SDG11 REPORT

SUSTAINABLE CITIES AND COMMUNITIES

2026

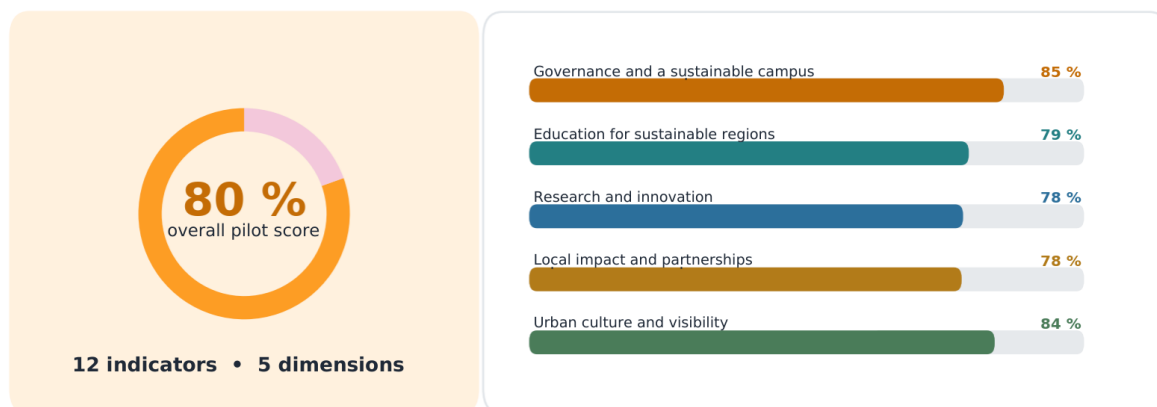

Monitoring of UEMF's commitments to SDG 11

SDG 11 UEMF 2026 in figures

Sustainable cities and communities Campus, regions and resilience

Targets proposed based on observations. The internal index is neither a THE score nor an exhaustive measure of regional sustainability.

A sustainable campus and regional action

From institutional frameworks to local action

7

core policy documents

climate, mobility, energy, procurement and responsibility.

5

operational levers

climate, mobility, energy, procurement and dialogue.

6

partnerships

local institutions and professionals.

2 080

attendances

training for elected officials from two provinces.

Recognition and outreach

THE Impact 2026: 301-400 out of 865 • UI GreenMetric 2025: Top 400 worldwide

These rankings are external reference points and are excluded from the internal overall score.

Documented commitments are distinguished from achievements, beneficiaries and measured local effects.

Education, research and the sustainable city

From courses to communities and regions

54

courses explicitly identified

architecture, civil engineering and urban planning law.

21

SDG 11 research topics and projects

cities, buildings, mobility, heritage and resilience.

Urban culture and heritage

8 academic events • 70 countries at the FIJET Congress • over 250 professionals

NEGIA, Forum Rihab and Digital Earth connect architecture, cities and innovation.

2 080 attendances • 12 local governance themes • 2 provinces

The university diploma in urban planning adds 30 professionals trained in Rabat.

The curriculum mapping groups repeated sessions; schools must confirm the content actually taught.

2026: The Euromed University of Fez consolidates its impact in support of the SDGs

Introduction :

The Euromed University of Fez actively contributes to the promotion of sustainable cities and communities through its educational projects, training programs, and academic activities related to architecture, urban planning, engineering, and the environment. By organizing workshops, conferences, and awareness campaigns, the University fosters innovation, collective reflection, and the development of solutions tailored to urban and environmental challenges. Through these initiatives, UEMF participates in the training of citizens and professionals committed to building more sustainable, inclusive, and resilient territories.

This report is structured to highlight the University's key contributions to this Sustainable Development Goal. It presents the institutional policies implemented, the educational offerings (E-SDG), and research and innovation activities. The report also highlights the conferences and events organized, club activities and student life, as well as the awards and distinctions that illustrate the University's commitment and influence in this area.

UEMF Policies

The Euromed University of Fez contributes to the promotion of sustainable communities by developing an environmentally friendly campus. It implements policies aimed at improving quality of life and reducing its ecological impact. The management of mobility, energy, and infrastructure is a central pillar of its strategy. The university encourages sustainable modes of transport and limits the environmental footprint of its activities. It also fosters a healthy and inclusive living environment for its community. The Euromed University of Fez is thus committed to territorial sustainability. It contributes to building a model of a sustainable and resilient campus.

Carbon neutrality and climate action policy of the Euromed University of Fez (Version 2025)

1. Engagement institutionnel :

L'Université Euromed de Fès (UEMF) s'engage à atteindre la neutralité carbone à l'horizon 2030, conformément aux protocoles internationaux sur les gaz à effet de serre (*Greenhouse Gas Protocol*) et aux Objectifs de Développement Durable des Nations Unies (ODD 13 - Lutte contre les changements climatiques).

Cet engagement traduit la vision de l'UEMF en tant qu'université durable, inclusive et innovante, moteur de la transition énergétique et écologique au Maroc et dans la région euro-méditerranéenne.

2. Axes stratégiques d'action :

a. Gestion environnementale du campus

- Réduction progressive des émissions de CO₂ liées aux bâtiments, à la mobilité et aux opérations ;
- Production d'énergie renouvelable grâce à des installations photovoltaïques et thermiques solaires ;
- Mobilité électrique gratuite pour les déplacements internes (voitures et navettes électriques, bornes de recharge) ;
- Recyclage et valorisation des déchets plastiques et organiques, verdissement du campus ;
- Captation des eaux pluviales pour l'arrosage des jardins ;
- Traitement et recirculation des eaux grises pour des besoins d'arrosage ;
- Utilisation de matériaux moins énergivore et durable ;
- Conception architecturale prévoyant le maximum de lumière naturel ;

1

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

Policy for limiting and reducing the parking area on campus (version 2025)

Politique de limitation et de réduction de la surface de stationnement sur le campus

(Version 2025)

1. Préambule :

L'Université Euromed de Fès (UEMF), en cohérence avec ses engagements en faveur du développement durable et de la mobilité responsable, met en œuvre une politique visant à limiter et réduire progressivement la surface de stationnement sur son campus. Cette initiative s'inscrit dans la stratégie globale de l'Université en matière de transition écologique, de réduction des émissions de gaz à effet de serre et de promotion de la mobilité durable.

Cette politique s'aligne sur les Objectifs de Développement Durable (ODD), notamment :

- ODD 11 : Villes et communautés durables.
- ODD 12 : Consommation et production responsables.
- ODD 13 : Lutte contre le changement climatique.

2. Mission de la politique :

La politique de limitation du stationnement sur le campus a pour mission de :

- D'encourager la mobilité durable en réduisant l'usage des véhicules individuels motorisés.
- D'optimiser l'espace sur le campus en diminuant progressivement les zones de stationnement au profit d'espaces verts, d'infrastructures pédagogiques ou d'équipements collectifs.
- De promouvoir des alternatives de transport écologique accessibles à la communauté universitaire.
- De sensibiliser et accompagner les étudiants, enseignants et personnels administratifs vers un changement durable de comportements de mobilité.

The UEMF is committed to promoting sustainable and responsible mobility within its university community. This policy aims to facilitate access to the campus while reducing the environmental impact of travel. It encourages the use of public transport, carpooling, and active travel modes such as cycling and walking. The University is implementing appropriate infrastructure and partnerships with local stakeholders to guarantee accessible, safe, and environmentally friendly mobility.

