SDG2 report : “Zero” hunger

Food aid

The Covid-19 pandemic has significantly disrupted the food system and increased the need for food assistance. During the Covid-19 epidemic in Morocco, restrictions impacted both food suppliers as well as family meals, diet and food safety. Surveys have shown that many people and particularly young people have adopted unhealthy eating habits, with the stress of lockdown affecting their diet and health.

Several solidarity and concrete actions have been successfully carried out at the UEMF to fight against hunger at the national and local level:

- In mid-March and as soon as the fund dedicated to the management and fight against Covid-19 was announced, UEMF staff members (presidential team, deans, directors, professors and administrative and support staff) participated with all or part of their monthly salary. The amount paid to this fund exceeds one million dirham.
- The UEMF is a citizen University which has mutual aid, solidarity and assistance in its DNA. The UEMF quickly came to the aid of people in need during the health crisis, particularly during the holy fasting month of Ramadan. 1000 complete baskets containing several foodstuffs and supplies were offered to the needy in the Fez region with the help of local authorities.
- The UEMF provided multiple assistance to foreign students stranded in its university residences. In addition to multiple disinfections of residences, foreign students received help and kindness from the University: packed lunches, food, hydro-alcoholic gel, psychological support and various other types of assistance.
- University scholarship holders benefit from a top-up of their UEMF cards at the start of each month to guarantee them permanent access to the university restaurant and the UEMF shop.

Training and learning

UEMF through its Biomedical and Biotechnology Engineering School BiomedTech <https://www.ueuromed.org/etablissement/ecole-euromed-dingenieurs-biomedtech/filieres> organizes initial and continuing training modules on access to knowledge on food safety. These modules allow the acquisition of knowledge and skills in this area and access to technology in food safety.

At the R&D level, a large regional innovation center called Agritech <https://www.ueuromed.org/structure-innovation/agritech>, is under development and will aim to contribute to the emergence of the insufficiently exploited potential of the Fès-Meknes region in its traditional activities (notably the agri-food industry) and the development of territorial growth relays that create wealth and jobs, in particular through the intersection of research, innovation and entrepreneurial development in the aforementioned sectors, taken individually or in synergy.

Fight against waste

The UEMF encourages subcontractors to control the quality of food and avoid any waste. The energy exploitation of organic waste for the production of bioenergy (biogas, liquid bio-carbons) and compost is currently being tested in student projects.

- Choice of food suppliers
- Protection and conservation of food products in compliance with the national standards of the National Food Safety Office (ONSSA) <http://www.onssa.gov.ma/>
- Delivery of food products in the best conditions
- Anticipating public needs by analyzing responses to questionnaires
- Menus composed with a dietician in response to individual needs: light menu, full menu
- Structure of meals and consideration of customers' specific needs (quantities/portions served)

- Training of restaurant staff in waste sorting
- Daily donation of leftover food to charities
- Composting of peelings

Support for women's cooperatives

Students often organize forums and fairs for women members of cooperatives to exhibit local agri-food products. The UEMF thus encourages organic production and promotes fair trade. The UEMF thus gives priority to the purchase of products from local and sustainable sources. Eating organic has become a key trend in society, to the point of wanting to convert several agricultural areas to organic farming. An ambition on which the Moroccan government's Green Plan is based. Thousands of jobs could be created by 2030.

Project research and incubation

FSF

The Fez Smart Factory Ecosystem is launching its first competition for the admission of the first project leaders into its industry 4.0-oriented incubator. This competition is aimed at any natural person, individual or team, carrying out a project for the development of an industrial unit for innovative product(s) with high added value, and competitive, optimizing its performance thanks to the implementation of Industry 4.0 concepts and technologies. The project must fall within one of the following sectors: agri-food industries, etc. <https://fsfindustry.com/concours/>

Hackathon "Euromed Sustainable Impact Challenge"

Green Wings is a mobile application created by a group of 8 students in Business, Artificial Intelligence and Design at UEMF. This application aims to promote RAM's CSR actions and instill them in the habits of employees through three main aspects: carpooling, catering, as well as eco-scoring and eco-ranking.

