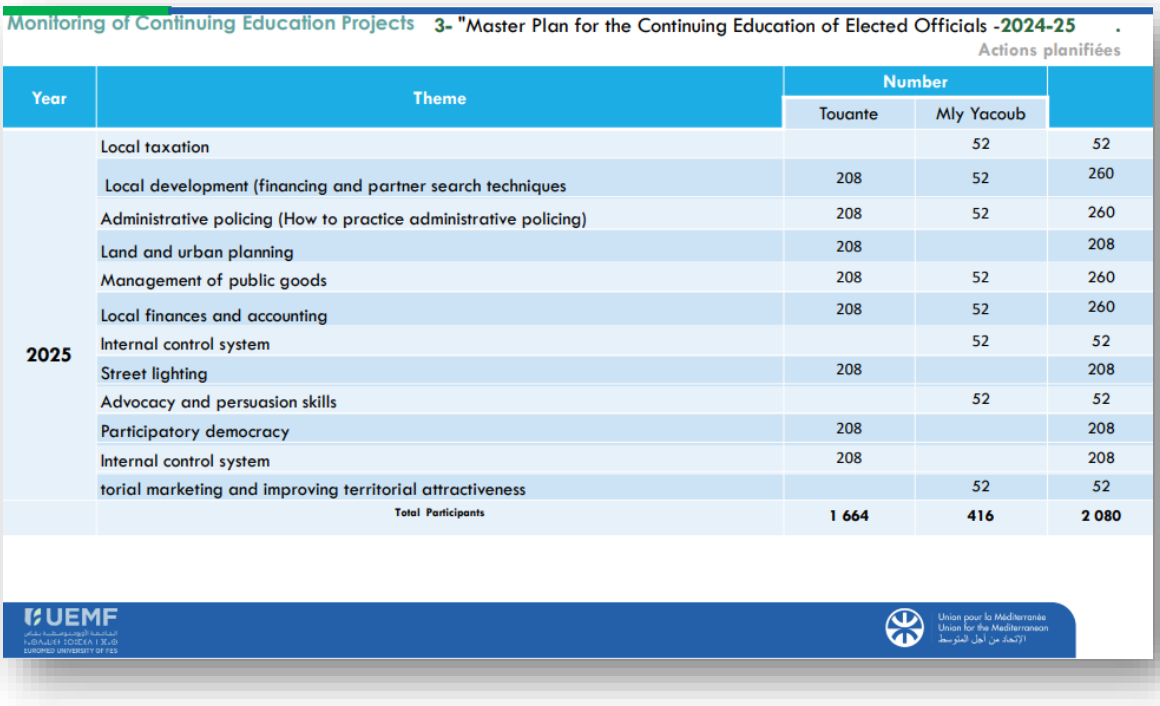

In parallel with the Taounate program, the UEMF has implemented a Master Plan for Continuing Education aimed at members of the Municipal Councils of the Moulay Yaacoub Province, with 52 participants per session, all held at the UEMF campus. This program covers 8 complementary thematic modules, delivered according to the following schedule:

- Local taxation – April 24-25, 2025
- Administrative police – May 21-22, 2025
- Community Heritage Management – June 4-5, 2025
- Local taxation, local finances and accounting – June 18-19, 2025
- Internal Control System – July 2-3, 2025
- Advocacy and Persuasion Techniques – October 15-16, 2025
- Local development (funding and partner search) – November 12-13, 2025
- Territorial marketing and improving territorial attractiveness – December 10-11, 2025

Holding these training sessions directly on the UEMF campus demonstrates the university's commitment to welcoming local elected officials in a stimulating academic environment, promoting exchanges and the sharing of best practices among participants from different municipalities in the province.

The Euromed University of Fez hosts a strategic event on AI and signs a structuring agreement for Industry X.0

On March 10, 2026, the Euromed University of Fez hosted a high-level event dedicated to the role of artificial intelligence in the digital transformation of organizations, with a focus on Industry X.0 and the healthcare sector. Organized in partnership with the Ministry of Digital Transition and Administrative Reform and the Ministry of Industry and Trade, this meeting was marked by the signing of the Jazari Industry X.0 agreement, aimed at strengthening synergies between academic research, industry, and public institutions in order to accelerate technology transfer and the commercialization of scientific research.