UEMF Energy Efficiency Policy (2023-2026)

Gestion environnementale et Campus durable

L'UEMF a mis en place des actions concrètes pour informer et sensibiliser les membres de la communauté universitaire afin de limiter l'impact environnemental et le réchauffement climatique.

Infrastructures :

1. Le campus de l'UEMF est un Éco-Campus qui respecte les meilleurs standards internationaux en matière de développement durable. Il a été labélisé par la COP 22 (ODD 11).
2. L'Université a obtenu en 2021 le label francophone d'innovation responsable et en 2022 le label « Établissement Responsable de l'Année » (ODD 9).
3. Les bâtiments de l'Éco-campus de l'UEMF sont construits selon l'approche « Haute Qualité Environnementale » limitant tout impact environnemental néfaste par le biais de choix précis :
 - o Matériaux locaux faiblement énergivores (ODD 12).
 - o Matériaux assurant une bonne isolation thermique et phonique (ODD 13).
 - o Architecture ouverte assurant le maximum de lumière et luminosité naturelles (ODD 9).
 - o Utilisation de sources d'énergies propres et renouvelables : installation de panneaux photovoltaïques sur de larges surfaces des toits des bâtiments pour la production d'énergie électrique avec mesure en temps réel de l'énergie récupérée (ODD 7, ODD 13).
 - o Installation de panneaux solaires thermiques pour la production d'eau chaude (ODD 7).
 - o Installation sur le campus de projecteurs dotés de cellules photovoltaïques et de batteries autonomes (ODD 7).
 - o Installation en cours de conduites et de bassins pour la récupération des eaux pluviales (ODD 6).
 - o Traitement et recirculation des eaux grises (des lavabos, etc.) (ODD 6).
 - o Construction / réhabilitation de bâtiments à énergie positive (ODD 13).
 - o Utilisation d'une économie circulaire (minimiser le gaspillage en optimisant la valeur générée par les ressources) (ODD 12).
 - o Installation sur l'Éco-campus de l'UEMF de bornes de recharge pour les voitures électriques, les seules de la Région Fès-Meknès et les seules sur un campus universitaire au Maroc (ODD 11).
 - o Installation sur le campus de l'Université des trottinettes et des motos électriques gérés par la startup de l'Université POGO (ODD 11).
 - o Engagement ferme de l'Université pour garantir que toutes les rénovations, restaurations ou nouvelles constructions obéissent aux plus hautes normes d'efficacité énergétique et de développement durable (ODD 11).

UEMF is committed to optimizing its energy consumption and promoting the use of renewable energy. This policy aims to reduce the University's carbon footprint while ensuring the efficiency of its infrastructure.

Stakeholder identification policy

Politique UEMF d'identification des Parties prenantes

(version révisée 2025)

Définition (tirée de la norme « AA1000SES ») :

« Les parties prenantes (« Stakeholders ») sont les individus, les groupes d'individus ou les organisations qui ont un impact sur les activités, les produits et les services d'une organisation, et/ou qui peuvent être affectés par elles. »

Pour une organisation universitaire, les parties prenantes regroupent donc l'ensemble de ceux qui participent à sa vie (étudiants, enseignants-chercheurs, personnel administratif et technique, salariés, clients, fournisseurs, financeurs, ...), à son organisation (décideurs, élus, pouvoir public) et à son image (ONG, société civile, collectivité locale, média, ...).

Parties prenantes de l'UEMF selon ses statuts :

- Parties prenantes internes :
 - Décideurs : Membres des divers conseils
 - Personnel enseignant-chercheur
 - Personnel administratif et technique
 - Étudiants
- Parties prenantes externes :
 - État, représenté par différents ministères
 - Collectivités (région Fès-Meknès, Ville de Fès, ...)
 - Élus locaux
 - Acteurs économiques (entreprises membres de la Confédération Générale des Entreprises du Maroc, CRI, chambre de commerce et d'industrie, ...)
 - ONG / Associations / Communautés locales
 - Banques nationales ou internationales
 - Compagnies d'assurance
 - Média

The UEMF recognizes the importance of its stakeholders in the success of its missions. This policy defines the methods of dialogue, listening, and cooperation with students, teachers, institutional partners, and economic actors.

UEMF Responsible Procurement Policy (Version 2025)

Politique des achats responsables de l'UEMF
Version 2025

La Direction Achats et Logistique a pour principal objectif de satisfaire les besoins des clients internes, en obtenant la meilleure performance des fournisseurs (Qualité / Coût / Délais / Services) dans le respect des ODD, de la réglementation en vigueur et en lien avec la stratégie générale de l'UEMF.

Mission de la fonction achat et logistique

De manière générale, la fonction achat et logistique a pour mission de :

- Conduire une veille marché régulière (ODD 8).
- Recueillir les besoins des clients internes tout en évitant la surconsommation en fin d'exercice (ODD 12).
- Décrire la procédure achats responsable et la diffuser en interne (ODD 4).
- Lancer les consultations, mener le sourcing et le choix des fournisseurs (ODD 12).
- Soutenir les acteurs économiques du territoire, associations à but non lucratif et entreprises sociales (ODD 8).
- Négocier les tarifs et les conditions d'achat (ODD 12).
- Passer les commandes (ODD 12).
- Assurer l'ensemble des opérations logistiques (ODD 12).
- Promouvoir des véhicules électriques et hybrides pour le transport interne des personnes/marchandises (ODD 11).
- Veiller au respect des règles, procédures et lois en vigueur (ODD 16).
- Veiller au respect des normes et déontologies du métier : équité, transparence, égalité des chances et absence de conflits d'intérêt (ODD 16).
- Intégrer des critères relatifs au développement durable et respect des droits de l'homme dans les règles de notation des fournisseurs et marchés (ODD 12).
- Encourager la mutualisation des équipements, notamment d'impression (ODD 12).
- Rationaliser les achats et sensibiliser les utilisateurs à une consommation responsable (ODD 12).
- Inscrire dans les clauses de passation des marchés le respect de l'environnement et la fin de vie des produits (ODD 12).
- Éviter autant que possible l'acquisition et l'utilisation de substances chimiques/toxiques, de matière plastique, d'articles jetables, d'appareils à piles et renforcer l'acquisition de luminaires à basse énergie (ODD 12, ODD 3).
- Promouvoir le recyclage et la valorisation des déchets (ODD 12).
- Donner la priorité dans ses achats aux :
 - Produits peu consommateurs d'énergie, d'eau, à coût de fonctionnement faible et à moindres frais de gestion des déchets (ODD 7, ODD 12).
 - Critères suivants : coût, qualité, disponibilité, conditions de livraison, service après-vente, respect de l'environnement et de la santé, bonne réputation du fournisseur (ODD 12).

With this policy, the UEMF is establishing a framework for ethical and sustainable procurement. It encourages the selection of suppliers who share values of transparency, social and environmental responsibility.