- Carpooling will help minimize the carbon footprint.
- The catering component will allow employees to confirm or not their presence at the company restaurant the next day, as well as to choose the foods that would make up their menu in order to avoid food waste.
- Eco-scoring is a score calculated on the basis of 3 factors: consumption of water and electricity internally and externally among RAM's various employees, the rate of involvement in carpooling and eco-friendly activities. -responsible for RAM, and finally volunteering. This score will result in an eco-ranking which will elect the best eco-friendly, which will create an atmosphere of competition and play and will allow business to be combined with pleasure.

International cooperation

Pr. Hafsa El Bekri participates in the “Model World Trade Organization” in St. Gall and Geneva

Professor at the Euromed Business School of the UEMF, Pr. Hafsa El Bekri is participating in the “Model World Trade Organization” work in Saint Gall and Geneva from April 6 to 13.

The work took place at the Kantonsrsaal, at the World Trade Organization in Geneva. During his participation, Pr. Hafsa El Bekri had a double mission:

Observation and assistance to 72 representatives of the best universities worldwide during negotiations.

Take part in the Canadian delegation to lead the negotiations of the “Committee of Environmental Footprint of Traded Food”.

Actions to combat famine between 2022 and 2023

Solidarity action: Hot meals December 7, 2022

The Hands club prepared a variety of hot meals which were distributed for the benefit of 50 homeless people.

Solidarity action: distribution of food baskets April 7, 2023

As part of its solidarity actions, the Rortact club organized on April 7 an action to distribute Ramadan baskets for the benefit of poor families in the Bab Ftouh district and to residents of the Ahly center in the city of Fes.

Hands club solidarity action April 12, 2023

The Hand club organized a social action on April 12 for the benefit of residents of the Garwawa orphanage. The day was marked not only by the programming of a set of activities and a collective trip but also by the distribution of bags of clothing.

Collective iftar center Bendriss

On the occasion of the month of Ramadan, the Rotaract club offered a collective trip on April 11 for the benefit of the residents of the Abdelaziz Ben Driss Child Protection Center. The day was also marked by the organization of several sporting and artistic activities for the benefit of young residents.