As part of the "AI Made in Morocco" program, this initiative aims to structure a national artificial intelligence ecosystem that fosters innovation, industrial competitiveness, and the creation of economic and societal value. The event also brought together public decision-makers, researchers, and industry representatives for two panels dedicated to technology transfer and the impact of AI in the healthcare industry, highlighting the opportunities and challenges associated with the deployment of artificial intelligence technologies.

[Call for applications] Dual degree program at the EPF School of Engineering

As part of its efforts to strengthen international engagement, the Euromed University of Fez offers a dual degree program with EPF Engineering School for Big Data and Artificial Intelligence students at EIDIA. This program allows selected students to complete part of their studies abroad, fostering the development of technical, linguistic, and intercultural skills.

Selection is based on academic performance, language level and motivation, through a structured process including application, pre-selection, interviews and final nomination.

This initiative is part of UEMF's commitment to training highly qualified engineers, capable of operating in an international environment and meeting current technological challenges.

[Call for applications] Mobility at the EPF Engineering School

The Euromed University of Fez offers a mobility and dual degree opportunity with EPF Engineering School, designed for students in Big Data and Artificial Intelligence. This program allows selected students to complete part of their studies abroad, strengthening their technical, linguistic, and intercultural skills.

Selection is based on academic results, language level and motivation, through a structured process including application, pre-selection and interviews.

This initiative aims to train engineers capable of thriving in an international environment and meeting current technological challenges.

EMBA Audencia – UEMF: Deployment of the 3rd Self Leadership module

Developing effective leadership begins with a deep understanding of oneself and others!

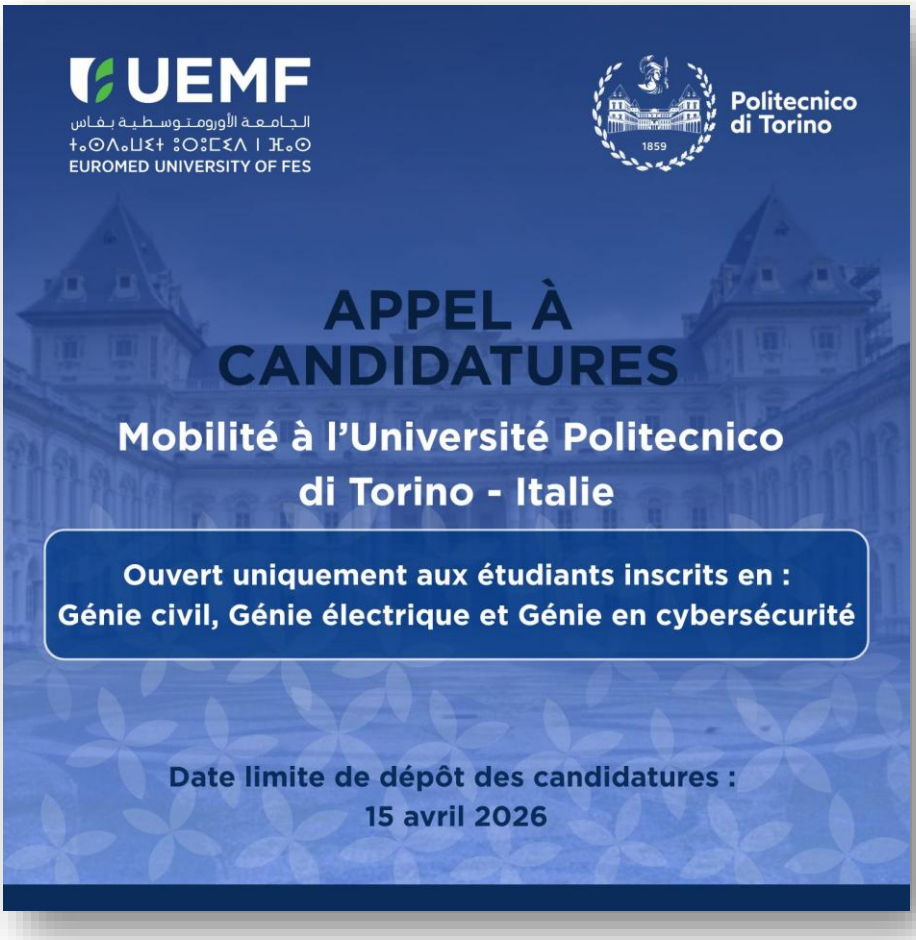

From March 27 to 29, 2026, as part of the EMBA programAudencia– UEMF, participants took the Self-Leadership module, led by ProfessorAgnes Boissiere Marchand.