Smoke-free policy (Revised version 2025)

**Politique Sans Fumée à l'UEMF :
Une Démarche Vers le Développement Durable**
(version révisée 2025)

À l'Université Euromed de Fès (UEMF), la mise en place d'une politique sans fumée contribue directement à plusieurs Objectifs de Développement Durable (ODD) en favorisant un environnement plus sain et plus durable sur le campus. Cette initiative ne se limite pas à la promotion du bien-être, mais témoigne également de l'engagement de l'université envers des pratiques durables.

1. ODD 3 : Bonne Santé et Bien-être

En interdisant de fumer sur le campus, l'UEMF fait un pas important vers l'amélioration de la santé publique. Le tabagisme étant une des principales causes de maladies évitables, la création d'un environnement sans fumée permet de réduire l'exposition à la fumée secondaire, protégeant ainsi les fumeurs et les non-fumeurs de ses effets nocifs. Cela s'aligne sur l'ODD 3, qui vise à garantir une vie en bonne santé et à promouvoir le bien-être de tous, à tous les âges.

2. ODD 4 : Éducation de Qualité

Un campus sans fumée favorise un meilleur environnement d'apprentissage, ce qui soutient l'objectif de l'ODD 4 visant à assurer une éducation de qualité, inclusive et équitable. La réduction des distractions et la promotion de comportements sains permettent aux étudiants de mieux se concentrer sur leurs études et améliorent l'expérience éducative globale.

3. ODD 11 : Villes et Communautés Durables

En contribuant à un environnement plus propre et plus sain, la politique sans fumée est en adéquation avec l'ODD 11, qui appelle à rendre les villes et les établissements humains inclusifs, sûrs, résilients et durables. La limitation du

UEMF is committed to preserving the health and well-being of its community by implementing a smoke-free policy on its campus. This initiative promotes a healthy environment conducive to learning and community life.

Corporate Social Responsibility (CSR) Charter (Revised version 2025)

3. Ancrage territorial et implication locale

Être un moteur de développement économique, social et culturel de la Région Fès-Meknès, et plus largement du Maroc, contribuant à l'objectif de réduction de la pauvreté et d'amélioration des infrastructures (ODD 1 et ODD 11).

4. Insertion professionnelle

Soutenir nos lauréats dans leur insertion professionnelle et la création d'entreprises innovantes, favorisant la croissance économique et l'emploi décent (ODD 8).

5. Egalité Femmes-Hommes

Garantir l'égalité entre les sexes en termes de recrutement, inclusion, formation, accès aux postes de responsabilité, et égalité salariale à compétences égales, en conformité avec l'ODD 5 (Égalité des sexes).

6. Protection des groupes vulnérables

Assurer une inclusion et une protection pour les personnes vulnérables (handicapés, femmes, émigrants, demandeurs d'asile), en accord avec les principes d'inclusion sociale et de justice pour tous (ODD 10).

7. Engagement envers la santé

Avec l'émergence du **pôle santé** et le projet de construction d'un **CHU**, l'UEMF s'engage à contribuer activement à l'amélioration de la santé et du bien-être (ODD 3) au niveau régional et national. Le campus intègre également un **complexe sportif aux normes internationales**, promouvant un mode de vie sain parmi les étudiants et la communauté.

This charter formalizes the integration of social responsibility at the heart of the UEMF's missions. It outlines concrete commitments in the areas of ethics, governance, respect for the environment and contribution to sustainable development.

E-SDG

The training programs offered by EMADU and EIDIA contribute to SDG 11 – Sustainable Cities and Communities – by developing skills in architecture, urban planning, design, and digital technologies. EMADU trains architects, urban planners, designers, and landscape architects capable of designing sustainable living spaces, developing territories, planning cities, preserving heritage, and improving the quality of life. In addition, EIDIA develops skills in artificial intelligence, robotics, cybersecurity, and digital technologies, applicable to smart cities, digital infrastructure, and innovative urban services.

SCHOOL OF DIGITAL ENGINEERING & ARTIFICIAL INTELLIGENCE

1. PREPARATORY CYCLE

The Integrated Preparatory Cycle at the School of Digital Engineering and Artificial Intelligence is designed to provide students with in-depth scientific and technical training, enabling them to access the various digital engineering tracks. This program combines courses in computer science, electronics, applied mathematics, and humanities and social sciences, in order to lay a solid foundation for the rest of their studies in the engineering cycle.

2. ENGINEERING PROGRAM

Sectors:

- Artificial Intelligence (AI)
- Robotics and Cobotics
- Big Data Analysis
- Information Technology and Cybersecurity
- Full Stack and Multimedia Engineering

3. MASTER'S PROGRAM

ICT Security and Artificial Intelligence
(dual degree program with George Washington University)

Skills in artificial intelligence, robotics, cybersecurity and digital technologies can be mobilized to develop solutions for smart cities, digital infrastructure and innovative public services.

SCHOOL OF ARCHITECTURE, DESIGN AND URBAN PLANNING

1. **ARCHITECT'S CYCLE:**Architect's Degree (Bac +6)

The diploma obtained through this program is an architecture degree with Moroccan recognition and accreditation:

2. **BACHELOR'S DEGREE PROGRAM:**Bachelor's degree in Design (3 years post-high school)

The EMADU Design degree is designed to train designers capable of creatively managing, beyond the object, decision-making processes, mediation and the integration of multidisciplinary contributions; thus enabling graduates to work across a very wide range of sectors.

3. **MASTER'S PROGRAM:**Master in Global Design (Bac+5)

EMADU offers an innovative, multidisciplinary, and internationally focused program that promotes practical learning, critical thinking, innovation, and the development of skills necessary for design professions.

EMADU trains architects, urban planners, designers and landscape architects capable of designing sustainable living spaces, developing territories, planning cities, preserving heritage and improving the living environment of citizens.

Research, Innovation & Entrepreneurship

Research Topics - Doctoral Cycle

As part of the Euromed University of Fez's contribution to the SDGs, a selection of doctoral research topics related to SDG 11 has been identified. This work focuses in particular on sustainable architecture, urban transformation, mobility, smart cities, resilience, heritage enhancement, landscape, and thermal comfort.

The table below presents the main research topics contributing to this objective.

Thesis Subject	related SDGs
Local Bio-Sourced Materials and Process Integration in 3D Concrete Printing	SDG 11
Numerical Simulation of the Extrusion and Layer Deposition Processes in 3D Concrete Printing	SDG 11
Optimization of Freight Mobility in the City: Urban Integration and Intermodal Potential	SDG 11
Transforming an Unsustainable City into a Sustainable One: The Case of Fez	SDG 11
How to Think the Landscape Future in Africa? Towards an African Convention of Landscape	SDG 11
From Abandonment to Urban Renaissance: Sensitive and Strategic Approaches to Rehabilitating Urban, Agricultural and Industrial Spaces	SDG 11
Modeling and Optimizing Building for Energy Efficiency Using the Digital Twin Concept	SDG 11
Hybrid Experiments-Based Numerical Simulations in 3D Cement Printing for Clay-Based Bio-Sourced Materials Development	SDG 11
Synthesis of Bio-Sourced Cementitious Materials for Additive Manufacturing in Construction	SDG 11
Interdisciplinary Spaces in Educational Architecture: Influencing Behavior, Perceptions, and Emotions in the Learning Experience	SDG 11
A Study and Conception of an Optimized and Secure Routing Protocol for IoT Platforms using Artificial Intelligence Algorithm	SDG 11
Eco-Resilient Earthen Construction: Integrating Material Innovation, Seismic Safety and Environmental Sustainability	SDG 11
Geo-spatial analysis of urban transformations in the medina of Fez	SDG 11
Cooling the city – microclimatic strategies for thermal comfort and energy efficiency	SDG 11
Sustainable architecture and the identity of places in sub-Saharan African countries	SDG 11
Sustainable architecture and energy efficiency: integrated approaches between architecture and geography in the Moroccan context	SDG 11