Other activities

Workshop on AI applied to agriculture and food security May 15, 2023

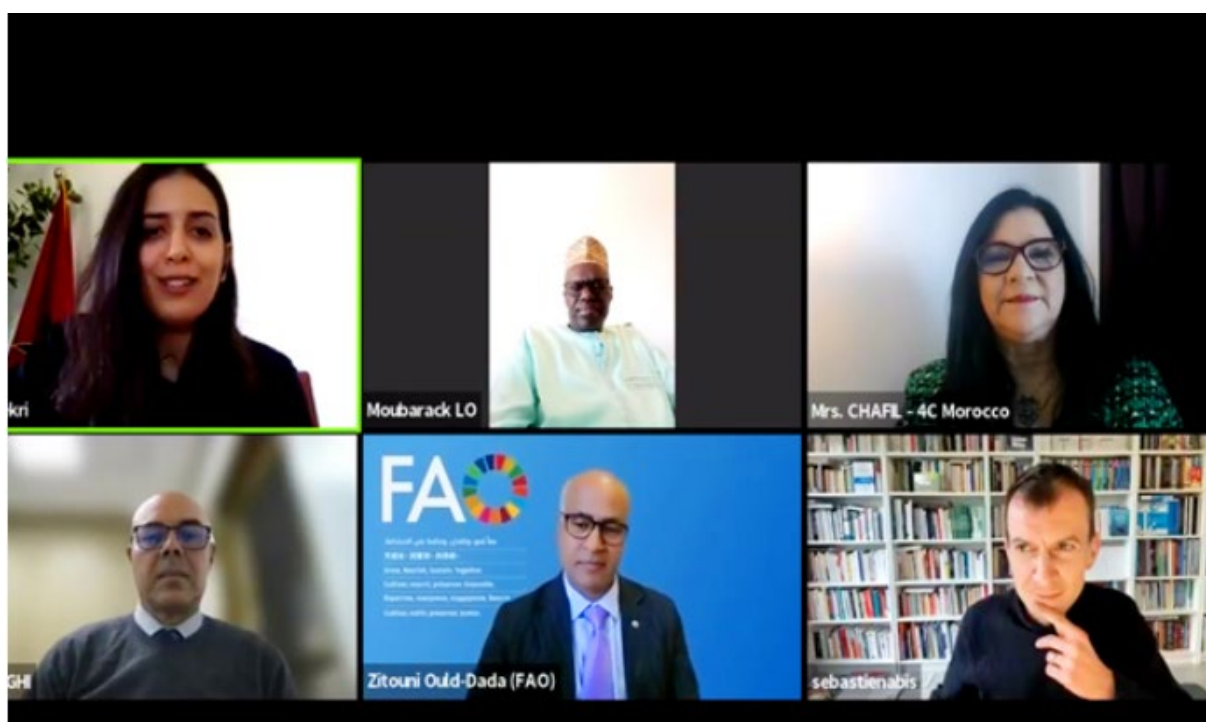

The Euromed University of Fez, in collaboration with its partner Shenkar College of Engineering and Design, is organizing two workshops on May 15 and 16, 2023, one on AI applied to agriculture and food security and the other covering intelligent transport (ITS), mobility and urban planning.

The conference, the work of which was launched by the respective Presidents of the two institutions, Pr. Mostapha BOUSMINA of Euromed University and Pr. Sheizaf RAFAELI of Shenkar College, was punctuated, on the first day, with multiple interventions by researchers and students from the 2 universities, moderated and led by Professors Salim BOUNOU (Euromed) and Yoram HALEVI (Shenkar).

The presentations highlighted the results of the work carried out by the different teams, in this case in advanced irrigation, optimal control, sensors for intelligent agriculture, bio-packaging using the properties of glycans, in addition innovative outputs in the fields of fertilizers, treatment and valorization of mining waste and wastewater.

Round table: water, agriculture and food security, building a Nexus approach for the climate change narrative in Africa February 2, 2023

The Research Institute for European, Mediterranean, and African Studies (RIEMAS), Think-Tank of the Euromed University of Fez organized its first round table of the 1.5 Hours for Climate - Africa Moonshot Initiative, which focused on the theme "Water , Agriculture and Food Security: Building a Nexus Approach to the Climate Change Narrative in Africa".

1.5 hours for Climate - Africa Climate Moonshot Initiative, is a project supported by RIEMAS, 4C Morocco, Euro-Mediterranean Economists Association - EMEA, Mercure Cab Fatima B. NDOYE and Positive Agenda Advisory. These monthly thematic meetings aim to bring together high-level guests and regional experts around major issues related to climate action in order to contribute to the creation of a dynamic conducive to advocacy in favor of a climate agenda anchored in African realities ahead of COP28.

This round table was moderated by Professor Hafsa El Bekri, teacher at Euromed Business School and Co-Director of RIEMAS.

The surge of solidarity is organized at the Euromed University of Fez following the earthquake which struck our Kingdom on 09/08/2023

Following the recent earthquake which struck the Al Haouz region, our University mobilized to participate in the surge of national solidarity by implementing three concrete actions:

- The institutional and financial participation of the UEMF in the Special Fund for Managing the Impact of the Earthquake in Morocco (a donation of 1.6 million Dirhams);
- The provision of aid for students and staff from disaster areas.
- The contribution of 400 thousand dirhams in the form of new supplies sent by truck to the disaster areas and including beds, blankets and kitchen supplies