Through an interactive teaching approach combining personality tests (MBTI), workshops, simulations and exchanges of experiences, this module made it possible to explore individual preferences, strengthen communication and negotiation skills, and adapt management styles to different contexts.

These three days also provided an opportunity to address key issues in contemporary leadership, such as stress management, team mobilization, and the quality of professional relationships.

A structuring module, at the heart of the training of leaders capable of adapting, inspiring and mobilizing in complex environments.

Applications now open – International Mobility

The Euromed University of Fez is launching a call for applications for academic mobility at the Politecnico di Torino University (Italy), intended for students enrolled in Civil Engineering, Electrical Engineering and Cybersecurity Engineering.

This program offers students the opportunity to gain international academic experience at a renowned partner institution, while developing their skills in strategic engineering fields.

Bernspire 2025-2026: Applications open for international student competitions

Bernspire, a Swiss association committed to education, innovation and the development of young talent internationally, announces the official opening of applications for the 2025-2026 edition of its academic competitions.

Organized annually on a supra-regional scale, Bernspire's Graduation Project Challenges are aimed at final-year university students in the fields of engineering and social sciences. This initiative seeks to promote innovative graduation projects that offer concrete solutions to contemporary technological, societal, and environmental challenges.

The competitions bring together participants from several international universities and are evaluated by a jury composed of academic experts and professionals from different countries, thus offering candidates international visibility and a unique opportunity to showcase their research and innovation work.

Applications are open to students preparing their final year project during the 2025-2026 academic year.

Students wishing to participate can consult the application procedures and submit their projects via the official Bernspire website:
www.bernspire.com/the-details

The results of previous editions and the winning projects can be viewed via:
www.bernspire.com/2024-2025-winners

The Euromed University of Fez and the Cervantes Institute of Fez seal a strategic partnership in service of Euro-Mediterranean intercultural dialogue

In a dynamic of strengthening academic and cultural exchanges between the two shores of the Mediterranean, Euromed University of Fez and Cervantes Institute of Fez have formalized a cooperation agreement marking a new stage in their joint commitment to intercultural dialogue and bringing people closer together.

The signing ceremony took place on Wednesday, May 13th, in the presence of Professor Mostapha Bousmina, President of the Euromed University of Fez, and Mr. Òscar Pujol Riembau, Director of the Cervantes Institute of Fez. The event was also graced by the presence of His Excellency Enrique Ojeda Vila, Ambassador of Spain to Morocco, demonstrating the importance attached to this cultural and academic cooperation initiative.

This agreement reflects a shared ambition: to make language and culture essential drivers of rapprochement, mutual understanding, and openness between Mediterranean societies. Through this alliance, the two institutions reaffirm their commitment to promoting intellectual exchange, intercultural dialogue, and academic synergies around Hispanic culture and language.

This partnership will pave the way for the implementation of a rich and diverse program of joint initiatives, including conferences, workshops, training programs and cultural events designed to foster interactions between students, teachers and cultural actors.

Beyond the institutional scope of this cooperation, this initiative illustrates a common vision based on openness, the transmission of knowledge and the development of a Euro-Mediterranean space where culture constitutes a strategic lever for sustainable rapprochement between academic communities and future generations.

UEMF Hosts Strategic Partnership Event to Advance Industry 4.0 and Digital Innovation

Euromed University of Fes hosted a partnership event bringing together UEMF,ANAPEC,CGEMFez-Meknes, andDigital Development Agency-ADDto support Industry 4.0 transformation.

The program opened with a guided tour of UEMF's technological platforms, including spaces dedicated to civil engineering, 3D printing, CNC machining, robotics, big data, and applied industrial technologies.

Speakers included Khadija Essafi,Tijani Bounahmidi,Abdellah CHOUIKH,Omar Tajmouati,Ghada BOUHLAL, andAsmae ABADI, who moderated discussions on how training, innovation, and business support can help companies adapt to new industrial challenges.