Thesis Subject	related SDGs
Autonomous and Cognitive Navigation for Mobile Robots via Deep Learning and Large Language Model (LLM) Integration	SDG 11
Sustainable Landscape Strategies and Experiential Agro-Tourism in Moroccan Rural Villages	SDG 11
Smart Integration of Electric and Hybrid Vehicles into the Power Grid	SDG 11

Research projects2025-2026

Title	SDG RELATED
Adaptive Reuse and Industrial Tourism for Sustainable Urban Regeneration: A Korea-Morocco Comparative Framework for Riads, Hanoks, and Urban Voids	SDG 11
AgroMaBio (Agroecological Market Gardens for Biodiversity and Socio-Climate Resilience: Cross-City Studies)	SDG 11

[Opinion] From "Made in Morocco" to "Trade via Morocco": how the Kingdom is reshaping global trade routes

The "Made in Morocco" label has long symbolized an emerging industrial pride. Textiles, leather, and later automobiles and aeronautics, were the showcases of this productive Morocco. But by 2025, this label is no longer enough to reflect the Kingdom's ambition.

The country is not just a manufacturing hub: it is becoming a logistical and strategic crossroads, at the heart of the reshaping of global trade flows. This profound transformation signals the shift from "Made in Morocco" to "Trade via Morocco," reflecting a deliberate repositioning.

Events

Academic events

A comparative look at Morocco's development: a presentation by Mr. Mohammed Boutaleb at the UEMF

The Euromed University of Fez hosted Mr. Mohammed Boutaleb, former Minister of Energy and Mines, as part of its Conference Series. Under the theme "The Development of Morocco Seen from Different Angles," he shared his experience and analyzed the main economic, social, and territorial challenges facing the Kingdom.

He highlighted the ongoing structural transformations as well as the importance of sustainable, inclusive development adapted to local realities.

The conference proved to be an enriching experience for the students, fostering learning and dialogue. It concluded with an interactive exchange, and UEMF thanked Mr. Boutaleb for his inspiring presentation, consistent with its mission to educate engaged citizens.

A new culture to rethink the world: a lecture by Professor Mohamed Zinelabidine

As part of our Conference Series, we had the honor of welcoming Professor Mohamed Zinelabidine, Director of Culture and Communication at ICESCO, for a conference entitled: "A new culture to rethink the world".

Through a dense and inspiring intervention, Mr. Zinelabidine offered an in-depth reading of contemporary cultural changes and the fundamental role of culture in building more conscious, inclusive societies open to dialogue.

The conference highlighted the role of the artist in our societies, the structural, economic, and symbolic challenges they face, and the reasons why it remains difficult today to make a living fully from culture and art. It offered a clear-eyed reflection on the social, institutional, and economic recognition of artistic professions.

In front of an audience of students, researchers and teachers, this meeting opened a space for rich dialogue around culture as a force for thought, engagement and social transformation, reaffirming its central role in the dynamics of human development and intercultural cooperation.

AI and electric mobility: towards a new era of urban mobility in Morocco

We are delighted to share that our co-founder, Brahim El Bekkali, recently met with Mr. Ryad Mezzour, Minister of Industry & Trade, and Ms. Amal El Fallah Seghrouchni, Minister of Digital Transition & Administration Reform, at the Euromed innovation center (EIC)- a hub of innovation excellence in Morocco. **MA**

At POGO, we are merging AI-driven urban data with electric mobility to empower smart, sustainable, and safe urban mobility. From our advanced data analytics to our medium-term vision of a 100% Made in Morocco electric moped by POGO, we are committed to national industrial excellence.

The journey toward digitized and carbon-neutral urban mobility is picking up speed across our Moroccan cities. Stay tuned — we're just getting started!

Changing our perspective on disability: towards an inclusive and equitable university.

As part of our Conference Series, the Euromed University of Fez organized a conference entitled: "Changing perspectives on disability: the inclusive university, a lever for equity and excellence", led by Dr. Khalid Benhassan and Professor Hajjoui Abderrazak.

Through this meeting, the speakers offered an in-depth reflection on the challenges of inclusion in higher education, highlighting the central role of the university in promoting equal opportunities and valuing all talents.

Drawing on their expertise in public health, rehabilitation and support for people with disabilities, they emphasized the need to move beyond traditional approaches to build more accessible, inclusive and tailored academic environments that reflect the realities of each individual.

The conference also provided an opportunity to examine perceptions of disability, inviting a renewed perspective based on inclusion, dignity and recognition of abilities, rather than limitations.

Rich in exchanges and perspectives, this meeting highlighted the importance of placing inclusion at the heart of university policies, as a lever for equity, but also as a factor of excellence and social transformation.

UEMF Youth Debate: Reflecting on the link between the individual and collective ethics in Moroccan society

As part of its mission to promote academic dialogue, citizenship, and youth engagement on major societal issues, the Euromed University of Fez (UEMF) organized the EUROMED Youth Debate on the theme: "Individual and Collective Ethics in Morocco: What Correlation for What Societal Project?" This event brought together students from the Faculty of Humanities and Social Sciences (FSHS), the Euromed Business School (EBS), and the Institute of Legal and Political Sciences (ISJP) to foster critical reflection and discussion on the challenges of living together, citizenship, and collective responsibility.

Through a series of thematic panels, participants analyzed the relationship between individual behaviors and collective values in contemporary Moroccan society. The discussions explored notions of citizenship, freedom, social cohesion, public order, and individual responsibility, while also considering the social, economic, and cultural transformations that influence behaviors within the community.

The discussions also focused on factors that could strengthen collective ethics, civic engagement, and mechanisms that promote greater social cohesion. Students were invited to suggest avenues for reflection and solutions aimed at promoting respect for shared values, civic participation, and the development of a more inclusive and equitable society.

Seminars, conferences and congresses

The UEMF is hosting the first day of the NEGIA Summit: Architecture for the Future Generation

The Euromed University of Fez had the honor of hosting, last Wednesday, the first day of the NEGIA Summit (Next Generation Impact Architects), an event organized by the Federation of Francophone Architects of Africa (FAFA), around the theme "Architecture for the future generation".

This inaugural day, held at the University Conference Centre, brought together young architects, urban planners and experts from across the African continent to collectively reflect on the challenges and prospects of African architecture in the face of contemporary technological, environmental and societal issues.

The discussions focused on several major themes, including the impact of new technologies on architectural design, the presentation of the texts and statutes of the G40 (the FAFA Group of Architects Under 40), as well as the role of younger generations in the sustainable transformation of African cities.

For the students of the Euromed School of Architecture, Design and Urbanism (EMADU), this meeting was an enriching learning experience, offering them the opportunity to interact directly with young architects, international experts, and representatives of African professional bodies. It broadened their perspective on the realities of the profession, while highlighting the central role of creativity, technology, and sustainability in contemporary architecture.

This first day of the NEGIA Summit was distinguished by a spirit of inspiration, collaboration and intergenerational transmission, faithful to the values of openness and excellence upheld by the Euromed University of Fez.

Fez hosts the 70th^e FIJET World Congress: UEMF at the heart of the dialogue between tourism and media

Fez hosted the 70th^e The 10th edition of the World Congress of the International Federation of Journalists and Writers of Tourism (FIJET) brought together more than 250 professionals from 70 countries to discuss developments in tourism and the role of the media in its sustainable promotion. The Euromed University of Fez played a central role by hosting the opening ceremony and the International Forum, reaffirming its position as a space for intercultural dialogue, innovation, and scientific cooperation. The congress also highlighted the region's heritage and sustainable development initiatives, while addressing current challenges in the tourism sector, including technological innovation and the ecological transition.

Rihab Forum: Rethinking the City at UEMF

The Euromed University of Fez welcomed Professor Pascal Le Brun-Cordier, associate professor at the Sorbonne School of Arts and co-founder of the Cultural Urbanism Movement, for a conference entitled "The Gold of Links: How to Breathe More Life into Our Cities".

Organized as part of the first Rihab Forum, this meeting provided a space for reflection on the role of human connections in the vitality of contemporary cities. The Professor emphasized the importance of designing urban spaces as places of conviviality, creativity, and solidarity, capable of strengthening community life and encouraging civic participation.

For students of the School of Architecture, Design and Urbanism (EMADU), this conference was a privileged opportunity to explore new approaches to urbanism, integrating culture and emotion as essential levers of a more humane and vibrant city.

The discussions allowed for the exploration of concepts such as the relational city and cultural urbanism, highlighting the role of the social and artistic dimension in shaping the territories of tomorrow.

Digital Earth 2026: an international workshop at the crossroads of innovation, civil engineering and sustainability

As part of its international openness and commitment to educational innovation, the Euromed University of Fez, in partnership with the University of Surrey, organised the Digital Earth 2026 workshop, bringing together for four days students from the Euromed Polytechnic School (EPS) and their British counterparts.

This immersive program allowed participants to work in mixed teams on the challenges of digitalization in the construction sector and sustainable development. Through practical and innovative activities such as 3D concrete printing, modular construction, and materials characterization tests, students were able to apply their theoretical knowledge to real-world situations.

Guided by academic and technical experts from both institutions, participants developed essential skills in innovation, intercultural collaboration and solving real-world problems.

This initiative illustrates UEMF's commitment to providing high-level international educational experiences, combining academic excellence, technological innovation and preparation for the challenges of sustainable construction of tomorrow.

Introductory seminar on Nudge: an exploration of the mechanisms at the heart of decision-making

Yesterday, we organised a seminar dedicated to the introduction of Nudge, bringing together students, teachers and participants around the contributions of behavioural sciences in understanding and guiding individual and collective decisions.

Hosted by Adil GazaliAhmed DahhoukiYacoub Diftar, ProfessorMohcine Zouaklmane Elhadart, this seminar allowed us to explore the cognitive foundations, behavioral biases and mechanisms that influence our choices, putting their applications into perspective in various contexts.

Discussions focused in particular on the integration of Nudge into public services, the training of engineers and the challenges of sustainable mobility, illustrating the potential of these approaches to design more effective policies and solutions, in line with the real behaviors of individuals.

A true space for reflection and dialogue, this seminar gave rise to enriching discussions, promoting the cross-fertilization of expertise and a better understanding of the interactions between science, engineering and public action.

An academic event that is fully in line with the UEMF's dynamic, aiming to promote innovative and interdisciplinary approaches to contemporary challenges.

Doctoral activities

Doctoral Thesis Defense in "Governance and Development" by Ms. Adjoba Audrey Paule N'ZE

This thesis examines institutional factors that explain differences in implementing the SDGs across territories, especially in Africa. It argues that sustainable development effectiveness depends more on local governance frameworks than on adopting universal standards.

After a literature review and bibliometric study, three key factors are identified: national institutional architecture, multi-stakeholder governance mechanisms, and the need for a multi-scalar approach. A theoretical framework based on regulation theory explains how institutional complementarity creates historical dependencies shaping governance.

Two case studies (Fez-Meknes region in Morocco and the Autonomous District of Abidjan in Côte d'Ivoire) reveal very different governance, financing, and intervention models. A qualitative analysis grid compares practices and shows that institutional logic and local power relations determine territorial trajectories

Cultural activities

Yennayer at the UEMF: a vibrant celebration of traditions and community

On the occasion of Yennayer, the campus of the Euromed University of Fez came alive to the rhythm of Amazigh traditions, celebrating a living culture deeply rooted in sharing and diversity.

Throughout the day, art, food, and music filled the university spaces, offering the university community a vibrant and emotionally rich experience. Artistic performances, cultural expressions, and convivial moments fostered a dialogue between heritage and modernity in a festive and inclusive atmosphere.

More than just an event, Yennayer at UEMF was a true time of gathering, highlighting the values of community, transmission and openness that enrich life on campus. A memorable day, marked by culture, creativity and community spirit.

Sports activities

Sporting and civic engagement: UEMF at the heart of the Fes Spiritual Marathon

As part of its commitment to well-being and active citizenship, the Euromed University of Fes participated in the Fes Spiritual Marathon as an official partner. On this occasion, the campus served as a checkpoint along the route, welcoming runners in a vibrant and friendly atmosphere.

University students also participated in this sporting event, demonstrating the values of pushing personal limits, teamwork, and collective commitment. Their participation reflects the university community's involvement in initiatives that promote a healthy and active lifestyle.

Beyond its sporting dimension, this participation reflects UEMF's desire to strengthen its connection with its local community by fully engaging in local social, cultural, and civic initiatives. It thus contributes to promoting an engaged university, connected to its city and an active participant in community development.

Diplomatic institutional visit

Visit to the infrastructure and innovation hubs of the UEMF

The institutional visit continued with a tour of the main facilities of the Euromed University of Fez, illustrating its integrated model based on innovation, excellence in education, and social engagement. The delegation notably visited the Euromed Sports Center, the Euromed Innovation Center (EIC), and the experimental farm of the Agritech cluster.

This immersive experience highlighted the university's efforts in developing innovative solutions, encouraging student entrepreneurship, and promoting sustainable technologies to address environmental and economic challenges. The visited facilities also demonstrated UEMF's commitment to student well-being, applied research, and the transition to a more sustainable and resilient development model.

Student events

Hygiene awareness in a primary school

On October 14, 2025, the Hands Club organized a hygiene awareness event at a primary school in Bensouda. The initiative aimed to educate students about the importance of personal and collective hygiene in preventing illness and promoting good health practices. Through age-appropriate explanations and interactive discussions, the children learned essential daily hygiene practices, contributing to a healthier and more responsible school environment.

Blood Donation Campaign – April 2 & 3, 2026

As part of its civic and solidarity actions, the Elite Club organized the "Blood Donation Campaign - April 2 & 3, 2026", an initiative aimed at raising awareness of the importance of blood donation and actively contributing to strengthening national reserves.

Over these two days, club members mobilized to encourage student and staff participation, while also ensuring logistical organization and providing optimal support to donors. This campaign resulted in a significant number of donations, contributing to saving lives and meeting the urgent needs of healthcare facilities.