EMBA Audencia - UEMF: Deployment of the module "Principles of CSR and Business Law"

From June 19 to 21, the Audencia-UEMF Executive MBA cohort participated in a module on CSR and business law, led by Professor Thomas Blangis. Participants addressed governance issues, stakeholders, CSR frameworks, and the main regulatory frameworks for sustainability, including the CSRD (Consumer Standards and Regulations), due diligence, the European taxonomy, and ESG criteria.

The module also emphasized the integration of CSR into the governance, strategy and management of organizations, highlighting its role as a lever for creating sustainable value.

Awards and Distinctions

Round University Ranking 2026: Euromed University of Fez confirms its position as the undisputed leader in Moroccan higher education

For the second consecutive year, the Euromed University of Fez (UEMF) is ranked first university in Morocco in the prestigious international Round University Ranking (RUR) 2026, one of the most recognized university rankings in the world.

Based on international databases Clarivate / Thomson Reuters, the RUR ranking evaluates universities according to rigorous criteria related to the quality of teaching, scientific research and internationalization.
This distinction confirms the excellence of UEMF's academic model, based on scientific rigor, innovation, entrepreneurship, multilingualism, international mobility, and cooperation with the world's best universities. It also testifies to the relevance of its development strategy and its growing influence at the national and international levels.

This performance is part of a continuous dynamic of international recognition, illustrated by several major distinctions obtained in recent years in the fields of research, innovation, sustainable development and student mobility.
At the crossroads of Europe, the Mediterranean and Africa, UEMF pursues its ambition to build a world-class university capable of meeting the major challenges of our time, in accordance with the vision of its creator and Honorary President, His Majesty King Mohammed VI.

Triple E Awards 2025: The United Nations Chair for the Alliance of Civilizations at the Euromed University of Fez receives an award in Prague

The United Nations Chair for the Alliance of Civilizations at the Euromed University of Fez won the Alliance University of the Year award at the Triple E Awards 2025 on September 11, 2025, in Prague, among hundreds of international candidates. This major distinction recognizes the Chair's unique role as an academic institution committed to intercultural dialogue, peace, and development, extending beyond teaching and research. Offering accredited Master's and Doctoral programs, the Chair provides a space for scientific production and open exchange, bringing together students and international figures to discuss Euro-Mediterranean and African issues. This recognition is fully aligned with Morocco's vision of peace and the strategy of the United Nations Alliance of Civilizations, confirming the international influence and diplomatic role of the Euromed University of Fez.

UI GreenMetric International Ranking 2025

The Euromed University of Fez has been ranked the number one university in Morocco in the UI GreenMetric 2025 international ranking and is among the top 400 universities worldwide, representing 105 countries. It notably surpasses Ibn Tofail University, Mohammed VI Polytechnic University, and Mohammed V University of Rabat.

This ranking, based on 51 indicators related to sustainable development, innovation, teaching and research, confirms the national and international leadership of the UEMF.

In 2025, the university was also ranked 1st in Morocco and 2nd in Africa (behind the University of Cape Town) by the Round University Ranking, received the International Alliance University of the Year 2025 award, and had eight of its researchers ranked among the top 2% most impactful in the world according to Stanford's ranking.

These results are the outcome of a strategy focused on:

- Academic excellence,
- Research and innovation,
- International openness,
- Collaboration with the socio-economic world,

and the well-being of the university community.

Eight UEMF researchers distinguished among the 2% most influential scientists in the world

The Euromed University of Fez (UEMF) was distinguished in 2025 on the international scientific scene, with eight teacher-researchers ranked among the 2% of the most influential scientists in the world, according to the Stanford University ranking (Elsevier–Scopus).

The researchers honored are: Prof. Mostapha Bousmina, Prof. Chakib Nejjari, Prof. Abdelkarim Elkadib, Prof. Chakib Alaoui, Prof. Belkheir Hammouti, Prof. Taibi Ben Hadda, Prof. Rajae Salim and Prof. Elhachmia Ech-Chihbi.

This distinction, based on rigorous bibliometric indicators, illustrates the progress of Moroccan research and the growing international influence of the UEMF, whose number of distinguished researchers has doubled compared to 2024.

Admission to the Paris Bar for students of Sorbonne–Euromed Morocco

The Sorbonne Law School program relocated to the Euromed University of Fez, in partnership with Paris 1 Panthéon-Sorbonne University, achieved exceptional success in the French bar exam in December 2025: five students were admitted, a result higher than that of many prestigious French institutions.