Beyond its health impact, this initiative also provided a powerful moment for raising awareness and fostering solidarity, strengthening the spirit of commitment and social responsibility within the university community. It fully reflects the values of the Elite Club, founded on mutual support, volunteerism, and positive impact in service to society.

Solidarity Iftar – Ramadan 2026

As part of its Ramadan activities, Club Élite organized the "Solidarity Iftar – Ramadan 2026" initiative, aimed at promoting the values of solidarity, sharing, and civic engagement. This initiative involved preparing and distributing 150 iftar meals to people in need.

Made possible through the active mobilization of club members and the involvement of its partners, this initiative provided concrete support to beneficiaries, while strengthening the spirit of mutual aid and social cohesion, particularly significant during the holy month of Ramadan.

Beyond its humanitarian aspect, this action fully illustrates the Elite Club's identity as a committed actor, working towards a positive and lasting social impact. It also demonstrates the club's ability to initiate and lead solidarity projects with strong human value, responding to the needs of communities.

Tazouta Medical-Humanitarian Caravan – Sefrou Province

On March 8, 2026, the Elite Club of the Euromed University of Fez organized a mobile medical and dental outreach program in Tazouta, in the province of Sefrou, to benefit the local population. This humanitarian and healthcare initiative involved 15 doctors and 5 dentists, all working together towards a common goal: bringing healthcare closer to the inhabitants of rural areas and improving access to specialist consultations.

The mobile clinic provided medical consultations in several specialties, including gynecology (with ultrasound examinations), cardiology, gastroenterology, rheumatology, and dental care and consultations. Thanks to the commitment of healthcare professionals, student volunteers, and mobilized partners, this initiative helped meet the medical needs of many beneficiaries in a spirit of solidarity, prevention, and social support.

[ELITE Club Report 25-26](#)

School Health Caravan – Ben Khlif School Group, Ouled Mimoun 11/04

On April 11, 2026, Club Élite organized the "School Health Caravan – Ben Khlif School Group, Ouled Mimoun," as part of its community health and school-based prevention initiatives. This initiative aimed to promote the health and well-being of students while reinforcing preventative practices from a young age.

During the day, students received general medical consultations, dental care and procedures, as well as visual acuity tests. Oral health prevention workshops were also held, along with the distribution of toothbrushes and toothpaste, to raise children's awareness of good dental hygiene practices.

This initiative fully illustrates the Elite Club's commitment to youth health and prevention, while demonstrating its ability to organize comprehensive and structured interventions to serve school communities. It also reflects the club's spirit of solidarity and social responsibility towards children and their educational environment.

[ELITE Club Report 25-26](#)

SDG challenge: from idea to impact

On April 16, 2026, the Elite Club of the Euromed University of Fez organized an inspiring workshop entitled "SDG Challenge: From Idea to Impact," led by Hamid Taghlaoui. The workshop aimed to raise students' awareness of the importance of the Sustainable Development Goals (SDGs) and to encourage them to transform their innovative ideas into projects with concrete impact.

Through interactive discussions, case studies, and practical advice, participants were able to discover the various stages involved in designing, structuring, and developing initiatives with social, environmental, and economic objectives. Mr. Hamid Taghlaoui's presentation also highlighted the role of governance, leadership, and citizen engagement in the success of sustainable projects.

This workshop provided a space for inspiration, reflection and creativity, strengthening the entrepreneurial spirit and commitment of students to more inclusive and sustainable development.

[ELITE Club Report 25-26](#)

School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi 18/04

On April 18, 2026, the Elite Club organized the "School Health Caravan – Abbas El Amrani High School, Sbaa Rouadi," as part of its health and prevention initiatives for students. This action aimed to promote well-being and health prevention within the school environment.

During the day, students were able to receive general medical consultations, dental care and procedures, as well as visual acuity tests. In addition, oral hygiene workshops were held, along with the distribution of toothbrushes and toothpaste, to raise awareness among young people about the importance of hygiene and preventative care.

This intervention illustrates the Elite Club's commitment to improving student health and strengthening prevention from a young age, while demonstrating its ability to deploy comprehensive and structured health caravans, meeting the needs of local school communities.

[ELITE Club Report 25-26](#)

Aïn Chkef clean: ecological commitment for a sustainable future

On April 18, 2026, the Elite Club of the Euromed University of Fez organized an ecological clean-up action in the Ain Chkef forest, located around Fez, as part of its commitment to the Sustainable Development Goals (SDGs), in particular SDG 13 (Climate Action) and SDG 15 (Life on Land).

This environmental initiative is part of a civic effort to raise awareness among students and participants about the importance of preserving natural ecosystems and biodiversity. Through concrete actions such as collecting and cleaning up waste, volunteers contributed to the restoration of this forest area, which is often damaged by human behavior and a lack of environmental responsibility.

Beyond its operational aspects, this activity provided a genuine moment of collective awareness regarding the urgent need to protect our environment. It reinforced the values of responsibility, commitment, and ecological solidarity among the participants, while also illustrating the essential role of youth in the transition to sustainable development.

Through this action, the Elite Club confirms its commitment to actively participating in the SDG movement, translating ideas into concrete actions with a positive impact on society and the environment.

[ELITE Club Report 25-26](#)

Mobile Medical and Dental Clinic in Ksar Jdid 26/04

On April 26, 2026, the Elite Club of the Euromed University of Fez organized a medical-dental caravan in Ksar Jdid, in the province of Rissani, as part of its humanitarian and social actions aimed at strengthening access to care in rural and remote areas.

This initiative mobilized a team of healthcare professionals and volunteers to provide multidisciplinary medical consultations to local residents. The services offered covered several specialties, including cardiology, gastroenterology, gynecology, dermatology, and ophthalmology, in addition to dental consultations and care, as well as general medicine.

The caravan aimed to bring health services closer to local populations, promote early detection, and raise awareness of the importance of prevention and medical follow-up. It thus enabled comprehensive and accessible healthcare for beneficiaries.

Through this action, the Elite Club reaffirms its commitment to solidarity, health promotion and social development in service of vulnerable communities.

[ELITE Club Report 25-26](#)

Humanitarian caravan in Ksar Jdid: 150 blankets to support rural families

On May 3, 2026, the Elite Club of the Euromed University of Fez organized a humanitarian caravan to Ksar Jdid, in the province of Rissani, as part of its solidarity actions aimed at supporting rural populations and improving their living conditions.

This initiative is part of a local humanitarian approach, driven by values of mutual aid, solidarity, and social commitment. It enabled the distribution of 150 blankets to beneficiary families, helping them cope with the weather and meet their basic daily needs, particularly during cold periods.

Beyond the material aid, this caravan provided a powerful moment of sharing and connection with the residents, strengthening the bonds between the volunteers and the local population. This initiative reflects the Elite Club's commitment to providing concrete solutions to the needs of vulnerable communities and contributing to the improvement of their living conditions.

Through this type of initiative, the Elite Club confirms its long-term commitment to humanitarian action, social development and territorial solidarity.