Led by Professor François-Xavier Lucas, this program is highly selective, recruiting from thousands of applicants, with a balanced distribution between Moroccan, European, and sub-Saharan students. Students follow an intensive program combining academic excellence and professional practice, and earn a dual French-Moroccan degree in business law, enabling them to be admitted to the bar in both France and Morocco.

The program's unique feature lies in its strong professional immersion through international events such as the Fes Restructuring Days, which bring together experts, judges, and executives from Europe and Africa each year. The training is also becoming increasingly international, having recently welcomed Brazilian professionals.

Supported by prominent figures in the Moroccan legal profession such as Azzedine Kettani, Hicham Naciri, and Laila Slassi, this program offers students strong professional visibility..

Tribute to Professor Tijani Bounahmidi: a career of excellence in the service of science, higher education and innovation.

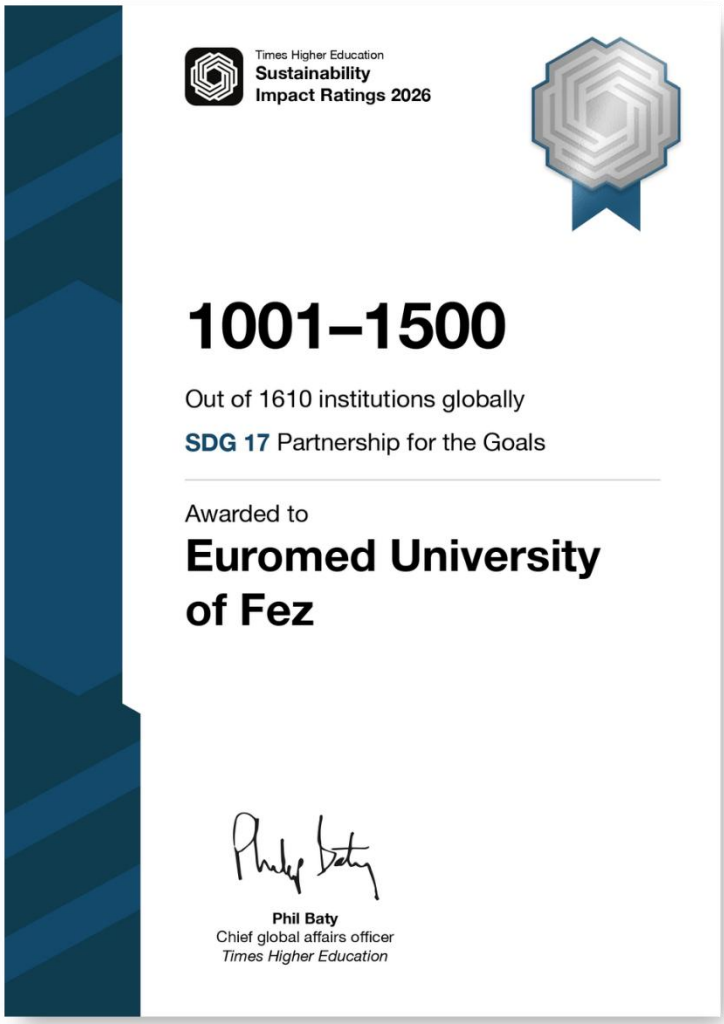

The Euromed University of Fez paid tribute to Professor Tijani Bounahmidi, Vice-President in charge of the University Technology Center, in recognition of his exceptional career in the service of science, higher education and innovation.

This ceremony brought together the university community, academic figures, colleagues, alumni, and relatives of Professor Bounahmidi for a moment of gratitude and recognition. The various tributes highlighted his commitment to research, teaching, and the transmission of knowledge, as well as his lasting impact on several generations of students and researchers.

The ceremony concluded with the presentation of an honorary trophy, a symbol of UEMF's recognition of its remarkable contribution to the development and influence of the institution.

UEMF's performance in THE Impact Rankings 2026 – SDG 17

In the THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 1001–1500 range out of 1,610 institutions for SDG 17: Partnerships for the Goals. This recognition underscores the importance of its national and international collaborations, academic networks, and partnerships in support of education, research, and sustainable development.