Mobile dental clinic in Izlafene: strengthening access to care and prevention

On May 9, 2026, the Elite Club of the Euromed University of Fez, in partnership with the IAA Club of the Faculty of Sciences and Techniques of Fez, organized a medical and dental caravan in Izlafene, in the province of Taza, as part of its community health and prevention initiatives. This initiative provided medical consultations in general medicine, cardiology, and gynecology, along with the dispensing of medication to diagnosed patients. A significant oral health prevention component was also implemented through awareness campaigns and the distribution of 400 toothbrushes and toothpaste to beneficiaries. Through this initiative, the two clubs helped bring healthcare services closer to rural populations while reinforcing awareness of the importance of prevention and medical follow-up.

[ELITE Club Report 25-26](#)

Humanitarian action in Izlafene: solidarity and support for rural families

As part of the medical and humanitarian caravan organized on May 9, 2026, in Izlafene, the Elite Club of the Euromed University of Fez and the IAA Club of the Faculty of Sciences and Techniques of Fez also carried out a significant humanitarian effort to benefit families in the region. This act of solidarity enabled the distribution of 150 food baskets to beneficiary families, supporting vulnerable populations and contributing to the improvement of their living conditions. In addition, recreational and entertainment activities were organized for children, creating a moment of sharing, joy, and connection with the local community. This initiative reflects the values of mutual aid, solidarity, and civic engagement upheld by both clubs in support of social and human development.

UEMF's Got Talent: a 6th edition dedicated to talent, creativity and emotion

As part of its policy to promote student well-being and the development of artistic and creative skills, the Euromed University of Fes (UEMF) organized the 6th The UEMF's Got Talent edition, a cultural event that has become a key part of university life, brought together students, teachers, and members of the university community to celebrate creativity, cultural diversity, and artistic expression.

Throughout the evening, participants presented a variety of performances showcasing their talents in different areas such as singing, dancing, stage performance, and other forms of artistic expression. This event provided students with a platform to share their passions, develop their self-confidence, improve their communication skills, and strengthen their ability to speak in front of an audience.

Beyond its artistic dimension, UEMF's Got Talent provides a space that fosters inclusion, diversity, and cohesion within the university community. By showcasing individual talents and the cultural richness of students, this event helps strengthen the sense of belonging to the University and promotes an environment that respects the diversity of backgrounds, cultures, and forms of expression.

This initiative illustrates UEMF's commitment to a holistic educational approach that goes beyond the acquisition of academic knowledge to also foster students' personal development, creativity, initiative, and social skills. It thus contributes to creating a stimulating university environment conducive to individual growth and the development of talents.

Partnership

GIZ Training Programme - Dorscht Impact (Circular Water Economy)

The UEMF was selected to implement a specialized training program within the framework of the GIZ – Dorscht Impact partnership, focusing on the strategic theme of the circular economy of water in urban areas. This program, deployed in several Moroccan cities (Rabat, Marrakech and Tangier), is structured into 4 thematic cohorts: Cohort M1 intended for institutional actors (agencies and ministries) on the regulation, governance and management of water-related projects (sessions held in Rabat on February 4-5 and 11-12, 2026); Cohort M4 focuses on strategic urban planning and the integration of the EccEau concept (sessions in Marrakech and Tangier in February 2026); Cohort M2 targets teachers and academic staff on the transition from theory to practice (sessions planned in Tangier and Marrakech in March-April 2026); and Cohort M3, designed for water sector professionals, focuses on the 5Rs of Water concept (sessions planned in Tangier and Marrakech in April 2026). This program positions UEMF as a leading player in training on environmental issues and the sustainable management of water resources in Morocco.

Continuing Education Program for Elected Officials – Municipal Councils of the Province of Taounate (2024-2025)

The UEMF has implemented an ambitious Continuing Education Master Plan for members of the Municipal Councils of Taounate Province, with 208 participants per session, all held in Taounate. This multi-thematic program covers 8 essential modules for good local governance, delivered according to the following schedule:

- Local development (funding and partner search techniques) – April 29 to May 3, 2025
- Administrative policing (practice of administrative policing) – May 14-15, 2025
- Land development and urban planning – May 28-29, 2025
- Public Asset Management – June 11-12, 2025
- Local Finance and Accounting – June 25-26, 2025
- Public lighting – July 9-10, 2025
- Participatory Democracy – October 29-30, 2025
- Internal Control System – November 26-27, 2025

This large-scale program directly affects 208 local elected officials per session, representing a major investment by the UEMF in strengthening local governance in the Province of Taounate, by supporting elected officials in the effective exercise of their mandates in service to their fellow citizens.

Continuing Education Program for Elected Officials – Municipal Councils of the Province of Moulay Yaacoub (2024-2025)

In parallel with the Taounate program, the UEMF has deployed a Master Plan for Continuing Education for members of the Municipal Councils of the Province of Moulay Yaacoub, with 52 participants per session, all held at the UEMF campus. This program covers 8 complementary thematic modules, delivered according to the following schedule:

- Local taxation – April 24-25, 2025
- Administrative police – May 21-22, 2025
- Community Heritage Management – June 4-5, 2025
- Local taxation, local finances and accounting – June 18-19, 2025
- Internal Control System – July 2-3, 2025
- Advocacy and Persuasion Techniques – October 15-16, 2025
- Local development (funding and partner search) – November 12-13, 2025
- Territorial marketing and improving territorial attractiveness – December 10-11, 2025

Holding these training sessions directly on the UEMF campus demonstrates the university's commitment to welcoming local elected officials in a stimulating academic environment, promoting exchanges and the sharing of best practices among participants from different municipalities in the province.

Bernspire 2025-2026: Applications open for international student competitions

Bernspire, a Swiss association committed to education, innovation and the development of young talent internationally, announces the official opening of applications for the 2025-2026 edition of its academic competitions.

Organized annually on a supra-regional scale, Bernspire's Graduation Project Challenges are aimed at final-year university students in the fields of engineering and social sciences. This initiative seeks to promote innovative graduation projects that offer concrete solutions to contemporary technological, societal, and environmental challenges.

The competitions bring together participants from several international universities and are evaluated by a jury composed of academic experts and professionals from different countries, thus offering candidates international visibility and a unique opportunity to showcase their research and innovation work.

Applications are open to students preparing their final year project during the 2025-2026 academic year.

Students wishing to participate can consult the application procedures and submit their projects via the official Bernspire website:
www.bernspire.com/the-details

The results of previous editions and the winning projects can be viewed via:
www.bernspire.com/2024-2025-winners

The Euromed University of Fez and the Cervantes Institute of Fez seal a strategic partnership in service of Euro-Mediterranean intercultural dialogue

In a dynamic of strengthening academic and cultural exchanges between the two shores of the Mediterranean, Euromed University of Fez and Cervantes Institute of Fez have formalized a cooperation agreement marking a new stage in their joint commitment to intercultural dialogue and bringing people closer together.

The signing ceremony took place on Wednesday, May 13th, in the presence of Professor Mostapha Bousmina, President of the Euromed University of Fez, and Mr. Òscar Pujol Riembau, Director of the Cervantes Institute of Fez. The event was also graced by the presence of His Excellency Enrique Ojeda Vila, Ambassador of Spain to Morocco, demonstrating the importance attached to this cultural and academic cooperation initiative.

This agreement reflects a shared ambition: to make language and culture essential drivers of rapprochement, mutual understanding, and openness between Mediterranean societies. Through this alliance, the two institutions reaffirm their commitment to promoting intellectual exchange, intercultural dialogue, and academic synergies around Hispanic culture and language.

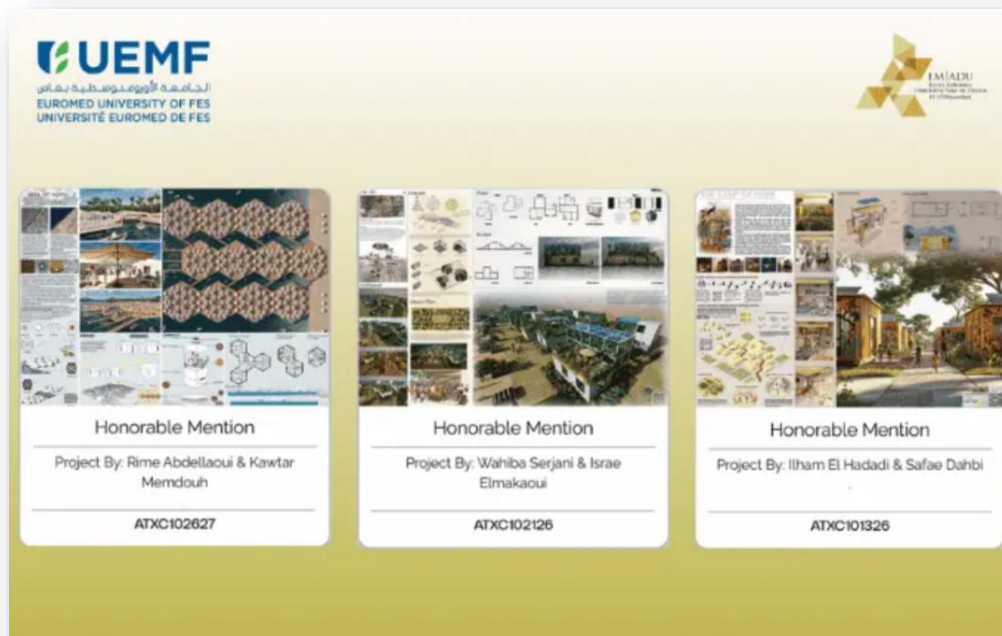

This partnership will pave the way for the implementation of a rich and diverse program of joint initiatives, including conferences, workshops, training programs and cultural events designed to foster interactions between students, teachers and cultural actors.

Beyond the institutional scope of this cooperation, this initiative illustrates a common vision based on openness, the transmission of knowledge and the development of a Euro-Mediterranean space where culture constitutes a strategic lever for sustainable rapprochement between academic communities and future generations.

Awards and Distinctions

ATX Design of the Year 2025: Three groups of EMADU students recognized at the international competition

The Euromed University of Fez (UEMF) is proud to announce that six students (3 pairs) from the School of Architecture, Design and Urbanism (EMADU) have obtained three honorable mentions in the prestigious international competition ATX Design of the Year 2025, organized by Architerrax, an international learning platform dedicated to the dissemination of knowledge in architecture and design.

Under the guidance of Professor Jassim Benlemlih, the students competed in the “Design for Change” category, which highlights innovation and social impact through visionary architectural solutions.

The competition challenged participants to develop architectural projects for war refugees, focusing on concrete needs such as housing, community spaces, education, and healthcare. Beyond emergency interventions, the aim was to imagine sustainable, dignified, and resilient solutions to improve the living conditions of displaced populations.

The projects presented by the EMADU students impressed the jury with their creativity, their humanistic approach, and their ability to propose innovative solutions to global challenges. This international recognition testifies to the quality of the education provided at EMADU and the commitment of its students to making a positive contribution to current societal challenges.

UI GreenMetric International Ranking 2025

The Euromed University of Fez has been ranked the number one university in Morocco in the UI GreenMetric 2025 international ranking and is among the top 400 universities worldwide, representing 105 countries. It notably surpasses Ibn Tofail University, Mohammed VI Polytechnic University, and Mohammed V University of Rabat.

This ranking, based on 51 indicators related to sustainable development, innovation, teaching and research, confirms the national and international leadership of the UEMF.

In 2025, the university was also ranked 1st in Morocco and 2nd in Africa (behind the University of Cape Town) by the Round University Ranking, received the International Alliance University of the Year 2025 award, and had eight of its researchers ranked among the top 2% most impactful in the world according to Stanford's ranking.

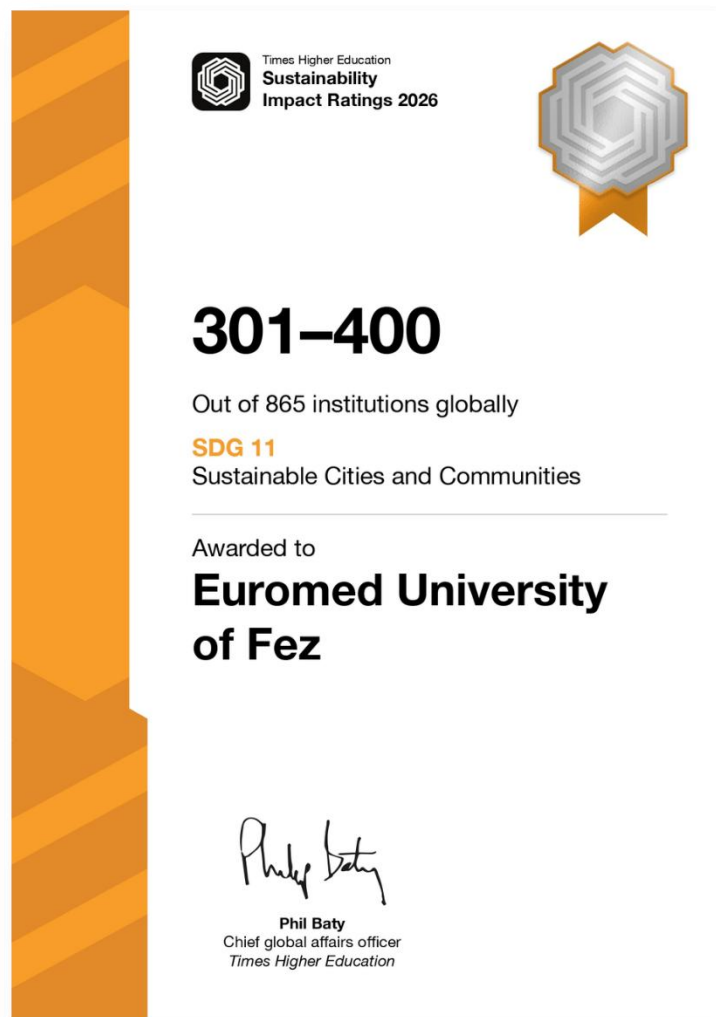

These results are the outcome of a strategy focused on:

- Academic excellence,
- Research and innovation,
- International openness,
- Collaboration with the socio-economic world,

and the well-being of the university community.

UEMF's performance in THE Impact Rankings 2026 – SDG 11

In the THE Impact Rankings 2026, the Euromed University of Fez (UEMF) was ranked in the 301–400 range out of 865 institutions for SDG 11: Sustainable Cities and Communities. This recognition highlights its contributions to sustainable development, mobility, territorial resilience, heritage preservation, and the development of a responsible campus.
